Plagiarism report	iii
Dedication	iv
Preface	v - vi
Acknowledgements	vii - viii
Abstract	ix - xii
Table of Contents	xiii - xvii
List of Tables	xviii - xxi
List of Figures	xxii-xxiii
List of Plates	xxiv-xxx
Abbreviations	xxxi
Appendices	xxxii
Chapter I Introduction	1-12
1.0 Introduction	1-3
1.1 The Study Area	3-4
1.2 The Problems	5
1.3 Hypothesis	5-6
1.4 Objectives	6
1.5 Methodology	6-7
1.6 Data Sources	8-9
1.7 Previous Works	10-11
1.8 Limitation of the study	11
1.9 Conclusion	11
Chapter II Physical and Cultural Setup of the Study Area	13-32
2.0 Introduction	13
2.1 Methodology and Data Sources	13-14
2.2 Geomorphology of the study area	14
2.2.1 The Hilly Region	14
2.2.2 The Foothill Region	14
2.2.3 The Plain Region	15
2.3 Geology of the study area	15-17
2.4 Soil of the study area	17-19
2.5 Climate of the study area	19
2.5.1 Temperature	19-20
2.5.2 Rainfall	20-22
2.6 Vegetation	22-23
2.6.1 Mountain forest	23
2.6.2 Plain Forest	23
2.6.3 Riverine Forest	23
2.7 Drainage of the study area	25
2.8 Land use and land cover	25-26
2.9 Population Resource	26-27

2.10 Agricultural resource	28-29
2.11 Transport and Communication	29-30
2.12 Conclusion	30-31

Chapter III Drainage System of Alipurduar District 33-66

3.0 Introduction	33
3.1 Methodology and data source	33-34
3.2 Types of Drainage in Alipurduar District	34
3.2.1 The Drainage Basins and Sub-Basins	34
3.2.1.1 The Brahmaputra basin	34
3.2.1.1.1 The Torsa Sub-basin	35-41
3.2.1.1.2 Jaldhaka river basin	41-45
3.2.1.1.3 Kaljani river basin	45-48
3.2.1.1.4 The Raidak Sub-basin	48-51
3.2.1.1.5 The Sankosh Sub-Basin	51
3.3 Nature of drainage system	51-52
3.3.1 Morphological characteristics of the rivers of Alipurduar District	52-53
3.3.1.1 Torsa River	53-54
3.3.1.2 Raidak River	55-56
3.3.1.3 Sankos River	56-57
3.3.1.4 Kaljani River	57-59
3.3.1.5 Mujnai River	59-60
3.3.1.6 River Rethi	61-62
3.4 Bank Erosion	62-63
3.5 River Migration	64-65
3.6 Conclusion	65-66

Chapter IV Causes of Flash Flood 67-107

4.0 Introduction	67-68
4.1 Methodology and Data source	68-69
4.2 Rainfall Characteristics	69-70
4.2.1 Rainfall in last 30 Years	70-73
4.2.2 Rainfall during the 1993 Flash Flood	73-74
4.2.3 Rainfall during the 1996 Flash Flood	75-76
4.2.4 Rainfall during the 1998 Flash Flood	76-77
4.2.5 Rainfall during the 2000 Flash Flood	77-78
4.2.6 Rainfall during the 2004 Flash Flood	78-79
4.2.7 Rainfall during the 2007 Flash Flood	79-81
4.2.8 Rainfall during the 2010 Flash Flood	82-83
4.2.9 Rainfall during the 2013 Flash Flood	84-85
4.2.10 Rainfall during the 2014 Flash Flood	85-87
4.2.11 Rainfall during the 2016 Flash Flood	87-88
4.2.12 Rainfall during the 2017 Flash Flood	88-92
4.3 Topographical impacts	92-94
4.4 River Projects	94-95
4.5 Construction of barrier at river	95-99
4.6 Deforestation and soil erosion	99-100
4.7 Effect of mining and quarrying	100
4.7.1 Catchment area mining	100-102

4.7.2 In-stream quarrying	103-105
4.8 Conclusion	105
Chapter V Nature of Flash Flood	108-141
5.0 Introduction	108
5.1 Methodology and data source	108-109
5.2 Frequency of Flash flood	109-114
5.3 Magnitude of Flash flood	115-123
5.4 Period and Duration of Flash flood	123-128
5.5 Flash Flood Situation of 1993	128-129
5.6 Flash Flood Situation of 1998	130
5.7 Flash Flood Situation of 2000	130-131
5.8 Flash Flood Situation of 2007	131-132
5.9 Flash Flood Situation of 2010	132-133
5.10 Flash Flood Situation of 2017	133-134
5.11 Relation between Rainfall, Discharge and Flash Flood magnitude	134-139
5.12 Conclusion	140
Chapter VI Effects of Flash Flood	142-232
6.0 Introduction	142
6.1 Methodology and data source	143-145
6.2 Negative Effects	146
6.2.1 Damages of Lives	146-149
6.2.2 Effects on health	149-150
6.2.3 Effects of flash flood on socio-economic status	150
6.2.3.1 Socio-economic profile of the respondents	150
6.2.3.1.1 Family Size	150-151
6.2.3.1.2 Educational Qualification	151-152
6.2.3.1.3 Religious compositions	152
6.2.3.1.4 Caste Compositions	153-154
6.2.3.1.5 Occupational status	154-155
6.2.3.2 Effects of Flash Flood on Surveyed people	155
6.2.3.2.1 Shelter during flash flood	155-156
6.2.3.2.2 Rescue types of the victims	156-157
6.2.3.2.3 Government facilities to the victims after flash flood	157-158
6.2.3.2.4 Damages due to flash flood	158
6.2.4 Changing pattern of crops	159-160
6.2.5 Losses of properties	160-163
6.2.6 Effects of flash flood on socio-economic development	163-166
6.2.7 Effects on tea gardens	167-168
6.2.7.1 1993 flash flood and tea gardens	168-169
6.2.7.2 1998 flash flood and tea gardens	169-171
6.2.7.3 2000 flash flood and tea gardens	172-173
6.2.7.4 2004 flash flood and tea gardens	173-175
6.2.7.5 2007 flash flood and tea gardens	176-177
6.2.7.6 2017 flash flood and tea gardens	177-179
6.2.8 Effects on forests	179-186
6.2.9 Effects on migration patterns	186-187

6.2.10	Damage of constructions	188-190
6.2.11	Effects of flash floods on food security	190-192
6.2.12	Effects of mining and quarrying on water quality	192
6.2.12.1	Water temperature	192-193
6.2.12.2	Water pH	193-196
6.2.12.3	Total Alkalinity	199-201
6.2.12.4	TDS	201
6.2.12.5	Calcium	201-202
6.2.12.6	Total Hardness	202-203
6.2.12.7	Sulphate, Chloride and Electrical Conductivity	203-205
6.2.13	Analysis of overall water quality	205-207
6.2.13.1	Transformation of Water Quality Index Values	207-211
6.2.14	Effects on soil properties	211-216
6.2.15	Impact/ effect on river and fluvial system	216
6.2.15.1	Rising of river bed by aggradation	216-220
6.2.15.2	Bank Failure	220-222
6.2.15.3	Enlargement of river valley	222-224
6.2.15.4	River shifting vis-s-vis migration	225-227
6.3	Positive effects	227
6.3.1	Effects on land building	227-228
6.3.2	Effects on crop production	228
6.4	Conclusion	229
Chapter VII Proposed Remedial Measures		233-268
7.0	Introduction	233
7.1	Methodology and data source	233-234
7.2	Appropriate measure for preventions of flash flood	234
7.2.1	Identification of vulnerable river bank	234-238
7.2.2	Identification of Vulnerable area	238
7.2.2.1	High flash flood prone area	238-239
7.2.2.2	Moderately flash flood prone area	239
7.2.2.3	Low flash flood prone area	239
7.2.2.4	Flash flood free zone	240
7.3	Reduction of deforestation	240-241
7.4	Application of modern agricultural techniques in affected areas	241-243
7.5	Reduction of human interference on river	243-245
7.6	Soil testing at regular basis	245-247
7.7	Flash flood managements	247
7.7.1	Structural Measures to Mitigate Flash Flood	247
7.7.1.1	Measures in the whole of the catchment area	247
7.7.1.2	Regulating rivers and streams	247-248
7.7.1.3	Shaping retention	248-249
7.7.1.4	River construction	249
7.7.2	Non-Structural Measures	250
7.7.2.1	Preparing for flash flood	251-254
7.7.2.2	Flash flood forecasting	254
7.7.2.2.1	Data source for flash flood forecasting	254-256
7.7.2.2.2	Flash flood forecasting techniques	256-258
7.7.2.3	Flash flood warning systems	258-260

7.7.2.4 Watershed management	260-263
7.7.2.5 Floodplain management and zoning	263
7.7.2.6 Flash flood insurance	264
7.7.2.7 Awareness generation	264
7.7.2.8 Preventive measures for health	265
7.7.2.9 Reconstruction of economic life and compensation	265-266
7.8 Conclusion	266-267
Chapter VIII Findings and Conclusion	269-275
8.1 Major Findings	269-273
8.2 Conclusion	273-275
Bibliography	276-282
Appendix A	283
Appendix B	284-288
Appendix C	289-296
