Plagiarism analysis report	v
Abstract	vi-xi
Preface	xii-xiii
List of Tables	xiv-xv
List of Figures	xvi-xix
List of Appendices	xx
Abbreviations	xxi
1 Introduction	1-7
2 Literature Review	8-39
2.1. <i>Aeromonas</i> sp. : An overview	8
2.1.1. Taxonomy of the Genus <i>Aeromonas</i>	9
2.1.2. Isolation and identification of <i>Aeromonas</i>	10
2.1.3. <i>Aeromonas</i> infections in fish: Case reports of disease outbreaks	12
2.1.4. Virulence associated factors in <i>Aeromonas</i> sp.	12
2.1.4.1. Hemolysins	15
2.1.4.2. Proteases	17
2.1.4.3. Lipases	18
2.1.4.4. Secretion systems	19
2.1.4.5. Iron binding mechanisms	23
2.1.4.6. Amylases	24
2.1.4.7. Biofilms	24
2.1.4.8. Motility aided by flagella	25
2.1.4.9. Cytotoxicity of <i>Aeromonas</i> in cell lines	26
2.1.5. <i>Aeromonas</i> in public health	27
2.1.6. Antibiotic resistance in <i>Aeromonas</i>	30
2.1.6.1. Multiple antibiotic resistance (MAR) in aeromonads	33
2.1.6.2. Antibiotic resistance genes and plasmids in <i>Aeromonas</i>	34
2.1.6.3. Integrons	37
3 Material and methods	40-68

3.1.	Isolation of <i>Aeromonas</i> sp. from water samples of small fish farms	40
3.1.1.	Collection of water samples	40
3.1.2.	<i>Aeromonas</i> isolation medium	40
3.1.3.	Isolation of bacteria from water samples	45
3.1.4.	Maintenance of Cultures	45
3.1.5.	Characterization and screening of putative <i>Aeromonas</i> isolates	46
3.1.5.1.	Morphological Characterization	46
3.1.5.2.	Motility test	46
3.1.5.3.	Biochemical characterization using modified Aerokey-II	46
3.1.5.3.1.	Gram's staining	47
3.1.5.3.2.	Oxidase test	47
3.1.5.3.3.	Catalase test	47
3.1.5.3.4.	Oxidation and fermentation (O-F) test	47
3.1.5.3.5.	Resistance to O/129 discs	48
3.1.5.3.6.	Esculin hydrolysis	48
3.1.5.3.7.	Growth in 6.5 % NaCl Broth	48
3.1.5.4.	Molecular identification of the bacterial isolates by 16S rRNA gene sequencing	49
3.1.5.4.1.	Genomic DNA isolation	49
3.1.5.4.2.	Quantification of DNA	49
3.1.5.4.3.	Gel electrophoresis	50
3.1.5.4.4.	PCR amplification of the 16S rRNA gene	50
3.1.5.4.5.	Detection of PCR products by agarose gel electrophoresis	51
3.1.5.4.6.	Purification and sequencing of the PCR amplicons	51
3.1.5.4.7.	Phylogenetic analysis	52
3.2.	Assessment of virulence related traits in <i>Aeromonas</i> isolates	52
3.2.1.	Hemolytic activity	52
3.2.2.	Protease activity	53
3.2.3.	DNase test	53
3.2.4.	Lipolytic test	53
3.2.5.	Chromazurol sulfonate (CAS) plate assay for siderophore production	53
3.2.6.	Amylase activity	54
3.3.	Scanning electron microscopy	54
3.4.	Molecular detection of virulence related genes	55
3.4.1.	DNA isolation of the screened isolates	55
3.4.2.	PCR amplification of virulence genes	56
3.4.3.	Purification of the PCR amplicons	57

3.4.4.	Cloning and transformation	57
3.4.4.1.	Preparation of <i>E. coli</i> JM109 competent cells	58
3.4.4.2.	Preparation of ligation mixture	58
3.4.4.3.	Transformation	59
3.4.4.4.	Colony PCR for positive clone selection	59
3.5.	Sequence similarity and phylogenetic analysis	59
3.6.	Statistical analysis	60
3.7.	Conjugational transfer of the hemolysin gene	60
3.7.1.	Plasmid detection in donor and transconjugants	61
3.8.	Pathogenicity testing in fishes	61
3.8.1.	Acclimatization of the fishes	62
3.8.2.	Bacterial inoculum	62
3.8.3.	Fish infections	62
3.8.4.	Statistical analysis	63
3.9.	Cytotoxicity in WRL-68 human liver cell lines	63
3.10.	Homology modelling of Hemolysin protein	64
3.11.	Antimicrobial susceptibility testing	64
3.11.1.	MAR index of the bacterial isolates	65
3.11.2.	Statistical analysis	65
3.12.	Detection of Class I integrons and <i>tetE</i> gene encoding tetracycline resistance	66
3.13.	Plasmid isolation	67
3.14.	Conjugational transfer of resistance gene	67
4	Results	69-136
4.1.	Chapter I. Isolation, screening and phylogenetic characterization of the <i>Aeromonas</i> sp. from fish farming environments	69
4.1.1.	Isolation of aeromonads from water samples from fish farming environments	69
4.1.2.	Morphological characterization	69
4.1.3.	Biochemical tests based on modified Aerokey-II	80
4.1.4.	Molecular characterization using 16S rRNA gene sequencing	84
4.1.5.	Phylogenetic analysis	86
4.2.	Chapter II. Phenotypic detection, distribution and phylogenetic studies on virulence genes in <i>Aeromonas</i> isolates	91
4.2.1.	Phenotypic tests of virulence	91
4.2.1.1.	Hemolytic activity	91
4.2.1.2.	Protease activity	91
4.2.1.3.	Lipolytic activity	91
4.2.1.4.	DNase activity	91
4.2.1.5.	Chromazurol sulfonate (CAS) plate assay for siderophore production	92

4.2.1.6.	Amylase activity	92
4.2.1.7.	Distribution of virulence factors amongst the aeromonads	92
4.2.2.	Detection and genetic analysis of virulence related genes	93
4.2.2.1.	Amplification of virulence genes	93
4.2.2.2.	Classification of aeromonads into genotypic groups	98
4.2.2.3.	Sequences of virulence genes	99
4.2.2.4.	Phylogenetic analysis	102
4.2.2.5.	Transfer of the hemolysin gene by conjugation	105
4.3.	Chapter III. Evaluation of <i>in vivo</i> pathogenicity and cytotoxicity of selected <i>Aeromonas</i> isolates and homology modelling of hemolysin from strain GP3	111
4.3.1.	Pathogenicity of <i>Aeromonas</i> in fish	111
4.3.2.	Kaplan-Meier survivorship curve	111
4.3.3.	Cytotoxicity assay on human liver cell lines WRL-68	115
4.3.3.1.	Morphological assessment of treated WRL-68 cells	115
4.3.3.2.	Trypan blue cell viability assay	115
4.3.4.	Scanning Electron Microscopy (SEM)	115
4.3.5.	Homology modelling of hemolysin	118
4.4.	Chapter IV. Antibiotic susceptibility and screening of antibiotic resistance genes with conjugational transfer of R-plasmids	122
4.4.1.	Antibiotic susceptibility test	122
4.4.2.	MAR index of the aeromonads	128
4.4.3.	Cluster analysis	128
4.4.4.	Detection of class I integron and <i>tetE</i> gene	132
4.4.5.	Plasmids and their transfer via conjugation	135
5	Discussion	137-154
6	Bibliography	155-195
	Appendix-A Chemicals and reagents	196-200
	Appendix-B Buffers and solutions	201-206
	Appendix-C Growth media	207-211
	Appendix-D Sequences submitted in GenBank	212-234
	Appendix-E Animal ethics experimentation approval certificate	235
	Appendix-F Publication	236
	Appendix-G Reprints	237-246
	Appendix-H Seminars	247-249
