

Contents

1. Introduction	1 - 7
2. Literature review.....	8 - 58
3. Material and methods.....	59 - 91
3.1. Soil samples	59
3.2. Isolation of microorganisms from soil.....	59
3.3. <i>In vitro</i> testing for antagonism to pathogens.....	60
3.3.1. Solid media.....	60
3.3.2. Liquid media.....	60
3.4. Selection and identification of antagonistic microorganisms.....	60 - 63
3.4.1. Microscopic observation.....	60 - 61
3.4.2. Biochemical tests.....	61 - 63
3.5. Test organisms.....	63
3.5.1. Fungal Culture.....	63
3.5.2. Source of culture.....	63
3.6. Assessment of mycelial growth.....	64 - 65
3.6.1. Solid media.....	64
3.6.2. Liquid media.....	65
3.7. Assessment of bacterial growth.....	65
3.8. Plant materials.....	65 - 68
3.8.1. Tea	65
3.8.1.1. Selection.....	65
3.8.1.2. Propagation of Tea	66
3.8.1.3. Plantation.....	68
3.8.2. Chickpea.....	68
3.8.3. Mungbean.....	68
3.8.4. Marigold.....	68
3.9. <i>In vitro</i> characterization of PGPR activity of selected bacteria.....	69 - 70
3.9.1. IAA production.....	69
3.9.2. Phosphate solubilization.....	69
3.9.3. Siderophore production.....	69
3.9.4. HCN production.....	70
3.9.5. Chitinase production.....	70
3.9.6. Volatile production.....	70
3.10. Application of Bacteria.....	71
3.10.1. Soil drench.....	71
3.10.2. Foliar spray.....	71
3.10.3. Seed bacterization.....	71
3.11. Inoculation Techniques.....	72 - 73
3.11.1. Preparation of pathogen inocula.....	72
3.11.2. Inoculation of healthy tea plants.....	72
3.12. Disease assessment.....	73
3.13. Determination of plant growth promoting activity.....	74
3.13.1. Tea.....	74
3.13.2. Chickpea and Mungbean.....	74

3.13.3. Marigold.....	74
3.14. Extraction of antifungal compounds from rhizobacteria.....	74 -75
3.14.1. Cell free culture filtrate.....	74
3.14.2. Solvent extraction.....	75
3.14.3. Bacterial cell.....	75
3.15. Bioassay of active principle.....	75 -76
3.15.1. Spore germination.....	75
3.15.2. Radial growth.....	76
3.15.3. Agar cup bioassay.....	76
3.15.4. Liquid media.....	76
3.16. Biochemical analyses.....	77 - 80
3.16.1. Chlorophyll.....	77
3.16.2. Phenols.....	77
3.16.3. Extraction of Enzymes.....	78 - 79
3.16.3.1. β -1, 3-glucanase.....	78
3.16.3.2. Chitinase.....	78
3.16.3.3. Phenylalanine ammonia lyase.....	78
3.16.3.4. Peroxidase.....	79
3.16.4. Assay of Enzyme activities.....	79
3.16.4.1. β -1, 3-glucanase.....	79
3.16.4.2. Chitinase.....	79
3.16.4.3. Phenylalanine ammonia lyase.....	80
3.16.4.4. Peroxidase.....	80
3.17. Catechin.....	80
3.17.1. Extraction.....	80
3.17.2. HPLC analysis.....	80
3.18. Immunological studies.....	81 - 88
3.18.1. Preparation of antigens.....	81
3.18.1.1. Bacterial antigens.....	81
3.18.1.2. Fungal antigens.....	81
3.18.1.3. Soil antigens.....	81
3.18.2. Estimation of protein content and SDS-PAGE analyses of antigenic proteins.....	82 - 85
3.18.3. Raising of polyclonal antibodies.....	85 - 85
3.18.4. Purification of IgG.....	86 - 87
3.18.5. Immunodiffusion.....	87 - 88
3.19. Determination of bacterial sustainability in soil.....	88 - 90
3.19.1. ELISA.....	88
3.19.2. Dot-blot.....	90
3.20. Determination of pathogen in soil by immunological methods.....	91
3.20.1. ELISA.....	91
3.20.2. Dot-blot.....	91
3.21. Preparation of talc based PGPR formulation and its application in the soil.....	91
4. Experimental.....	92 - 161
4.1. Isolation of microorganisms from soil, screening and selection of antagonists.....	92 -98

4.2. Characterization and identification of selected antagonists.....	99 -102
4.3. Characterization and identification of fungal isolates.....	103
4.4. Cultural conditions affecting the growth of <i>P. hypobrunnea</i>	103 - 110
4.4.1. Media.....	103
4.4.2. Incubation period.....	107
4.4.3. pH	107
4.4.4. Carbon source.....	109
4.4.5. Nitrogen source.....	109
4.5. Cultural characteristics of bacterial antagonists.....	110 - 114
4.5.1. pH.....	112
4.5.2. Temperature.....	112
4.5.3. Media.....	112
4.5.4. Incubation period.....	114
4.5.5. Antibiotic sensitivity.....	114
4.6. <i>In vitro</i> tests of antagonists against test fungi.....	114 - 117
4.6.1. Solid media.....	114
4.6.2. Liquid media.....	117
4.7. Effect of application of rhizobacteria on the growth of plants.....	117 - 127
4.7.1. Chickpea and Mungbean.....	117
4.7.2. Marigold.....	120
4.7.3. Tea.....	120
4.7.3.1. Seedling.....	120
4.7.3.2. Two years old plants.....	125
4.7.3.3. Tea bushes.....	125
4.8. Effect of co-inoculation with bacteria on growth of tea seedlings....	128 129
4.9. <i>In vitro</i> determination of mechanism of action of selected antagonists.	130 - 133
4.9.1. IAA production.....	130
4.9.2. Phosphate solubilization.....	130
4.9.3. Siderophore production.....	130
4.9.4. HCN production.....	131
4.9.5. Chitinase production.....	131
4.9.6. Volatile production	131
4.10. Bioassay of active principle from <i>B.pumilus</i> and <i>P.lentimorbus</i> against test fungi.....	134
4.10.1. Cell free culture filtrate.....	134
4.10.2. Solvent extraction	134
4.10.2.1. Bioassay of solvent extracts from <i>B.pumilus</i> and <i>P.lentimorbus</i>	135 - 137
4.10.2.1.1. Spore germination.....	135
4.10.2.1.2. Radial growth	137
4.11. Optimization of active principle production by antagonists.....	137 - 144
4.11.1. Effect of incubation period.....	140
4.11.2. Effect of different media.....	140
4.11.3. Effect of carbon sources.....	141
4.11.4. Effect of different pH.....	142
4.12. Effect of <i>B.pumilus</i> on disease development in tea.....	142 - 144
4.13. Biochemical changes in tea leaves induced by application of	

<i>B.pumilus</i>	145 - 155
4.13.1. Chlorophyll.....	145
4.13.2. Catechin analysis.....	145
4.13.3. Phenols and Defense enzymes.....	152
4.13.3.1. Phenol content.....	152
4.13.3.2. Enzymes activity.....	153
4.14. Immunodetection of <i>P. hypobrunnea</i> and <i>B.pumilus</i>	156 -159
4.14.1. Immunodiffusion.....	156
4.14.2. ELISA.....	156
4.14.3. Dot-blot.....	159
4.15. Studies on talc- based formulation of PGPR.....	159 - 161
4.15.1. Detection of PGPRs in bioformulation by ELISA.....	159
5. Discussion.....	162 - 174
6. Summary.....	175 - 176
7. References.....	177 - 205
