

CONTENTS

INTRODUCTION	1
1. CHAPTER I -	
GENERAL INTRODUCTION AND BRIEF REVIEW OF THE PREVIOUS WORKS	5
1.1 Debye Theory of Dielectric Polarization	6
1.2 Physical Interpretation of Dielectric Loss ϵ'' and loss Tangent $\tan\delta$	11
1.3a Dielectric Loss and Relaxation Time	14
1.3b Representation of Permittivity in the Complex Plane: Debye Semicircle	18
1.3c Cole - Cole Distribution	18
1.4 Double Relaxation Time Due to Molecular and Intramolecular Orientations	19
1.5 Dielectric Relaxation in Dilute Solution of Polar Solute in Non-Polar Solvent	22
1.6a Dielectric Loss and High Frequency Conductivity	24
1.6b High Frequency Conductivity of Dilute Solution of Polar Solute in Non-Polar Solvent	27
1.7a Relaxation Time and its Relation with Microscopic and Macroscopic Properties	28
1.7b Modification of Debye Relation	29

1.8a Radio Frequency Conductivity and Relaxation Time	30
1.8b Microwave Conductivity of Polar Liquids in Dilute Solutions of Non-Polar Solvent	34
1.9a Energy of Activation of Dipole Orientation	35
1.9b Energy of Activation for viscous Flow	36
1.10 A Brief Review of the Early works	37

2 CHAPTER II-

THE SCOPE AND THE OBJECTIVES OF THE PRESENT WORKS ALONG WITH THE EXPERIMENTAL TECHNIQUES AND THEORIES OF MEASUREMENTS	68
---	----

2A.1 The Scope and the objectives of the Present Works	69
2B Experimental Technique and Theories of Measurements	75
2B.1 Theory of Measurement and Experimental Arrangement for Determination of Radio Frequency Conductivity	76
2B.2 Washing and Cleaning of Dielectric Cell	78
2B.3 Purification of Liquids	79
2B.4 Determination of Coefficient of Viscosity	79

3	CHAPTER III - DIELECTRIC RELAXATION PARAMETERS FROM ULTRA-HIGH FREQUENCY ELECTRIC CONDUCTIVITY OF POLAR-NONPOLAR LIQUID MIXTURES	81
4	CHAPTER IV- DIPOLE MOMENTS OF ASSOCIATED BINARY SOLUTES IN BENZENE FROM ULTRA-HIGH FREQUENCY CONDUCTIVITY OF SOLUTIONS	105
5	CHAPTER V- DIPOLE MOMENTS OF BINARY POLAR SOLUTES FROM ULTRA-HIGH FREQUENCY CONDUCTIVITY OF SOLUTION IN NON-POLAR SOLVENT	125
6	CHAPTER VI- THEORETICAL RELAXATION TIME OF ASSOCIATED BINARY POLAR MIXTURE IN NON-POLAR SOLVENT	147
7	CHAPTER VII- DOUBLE RELAXATION TIMES OF NON-SPHERICAL POLAR LIQUIDS IN NON-POLAR SOLVENTS - A NEW APPROACH BASED ON SINGLE FREQUENCY MEASUREMENT	161

8	CHAPTER VIII-	
	RELAXATION TIME AND ENERGY OF ACTIVATION OF	
	NITROBENZENE IN BENZENE FROM RADIO FREQUENCY	
	CONDUCTIVITY MEASUREMENT	183
9	CHAPTER IX-	
	RADIO FREQUENCY CONDUCTIVITY AND RELAXATION	
	TIME OF NITROBENZENE IN BENZENE AND PARAFFIN	
	SOLUTIONS	199
10	CHAPTER X-	
	SUMMARY OF THE RESULTS OF THE PRESENT WORKS	
	AND CONCLUSION	214
	APPENDIX	221
