GENERAL INTRODUCTION AND REVIEW

OF LITERATURE **1-8**

I. Ayurveda (Definition and history)	1
II. Relevance of Ayurveda in present therapeutic scenario	2
III. Diarrhea treatment in Ayurveda	4
IV. Present scenario of incidences of diarrhea	5
V. Problems with current therapeutic approaches in the treatment of infectious diarrhea	6
VI. Screening ayurveda based therapeutic preparations	7
VII. Aims and objectives	8

Relevance of Ayurveda in developing poly herbal preparation from natural sources for therapeutic use against gastro-enteric disease-causing pathogenic bacteria

1.1 Introduction	10
1.2 Materials and Methods	14
1.2.1 Thorough literature review	14
1.2.2 Direct survey methods	14
1.2.3 Identification of plants to be used for preparing PHFs	14
1.2.4 Devising a proper plan of work following initial survey	15
1.3 Results and Discussion	15
1.3.1 Finalizing components and quantities for preparing poly herbal formulations	15
1.3.2 Plan of work	16
1.4 Conclusion	17

Mining traditional knowledge of Ayurvedic practices for preparation and basic phytoconstituent characterization of potential poly herbal formulation that are effective against common gastro-enteric diseases

2.1 Introduction	19
2.2 Materials and Methods	21
2.2.1 Collection of plant material	21
2.2.2 Preparation of Ayurveda based formulation	22
2.2.3 Preliminary qualitative phytochemical analysis	23

2.2.3.1 Test for carbohydrates	23
2.2.3.2 Test for steroids and triterpenoids	23
2.2.3.3 Test for alkaloids	23
2.2.3.4 Test for glycosides	23
2.2.3.5 Test for flavonoids	23
2.2.3.6 Test for tannins	24
2.2.4 Quantification of pH, specific gravity and total alcohol of the PHFs	24
2.2.5 Antibacterial assay of prepared PHFs on lab isolate <i>Escherichia coli</i> K12 bacteria	24
2.3 Results and Discussion	24
2.3.1 Total number of poly herbal preparations produced	24
2.3.2 Presence of primary phytoconstituents	25
2.3.3 Quantitative assay of basic chemical properties of PHF s	25
2.3.4 Antibacterial property shown by poly herbal formulation	26
2.4 Conclusion	27
CHAPTER 3	28-50
<hr/>	
Evaluation of bactericidal properties of polyherbal formulation AP-01 on multiple antibiotics resistant gastric pathogens and study on its potential to reduce ricinoleic acid induced diarrhea in Sprague Dawley rats	
3.1 Introduction	29
3.2 Materials and Methods	30
3.2.1 Plant parts for preparing fermented polyherbal Formulation and standard drugs	30

3.2.2 Experimental animals	31
3.2.3 Microorganisms with pathogenesis and non-pathogenic properties	31
3.2.4 Phytochemical screening of the formulation	32
3.2.5 Antimicrobial Assay of polyherbal AP-01 against GTPR pathogenic strains	33
3.2.6 Anti-swimming motility assay against GTPR pathogens	34
3.2.7 Primary acute oral tolerance tests	34
3.2.8 Cytotoxicity Study	34
3.2.9 Experimental Design for the action of AP-01 on the symptom of diarrhea induced by ricinoleic acid from Castor Oil	35
3.2.10 The residual effect of AP on body weight, food and water intake, and gastric motility (using Kaolin as a marker) before and after intervention	36
3.2.11 Statistical analysis	37
3.3 Results and Discussion	37
3.3.1 Presence of probable phytochemicals	37
3.3.2 Cytotoxicity analysis	39
3.3.3 Effect of AP-01 on animals with diarrhea induced by Castor Oil	40
3.3.4 The residual effect of AP-01 on body weight, food, and water intake, and gastric motility	43

3.3.5 The effect of AP-01 on gastric pathogens collected from Gastro-intestinal Tract Pathogens Repository	44
3.3.6 Anti-swimming motility assay against GTPR pathogens	47
3.4 Conclusion	50
CHAPTER 4	51-75
<hr/>	
Other significant antibacterial properties demonstrated by polyherbal formulation AP-01	
4.1 Introduction	52
4.2 Materials and Methods	54
4.2.1 Crude plant parts for the fermented polyherbal formulation	54
4.2.2 Experimental animals	55
4.2.3 Microorganisms	55
4.2.4 Antimicrobial Susceptibility Test	55
4.2.5 Antimicrobial Assay of polyherbal AP01 against <i>Pseudomonas aeruginosa</i> HW01	56
4.2.6 Swarming motility assay of <i>Pseudomonas aeruginosa</i>	56
4.2.7 Inhibition of quorum sensing assay of <i>Chromobacterium violaceum</i> MTCC 2656	57
4.2.8 In-vivo wound healing assay	57
4.2.8.1 Burning procedure	58
4.2.8.2 Topical infection on the burn-wound site	58
4.2.8.3 Topical treatment of burn-afflicted site	59

4.2.8.4 Qualitative determination of the pathogen load in the burn-wound site	59
4.2.8.5 Determination of C-reactive protein (CRP) levels post-burn and infection	60
4.2.9 Statistical analysis	60
4.3 Results and Discussion	61
4.3.1 Antimicrobial susceptibility test	61
4.3.2 Swarming motility assay of <i>Pseudomonas aeruginosa</i>	62
4.3.3 Antimicrobial Assay of polyherbal AP-01 against <i>Pseudomonas aeruginosa</i> HW01	62
4.3.4 Inhibition of violacein production by <i>Chromobacterium violaceum</i> in presence of AP-01	64
4.3.5 <i>In-vivo</i> wound healing assay	66
4.3.6 Statistical Analysis	72
4.4 Conclusion	75
CHAPTER 5	76-100

Elucidating Mode(s) of action of Ayurveda based poly herbal preparation AP-01 through Bacterial Cytological Profiling

5.1 Introduction	77
5.2 Materials and Methods	79
5.2.1 Bacterial strains and antibiotics	79
5.2.2 Minimum Inhibitory Concentration determination	81
5.2.3 Fluorescence Microscopy	81

5.2.4 Bacterial Cytological Profiling	81
5.2.5 Scanning Electron Microscopy of AP-01 treated bacteria cells and untreated cells	82
5.2.6 Statistical Analysis	83
5.3 Results and Discussion	83
5.3.1 Determination of bactericidal property of AP-01 using fluorescence microscopy	85
5.3.2 Elucidating the mode of action of the polyherbal formulation AP-01 by Bacterial Cytological Profiling	88
5.3.3 Analysis of Scanning electron microscopy images	92
5.4 Conclusion	95
General Discussion	96
