## **1. CHAPTER-I \_\_\_\_\_ 1-24**

### **INTRODUCTION**

- 1.1 General
- 1.2 Review of the related literature
- 1.3 Research Problem
- 1.4 Study area
- 1.5 Objectives
- 1.6 Hypothesis
- 1.7 Data base
- 1.8 Methodology
- 1.9 Organization of Chapters
- 1.10 Limitation to study
- 1.11 Scope of the present research
- 1.12 Conclusion

### *References*

## **2. CHAPTER-II \_\_\_\_\_ 25-58**

### **PHYSICAL AND CULTURAL SETUP OF THE STUDY AREA**

- 2.1 General
- 2.2 The Physical Set-up

- 2.2.1 Geology
  - 2.2.2 Geomorphology
  - 2.2.3 Physiography
  - 2.2.4 Slope and Slope aspects
  - 2.2.5 Drainage
  - 2.2.6 Climate
    - 2.2.6.1 Seasonal Variation
      - 2.2.6.1.1 Summer season
      - 2.2.6.1.2 Autumn Season
      - 2.2.6.1.3 Winter Season
      - 2.2.6.1.4 Spring Season
    - 2.2.6.2 Climatic variability and natural hazards
    - 2.2.6.3 Spatial and Temporal changes of precipitation
  - 2.2.7 Soil
  - 2.2.8 Natural Vegetation
  - 2.3 The Cultural set-up
    - 2.3.1. Demographic Profile
    - 2.3.2. Socio-economic activities of the study area
    - 2.3.3. Settlement Pattern
    - 2.3.4. Transport and communication
  - 2.4 Conclusion
- References*

### **3. CHAPTER-III**

**59-106**

#### **BEHAVIOURAL CHANGES OF HYDROLOGICAL CHARACTER**

- 3.1 General
- 3.2 River Configuration
- 3.3 Trend and Evaluation of morphological parameter in the fluvial system
- 3.4 Hydrology
  - 3.4.1 Glacier retreat
  - 3.4.2 Rainfall
  - 3.4.3 Surface water
  - 3.4.4 Ground water and Subsurface flow

- 3.5 Channel modifications through human interventions
    - 3.5.1 Hydropower projects along the Teesta River basin
    - 3.5.2 Causes behind the development of Hydropower projects along the Teesta River
    - 3.5.3 Impact of Gajoldoba Barrage on downstream sediment morphology
  - 3.6 Natural hazards or extreme events attributed to Hydrology
  - 3.7 Modified Stream flow and gauge level
  - 3.8 Discussion and Conclusion
- References*

**4. CHAPTER-IV \_\_\_\_\_ 107-153**

**FLOOD CHARACTERISTICS AND AGRICULTURAL PRACTICES**

- 4.1 General
- 4.2 Causes and conditions of Teesta flood
- 4.3 Measurable features of Teesta flood
  - 4.3.1 Rising of river bed
  - 4.3.2 Identification of vulnerable river bank
- 4.4 Pattern and trends of flood
- 4.5 Flood Frequency
- 4.6 Flood plain geomorphology
- 4.7 Agricultural Practices
  - 4.7.1 Crop Combination
  - 4.7.2 Crop Concentration
- 4.7.3 Crop Diversification
- 4.8 Discussion & Conclusion

*References*

**5. CHAPTER-V \_\_\_\_\_ 154-214**

**CHANGING SCENARIO OF LIVELIHOOD AND LAND USE PATTERN WITH ADAPTATION PRACTICES**

- 5.1 General
- 5.2 Livelihood
  - 5.2.1 Dominant and Distinctive Livelihood
- 5.3 Land Use and Land Cover

5.4 Sensitivity	
5.5 Critical Stress Moments	
5.6 Adaptation Practices	
5.6.1 Solar-Powered Irrigation Pumps	
5.6.2 Zero Tillage	
5.6.3 Poverty Alleviation Crops	
5.6.4 Crop Diversification	
5.6.5 Green Manure	
5.6.6 Mulching	
5.6.7 Gender based adaptation practices	
5.7 Rating to adaptation practices using Multi-criteria analysis	
5.8 Sustainability of adaptation practices	
5.9 Discussion & Conclusion	

*References*

**6. CHAPTER-VI \_\_\_\_\_ 215-220**

**SUMMARY, RECOMMENDATION AND CONCLUSION**

6.1 General	
6.2 Summary	
6.3 Recommendation	
6.3.1 Land use planning	
6.3.2 Sustainable use of flood affected agrarian land	
6.3.3 Agricultural land use re-structurization	
6.3.4 Using sustainable irrigation system	
6.3.5 Economic protection	
6.4 Conclusion	

**Bibliography \_\_\_\_\_ 221-231**

**Appendices \_\_\_\_\_ 232-246**
