

Table of Contents

Descriptions	Page No.
Abstract	i-vii
Preface	viii
Acknowledgments	ix
Table of Contents	x-xiv
List of Figures	xv-xxv
List of Tables	xxvi
List of Schemes	xxvii
List of Appendices	xxviii
Chapter 1	1-18
Introduction	1
<i>1.1. Chemistry of Host-Guest Interactions</i>	1
<i>1.2. Host-Guest-Based Optical Sensors</i>	1
<i>1.3. Colorimetric Chemosensor</i>	3
<i>1.4. Fluorescent Chemosensor based on Host-Guest Interactions</i>	4
<i>1.4.1. Signaling Pathways Associated with Chemosensors</i>	5
<i>1.4.2. Photoinduced Electron Transfer (PET)</i>	6
<i>1.4.3. Intramolecular Charge Transfer (ICT)/Photoinduced Charge Transfer (PCT)</i>	7
<i>1.4.4. Excited-State Intramolecular Proton Transfer (ESIPT)</i>	7
<i>1.4.5. Aggregation-Induced Emission (AIE)</i>	8
<i>1.5. Some Curious Sensing Mechanisms</i>	10
<i>1.5.1. Mechanisms of Action of Metal Ion Sensor</i>	10
<i>1.5.2. Mechanisms of Action of Anion Chemosensors</i>	11
<i>1.5.3. Mechanisms of Action of Chemical Warfare Agents (CWAs) Sensor</i>	11
<i>1.6. Literature Survey</i>	12
<i>1.6.1. International Status</i>	13
<i>1.6.2. National Status</i>	13
<i>1.7. Conclusion</i>	14
References	15-18
Chapter 2	19-24
Methods and Instrumentations	19

2.1. Measurement of Weight	19
2.2. Water Distiller	19
2.3. Thermostat	20
2.4. Magnetic Stirrer	20
2.5. FT-IR Spectra Measurement	20
2.6. NMR Spectroscopic Measurement	21
2.7. High-resolution Mass spectrometric analysis	22
2.8. UV-visible Spectra Measurement	23
2.9. Fluorescence Spectra Measurement	24
Chapter 3	
A Symmetrical Imine-Linkage Colorimetric Probe for Sequential Detection of Al³⁺ And PO₄³⁻ Ions	25-52
3.1. Introduction	25
3.2. Materials and Methods	27
3.2.1. Reagents and Instruments	27
3.2.2. Synthesis of the Probe DPAB	27
3.3. Results and Discussion	29
3.3.1. Choice of the Medium for Metal Ions Selectivity	29
3.3.2. The UV-visible Spectral Responses of Probe DPAB	29
3.3.3. Metal Ions Selectivity	31
3.3.4. Competitive Experiments	32
3.3.5. Relay Recognition of Phosphate Ions	33
3.3.6. Binding Stoichiometry and Association Constant	35
3.3.7. Estimation of LOD	37
3.3.8. Effect of Time	38
3.4. Real sample analysis	39
3.5. Practical Application on Cellulose Test Paper	40
3.6. Application as Logic Circuits	41
3.7. Design of Molecular Memory Device	43
3.8. Model Compound for Designing a Molecular Communication System	44
3.9. Smartphone-Aided Assay Investigation for Measuring Al ³⁺ Ions	45
3.10. Conclusion	45
References	49-52

Chapter 4	53-73
A Pyrene Coupled Azaine-Linkage Chromo-Fluorogenic Probe for Specific Detection of Sarin Gas Simulant, Diethylchlorophosphate	
4.1. Introduction	53
4.2. Experimental Section	56
4.2.1. Measurements of Fluorescence Quantum Yields	56
4.2.2 Synthesis of BPH	56
4.3. Results and Discussion	58
4.3.1. UV- visible Spectrophotometric Analysis	58
4.3.2. Fluorometric Investigation	59
4.3.3. Selectivity Studies	61
4.3.4. Estimation of Detection and Quantification Limit	63
4.3.5. Utilization of BPH as a Portable Solid-State Sensor	64
4.3.6. Detection of DCP in the Vapor Phase	65
4.4. Conclusion	67
References	69-71
Chapter 5	
A Julolidine-Coupled Azine-Based Reversible Chromo-Fluorogenic Probe for Specific Detection of Cu²⁺ Ions	72-95
5.1. Introduction	72
5.2. Experimental Sections	74
5.2.1. Materials and Instrumentations	74
5.2.2. Optical Detection of Cu ²⁺ Ions Using HDBQ	74
5.2.3. Synthesis of HDB	75
5.2.4. Photoluminescence Quantum Yield Calculation	76
5.3. Results and Discussion	77
5.3.1 Photophysical Properties of HDBQ	77
5.3.2. UV-visible Spectrophotometric Titration Study of HDBQ with Cu ²⁺ Ions	78
5.3.3. Fluorescence Study	79
5.3.4. Selectivity and Interference Experiments	79
5.3.5. Determination of Limit of Detection (LOD) and Quantification (LOQ)	82
5.3.6. Response Time Study	83

5.3.7 <i>pH-metric Analysis</i>	84
5.3.8. <i>Sensing Mechanism</i>	84
5.3.9. <i>Evaluation of Quenching Constant and Stoichiometric Ratio</i>	86
5.3.10. <i>Reversibility Study</i>	88
5.4. <i>Molecular Logic Gates Construction</i>	89
5.5. <i>Use of HDBQ as a Solid-State Sensor</i>	91
5.6. <i>Real Sample Analysis</i>	91
5.7. <i>Conclusion</i>	92
<i>References</i>	93-95
Chapter 6	
An Efficient Imine-Linkage Colorimetric Probe for Specific Recognition of Sarin Gas Surrogate, Diethylchlorophosphate	99-125
6.1. <i>Introduction</i>	98
6.2. <i>Experimental Section</i>	98
6.2.1. <i>Materials and Instrumentations</i>	98
6.2.2. <i>Preparation of Portable Paper-based Test Strips</i>	99
6.2.3. <i>Detection of DCP in the Gas Phase</i>	99
6.2.4. <i>Synthesis of BDPA and its Characterization</i>	99
6.2.5. <i>Stock Solutions Preparation for Spectral Analysis</i>	101
6.3. <i>Results and Discussions</i>	101
6.3.1. <i>Detection of DCP Employing UV-visible Spectrophotometer</i>	101
6.3.2. <i>Determination of Detection (LOD) and Quantification (LOQ) Limit</i>	104
6.3.3. <i>Selectivity Investigation</i>	104
6.3.4. <i>Reversibility Studies</i>	106
6.3.5. <i>BDPA as a Solid-State Sensor for Recognition of DCP</i>	109
6.3.6. <i>On-Spot Detection in Gas Phase</i>	111
6.3.7. <i>Response Time Study</i>	114
6.3.8. <i>Smartphone-Assisted Method for Quantifying and Detecting DCP</i>	114
6.4. <i>Conclusion</i>	117
<i>References</i>	118-121
Chapter 7	
An Adenine-Based Chromone-Coupled ‘Off-On-Off’ Fluorogenic Dyad for Cascade Detection of Zn²⁺ And HSO₄⁻ Ions Or Zn²⁺ Ions and Picric	122-153

Acid	
7.1. Introduction	122
7.2. Experimental Section	124
7.2.1 Chemicals and Instruments	124
7.2.2 Synthesis Process of BDI	125
7.2.3. Preparation of a Stock Solution for Spectral Analysis	129
7.2.4. Experimental Details	129
7.3. Results and Discussion	130
7.3.1 UV-visible Spectroscopic Studies	130
7.3.2. Fluorescence Studies	131
7.3.2. Selectivity Studies	132
7.3.3. Stoichiometric Ratio, the Limit of Detection (LOD) and Quantification (LOQ)	135
7.3.4. Mechanistic Aspects of the Formation of Zn^{2+} Chelated BDI Complex	135
7.3.5. Application of Zn^{2+} Ions Chelated BDI Complex for HSO_4^- Ions Sensing	136
7.3.6. Application of Zn^{2+} Ions Chelated BDI Complex for PA Sensing	138
7.3.7. Formation of Molecular Logic Gates	140
7.3.8. Fabrication Paper Strips-Based Test Kit	141
7.4. Conclusion	144
References	146-150
Chapter 8	
Summary and Future Prospectives	151
Bibliography	152-168
Appendices	169-170
