

TABLE OF CONTENTS

| | Page No. |
|---|-----------------|
| 1. Introduction and Scope of Work | 1-11 |
| 1.1 Introduction | |
| 1.2 Scope and Objective of the Work | |
| 1.3 Concept of Modeling and Simulation | |
| | |
| 2. Literature Survey | 12-77 |
| 2.1 Mathematical Modeling | |
| 2.2 The Streeter-Phelps River Pollution Model: Oxygen Sag Curve | |
| 2.3 River Water Quality Modeling Concept | |
| 2.4 Dynamic Mechanistic River Water Quality Modeling | |
| 2.5 Dynamic River Water Quality Modeling (Simplified Form) | |
| 2.6 Basic River Water Quality Models | |
| 2.7 BOD-DO River Models | |
| 2.8 Analysis of water quality by using Statistical Methods | |
| | |
| 3. Mahananda River Case Study | 78-124 |
| 3.1 Introduction | |
| 3.2 Mahananda Catchments Area | |
| 3.3 Location of Sample Sites | |
| 3.4 Data Acquisition | |
| 3.5 Selected Water Quality Parameters of Mahananda River | |

- 3.6 Statistical Analysis of Water Quality**
 - 3.6.1 Arithmetic Mean**
 - 3.6.2 Standard Deviation (S.D)**
 - 3.6.3 Variance**
 - 3.6.4 Calculation of Correlation Coefficient (r)**
 - 3.6.5 Regression Analysis**
 - 3.6.6 'C' Program to Fit a Regression Line**
- 3.7 Graphical Models of DO,BOD and COD at Different Sampling Stations.**
- 3.8 BOD as a First Order Reaction**

- 4. Development of Oxygen Sag Model (Simplified Form) 125-138**
 - 4.1 Introduction**
 - 4.2 Laplace Transformation**
 - 4.3 DO Sag Model Formulation**
 - 4.3.1 The Exponential Integral**
 - 4.3.2 The Oxygen Sag Equation (Two Forms)**
 - 4.3.3 Minimum DO Concentration**
 - 4.4 Application of DO Sag Equation**
 - 4.5 Conclusions**

- 5. Application of Laplace Transform to a Non Traditional Dissolved Oxygen Model 139-147**
 - 5.1 Introduction**
 - 5.2 Three-halves Order BOD Equation**
 - 5.3 Laplace Transformation of Oxygen Sag Equation for Three-halves Order BOD Reaction**
 - 5.4 Minimum DO Concentration**
 - 5.5 Conclusion**

| | |
|--|----------------|
| 6. Uncertainty of Mathematical Modeling | 148-169 |
| 6.1 Introduction | |
| 6.2 Model Uncertainty | |
| 6.2.1 Sources of Uncertainty and their Propagation | |
| 6.2.2 Causes of Uncertainty | |
| 6.2.3 Analysis of Uncertainty | |
| 6.3 Surface Water Quality Modeling Application | |
| 6.4 Risk in Context | |
| 6.5 A Framework Outline | |
| 6.6 Technical Consideration | |
| 6.6.1 Need for Accessibility, Flexibility & Extensibility | |
| 6.6.2 Need for Numerical Efficiency | |
| 6.6.3 Need for Sensibility Analysis and Risk Evaluation Capabilities | |
| 6.7 Quality of Models | |
| 6.8 Conclusion | |
| 7. Results and Discussions | 170-177 |
| 8. Conclusions | 178-179 |
| 9. References | 180-201 |
| Publication | 202 |
