

TABLE OF CONTENTS

Chapter 1: Introduction	1
1.1 Preamble	1
1.2 Introduction	2
1.3 Main Results Of The Thesis	7
Chapter 2: Review of Relevant Concepts	11
2.1 Cantor Set	11
2.1.1 Introduction	11
2.1.2 Basic Definitions	12
2.1.3 Cantor function	15
2.2 Non Standard Analysis	17
2.2.1 Introduction	17
2.2.2 Approach to Non-Standard Analysis	17
2.2.3 Basic Definitions and Constructions of Extended Number Systems	19
2.2.4 The Purpose of Non-Standard Analysis	22
2.3 Non-Archimedean Ultra metric Theory	23
2.3.1 Absolute value on a Field	23
2.3.2 Topology	25
2.4 p-adic Number and Analysis	28
2.4.1 Introduction	28
2.4.2 p-adic expansions	28
2.4.3 The field of p-adic numbers Q_p	29

Chapter 3:	Non-Archimedean Extension of Real Number System	34
3.1	Introduction	34
3.2	Non-Archimedean model	35
3.3	Non-archimedean valuation: A few more properties	45
3.4	Completion of the Field of Rational Numbers	52
Chapter 4:	Application to Number Theory: Prime Number Theo-	
	rem	56
4.1	A Brief History	56
4.2	New Elementary Proof	57
4.2.1	Introduction	57
4.2.2	Dynamical Properties	59
4.2.3	Prime Counting Function	67
4.2.4	Scaling	68
4.2.5	Prime Number Theorem	70
Chapter 5:	Application to a Cantor set	72
5.1	Introduction	72
5.2	Cantor Set: New Results	72
5.3	Limit on a Cantor set	74
5.4	Differential increments	76
Chapter 6:	Applications to Differential Equations	78
6.1	Ordinary Differential Equations	78
6.1.1	First order Equation	79
6.1.2	Harmonic Oscillation	81
6.1.3	Van der Pol Equation	83
6.2	Diffusion to Anomalous Diffusion	85
6.2.1	Introduction	85

6.2.2	Diffusion	88
Chapter 7:	CONCLUDING REMARKS	91
Bibliography		93
