PREFACE	iii
NOTATIONS	xi
CHAPTER - 1. INTRODUCTION	
1.1 Occurrence of Torsion	1
1.2 Design for Torsion	1
1.3 Importance of Investigation	2
1.4 Object and Scope of the Present Research	4
CHAPTER - 2. REVIEW OF PREVIOUS RESEARCH WORKS AND EXISTING THEORIES OF TORSION	
2.1 Introduction	7
2.2 Pure Torsion	
2.2.1 Plain Concrete under Pure Torsion	7
2.2.2 Reinforced Concrete Members under Pure Torsion	14
2.3 Combined Bending and Torsion	
2.3.1 Plain Concrete Beams under Combined Bending and Torsion...	26
2.3.2 Beams without Stirrups under Combined Bending and Torsion...	26
2.3.3 Beams with Stirrups under Combined Bending and Torsion...	30
2.4 Combined Bending, Torsion and Shear	
2.4.1 Plain Concrete Beams under Combined Bending, Torsion and Shear	53

	Page
2.4.2 Beams without Stirrups under Combined Bending, Torsion and Shear ...	53
2.4.3 Beams with Stirrups under Combined Bending, Torsion and Shear ...	57
2.4.4 Beams without Stirrups under Combined Bending, Torsion and Shear Created by Distributed Loads ...	77
2.4.5 Beams with Stirrups under Combined Bending, Torsion and Shear Created by Distributed Loading ...	82
2.5 Present Position of Existing Theories ...	84
 CHAPTER - 3. GENERALISED THEORY FOR ULTIMATE STRENGTH IN TORSION 	
3.1 Introduction ...	87
3.2 Pure Torsion	
3.2.1 Plain Concrete Beams of Rectangular Section under Pure Torsion ...	88
3.2.2 Plain Concrete Beams of T-, L- and I-Sections under Pure Torsion ...	101
3.2.3 Beams without Stirrups under Pure Torsion ...	103
3.2.4 Rectangular Beams with Stirrups under Pure Torsion ...	103
(I) Symmetrical Longitudinal Rein- forcement ...	109

(II) Unsymmetrical Longitudinal		
	Reinforcement	125
3.2.5	Summary of Proposed Method for Evaluation of Ultimate Torque of Rectangular Beams with Stirrups under Pure Torsion	126
3.2.6	Beams of T-, L- and I-Sections with Stirrups under Pure Torsion..	136
3.2.7	Cracking Torque	138
3.3	Combined Bending and Torsion : Beams with Stirrups	144
3.4	Combined Bending, Torsion and Shear : Beams with Stirrups	154
3.5	Combined Bending, Torsion and Shear Due to Distributed Loading : Beams with Stirrups	162
3.6	General Method for Prediction of Torsional Strength	164
3.7	Bending-Torsion Interaction in Absolute Values : Beams with Stirrups	167
3.8	Interaction Theory for Combined Torsion in Non-Dimensional Parameters	175
3.8.1	Combined Bending and Torsion : Beams without Stirrups	175
3.8.2	Combined Bending, Torsion and Shear : Beams without Stirrups	176

	Page
5.4 Concrete Materials	228
5.5 Form Work	228
5.6 Concrete Mix	228
5.7 Curing	229
5.8 Fixing of Gage Points for Mechanical Strain Gage	229
5.9 Support Arrangements	231
5.10 Arrangement for Measuring Angle of Twist and Vertical Deflection of Beams..	232
5.11 Loading Arrangement	232
5.12 Test Procedure	237
 CHAPTER - 6. EVALUATION OF TEST RESULTS	
6.1 Ultimate Strength of Plain Concrete L-Beams under Pure Torsion	239
6.2 Ultimate and Cracking Strength of L-Beams Having Only Longitudinal Steel Subjected to Pure Torsion	241
6.3 Ultimate and Cracking Strength of L- Beams with Stirrups under Pure Torsion..	243
6.4 Ultimate Strength of Spandrel Beams without Stirrups under Combined Bending, Torsion and Shear Due to Distributed Loading	246
6.5 Ultimate Strength of Spandrel Beams with Stirrups under Combined Bending, Torsion and Shear Created by Distributed Loading	251

	Page
6.6 Torque-Shear Interaction Diagram for Spandrel Beams with Stirrups Subjected to Distributed Loading	... 255
6.7 Torque-Twist Characteristics	... 255
6.8 Initial Torsional Stiffness	... 261
6.9 Angle of Twist at First Diagonal Cracking	... 263
6.10 Load-Deflection Characteristics	... 264
6.11 Strains in 45° Directions	... 268
6.12 Cracking Pattern and Mode of Failure	
(i) Plain Concrete Beams under Pure Torsion	... 272
(ii) Beams without Stirrups under Pure Torsion	... 272
(iii) Beams with Stirrups under Pure Torsion	... 276
(iv) Spandrel Beams without Stirrups under Combined Bending, Torsion and Shear Due to Distributed Loads	... 276
(v) Spandrel Beams with Stirrups under Combined Torsion Due to Distributed Loading	... 282
6.13 Crack Width	... 284
