<i>Preface</i>	1-4
CHAPTER-I	5-37
GENERAL INTRODUCTION AND BRIEF REVIEW OF THE PREVIOUS WORKS.	
1.1) Polarisation and Clausius Mossotti relation	5-7
1.2) Debye equation	7
1.3) Onsager's theory under static electric field	8-9
1.4) Kirkwood's theory	9
1.5) Fröhlich's theory	9-10
1.6) The dielectric behaviour at high frequencies	10-11
1.7) Macroscopic & Microscopic relaxation time	11-15
1.8) Distribution of relaxation time	15-18
1.8a) Cole-Cole plot.	18
1.8b) Cole-Davidson plot	18-23
1.9) Calculation of distribution function	23-24
1.10) Double relaxation phenomenon of polar molecules	25
1.11) High frequency conductivity	25-27
1.12) Dielectric relaxation in dilute solution of polar molecules in nonpolar solvents under high frequency electric field	27-29
1.13) Eyring's rate theory	29-30
1.14) A brief review of early works	31-35
CHAPTER-II	38-64
THE SCOPE AND THE OBJECTIVE OF THE PRESENT WORKS	
2.1) Introduction	38-43
2.2) Multiple relaxation mechanism	43
2.3) Double relaxations	43-44
2.4) Double relaxations measured under two different frequencies	44-48
2.5) Double relaxation phenomena of polar nonpolar liquid mixture under single frequency electric field	48-50
2.6) Theoretical formulation to estimate μ_1, μ_2 , in terms τ_1, τ_2	51-52
2.7) A brief review	52-53
2.8) Symmetric distribution of relaxation times	53-56
2.9) Asymmetric distribution of relaxation times	56-57
2.10) Experimental techniques	58
2.10a) Experimental Set up	58
2.10b) The cell construction and sample holder	58-60
2.10c) Capacitance and conductance measurement by HP LF impedance analyser.	61
2.10d) Cell calibration.	61-63
2.11) Dipole moments of isotopomer molecules.	63-64

Part A

CHAPTER -III	65-80
Double relaxation times of non-spherical polar liquids in non-polar solvent: A new approach based on single frequency measurement.	
CHAPTER IV	81-99
Single-frequency measurement of double -relaxation times of mono-substituted anilines in benzene	
CHAPTER-V	100-120
Double relaxation of monosubstituted anilines in benzene under effective dispersive region	
CHAPTER-VI	121-145
Double relaxation of straight chain alcohols under high frequency electric field	
CHAPTER-VII	146-164
Double relaxation of some isomeric octyl alcohols by high frequency absorption in nonpolar solvent	
CHAPTER-VIII	165-183
Structural and associational aspects of binary and single polar liquids in nonpolar solvent under high frequency electric field	
CHAPTER - IX	184-207
Double relaxation times, dipole moments and molecular structures of some non-spherical aprotic polar liquids in benzene from high frequency absorption measurement	

Part B

CHAPTER - X	208-213
Dipole moment of isotopomer molecule	
CHAPTER -XI	214-220
Summary and Conclusion	
List of published and Communicated Papers	221
