

List of Figures

Figure No.		Page No.
<b>(a) Part A</b>		
2.1	Experimental set-up	33
3.1 - 3.9	Adsorption and desorption Processes	43-49, 51, 52
3.10-3.11	Vapour pressure (in mm of Hg; written as mm in the text) dependence of conductivity	53, 59
3.12-3.29	S - S plot of the adsorption and desorption kinetic data	63 - 80
3.30	Model diagram for "two-stage" adsorption and desorption processes	85
3.31	Model diagram for "three-stage" adsorption and desorption processes	88
4.1-4.6	Semiconductivity in a vapour adsorbed nitroaromatic semiconductor cell	94 - 98
4.8-4.14	Semiconductivity of various nitroaromatics due to the adsorption of the same amount of different chemicals	100 - 103

Figure No.		Page No.
4.15-4.21	Semiconductivity of various nitroaromatics due to the adsorption of the different amount of the same chemical	110 - 116
4.22-4.27	On the validity of compensation effect	120-122, 135-137

(b) Part B

2.1-2.4	Electronic spectra of 9-nitroanthracene and solvent effect	201-203, 212
3.1-3.3	Electronic spectra of 2-nitrofluorene and solvent effect	219, 220, 225
4.1-4.2	Electronic spectra of 1,4-dinitronaphthalene and solvent effect	231, 235
4.3,4.5	On the luminescence of 1,4-dinitronaphthalene	236, 243
4.4,4.6	Excitation spectra of 1,4-dinitronaphthalene	241, 245
