

Table of Contents

	Chapter	Page #
Declaration		i
Abstract		ii
Preface		vii
List of tables		xi
List of figures		xii
List of appendices		xiv
1. Introduction		1-10
2. Review of Literature		11-34
2.1. Biological Nitrogen Fixation		11
2.2. French bean(<i>Phaseolus vulgaris</i> L.)		14
2.3. Rhizobia		15
2.4. Studies on <i>Rhizobium</i>		16
2.5. Whole genome sequencing of <i>Rhizobium</i>		30
2.6. The bioinformatics approach		32
3. Materials and Methods		35-68
3.1. The study area		35
3.2. Collection of germplasm		35
3.3. Isolation of <i>Rhizobium</i>		35
3.4. Plant Infectivity Test		37
3.5. Microscopy		39
3.6. Morphological characterization		40
3.7. Biochemical characterization		40
3.8. Physiological characterization		43
3.9. Screening of plant growth promoting activity		46
3.10. Diversity study through molecular characterization		53
3.11. Exploration of the partial 16SrDNA genome		61
3.12. Whole genome sequencing		64
3.13. Bioinformatics study		65
4. Results and Discussion		69-131
4.1. Collection of germplasm		69
4.2. Isolation of <i>Rhizobium</i>		69
4.3. Plant infectivity test		70
4.4. Microscopy		72
4.5. Morphological characterization		72
4.6. Biochemical characterization		73
4.7. Physiological characterization		80

P.T.O.

4. 8. Plant growth promoting traits of <i>Rhizobium</i>	86
4.9. Diversity study through molecular characterization	95
4.10. 16S rDNA partial nucleotide sequence parity and phylogenetic analysis	116
4.11. Whole genome sequencing and assembly	119
4.12. Bioinformatics study	119
Conclusion	132-133
Bibliography	134-150
Index	151
Appendix	one
