	Pag. No.
CHAPTER I:	1
INTRODUCTION	1
1.1 An Overview	2-3
1.2 Women Nutrition	3-6
1.3 Anthropometry	6-8
CHAPTER II:	9
2.1 LITERATURE REVIEW	10-39
2.1.1 Studies done on assessment of nutritional status among adults with some socioeconomic, demographic and lifestyle determinants	10-39
2.1.1. a International studies	10-18
2.1.1.b National Studies	18-39
2.2 PRESENT STUDY	40-42
2.2.1 Research Objectives	41
2.2.2 Applied aspects of present study	41-42
CHAPTER III:	43-69
MATERIALS and METHODS	
3.1 Study population	44-47
3.2 Study area	47-49
3.3 Nature of sampling and sample size	50-51
3.4 Procedure of data collection (Socioeconomic, Demographic, Reproductive and Life style variables)	51-55
3.4.1 Demographic, Socioeconomic, reproductive and lifestyle factors	51-55
3.4.1.1 Demographic variables	51-52
3.4.1.2 Socio-economic variables	52-54
3.4.1.3 Life style variables	55
3.4.1.4 Reproductive variables	55
3.5 Anthropometric measurements	56-66
3.5.1 Procedure of taking measurements	56-59
3.5.1.1 Height	57
3.5.1.2 Weight	57
3.5.1.3 Mid-Upper Arm Circumference (MUAC)	57
3.5.1.4 Waist Circumference (WC)	57-58
3.5.1.5 Hip Circumference (HC)	58
3.5.1.6 Biceps Skinfold (BSF)	58
3.5.1.7 Triceps Skinfold (TSF)	58

3.5.1.8 Sub-Scapular Skinfold (SSF)	58
3.5.1.9 Suprailiac Skinfold (SISF)	59
3.5.2 Technical errors of measurements	59-60
3.5.3 Assessment of Nutritional Status	60-64
3.5.3.1 Body Mass Index (BMI)	60-62
3.5.3.2 Waist-Hip Ratio (WHR)	62
3.5.3.3 Rohrer Index (RI)	62
3.5.3.4 Waist- Height Ratio (WHtR)	63
3.5.3.5 Conicity Index (CI)	63
3.5.3.6 Mid Upper arm circumference (MUAC)	63
3.5.3.7 Body Adiposity Index (BAI)	64
3.5.4 Assessment of Body Composition	64-67
3.5.4.1 Upper Arm Composition	64
3.5.4.2 Body Density Assessment	65
3.5.4.3 Assessment of PBF	65
3.5.4.4 Assessment of Fat mass (FM) and Fat free mass (FFM)	65-66
3.5.4.5 Assessment of Fat mass index (FMI) and Fat free mass index (FFMI)	66
3.5.4.6 Assessment of Body fatness status	66
3.5.4.7 Assessment of related risk factor with PBF	66-67
3.6 Statistical analysis	67-69
CHAPTER IV:	70-136
RESULTS	
4.1 Distribution of Socioeconomic, Demographic, Reproductive and Life style variables	71-80
4.2 Nutritional Assessment by Using Anthropometry and Body composition Variables	80-107
4.2.1 Descriptive statistics of Age and Anthropometric characteristics	80-81
4.2.2 Descriptive statistics of Derived Indices of Nutritional status and Body composition variables	81-82
4.2.3 Age specific Descriptive statistics of anthropometric variables	82-83
4.2.4 Descriptive statistics of derived anthropometric and body composition variables by Age (mean \pm SD)	83-85
4.2.5 Correlations of Anthropometric variables among Rajbanshi women populations	85-89
4.2.6 Linear regression of age on anthropometric and body composition factors among Rajbanshi female populations	90-91
4.2.7 Linear regression analysis of BMI on different anthropometric and body composition variables among female Rajbanshi populations	91-92
4.2.8 Assessment of Nutritional Status using BMI among Rajbanshi female	92-98

individuals	
3.2.8.1 Based on WHO's BMI classification (1995)	92-95
4.2.8.2 Nutritional status of Rajbanshi women according to WHO (2000) BMI classification	95-98
4.2.9 Assessment of Nutritional Status using MUAC among Rajbanshi female individuals	98-100
4.2.10 Assessment of Nutritional Status using combination of BMI and MUAC among Rajbanshi female individuals	100-101
4.2.11 Prevalence of Central Adiposity and Overall adiposity among Rajbanshi female individuals	101-106
4.2.11.1 Age specific prevalence of central adiposity among Rajbanshi female individuals	103-106
4.2.12 Assessment of Central Adiposity and Overall adiposity using BMI in combination with WC, WHR, WHtR among Rajbanshi female individuals	106-107
4.3 Body Fat and Fitness among Rajbanshi female populations	108-111
4.4 Determinants of underweight, overweight and obesity among Rajbanshi female population	112-123
4.4.1 Socio-economic, demographic and life style factors associated with high BMI ($\geq 23 \text{ kg/m}^2$) among Rajbanshi female individuals	112-114
4.4.2 Association of socio-economic, demographic and life style variables with High BMI ($\geq 25 \text{ kg/m}^2$) among Rajbanshi female individuals	114-116
4.4.3 Socio-economic, demographic and life style factors associated with high WC ($\geq 80 \text{ cm}$) among Rajbanshi female individuals	116-118
4.4.4 Socio-economic, demographic and life style factors associated with high WHtR ($> 0.5\text{cm}$) among Rajbanshi female individuals	118-121
4.4.5 Socio-economic, demographic and life style factors associated with high WHR ($> 0.8 \text{ cm}$) among Rajbanshi female individuals	121-123
4.5 Logistic regression analysis to ascertain the determinants of underweight, overweight and obesity among Rajbanshi female population	123-136
4.5.1 Logistic regression for females with a high WC ($> 80 \text{ cm}$)	123-125
4.5.2 Binary logistic regression for being at high WHR ($> 0.8 \text{ cm}$).	125-128
4.5.3 Binary logistic regression for being at high WHtR ($> 0.5\text{cm}$).	128-130
4.5.4 Binary logistic regression for being underweight and overweight based on BMI classification WHO (1995)	130-131
4.5.5 Binary logistic regression for being underweight and overweight based on BMI classification WHO (2000)	131-136
CHAPTER V:	137-171
DISCUSSION	

5.1 An Evaluation of Socioeconomic, Demographic and Life style variables	138-147
5.2 Anthropometric measurements and nutritional status of adult Rajbanshi female populations	147-166
5.2.1 Effect of Age on Anthropometric and Body composition variables	147-149
5.2.2 Comparison of mean Anthropometric and Body composition variables	150-157
5.2.3 Prevalence of underweight using BMI	157-159
5.2.4 Prevalence of undernutrition using MUAC	160-161
5.2.5 Prevalence of undernutrition measured by BMI and MUAC	161-162
5.2.6 Prevalence of overweight and obesity	162-164
5.2.7 Prevalence of central obesity	164-165
5.2.8 Body fat and body fitness among Rajbanshi individuals	165-166
5.3 Effect of socioeconomic demographic and lifestyle determinants on undernutrition	166-168
5.4 Effect of socioeconomic demographic and lifestyle determinants on overweight and obesity	169-171
CHAPTER VI:	172-178
CONCLUSION	
6.1 General summary	173-176
6.1.1 Summary findings	173-176
6.2 Limitations	176
6.3 Conclusion	176-177
6.4 Recommendations	177-178
