

## C O N T E N T S

Acknowledgement -	v
Preface -	vii
List of Publications -	viii
Chapter - I	
(General Introduction on Cosmic Rays)	
1.1 Cosmic Rays	1
1.2 Direct Measurements on Cosmic Rays	3
1.3 Indirect Measurements on Cosmic Rays	4
1.4 Extensive Air Shower (EAS) Phenomena	4
1.4.1 Electromagnetic Component	6
1.4.2 Muon Component	6
1.4.3 Hadronic Component	7
1.4.4 Cerenkov Radiation in Extensive Air Showers	9
1.4.5 Other Components of EAS	10
1.5 Results from EAS Studies	12
1.5.1 Primary Composition	13
1.5.2 Anisotropy Measurements	14
References	15
Chapter - II	
(Experimental Set-Up)	
2.1 Introduction	20
2.2 The Air Shower Array	20
2.3 Electron Density Detectors	21
2.4 The Neon Flash Tubes	22

2.4.1	The Principle of Operation	22
2.4.2	Properties of the Neon Flash Tubes	23
2.5	Neon Flash Tube Chamber	26
2.6	The Operation of the NFT Chamber	26
2.7	Magnetic Spectrograph Units	28
2.8	Description of the Control Electronics associated with the EAS Array	34
2.8.1	Shower Selection	35
2.8.2	Data Acquisition, Storage and Transfer	35
2.9	Operation and Response of the Array System	36
2.9.1	Response Capability of the Array	37
2.10	Efficiency of the Detectors	38
2.11	Maintenance and Calibration of the Density Detectors	38
2.12	Cross Calibration of the Channels	40
	References	41
	Figure Caption	41

### Chapter - III

(Data Processing, Analysis,  
Error Estimation etc.)

3.1	Shower Data Analysis	44
3.2	Estimation of Shower Size, Age and Core-position	44
3.2.1	An Indication to the Flow Chart in Figure 3.1	47
3.3	Estimation of Errors on Shower Parameters	48

3.4	Artificial Shower Analysis	49
3.5	Air Shower Triggering Probability	50
3.6	Efficient Detection Area of the Array	51
	References	52
	Figure Caption	52

## Chapter - IV

### (Lateral Distribution of Electrons and Muons)

4.1	Lateral Distribution of Electrons in Extensive Air Shower (EAS)	55
4.1.2	Experimental Observations on Lateral Distribution of Electrons	59
4.1.3	Present Observations on Electron Lateral Distributions	59
4.1.4	Transition Effect Correction	60
4.2	Age Parameter and Local Age Parameter	61
4.3	Present Observations on Lateral Distributions of Muons	62
4.3.1	Ratio of the Electron density and the Muon density	64
4.3.2	$N_e - N_\mu$ relation	65
	References	65
	Figure Caption	67

## Chapter - V

### (Size Spectrum of EAS and Energy Spectrum of Primary Cosmic Rays)

Introduction	70
5.1    Size Spectrum	70
5.1.1    Experimental	70
5.1.2    Result	71
5.2    Energy Spectrum of the Primary Cosmic Rays	73
References	74
Figure Caption	75

## Chapter - VI

### (Differential Energy Spectrum of Vertical Single Muons)

6.1    Introduction	76
6.2    Method of Calculation	76
6.2.1    Calculation of the Production Spectra of CR Mesons	77
6.2.2    Relationship between the Primary Nucleon Spectrum and Sea-level Muon Spectrum	78
6.2.3    Improved Calculation of Sea-level Muon Spectrum	80
6.3    R e s u l t s	81
References	82
Figure Caption	83
