

## A C K N O W L E D G E M E N T

I take the pleasure to express my heartfelt sense of gratitude and reverence to Prof. A.K. Chakravarty, without whose constant and ever watchful guidance this work would not have taken shape. I shall remain ever grateful to him for his constant encouragement and tireless interest despite his tight schedule as Director, Centre for Life Sciences, University of North Bengal.

I feel very much indebted to Dr. P.D. Gupta, Assistant Director, Centre for Cellular & Molecular Biology, Hyderabad, for the training in electron microscopy and later, for extending the full facilities of his laboratory for the TEM studies. I am also indebted to the Professors of our Centre for Life Sciences for providing different facilities and generous encouragement during my tenure as a research worker.

I am specially thankful to Drs. Amal K Chakraborty, T.K. Chaudhuri, U.K. Maitra and B.N. Paul for their invaluable suggestions and help from time to time. Special thanks are also

due to my labmates, Mrs. Asha Sinha, Miss Subhra Jha for thier kind co-operation during the course of work and Mr. A. Saha for his help in the final phases of the work.

I am also thankful to the staff of this Centre for their co-operation, to Mr. M. Chakraborty for his excellent typographical work and Mr. N.C. Ghosh for the superb drawing of figures.

Finally, I take the opportunity to express my deep sense of gratitude to my parents for their blessings and bearing with me throughout the course of work.
