STATUTORY DECLARATIONS	I
CERTIFICATE FROM SUPERVISOR	II
PLAGIARISM REPORT	III
PREFACE	IV-VII
ACKNOWLEDGEMENTS	VIII-IX
ABSTRACT	X-XIII
APPENDICES	XXXIV- LX
LIST OF FIGURES	XIX-XXVI
LIST OF TABLES	XXVII-XXIX
LIST OF PLATES	XXX-XXXIII
Chapter-I Introduction	1-19
1.1 Prelude	1
1.2 The study area	1
1.3 Statement of problem	3
1.4 Objectives	4
1.5 Hypothesis	5
1.6 Methodology	5
1.7 Review of Literatures	6
References	12
Chapter-II Geomorphology of the Upper Mahananda Basin	20-54
2.1 Introduction	20
2.2 Geology	21
2.3 Climate	24
2.4 Soil	24
2.5 Topography	27

2.6 River System	29
2.7 Natural Vegetation	31
2.8 Drainage Density	32
2.9 Drainage Texture	33
2.10 Relative Relief	35
2.11 Ruggedness Index	37
2.12 Dissection Index	38
2.13 Slope Zones	48
2.14 Conclusion	49
References	52
Chapter-III Hydrological Regime of the basin	55-104
3.1 Introduction	55
3.2 Objective of the Chapter	57
3.3 Methodology	57
3.4 Characteristics of the Cross profile of the river Mahananda	58
3.5 Hydrological Regime in relation to Channel Hydraulics	67
3.6 Rainfall Character and assessment of Hydrological Regime	70
3.7 Conclusion	100
References	102
Chapter-IV Channel Behaviour and Pattern	105-131
4.1 Introduction	105
4.2 Objective of the chapter	106
4.3 Methodology	106

4.3.1 Morphometric analysis	106
4.3.2 Statistical analysis	107
4.4 Analysis of Channel pattern	108
4.4.1 Shifting nature of Mahananda River course: a temporal analysis	108
4.4.1.1 Condition of channel at Reach-I	108
4.4.1.2 Condition of channel at Reach-II	110
4.4.1.3 Condition of channel at Reach-III	113
4.4.1.4 Condition of channel at Reach-IV	116
4.5 Analysis of channel sinuosity	124
4.5.1 Reach-I	124
4.5.2 Reach-II	125
4.5.3 Reach-III	126
4.5.4 Reach-IV	126
4.6 Analysis of Braiding parameters	127
4.7 Conclusion	128
References	129
Chapter-V Channel Form and Process: Changes and related features	132-157
5.1 Introduction	132
5.2 Methodology	133
5.3 Hydraulic Variabilities	135
5.4 Computation of Leading Process-Mechanisms	141
5.5 Conclusion	155
References	155

Chapter-VI Nature and extent of load distribution	158-186
6.1 Introduction	158
6.2 Objective of the Chapter	159
6.3 Methodology	159
6.4 Site Selection	160
6.4.1 Up reach of Mahananda and Gulma Khola Confluence (Upstream)	160
6.4.2 Down reach of Mahananda Gulma Khola Confluence (Downstream)	164
6.4.3 Site 3: At Champasari	168
6.4.4 Site 4: Unpreach of Noukaghat Bridge (Upstream)	172
6.4.5 Site 5: Down reach of Noukaghat Bridge ((Downstream)	176
6.5 Conclusion	179
References	185
Chapter-VII Impact of Flood and Bank Failure on Fluvial dynamics	187-219
7.1 Introduction	187
7.2 River Mahananda and driving factors of Flood and bank erosion	188
7.3 Materials and methods	189
7.3.1 Database preparation	189
7.3.2 Utilization Theme of BEHI	192
7.4 Bank erosion mechanism	192
7.4.1 Assessment of bank erosion	194
7.5 Channel migration and bank collapse	195
7.5.1 Spatio Temporal Bankline and cross section studies	195
7.5.2 Channel Migration and Impacts on River Dynamics	196
7.5.3 Erosion-Deposition scenario of River Mahananda	204
7.6 Bank Failure and flood in relation to River Dynamics	206

7.6.1 Factors Affecting of Bank failure and impacting River Dynamics	208
7.6.2 Consequence of Bank failure	213
7.7 Conclusion	216
References	216
Chapter-VIII Human Interference and Fluvial dynamics	220-249
8.1 Introduction	220
8.2 Objectives of the Chapter	220
8.3 Materials & methods	221
8.4 River Bed Mining and channel dynamics	222
8.5 Settlement & channel dynamics	230
8.6 Embankment & channel dynamics	239
8.7 Concluding Remarks	247
References	247
Chapter-IX: Conclusion and Summary	250-263
9.1 Introduction	250
9.2 Reaches and their overall characters: A Summary Discussion of Mahananda River	251
9.3 Bank lines: A Spatio-temporal and Summary thoughts	254
9.4 Dynamic channel Properties of Upper Mahananda Basin	254
9.5 Channel Shifting: Conclusive Summary on Spatio-temporal Views	257
9.6 Channel Behavior and Patterns	259
9.7 Hydrological Significance of the river	260
9.8 Tested Hypotheses and their validations	261
9.9 Concluding Remarks	263
Bibliography	264-284
