INDIA

Exceedingly glad to certify that Mrs. Gargi Ghosh, M.Sc. in Chemistry has carried out her research work embodied in the thesis entitled " Investigation on Solute-Solute, Solute-Solvent and Solvent-Solvent Interaction Prevailing in Some Liquid Systems " based on her original work under my supervision and guidance.

She is submitting her thesis for the award of Doctor of Philosophy (Science) degree in Chemistry according to the rules and regulations of the University of North Bengal. The research work included in this thesis is original and has not been submitted previously in any form for the fulfilment of the Degree or Diploma of this University or any other University.

I am very much impressed for her keen interest and research aptitudes on such an applied and interesting field. In my opinion, she is fit and proper lady to be conferred with the degree of Doctor of Philosophy (Ph. D.) in Chemistry (Science) of the University of North Bengal.

She is very intelligent, alert, energetic, sincere and hard-working lady and she is sure to prove herself worthy if she is placed in a better assignment.

I wish her every success in life.
