

A C K N O W L E D G E M E N T

The present thesis contains the results of research work performed by the author in the Department of Chemistry, University of North Bengal, Darjeeling, India.

The author takes the pleasure to express his gratefulness to Dr. A.K.Ghosh, D.Phil, Professor of Chemistry, University of North Bengal, for his guidance and continuous inspiration all through the investigation.

The author is indebted to Dr. S.K. Saha, Senior Lecturer in Chemistry and Dr B. Basu, Lecturer in Chemistry, University of North Bengal for their kind cooperation in obtaining some spectral data and for some useful discussions.

The author is thankful to Dr A.K. Majumder, Scientific Officer, University of North Bengal, for his kind help in the investigation.

He would like to thank his co-workers Mr. T. Pandit and Dr. A. Samad for their valuable help during the investigation for biological studies.

He is also very much thankful to Miss C. Deb for her cordial cooperation in preparing the manuscript. Specific thanks are also due to Mr. M. Chakraborty for typing the manuscript.

The author is also thankful to the Department of Environment, Government of India, for providing the research fellowship and to

the authorities of the North Bengal University for all kind of facilities regarding research work.

Thanks are due to RSIC, Chandigarh and RSIC, NEHU, Shilong for the analysis of the samples and also for some spectral data.

Finally, the author likes to express his deep sense of gratitude to his mother and family members for their constant inspiration.
