

C O N T E N T S

	Page
Preface	1 - vii
Notations	viii - ix

C H A P T E R - I

1. Comprehensive study of the early researches in the area under investigation.....	1 - 20
---	--------

C H A P T E R - II

1. Basic theories and methods of non-linear elasticity...	21- 83
---	--------

C H A P T E R - III

1. Derivation of the governing differential equations and the boundary conditions.....	84 - 141
--	----------

C H A P T E R - IV

1. Non-linear analysis of non-homogeneous rectangular and square plates.....	142 - 156
2. Non-linear analysis of non-homogeneous elastic plastic plates of arbitrary shape.....	157 - 165
3. Some points on Berger's modification and modified Berger equations.....	166 - 174
4. Non-linear damped oscillations of elastic plastic shallow shells	175 - 185
5. Observations and discussions	186 - 194

C H A P T E R - V

page

1. Large deflections of thin elastic plates of arbitrary shape placed on elastic foundation under both uniform load and a concentrated load at the centre..... 195 - 204

C H A P T E R - VI

1. On the free vibration of elastic plastic shallow shells...205 - 214
2. Non-linear damped oscillations of a doubly curved shallow shell on an elastic foundation..... 215 - 226

C H A P T E R - VII

1. Non-linear analysis of thermo-elastic plates with varying flexural rigidity..... 227- 236

C H A P T E R - VIII

1. Non-linear free vibration of a doubly curved orthotropic shallow shell under a thermal gradient..... 237 - 245
2. Temperature effect on the dynamic responses of spherical shells..... 246 - 259

C H A P T E R - IX

1. On the non-linear analysis of elastic plates and shells 260 - 276

C H A P T E R - X

1. On the future demand of the twentyfirst century..... 277 - 282

Reprints of the published papers are enclosed at the end.
