Towards the end of 1917 the Secretary of State visited India in connexion with a development of constitutional progress. The Bombay Government took the first steps towards obligatory primary education; a policy of more complete local self-government was decided on by the Government of India. The influenza epidemic spread to India, and it is estimated that over 12 million deaths in British India and Indian States resulted. The Industrial Commission, appointed in 1916, issued a report. In 1919 a bill was introduced into Parliament embodying the proposals of the "Montagu-Chelmsford Joint Report," and eventually passed. During the year considerable distress occurred in consequence of the partial failure of the 1918 autumn crops throughout Northern India and the Peninsula, and relief measures were undertaken. Serious disturbances in the Punjab and Delhi, resulting in many deaths, followed on a "passive resistance" movement, inaugurated by Mr. Gandhi against the "Rowlatt" Bills, introduced by the Government of India, on the recommendation of the "Rowlatt" Committee, for renewing some of the powers with which the Government had armed themselves during the War to deal with sedition. The murder of the Amir and the subsequent events in Afghanistan were followed by an inroad of Afghans and some frontier tribes into India, necessitating prompt military action by the Government of India. The "Sadler" Commission on the Calcutta University reported during the year, and made drastic proposals for recasting the Indian secondary and university educational system. The Home Parliament, by rules, laid down the details of the constitution of the new Central and Provincial Governments (*see* pp. 655, 657). The Amir's representatives visited India and discussed with officers of the Indian Government the possibility of a resumption of more friendly relations. Fighting with the Mahsuds on the North-West frontier continued throughout the year, in consequence of which the Viceroy announced Government's intention to occupy Central Waziristan, and to continue the railway from Jamrud towards the Khyber. Further steps towards employing more largely Indians in the various Government services and for the improvement of conditions of service and pay of both European and Indian members of the same were taken. The recommendation of the Exchange and Currency Committee for the linking of the rupee to gold and the adoption of an exchange rate equivalent to one-tenth of the gold contents of the sovereign, *i.e.*, an exchange rate of Rs. 10 to the £, was adopted. A *High Commissioner for India* in London, with a separate establishment, responsible to the Government of India for certain agency work, previously performed by the India Office, was appointed. The Army in India and the Medical Services Committees respectively reported. The Army in India Committee attempted to determine the part to be played by the Army in India in a scheme of Imperial Defence and to analyse the steps which must be taken to make the Army, both in its administration and its personnel, more efficient and more attractive to the right type of soldiers.

In January, 1921, the new Indian Legislature, Provincial Councils, and the Chamber of Princes, were inaugurated by the Duke of Connaught.

Lord Reading succeeded in April, 1921. The battle between constitutionalism and revolution continued. A conflict between Sikhs at Nankana resulted in many deaths. Mr. Gandhi, the Ali brothers, and their associates, continued to advocate non-co-operation with the Government and boycott of the reforms. The utterances of the Ali brothers forced Government to order their arrest. The Moplahs (Muhammadan fanatics of Malabar) resisted the ordinary processes of law, and a widespread outbreak of violence ensued which forced the authorities to take strong military measures for its suppression. Frontier disturbances and fighting continued. Failure of the crops in some parts necessitated the opening of relief works. Special missions were sent to Afghanistan and Tibet. The Railway Committee reported and recommended drastic changes, including the termination of the system of management of railways by Government companies domiciled in England. The Jails Committee reported, and Government announced its intention to abolish the Andamans penal settlement.

In November the Prince of Wales visited India. In 1922 the Government arrested Mr. Gandhi, who was sentenced to six years' imprisonment. The Government found it necessary to give to Ruling Princes some measure of protection against attacks in the Press.

The Fiscal Commission (appointed in 1921) reported and advised the adoption of a policy of protection.

The Hon. V. Srinivasa Sastri visited the Dominions, as a representative of the Government of India, to discuss with the leaders of political thought the disabilities of Indians in the self-governing Dominions. Twenty-three Acts and Regulations supplementing the criminal law were repealed. A Central Advisory Board for Railways was established.

In 1923 Burma was constituted a Governor's Province. The "Inchcape" Retrenchment Committee, appointed in 1922, reported and recommended a total reduction in the Budget of Rs. 19¼ crores. The Government accepted the principle of Protection, but declared that it should be applied with discrimination; hitherto the Indian tariff had been a revenue tariff. A trade Convention was concluded with Afghanistan. A Bill was passed providing for the removal of existing racial distinctions in the criminal procedure applicable to Indians and non-Indians. The new frontier policy was further developed by the completion of various roads for mechanical transport within Waziristan and along the Derajat border: Jandola and Razmak were held by regular troops pending the completion of this road programme. At the Imperial Conference, a Resolution was passed recommending each Dominion of the Empire concerned to set up a Commission to consider, in conjunction with a Commission of equal number from India, how far the principle laid down by the Imperial Conference of 1921, that Indians lawfully resident overseas should not suffer derogation of rights of citizenship, had been given effect to and to what extent it could be further applied. Conspiracies and methods of violence to further political aims were revived during the year, and the Bengal Government was given special powers to deal with violent crime. The Punjab was greatly disturbed by the Sikh invasion of the Nabha State. The Royal Commission on the Superior Civil Services, appointed in 1923, reported and recommended financial improvements for the Indian Civil and other Services. Further Indianisation of the Services was recommended. During the year a Legislative Council was set up in Coorg.

Early in 1925, the Swarajist leader, Mr. Das, repudiated the policy of violence, but asked in return for the cessation of "repressive" measures. A committee was appointed to enquire into the difficulties arising from or inherent in the working of the Constitution, and recommended many alterations, particularly that the control of the Secretary of State should be relaxed in purely Indian matters. The terms of reference did not, however, extend to the larger question of a complete revision of the Constitution, contemplated in the Montagu-Chelmsford scheme of 1918. The Viceroy came home to confer with the Home Government, and on his return to India announced the decision that the moment for such an enquiry had not arrived. The Government extended the policy of protection by granting a bounty on steel manufactured in India. The Khyber Pass Railway, 27 miles in length, from Jamrud—some three miles from the entrance of the Pass—to Landi Kotal, on the Afghan border, was opened.

In 1926 the Finance Member announced, for the fourth year in succession, a balanced budget, and that, consequently, more expenditure on medical research, education, sanitation, &c., was contemplated. The Cotton Excise duty was abolished.

It was decided to reconstruct the Royal Indian Marine as a combatant force so that India may ultimately undertake her own naval defence. The Government of India decided to prohibit the export of opium for medical purposes, thus taking the lead in initiating the measures for which the Geneva Protocol provides.

Lord Irwin succeeded Lord Reading as Viceroy in April, 1926.

In the United Provinces a Bill was passed to improve the lot of tenants in Agra Province by facilitating occupancy tenure and for the prevention of unauthorised imposts by landlords.

The Royal Commission on Indian Currency and Finance recommended that the gold value of the rupee should be fixed at 1*s.* 6*d.*, that the currency authority should be put under a statutory obligation to buy and sell gold or gold exchange at appropriate prices to maintain the ratio, that a central bank should be created apart from the Imperial Bank and that measures should be taken to establish a gold standard for India. Government announced their intention to adopt the ratio of 1*s.* 6*d.* and to pass the necessary legislation to put the matter on a statutory basis.

Following the success of the Government mission for the suppression of slave trading in the Hukawng valley an expedition was sent to the Kachin tribal chiefs in Burma with the object of endeavouring to persuade the chiefs to agree to the abolition of the system of tribal slavery in the area lying between the head waters of the Irrawaddy. In Nepal the slave liberation scheme, formulated by the Prime Minister of that State, was completed at a cost of £275,000.

Important changes in the administration of the State of Hyderabad were made by H.H. the

Nizam following representations by the Supreme Government.

During the year there was a recrudescence of communal and religious strife between Moslems and Hindus, and serious riots, with great loss of lives, occurred in most parts of India, particularly in Kohat, Calcutta and Delhi. The Government of Bengal was obliged to proclaim a state of emergency.

The elections for the Indian Assembly and Provincial Councils were held towards the close of the year.

In **1927** a continuance of the measures for the protection of the Indian steel industry, in a modified form, was recommended by the Indian Tariff Board, whose main proposals were accepted by the Government of India. It was also decided to protect the cotton textile industry against competition in cotton yarn produced under conditions which enable such yarn to be produced at a cost below that at which it can be produced in India, by an alteration in the import duty on cotton yarn, and to abolish the duty on imported mill stores, etc. An Act for the registration of trade unions came into force. The rupee was stabilised by legislation, at 1*s.* 6*d.*, and a bill for the establishment of an Indian Reserve Bank was introduced. The Bombay Back Bay Reclamation Committee recommended the carrying on of a certain portion of the work, but that it should in future, as far as possible, be undertaken by contract agency.

A substantial and progressive Indianisation of the Indian Army was recommended by the Sandhurst (Skeen) Committee in order that, by 1952, 50 per cent. of the cadre of officers should be Indians.

A settlement was reached with the Government of South Africa on the question of the position of Indians in the Union. A Public Services Commission was formally constituted. The new Council House at New Delhi was opened. The Indian Princes met in conference to consider their future status. His Highness, the Maharajah of Patiala, sanctioned a scheme of compulsory education in his State. Slavery was abolished in the State of Kalat (Baluchistan).

In the Home Parliament the Indian Navy Bill and the Indian Church Bill were passed. The latter provides that the Church in India shall be an autonomous body.

In November the Home Government announced its intention to set up a Statutory Commission, with the Rt. Hon. Sir John Simon as Chairman, to report to what extent it is desirable to establish the principles of responsible government in India, or to extend, modify or restrict the degree of responsible government.

In **1928** the Commission visited India, but was unfavourably received by many who were dissatisfied with the terms of reference. Boycotts and sympathetic strikes were organised. Towards the end of the year the Commission succeeded in securing the offer of the co-operation of most of the political parties and groups previously hostile. A Committee was appointed, with Sir Harcourt Butler as Chairman, to consider the relations between the Paramount Power and the Indian States, with special reference to the financial and economic relations between British India and the States.

The Royal Commission on Agriculture in India (appointed in **1926**) issued its Report and the first step to carry out its recommendations was taken by the opening of a Conference in India to draw up schemes for co-ordinated action.

In **1929** it was announced that in future, the number of direct vacancies open to Indian candidates at Sandhurst will be doubled, that a certain number of vacancies will be reserved for Indian officers holding the Viceroy's commission, and that Woolwich and Cranwell will be open to Indian aspirants for King's Commissions.

In **1929**, power was given by the Appellate Jurisdiction Act to appoint Indian judges, etc., as additional members of the Judicial Committee of the Privy Council for the hearing of appeals from India. The Statutory Commission continued its labours, but met with a considerable amount of opposition organised by some of the political groups in India. Indian leaders attempted (but with little success) to draw up proposals acceptable to the main recognised political parties for submission to the Commission. A bill was introduced in the Assembly providing for the removal from India of non-Indian communist agents and a few days later an attempt was made by communists to destroy members of the Assembly by throwing bombs at the Government benches. The Bill was passed later as an Ordinance owing to the refusal of the President of the Assembly to allow its discussion on the ground that some of its provisions were *sub judice* in view of a trial of some conspirators then proceeding. There was considerable unrest in parts of India during the year, particularly in Bombay. An Act was passed providing for the investigation and settlement of trade disputes; under it strikes and lock-outs in utility services are penalised; strikes and lock-outs having any object than the furtherance of a trade dispute within the trade or industry in which the strikers or employers are engaged, or are designed to inflict severe general and prolonged hardship upon the community and government are illegal.

A Royal Commission was appointed to report on the existing conditions of labour in industrial undertakings in British India, on the health, efficiency and standard of living of the workers, and on the relations between employers and employed. A Committee was also appointed to consider the general problem of road development.

An Act was passed providing that the age of marriage shall not be less than 14 and the age of consent not less than 16.

The Indian States Committee presented its Report. It recommended that the Viceroy, not the Governor-General in Council, should in future be the Agent of the Crown and that important matters of dispute between the states themselves, between the states and the Paramount Power and between the states and British India should be referred to independent Committees for advice. The Committee dealt with the relationship between the Paramount Power and the financial relations between British India and the states, particularly the claim of the states for a share in the maritime customs, the proceeds of which are enjoyed at present exclusively by British India.

In view of the impending issue of the Report of the Statutory Commission it was decided to extend the term of the Central and Provincial legislatures, thus postponing the elections beyond the end of the year.

In **1930** the outstanding event was the issue of the Report of the Statutory Commis-

sion (the Simon Commission). The report was unanimous. A survey of the facts, containing an analysis of the trend of political thought in India was first published (Cmd. 3568); then, after a short interval, the Commission's Recommendations (Cmd. 3569). These, though in no sense revolutionary, foreshadowed many changes: First, the separation of Burma, whose political association with India is not based on any natural or racial affinity, but is a mere accident of history; and, secondly, a number of radical reforms in the constitution of India proper. Broadly these may be summarised as the grant of the greatest possible measure of independence to Local Governments within their own sphere, and the substitution of a Federal system in place of the existing arrangements. Measures were also proposed whereby representatives of the Indian States will join with representatives of British India for the discussion of matters of common concern in a "Council of Greater India," to be appointed not by Statute but by Royal Proclamation.

A notable feature of the Statutory Commission's scheme was its insistence on the principle that the constitution to be framed should be such as will not require to be revised and overhauled by external authority at stated intervals, but should contain within itself provision for adaptation by a process of natural growth, to meet new circumstances and changing conditions, thus avoiding the unsettlement caused by periodic enquiries. The ideal of a Federation for All-India was held up as one to be attained by degrees as the Feudatory States come to realise the desirability of entering into closer political relations with British India; and the reconstruction of the constitution of British India on a federal basis was advocated as an essential preparatory step towards that ultimate objective.

It was proposed that the Provinces should be provided with enlarged financial resources. Their Governments would no longer be "dyarchic," as under the Montagu-Chelmsford Constitution, but unitary, every Member being required to accept joint responsibility for all acts of the Administration. Ministers, whether chosen from the local Legislature or not, were to be nominated by the Governor, and would have charge of those branches of the administration which are now "reserved" to the Official Side of the Government, *e.g.*, control of the Police and maintenance of Law and Order. The Commission recommended that reserve powers should be vested in the Governor for such essential purposes as the protection of minorities and of the rights of the Services, and the carrying on of the Government in any emergency such as the breakdown for any reason of the normal arrangements; that Legislatures should be enlarged, the franchise-basis widened, and constituencies reduced to more manageable size. Moreover, a certain elasticity was recognised as indispensable, and measures were indicated whereby each Province may advance towards self-government on the lines found best suited to its individual needs, provided always that the rights of minorities were not invaded by any constitutional changes thus effected.

Other recommendations were that in the Central Government the "Legislative Assembly" should become the "Federal Assembly"; the Council of State, or Upper House, to continue with its existing functions and constituent elements.

The Commission suggested that it may be desirable to treat the defence of India as a matter falling within the responsibility of the Governor-General (advised by the Commander-in-Chief as at present) as representative of the Imperial Authorities instead of as a function of the Governor-General in (Executive) Council in association with the Indian Legislature. The possibility that this suggestion might be held to derogate from the prestige of the Indian Government was recognised: the Commission made it only because on any other basis they regarded the military problem as an "almost insuperable" obstacle to the carrying out of the policy laid down in 1919 of the "progressive realisation of responsible government." It was submitted that so long as British troops are required for the defence of the Indian frontier the British Parliament cannot surrender to any subordinate or independent authority effective control in this sphere.

The Commission's Report, published in June, was received with a storm of disapprobation in Indian political circles, and was the signal for a recrudescence of the non-co-operation movement in an acute form. There were serious riots and bomb outrages in various parts of India. In the course of the measures taken to restore order Mr. Gandhi and numerous other political leaders were brought to trial, convicted, and sentenced to terms of imprisonment.

In September the Round Table Conference was convened in London as the next stage in the process of settling the future constitution.

On the North West Frontier there were repercussions of the unrest in India itself. Repeated raids by tribesmen necessitated defensive and retaliatory measures, particularly by the Royal Air Force.

General elections to the Indian and Provincial Legislatures took place in the autumn.

In 1931 the various Committees of the Round Table Conference presented their Reports, one of the most important being that of the Federal Relations Sub-Committee outlining the constitution of a Federal Government of India. The representatives of the Indian States had expressed their willingness to consider their entry into a Federal system. The Conference adjourned in January. Later, there was considerable disorder in India, but eventually negotiations resulted in an agreement for the cessation of civil disobedience and of the boycott of English goods.

New Delhi was inaugurated in February. The Earl of Willingdon succeeded Lord Irwin as Viceroy in April.

The Round Table Conference re-assembled in London in October, and during the month discussed the composition and functions of the proposed Federal Legislature, the Federal Court, the representation of minorities, the States' places in the Legislature, &c. On November 1 it was announced that the Federal Structure Committee's Draft Report (subject to alterations and amendments by the Committee) contained proposals for the constitution of a Federated India, with a scheme for a Legislature, consisting of (1) an Upper House (200 members), composed of representatives of the Provinces and of the States, "elder statesmen," and a small proportion of members appointed by the Viceroy; (2) a Lower House (300 members), including 100

representatives of the States elected by the free vote of qualified voters from territorial constituencies, and special representatives of the landlord interest, commerce and labour. Other proposals were that members should be required to take an oath of allegiance, that Bills to become laws should be assented to by both Chambers, that power should be vested in the Governor-General to call a Joint Session in case of disagreement, and that the same course should be followed in financial legislation.

During the year it was decided to convene a Round Table Conference to consider the future constitution of Burma and the relations of Burma with India. The position of the North West Frontier Province in the proposed Federation was considered by a Committee appointed by the Government of India. The Royal Commission ("Whitley") on Labour, appointed in 1929, submitted their Report and recommendations. In September the Finance Minister announced that, in consequence of the developments in the first half of the year, it was proposed to impose a temporary surcharge of 25 per cent. on all but one of the existing taxes, including the salt tax, applicable to all customs and excise duties, income tax and super-tax, but not to the customs duty on exports. Inland postal and telegraph rates would be increased by 50 per cent. The duty on artificial silk piece goods would be raised from 20 per cent. to 40 per cent.; the duties on boots, brown sugar and electric bulbs would be increased in varying degrees; machinery and dyes would be taxed 10 per cent., and raw cotton ½ anna a pound.

IMPERIAL LEGISLATION.—Legislation for India in England is chiefly of a constitutional or financial character. *The Regulating Act* (1773), which created the first Governor-General, a Council of five members, and a supreme court with a chief judge, was the first statute that recognised the East India Company as a ruling body. Pitt's *India Act* (1784) left the business and most of the patronage to the Court of Directors, but gave the supreme civil and military authority to a Board of Control, whose president represented India in the House of Commons. In 1793 the Company's charter was renewed; in 1813, on a further renewal of the charter, the trade of India was thrown open; while on the next renewal in 1833 the Company's monopoly of the China trade was abolished, and they became a non-commercial governing body. In 1853 the Company's charter was renewed for the last time, and the Indian Civil Service was thrown open to competition. By "An Act for the Better Government of India" (1858), all the territories governed by the East India Company were transferred to the Crown, and all the powers exercised by the Company and the Board of Control were vested in the Secretary of State for India, assisted by a Council. Under this Act as amended by Acts of 1889, 1907, 1915 and 1919, at least one-half of the members of Council must have served in India for 10 years, and must not have left India more than 5 years prior to their appointment. The number of members may be 12 and must not be less than 8, and is at present 9. Their term of office is now 5 years, with power of extension. There are now 3 Indian members. In 1877 (under the Royal Titles Act) Queen Victoria assumed the title of Empress of India. By the Indian Councils Act (1909) the imperial and provincial Legislative Councils were enlarged, their powers of interpellation and criticism enhanced, and the elective element extended, special provision being made for the representation of landholders, the professional classes, Muhammadans, and European and Indian traders and planters. The executive councils of Madras and Bombay were increased in size, and power was given to constitute executive councils in provinces under Lieut.-Governors. The Government of India Act (1912) created a Governor of Bengal, established an Executive Council for Bihar and Orissa, and authorised the creation of legislative councils in provinces under Chief Commissioners. The Indian High Courts Act (1911) empowered the Government of India to increase the number of High Court judges from 15 to 20, to establish new High Courts, and to appoint temporary judges. An Act to consolidate the Imperial Legislation relating to the Government of India was passed in 1915. The Government of India Act, 1919, confers on provinces a larger measure of independence of the Government of India; it distinguishes the functions of local governments and local legislatures from the functions of the Governor-General in Council and the Indian Legislature; it provides for the devolution of authority in respect of provincial subjects to local governments, for the allocation of revenues to those governments and for the use under the authority of the Governor-General in Council of the agency of local governments in relation to central subjects; it provides for the transfer of some provincial subjects to the administration of the Governor acting with Ministers. It gives borrowing powers to local governments. It lays down that the major provinces shall be governed, in relation to reserved subjects, by a Governor in Council, and in relation to transferred subjects by a Governor acting with Ministers, appointed from among the elected Members of the local legislative Council. It confers extended powers on local legislatures. For the Supreme or Central Government, it provides that the Legislature shall consist of the Governor-General and two Chambers, viz., the Council of State and the Legislative Assembly. It provides for the appointment of an Auditor-General and a Public Services Commission on India.

By the Government of India Act, 1929, His Majesty may by Order in Council transfer the control of the military government of Aden to such person or authority as may be specified in the Order.

INDIAN LAW.—The law administered in the Indian courts consists mainly of: (1) The enactments of the Indian Legislative Councils (imperial and provincial) and of the bodies that preceded them; (2) statutes of the British Parliament applicable to India; (3) the Hindu and Muhammadan laws of inheritance and domestic law; (4) the customary law affecting particular castes and races.

The Government of India.

EMPEROR OF INDIA—H.I.M. GEORGE V.

Secretary of State—The Right Hon. Sir Samuel Hoare, Bt., G.B.E., C.M.G., M.P.

THE SECRETARY OF STATE FOR INDIA is the head of the Indian Administration in England, and as a member of the Cabinet he is solely responsible to, and represents the supreme authority of, Parliament. Subject to the provisions of the Government of India Act and rules made thereunder, the Secretary of State can impose his orders on the Government of India. In matters requiring secrecy (*e.g.*, foreign policy and the affairs of Indian States) the Secretary of State can act on his own authority without consulting his Council, and in most other matters can overrule the majority of his Council. Indian Government business in England is transacted at the India Office and at the office of the High Commissioner for India (*see* page 214-15).

The King-Emperor appoints the Governor-General, the Governors of the 9 major Provinces (Bengal, Madras, Bombay, the United Provinces, Bihar and Orissa, the Punjab, the Central Provinces, Assam and Burma), the Commander-in-Chief, the Members of the Executive Councils of the Governor-General and of Governors, and the Judges of the High Courts. The term of these appointments, except judgeships, is usually 5 years.

Subject to the Secretary of State's direction, the supreme executive authority in India, in both civil and military affairs, is the Governor-General in Council. The Governor-General's Executive Council now contains 7 members including the Commander-in-Chief (three of whom must have served in India 10 years), as well as himself. Ordinarily, the opinion of the majority prevails, but the Governor-General is empowered in special circumstances to overrule the majority. In accordance with the Government of India Act, 1919, and rules thereunder, the *Indian Legislature* consists of the Governor-General and two Chambers, viz., the Council of State and the Legislative Assembly (*see* pp. 655, 657 as to their constitution). Except as otherwise provided by or under the Act, a Bill is not deemed to have been passed unless agreed to by both Chambers. The Act confers powers on the Governor-General of securing essential legislation in emergencies, subject to disallowance by His Majesty in Council; of returning Bills for reconsideration, and of vetoing proposed legislation affecting the safety or tranquillity of British India. The Indian Budget is submitted to both Chambers, and is voted on by the Legislative Assembly except in regard to certain specified heads, but the Governor-General in Council can act, notwithstanding a refusal or reduction of grants, where essential to the discharge of his responsibilities, and he may authorise expenditure necessary for the safety and tranquillity of British India or any part thereof. Differences of opinion between the two Chambers may be referred for decision by the Governor-General to a joint meeting of members of both Chambers appointed for the purpose. Although the Government does not command a majority in the Indian Legislature, it is necessarily given the power to reject adverse votes, since its responsibility is not to the Indian Legislature, but to Parliament.

The seat of the Supreme Government is at Delhi the summer headquarters being still at Simla.

Business is conducted by 9 Departments—Finance; Foreign and Political; Home; Legislative; Commerce; Industries and Labour; Education, Health and Lands; Army; and Railway. Each Department is in the charge of a Secretary to Government (the Foreign and Political Department has both a Foreign and a Political Secretary), and is under the care of a member of the Viceroy's Executive Council, who has authority to deal with affairs of minor importance, and to select what is worthy of the consideration of the Governor-General and his Council. The Governor-General himself superintends the Foreign and Political Department. The *Finance Department* deals with public accounts, loans, taxation, opium, currency, banking, mints, &c. The *Foreign and Political Department* conducts relations with external politics, relations with Foreign States, frontier tribes, relations with Indian States and Feudatories within the limits of India, and, through its Political Residents and Agents in the various Indian States, supervises their administration and regulates their relations with the paramount Power. The Political Residents in the Persian Gulf and Muscat look after the commercial and political interests of India in those quarters. The *Home Department* deals with the internal politics, civil service, judicial affairs, prisons, police, &c. The Legal Member of Council takes charge of Government Bills in connexion with the *Legislative Department*. The department of *Commerce* deals with trade and shipping, ports, &c. The department of *Industries and Labour* deals with industries, stores, labour, public works, post-office, telegraphs, civil aviation, communications, irrigation, factories, &c. The Army is under the *Army Department*, of which the Commander-in-Chief has charge in Council. The *Education, Health and Lands Department* has the control of education, local government, sanitation, land revenue and surveys, agriculture, famine, meteorology, forests, foodstuffs, &c. Railway administration is entrusted to a *Railway Department*, which is in the charge of the Commerce Member of Council.

British India is divided into 15 *Local Governments and Administrations*, viz.:—Under Governors, Madras, Bombay, and Bengal, still termed Presidencies, the United Provinces, the Punjab, Bihar and Orissa, the Central Provinces, Assam, and Burma; under Chief Commissioners, who are under the immediate authority of the Governor-General in Council, the North-West Frontier Province, British Baluchistan, Delhi, Ajmer-Merwara, Coorg, and the Andaman and Nicobar Islands.

The Governors of Madras, Bombay and Bengal are permitted to communicate direct with the Secretary of State.

The unit of administration throughout British India is the District, the executive head of which is the District Officer, called Collector-Magistrate or Deputy-Commissioner, as the case may be. In subordination to a Commissioner, who corresponds direct with the Provincial Government,

he has control in every department of administration, and is the responsible head of his jurisdiction. There are 273 Districts in British India.

There are separate *High Courts* for both civil and criminal cases in Madras, Bombay, Bengal, Bihar and Orissa, and in the United Provinces of Agra and Oudh, the Punjab and Burma, and a Chief Court in Oudh. Appeals may be carried to the English Privy Council. The Central Provinces, Berar, Coorg, Sind, and the North-West Frontier Province have each a *Judicial Commissioner's Court.*

CONSTITUTION OF THE TWO CHAMBERS OF THE INDIAN LEGISLATURE.

COUNCIL OF STATE.

President, Sir Henry Moncrieff Smith, C.I.E.

LEGISLATIVE ASSEMBLY.

President, Sir Ibrahim Rahimtulla, K.C.S.I., C.I.E.

The *Council of State* consists of 60 members, 34 elected and 26 nominated. Of the latter not more than 20 may be officials. The total electorate in the 1930 election was 40,513.

The *Legislative Assembly* consists of 145 members, 104 elected and 41 nominated, 26 of the latter being officials. The total electorate in the 1930 election was 1,212,172.

THE SUPREME GOVERNMENT, DELHI.

[Indian salaries are the substantive salaries (excluding allowances) stated in rupees *per mensem.*]

Viceroy and Governor-General, His Excellency the Right Hon. Earl of Willingdon, G.M.S.I., G.M.I.E., G.C.M.G., G.B.E. (assumed charge April 18, 1931) .....*per mensem* Rs.20,900

Private Secretary, E. C. Mieville, C.M.G. Rs.2,750

Military Secretary, Lt.-Col. H. L. Ismay, C.I.E., D.S.O.

Comptroller of the Household, Major A. L. B. Anderson, 15th Lancers, allnce. (Rs.500–700) + r. pay.

Aides-de-Camp, Capt. C. R. Bugden, 3rd Cavalry; Flight-Lt. V. Bruce Bennett, Royal Air Force; Capt. J. Brittain Jones, Black Watch; Capt. R. J. Streatfield, Royal Artillery; Capt. M. G. D. Clive, Grenadier Guards; *Indian Aides-de-Camp*, Subadar-Major (Hony. Captain) Bhikham Singh, Bahadur, M.C., I.D.S.M., 4/12th Frontier Force Regiment; Risaldar-Major (Hon. Lieut.), Mehtab Singh, Governor-General's Body Guard.

Surgeon, Lt.-Col. H. H. Thorburn, C.I.E. Rs.2,100

Commandant, Governor-General's Bodyguard, Major E. G. Atkinson, 15th Lancers.

Adjutant, Governor-General's Bodyguard, Capt. H. L. Mostyn-Owen, 19th K.G.O. Lancers.

EXECUTIVE COUNCIL OF THE GOVERNOR-GENERAL.

Members, General Sir Philip Chetwode, Bt., G.C.B., K.C.M.G., D.S.O., A.D.C. Commander-in-Chief in India (1925) Rs.8,333

Sir James Crerar, K.C.S.I., C.I.E. (*Home*); Khan Bahadur Mian Sir Fazl-i-Husain, K.C.I.E. (*Education, Health, and Lands*); Sir George Rainy, K.C.S.I., K.C.I.E. Census Commissioner, Dr. J. H. Hutton, C.I.E.

PROVINCIAL GOVERNMENTS AND ADMINISTRATIONS.*

Under the Government of India Act, 1919, and rules made thereunder, the local governments are given a large measure of independence of the Supreme Government. The Act distinguishes the functions of local governments and local legislatures of the Provinces from the functions of the Governor-General in Council and the Indian Legislature. The Supreme Government is given authority over certain subjects, classified as "Central," such as defence, political relations, railways, tariffs, &c. Other administrative heads, classified as "Provincial"—viz., local self-government, public health, education, public works, water supply, land revenue administration, famine relief, agriculture, excise, administration of justice, &c., are wholly or partly handed over to *Provincial Governments with responsibility*, subject to certain limitations, within their own areas, for administering them. In the nine major or "Governors'" Provinces—i.e., Madras, Bengal, Bombay, the United Provinces, Bihar and Orissa, the Central Provinces, the Punjab, Assam and Burma—provincial subjects are further divided into "reserved" and "transferred subjects," the administration of, and responsibility for, which rests with the Governor and his Executive Council and with the Governor and Ministers respectively. Ministers are chosen from among the elected members of the Legislative Council by, and hold office during the pleasure of, the Governor. They are directly responsible to the Legislative Council for the administration of the "transferred" subjects, but can be overruled by the Governor if he considers their policy inconsistent with the discharge of his responsibilities.

The Act legislates for a transition from a bureaucratic to a self-government system and for the gradual transfer of more subjects to the Ministers. Matters of departmental or minor importance are dealt with, as a rule, by the Governor, his Council, and the Ministers sitting in conclave, but the decision on reserved subjects rests with the Governor in Council, and that on transferred subjects with the Ministers, subject to the Governor's intervention and control.

Legislative Councils have an elected *majority*, and normally a life of three years, but may be sooner dissolved by the Governor. The previous sanction of the Governor-General in Council is required to the introduction of certain classes of Provincial Bills. The Governor has powers of veto in regard to proposed legislation affecting the safety or tranquillity of his Province or any part of it, or of another Province, and can secure legislation essential to the discharge of his responsibilities for reserved subjects. Such Bills must be sent to the Governor-General for the signification of His Majesty's *pleasure, but in emergencies the Governor-General* may assent to them, subject to disallowance by His Majesty in Council. The

* The areas and populations of the separate provinces are for British territory only. The population figures are according to the Census of 1931.

* 27 seats reserved for Non-Brahmans. † 7 seats reserved for Mahrattas.
‡ Including 17 nominated as the result of elections in Berar.

Governor has powers of assenting to, of withholding assent to, or of returning for reconsideration, other Bills, but must in certain circumstances send them for consideration to the Governor-General, who may reserve them for His Majesty's pleasure.

Provincial Budgets are voted on by the Legislative Councils, but the Governor has power to act, in respect of a demand for reserved subjects, notwithstanding a refusal or a reduction of grants, if the demand is essential to the discharge of his responsibilities for the subject, and in cases of emergency he can authorise such expenditure as may be necessary for the safety or tranquillity of his Province. Certain heads of expenditure do not require an annual vote: a deadlock is thus avoided in case of irresponsible action by the Legislative Council in the matter of supply.

Of the members nominated to the Indian Legislature and Provincial Legislative Councils some represent certain communities and interests. Males over 21 (18 in the case of Burma) years of age possessing certain qualifications (residence within the constituency and the possession of certain property qualifications, the payment of land revenue, rent, local taxes, income-tax or municipal rates) are eligible for the franchise. Women are not qualified for registration, but the disqualification may be removed in certain circumstances in any Province, or in all. The franchise is low, and gives the vote to small cultivators and some wage earners. The electorate of the fourth general election comprises over 8,744,802 persons, of which nearly 398,000 are women.

(1) MADRAS (area, 142,260 sq. miles; pop. 46,748,644) was not only the oldest, but the most important of the three original Presidencies before Clive's conquest of Bengal, though it was small in extent until the annexation of the Carnatic in 1801. With a coast-line of 1,730 miles the province has no good natural harbour, but an artificial harbour has been constructed at Madras at great expense. The province is not naturally fertile, though irrigation systems in the river deltas have enormously increased the produce of the soil, and have yielded a large profit to the State. Rice, millet, and other food-grains, oilseeds, cotton, indigo, spices, tobacco, tea, &c., are cultivated. Manganese ore is mined and exported. Madras is served by the South Indian and by the Madras and Southern Mahratta Railways, the latter connecting it with Bengal on the north and Bombay on the west. About 89 per cent. of the people are Hindus. There are 1,770,328 native Christians, mainly Roman Catholics. Many natives of the Presidency emigrate to Burma and Ceylon, some only temporarily. The languages principally spoken are Tamil, Telugu and Malayalam. Madura (182,007) and Trichinopoly (141,640) famous for their Hindu temples, are the chief cities after the capital.

(2) BOMBAY.—The Island of BOMBAY was part of the dowry of the Infanta of Portugal (1662), and was made over by Charles II. to the East India Company in 1668. The greater part of the present territory was obtained by annexations from the Mahrattas, and by the lapse of the Satara State. Sind was conquered in 1843. The province (including *Sind*, but not *Aden* and *Perim*, which are also attached to it) contains 122,541 square miles (about equal in size to the British Isles), with a population of 22,209,168. Eastern Sind is desert. The administration of Sind (which occupies about two-fifths of the Presidency) is in some respects separate. About 76 per cent. of the people of the Presidency are Hindus, and 20 per cent. Muhammadans. The Parsis (89,543), who are very prominent in trade, are mainly found in Bombay. Marathi, Gujarati, Sindhi, Kanarese and Western Hindi, are the principal languages. Millet and other food-grains and oil seeds are cultivated. Cotton is largely produced for export and for manufacture in the constantly extending cotton-mills of Bombay and Ahmedabad. The chief railway systems are the Bombay, Baroda and Central India with the lines worked by it to the north, and the Great Indian Peninsula (with the

Indian Midland) eastwards; south-eastwards is the Madras and Southern Mahratta system; while Karachi (Sind) is the port for the extensive North-Western Railway system. Ahmedabad (310,000), Poona (163,100), Sholapur (135,632), Surat ( ), and Karachi (260,639), the capital and chief port of Sind, are the most important cities. For Aden and Perim, *see* p. 663.

(3) BENGAL (area of newly-constituted province, 76,843 sq. miles, with population of 50,122,550) was placed under a Lieutenant-Governor in 1854. The old Bengal Presidency included practically all Northern and Central India, but subsequently the province consisted of part of Bengal proper with Bihar, Orissa, and Chota-Nagpur. Fifteen districts of Eastern Bengal were detached in 1905 and combined with Assam, while one district from the Central Provinces was added to Bengal. This partition was revoked in 1911, and Bengal now includes five Bengali-speaking divisions. About 51 per cent. of the population are Muhammadans and 43 per cent. Hindus. The principal languages are Bengali and Western Hindi. For the most part the province is a great alluvial plain, very populous and productive. The chief products are rice, jute, oilseeds, sugar, tobacco, silk, tea, and coal. The East Indian Railway is the great artery of the Ganges Valley. The Eastern Bengal Railway, running north, and the Bengal-Nagpur, south, from Calcutta, are also important. Important cities are Dacca (138,518), now the second capital, and Howrah (222,488), a great jute-manufacturing centre adjoining Calcutta.

CHIEF CITY, Calcutta. Pop., including suburbs and Howrah, 1,419,321.

(4) The UNITED PROVINCES of AGRA and OUDH, called "North-Western Provinces and Oudh" until 1902 (area, 106,295 sq. miles; pop. 48,408,763), forms the upper part of the great Ganges plain to the W. of Bengal, lying between

the Himalayas and the hilly border of the central plateau. Originally (excluding Oudh) it formed part of the Bengal Presidency, but in 1835 a separate administration was formed under a Lieutenant-Governor. OUDH was annexed in 1856 and placed under a Chief Commissioner. After 1877 the two administrations were combined. The chief products are wheat, rice, barley, pulse, tobacco, millet, cotton, sugar, and oilseeds. About 85 per cent. of the population are Hindus and 14 per cent. Muhammadans. Western Hindi is the chief language. The province is served by the East Indian, Oudh and Rohilkhand, and Rohilkhand and Kumaon Railways. Among the important cities may be named the ancient city of Agra (229,764), containing the Taj Mahal and other great works of architecture, the sacred Hindu city of Benares (205,315), the great manufacturing centre, Cawnpore (243,775), Lucknow (274,659), Bareilly (144,031), and Allahabad (183,914).

CHIEF CITY (Agra), Allahabad. Pop. 183,914.
,, (Oudh), Lucknow. Pop. 274,659.

(5) The PUNJAB (area, 99,842 sq. miles; pop. 23,580,851) occupies the N.W. angle of the great northern plain of India, and derives its name from the "Five Rivers" which, descending from the Himalayas, traverse the plain and unite in the Indus. It was annexed in 1849. Up to 1853 it was under a Board of Administration, who were then superseded by a Chief Commissioner, who was made Lieutenant-Governor in 1859, when also the Delhi Division was transferred to the Punjab from the North-West Provinces. The Punjab is mainly agricultural, and, owing to the scanty rainfall, depends largely for its harvests on vast irrigation canals, which are still being greatly extended, and are highly remunerative. The principal crops are wheat, millet, barley, maize, pulse, oilseeds, sugar, and cotton. The Punjab possesses rich deposits of rock-salt, which, with wheat and other grains and cotton, form the principal exports. Timber is scarce. 57% of the population are Muhammadans, and 27% are Hindus. The Sikhs number about 4,072,000 in the Punjab and Punjab States, to which they are mainly confined. Punjabi, Western Punjabi and Western Hindi are the chief languages. The various branches of the North-Western and Southern Punjab Railways serve the province. Amritsar, the sacred city of the Sikhs, has 264,840 people.

CHIEF CITY, Lahore. Population, 429,747.

(6) BURMA is bounded by Tibet on the north, by China, French Indo-China, and Siam on the east, and by Assam, Bengal and the sea on the west. It is the largest province, having a total area of 233,707 sq. miles, about equal to Spain and Portugal, with a population of 14,665,818. These figures include the Shan States and Chin Hills. Many immigrants come from Bengal, Madras, and China. Tenasserim and Arakan were annexed after the first Burmese war in 1826, Pegu after the second war in 1852, and Upper Burma and the Shan States after the third war in 1885. The Shan States form a minor administration distinct from that of Burma though under the same Executive Government and not subject to the jurisdiction of the Burma Legislature. The province is thinly peopled; but, owing to remarkable prosperity, the population has increased 11 per cent. in 10 years. The inhabitants belong to numerous tribes, who are distinguished by a variety of manners, languages, and religions. Burmese and Shangale are the chief languages. Buddhism, now almost confined to Burma, so far as the Indian Empire is concerned, is the religion of 85 per cent. of the people. The Burmese are much better educated than the natives of India proper, education being conducted by Buddhist monks. The delta country of Lower Burma is flat, but above Prome there is upland, hilly country. Rice, the main product of the delta region, is largely milled at Rangoon and exported. The principal export after rice is teak, which comes from the extensive forests of Burma and the Shan States, and overland from Siam. Burma is fairly rich in minerals, especially petroleum, rubies, jadestone, and wolfram. The Irrawaddy and its chief tributaries, the Chindwin, the Shweli, and the Myitnge, form important waterways. The main stream is navigable beyond Bhamo, 900 miles from its mouth, and carries much traffic. There are considerable exports by land to Western China. The Burma Railways have reached Myitkyina, on the Upper Irrawaddy, while a branch has been built to the Shan States, which lie in the Salwin basin.

CHIEF CITY, LOWER BURMA, Rangoon.

(7) BIHAR AND ORISSA (area of new province, 83,181 sq. miles, with pop. of 37,590,356). This province, which came into existence on April 1, 1912, comprises Bihar, Orissa and Chota-Nagpur, hitherto forming part of Bengal, as well as the Sambalpur district transferred to Bengal from the Central Provinces in 1905. Bihar is liable to extreme temperatures. The population is exceedingly dense. Orissa and Chota-Nagpur are ill-watered and liable to drought. Orissa has a variety of races and a considerable seaboard. The highlands of Chota-Nagpur are thinly peopled and contain a large aboriginal population. The Patna High Court came into existence on March 1, 1916. Bihar and Orissa yields the greater part of India's output of coal and mica. Rice, wheat, oilseeds, sugar and tobacco are cultivated. 82% of the people are Hindus, and the great Hindu temple of Juggernaut is at Puri, in Orissa. There is a variety of languages, Western Hindi and Oriya being the chief. The railway systems are the East Indian, Bengal and North-Western, and Bengal-Nagpur.

(8) The CENTRAL PROVINCES and BERAR (area, Central Provinces alone, 82,109 sq. miles; pop. 15,472,628). The Central Provinces were formed in 1861 out of territory taken from the North-West Provinces and Madras, but originally belonging to the Mahratta Kingdom of Nagpur. The country, hilly and forest-clad, contains a large population of aboriginal tribes. The people are mostly Hindus, and they speak mainly Western Hindi and Marathi. The province, which is served by the Indian Midland, Great Indian Peninsula, and the Bengal-Nagpur Railways, possesses coal and manganese ore, and produces rice, wheat, millet, pulse, oilseeds and cotton. There are cotton mills at Nagpur.

Since October 1, 1902, BERAR has been amalgamated with the Central Provinces. Berar (area, 17,767 sq. miles; pop. 3,443,765), which lies to the north of Hyderabad, was placed in British hands by the Nizam in 1853, in payment of arrears, and its revenues were charged with the future cost of the Hyderabad Contingent (which was in 1903 incorporated in the Indian Army). In 1902 Berar was leased in perpetuity to the Government of India on payment of £167,000 a year to the Nizam. Berar is purely agricultural. It is very fertile, and yields cotton, millet, oilseeds, &c. The chief language is Marathi, and most of the people are Hindus.

CHIEF CITY, Nagpur. Population, 215,003.

(9) ASSAM (area, 53,015 sq. miles; pop. 8,622,251) was constituted a separate administration in 1874 out of certain Bengal districts, most of which had been ceded by Burma in 1825. It was combined in 1905 with part of Bengal to form a new province, Eastern Bengal and Assam, but again became a separate administration in 1912. A range of mountains divides Assam into the Surma and Brahmaputra valleys, of which the chief towns are Sylhet and Gauhati respectively. The people are mainly Hindus and Muhammadans, and the chief languages are Bengali and Assamese. The Assam-Bengal railway serves the province. Tea and rice are the principal products. Assam contains nearly 900,000 immigrants from other parts of India, chiefly coolies for tea-gardens. Seat of Government, Shillong.

Governor, H.E. Sir Egbert L. L. Hammond, K.C.S.I., C.B.E. (June 1927) .....Rs. 5,500

(10) The NORTH-WEST FRONTIER PROVINCE was constituted in 1901 by the transfer from the Punjab of portions of the districts of Hazara, Peshawar, Kohat, Bannu and Dera Ismail Khan (area, 13,419 sq. miles; pop. 2,425,076, partly estimated). Attached to the Province are the five trans-border political agencies of Malakand, Khyber, Kurram, Tochi and Wano, together with tribal areas under the control of the Deputy Commissioners of the five settled districts first above mentioned. The officer in charge is directly responsible to the Government of India. The people are chiefly Muhammadans, and the chief languages are Pashto and Western Punjabi. The province produces wheat, barley and other grains, oilseeds, cotton, &c. It has a considerable trade with Afghanistan.

CHIEF CITY, Peshawar. Population, 104,452.
Chief Commr., Lt.-Col. R. E. H. Griffith, C.I.E., (Oct. 1931) Rs.5,500
Secretary to Chief Commr., C. H. Gidney Rs.2,050

(11) AJMER-MERWARA (area, 2,711 sq. miles; pop. 560,292), ceded in 1818, lies within Rajputana. The Governor-General's Agent in Rajputana is *ex officio* Chief Commissioner of Ajmer-Merwara and the chief executive and judicial authority. 78 % of the people are Hindus. Rajasthani and Western Hindi are the chief languages.

CHIEF CITY, Ajmer. Population, 119,524.
Chief Commissioner, Sir L. W. Reynolds, K.C.I.E., C.S.I., M.C. .....Rs. 4,000

(12) COORG (area, 1,582 sq. miles; pop. 163,089), annexed in 1834. The Resident at Mysore is *ex officio* Chief Commissioner and the chief executive and judicial authority.
Chief Com., Lt.-Col. R. J. C. Burke Rs.4,000

(13) BRITISH BALUCHISTAN (area, 54,228 sq. miles; pop. 463,508) was constituted a separate administration in 1888, under the Governor-General's Agent in Baluchistan, who also controls the affairs of the native States of Baluchistan up to the Persian frontier. The districts it comprises (Sibi, Quetta, Pishin, Thal-Chotiali, Nushki, Zhob, Chagai, Nasirabad and the Bolan) were acquired partly from Afghanistan by the treaty of Gundamuk (1879), partly from the Khan of Kalat by arrangement. Baluchistan consists largely of mountains and sandy deserts, and is sparsely populated. A large part of the people lead a pastoral, nomad life. In religion they are Sunni Muhammadans, and Pashto is the chief language. The Afghan-Baluch frontier was demarcated in 1896–7. To Chaman, on this frontier, a railway runs *viâ* Quetta and is continued to Mirjawa. The Khan of Kalat, the head of a loose confederacy, receives about £19,000 per annum for quit-rents, subsidy, &c. British troops occupy Quetta, commanding the Bolan Pass, and have the treaty right to occupy any other position.
Chief Commissioner in Baluchistan, A. N. L. Cater, C.I.E. .....Rs. 4,000
Secretary to the Chief Commissioner, Capt. R. R. Burnett, O.B.E. .....Rs. 850
Rev. and Judl. Commr., Lt.-Col. J. A. Brett, C.I.E. .....Rs 2,250
Sec., P. Wks. Dept., Brigadier W. H. Evans, C.S.I., C.I.E., D.S.O. .....Rs.

(14) DELHI.—This province (area, 593 sq. miles; pop. 636,246) was constituted on October 1, 1912, out of the Punjab division of Delhi, in pursuance of the policy announced by H.M. the King-Emperor at the Delhi Durbar in December, 1911, to move the capital of India and its seat of Government from Calcutta to Delhi.
Chief Commissioner, Sir John Thompson, K.C.I.E., C.S.I. .....Rs. 3,000

(15) The ANDAMANS and NICOBARS (area, 3,143 sq. miles; pop. 29,463) form a chain of islands in the eastern part of the Bay of Bengal. Since 1858 Port Blair, in South Andaman, has been used as an Indian penal settlement. Much valuable timber, worked by convict labour, is obtained. The *Nicobar Islands*, almost due south of the Andamans, were first occupied by the British in 1869. They comprise 19 islands. The principal products are coco-nuts.
Chief Commissioner, Lt.-Col. M. L. Ferrar, C.S.I., C.I.E., O.B.E. .....Rs. 3,000

The *Laccadive Islands* comprise 14 islands (nine inhabited), distant 200 miles from the Malabar coast of the Madras Presidency, in which they are included. (Pop. 10,600 in 1911.)

Aden and Perim.—From old time the peninsula of Aden, situated on the southern coast of Arabia and lying on the Red Sea trade-route between Europe and the East, has been an important trade centre. Its trade decayed after the Portuguese discovery of the Cape route, but with the opening of the Suez Canal it regained more than its old importance. It was occupied by the British in 1839. It is now a great coaling-station and port of call, and an emporium for the trade of the adjacent African and Arabian coasts. It is the only fortified point between Egypt and Bombay, and may be regarded as an outpost of the Indian Empire. Aden and Perim—a small unfortified island serving as a coaling-station at the southern entrance to the Red Sea, occupied in 1857—form part of the Bombay Presidency, and have an area of 80 square miles and a population of 50,809. Aden is a free port The chief industries are salt and cigarette manufacture. The traffic in arms and ammunition is subject to special regulations. The total seaborne trade in 1929–30 was £10,173,000. In 1529–30, 1,712 vessels called at Aden, and 556 at Perim. The British Government has treaty engagements with, and subsidises, the neighbouring Arab tribes, both inland and along the coast (Hadramaut), from the Straits of Bab-el-Mandeb to Muscat territory at Ras Sair.
Aden: Political Resident, Lt.-Col. B. R. Reilly, C.I.E., O.B.E. (*acting*).....*per mensem* Rs. 3,500

The *Kuria Muria* Islands, to the S. of Omân, have been in British possession since 1854. In 1834 the East India Company occupied *Sokotra* (area, 1,400 sq. miles), 150 miles from Cape Guardafui, which has a pastoral Muhammadan population roughly estimated at 5,000, mainly Arabs. A formal protectorate was established in 1886. The Sheikh receives a small subsidy, and is pledged not to cede the island to any foreign Power.

INDIAN APPOINTMENTS.

THE higher civil administration of British India is recruited from four sources—1. Open competitive examination in England and India. 2. The Indian Army. 3. The patronage of the Secretary of State. 4. The patronage of the Local Governments.

The Civil Service of India.—The annual examination ordinarily commences in London July–August. Candidates must be over 21 and under 24 on Aug. 1 in the year of examination. Application for permission to compete must be made on or before June 1, on forms that can be obtained from the Secretary, Civil Service Commission, London, W. 1. Examination fee, £8. Selected candidates are on probation in England for one or two years, and receive an allowance of £300 if of European domicile, or £350 if of Indian domicile, if they pass their probation at one of the Universities or Colleges approved by the Secretary of State, conduct themselves well, and comply with all the rules laid down for

their guidance. A final examination is held in Indian law, language, &c. A first-class passage to India will be engaged for selected candidates. In case of failure to pass the final examination, or to execute the usual covenant and to proceed to India, all allowances received must be refunded. The salary of a covenanted civil servant commences usually at Rs. 7,200 a year. The Regulations for competitive examinations to be held in India can be obtained from the India Office, London.

The Indian Army.—Copies of a pamphlet giving full information regarding conditions of service may be obtained, on application, from the Military Department of the India Office. The following is a summary of the principal points. Candidates for commissions in the Indian Army are required to pass the Army Entrance Examination held by the Civil Service Commissioners. Candidates must be between 18 and 19 years of age (in the case of Indian candidates the age limits are 18 and 20 years). Of the cadetships for the Indian Army offered, some are allotted to King's India Cadets nominated by the Secretary of State for India; the remainder being offered to candidates in the order of their passing the entrance examination. A few direct appointments to the Unattached List for the Indian Army are made by the War Office from candidates nominated by the principal Universities in the United Kingdom. A few direct appointments are also offered to officers of the Territorial Army and Supplementary Reserve between the ages of 21 and 25 who undertake the final examination of the Royal Military College, Sandhurst, under arrangements made by the War Office. At the end of the period of training at Sandhurst, cadets recommended for commissions are gazetted to the Unattached List for the Indian Army. On appointment to an Indian regiment, an officer's initial pay is at the present moment Rs. 480 (£36) per month. Regulations and examination papers can be obtained from His Majesty's Stationery Office, Imperial House, Kingsway, W.C.

Indian Police Force (Higher Grade).—A competitive examination is usually held in London and other centres in June of each year in conjunction with the Army and Air Force Examination. A fee of £4 is required from candidates examined in London, and a fee of £5 from those examined in other centres. Save as provided in the regulations a candidate must be a European British subject. Indian and Burmese candidates are eligible if they have been resident in the United Kingdom for not less than five years. Candidates must be above 19 and under 21 years of age on Aug. 1; must be unmarried, and if they marry before reaching India must forfeit their appointments. Applications to compete at the examination must be made on forms to be obtained from the India Office, Whitehall, London. Successful candidates are required to undergo a strict medical examination; are examined as to their ability to ride. Free passage to India is granted to probationers. Their initial pay is Rs. 350 per month, plus an overseas pay of Rs. 100 per month in the case of probationers with non-Indian domicile. The pay proceeds by annual increments to Rs. 700, plus overseas pay of £30 a month, and thence to Rs. 1,350 per month, with overseas pay of the same amount, subject to efficiency bars, with prospects of promotion to higher posts.

The patronage of the *Secretary of State for India* is not extensive. Appointments of *Chaplains* of the Church of England and the Church of Scotland to the Indian Ecclesiastical establishments are normally made, on the occurrence of vacancies, by the Secretary of State for India from amongst candidates nominated by the Indian Chaplaincies Board of the Church of England and the General Assembly's Committee on Indian Churches respectively. Church of England candidates must be between 27 and 34 years of age, and Church of Scotland candidates must be under 34 years of age. On appointment chaplains receive a salary of Rs. 600 per month, rising by annual increments to Rs. 1,050 per month, plus overseas pay of £30 a month.

Indian Railway Service of Engineers.—The Secretary of State in Council from time to time makes a number of appointments of Asst. Executive Engineers on Indian State Railways. In making these appointments he acts with the advice of a Selection Committee. Application forms can be obtained from the Secretary, Services and General Dept., India Office, Whitehall, London. Every candidate must have attained the age of 21, and not attained the age of 25 on Jan. 1 of the year in which the examination is held. Candidates must produce evidence that they have obtained one of the University degrees or passed one of the examinations specified in the Regulations, and must have had at least one full year's practical experience of civil engineering. Those whose qualifying diploma has been obtained without a college course must have had a full three years of such practical experience. Every European candidate must be a British subject of non-Asiatic domicile. All selected candidates are on probation in the first instance on an initial pay (including overseas pay) of Rs. 525 a month and are required to execute agreements for three years, at the end of which period, if they have given satisfaction, their services are retained. The pay rises by increments to Rs. 1,025 in the 9th year and to Rs. 1,675 in the 24th year of service, with possibilities of promotion to higher posts. From time to time a number of appointments of Asst. Executive Engineers in the Public Works Dept. in India are made under regulations, which are generally the same as for the Indian State Railways.

Indian Forest Service.—In making appointments, the Secretary of State for India in Council acts with the advice of a Selection Committee. Applications for appointment must be made on a printed form to be obtained from the India Office, Whitehall, London, S.W. 1. The normal age limits are over 20 and under 24 on the 1st May of the year of candidature. Candidates must be British subjects and must not marry before reaching India. Any breach of this condition will entail forfeiture of appointment. Vacancies are few in number, and do not occur every year.

Further information regarding these and other Indian appointments can be obtained on application, from the Services and General Department, India Office, Whitehall, London, S.W. 1. Pay, Leave, and Pension Regulations of the Indian Services are contained in the Civil Service Regulations and other Statutory Rules, which can be consulted at the India Office.

THE FINANCES OF INDIA (CENTRAL GOVERNMENT AND PROVINCIAL GOVERNMENTS) FOR THE YEAR ENDED MARCH 31, 1930.

(In lakhs of rupees.)*

Separation of Central and Provincial Finances.

The Government of India Act, 1919, was designed *inter alia* to secure a greater measure of independence for Provincial Governments, and to this end provision was made, in the Act and in Rules subsequently published under authority of the Act, for the delimitation of the functions of Government as between the Government of India and the chief Provincial Governments, and for the definite assignments to each of these Provincial Governments of specific revenues of their own. Effect has been given to these measures of devolution in the nine "Governor's Provinces," viz.: Bengal, Madras, Bombay, the United Provinces, the Punjab, Bihar and Orissa, the Central Provinces, Assam and Burma and in the Province of Coorg. As regards these provinces the functions of Government have been classified as either "central subjects" or "provincial subjects." A general authority to control all matters coming under the latter head, subject to certain expressed provisos, is devolved upon the Local Governments concerned.

The sources of revenue available to Local Governments for the purpose of defraying their administrative charges consist, in the main, of the receipts from those provincial subjects which are revenue-producing, the principal heads being Land Revenue, Irrigation, Stamp Duties and Excise. In addition, a local Government is given a small share in any expansion of Income Tax (otherwise a "central" source of revenue) that may be due to an increase of the total assessed incomes within the Province over that of 1920-21.

When the division of the sources of revenue was made between the Central and Provincial Governments, it was realized that the Central Government would be left insufficiently provided. It was therefore arranged that an annual contribution should be made by eight of the local Governments to the Central Government. The annual contributions fixed at the outset aggregated 983 lakhs of rupees. They were not, except in case of emergency and with the sanction of the Secretary of State, to be subject to increase, and should reduction of the aggregate be found possible, reductions were to be made in fixed proportions from the quotas of the several Provinces. The general policy pursued has involved a progressive reduction of the provincial contributions with a view to their ultimate cessation. The Budget for 1928-29 provided for the remission of those portions of the contributions which had not been permanently remitted at the close of the previous year.

The revised financial arrangements outlined above came into force from April 1, 1921, as from that date all "provincial" revenue and expenditure ceased to be included in the estimates and accounts of the Central Government. In the case of Coorg the separation was made on April 1, 1924.

* A lakh = Rs. 100,000. (*See* p. 666 for the Indian system of notation.)

INDIAN SYSTEM OF NOTATION.—The Indian numerical notation system differs from the European. Large numbers are punctuated as crores and lakhs and not in hundreds, thousands and millions. A *lakh* is one hundred thousand (written out as 1,00,000), and a *crore* is one hundred lakhs or ten millions (1,00,00,000). *Thus*, 1,68,00,000 is read as 1 crore 68 lakhs. A lakh of rupees (Rs. 1,00,000), may be read as equal to £7,500 at 13⅓ rupees—the statutory rate adopted for conversion in this article. The rupee is divided into 16 annas and at 13⅓ rupees to £1 the anna is equivalent to 1½*d.* The anna is subdivided into 12 pies (⅛*d.* approximate value).

Net Revenue and Expenditure of the Central Government.

The figures of Gross Revenue given above include the net receipts of railways and other commercial undertakings without any deduction on account of interest charges, the total receipts from the sale of opium, and the receipts of certain spending departments; while the figures of *Gross Expenditure include the interest* charges of commercial undertakings, and the cost of cultivation and manufacture of opium. This method of compiling the figures causes the revenue available for administrative purposes and the expenditure on such purposes to appear greater than they really are. A statement of the net revenue and expenditure of the Central Government for 1929–30 is therefore given in the table below, which shows the *net* revenue derived from commercial undertakings, after deducting all expenditure including interest charges, similar adjustments being made under other heads of revenue and expenditure by deducting (1) the *cost of cultivation and manufacture of opium* from sale receipts, and (2) the receipts of the spending departments from the gross expenditure incurred by them. The cost of the establishments maintained for the collection of revenue is not shown as a deduction from revenue, but as a separate head of expenditure.

Burden of Taxation.—If taxation proper be divided among the population of British India, without allowing for certain portions of Salt, Excise, and Customs duties which fall on persons in the Indian States, the burden is estimated at Rs. 4·1 per head, or, if land revenue* (which is akin to rent) be added, Rs. 5·4 per head.

Debt and Assets.—On March 31, 1931, the public debt of the Central Government amounted to Rs.468·5 crores (£351·4 million) in India and £387·9 million in England. The figures include debt incurred on behalf of *Provincial Governments*, the debenture stock of

various railways taken over on the transfer of the lines, and the capital value of liabilities undergoing redemption by way of terminable annuities. The interest-bearing obligations and certain interest-bearing assets of the Government of India amounted to Rs.643 crores (£483 million) in India and £387·8 million in England. The excess of interest-bearing obligations over interest-yielding assets amounts to Rs. 194 crores (£145 million). Apart from Rs. 29·06 crores in cash, bullion and securities held on Treasury Account, the Central Government held on March 31, 1930, £40 million in the Gold Standard Reserve.

LAND REVENUE.—This is the oldest and the most important source of revenue. The State is the paramount landlord in India, and the land revenue is the State's share in the rent of the soil. In most of Bengal and Bihar and Orissa, about one-fourth of Madras, and part of Assam the land revenue has been permanently fixed; elsewhere generally the assessments, or settlements, are revised periodically (usually once in 20 or 30 years). The nature of the settlements varies in different provinces. In parts of Bengal and Bombay, the greater part of the United Provinces, the Punjab, the N.W. Frontier Province, and the Central Provinces the settlement is with large proprietors or proprietary village communities (*zamindari*), and the estate is assessed as a whole. Elsewhere (especially in Burma, Berar, Bombay and Sind, Assam, and most of Madras) the *raiyatwari* tenure prevails, and each raiyat, or peasant proprietor, holds direct from the State. In temporarily settled zamindari districts the land revenue usually amounts to about 50 per cent. of the rental paid to the landlord by the cultivating tenant, while in temporarily settled raiyatwari districts the revenue varies from 20 per cent. of the gross produce down to much smaller proportions, averaging about 8 per cent. Private improvements are exempt from assessment. The gross land revenue paid to the State (Central and Provincial Governments) in 1929–30 amounted to Rs. 3,347 lakhs (£25,103,000).

THE OPIUM REVENUE.—Poppy may now be grown only in parts of the United Provinces and in the Central Indian (Malwa) States. Except in these States the manufacture is a Government monopoly. Bengal opium is either sold direct to the Governments of Borneo, Netherlands Indies, Hong Kong, Straits Settlements, &c. or issued to the Excise Department for local consumption. In addition a substantial quantity is supplied to the Medical Department for medical purposes, and by export to the United Kingdom for sale to chemists. The gross revenue from Bengal opium, including the value of opium sold by the Excise Department for consumption in India, was £2,281,000 in 1929–30. The expenses of production, &c., were £366,100. Formerly, most of the opium exported from India was consumed in China; but the Government of India, in furtherance of the efforts of the Chinese Government to suppress the growth and consumption of opium in China, decided in 1907 to reduce progressively the amount of Indian opium exported to China, and as from March 31, 1917, export of Indian opium to China is prohibited. In 1926 the Government of India announced its intention to restrict the export of opium except for medicinal purposes.

EXCISE.—Licence fees and duties are levied on the manufacture and sale of intoxicating liquors, opium, and other drugs. The revenue amounted to Rs. 2,041 lakhs (£15,309,000) gross in 1929–30 (Central and Provincial Governments).

CUSTOMS.—The net receipts amounted Rs. 5,128 lakhs (£38,458,000) in 1929–30. (For tariff *see* p. 671.) The export duty on rice yielded 117 lakhs (£877,000). The export duty on jute produced 464 lakhs (£3,478,000). The duty on motor spirit and kerosene amounted to 374 lakhs (£2,808,000). The protective special duties on iron, steel, &c., yielded 310 lakhs (£2,326,000).

INCOME TAX is levied on non-agricultural incomes at the following rates:—

Annual Income.	*Rate of Tax per Rupee.**
Rs. 2,000 and over	9 pies
,, 5,000 ,,	11 ,,
,, 10,000 ,,	14 ,,
,, 15,000 ,,	16 ,,
,, 20,000 ,,	19 ,,
,, 30,000 ,,	23 ,,
,, 40,000 ,,	25 ,,
,, 1,000,000 or upwards	26 ,,

In the case of companies and registered firms, whatever the total income, the rate is 26 pies in the rupee.

Super-tax is leviable in addition to ordinary income tax on incomes of Hindu undivided families at rates ranging from 1 anna 3 pies to 6 annas 3 pies in the rupee on incomes over Rs. 75,000, and on the taxable incomes of companies above Rs. 50,000 at a flat rate of 1 anna in the rupee. In the case of individuals, unregistered firms, and other associations of individuals not being a registered firm or a company, the rate ranges from 9 pies to 6 annas 3 pies on incomes in excess of Rs. 30,000. Rs. 1,706 lakhs (£12,798,000) were received from taxes on income in 1929–30.†

STAMPS.—Stamps yielded 1,412 lakhs gross (£10,593,000) in 1929–30. About two-thirds of the revenue is from court fees and one-third from commercial stamps.

SALT.—The salt duty was reduced from Rs. 2½ to Rs. 2 a maund (82 lb.) in 1903, to Rs. 1½ in 1905, and to R. 1 in 1907. It was increased to Rs. 1¼ on March 1, 1916, to Rs. 2½ from March 1, 1923, and reduced to Rs. 1¼ from March 1, 1924. Rs. 676 lakhs (£5,073,500) were received from salt in 1929–30.†

FORESTS.—About 107,000 square miles of forests are reserved and scientifically worked by the State, while about 123,000 square miles besides are under State control. The revenue from forests amounted to Rs. 613 lakhs (£4,594,000) in 1929–30. A third of the revenue comes from Burma.

POSTS AND TELEGRAPHS.—The Post Office in 1929-30 conveyed 1,392 million of letters, postcards, newspapers, &c., and issued over 40 million of money orders. Inland letter rates are the lowest in the world. The length of telegraph wire, including cable, in India on March 31, 1930, was 563,400 miles, and the number of paid messages sent in 1929–30 was 19½ million. The capital outlay amounted to Rs. 1,455 lakhs (£10,912,000) at the end of 1929–30. The Indian Postal and Telegraph services were amalgamated on April 1, 1914. The combined services showed for the year a loss of 62 lakhs (£468,300).†

* 12 pies = 1 anna; 16 annas = 1 rupee; 13⅓ rupees = £1 (statutory rate).

† See p. 653 as to the proposed increase of duties and charges.

RAILWAYS.—Nearly all the railways in India are owned by the State and administered by a Railway Board, though many are leased to and worked by companies. The mileage *open for traffic on March 31, 1930*, was 41,724 Of the mileage open about 50 per cent. was on the standard gauge (5½ ft.), and about 42 per cent on the metre gauge. On March 31, 1930, the total capital at charge was Rs. 857 crores (£642,560,000). The net earnings of the railways in 1929-30 amounted to 4,059 lakhs (£30,446,000), showing a percentage of 4·7 on total capital at charge. The number of passengers "originating" was 634 million, and the goods traffic amounted to 87·4 million tons. Rates are very low, third-class passengers travelling on the average about four miles for a penny. The net gain to the Central Government from "Budget Lines" administered from funds under its direct control was 4·0 crores in 1929-30. To meet the contribution (6·1 crores) payable to general revenues, 2·08 crores were withdrawn from the Reserve Fund. The total capital expenditure on State and other railways in 1929-30 was 3,222 lakhs (£24,171,000).

IRRIGATION.—The total capital outlay on State irrigation works up to March 31, 1930, was £97,701,000, which, apart from the advantages to cultivators and protection against famine, yielded a profit to the State, after payment of interest charges, of about £1,852,000. The area irrigated by Government irrigation works, excluding the Indian States, in 1928-29 amounted to 30·7 million acres, while the annual value of the crops raised amounted to over 1⅕ times the total capital expended on the works. Two-fifths of the irrigation revenue comes from the Punjab.

HOME CHARGES.—The net expenditure in England, chargeable to Revenue, amounted in 1929-30 to £25,167,000. The main items were:—Interest on Railway Debt and Annuities, £8,962,000; Interest on Ordinary Debt, £4,862,000; Interest assumed in respect of British 5 per cent. War Loan, £836,000; Stores, £2,646,000, of which £2,469,000 was for Marine and Military Stores; payments for British forces, troop service, &c., £2,605,000; Army non-effective charges, £3,597,000; Civil annuities, pensions, &c., £1,447,000; Furlough payments, civil and military, £2,278,000; home administration (£412,500 less £111,500 contributed by H.M. Treasury); £204,640 in connection with new offices; Aden contribution, £241,000. The expenditure of the Indian Government in England is met by bills or telegraphic transfers drawn on India by the Secretary of State, and sold by him in London for sterling.

CURRENCY.—The principal coin in use is the silver rupee, containing 165 grains of fine silver and 15 grains of alloy, and weighing in all 180 grains troy. Up to 1893 the Indian Mints were open by law for the unrestricted coinage of silver into rupees. Owing, however, to the almost continuous fall in the value of the rupee from 1871 to 1893, legislation in the latter year closed the mints to the public, with a view to eventually fixing the exchange. For a time the rupee continued to fall, but subsequently it rose, and between 1898 and 1916, was practically stable at 1*s.* 4*d.* The Act of 1899 made the British sovereign legal tender in India at the ratio of 15 rupees to the sovereign, the rupee, however, remaining also legal tender to any amount, but the ratio was altered to 10 rupees in 1920. In 1907 it was decided that half the profit on silver coinage should be applied to capital expenditure on railways; the other half of the profit, and the whole of the interest, being added to the Gold Standard Reserve. In June, 1912, it was decided that no portion of the profit was to be used for railway purposes until the total sterling assets of the Gold Standard Reserve amounted to £25,000,000. From April 1, 1921, the interest on investments in the Gold Standard Reserve, when that Reserve reaches £40,000,000, is appropriated in reduction of the rupee securities created for the special purpose of the Currency Reserve. The total receipts from profit on coinage, interest and discount, and profit by exchange up to March 31, 1931, amounted to £59,071,876 Of this sum £1,123,655 has been used for capital expenditure on railways; £2,886,217 has been transferred to the Paper Currency Reserve in reduction of created rupee securities and £13,414,796 has been transferred to Revenue, £442,710 to the Revenue Equalisation Fund (of which £33,748 has since been transferred to Revenue), and the remainder credited to the Gold Standard Reserve. On March 31, 1931, the investments of this fund in sterling securities amounted to £31,559,000 (estimated value), while £1,085 was held in cash in England, and £2,152,000 deposited in gold at the Bank of England and £6,247,200 held in gold in India. India has a paper currency. The 1, 2½, 5, 10, 50, and 100 rupee notes are legal tender everywhere in India, but other notes only within their circles of issue. In 1918 a branch of the Royal Mint was established at Bombay for the minting of gold coins.

ARMY.—The sanctioned strength of the Army in India is: British troops and officers, 68,900; Indian troops and officers, 155,300; Army in India Reserve of Officers, 1,600; Indian Army Reserve, 40,000; Auxiliary Force, 36,000; Indian State Forces, 44,700; and Indian Territorial Force, 19,000. For police duties and frontier service the regular military is supplemented by frontier militia and local levies. During the period (1902-9) when Lord Kitchener was Commander-in-Chief, considerable changes were effected in the organisation and training of the Army. On June 1, 1907, there was a redistribution of the Army of India. The net military expenditure (including marine) has risen from about £20,000,000 in 1912-13 to about 5,510 lakhs (£41,325,000) in 1929-30. The estimated net expenditure for 1931-32 is 4,740 lakhs (£35,550,000). During the Great War of 1914-18 the Government of India recruited on a voluntary basis over 800,000 combatants and more than 400,000 non-combatants, giving a grand total of about 1·3 million men. 1,215,000 officers and men were sent on service overseas from India; the total Indian casualties were 101,000. In 1917 the bar hitherto precluding the admission of Indians to King's Commissions was removed; the pay and pensions of the Indian soldiery were improved. India has an Auxiliary Force on a volunteer basis. Ague is the chief cause of sickness among British troops, and enteric fever the chief cause of death.

The ROYAL INDIAN MARINE consists of 10 sea-going vessels, and numerous smaller steamers and launches.

Director R.I.M., Bombay, Rear-Admiral H. T. Walwyn, C.B., D.S.O., R.N. .....Rs. 2,800

In 1926 it was decided that the Royal Indian Marine shall be abolished, and that the vessels shall be transferred to the Royal Indian Navy, which will be constructed as a combatant force to enable India to enter upon the final stage of her development, and ultimately to undertake her own naval defence. The fleet will consist, in its first stage of development, of four sloops, two patrol-craft vessels, four trawlers and two survey ships, together with one depôt ship. Indians will be eligible for commissioned rank.

EDUCATION.—Elementary education is based, so far as possible, on an adaptation of indigenous institutions and traditions. Higher education is an imported product. It is popular, and has undoubtedly been attended with beneficial results. As is natural with an imported product, its development is marked by some crudities, and its influence has to some extent been unsettling. It has appealed to the natural intellectuality of the people, and has succeeded only partially in stimulating practical application. There are 15 Universities, viz., those of Calcutta, Madras, Bombay, Allahabad, Benares (Hindu), Patna, Dacca, Aligarh (Muhammadan), Lahore, Hyderabad, Mysore, Lucknow, Rangoon, Nagpur and Delhi. In State institutions education is secular. The institutions in 1928–29 numbered 258,000, and the scholars 12,166,000, including 1,386,000 females. Of the institutions, about 50 per cent. are maintained by the State or aided by grants, the rest being private and unaided. Of the total expenditure on education in 1928–29, (£20,305,000), £4,336,000 came from fees, and £12,842,000 from Government revenues or local and municipal funds. The census of 1921 showed that only 139 males and 21 females per thousand are literate, in the sense of being able to write a letter and read the reply thereto.

LOCAL SELF-GOVERNMENT, municipal and rural, in its present form, is a product of British rule. The municipalities at the end of 1928–29 numbered 776, with a total population of 19 million, and receiving an income of £9,220,200 from rates and taxes (octroi, taxes on houses and lands, water, lighting, and conservancy rates, &c.) and £15,612,800 from other sources. Out of 12,732 members of municipal bodies 870 were officials and 11,862 non-official. In almost all districts in British India there are local district boards, partly representative. Nearly 33 per cent. of their total expenditure of about £12,294,700 in 1928–29 was devoted to civil works, 36 per cent. to education, and the remainder largely to sanitation and hospitals.

JUSTICE, POLICE, AND PRISONS.—There are 8,342 officers and 19,108 honorary judges and magistrates exercising civil and criminal jurisdiction. Many of the superior and the great majority of the inferior officers are Indians. In 1928, 2,435,323 civil suits were instituted; 2,578,984 persons were tried, and 1,238,422 convicted, in criminal cases, of whom 796 were sentenced to death and 739 executed, 1,938 to transportation, and 180,496 to imprisonment. The strength of the police in 1928 was 14,814 officers and 183,371 men. There were 1,156 prisons, with a daily average of 138,014 prisoners. At the convict settlement of Port Blair (Andamans) there were 6,985 prisoners on March 31, 1929.

VITAL STATISTICS.—The reporting of vital occurrences is still defective. The recorded death rate for British India in the decennium ended 1913 ranged between 38·21 per 1,000 in 1908 and 28·72 in 1913; it was 35·9 per 1,000 in 1919 and 25·59 in 1928. There were over 12 million deaths from influenza during 1918–19. Fevers of various kinds are by far the commonest cause of death, cholera, dysentery and diarrhœa, smallpox, and (since 1896) plague being other chief causes. The reported deaths from plague up to the end of 1928 were about 12,152,000 in India as a whole. The ratio of births per 1,000 of the population was 36·79 in 1928. In 4,571 hospitals and dispensaries, maintained mostly from public funds, 50,119,000 patients were treated in 1928. The number of persons vaccinated in 1928-29 was

NOTE.—The figures of trade have been converted into sterling at the rate of Rs. 13⅓ to £. * Revised figures.

15,085,000. According to the census of 1921 there were 102,400 lepers.

SURVEYS.—The Survey Department superintends forest and cadastral surveys, as well as trigonometrical and topographical surveys, special explorations, and map production. Marine, geological, botanical and archæological surveys are in operation. The Meteorological Department is of great service in forecasting rainfall.

TRADE OF INDIA.—Among the countries constituting the British Empire India comes second to the United Kingdom itself in the volume of its sea-borne trade, which almost equals that of Canada and Australia combined. The ordinary course of Indian trade shows yearly a large net export of merchandise and a net import of treasure. The table (p. 670) exhibits the leading figures for the last five years in thousands of pounds sterling (Rupees being converted at the rate of 13⅓ to the £).

During the year 1930–31 as compared with 1929–30 the value of the imports (excluding Government stores and treasure) decreased by Rs. 7,597 lakhs (£56,979,000), or 32 per cent., while the total exports (including re-exports but excluding treasure and Government stores) fell by Rs. 9,233 lakhs (£69,249,800), or 29 per cent.

The principal commodities of export from India are, in the order named: Raw cotton and cotton goods; jute (including gunny bags and cloth); food-grains, especially rice and wheat; tea; and oilseeds. All these showed substantial decreases as compared with the previous year. The principal imports, again in the order named, are manufactured cotton goods; iron and steel; machinery and mill-work; sugar; mineral oils; motor vehicles. There was a marked falling off during the year under review in all of these and other commodities.

The bulk of the imports consists of manufactured articles, while two-thirds of the exports consist of food, tobacco, and raw materials.

The following statement shows the chief articles of the foreign trade of India in 1930–31 (converted at Rs. 13⅓ = £1):—

All other countries.....	6·3	9·5

(NOTE.—Rupee figures converted at rate of Rs. 13⅓ = £1.)

CUSTOMS DUTIES.—The general import tariff is 20 per cent. *ad valorem*. The principal exceptions are as follows:—Cotton twist, yarn and thread pay 5 per cent. or 1½ As. per lb., whichever is higher, yarns and textile fabrics 20 per cent., cotton piece goods 20 per cent. if of British manufacture, 25 per cent. if not; plain grey, i.e., not bleached or dyed in the piece, pay duty at the same rates or 3½ annas per lb. whichever is higher. Arms and certain "luxury" articles, including gold and silver manufactures, &c., and silk piece goods, pay 40 per cent., motor cars 30 per cent., sugar 25 per cent. plus Rs. 2. As. 12 per cwt., cigars 90 per cent., cigarettes Rs. 8 As. 8 per 1,000, spirits generally Rs. 30 a gallon, salt R. 1 As. 8½ a maund (82 lb.), gold and silver plate 40 per cent., kerosene As. 3, and motor spirit 8 As. per gallon, mineral oil 10 per cent. (an excise duty of As. 8 per gallon is levied on motor spirit and an excise duty of As. 2 p. 3 per

gallon on kerosene produced in India), coal As. 8 a ton. Some machinery and certain iron, steel and railway materials pay 12½ per cent.; artificial silk yarn, 10 per cent. A few other articles pay 2½ per cent. There are protective duties at special rates on coal tubs, and on iron and steel and certain manufactures thereof. The duty on manufactured tobacco is Rs. 3 per lb., matches Rs. 1 As. 8 per gross, splints for match-making 4½ As. per lb., veneer for making match boxes 6 As. per lb., beer 12 As. per gallon, perfumed spirits Rs. 48 a gallon. Gold metallic ores, living animals, raw hides, skins, raw cotton and wool, certain agricultural requisites, quinine, textile machinery, printing materials, and a few other articles are free. There are export duties of 2 As. 3 Pies a maund on rice, Rs. 4½ per bale of 400 lb. on raw jute other than cuttings, for which the rate is Rs. 1¼ per bale; Rs. 20 per ton on jute sacking, Rs. 32 per ton on hessians, and 5 per cent. *ad valorem* on raw hides and skins.*

SHIPPING.—In 1930–31 the number of vessels engaged in the foreign trade which entered and cleared with cargoes at ports in British India was 6,473, with a tonnage of 15,810,000. Of this tonnage, nearly 67 per cent. was under the British flag.

PORTS.—The chief ports are Bombay, Calcutta, Rangoon, Karachi, and Madras.

AGRICULTURE is by far the most important occupation of the people of India. In British territory in 1928–29, 262,328,200 acres were sown, or 228,167,000 acres excluding area sown more than once. Of the total area sown approximately 10 per cent. was under wheat, 31 per cent. under rice, and 36 per cent. under other food-grains and pulses, 7 per cent. under oilseeds, and 8 per cent. under cotton, jute, and other fibres. Sugar, tea, and tobacco are other important crops. The total area under irrigation was 49 million acres.

BANKS.—In addition to the Imperial Bank of India, which is closely associated with the Government, there are joint-stock banks, European and Indian, and many small native banks. In 1928 there were 28 Indian joint-stock banks, whose head offices are located in India, in addition to 18 exchange banks with head offices outside India, and 18 Indian co-operative banks, with capital and reserve of Rs. 5 lakhs and over. The capital of the Imperial Bank of India was Rs. 562 lakhs; reserve, Rs. 539 lakhs; deposits, Rs. 7,925 lakhs; and cash balance, Rs. 1,058 lakhs. The corresponding figures for the Indian joint-stock banks were: capital, Rs. 674 lakhs; reserve, Rs. 435 lakhs; deposits, Rs. 6,285 lakhs; cash balance, Rs. 819 lakhs. The 18 exchange banks with head offices not located in India had:—capital, £96 million; reserve, £92 million; deposits, £1,359 million outside India, and Rs. 7,113 lakhs in India; cash balances £237 million outside, and Rs. 806 lakhs in India. The 18 Indian co-operative banks had a capital of Rs. 117 lakhs; a reserve of Rs. 46 lakhs; deposits, Rs. 902 lakhs; loans outstanding, Rs. 682 lakhs; and cash balances amounting to Rs. 78 lakhs. The proportion per cent. of cash to liabilities on deposit was:—13% in the case of the Imperial Bank; 11% for exchange banks doing a considerable portion of their business in India; 11% for other exchange banks; and 13 to 15% in the case of Indian joint-stock banks.

CO-OPERATIVE CREDIT SOCIETIES.—In 1929–30 there were in British India and Indian States 1,880 central, 92,051 agricultural and 10,256 non-agricultural societies, with a total membership of 4,181,904 and a capital of £67,138,000. The Provincial and Central Banks showed a profit of £440,000, and agricultural and non-agricultural societies £1,369,000.

MINERALS.—The output of coal in India in 1928 was 22,543,000 tons. The production has much increased in recent years. Nine-tenths of the total comes from Bengal and Bihar and Orissa. The production of crude petroleum in India (chiefly Burma) has increased from 19 million gallons in 1897 to 306 million in 1928. The production of salt is about 1,515,000 tons. The production of manganese ore was about 978,500 tons, and of saltpetre 4,500 tons (export figures). The yield of gold (nearly all from Mysore) was about 376,100 oz. Monazite and tungsten ore have now taken an important place in the list of minerals of economic value produced in India. The output of the former in 1928 was 103 tons, and of the latter 622 tons.

MANUFACTURES.—In India the ancient village handicrafts still survive. Cotton-weaving is by far the most important hand industry. There were 7,863 factories in 1928 subject to the Indian Factories Act, employing 1,520,000 persons, including 253,000 women and 50,900 children (12 to 15 years of age); the percentage of factories maintaining a week of 48 hours or less for men is 27, the corresponding percentage for women was 31. The maximum weekly hours for children are 36. There were 292 cotton mills at work in British India and Indian States in 1928–29, mostly in Bombay and Ahmedabad. In 1928–29, the production was 648 million lb. of yarn (mostly of low counts) and 446 million lb. of woven goods. The 95 jute mills, mostly situated in or near Calcutta, contained 1,108,147 spindles and 52,409 looms. There were, in 1928, 17 woollen and 9 paper mills, 13 breweries, and various other factories.

JOINT STOCK COMPANIES.—In 1928–29 there were 6,330 joint stock companies registered in British India and in the Indian States, with a paid-up capital of Rs. 27,931 lakhs (£209,481,000). The companies were classified as follows:—Trading and manufacturing, 2,356; banking and loan, 1,621; tea and other planting, 604; mining, 327; cotton mills, 294; cotton ginning mills, 109; jute mills, 63; other mills and presses, 77; estate, &c., 115; insurance, 100; railway transport, &c., 220; navigation, 26; sugar, 35; others, 383.

FRONTIER TRADE.

A new system of registration of the land frontier trade of India came into force in April, 1925. Only the traffic in selected articles at certain railway stations adjacent to the more important trade routes across the frontier is registered. The principal imports were metals and manufactures of metal, grains and pulses, fruits, provisions and raw silk. The principal exports were cotton goods, metals, provisions, grains, salt and sugar.

* *See* p. 653 as to the proposed increase of duties.

TABLE OF THE PRINCIPAL INDIAN RULING PRINCES AND CHIEFS, SHOWING THE SALUTES TO WHICH THEY ARE ENTITLED, AND THE AREA, POPULATION, PREVAILING RELIGION, AND REVENUE OF THEIR STATES.

State, Salute, and Title of Chief.	Date of Succession.	Area in sq. miles.	Population in 1921.	Prevailing Religion.	Revenue for last year recorded or approximate.

† The present chief has a personal salute of two additional guns.

STATES OF THE RULING PRINCES AND CHIEFS OF INDIA.

THE States in India whose chiefs are in subordinate alliance with, or under the suzerainty of, the King-Emperor, comprise about two-fifths of the area, but only two-ninths of the population of India. Their administration, with a few unimportant exceptions, is not under the direct control of British officials, but it is subject, in varying degrees, to the Supreme Government. The chiefs are entitled to British protection, but have no power of making war and peace, or of sending ambassadors to one another or to foreign States; the military force they maintain is strictly limited; no European is allowed to reside at any of their courts without special sanction; and in case of misrule the Supreme Government can dethrone the chief or temporarily suspend him from the exercise of his powers. In matters of Imperial interest, trade, main lines of railway, &c., the Supreme Government has jurisdiction. Some States pay *tribute*, most do not. *Tributes aggregating* £541,800 (£183,750 from Mysore) were paid to the Government of India in 1929-30. Generally speaking, the States are governed by their Princes, Ministers, and Councils, with the advice of a political officer of the Supreme Government. This officer may have charge, as British Resident, of one large State, or may be the Agent for a group of States. A common characteristic of all Indian States, important or insignificant, is that in their territory British Indian law does not run. For them the Indian Legislature or the Provincial

Legislative Councils cannot legislate; and over them the High Courts or Chief Courts of the Provinces have no jurisdiction.

The Assigned Districts of Mysore (Bangalore), Kalat (Quetta), and Berar are still technically Indian States territory. The Shan States, on the other hand, are technically part of British India, though administered by local Sawbwas or petty chiefs. Excluding these territories, the Indian States have a combined area of 711,032 square miles, and a population of 71,939,187. They maintain in the aggregate a considerable body of troops of inferior military organisation in addition to their Indian State forces. Many treaties provide that States shall furnish troops on the requisition of the Supreme Government, and troops of Indian States served in almost every Indian campaign of the 19th century. Lord Curzon inaugurated an Imperial Cadet Corps of Indian princes and nobles. The States vary greatly in size and importance. Hyderabad is nearly as large as Great Britain, and the Nizam enjoys a very large revenue. On the other hand, in Kathiawar and elsewhere, where family custom has led to minute sub-division, there are many chiefs of single villages. In these petty estates the nominal chief may have some very limited magisterial powers, but the administration is regulated and carried on by the Supreme Government in its executive capacity. The amount of control thus exercised over an Indian State in its internal affairs depends on a number of considerations, and varies from State to State. The rulers have not necessarily any religious or tribal connexion with the majority of their subjects. Thus the Nizam of Hyderabad is a Muhammadan, but most of his people are Hindus. Although the Indian States, large and small, number 662, only about 200 are of any real importance. The majority represent the scattered military chiefships which sprang from the ruins of the Moghul Empire in the 18th century. The rulers of Gwalior, Indore, and Baroda are all descendants of successful generals who then rose to power. Most of these States are of more recent origin than the British power in India. A unique step was taken in 1910, when a new Indian State was created out of the family domains of the Maharaja of Benares.

The salutes enjoyed by the Indian princes indicate their relative importance. Those with eleven guns or more are addressed as His Highness. On pages 673-674 are the names of 86 ruling chiefs who have salutes of eleven guns or more, with some particulars of their States. Some well-known Indians of title, such as H.H. the Aga Khan, G.C.S.I., G.C.I.E., G.C.V.O., and the Maharajah of Burdwan, G.C.I.E., K.C.S.I., are not ruling chiefs.

The States of Hyderabad, Mysore, Baroda, Kashmir, Sikkim, and Kalat, and those belonging to the Rajputana and Central India Agencies, 175 in all, are under the direct supervision of the Governor-General in Council. The remainder, chiefly minor States, are under the supervision or control of various Provincial Governments. The States of first magnitude, which have a superior Resident, are Hyderabad, Mysore, Baroda, Kashmir, Jaipur, Udaipur, and Gwalior.

The Indian States may be thus classified:—

1. *Hyderabad*, the premier State in India (capital, Hyderabad, pop. 404,187—the fourth city in India). This State is in the centre of the Deccan or central plateau of Southern India. The ruling dynasty is of Turkoman origin, and is descended from Asaf Jah, who became Viceroy of the Deccan in 1712, and then independent of the Mogul Emperor. Telugu and Marathi are the chief languages. Wheat, rice, and cotton are produced. The Nizam's Guaranteed Railway is the principal line. 2. *Mysore* This State, situated on a plateau in Southern India, was administered by the Indian Government from 1831 to 1881, when it was restored to native rule, under a somewhat strictly framed instrument of transfer. In Dec., 1913, the instrument was replaced by a new Treaty putting the relations between the British Government and the State on a footing more in consonance with the actual position of the Maharaja among the Feudatory Chiefs of India. Kanarese and Telugu are the chief languages. There is a Mysore State Railway. Millets, pulses, and rice are the principal crops. Mysore has important goldfields. 3. *Baroda*, situated in Western India in Gujarat and Kathiawar and much interlaced with British districts. The reigning Gaekwar was the adopted heir of the ruler deposed in 1875 for misgovernment and misconduct. 4. The Himalayan Hill States, west of Nepal, including Kashmir. The important frontier State of *Kashmir* (capital, Srinagar, pop. 141,735) was granted to Gholab Sing by Lord Hardinge, after the First Punjab War (1846). It comprises Jammu, Kashmir, Ladakh, Gilgit, and Baltistan. A force stationed at Gilgit watches the northern passes and controls the feudatory chiefships of Hunza and Nagar; while on the west the subordinate chiefship of Chitral is occupied by British troops, depending for their support on the Peshawar border 5. *Sikkim*, a frontier State situated on the borders of Tibet, between Nepal and Bhutan, acknowledged the British protectorate in 1890, when also the boundaries of Tibet were defined by the Sikkim-Tibet Convention. 6. The Sikh States, in the Sirhind plain, south of the Sutlej. The most important of these is *Patiala*. 7. Rajputana, comprising the ancient sovereignties lying between Sind and the United Provinces. *Rajputana* (pop. 9,844,384) extends some 460 miles from north to south, and is 530 miles in breadth, and is larger than the British Isles. About half of the area is desert. It comprises 20 States of varying size and importance. Of these 17 are ruled by hereditary Rajput chiefs, two by Jat chiefs, and one by a Muhammadan. The Governor-General's Agent's headquarters are at Ajmer; he has under him Residents for Eastern and Western Rajputana, and about twenty other officers, distributed among the States to supervise the administration, and give advice when it is required. The most important States are *Jodhpur* (*Marwar*), *Udaipur* (*Mewar*), and *Jaipur*. The Rajput dynasties, the most ancient in India, go back before the Mogul Empire, and resemble feudal monarchies. 8. The States of *Central India*, lying to the north of the Nerbudda and to the south and east of Rajputana, although in the aggregate one-third less in extent than those of Rajputana, are nearly four times as numerous. All but 17 are petty chiefships. The most important are *Gwalior* and *Indore*, which include between them one-half of the whole area. The 31 minor States of Bundelkhand (largest, *Rewa*) are in political relation with the Central India Agency *Bhopal*, one of the principal Muhammadan States in India. 9. The Malayalim States of *Travancore* and

Cochin, lying together in S.W. India. These important States, attached to Madras Presidency, represent ancient Hindu dynasties. 10. The three northern Muhammadan States of Khairpur (Sind), Bahawalpur, and Rampur. 11. Kalat (including Makran and Kharan) and Las Bela, with tribal areas in the possession of the Marri and Bugti tribes. 12. Gujarat, including Kutch and the numerous petty chiefships of Kathiawar. 13. The Southern Mahratta States. 14. The numerous Afghan and Baluch tribes of the N.W. frontier, inhabiting the mountains from the north of Peshawar to the base of the Suleiman range, a distance of 800 miles. The names of some of these tribes, Waziris, Orakzais, Afridis, &c., have become familiar owing to the many expeditions against them. 15. The aboriginal Gond and Kol tribes, under petty princes of aboriginal or Rajput blood, in Chota-Nagpur, Orissa, the Central Provinces, and the Jaipur (Vizagapatam) Agency. 16. The Indo-Chinese group of States, and the numerous hill tribes of the N.E. frontier.

Countries Contiguous to India.

NEPAL.

Sovereign, His Majesty Maharaja Dhiraja Tribhuhana Bir Bikram Jung Bahadur Shah Bahadur Shamsher Jang; *suc.* 1911.

Prime Minister, His Highness Maharaja Sir Bhim Shumshere Jung, Bahadur Rana, G.C.S.I., K.C.V.O., Honorary Lieutenant-General of the British Army, Honorary Colonel of the 4th P.W.O. Gurkhas, Prime Minister, and Supreme Commander-in-Chief. (Personal salute in British India, 19 guns.)

Nepal (area, about 54,000 sq. miles: pop. 5,600,000) lies between British India and Tibet on the S. slopes of the Himalayas, and includes Mt. Everest (29,141 ft.). Amid the sterile mountains lie many fertile valleys. The lower hills are covered with jungle, in which wild animals abound. Rice, wheat, &c., are grown. Nepal is divided into four provinces. Its exports to British India are estimated to amount to about £4,000,000, and its imports to £2,000,000 a year. The chief trade route is that between Kathmandu and the Bihar and Orissa frontier (77 miles). Nepal exports rice and other grains, hides, oilseeds, *ghi*, cattle, jute, large quantities of timber, &c., and imports cotton goods and yarn, sugar, salt, spices, metals, &c. The revenue, realised chiefly from land rent, forests, customs, &c., is over £1,000,000. The aborigines are Mongolian in type, and their religions are Buddhism and Hinduism. The country was conquered in 1769 by the Gurkhas, who are Hindus and claim to be Rajputs. Their frequent aggressions led to a war with the British in 1814-6. Relations have now long been friendly. The policy of seclusion is, however, consistently followed by the Nepal rulers. The real political power rests with the Prime Minister. This office is always held by a member of his family, the succession being determined by special rules. The army numbers about 45,000. By arrangement with Nepal, India obtains many fine recruits for its Gurkha regiments. During the Great War, and in the subsequent Afghan war, the Nepal Government rendered unstinted and unconditional assistance to the British Government in men, money and material. A new Treaty was concluded in December, 1923, between the British and Nepalese Governments, by which *inter alia* the internal and external independence of the State was recognised.

CAPITAL, *Kathmandu* (pop. 80,000) — *British Envoy at the Court of Nepal*, Lt.-Col. C. T. Daukes, C.I.E. Rs.3,000

BHUTAN.

Bhutan (area, about 20,000 sq. miles; pop. about 250,000, mainly Buddhists) also lies on the S.E. of the Himalayas, and its products resemble those of Nepal. In 1863, owing to outrages on British subjects, portions of it were annexed to India, an annual allowance being paid by the Indian Government as compensation. By a treaty in 1910 this allowance was fixed at £6,667, and Bhutan agreed to be guided in its external relations by the advice of the British, who, however, will not interfere in its internal affairs. The former dual government of a spiritual chief and a temporal chief came to an end when the Tongsa Penlop, the chief councillor and virtual ruler, the late Sir Ugyen Wangchuk, K.C.S.I., C.C.I.E., was chosen hereditary Maharaja in 1907. He has a salute of 15 guns in British territory. The estimated annual revenue is £13,000. Bhutan's total trade with India is estimated at over £65,000 a year. There is no British Resident.

CAPITAL, *Punakha*.

THE PERSIAN GULF.

For three centuries England has taken the lead in the Gulf trade. She has suppressed piracy, slavery, and inter-tribal warfare on land and sea, made surveys, and laid down buoys and cables. Vigorous measures have been taken against gun-running. England and India still have the lion's share of the trade, the bulk of which is conducted by Indians, who make Bombay their *entrepôt*. The Arabian shores are low-lying deserts, the Persian coasts mountainous; at the head of the Gulf are great alluvial plains. The heat is intense in summer. Natural harbours are few.

The ruler of *Bahrein* (capital, Manama) has been in treaty relations since 1820 with the Government of India, who have a Political Agent at Bahrein. In 1880 he engaged not to make treaties with any other State.

The Sultan of *Oman* (Muscat) is in treaty relations with, and subsidised by, the Government of India, who have a Political Agent and Consul at his Court.

The independent tribes on the *Pirate* (Arab) *Coast* from Ras-el-Kheima to Odeid are bound under treaties with the Indian Government (dating from 1820, and confirmed in 1853 by a Treaty of Perpetual Peace) to maintain a maritime truce for the prevention of piracy and slavery, and for the cessation of hostilities at sea. Hence their chiefs are sometimes called the "Trucial" chiefs. The British Political Resident in the Persian Gulf is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. In 1892 these tribes agreed not to enter into relations with, or cede territory to, any other Power than the British. The trade of the Arab coast ports largely consists in exports of pearls to India *via* Lingah and Bahrein.

Important caravan routes converge at *Koweit*, which has an excellent harbour. The Sheikh is under treaty obligations with the Indian Government.

Political Resident, Persian Gulf, Lt.-Col. H. V. Biscoe .....Rs. 4,000
Secretary, Capt. J. R. L. Bradshaw .....Rs. 1,350
Political Agent and Consul, Muscat, Capt. R. G. E. W. Alban .....Rs. 1,250
Do.. Koweit, Military Asst. Surgeon A. L. Greenway..... .....(Time scale)
Do., Bahrein, Capt. C. G. Prior .....Rs. 1,350

PERSIA (*q.v.*) borders on Baluchistan and Afghanistan. The demarcation of the Perso-Baluch frontier, partially carried out in 1872 and 1895, was completed in 1905.

ASIATIC RUSSIA.—A portion of what was once the Russian Empire is conterminous with Persia and Afghanistan. The Trans-Caspian Railway runs, *viâ* Merv, to Samarkand and Andijan, with a branch to Tashkent. The Murghab Valley branch from Merv to Kushk on the Afghan frontier, opened in 1898, brings the Russian railways within 70 miles of Herat, and within 450 miles of the Chaman terminus of the Indian railways. Another important strategic line connects Tashkent directly with Orenburg. The Amu-Darya, or Oxus, which separates Bokhara from Afghanistan for 330 miles, is navigated by Russian steamers.

CHINA.—India is in contact with two dependencies of China, Chinese Turkestan and Tibet, and one province, Yunnan.

Chinese Turkestan is surrounded by the mountains of Tianshan, the Pamirs, and Kuenlun. There are three difficult passes into Russian Turkestan and two still more difficult ones into India. The boundary between Kashmir and Chinese Turkestan has not been officially defined. There is a British consul-general at Kashgar. Trade with India is chiefly carried over the Karakoram Pass (18,500 feet) *viâ* Ladakh, in Kashmir.

Tibet, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly defined), from Kashmir to Burma, but is separated therefrom by the Himalayas. India imports from Tibet wool, borax, salt, and musk, in exchange for cotton and woollen goods and grain. Trade passes from Bengal (through Sikkim) and from the Punjab and the United Provinces. Under the Anglo-Chinese Sikkim Convention of 1890, a trade mart was opened at Yatung; but as the Tibetans persistently disregarded the Convention, a political mission was despatched from India, with a military escort. It reached the capital, Lhasa, after sharp fighting, on August 3, 1904. A new Convention was signed (Sept. 7), providing for the erection of boundary pillars between Sikkim and Tibet; for three trade marts, with British and Tibetan agents; for unrestricted traffic by existing routes; and for payment of an indemnity. The Tibetans pledged themselves not to alienate any territory or grant concessions to, or permit the intervention of, any foreign Power. By the Convention of Peking (April, 1906) China accepted the Conventions of 1890 and 1904, and declared that no foreign State should interfere in Tibet, while England also undertook not to interfere in the administration of Tibet or annex territory. By the Anglo-Russian Convention of Aug., 1907, both Powers recognised the suzerain rights of China in Tibet, agreed to maintain its territorial integrity, to refrain from intervention in its internal administration, to treat with Tibet only through the Chinese Government, not to send representatives to Lhasa, not to assign any territory to either Power, and not to obtain railway, mining, or other concessions; but direct relations between British commercial agents and Tibetan authorities under the Conventions of 1904 and 1906 are permitted. In Dec., 1905, the ruler of Tibet, the Tashi Lama, visited India. The Dalai (or Sacred) Lama, who fled before the British advance on Lhasa, returned to Tibet in Jan., 1910. The Chinese had meanwhile strengthened their hold over the administration, despite the opposition of the Lamas, or monks, who resented the loss of their authority. In Feb., 1910, the Dalai Lama again fled to India, pursued by Chinese troops. He was then deposed by the Chinese Emperor. The British Government refused the Dalai Lama's appeal for their intervention, but allowed him to remain at Darjiling. He left India in June, 1912, for Lhasa, where sharp fighting occurred between the Chinese and Tibetans, the former being worsted. In August, 1912, the British Minister at Peking presented a Note to the Chinese Government, urging that China should not actively intervene in internal administration in Tibet. To this the Chinese Government agreed, and representatives of the British, Chinese and Tibetan Governments met in conference at Simla in Oct., 1913, to discuss the relations between the three countries. A convention, the terms of which have not been made public, was initialled by the three representatives, but the Chinese Government have so far refused to ratify it.

Yunnan is a Chinese province to the N.E. of Burma. By Anglo-Chinese agreements of 1894 and 1897 a boundary was fixed between Burma and Yunnan, and arrangements were made regarding trade, extradition, &c. Part of the boundary is still undefined. By an agreement of 1896 Great Britain and France agreed to share equally all privileges or advantages that might be conceded by China in Yunnan. Trade with Yunnan is chiefly by a difficult route from Bhamo, in Upper Burma. Burma imports from Yunnan hides, raw silk, &c., and exports cotton goods, &c. Têng-yuëh and Ssumao, near the Burma frontier, are treaty "ports." There are British consuls at Têng-yuëh and Yunnan-fu.

SIAM (*q.v.*) marches with Burma for many hundreds of miles through mountainous country, and considerable trade is carried on over this frontier, mainly with Chiengmai. Burma imports from Siam teak, cattle, silk goods, &c., and exports cotton goods, &c. The boundary of Burma and N.W. Siam was demarcated in 1892-3. France in 1904 recognised the portion of Siam west of the Menam basin, including the Malay peninsula and adjacent islands, as within the British sphere of influence.

The Dominion of Canada.

Canada was originally discovered by Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first settlement (Quebec) was founded by them in 1608. In 1759 Quebec succumbed to the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the Treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1866. By the British North America Act, passed in 1867, the Provinces of Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of THE DOMINION OF CANADA, and provision was made in the Act for the admission at any subsequent period of the other provinces and territories of British North America.

The Dominion of Canada occupies the whole of the northern part of the North American Continent (with the exception of Alaska and part of the coast of Labrador), from 49° North latitude to the North Pole, and from the Pacific to the Atlantic Ocean. In Eastern Canada, the southernmost point is Middle Island in Lake Erie, at 41° 41′ (approximately the latitude of Rome, Italy).

Relief.—From a physical point of view Canada may be divided into an eastern division, a western division, the Red River Valley, in long. 97°, forming the separating line, and a northern division. The eastern division comprises two areas, presenting radically distinct aspects:—(1) The south-eastern area, bounded by the line of the Gulf and River St. Lawrence, from Belle Isle to Montreal, thence by a line running directly south to Lake Champlain, which is generally hilly, and sometimes mountainous, with many fine stretches of agricultural and pastoral lands. (2) The southern and western area, presenting, in the main, a broad, level, and slightly undulating expanse of generally fertile country, with occasional step-like ridges or rocky escarpments. The main hydrographical feature is the chain of lakes, with an area of 95,000 square miles, contributing to the great river system of the St. Lawrence. The northern division, embracing nearly two-thirds of the Dominion, with an average elevation of 1,000 feet above the level of the sea, is pre-eminently a region of waterways, and including the great Laurentian plateau. In this area are found the other great river systems, the Nelson and the Mackenzie. The western division referred to may also be said to possess two areas equally distinct in character. The first stretches from the Red River Valley to the Rocky Mountains. Here, between lat. 49° and 54°, is the great Prairie Region, rising to the west in three terrace-like elevations, the lowest of which is 700 feet, and the third about 3,000 feet above the level of the sea. North of the 54th parallel the country passes again into forest. The second area, from the western edge of the Prairie to the Pacific coast, is a distance of 400 miles, and contains the Rocky Mountains (Mount Robson, 12,972 feet) and the Selkirk and Cascade Ranges, whose summits are from 4,000 to 16,000 feet high, the country being on the whole densely wooded. The highest mountain peaks in Canada are Mount Logan, 19,850 feet, and Mount St. Elias, 18,008 feet, both in the Yukon.

Climate.—The climate in the eastern and central portions of the Dominion presents greater extremes of cold and heat than in corresponding latitudes in Europe, but in the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months. The soil is generally fertile and all the products of the temperate zone are cultivated.

GOVERNORS-GENERAL OF CANADA SINCE 1867.

Name.	Date of Appointment.	Date of Assumption of Office.
Viscount Monck, G.C.M.G.	June 1, 1867	July 1, 1867
Lord Lisgar, G.C.M.G.	Dec. 29, 1868	Feb. 2, 1869
Earl of Dufferin (Marquess of Dufferin and Ava), K.P., K.C.B.	May 22, 1872	June 25, 1872
Marquess of Lorne (Duke of Argyll), K.T., G.C.M.G.	Oct. 5, 1878	Nov. 25, 1878
Marquess of Lansdowne, G.C.M.G.	Aug. 18, 1883	Oct. 23, 1883
Lord Stanley of Preston (Earl of Derby), G.C.B.	May 1, 1888	June 11, 1888
Earl of Aberdeen, K.T., G.C.M.G.	May 22, 1893	Sept. 18, 1893
Earl of Minto, G.C.M.G.	July 30, 1898	Nov. 12, 1898
Earl Grey, G.C.M.G.	Sept. 26, 1904	Dec. 10, 1904
Field-Marshal H.R.H. the Duke of Connaught and Strathearn, K.G.	Mar. 21, 1911	Oct. 13, 1911
Duke of Devonshire, P.C., K.G., G.C.M.G., G.C.V.O.	Aug. 19, 1916	Nov. 11, 1916
General Viscount Byng of Vimy, G.C.B., G.C.M.G., M.V.O.	Aug. 2, 1921	Aug. 11, 1921
Viscount Willingdon, G.C.S.I., G.C.M.G., G.C.I.E., G.B.E.	Aug. 5, 1926	Oct. 2, 1926
Earl of Bessborough, G.C.M.G.	Feb. 9, 1931	April 4, 1931

GOVERNMENT.

Canada is a self-governing Dominion within the British Empire, its constitution resting on the British North America Act of 1867, under which the Dominion of Canada came into being on July 1, 1867 (Dominion Day). The Executive power is vested in a Governor-General appointed by the Sovereign and aided by a Privy Council.

Governor-General and Staff.

Governor-General and Commander-in-Chief, His Excellency The Right Honourable The Earl of Bessborough, G.C.M.G., LL.D. £10,000

Secretary to the Governor-General, A. F. Lascelles, M.V.O. M.C. $6,000

Comptroller of the Household, Lt.-Col. H. W. Snow, C.M.G., D.S.O., Reserve of Officers.

Assistant Secretary to the Governor-General, James F. Crowdy, M.V.O., B.A.....$4,200

Deputy-Assistant Secretary to the Governor-General, F. L. C. Pereira.

Aides-de-Camp, Lieut.-Col. Henry Willis O'Connor, D.S.O., P.P.C.L.I.; Lieut. Donald H. Fuller, R.N.; Capt. Sir John Child, Bt., Coldstream Guards; Capt. R. F. H. P. Stuart-French, 11th Hussars.

THE EXECUTIVE.

The executive government and authority are vested in the King, and exercised in his name by the Governor-General, aided by a Privy Council.

The Dominion Cabinet.

(Aug. 7, 1930.)

Prime Minister, President of the Privy Council, Secretary of State for External Affairs and Minister of Finance, Rt. Hon. R. B. Bennett, P.C. *$15,000

Minister without Portfolio, Rt. Hon. Sir George H. Perley, K.C.M.G.....

Minister of Labour, Senator Gideon Robertson 10,000

Minister of Justice and Attorney-General, Hon. Hugh Guthrie 10,000

Minister of Fisheries, Hon. E. N. Rhodes 10,000

Minister of Trade and Commerce, Hon. H. H. Stevens 10,000

Minister of Railways and Canals, Hon. R. J. Manion..... 10,000

Minister of National Revenue, Hon. E. B. Ryckman 10,000

Minister without Portfolio, Hon. J. A. Macdonald.....

Postmaster-General, Hon. Arthur Sauvé ...10,000

Minister of Pensions and National Health, Col. Hon. Murray MacLaren 10,000

Minister of Public Works, Hon. H. A. Stewart 10,000

Secretary of State, Hon. C. H. Cahan 10,000

Minister of National Defence, Col. Hon. D. M. Sutherland 10,000

Minister of Marine, Hon. Alfred Duranleau 10,000

Minister of Interior and Superintendent-General of Indian Affairs, Hon. Thomas G. Murphy 10,000

Solicitor-General, Hon. Maurice Dupré ... 10,000

Minister of Immigration and Colonization and Minister of Mines, Hon. W. A. Gordon 10,000

Minister of Agriculture, Hon. Robert Weir..... 10,000

* NOTE.—In every case—including the Prime Minister's—*four thousand dollars* is paid in addition to a Minister of the Crown as his sessional indemnity as a member of either the Senate or the House of Commons of Canada.

Leader of the Opposition, Right Hon. William Lyon Mackenzie King, C.M.G., LL.D. $10,000

External Affairs.

High Commissioner's Office, London, England.
Canada House, Trafalgar Square, London, S.W. 1.

High Commissioner, Hon. G. Howard Ferguson, K.C.
Secretary, Lt.-Col. G. P. Vanier.
Assistant Secretary, E. P. Luke.
Accountant, Thos. Allin.

Canadian Legation to the United States,
1746, Massachusetts Avenue, Washington, D.C.
Minister, Hon. W. D. Herridge.
1st Secretary, Hume Wrong.
Commercial Secretary, Merchant Mahoney.
3rd Secretary, Thomas A. Stone.

Canadian Legation to France.
1, Rue Francois 1er, Paris.
Minister, Hon. Philippe Roy.
Counsellor, Jean Desy.
Secretary, Pierre Dupuy.

Canadian Legation to Japan,
Tokyo, Japan.
Minister, Hon. H. M. Marler.
1st Secretary, H. L. Keenleyside, M.A., Ph.D.
Commercial Secretary, J. A. Langley.
3rd Secretary, K. P. Kirkwood.

British High Commissioner in Canada.

British High Commissioner, Sir William Henry Clark, K.C.S.I., K.C.M.G. (Earnscliffe, Ottawa).

THE LEGISLATURE.

Parliament consists of a Senate and a House of Commons. The *Senate* consists of 96 members, nominated for life by the Governor-General, distributed between the various provinces thus: 24 for *Ontario*, 24 for *Quebec*, 10 for *Nova Scotia*, 10 for *New Brunswick*, 4 for *Prince Edward Island*, 6 for *British Columbia*, 6 for *Manitoba*, 6 for *Alberta*, and 6 for *Saskatchewan*; each Senator must be thirty years old, a resident in the province for which he is appointed, a natural-born or naturalised subject of the King, and the

owner of a property qualification amounting to $4,000. The Speaker of the Senate is chosen by the Government of the day. The *House of Commons* is elected every five years at longest, and the Parliament consists of 245 members, elected as follows: 82 for *Ontario*, 65 for *Quebec*, 14 for *Nova Scotia*, 11 for *New Brunswick*, 17 for *Manitoba*, 14 for *British Columbia*, 4 for *Prince Edward Island*, 16 for *Alberta*, 21 for *Saskatchewan*, and 1 for *Yukon*. The House of Commons is also composed of natural-born or naturalised subjects of the King; no property qualification is necessary, its members are elected upon a very wide suffrage, and at the General Election in Dec. 1921 women exercised the franchise on the same terms as men for the first time in a Federal Election. For electoral purposes each province is divided into districts, returning a member on a majority of votes taken by ballot. The members of the House themselves elect their Speaker, and twenty, including the Speaker, form a quorum. Members of the Upper and Lower Houses receive $4,000 per Session, with travelling expenses and deductions for non-attendance.

The Houses of Parliament were destroyed by fire on Feb. 6, 1916, the new buildings being started the same year; the foundation stone was laid by H.R.H. the Duke of Connaught (Gov. Gen.), Sept. 1, 1917, and the corner stone of the main tower by H.R.H. the Prince of Wales, Sept. 1, 1919. The Speaker's Chair in the new House of Commons (a replica of that at Westminster) was presented in 1921 by Viscount Ullswater (ex-Speaker of the House of Commons of the United Kingdom) on behalf of the Empire Parliamentary Association of the Houses of Lords and Commons.

The Senate.

Speaker of the Senate, Hon. Pierre Blondin	$6,000
Clerk of the Senate & Clerk of the Parliaments, Austin Blount, C.M.G.	6,000
1st Clerk Assistant, L. P. Gauthier	4,740
Gentleman Usher of the Black Rod, Andrew R. Thompson	4,140
Law Clerk, J. G. A. Creighton, C.M.G., K.C.	5,120

The House of Commons.

Speaker of the House of Commons, Capt. Hon. George Black, M.P. (*and allowance* $3,000)	$6,000
Deputy Speaker, Armand Lavergne	4,000
Clerk, A. Beauchesne, M.A., K.C., F.R.S.C. (*and allowance* $1,500)	6,000
Clerk Assistant, Thos. M. Fraser, B.C.L.	4,740
Sergeant-at-Arms, Lt.-Col. H. J. Coghill. (*and allowance* $600)	4,520

THE JUDICATURE.

The Judicature.—Justice is administered, as in England, by judges, police magistrates, and justices of the peace, of whom the first-named are appointed by the Governor-General, for life, from among the foremost men at the Bar in the several provinces. The highest court is the Supreme Court of Canada, composed of a Chief Justice and six puisne judges, and holding three sessions in the year at Ottawa. The only other Dominion Court, viz., the Exchequer Court of Canada, is presided over by separate judges, and its sittings may be held anywhere in Canada. The Provincial Courts include the Court of Chancery, Court of King's Bench, Court of Error and Appeal, Superior Courts, County Courts, General Sessions, and Division Courts. The duties of coroners are generally analogous to those in force in England, as are also methods of civil and criminal procedure, while trial by jury prevails.

Supreme Court of Canada.

Chief Justice of Canada, Rt. Hon. F. A. Anglin, P.C.	$15,000
Puisne Judges, Rt. Hon. Lyman Poole Duff; Hon. E. L. Newcombe; Hon. T. Rinfret; Hon. J. H. Lamont; Hon. R. Smith; Hon. L. A. D. Cannon	each 12,000
President of the Court of Exchequer for the Dominion, Hon. A. K. McLean	10,000
Puisne Judge of the Exchequer Court, Hon. Louis A. Audette, LL.D.	9,000
Registrar of the Supreme Court, James F. Smellie, K.C.	6,000
Registrar of the Exchequer Court, C. Morse, K.C., D.C.L.	5,000

DEFENCE.

The Canadian Militia is composed of the Active Militia and the Reserve, the Active Militia consisting of the Canadian Permanent Force (a small body of all arms) and the units of the Active Militia of the several branches of the service which are organized and perform annual training. The Reserve Militia consists of reserve units and of all able-bodied citizens between the ages of 18 and 60, with certain well-defined exceptions. The total establishment of the Non-Permanent Active Militia (1930) is 9,050 officers and 116,548 other ranks.

Expeditionary Force in the Great War.—The number enlisted up to the cessation of hostilities was 595,441, of whom 418,052 were sent overseas. Over 80% of all enlistment was voluntary. The total outlay for the War is estimated at $2,000,000,000.

Royal Canadian Navy.

The Royal Canadian Navy consists (1931) of 4 Destroyers and 3 Mine-sweepers. The authorized complements are 104 officers and 792 men of the Permanent Force. There is also a Naval Reserve of 70 officers and 430 men and a Naval Volunteer Reserve of 70 officers and 930 men.

Royal Canadian Air Force.

The strength of the Royal Canadian Air Force, permanent service, was on Jan. 1, 1931, 177 officers and 734 airmen.

Royal Canadian Mounted Police.

Headquarters: Ottawa.

Hon. Commandant, H.R.H. the Prince of Wales, K.G.

Commissioner, Maj.-Gen. James Howden MacBrien, C.B., C.M.G., D.S.O.

Assistant do., C. S. Worsley (*Regina*).

Assistant do., Lt.-Col. A. W. Duffus (*Ottawa*).

Liaison and Intelligence Officer, Col. C. E. Hamilton.

Secretary, G. T. Hann.

EDUCATION.

Education is under the control of the Provincial Governments, the cost being met by local taxation, aided by grants from the several Provincial Governments. There are (1930) 31,866 public elementary and secondary school districts (attendance at the former being compulsory except in the Province of Quebec), with 2,100,637 pupils. In addition there were 89,062 pupils in private elementary and secondary schools. Higher education is conducted in 23 universities and 101 colleges with an enrolment, in 1930, of 74,183.

In 1930 the live stock included 3,295,000 horses, 8,937,000 cattle, 3,696,000 sheep, 4,000,000 swine, and 60,795,000 poultry.

In dairy produce the Dominion output of creamery butter in 1930 was 187,151,247 lb., valued at $37,177,798. There was also produced 84 337,000 lb. of dairy butter valued at $20,710,000. The cheese production, home-made and factory, for the same period totalled 119,402,458 lb. valued at $18,169,395.

Fur Farming.—A comparatively new industry, but one which is assuming appreciable proportions, is that of fur farming. There were 5,513 fur farms in the Dominion in 1929, 4,493 of which were fox farms, the remainder being divided between mink, raccoon, marten, skunk, fisher, Karakul sheep, beaver, muskrat, chinchilla rabbit, coyote, badger and Siberian hare. The total number of animals on the farms at the end of 1929 including estimates of the numbers of muskrats and beaver was 832,059, valued at $21,303,025; born in captivity, 425,757; sold from farms, 35,422, value $4,474,953; pelts sold, 38,311, value $2,304,910; the total sale for live animals and pelts being $6,779,863 as compared with $6,226,446 in 1928.

Fisheries.—The fisheries are an important source of wealth, and include salmon, cod, halibut, whitefish, herrings, mackerel, and lobsters. The total value of the catch marketed in the calendar year 1930 was $47,804,216, as against $55,518,521 in 1929 and $60,259,744 in 1918, the banner year of the fishery harvest. The capital invested in vessels, &c., engaged in catching operations and in fish-canning and curing establishments in 1930 was $64,026,297, and the number of men employed 79,558. The number of canning and curing establishments in operation in 1930 was 713.

Lumbering.—The value of production, including (*a*) primary forest production and (*b*) the value added by manufacture in sawmills and pulpmills, was $337,649,078 in 1929, as compared with $323,654,008 in 1928. The principal items of production in 1929 were sawn lumber $213,349,886, shingles $9,423,363, lath $2,860,759, and wood pulp £29,033,154.

Industrial Statistics.—Industrial establishments of all kinds in 1929 had a total capital of

$5,083,014,754, the gross value of the products being $4,063,987,279. These industries employed 693,816 hands, the total pay roll for whom was $813,049,842.

Minerals.—Some minerals produced in 1930* were as follows: Gold, 2,089,766 oz. ($43,199,000); copper, 301,017,167 lb. ($38,687,000); lead, 329,033,531 lb. ($12,792,000); nickel, 103,782,009 lb. ($24,449,000); silver, 26,171,651 oz. ($10,057,000); zinc, 259,700,849 lb. ($9,393,000); cobalt, 694,163 lb. ($1,144,007); coal, 14,925,000 short tons ($53,000,000); natural gas, 29,566,000 M. cu. ft. ($10,561,000); crude petroleum, 1,500,000 brls. ($5,120,000); asbestos, 244,000 tons ($8,600,000); gypsum, 1,060,000 tons ($2,875,000); salt, 283,000 tons ($1,575,000). The total value of the mineral output in 1930 was $276,865,000.

* Preliminary figures.

Shipping.—The registered shipping on Dec. 31, 1929, including inland vessels, was 3,233 sailing vessels and 5,666 steamers (total net tonnage, 1,393,593). The sea-going vessels entered and cleared at Canadian ports in 1930 were: Canadian 18,145 (9,673,948 tons), British 5,634 (20,171,383 tons), Foreign 19,689 (23,146,901 tons); total tonnage 52,992,232. The number of coasting vessels entered and cleared was 164,402, with a registered tonnage of 87,734,773.

Banking.—There were 11 chartered banks on Dec. 31, 1930, with 4,083 branches, with liabilities to the public of $2,909,530,263; assets of $3,237,073,853; deposits $2,516,611,587. The balance of undrawn deposits in the Post Office and Dominion Government savings banks on March 31, 1930, was $26,086,036. These two classes of Dominion savings bank were amalgamated in 1929.

COMMUNICATIONS.

Railways.—The total single track mileage of steam railways in operation on Dec. 31, 1930, was 42,075 miles, the capital liability of the steam railways being $4,101,124,843 (1930), earnings (1930) $454,231,651, the working expenses (1930) $380,723,412. There were also (1930) 2,081 (single track, 1,509) miles of track of electric railways with a capital of $224,089,539, earnings $54,719,259, and working expenses $39,125,515. In 1930 the passengers carried numbered 34,698,767 (steam), 792,701,493 (electric), and freight 96 194,017 tons (steam), 2,873 628 tons (electric).

Name.	Total Miles operated. 1930.	Capital. 1930.
Canadian National Railway System (in Canada) single track	21,786	$ 2,768,793,062

Other Lines single track	5,401	443,383,607
Total, 1930 (miles of Track including Sidings, &c.), 56,642 miles of road		4,101,124,843

Investment in road and equipment of steam railways, 1930.

Canadian National	$1,956,360,178
Canadian Pacific	915,335,130
Other Railways	357,012,604
Total	$3,228,707,912

Canals.—In 1930 the vessels passing through the canals of the Dominion numbered 26,163 of 16,173,621 tons. There are seven systems under control of the Dominion Government with a total waterway of 1,846 miles (of which 509 miles are constructed canals).

The new *Welland Ship Canal* between Lake Erie and Lake Ontario, with a 25 foot channel, was officially opened for traffic on April 20, 1931.

Posts and Telegraphs.—There were 12,409 post-offices on Mar. 31, 1930. The postal revenue was $32,969,293 in 1930–31. On March 31, 1930, there were 4,210 rural mail delivery routes on which were erected 237,351 boxes. The length of telegraph lines directly operated by the Dominion Government in 1930 was 9,351 miles, and that by the Canadian National System 24,828 miles. Other lines reached 18,645 miles. On March 31, 1930, there were 936 coast and land wireless stations, 319 ship wireless stations, 91 broadcasting stations, and 424,146 private receiving stations for the reception of broadcast programmes. The ship to shore wireless traffic for the twelve months ended March 31, 1930, amounted to 440,912 messages and 9,167,302 words. Wireless "beam" stations are operated at Montreal, Quebec, for direct communication with Great Britain and Australia, and a station at Louisburg, N.S., provides a long-distance service to ships.

On December 31, 1930, there were 1,399,986 telephones and 4,476,213 miles of telephone wire in use; earnings, $65,240,610; expenses, $56,559,517.

Provinces of the Dominion.

ONTARIO.

Area and Population.—The Province of Ontario contains a total area of 407,262 sq. miles, with a population (1930) of 3,313,000. Of the population (Census 1921) 1,082,871 live in rural parts and 1,883,594 in urban centres.

Government.—The Government is vested in a Lieutenant-Governor and a Legislative Assembly of 112 members elected for five years which meets every year at Toronto. Executive Council of fourteen members (three without portfolio) act as the Ministry of the Province.

Lieutenant-Governor, Hon. William Donald Ross $10,000
Official Sec., Col. A. Fraser, LL.D. 1,400

Executive.

Premier and Minister of Education, Hon. George Stewart Henry, LL.D. $12,000
Highways, Hon. Leopold Macaulay 10,000
Attorney-General, Hon. William H. Price 10,000
Agriculture, Hon. Thomas Laird Kennedy 10,000
Health, Hon. John Morrow Robb 10,000
Provincial Secretary and Registrar, Hon. George H. Challis 10,000
Mines, Hon. Charles McCrea 10,000
Lands & Forests, Hon. William Finlayson 10,000
Provincial Treasurer, Hon. Edward Arunah Dunlop 10,000
Public Welfare, Hon. William G. Martin. 10,000
Public Works and Labour, Hon. Joseph Dunsmore Monteith 10,000
Ministers without Portfolio, Hon. J. R. Cooke; Hon. H. C. Schofield; Hon. Paul Poisson.

Speaker, Legislative Assembly, Hon. William D. Black $2,500

SUPREME COURT OF ONTARIO.

Chief Justice of Ontario, Rt. Hon. Sir William Mulock, K.C.M.G., P.C. $10,000
Chief Justice of the Second Divisional Court, Hon. Francis R. Latchford 10,000
Chief Justice of the High Court Division, Hon. H. E. Rose 10,000
Justices of Appeal, Hon. J. Magee; Hon. F. E. Hodgins; Hon. C. A. Masten; Hon. H. W. E. Middleton; Hon. W. R. Riddell; Hon. J. F. Orde; Hon. D. L. Grant; Hon. R. G. Fisher ..... each 9,000
High Court Judges, Hon. H. T. Kelly; Hon. W. A. Logie, C.B.; Hon. W. H. Wright; Hon. William Edgar Raney; Hon. John Millar McEvoy; Hon. Nicol Jeffrey; Hon. Charles Garrow ..... each 9,000

Agent-General for Ontario in the British Isles, William C. Noxon, 163, Strand, London, W.C. 2.
Assistant, S. E. Percival.

Finance.—The Ordinary Receipts of the Provincial Government for 1929 were $64,549,717, and the Ordinary Expenditure $61,906,824.

Agriculture and Live Stock.—The total area is 234,163,200 acres, and in 1929 the area of cleared land was about 15,000,000 acres, of which 10,020,294 acres were under field crops. The estimated total value of all field crops in 1929 was $236,651,277. Cheese factories produced 79,816,828 lb. of cheese in 1929 valued at $14,513,547, and creameries made 59,185,194 lb. of butter valued at $23,623,174. In 1929 there were 606,505 horses, 2,671,594 cattle, 1,130,395 sheep, 1,681,263 pigs, and 22,045,091 poultry. Free grants of land are obtainable in the great clay belt of Ontario, opened up by the Temiskaming and Northern Ontario railway. Improved farms, orchards and small holdings can be bought on reasonable terms in the older settled parts of the Province. There is a scheme of land settlement, with free land and financial assistance for returned soldiers, both Imperial and Canadian. There is always a demand for farm workers.

Lumbering.—The value of production including primary forest production and the value added by manufacture in pulp-mills and saw-mills in 1929 was $111,000,000.

Manufactures.—Ontario is the chief manufacturing province of Canada. The total value of its manufactures in 1925 was $1,527,154,660. There were, in 1925, 262,483 employees, an invested capital of $1,925,593,482, and an annual wage bill of $307,304,007. The chief manufacturing centres in 1922 were Toronto ($447,098,824), Hamilton ($122,305,950), Ottawa ($31,303,494), Oshawa ($47,529,284), London ($32,201,399), and Ford ($41,389,677).

Minerals.—Ontario is the leading mineral Province in the Dominion, the output in 1929 being $116,558,911. The principal metals are: gold, $33,543,913; silver, $4,649,275; nickel, $27,115,461; and copper, $14,609,178.

Hydro-Electric Power.—The Province of Ontario is well supplied with water power, having available about 7,000,000 h.p. The chief power rivers are the Niagara, the St. Lawrence and the Ottawa. One of the world's largest and most successful electrical undertakings—the largest publicly-owned—is operated by the Hydro-Electric Power Commission of Ontario, which generates and transmits power to more than 600 co-operating municipalities and serves about 75 per cent. of the population of the Province. The aggregate peak load exceeds 1,200,000 h.p. The undertaking represents a capital investment of about £70,000,000 ($350,000,000).

Principal Cities.—CAPITAL, TORONTO, population 652,000, with great shipping interests on the Lakes, and the chief centre of industrial and commercial activity; Hamilton, the "Birmingham of Canada" (128,000); Ottawa, the Federal capital (121,000), with a large lumber trade and woodenware manufactories; London (67,000); Brantford (33,000); Kingston (23,000); Peterborough (22,000); Windsor, connected by tunnel beneath Detroit River with Detroit, Mich., U.S.A. (67,000); Fort William (24,000); Kitchener (26,000); Guelph (20,000); St. Catharine's (24,000); Sault Ste. Marie (23,000).

QUEBEC.

Area and Population.—The Province of Quebec contains an area estimated at 594,434 square miles, with a population (1921) of 2,361,199, an increase since the last Census of 355,423. In 1927 the Province was diminished by 112,400 square miles by the award of the Imperial Privy Council in the controversy between the Dominion of Canada and Newfoundland with regard to their boundary in the Labrador Peninsula.

Government.—The Government of the Province is vested in a Lieutenant-Governor, the Council of Ministers, a Legislative Council consisting of 24 members appointed for life, and a Legislative Assembly of 90 members elected for five years to represent the 90 electoral districts of the Province.

Lieut.-Gov., Hon. Henry George Carroll...$10,000
Aide-de-Camp, Lt.-Col. J. D. Papineau.. *hon*

Executive.

Prime Minister and President of the Council and Attorney-General and Provincial Treasurer, Hon. L. A. Taschereau, K.C. $14,000
Lands and Forests, Hon. Honoré Mercier, K.C. 8,000
Agriculture, Hon. A. Godbout 8,000
Provincial Secretary, Hon. A. David, K.C. 8,000
Public Works, Hon. J. N. Francoeur, K.C. 8,000
Labour, Hon. A. J. Arcaud 8,000
Colonisation, Game and Fisheries, Hon. H. Laferté 8,000
Roads and Mines, Hon. J. E. Perrault, K.C. 8,000
Without Portfolio, Hon. E. Moreau; Hon. J. H. Dillon; Hon. L. Lapierre; Hon. N. Derodeau; Hon. George Bryson.

The Legislature.

Speaker, Legislative Council, (vacant) ... $5,000

Quebec—Hons. Hugues Fortier (*Chief Justice*); P. A. Choquette; Art. Fitzpatrick; J. H. Fortier.

Agent-General for Quebec in England, Hon. I. J. Lemieux, 2 Cockspur St., Trafalgar Square, S.W.1.

Finance.—The actual revenue for the year 1928-29 was $39,976,283 and the actual expenditure $35,964,487. The bonded debt (June 30, 1929) was $80,334,791 and the net funded debt $56,751,141.

Production and Industry.—The gross value of manufactured products in 1928 was $1,073,162,291 the principal manufacturing centres being (1928): Montreal ($554,311,571), Quebec ($44,608,105), Three Rivers ($45,441,169), Shawinigan Falls ($33,536,961), Valleyfield ($9,783,246), Sherbrooke ($19,009,741) and Hull ($11,705,232). The lumber industry is still by far the most important trade, but the settled portion of the country has been too much denuded of wood, and the provincial Government has found it necessary to organise an effective service of rangers to prevent the destruction of trees by forest fires. The forest lands cover an area of over 120,000,000 acres, of which 51,000,000 are under licence to cut timber. The wood pulp industry is assuming greater importance every year. Several large mills have recently been built, and during 1928 the production reached 2,018,566 tons, valued at £67,467,328. The Province produces more than half of the total output of the Dominion. In 1928, 1,628,872 tons of paper were manufactured, valued at $104,881,667 (mainly newsprint). Unimproved lands may be bought from the Government at 60 cents per acre, and the purchase-money paid in five instalments. The area of land subdivided for the purpose of settlement unsold on June 30, 1928, was about 8,250,000 acres. In 1928 the production of dairy industry products was cheese 45,183,970 lb. (valued at $9,438,302), and butter 52,526,248 lb. (valued at $19,975,556). In 1928 there were in the Province 351,206 horses, 1,964,346 cattle, 853,757 sheep, 813,309 swine, and 8,350,000 poultry.

Education.—The Superintendent of Education, assisted by a Council composed of a Roman Catholic and a Protestant Committee, each under a deputy head, is invested with the central control of Education. The schools, both Roman Catholic and Protestant, are maintained partly by local taxation and partly by Government grants. There were, in 1928, 8,145 schools with 611,783 scholars, including the high and superior schools and 20 normal schools supported by the State. There are also Schools of Agriculture, Dairying, Polytechnic, Fine Arts, Rangers', Historic Guides,' Blind and Deaf, Nursery, Commercial and Classical Schools, and four Universities—two Protestant (McGill University, Montreal, and Bishop's College, Lennoxville); and two Roman Catholic (Laval University, Quebec, and Montreal University).

Principal Cities.—CAPITAL, QUEBEC (population, 131,000), historic city visited annually by thousands of tourists, and one of the great seaport towns of Canada; and Montreal (population, 989,835), the commercial metropolis, and the principal centre of the Canadian grain export trade, situate at the confluence of the Ottawa and St. Lawrence Rivers. Ocean-going steamers ascend the St. Lawrence as far as Montreal. Other important cities are Hull (27,087), Sherbrooke (26,300), Trois Rivières (35,000), Verdun (46,477). Population figures from "Municipal Statistics of the Province of Quebec" (1928).

NOVA SCOTIA.

Area and Population.—NOVA SCOTIA is a peninsula between 43° 25′–47° N. lat. and 59° 40′–66° 25′ W. long., and is connected with New Brunswick by a low fertile isthmus about thirteen miles wide. It comprises an area (with Cape Breton Island) of 21,428 square miles (360 miles of which consists of lakes, rivers and inlets of the sea) with a total population, at the Census of 1921, of 523,837, an increase since the last census of 31,499 persons. Estimated population (1929) 550,000.

Government.—The Government is administered by a Lieutenant-Governor, aided by an Executive Council and a Legislative Assembly of 38 members.

Lieut.-Governor, His Honour Hon. Walter H. Covert, K.C. $9,000

Executive.

Premier and Minister of Public Works and Mines, Col. the Hon. G. S. Harrington, K.C. $7,000
Attorney-Gen., Hon. John Doull, K.C. 6,000
Highways, Hon. P. C. Black 6,000
Agriculture, Hon. O. P. Goucher 6,000
Provincial Secretary-Treasurer, Hon. J. F. Fraser, K.C. 6,000
Health, Hon. G. H. Murphy, M.D., C.M., ... 6,000
Ministers without Portfolio, Hons. Albert Parsons, Joseph McDonald.

The Legislature.

(Single Chamber.)

Speaker, House of Assembly, Hon. Daniel G. MacKenzie $1,500

The Judicature.

Chief Justice, Hon. J. A. Chisholm $10,000
Judge in Equity, Hon. R. H. Graham 9,000
Puisne Judges, Hons. H. Mellish, W. F. Carroll, V. J. Paton, H. Ross ..... each 9,000
Judge Vice-Admiralty Court, Hon. H. Mellish 1,000

Agriculture and Live Stock.—About 8,000,000 acres are fit for tillage, and the soil is of good average fertility. The climate is delightful, the winter being less severe than in most of the other parts of the Dominion. In 1930 there were about 5,000,000 acres of land occupied, of which about 735,000 acres were under crop, 3,000,000 acres in pasture and partially wooded lands, and about 70,000 acres in gardens and orchards. Fruit is extensively cultivated, and the estimated apple crop for 1930 was 1,200,000 barrels, the principal fruit belt being the Annapolis Valley. The products of the fields and orchards in 1930 were valued at $20,000,000. Improved farms of 100 to 250 acres, with house and buildings, may be obtained at from £100 to £1,000, whilst the Government offer uncleared Crown lands at $100 per 100 acres, or $1 per acre for any additional, not to exceed 150 acres in all. Through the Land Settlement Act, the Government gives practical assistance to skilled farmers. There is a Government agricultural college and experimental farm at Truro for men and women, and a well-equipped technical college at Halifax. In 1930 the live stock included 51,530 horses, 285,000 cattle, 289,621 sheep, 43,593 swine, and 1,145,983 poultry.

Manufactures.—In 1929 the gross value of the manufactures was $65,033,701. The capital invested was $117,526,491, and 16,568 hands were employed; the principal industrial centres being Sydney ($12,962,021) and Halifax ($10,700,999).

Fisheries.—The total value of the fisheries in 1927 was $9,500,000, and the number of persons employed was about 20,000.

Minerals.—Mine products in 1927 were valued at $35,980,000; the coal deposits are extensive and are estimated to last for 200 years. 6,445,042 gross tons were produced in 1930. Iron ores are plentiful, and extensive manufactures of iron and steel are carried on at Sydney and Sydney Mines, Cape Breton.

Principal Cities.—CAPITAL, HALIFAX (population 58,372), one of the terminals of the Canadian National Railway, with a magnificent harbour, is one of the principal winter ports of Canada, and the *entrepôt* of a large trade with the West Indies and South America. A shipyard for the building of large ocean-going steamers, with a dry dock, is one of the leading industries. Sydney in Cape Breton has a population of 22,545, and Glace Bay 17,007.

CAPE BRETON ISLAND.

Cape Breton Island, formerly a distinct Colony, now incorporated with Nova Scotia, contains an area of 3,975 square miles, with a population of about 130,000, inhabitants. The chief city, Sydney (pop. 22,545), on the eastern coast, has valuable collieries in the neighbourhood and is the site of the largest steel works in Canada. The Canadian National Railway connects the island with the mainland by rail ferry.

NEW BRUNSWICK.

Area and Population.—NEW BRUNSWICK is situated between 45°—48° N. lat. and 63° 47'—69° W. long., and comprises an area of 27,985 square miles, with a population in 1921 of 387,876, an increase since the last census of 35,987 persons. It was first colonised by British subjects in 1761, and in 1783 by the inhabitants of New England, who were dispossessed of their property in consequence of their loyalty to the British Crown.

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of 48 members elected by the people.

Lieutenant-Governor, Maj.-Gen. Hon. Hugh H. Maclean, K.C., V.D. $9,000

Executive.

Premier and Minister of Lands and Mines, Hon. C. D. Richards $3,500
Minister of Public Works, Hon. D. A. Stewart 3,000
Provincial Secretary and Treasurer, Hon. Antoine J. Leger 3,000
Agriculture, Hon. Lewis Smith 3,000
Health, Hon. H. I. Taylor, M.D. 3,000

Speaker, Legislative Assembly, J. Leonard O'Brien.

The Judicature.
Court of Appeal and Chancery Division.

Chief Justice, Hon. Sir J. Douglas Hazen, K.C.M.G. $10,000
Judges, A. S. White; W. C. H. Grimmer each 9,000

King's Bench Division.

Chief Justice, Hon. J. H. Barry $10,000
Judges, Hons. O. S. Crocket; A. T. Le Blanc; J. P. Byrne; J. B. M. Baxter each 9,000

Court of Vice-Admiralty.

Judge, Hon. Sir J. Douglas Hazen $1,000

Court of Divorce and Matrimonial Causes.

Judge, Hon. O. S. Crocket $500

Finance.—The ordinary receipts for 1927 were $4,933,029, and the ordinary expenditure $4,917,237.

Agriculture and Live Stock.—The total land area is 18,663,000 acres, of which 500,033 acres were under field crops in 1925. The total value of the field crops in 1927 was $18,413,500. The live stock (1927) included 216,679 cattle, 153,057 sheep, 77,307 pigs, 51,304 horses, and 954,093 poultry. Free grants of land are offered, and settlement encouraged. Improved farms are obtainable at reasonable rates. The fisheries include salmon, cod, mackerel, herring, and shad; value of the fisheries (1925) $4,798,589. In 1927 the cheese factories in operation produced 802,000 lb., and the creameries 1,885,262 lb. of butter.

Manufactures.—The gross value of the output of manufactured goods in 1924 was $67,456,026, the principal manufacturing centre being St. John ($26,552,152). The chief industrial pursuits arise from the produce of the forests and the fisheries. Natural gas has been found in immense quantities in Albert County, and the south-eastern section of the Province is remarkably rich in oil shales. Coal is found; also silver, lead, antimony, copper, iron, manganese, and other valuable minerals in considerable quantities.

Principal Cities.—CAPITAL, FREDERICTON: population (1921), 8,114. St. John (pop. 60,093) is one of the principal winter ports of Canada, and is connected by C.P.R. and Canadian National Railways with Montreal; Moncton (17,488).

MANITOBA.

Area and Population.—Manitoba, originally the Red River Settlement, is situated in about the centre of the continent, between 49°—60° N. lat. and 95°—101° W. long., with a total area of 251,832 square miles and a population (1926 Census) of 639,056, an increase since the last census of 28,938.

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council of 8 Ministers, who are members of the Legislative Assembly of 55 members, each in receipt of an annual sessional allowance of $2,000.

Lieut.-Governor, Hon. James Duncan McGregor $9,000

Executive.

Premier, President of the Council and Provincial Treasurer, Hon. John Bracken $8,000
Mines, Natural Resources, and Provincial Lands Commissioner, Hon. D. G. M. McKenzie 6,000
Public Works, Hon. W. R. Clubb 6,000
Provincial Secretary and Minister of Municipal Affairs, Hon. D. L. McLeod 6,000
Minister of Agriculture and Immigration and Railway Commissioner, Hon. A. Préfontaine 6,000
Education, Hon. R. A. Hoey 6,000
Attorney-General and Minister of Telephones and Telegraphs, Hon. W. J. Major, K.C. 6,000
Minister of Public Welfare, Hon. W. E. Montgomery, M.D. 6,000

The Judicature.

Court of Appeal:—
Chief Justice, Hon. J. E. Prendergast $10,000
Puisne Judges, Hons. R. M. Dennistoun, C.B.E., W. H. Trueman, H. A. Robson each 9,000
King's Bench:—
Chief Justice, Hon. D. A. Macdonald... 10,000
Puisne Judges, Hons. A. C. Galt, A. K. Dysart, J. E. Adamson, J. T. Kilgour, W. J. Donovan .....each 9,000

Finances.—The revenues of the provincial government for the year ended April 30, 1930, were $13,992,505, and the expenditures $13,802,934; bonded debt $87,701,771.

Agriculture and Live Stock.—The total land area in Manitoba is 148,432,640 acres, of which 6,794,700 acres were under field crops in 1930. The soil is fertile and productive. The value of field crops in 1930 was $54,463,000. The live stock included 359,943 horses, 735,546 cattle, 223,447 sheep, 271,653 swine, 5,658,658 poultry. The dairy output was 560,008 lb. of cheese ($92,401), 15,786,896 lb. of creamery butter ($4,657,134); the honey production was 10,110,128 lb., worth $909,912.

Manufactures.—The gross value of the manufactured products in 1929 was $164,909,127. The capital invested in the 923 manufacturing enterprises amounted to $173,152,948 and the hands employed 26,318; the chief industrial centres (1929) being Winnipeg ($125,321,028), St. Boniface $10,357,696), Brandon ($4,553,802), and Portage la Prairie ($734,513). In 1929 there were 4,294 miles of steam railway in the Province and 128 miles under construction.

Principal Cities.—CAPITAL, WINNIPEG; population 1931 (preliminary) 217,587, the third largest city in Canada. Other cities (1926), Brandon (16,443), St. Boniface (14,187), Portage la Prairie (6,513).

BRITISH COLUMBIA.

Area and Population.—British Columbia has a total area estimated at 355,855 square miles, with a population (Census of 1921) of 524,582; the Census of 1911 gave 392,480 (251,619 males and 140,861 females), an increase since the former Census of 213,823.

Government.—The Government consists of a Lieutenant-Governor and an Executive Council, together with a Legislative Assembly of 48 members.

Lieut.-Governor, Hon. J. W. Fordham-Johnson (1931) $9,000
Private Sec., A. M. D. Fairbairn 2,400

Executive.

Premier and Minister of Railways, Hon. S. F. Tolmie, P.C..... $9,000
Provincial Secretary and Commissioner of Fisheries, Hon. S. L. Howe..... 7,500
Attorney-General, Hon. R. H. Pooley, K.C. 7,500
Minister of Lands, Hon. N. S. Lougheed 7,500
Minister of Finance and of Industries, Hon. J. W. Jones 7,500
Minister of Agriculture, Hon. William Atkinson..... 7,500
Minister of Mines and of Labour, Hon. W. A. McKenzie 7,500
Minister of Public Works, Hon. R. W. Bruhn..... 7,500
Minister of Education, Hon. J. Hinchliffe 7,500
President of the Council, Hon. W. C. Shelly.
Without Portfolio, Hon. R. L. Maitland, K.C.
Speaker, Legislative Assembly, Hon. C. F. Davie.

The Judicature.

Court of Appeal—Chief Justice, Hon. J. A. Macdonald $10,000
Puisne Judges, Hons. A. Martin, W. A. Galliher, Albert E. McPhillips, M. A. Macdonald.....each 9,000
Supreme Court—Chief Justice, Hon. Aulay Morrison..... 10,000
Puisne Judges, Hons. D. Murphy, F. B. Gregory, D. A. McDonald, W. A. Macdonald, and A. I. Fisher.....each 9,000
Local Judge in Admiralty, Hon. Archer Martin 1,000

Agent-General in London, F. P. Burden, British Columbia House, 1 Regent Street, S.W.1.

Finances.—The receipts of the provincial government in 1929–30 were $26,083,727, and the expenditure $26,219,156.

Agriculture and Live Stock.—The agricultural production of British Columbia in 1930 was valued at $55 957,734. Live stock in 1930 included 65,086 horses, 404,289 cattle, 198,650 sheep, 66,182 swine, and 3,692,726 poultry. The butter output totalled 6,503,301 lb., valued at $2,096,933, and the cheese 564,837 lb., worth $197,343.

Production and Industry.—The gross value of the output of manufactures in 1929 was $276,850,914, the principal manufacturing centres being Vancouver, Victoria, New Westminster, and Prince Rupert. The yield of other industries was, in 1930: minerals, $55,391,993; forest products, $69,737,000; fisheries, $23,103,202. There are extensive coal measures, and a vast and compact area of merchantable timber; the mines have produced over $1,237,847,577, and are still in the early stages of development. Only one-tenth of the available agricultural and fruit lands is at present settled, and there are miles of pulpwood as yet unexploited. There are undeveloped deposits of magnetite and hematite iron. The climate is healthful and temperate. The principal exports are fish, coal, gold, silver, minerals, timber, fruit, pulp and paper.

Principal Cities.—CAPITAL, VICTORIA. Population 1931, 38,441. Other centres are Vancouver (245,307 in 1931), New Westminster (17,524), Prince Rupert (6,326).

PRINCE EDWARD ISLAND.

Area and Population.—Prince Edward Island lies in the southern part of the Gulf of St. Lawrence, between 46°–47° N. lat. and 62°–64° 30′ W. long. It is about 130 miles in length, and from 4 to 34 miles in breadth; its area is 2,184 square miles (rather larger than that of the English county of Norfolk), and its population (Census, 1921) 88,615 (47,069 males and 46,659 females in 1911), a decrease from the last census of 5,113 persons. The island was first settled by the French, who held it for many years as a fishing station. The British took it from them in 1745, but afterwards restored it; they seized it again, however, during the Seven Years' War (1756–1763) and compelled the greater part of the French inhabitants to leave, and from that time it has remained British.

Government.—The Government is vested in a Lieut.-Governor and an Executive Council, and a Legislative Assembly of 30 members elected by

the people, 15 as Councillors (with a property qualification) and 15 as Assembly-men (on general suffrage).

Lt.-Governor, Hon. Charles Dalton (1930) $7,000

Executive.

Premier and Attorney-Gen., Hon. James D. Stewart, K.C. 3,500
Minister of Public Works, Hon. Leonard MacNeill..... 2,000
Provincial Sec., Treasurer and Minister of Agriculture, Hon. G. Shelton Sharp 2,000
Education and Public Health, Hon. William J. P. MacMillan, M.D. 2,000
Without Portfolio, Hons. H. F. MacPhee; A. F. Arsenault; H. D. MacLean; W. G. Mackenzie; M. W. Wood.
Speaker, Legislative Assembly (vacant).
Assist. Provincial Sec.-Treas., and Clerk of Executive Council, H. R. Stewart..... 2,000

The Judicature.

Chief Justice, Hon. John A. Matheson ... $10,000
Assistant Judges, Hon. Aubin E. Arsenault; Hon. Albert C. Saunders ...each 9,000
Judge of Vice-Admiralty Court, William S. Stewart .....

Agriculture and Live Stock.—The value of the field crops in 1927 was estimated at $22,012,000. The soil consists for the most part of a rich red loam, uniform in character and peculiarly suited to the growth of grasses. Nearly the whole of the land is now cleared, and improved farms can be bought at from $20 to $60 an acre (including buildings), according to condition and locality. The breeding of silver black foxes in captivity is an established and profitable industry. There are about 600 fox ranches, conducted by incorporated companies and private partnerships or individuals. The live stock (*1927*) included 32,890 horses, 118,575 cattle, 89,616 sheep, 53,665 pigs, and 868,337 poultry.

Manufactures.—The gross value of the manufactures in 1926 was $4,290,149, against $2,326,708 in 1900.

Principal Cities.—CAPITAL, CHARLOTTETOWN (Pop. 12,347), on the shore of Hillsborough Bay, which forms a good harbour. Other towns are Summerside (3,228), Souris (1,094), and Georgetown (884).

ALBERTA.

Area and Population.—The Province of Alberta has an estimated area of 255,285 square miles, including about 2,360 square miles of water, with a population (1926) of 607,584 an increase since the 1921 Census of 19,130.

Government.—The Government is vested in a Lieutenant-Governor and Legislative Assembly composed of 60 members, elected for five years, representing 51 electoral districts into which the Province is divided. The Executive Council consists of eight members.

Lieut.-Gov., Hon. W. L. Walsh (1931) $9,000

Executive.

Premier and Provincial Secretary, Hon. J. E. Brownlee $8,500
Attorney-General, Hon. J. F. Lymburn ... 6,000
Public Works, Hon. O. L. McPherson 6,000
Provincial Treasurer and Minister of Municipal Affairs, Hon. R. G. Reid..... 6,000
Education, Hon. P. E. Baker 6,000
Agriculture and Health, Hon. George Hoadley 6,000
Railways and Telephone, Hon. Vernon W. Smith 6,000
Without Portfolio, Hon. Mrs. Irene Parlby
Clerk of the Executive Council, J. D. Hunt $5,000
Speaker of the Legislative Assembly, Hon. G. W. Johnston..... 2,500

The Judicature.

The Supreme Court of Alberta.

Appellate Division, Hon. Horace Harvey, (*C.J.*) $10,000
Judges, Hons. A. H. Clarke; C. R. Mitchell; H. W. Lunney; A. A. McGillivray .....each 9,000
Trial Division—Judges, Hons. W. C. Simmons (*C.J.*); W. C. Ives; T. M. Tweedie; J. R. Boyle; Frank Ford; A. F. Ewing .....each 9,000

Agriculture and Live Stock.—The total area in field crops, 1930, was 10,425,200 acres. The Department of Agriculture in the Provincial Government conducts free schools of agriculture at four points in the Province. Free homesteads are still available in many desirable localities. The value of the field crops in 1930 was estimated at $85,868,900; wheat, $51,831,000; oats, $11,691,000; hay and clover, $4,653,000; grain hay, $19,910,000; potatoes, $2,029,000; barley, $2,660,000. The live stock included 638,665 horses, 348,297 milch cows and 939,813 other cattle, 530,000 sheep, and 636,402 swine. The creamery butter made totalled 17,500,000 lb., valued at $4,856,250, and cheese 980,000 lb., valued at $166,600.

Finance.—Gross bonded Debt, March 31, 1930, $106,888,380; Net General Debenture Debt, $71,089,000. Revenue (1929–30) $15,829,865. Expenditure (1929–30), $15,402,884. Assessed valuation of land within the Province, $521,958,416.

Manufactures.—The gross value of the output in 1929 was $107,556,792, against $1,313,375 in 1900, the principal manufacturing centres being Calgary ($44,694,670) and Edmonton ($30,388,021).

CAPITAL, EDMONTON. Population (1926) 65,163; Calgary (65,513). Lethbridge, Medicine Hat, Red Deer, and Westaskiwin are the other principal cities of the Province.

SASKATCHEWAN.

Area and Population.—The Province of Saskatchewan lies between Manitoba on the east and Alberta on the west, and has an area of 251,700 square miles, the population at the Census of 1926 being 820,738, an increase of 63,228 persons since the Census of 1921.

Government.—The Government is vested in the Lieutenant-Governor, with a Legislative Assembly of 63 members. There is an Executive Council of ten members.

Lieutenant-Governor, Hon. H. E. Munroe, O.B.E., V.D., M.D. $9,000
Premier, President of Council, and Minister of Education and of Natural Resources, Hon. J. T. M. Anderson 9,000
Attorney-General, Hon. M.A. MacPherson, K.C., M.C. 7,200
Agriculture, Hon. W. C. Buckle 7,200
Provincial Treasurer, Minister of Municipal Affairs and Minister in Charge of Bureau of Publications, and King's Printer, Hon. Howard McConnell, K.C. 7,200
Public Works, Telegraphs and Telephones, Hon. James F. Bryant, K.C..... 7,200
Public Health and Child Welfare, Hon. F. D. Munroe, M.D. 7,200
Highways, Hon. A. C. Stewart, K.C..... 7,200

Provincial Secretary and Minister of Railways, Labour & Industries, Hon. J. A. Merkley $7,200
Without Portfolios, Hons. R. Stipe, M.D., W. W. Smith.
Speaker of the Legislative Assembly, Hon. Robert Sterritt Leslie.

The Judicature.

Chief Justice, Court of Appeal, Hon. Sir Frederick Haultain, *born* 1857 .....$10,000
Puisne Judges, Hons. W. F. A. Turgeon, J. McKay, W. M. Martin and P. E. Mackenzie ..... each 9,000
Ch. Justice, King's Bench, Hon. J. T. Brown 10,000
Puisne Judges, Hons. H. Y. MacDonald, H. V. Bigelow, J. F. L. Embury, C.M.G., G. E. Taylor, D. MacLean and W. E. Knowles.....each 9,000

Agriculture and Live Stock.—Saskatchewan is the largest wheat-producing province of the Dominion, and one of the most productive grain areas in the world. In 1930 the grain yield totalled 381,154,000 bushels. The approximate value of grain crops was $111,741,000, of field crops $9,084,000, livestock 19,293,000, poultry products $12,201,000, fur $1,133,000, and garden produce $1,500,000. The live stock included 1,077,234 mules and horses, 1,214,785 cattle 209,888 sheep, and 497,927 swine.

Industries.—The capital invested in manufacturing enterprises in 1930 was $45,000,000, and the value of the manufactured products $80,501,159, the principal industrial centres being Regina, Moose Jaw, Saskatoon and Prince Albert.

In 1930 there were 4,917 public elementary schools with 220,286 pupils and 9,000 teachers, and 19 Secondary schools with 8,148 pupils.

CAPITAL, REGINA. Population (1929), 67,000. Other large centres are Saskatoon (50,000), Moose Jaw (24,000). Prince Albert (10,000), Swift Current (5,500), North Battleford (6,200), and Yorkton (5,500).

TERRITORIES.

THE YUKON TERRITORY was constituted a separate political unit in 1898. It is governed by a Gold Commissioner and a Territorial Council of three elected members. The area of the Territory is 207,076 square miles. The population in 1921 was 4,157 (2,819 males and 1,338 females). Mining is the chief industry. The gold output for the year ending Dec. 31, 1930, was $659,394.

Gold Commissioner, Geo. Ian MacLean.
Judge, Hon. C. D. Macaulay.

THE NORTH-WEST TERRITORIES (1,309,682 square miles, population 12,000—including 7,100 Eskimo, and 3,800 Indians) comprise the territories formerly known as Rupert's Land and the North-western Territory (except such portions thereof as form the provinces of Manitoba, Saskatchewan and Alberta and the Yukon Territory) together with all British territories and possessions in North America and all islands adjacent thereto not included within any province, except the Dominion of Newfoundland and its dependencies. For administrative purposes the Territories were subdivided into the provisional districts of Mackenzie, Keewatin and Franklin. The Commissioner in Council has power to make ordinances for the Territories under instructions from the Governor-General in Council or the Minister of the Interior.

TERRITORIAL COUNCIL.

(Appointed by the Governor-General in Council.)
Commissioner, Hugh Howard Rowatt.
Deputy Commissioner, Roy Alexander Gibson.
Councillors, Charles Camsell; Oswald Sterling Finnie; Duncan Campbell Scott; Gen. J. H. MacBrien, C.B., C.M.G., D.S.O.
Acting Secretary, David Livingstone McKeand.

DOMINION OFFICIALS.

Director, O. S. Finnie, B.Sc., D.L.S., *Ottawa*.
Stipendiary Magistrate, Hon. Lucien Dubuc, *Edmonton*.
Public Administrator, (*Mackenzie District*) Egbert Owen, *Edmonton*; (*Franklin District*) W. M. Cory, *Ottawa*; (*Keewatin District*) (Vacant).

PHYSIOGRAPHY.

The Island of Newfoundland is situated between 46° 37'-51° 37' N. latitude and 52° 44'-59° 30' W. longitude, on the north-east side of the Gulf of St. Lawrence, and is separated from the North American Continent by the Straits of Belle Isle. The island is about 317 miles long and 316 miles broad, and is triangular in shape, with Cape Bauld (N.), Cape Race (S.E.), and Cape Ray (S.W.) at the angles. The coast is extremely rugged, and the coastal regions are mountainous, the north and east being cold during winter and early spring owing to the quantities of ice brought down from the Greenland seas. The interior is undulating and is covered with tolts (round hills) interspersed with lakes, rivers, and swamps, but containing many fertile valleys, where the climate is favourable to agriculture, and a great wealth of forests, mainly of spruce, fir, pine, and birch. The climate is salubrious, and the people are a strong, brave, healthy, hardy, industrious race. The thermometer seldom falls below zero in winter, and ranges in the shade in summer from 70° to 80°.

GOVERNMENT.

Newfoundland, the oldest English colony, was discovered by John Cabot on June 24, 1497; the first land seen was hailed as *Prima Vista*—the present Cape Bonavista. The island was afterwards visited (1500) by the Portuguese navigator Gaspar de Cortereal, and soon became the centre of an extensive fishing industry, with settlements of Portuguese, Biscayans, and French. In August, 1583, the island was formally occupied by Sir Humphrey Gilbert, in the name of Queen Elizabeth, and by the Treaty of Utrecht (1713) the whole island was acknowledged to be British. A Governor was first appointed in 1728, and in 1855 "Responsible Government" was accorded to the island.

The executive is entrusted to a Governor, appointed by the Crown, aided by an Executive Council, with a Legislature of two houses.

GOVERNOR.

Governor, His Excellency Sir John Middleton, K.C.M.G., K.B.E. (1928).....$15,000
Private Sec., Lieut.-Com. M. E. East, R.N..... 1,450

THE MINISTRY (NOV. 17, 1928).

Min. of Public Works, Richard Hibbs..... 4,000
Minister of Marine & Fisheries, H. B. Clyde Lake..... 4,000

LEGISLATURE.

The *Legislative Council* consists of not more than 25 members, appointed for life; the *House of Assembly* of 40 members, elected by the people for 4 years, every male British subject aged 21, and every female aged 25, being entitled to the franchise.

President of the Legislative Council, Hon. M. P. Gibbs..... $500
Speaker of the House of Assembly, A. J. Walsh 750

JUDICATURE.

Chief Justice, Hon. Sir W. H. Horwood ...$9,000
Assist. Judges, Hon. J. M. Kent, Hon. W. J. Higgins .....each 8,000
Registrar, Rt. Hon. Sir W. F. Lloyd, P.C., K.C.M.G., D.C.L., K.C.

DEFENCE.

Newfoundland contributed 11,922 men to the fighting forces of the Empire during the War, in addition to 3,000 enlisted in Canadian and other forces.

EDUCATION.

Education is denominational, and is assisted by Government. Primary and Secondary schools were attended in 1926 by 59,088 pupils. The Government grants in 1926 amounted to $977,590.

RELIGION.

At the Census of 1911 and 1921 the following statistics were obtained:—

Religion.	1911.	1921.
Roman Catholics.....	81,177	86,576
Church of England.....	78,616	84,665
Methodists	68,045	74 205
Presbyterians	1,876	1,876
Salvation Army	10,141	13.023
Various	2,767	2.688

FINANCE.

The revenue, expenditure and debt of Newfoundland are stated as under ($1 at par = 4*s.* 2*d.* or $4·86 = £1 sterling):—

Year.	Revenue.	Expenditure.	Public Debt.
	$	$	$
1926-27	8,932,435	10,533,408	72,017,932
1927-28	9,466,005	10,740,000	...
1928-29	10,025,649	11,132,822	85,477,106
1929-30	11,579,215	11,934,313	87,592,106

EXTERNAL TRADE.

Year.	Imports.	Exports.	Total.
	$	$	$
1913-14 ...	15,193,726	15,134,543	30,328,269
1927-28 ...	27,637,195	33,644,619	61,281,812
1928-29 ...	29,237,381	36,797,703	66,035,084
1929-30 ...	31.871,151	40,051,959	71,923,110

Chiefly distributed in 1929-30 as under:—

Country.	Imports from.	Exports to.
United Kingdom	$5,527,575	$8,647,948
United States	12,101,752	11,432,918
Canada.....	12,992,600	3,968,479
Portugal	15,440	2,157,404
Spain	132,995	2,748,547

The principal imports are flour, textiles, coal, hardware, and provisions; the principal exports are codfish, cod and seal oil, pulp and paper, herrings, seal-skins, tinned lobsters, iron pyrites, and other minerals; the total value of the fishery products in 1929-30 was upwards of $14,963,004.

PRODUCTION AND INDUSTRY.

The inhabitants are chiefly located on the coast-line of the shore and bays, nearly 10,000 being engaged in fishing—for cod in summer and seal fishing in winter and spring. Agriculture, mining, and lumbering are also engaging attention and affording means of employment, while large pulp and paper mills have been erected. The larger portion of the interior is practically in a state of nature, but the railways have opened up large tracts. A valuable discovery of copper has been made at Little Bay, about 200 miles from St. John's.

COMMUNICATIONS.

Railways.—There were 905 miles of railway open in 1926 and 47 miles of private line. The trans-insular line runs to Port-aux-Basques, *viâ* Exploits River and Bay of Islands, with branch connexions to Placentia, Bonavista, Bay de Verde, Hearts Content, Trepassey, the principal settlements in Conception Bay, and to Lewisporte (in Notre Dame Bay). Communication between various points on the coast and Sydney, C.B., is maintained by a fleet of 11 first-class steamers.

Posts and Telegraphs.—There were 885 post offices in 1930 (165 of which were also telegraph offices) and 75 telegraph offices additional, dealing with 8,500,000 letters and post-cards, 4,000,000 newspapers and books, and 688,644 parcels. 740 telephone stations are open, mostly in post offices. There are 4,830 miles of telegraph line and 1,200 miles of postal telephone wire. Postal revenue, $410,739; Customs duty collected, $210,540; telegraph revenue, $209,497.

Shipping.—On Dec. 31, 1930, the Mercantile Marine of Newfoundland consisted of 2,501 sailing vessels of 102,718 tons, and 255 steam and motor vessels of 41,670 tons. In 1929-30 the tonnage of vessels entered and cleared at Newfoundland ports was 3,375,499 tons, of which 1,820,223 tons were British.

TOWNS.

The CAPITAL, ST. JOHN'S (population 1930, 42,143; with suburbs, 58,811), contains two cathedrals, several banks, and numerous public buildings. Other towns are Harbour Grace (3,825), Bonavista (4,052), Carbonear (3,320), and Twillingate (3,217).

HIGH COMMISSIONER.

High Commissioner in London, D. J. Davies, C.B.E., B.Sc. (*Acting*). *Office*, 58, Victoria Street, S.W. 1.

LABRADOR.

Labrador, a dependency of Newfoundland, forms the most easterly part of the North American continent, and extends from Blanc Sablon, in the Straits of Belle Isle, on the south, to Cape Chidley, at the entrance to Hudson's Straits on the north. The boundary between Quebec and Labrador came up for settlement before the Judicial Committee of the Privy Council in Oct., 1926. By the judgment given in March, 1927, the boundary was defined as a line drawn due N. from the eastern boundary of Blanc Sablon as far as 52° N. Lat., and from thence W. along that parallel to the Romaine River, and thence N. along the east bank of that river and its headwaters to their source, and thence due N. to the crest of the watershed or height of land there, and thence W. and N. along the crest of the watershed of the rivers flowing into the Atlantic Ocean until it reaches Cape Chidley. The territory thus confirmed as under the jurisdiction of Newfoundland has an area estimated at 120,000 square miles. Labrador possesses valuable cod, herring, trout, and salmon fisheries. One of the grandest spectacles in the world is provided by the Grand Falls on the Hamilton River. The inhabitants are mainly Eskimos, engaged in fishing and hunting. There are no towns, but there are Moravian Mission stations at Makkovik, Hopedale, Nain, Okak, Hebron, and Killinek.

The Commonwealth of Australia.

* Exclusive of full-blood Australian Aboriginals, who are estimated at 60,000.

Australia was separated from the other great land surfaces at a remote period, and exhibits therefore some very archaic types of fauna and flora. It may be regarded as the largest island or the smallest continent, being surrounded by the following waters:—*North*, the Timor and Arafura Seas and Torres Strait; *East*, Pacific Ocean; *South*, Bass Strait (which separates Tasmania from the Continent) and Southern Ocean; and *West*, Indian Ocean. The total area of the Continent is 2,948,366 English square miles, the island of Tasmania having an area of 26,215 square miles, and making a total area for the States and Territories of 2,974,581 square miles. The coast-line of Australia is approximately 12,210 miles, and the geographical position of the Continent is between 10° 41'-39° 8' South latitude and 113° 9' 153° 39' East longitude; the greatest length East to West is 2,400 miles, and from North to South 1,971 miles. Its nearest distance to England is about 11,000 miles.

From a physical standpoint the continent of Australia is divisible into an eastern and a western area, the former containing a regular coast-line with a good harbourage, roadsteads, rivers, and inland waterways, and a greater development of fauna and flora; the latter a broken coast-line with estuaries rather than rivers, and but little inland water communication. The whole continent is, roughly speaking, a vast, irregular, and undulating plateau, part of which is below the level of the sea, surrounded by a mountainous coast-line, with frequent intervals of low and sandy shore on the north, west and south. The Great Barrier Reef extends parallel with the East coast of Queensland for 1,200 miles, at a distance of about 60 miles from the mainland. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex, and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the *strike* of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S.; and the tertiary formation to be found in the N., S., and W. develops in the S.E. into a gigantic tertiary plain, watered by the Darling and the Murray Rivers. Nearly all round the coast, however, and in eastern and south-eastern Australia, stretching far inland from the coastal range, is a fertile area devoted partly to agriculture, partly to dairying, while the inland districts particularly are admirably adapted to the rearing of sheep. The most extensive mountain system takes its rise near the S.E. point, and includes a number of ranges known by different names in different places, none of them being of any great height. The highest peak, Mount Kosciusko, in New South Wales, reaches an elevation of 7,328 feet. The principal rivers are the Murray, which debouches on the south coast, after receiving the waters of its tributaries the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the island; on the east coast, the Hawkesbury, Hunter, Clarence, Richmond, Brisbane, Mary, Burnett, Fitzroy, and Burdekin; on the west, the Swan, Murchison, Gascoyne, Ashburton, Fortescue, De Grey, and Fitzroy; on the north, the Drysdale, Ord, Victoria, and Daly; and the Roper, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria. Lakes are numerous, but nearly all are salt; the scarcity of the natural water supply has been, however, mitigated by successful borings and by the construction of large dams. The work of conserving the vast quantities of water which run to waste in the wet season is being vigorously prosecuted by a system of locks and weirs on some of the rivers. Minerals comprise gold, silver, copper, zinc, iron, and coal in large quantities, antimony, tin, gypsum, magnesite, osmiridium, opal, sapphires, &c., and there are abundant supplies of building stones, clays, &c. The potentialities of the country in regard to its supplies of metals and minerals have not yet been fully tested.

Climate.—The seasons commence about March 21 (Autumn), June 21 (Winter), Sept. 22 (Spring), and Dec. 22 (Summer). The climate is extremely dry, but, except in the tropical coast-land of the north, the continent is everywhere highly beneficial to Europeans, the range of temperature being smaller than that of other countries similarly situated.

GOVERNMENT.

The Government is that of a Federal Commonwealth within the British Empire, the executive power being vested in the Sovereign (through the Governor-General), assisted by a Federal Ministry of ten Ministers of State and such honorary Ministers who may be appointed thereto. The Commonwealth was constituted by an Act of the Imperial Parliament dated July 9, 1900, and was inaugurated Jan. 1, 1901. Under the Constitution the Federal Government has acquired and may acquire certain defined powers as surrendered by the States, residuary legislative power remaining with the States. Trade and customs passed under Federal control immediately on the establishment of the Commonwealth; posts, telegraphs and telephones, naval and military defence, lighthouses and quarantine on proclaimed dates. The Commonwealth also now controls such matters as old age pensions, patents and copyrights, naturalization, navigation, &c. The right of a State to legislate is not abrogated except in connexion with matters exclusively under Commonwealth control, but where a State law is inconsistent with a law of the Commonwealth the latter prevails to the extent of the inconsistency.

GOVERNOR-GENERAL.

Governor-General, His Excellency the Rt. Hon. Sir Isaac Alfred Isaacs, P.C., K.C.M.G. (1931) £10,000
Military Secretary, Capt. L. F. Bracegirdle, D.S.O., R.A.N.
A.D.C., Lieut. N. R. Forrest.

Executive Council.

(Oct. 22, 1929.)

Prime Minister, Minister for External Affairs, and Minister for Industry, Rt. Hon. James Henry Scullin, P.C.
Treasurer, Hon. Edward Granville Theodore.
Vice-Pres., Executive Council, Senator Hon. John Barnes .....
Attorney-General, Hon. Frank Brennan ...
Postmaster-General and Minister for Works, Hon. Albert Ernest Green.....
Minister for Markets and Transport, Hon. Parker John Moloney.....
Minister for Trade and Customs, Hon. Francis Michael Forde .....
Minister for Home Affairs, Hon. Arthur Blakeley .....
Minister for Health, and Minister for Repatriation, Hon. John McNeill .....
Minister for Defence, Hon. Joseph Benedict Chifley.....
Honorary Ministers, Hons. Senator John Joseph Daly, John Braidwood Dooley, Lucien Lawrence Cunningham .....

COMMONWEALTH OFFICES IN LONDON, Australia House, Strand, W.C. 2.

High Commissioner, Maj.-Gen. Hon. Sir G. de L. Ryrie, K.C.M.G., C.B., V.D. ...£2,250
Official Secretary and Financial Adviser, J. R. Collins, C.M.G., C.B.E. 1,550
Assistant Sec., H. F. Farrands 653
Defence Liaison Officer, T. Trumble, C.M.G., C.B.E. 1,550

Commissioner-General for Australia in America (vacant) .....
Official Secretary, D. McK. Dow, "Cunard Building," 25, Broadway, New York 784
Commercial Representative for Australia in Canada, L. R. McGregor, 36 Yonge Street, Toronto.

THE LEGISLATURE.

The Federal Parliament consists of a Senate and a House of Representatives. The *Senate* contains 36 members, six from each of the Original States, elected for six years by universal suffrage. The *House of Representatives*, similarly elected for a maximum of three years, contains members proportionate to the population, with a minimum of 5 Representatives for each State. The House of Representatives, 1931, is made up of 28 for New South Wales, 20 for Victoria, 10 from Queensland, 7 from South Australia, 5 each from Tasmania and Western Australia, and 1 (entitled to debate but not to vote) from the Northern Territory. Members of the Upper and Lower Houses receive £800 per annum, with travelling expenses.

President of the Senate, Hon. Walter Kingsmill.
Speaker, House of Representatives, Hon. Norman John Oswald Makin.

THE JUDICATURE.

There is a Federal High Court with a Chief Justice and 5 Judges, having original and appellate jurisdiction, subordinate to the Judicial Committee of the Privy Council.

Chief Justice, Hon. Sir Frank Gavan Duffy, K.C.M.G.....£3,500
Judges, Hon. George Edward Rich; Hon. Hayden Erskine Starke; Hon. Owen Dixon; Hon. Herbert Vere Evatt; Hon. Edward Aloysius McTiernan each 3,000
Court of Conciliation and Arbitration, Chief Judge, His Hon. George James Dethridge 3,000
Judges, Their Hons. George Stephenson Beeby; Edmund Alfred Drake-Brockman, C.B., C.M.G., D.S.O., V.D.....each 2,500
Federal Court of Bankruptcy, Judge, Hon. Lionel Oscar Lukin..... 2,500

DEFENCE.

Navy.

The Australian fleet consists of the Cruisers *Australia*, *Canberra*, *Brisbane*, *Adelaide*, 4 sloops, 5 destroyers, seaplane carrier, and several auxiliaries. The personnel of the fleet is mainly Australian in character, although still supplemented to some extent by Imperial officers and men. The sea-going forces of the Royal Australian Navy on February 15, 1931, consisted of 360 officers and 3,013 men. There is also a R.A.N. Brigade composed of members of the Citizen Naval forces.

Army.

From 1911 to 1929 the defence policy was based on the universal compulsory training of a Citizen Army, but from November 1st, 1929, the constitution of the forces on a voluntary basis was adopted. Under this system men from 18 to 40 years of age may be enlisted in the Militia Forces, and youths from 14 to 17 years in the Senior Cadet Corps. On April 30th, 1931, 31,282 were undergoing training.

Air.

The permanent strength of the Australian Air Force in April, 1931, was 104 officers and 788 airmen; and of the Citizen Air Force, 60 officers and 290 airmen. The Air Force and the Civil Aviation expenditure (excluding war services) for the year 1929-30 was £708,956.

FEDERAL FINANCE.

Years.	Revenue.	Expenditure	Payments to States.
	£	£	£
1926-27	75,541,760	73,008,785	8,262,912
1927-28	73,808,227	79,258,464	9,085,789
1928-29	74,894,799	77,253,774	9,036,638
1929-30	77,143,387	78,614,392	9,489,344
1030-31	60,566,920	80,324,539	11,112,615

The above particulars do not include the Interest payable on Loans to the States, which amounts are recoverable from the States concerned.

* In addition, the following amounts were spent from loans for War Purposes and for Works—1925-26 £9,273,588; 1926-27, £9,428,570; 1927-8, £8,638,838; 1028-70, £8,231,147; 1929-30, £5,291,533; and 1930 31, £1,588,820.

DEBT.

The total of the Public Debt for Commonwealth Purposes on June 30, 1931, was £388,718,545, including a War Loan from the British Government of £79,724,220, which is subject to a funding arrangement whereby the debt is to be extinguished about 1956 by annual repayments of 6%, of which £1 1s. 8d. per cent. is for reduction of principal. Adding the indebtedness of the States viz., £767,316,372, the total public debts of Australia amounted (June 30, 1931) to £1,156,034,917 (of which £559,136,013 was redeemable overseas) or £170 17s. 10d. per head of population.

Banking.—For the quarter ended June 30, 1931, the Australian liabilities of the Banks of Issue throughout the Commonwealth amounted to £338,444,936, and the Australian assets to £412,873,093. On March 31, 1931, there were 5,125,095 depositors in the Savings Banks, the amount of deposits being £192,871,506 (£29 14s. 6d. per head of population).

PRODUCTION AND INDUSTRY.

The estimated values of products :—

	1928-29.	1929-30.
Agricultural	£89,440,000	£77,109,000
Pastoral	116,733,000	86,483,000
Dairying, &c.	50,717,000	49,398,000
Forests and Fisheries	11,617,000	11,371,000
Mining	19,597,000	17,945,000
Manufacturing	159,759,000	149,184,000
	£447,863,000	£391,490,000

Agriculture and Live Stock.—The total land area is estimated at 1,903,732,240 acres, of which 21,929,721 were under cultivation in 1929-30.

Crops.	Acreage.	Produce. Bushels.
Wheat (*b*)	14,976,564	126,884,622
Oats	1,515,871	14,424,186
Barley	451,339	7,588,852
Maize	297,502	7,946,320
Hay	2,658,661	Tons 2,725,274
Sugar Cane	307,085	Tons 3,755,375

Live Stock.

	1928.	1929.
Sheep (*a*)	103,430,773	104,558,342
Cattle	11,300,757	11,202,134
Horses	1,942,753	1,845,614
Pigs	910,181	1,018,324

(*a*) Estimated number of sheep as at Dec. 31, 1930, 105,895,894.
(*b*) 1930 31, 28,213,463 acres, 212,638,669 bushels.

In 1929-30 Australia produced 937,956,816 lb. of wool (as in the grease), against 968,152,935 lb. in 1928-29; 299,080,545 lb. of butter; 30,172,538 lb. of cheese, and 70,101,981 lb. of bacon and hams.

Mines and Minerals.—In 1929 the value of gold produced was £1,814,457; silver and lead, £3,293,863; copper, £1,075,146; tin, £459,666; coal, £6,676,324; value of all minerals produced in 1929, £17,944,625. The production of gold in 1930 was valued at £1,931,972.

Manufactures.—In 1929-30 there were in Australia 22,700 industrial establishments, employing 419,194 hands; wages paid amounted to £84,717,033; value of plant and machinery, £127,627,691; of lands and buildings, £118,068,229; of materials used, £220,945,187; value added by manufacture, £156,364,432; and total value of final output, £390,912,373.

EXTERNAL TRADE.

Total Imports, 1929-30 ..... £131,081,320
Total Exports, 1929-30 ..... £125,127,148

Country.	Imports from 1929-30.	Exports to 1929-30.

Labour Statistics.—In 1930 there were 362 Trade Unions, with 855,757 members, of whom 120,000 were women. The estimated total number of employed persons over 20 years of age in 1930 was 1,313,000 males and 311,600 females. The number of unemployed members of trade unions averaged 19·3 per cent. Employers' Associations number 534, with membership of 134,669. Retail Price Index No. for food, groceries and rent (4 and 5 rooms) (6 Capital Cities) 1930 (base 1923-1927=1,000) 978; including clothing, fuel, light and other miscellaneous household expenditure (base 1923-1927 = 1,000) 975. Melbourne Wholesale Price Index 1930 (base 1911=1,000) 1,596. Nominal Weekly Wage Index No., Australia, males (base 1911 = 1,000 = 51*s.* 3*d.*) 1,887 = 96*s.* 9*d.* Number of industrial disputes in 1930 was 183, involving 54,222 persons in a loss of 1,511,241 working days and £1,592,342 in wages.

COMMUNICATIONS.

Railways.—Total length of Government (and private) railways open for general traffic at June 30, 1930, private lines being included in the totals and shown in parentheses:—

State.	Miles open.	
New South Wales	6,090	(116)
Victoria	4,738	(25)
Queensland	6,726	(279)
South Australia	3,939	(34)
Western Australia	4,842	(277)
Tasmania	821	(141)
Federal Capital Territory	5	—
Northern Territory	316	—
Total	27,477	872

The gross earnings of all Government lines in 1929-30 were £45,778,437, working expenses £37,996,145, and net earnings £7,782,292, being at the rate of 2*s.* 3*d.* per train mile, and representing a return on the total cost (£329,500,024) of 2·36 per cent., as against 3·43 per cent. in 1928-29. In 1929-30 passenger journeys numbered 363,823,000 and 31,101,000 tons of goods and live stock were carried, the train miles run being 69,775,000. The electrification of the Sydney suburban system is in progress.

Tramways.—There are 641 miles of tramways in Australia, 572 miles of which are of electric, 42 of steam, 26 of cable, and 1 of horse traction. Extensive conversions to electrical traction have been made and more are in progress. The several Governments control 409 miles; municipal authorities, 185 miles; and the remaining 47 miles are operated by private companies and individuals. The total capital cost of tramways at June 30, 1930, was £28,596,003. The revenue of electric tramways for the year 1929-30 was £7,844,511, working expenses £6,408,041, and net revenue £1,436,470, or 4·80*d.* per car mile. 71,817,247 car miles were run and 653,778,000 passenger journeys recorded.

Shipping.—The entrances and clearances of vessels engaged in oversea trade at the various Australian ports in 1929-30 were: entered, 1,522 (5,444,446 tons); cleared, 1,539 (5,499,681 tons). Of the vessels entered, 1,077 of 3,997,870 tons were under the British flag and 445 of 1,446,576 tons under foreign flags.

The total including local shipping entering the ports of the capital cities during 1929-30 was: Sydney 6,192 vessels of 8,940,535 tons, Melbourne 3,415 (7,030,192), Brisbane 1,151 (3,607,591), Adelaide 2,958 (4,697,886), Fremantle 788 (3,754,409), and Hobart 586 (891,368). At December 31, 1930, there were 2,386 vessels of a total net tonnage of 377,384 on the shipping registers of the several States.

Posts and Telegraphs.—In year ended June 30, 1930, there were 8,507 post offices; there were 9,317 telegraph stations, with 160,414 miles of wire, transmitting 15,724,246 telegrams, receiving 718,339 and dispatching 781,982 cablegrams. A Beam wireless station, giving a service to and from Great Britain, was opened for traffic in April, 1927. At the end of year 1929-30, 520,169 *Telephones* were connected with 6,094 telephone exchanges; approximately 420,640,000 "local" and 35,388,715 "trunk line" calls were recorded for the year. 311,632 wireless broadcasting listeners' licences were issued in 1929-30.

Motor Vehicles.—At June 30, 1930, there were 656,314 motor vehicles registered in the several States. These comprised 466,930 cars, 84,897 motor cycles, and 104,487 commercial vehicles; revenue derived from motor registration fees and motor tax, &c., in 1929-30 was £4,524,898. Motor omnibus services are extensively operating in urban areas.

Civil Aviation.—220 aeroplanes of various types were registered with the Department of Civil Aviation at June 30, 1930. During the year 128,916 flights of a total duration of 42,963 hours were effected: 3,234,307 miles were flown, and 104,216 passengers carried. On the subsidized aerial mail routes 29,205 lbs. of mail were carried: Western Australia, 25,649 lbs.; Queensland, 2,735 lbs.; and 821 lbs. on Adelaide (S.A.) and Cootamundra (N.S.W.) and branch services. Three subsidized companies are now operating machines over approved routes (approximately 5,900 air miles), while several unsubsidized companies have commenced commercial services over additional routes totalling 2,260 miles.

CAPITAL.—CANBERRA, in the Federal Capital Territory, transferred to the Commonwealth by N.S.W. on Jan. 1, 1911, has been laid out as the capital of the Commonwealth. At the latest available date the population of the Federal Capital Territory amounted to 8,459, of which 7,290 were living in Canberra.

THE NORTHERN TERRITORY.

The Northern Territory has a total area of 523,620 square miles, and lies between 129°–138° East longitude as far as 26° South latitude. The administration was taken over by the Commonwealth on January 1, 1911, from the government of the State of South Australia, and the divisions into territories, known respectively as *North Australia* and *Central Australia*, were abolished in 1931—a reversion to the position as it existed prior to such divisions on February 1, 1927. The headquarters of the Administrator are at Darwin in the far north, a Deputy Administrator being stationed at Alice Springs in the south, to exercise all the powers and functions of the Administrator in that portion of the Territory situated south of 20° S. lat., except the power to fix the commencement of Ordinances, and to make regulations under Ordinances in force in the Northern Territory. As the administrative system obtaining from February 1, 1927, to June 12, 1931, has thus been continued, the residents of that part of the Territory south of 20° S. lat. are no less favourably placed than hitherto. The population of the Northern Territory as at June 30, 1931, was 4,193 (exclusive of full-blooded aboriginals).

Agricultural development is increasing both in the number of individual landholders and the acreage under crop. The success of peanut growing during the last two years is mainly responsible for the improvement, and it is believed to presage a definite era of agricultural *progress in the Territory. This applies to the* land situated north of 20° S. lat. Agriculture is practically negligible in that part south of 20° S. lat. Agricultural leases are granted in perpetuity at nominal rentals, which are subject to re-appraisement every 21 years. They may be converted to freehold at any time after commencement of lease, subject to easy and liberal conditions. Most tropical products can be grown, and the potentialities for pig raising and bacon curing are excellent. The staple industry is pastoral: cattle raising north of 20° S lat. and cattle, horse, and sheep raising south of 20° S. lat. Until railways are constructed, however, little, if any, improvement is expected in the pastoral industry in that part north of 20° S. lat., owing to the distance between the eastern and southern Australian markets. The position south of 20° S. lat. is more hopeful, as a result of the extension of the railway from the Adelaide (South Australia) market to Alice Springs. The whole of the Territory is capable, under proper conditions, of carrying successfully and profitably a great expansion of the beef cattle industry. There are vast areas of magnificent country which could be so utilised. From the Queensland border to the Western Australian border, a distance of over 600 miles, there are many thousands of square miles of country splendidly grassed and growing edible shrubs. The chief rivers are Victoria, Adelaide, Daly, Roper, Liverpool, Goyder, McArthur, and the Robinson. The first five are navigable, from 40 to 100 miles from their entrance, for boats drawing 4 feet. Pearl fishing is carried on round the coast, the shell being of good quality. There are considerable mineral resources, gold, silver, lead, tin and mica being indicated, and when communications are opened up the industry will become important. The only railway is from Darwin to Birdum (315 miles).

Darwin, North Australia, occupies an elevated site 80 feet above high-water mark, overlooking Port Darwin. Alice Springs, Central Australia, is situated in the MacDonnell Ranges, and boasts a splendid climate.

Administrator of Northern Territory, Col. R. H Weddell..... £1,200
Secretary and Accountant, L. H. A. Giles... 770
Judge Supreme Court, R. I. D. Mallam ... 1,000

Deputy Administrator of Central Australia, V. G. Carrington..... 600

PAPUA.

The Territory of Papua, which was placed under the authority of the Commonwealth of Australia in 1906, comprises a part of the New Guinea mainland situated between the meridians of 141° and 150° 50′ E. longitude, and between the 5th and 12th parallels of South latitude; also the Trobriand Group of islands, Woodlark, the d'Entrecasteaux Group, the Louisiades, the Conflict Group and the Laughlan Group. The total area of Papua is 90,540 sq. miles, of which 87,786 are on the mainland. There is an Executive Council of nine members who, with five non-official members, form the Legislative Council. The white population in 1931 was 1,128. The official estimate of the native population is 275,000. On Dec. 31, 1930, 58,902 acres were under crops (47,837 coco-nuts, 9,075 rubber, 750 sisal hemp and 348 coffee). Owing to heavy rainfall Papua is well watered in most parts and possesses a large number of streams. The best known rivers are the Fly (650 miles long and navigable by steam launch for 500 miles) and the Purari. The climate is favourable to the cultivation of tropical products.

TERRITORY OF NEW GUINEA.

The part of "German New Guinea" over which Australia was given a mandate is situated in latitude between the Equator and 8°S., and in longitude between 141° E. and 156° E. It consists of the N.E. portion of New Guinea to 141° E. (70,000 sq. miles), Bismarck Archipelago including New Britain, New Ireland, and islands adjacent to both (19,200 sq. miles), and the two northernmost Solomon Islands (4,100 sq. miles) (Bougainville and Buka). The principal river in N.E. New Guinea is the Sepik, which is navigable for 250 miles.

The climate is hot and moist along the coast, with a steady drop as the higher altitudes are reached. It is suitable to the growth of all tropical products. In 1929–30 there were 204,000 acres under crops (coco-nuts, 198,000). The white population in 1930 was 2,663; the native

population in 1930 was 400,135, including 30,130 working under indentures. (Natives living in areas not under complete Government influence are not included in the above total, as no reliable estimate can be made.)

NORFOLK ISLAND.

This island is about 930 miles from Sydney and 400 miles from New Zealand. It is about five miles in length by three in breadth, and was discovered by Capt. Cook in 1774. Its area is 8,528 acres and circumference 20 miles. The climate is mild, with a mean temperature of 68° and an annual rainfall of 55 inches. The descendants of the mutineers of the *Bounty* were brought here from Pitcairn Island in 1856. The population in July, 1931, was approximately 1,000.

Administrator, Col. A. J. Bennett, C.M.G., D.S.O., V.D.
President Executive Council, E. C. Robinson.

States of the Commonwealth.

I.—NEW SOUTH WALES.

The State of New South Wales is situated almost entirely between the 29th and 37th parallels of S. lat. and 141st and 154th meridians of E. long., and comprises an area of 310,372 square miles (inclusive of 940 square miles of Federal Territory)—*i.e.*, more than five times that of England and Wales, and over three times the size of Great Britain and Northern Ireland.

POPULATION.—The estimated population at 31st March, 1931, was: Males, 1,272,928; Females, 1,233,158. Total, 2,596,086.

Births, Deaths, and Marriages.

Year.	Births.	Deaths.	Marriages.
1924	53,670	20,821	18,078
1925	54,615	20,823	18,522
1926	53,126	22,188	19,219
1927	53,858	22,770	20,052
1928	54,800	22,694	20,076
1929	52,672	24,615	19,535
1930	52,136	21,252	17,383

Vital Statistics—Annual rate per 1,000 of population in 1930:—Births, 20·94; Deaths, 8·54; Marriages, 6·98. Deaths under 1 year per 1,000 births, 49·8.

Religions.

All religions are free. There is no State Church. About three-fourths of the people are Protestants, the members of the Church of England in New South Wales, according to the Census of 1921, number 1,027,410; Roman Catholic 502,815, Presbyterian 219,932, Methodist 181,977, Congregational (Independent) 22,235, Baptist 24,722, Salvation Army 9,490, and Hebrew 10,150.

PHYSIOGRAPHY.

The Eastern or coastal district is traversed by the Great Dividing Range, the various portions of the Range in N.S.W. being (from N. to S.) Macpherson, New England, Liverpool, Main or Blue Mountain, Cullarin, Gourock, Monaro and Muniong Ranges—the highest points being Mount Kosciusko, 7,328 feet, and Townsend, 7,266 feet. The eastern or coastal district is watered by the Tweed, Richmond, Clarence, Bellinger, Nambucca, Macleay, Hastings, Camden Haven, Manning, Wollomba, Hunter, Hawkesbury, George, Shoalhaven, Clyde, Moruya, Tuross, Bega, Towamba, and Snowy Rivers. The western portion of the country is not so well watered, but immense reservoirs are being constructed for irrigation purposes, and there are many artesian bores. The Darling, 1,609 miles, and the Murrumbidgee, 981 miles, are both tributaries of the Murray, which has a total length of 1,609 miles, 1,203 miles forming part of the boundary between the States of New South Wales and Victoria. Other inland rivers are: Lachlan, Bogan, Macquarie, Castlereagh, Namoi and Gwydir.

Climate.—New South Wales is situated entirely in the Temperate Zone. The climate is dry and very healthy. At the capital (Sydney) the average mean shade temperature is 63·2°. The mean temperature in the shade for the north coast is 66° to 70°, south coast 56° to 63°, northern tableland 57° to 60°, southern tableland 46° to 58°; north-western slopes, the mean annual temperature ranges from 62° to 65°; in the Central-western slopes 58° to 64°, south-western slopes 60° to 63°, and in the Western Plains and Riverina Division from 63° to 69°. The Seasons are as follows: Spring during September, October and November; Summer during December, January, and February; Autumn during March, April, and May; Winter during June, July, and August.

GOVERNMENT.

New South Wales was first colonised as a British possession in 1788, and after progressive settlement a partly elective legislature was established in 1843. In 1855 "Responsible Government" was granted, the present Constitution being founded on the Consolidating Act of 1902. The executive authority is vested in a Governor (appointed by the King), assisted by a Council of Ministers.

GOVERNOR.

Governor of New South Wales, His Excellency Air Vice-Marshal Sir Philip Woolcott Game, G.B.E., K.C.B., D.S.O., *born* 1876 (1930) £5,000
Official Secretary, H. S. C. Budge, C.M.G.
Private Secretary, Brig.-Genl. A. Anderson, C.M.G.
Lieutenant-Governor, Hon. Sir Philip Street, K.C.M.G., *born* 1863.

EXECUTIVE COUNCIL.

H.E. the Governor presides:

The Ministry:

A new Labour Cabinet was formed Nov. 4,

1930, and reconstructed from June 17, 1931, as follows:—

Premier and Treasurer, J. T. Lang.
Mines and Labour, J. M. Baddeley.
Attorney-General, J. Lamaro.
Agriculture and Forests. W. F. Dunn.
Colonial Secretary, M. Gosling.
Education, W. Davies.
Lands, J. M. Tully.
Justice, W. J. McKell.
Public Works, M. A. Davidson.
Health, W. T. Ely.
Local Government, J. McGirr.
Vice-President of Executive Council, J. M. Concannon, M.L.C.

Allowances, amounting in the aggregate to £19,907 per annum, are payable to members of the Ministry.

These allowances, also all salaries and allowances shown below, have been reduced, under the Public Service Salaries Reduction Act (No. 2), 1931, for a period of twelve months from August 5, 1931, by an amount arrived at by deducting sums ranging from 15 per cent. on the portion of salary below £200 to 32½ per cent. on that portion of salary which exceeds £1,500.

AGENT-GENERAL IN LONDON.

Agent-General in London, The Hon. A. C. Willis, M.L.C., Australia House, Strand, W.C. 2 (*and allowance*, £800) £1,850
Secretary and Commercial Officer, J. W. Ferguson, I.S.O., J.P. (*and allowance*, £100) 730

THE LEGISLATURE.

Parliament consists of two Houses, the Legislative Council and the Legislative Assembly. Members of the *Legislative Council* (86 in August, 1931) are appointed by the Crown for life. Members are not entitled to remuneration, but travel free on the State railways and tramways. The *Legislative Assembly* consists of 90 members. Each member of the Legislative Assembly receives £743 15*s.* per annum, and members travel free over the Government railways and tramways in the State, and are provided with official stamped envelopes for the free transmission of correspondence through the post. The Women's Legal Status Act, 1918, removed disqualification regarding the election of women to be members of the Legislative Assembly. Natural-born or naturalised persons 21 years of age, who have resided 6 months in the Commonwealth, 3 months in the State and one month in the electoral district, are entitled to the franchise. At the State General Election in October, 1930, there were 719,999 male and 710,649 female electors, making a total of 1,430,648 enrolled and qualified to vote; of these 1,356,423, or 94·94 per cent., voted.

President of the Legislative Council, Professor Hon. Sir J. B. Peden, K.C.M.G., LL.B., K.C. £1,020
Chairman of Committees, Legislative Council, Hon. B. B. O'Conor, LL.B. 595
Clerk of the Parliaments, W. L. S. Cooper 913
Speaker, Legislative Assembly, Hon. Francis Michael Burke..... 1,423 15*s.*
Chairman of Committees, Legislative Assembly, Major H. J. Connell, D.S.O., M.C..... 947 15*s.*
Clerk of Assembly, W. R. McCourt..... 1,140
Librarian, J. J. Quinn 819
Principal Shorthand Writer, E. W. Hine £867
Sec., Standing Committee on Public Works, Arthur Hurley 707
Leader of Opposition, Hon. T. R. Bavin, K.C., B.A., LL.B. (in addition to allowance as M.P.) 250

THE JUDICATURE.

The judicial system includes a Supreme Court (with a Chief Justice and eight Puisne Judges), Land and Valuation Court, Industrial Commission, District Courts, Workers' Compensation Commission, Courts of Quarter Sessions, Petty Sessions and Children's Courts and Fair Rents Courts. Trial by jury has been in force since 1824.

Supreme Court.

Chief Justice, Hon. Sir P. W. Street, K.C.M.G. £3,500
Puisne Judges, Hon. D. G. Ferguson; Hon. J. M. Harvey; Hon. A. G. F. James; Hon. L. M. L. Owen, C.B.E.; Hon. R. H. Long Innes; Hon. C. G. W. Davidson; Hon. P. Halse Rogers; Hon. E. Milner Stephen ..... each 2,600

Industrial Commission of New South Wales.

President, His Honour Mr. Justice Piddington £3,000
Members, His Honour Mr. Justice Street, £2,600; His Honour Mr. Justice Cantor 2,600
Land and Valuation Court Judge, His Honour Mr. Justice Herbert Pike..... 2,600
Ch. Judge in Equity and Probate Judge, Hon. J. M. Harvey..... 2,600
Judge in Divorce and Matrimonial Causes, Hon. L. M. L. Owen, C.B.E. 2,600
Judge in Bankruptcy, Hon. R. H. Long Innes 2,600

District Courts.

His Honour Judge White, His Honour Judge Armstrong, His Honour Judge Mocatta, His Honour Judge Edwards, His Honour Judge Coyle, His Honour Judge Thomson and His Honour Judge Curlewis, His Honour Judge Sheridan each £1,500

(The several District Court Judges are also Chairmen of the Courts of Quarter Sessions and Judges of the Court of Review within their respective districts, and Judges of the Court of Marine Inquiry.)

Crown Solicitor, John Ernest Clark ....?.... 2,000
Workers' Compensation Commission Chairman, His Honour Judge Perdrian 1,500

EDUCATION.

Education.—Education is compulsory between the ages of 7 and 14 years. It is non-sectarian and free at all State schools. The total enrolment in 1930 in 3,217 State schools was 380,645, and the average daily attendance 314,052. In addition to the State schools there were in 1930, 748 private colleges and schools, with 93,034 scholars, exclusive of many business and shorthand schools. The University of Sydney, with which 6 colleges are affiliated, including two Women's Colleges, was incorporated in 1850, and had 2,824 students (2,048 male and 776 female) in 1930. The State expenditure on Education was £5,349,298 in the year ended June 1930. The individual students at State Technical classes numbered 15,819 in 1930, and many attended at the State Agricultural College and Farms.

FINANCE.

Year ended June 30	Revenue, including Advances repaid.	Expenditure, including Transfers and Advances.	Funded Public Debt.
	£	£	£
1927	44,149,566	42,690,634	227,724,466
1928	44,198,972	45,293,968	245,247,907
*1929	20,703,940	20,110,771	256,791,944
*1930	19,750,801	21,130,064	259,589,967
*1931	17,422,051	20,296,315	.....

Banking, &c.—There were (June 30, 1931) 16 banks, with total assets within New South Wales £160,123,887, including advances, &c., and Government securities £136,353,383; coin, bullion, Australian Government Notes, and cash with Commonwealth Bank, £16,830,492; and liabilities, £130,993,404, including deposits, £121,353,095. The savings bank deposits on March 31, 1931, amounted to £70,773,167 in 1,400,216 accounts; there were in addition Inoperative (under, £1), Special Thrift, and School Savings Bank accounts, which numbered 461,810, the total amount at credit being £277,984, included in total amount of deposits above. The amount assured in New South Wales in *Life Assurance* Societies in 1930 was £117,414,820 Ordinary, and £28,520,789 Industrial. The membership of *Friendly Societies* was 252,086, and the funds at June 30, 1930, were £4,000,944. Members of *Trade Unions* numbered 315,840, the funds of 190 Unions at Dec. 31, 1930, being £375,748.

Co-operative Societies.—There were 370 registered societies in existence at June 30, 1930. During the year ending on that date the sales of 92 rural societies amounted to £14,769,572, and the sales of 47 trading societies amounted to £3,553,038. Building Societies advanced £747,316 to members.

Shipping.—Excluding coastal trade, 2,623 vessels entered ports of N.S.W. during the year ended June 30, 1930. For the year ended June 30, 1931, the shipping entries at Sydney, including State coastal, were 5,982 vessels of 8,468,282 net tonnage. The dock accommodation at Sydney includes four large graving docks, five floating docks, and seven patent slips. At Newcastle there are five patent slips.

Motor Vehicles.—At June 30, 1930, there were 154,096 registrations of motor-cars in force, and 68,907 of other motor vehicles.

Railways.—The railways and tramways of New South Wales, with the exception of a few short lines, representing about 113 miles, are controlled by the State. At June 30, 1930, the mileage of the State railways open for traffic was 5,974, the capital cost amounted to £126,318,236, and the net earnings for the year 1929–30 to £2,864,269. There were also 211 miles of State tramways, the capital cost being £11,764,974, and the net earnings £277,906.

Roads and Bridges.—A Main Roads Board, of two engineers with special knowledge of road construction and a president, was constituted in 1924. Municipal councils are assisted in the construction and maintenance of the main highways with the object of developing vacant lands, feeding the railways, and giving primary producers access to markets and providing better facilities for motor traffic. There are 112,595 miles of roads in New South Wales. At June 30, 1927, bridges over 20 ft. span numbered 4,972, the total length being 404,281 feet. The total expenditure other than on Sydney Harbour Bridge, in 1929–30 was £4,939,199 (including loan moneys expended by Main Roads Board). The construction of an arch bridge over Sydney Harbour is in course of erection, and will be completed early in 1932. This bridge will carry a roadway 57 ft. wide, two footways each 10 ft. wide, and four lines of railway. At mean high water there will be a headway of 172½ feet. At June 30, 1930, the Government expenditure in connection with the bridge amounted to £6,463,943. Of this sum £1,212,361 had been expended on resumptions and £1,139,265 on approaches.

Posts, Telegraphs and Telephones.—The postal, telegraphic, and telephonic services are administered by the Commonwealth Government. At June 30, 1930, there were 2,676 post offices in New South Wales. The postal matter carried during 1926–27 (the latest year for which the information is available) included 352,038,712 letters and postcards, 81,395,900 newspapers, 66,164,500 books, packets and parcels. During the year ended June 30, 1930, 6,842,976 telegrams and cablegrams were transmitted, exclusive of telegrams from other States of the Commonwealth of Australia. The telephone line connections numbered 150,606.

TRADE.

The oversea imports into New South Wales during 1930–31 were valued at £26,288,111, and the oversea exports were £31,376,904.

PRODUCTION AND INDUSTRY.

Agriculture is one of the principal industries of New South Wales; 5,499,408 acres, excluding 1,538 acres double-cropped, were under cultivation during the year ended June 30, 1930, producing 34,407,000 bushels of wheat, 3,035,850 bushels of maize, 2,528,610 bushels of oats, besides other kinds of grain, with 23,907 tons of potatoes, 686,962 tons of hay, and 1,934 cwt. of dried leaf tobacco. Sugar-cane to the extent of 174,110 tons was crushed; and 1,933,709 gallons of wine, 117,120 cases of bananas, and 28,403 dozen of pineapples obtained; almost every kind of fruit and vegetable is grown. The estimated total area under wheat in the year 1930–31 was 5,664,600 acres, of which 5,123,100 acres were harvested for grain, and 519,900 acres for hay, and 21,600 acres were fed off. The estimated production of wheat was 65,811,000 bushels of grain and 670,750 tons of hay.

Land Alienation.—The total extent of land alienated and in process of alienation on June 30, 1930, was 67,509,292 acres, while the area of land held under lease, &c., was 113,726,396 acres, and the balance, 16,800,812 acres, consisted of reserve and other lands neither alienated nor leased; the total area of the State, exclusive of Federal Capital area (Canberra), being 198,036,500 acres.

Live Stock.—The country is admirably adapted for sheep-farming, and several breeds of sheep are depastured, including the celebrated merino, which was introduced in 1797. On June 30, 1930, there were 534,945 horses, 1,039,949 dairy cows, 1,646,183 other cattle, total cattle 2,686,132: 48,720,000 sheep, 323,499 swine, 16,651 goats, and 554 camels. A preliminary estimate of the

*The figures relating to revenue and expenditure for the years 1929, 1930 and 1931 are not comparable with previous years, the Metropolitan Water Board being excluded from Consolidated Revenue from April 1, 1925; other Business Undertakings from July 1, 1928.

number of sheep at December 31, 1930, is 49,870,000. In 1929–30, 459,970,000 lb. (stated as in the grease) of wool were produced, 105,022,384 lb. butter, 6,345,785 lb. cheese, and 21,616,472 lb. bacon and ham. The production of wool in 1930–31, according to a preliminary estimate, was 430,000,000 lb. During 1929–30 there were 126,271 persons permanently engaged in rural industries, 116,423 being males, and 9,848 females.

Values of Rural Industries.—The agricultural production was valued in 1929–30 at £15,438,000, dairying and farm-yard produce at £14,796,000, and pastoral production at £28,511,000, a total of £58,745,000.

Forests, Fisheries and Trapping.—The value of these industries in 1929–30 was £4,131,000, and 6,303 persons were engaged.

Mining Industry.—The goldfields were opened in 1851. The principal minerals are coal, copper, silver, lead, zinc, tin, iron, opal and platinum. The total value of minerals won during 1930 was £9,781,606, exclusive of Portland cement £926,792, lime £52,365, and coke £589,343, coal accounting for £5,193,032, silver, silver lead and ore £2,088,790, and gold £53,066. The value of the mining plant and machinery was £7,608,630. The mining industry gave employment to 25,010 persons during the year.

Factories.—In 1929–30 there were 8,208 factories; the employees numbered 167,690, of whom 125,769 were males and 41,921 females, the amount of £34,875,995 being paid in salaries and wages. Male workers, exclusive of working proprietors, received on an average an amount of £252 13*s.* 0*d.* during the year and females £111 16*s.* 7*d.* The capital value of land, buildings and fixtures amounted to £53,785,319, and of plant and machinery £53,515,368. The full capacity of the machinery was 1,304,964 h.p., including steam, 868,526 h.p.; gas, 15,400 h.p.; electricity, 373,893 h.p.; water, 19,218 h.p.; oil, 27,927 h.p. The power actually used was, on the average, 782,526 h.p. The value of output was £167,250,618; materials used, £94,364,658, and fuel consumed (including motive power rented), £6,038,350; the production, *i.e.*, value added to raw materials, was £66,847,610. There are large iron and steel works at Newcastle, Lithgow and Port Kembla.

The total value of the production of the primary industries in 1929–30 was £70,375,000, making, with factory production, a total for all *industries (as far as it is recorded)* of £137,223,000, which is equal to £55 7*s.* 7*d.* per head of population.

Local Government.

For purposes of Local Government, with the exception of an area of 125,950 sq. miles in the sparsely-populated western division, the State is divided into 181 municipalities and 138 shires, governed by councils which are elected triennially. The councils are empowered to levy rates on the value of land, to float loans, to acquire land and works, to construct and maintain streets, jetties, wharfs, &c., to make regulations regarding cattle slaughtering, maintenance of public places, traffic, street and road lighting, public health and safety, management of parks, &c.

The basis of rating is mainly on the unimproved capital value of land, which in 1929 was £211,354,336 in municipalities, including the city of Sydney, and £166,657,924 in shires.

The total income of the municipal bodies was £14,821,211, and the expenditure on works and services, &c., £14,794,988.

Towns.

Sydney, the chief city and capital, stands on the shore of Port Jackson, with a water frontage of 188 miles; the depth of water at the Heads is not less than 80 feet, and at the wharves from 30 to 50 feet. There are extensive plants for loading ships, and for storing and loading grain in bulk; also for replenishing coal and oil bunkers. For 13 miles Sydney Harbour extends inland, the finest harbour in the world, and is surrounded by scenery of surpassing beauty. The principal wharves are situated in close proximity to the business centre of the city. The total area of water in the port is 14,284 acres, or about 22 square miles, of which 3,000 acres have a depth of from 35 feet to 160 feet; the rise and fall of the tide is from three to six feet. The city extends four miles north and south by three miles east and west, and contains a population of 109,500 (Dec., 1930); or, including suburbs, a population of 1,253,560.* In addition to the Government buildings, there are the University and Colleges, National Art Gallery, museums, botanic gardens, zoological gardens, free public libraries, observatory, conservatorium of music, two cathedrals, numerous churches and some large public hospitals. The parks within the metropolitan area are 82,272 acres in extent, and include the National Park which measures 33,800 acres, Kuring-gai Chase 35,300 acres, Kurnell 248 acres, Centennial Park 474 acres, and Parramatta Park 252 acres. Other towns are Newcastle (with suburbs), 104,170; Broken Hill, 22,990; Lithgow, 15,300; Maitland, E. & W., 11,810; Goulburn, 12,560; Katoomba, 10,020; Bathurst, 9,690; Lismore, 10,370; Albury, 9,320; Cessnock, 13,930; Wagga Wagga, 8,920; Liverpool, 6,240; Fairfield, 7,840; Grafton and South Grafton, 6,950; Wollongong, 10,130; Orange, 8,550; Tamworth, 7,690; Armidale, 7,090; Dubbo, 6,180; Glen Innes, 4,680; Forbes, 5,120.

Approximate time in transmission of mails from London to Sydney, 28 days.

Dependency of New South Wales.

Lord Howe Island (436 miles north-east of Sydney). Lat. 31° 33′ 4″ S., Long. 159° 4′ 26″ E. Area, 3,220 acres. Pop., Dec., 1929, 111. The island is of volcanic origin and Mount Gower reaches an altitude of 2,840 feet. The affairs of the Island and the control of the Kentia palm seed industry are vested in a Board of Control. Office, Chief Secretary's Department, Sydney.

II.—VICTORIA.

The State of Victoria comprises the south-east corner of Australia, at that part where its territory projects farthest into the southern latitudes; it lies between the 34th and 39th parallels of South latitude, and the 141st and 150th meridians of East longitude. Its extreme length from east to west is about 420 miles, its greatest breadth is about 250 miles, and its extent of coast-line nearly 600 miles, the entire area being 87,884 square miles.

Population.—On March 31, 1931, the estimated population numbered 1,795,522 (888,133 males and 907,389 females).

* The population of Sydney and suburbs at March 31, 1931, was 1,256,210.

Increase of the People.

Year.	Births.	Deaths.	Marriages
1926	35,362	16,335	13,405
1927	35,074	16,773	13,608
1928	34,498	17,708	13,186
1929	33,604	16,717	12,935
1930	33,127	15,959	11,641

Vital Statistics. Annual rate per 1,000 of population in 1930:—Births, 18·56; Deaths, 8·94; Marriages, 6·52. Deaths under 1 year per 1,000 births, 46·52.

Religion.

There has been no State aid to religion since 1875. Members of the Church of England in 1921 (last census) numbered 601,809, "Protestants" 18,636, Presbyterians 257,072, Methodists 183,829, Baptists 32,305, Church of Christ 22,250, Independents 15,893, and Roman Catholics 322,565.

PHYSIOGRAPHY.

The *Australian Alps* and the *Great Dividing Range* pass through the centre of the State, and divide it into a northern and southern watershed, the latter sloping down to the ocean and containing, especially in the south-east, well-wooded valleys. The Murray River forms the northern boundary of the State, and has many Victorian tributaries. The capital stands upon the Yarra-Yarra, which rises in the southern slopes of the Dividing Range.

Climate.—The mean temperature over a period of 75 years, ended in 1930, was 58·5° Fahrenheit, the thermometer rising (on the average four days during the year) above 100° in the shade, and falling (on the average for about two nights in the year) below 32° F. The average number of days on which rain fell was 138, and the average yearly rainfall was 25·49 inches.

GOVERNMENT.

Victoria was originally known as the Port Phillip District of New South Wales, and was erected into a separate colony in 1851, with a partially elective legislature. In 1855 Responsible Government was conferred. The executive authority is vested in a Governor, appointed by the Crown, aided by an Executive Council of 12 members.

Governor of the State of Victoria (Vacant).
Lieut.-Governor, Hon. Sir William Hill Irvine, K.C.M.G., K.C. (1918) £5,000
Private Sec., Major H. A. F. Wilkinson, M.C., V.D.
Hon. Aides-de-Camp, Major W. L. K. Richardson, V.D., and Major J. Pain, D.S.O., M.C.
Official Sec., C. W. Kinsman.

THE MINISTRY (June, 1931).

(The sum of £10,000 is allocated for Salaries of the Ministry).

Premier Treasurer, and Minister of Markets, Hon. E. J. Hogan.
Chief Secretary, Hon. Thomas Tunnicliffe.
Attorney-General, Solicitor-General, and Minister of Agriculture, Hon. William Slater.
Commissioner of Crown Lands and Survey, Minister of Water Supply, and President of Board of Land and Works, Hon. H. S. Bailey.
Commissioner of Public Works, Minister of Mines, and Minister in charge of Immigration, Hon. J. P. Jones.
Minister of Railways and Minister in charge of Electrical Undertakings, Hon. John Cain.
Minister of Forests and Minister of Public Health, Hon. Robert Williams.
Minister of Public Instruction and Minister of Labour, Hon. John Lemmon.
Ministers without Portfolio, Hons. D. L. McNamara; E. L. Kiernan, G. C. Webber; R. T. Pollard.

AGENT-GENERAL IN LONDON.

Agent-General in London, Walter Leitch, C.B.E., Victoria House, Melbourne Place, Strand, W.C.2.

THE LEGISLATURE.

Parliament consists of two Houses—the *Legislative Council* of 34 members, elected for the 17 Provinces for 6 years, one-half retiring every 3 years, and the *Legislative Assembly* of 65 members, elected for a maximum duration of 3 years, for the 65 electoral districts, by universal adult suffrage. The electors for the Council number 470,395, and those for the Assembly, 1,037,344.

President of the Legislative Council, Hon. Sir Francis Grenville Clarke, K.B.E..... £750
Speaker of the Legislative Assembly, Hon. Sir A. J. Peacock, K.C.M.G. 1,000

THE JUDICATURE.

There are magistrates' courts, and general sessions and county courts; and a Supreme Court with a Chief Justice and six Puisne Judges.

Chief Justice, Hon. Sir William Hill Irvine, K.C.M.G. (*Acting as Lieut.-Governor*) ....
Puisne Judges, Their Honours Sir Leo F. B. Cussen (*Acting Chief Justice*), F. W. Mann, W. G. S. McArthur, J. R. Macfarlan, C. J. Lowe, and J. S. Wasley (*acting*) ..... each £2,500
County Court Judges, W. H. Moule, H. C. Winneke, C. J. Z Woinarski, W. H. Williams, H. C. G. Macindoe, A. W. Foster..... each 1,500
Income Tax Commissioner, R. W. Chenoweth 850
Deputy Commissioner of Land Tax, G. J. Whitelock 741
Crown Prosecutors, C. H. Book, £1,250; R. M. Nolan, £900; W. St. G. Sproule 900
Crown Solicitor, F. G. Menzies 1,475

NOTE.—All the above-mentioned salaries, including Judge's salaries, are subject to percentage reductions under the Financial Emergency Act, at various rates, from 21 per cent. on salaries of £728 to 27 per cent. where the salary exceeds £3,000.

EDUCATION.

Primary Education is compulsory, secular and free between the ages of 6 and 14, there being 258,872 children on the registers in 1929, the average attendance being about 69 per cent. *Secondary Education* is principally under private control, 75,886 pupils being in attendance at the 501 schools in 1929. There is a State-aided *University* at Melbourne, with four affiliated colleges (Trinity, Ormond, Queen's, and Newman).

FINANCE.

The revenue and expenditure and State Debt for five years are given as follows:—

Year.	Revenue.	Expenditure.	Debt.
	£	£	£
1925–26	25,269,756	25,559,583	140,264,989
1926–27	27,128,700	27,744,903	149,546,966
1927–28	27,357,917	27,521,270	158,183,470
1928–29	28,156,034	28,104,947	159,552,653
1929–30	27,323,842	28,496,712	162,288,994

Banking, &c.—There were (June 30, 1931) 15 banks (including Commonwealth Bank) with total assets £143,670,079, within the State, and liabilities £116,612,556. The savings bank deposits (including amounts deposited in the Commonwealth Savings Bank) at June 30, 1931, amounted to £63,242,527.

Production and Industry.

Agriculture.—Of the 8,061,920 acres under cultivation in 1929-30, 3,566,135 were wheat crops and 630,234 oats, and 865,015 acres were cut for hay. In 1929-30, 1,363,575 gallons of wine were produced. The estimated value of production in 1929-30 was (including manufacturing values) £90,593,185.

Live Stock.—There were in 1930, 619,416 milch cows, producing 90,639,652 lb. of butter and 6,953,949 lb. of cheese; and 715,826 other cattle, 17,427,203 sheep, 265,978 pigs, and 393,015 horses.

Minerals.—The gold production in Victoria has declined very considerably, the amount produced in 1930 being 24,119 oz. (£102,456). Other minerals raised consisted principally of coal (black and brown), kaolin, tin and gypsum.

Trade and Industry.—Wool, wheat, flour, butter, live stock, fruits, condensed milk and poultry are the staple productions of the State; and the manufactures (8,195 factories, &c., employing 151,009 hands in 1929-30) are mainly for home consumption. The chief exports oversea are: wool, butter, wheat, flour, skins and hides, tallow, milk and cream, preserved and frozen meats and fruit (dried and fresh). The principal oversea imports of the State are iron and steel, machines and machinery, metals and metal manufactures, silks, velvets, &c., apparel and attire, bags and sacks, tea, cottons and linens, woollens, timber, petroleum spirit and paper.

Cities and Towns.

Melbourne, the capital city, which is an episcopal see, was originally laid out in the year 1837 with wisdom and foresight; its wide streets, park lands, public gardens, university, public library, museum and large churches are the principle features of the city. Melbourne and suburbs cover an area of 125,741 acres and contained (December 31, 1930) a population of 1,032,500. Other cities are Ballarat, 42,050; Geelong, 43,400; Bendigo, 33,690, Warrnambool, 8,100. The chief towns are Castlemaine, 7,170; Wonthaggi, 7,000; Mildura, 6,000; Hamilton, 5,300; Ararat, 5,300, and Shepparton, 5,500.

Transmission of mails, approximate, 30 days.

Melbourne, distant from London 11,267 miles; transit, 30 to 35 days.

III.—SOUTH AUSTRALIA.

The State of South Australia is situated between 26° and 37° S. lat. and 129° and 141° E. long., the total area being 380,070 sq. miles.

Population.—In 1931 the population numbered 582,928 (300,828 males and 282,100 females).

Increase of the People.

Year.	Births.	Deaths.	Marriages.
1926	11,483	4,877	4,503
1927	11,492	5,128	4,501
1928	11,408	5,147	4,146
1929	10,665	5,039	3,719
1930	9,984	4,851	3,312

Birth rate 17·19, death rate 8·35, marriage rate 5·70 per 1,000 of population. Infantile mortality, 48·28 per 1,000 births, being one of the lowest rates in the world.

Religions.

Religion is free and receives no State aid. At the Census, 1921, the persons belonging to the principal religious denominations were as follows:—Church of England, 165,968; Methodists, 122,634; Congregationalists, 15,289; Baptists, 23,033; Lutherans, 24,606; Roman Catholics, 64,054; Presbyterians, 22,659; and Churches of Christ, 15,039.

Physiography.

The eastern portion of the State is divided longitudinally by the *Flinders Range*, which extends from the eastern side of the Gulf of St. Vincent to the Lakes Torrens and Eyre. The north-western portion is partly desert which can never be brought into cultivation. The northern portion of the State, between Lake Eyre and 26° South latitude, is also unpromising in comparison with the fertile land that surrounds the hill country of the east. Except for the Murray, which flows for some 250 miles through the south-eastern corner into the Southern Ocean, there are no rivers of importance in South Australia.

Climate.—The mean annual temperature at Adelaide is 63°, the winter temperature (July-August) averaging 53°, and the summer (November-March) 71°. During the summer months the maximum temperature at times exceeds 100°, but owing to the purity and dryness of the atmosphere the inconvenience is comparatively slight. The average annual rainfall at Adelaide, derived from 92 years' record, is 21·09 inches. This total is rather higher than the approximate average annual rainfall over the whole of the agricultural areas extending from Melrose to Cape Northumberland. In the Mount Lofty Ranges the mean yearly rainfall in places exceeds 40 inches, while on the Adelaide plains the precipitation has fallen as low as 16 inches.

Government.

South Australia was proclaimed a British Province in 1836, and in 1851 a partially elective legislature was established. The present Constitution rests upon a Law of Oct. 24, 1856, the executive authority being vested in a Governor appointed by the Crown, aided by a Council of 6 Ministers, and the Lieutenant-Governor.

Governor.

Governor of South Australia, His Excellency Brig.-Gen. Hon. Sir Alexander Gore Arkwright Hore-Ruthven, V.C., K.C.M.G., C.B., D.S.O. (1928) £5,000

Private Sec., Legh Winser, C.M.G., M.V.O.

Lieut.-Governor, Hon. Sir George John Robert Murray, K.C.M.G., LL.M., *born* 1863 (1916)

The Ministry (Oct. 30, 1930).

(£6,200 is allotted as salaries to Ministers, less 20 per cent. for 12 months.)

Premier and Treasurer, and Minister of Education, Hon. Lionel Laughton Hill.

Attorney-General and Minister of Railways, Hon. William Joseph Denny, M.C.

Chief Secretary and Minister of Agriculture and Commissioner of Forest Lands, Hon. Stanley R. Whitford.

Commissioner of Crown Lands and Minister of Mines and Marine, Hon. Robert Stanley Richards.

...ssioner of Public Works and Minister of ...dustry, Labour and Employment, Hon. John McInnes.
Minister of Local Government, Immigration, Repatriation and Irrigation, Hon. James Jelley.

AGENT-GENERAL IN LONDON.

Agent-General in London, Hon. Sir H. N. Barwell, K.C.M.G., Australia House, W.C. 2 ..... £1,600
Secretary and Trade Commissioner, C. F. G. McCann 850

THE LEGISLATURE.

Parliament consists of a *Legislative Council* of 20 members elected for 6 years, one-half retiring every 3 years; and a *House of Assembly* of 46 members, elected for a maximum duration of 3 years. Election is by ballot, with universal adult suffrage for the House of Assembly for all British subjects, male and female; there is a small property qualification for electors to the Legislative Council, who numbered 132,294 in 1930, those for the Assembly numbering 323,907.
President of the Legislative Council, Hon. Sir J. L. Stirling, K.C.M.G. £680
Speaker of the House of Assembly, Hon. E. J. Shepherd ..... ,680

THE JUDICATURE.

Law and Justice.—The Supreme Court is presided over by the Chief Justice and four Puisne Judges; there are Courts of Vice-Admiralty and Insolvency, as well as Local Civil Courts, with stipendiary magistrates and the usual Police Courts. The Supreme Court convictions for 1930 totalled to 304, which is at the rate of 1 in every 1,900 of the population.
Chief Justice and Judge of Vice-Admiralty, Hon. Sir G. J. R. Murray, K.C.M.G., B.A., LL.M. £2,000
Judges, Hon. J. M. Napier, LL.B.; Hon. H. A. Parsons, LL.B.; Hon. F. W. Richards, LL.D.; Hon. A. W. Piper..... 1,700

EDUCATION.

Public Education (Primary, Secondary and Technical) is provided by the State, and controlled by a responsible Minister; it is secular, compulsory, and free; there are 1,073 State schools, with 3,209 teachers and 93,669 scholars; the expenditure in 1930 was £974,951, including grants to University, Libraries, &c. The Government grants Exhibitions and Scholarships, carrying the holders to higher schools and the University. Private schools number 189, with 948 teachers and 15,599 scholars. There is an endowed *University* at Adelaide, founded in 1874, with 994 undergraduates, and 1,521 other students; all classes are open to women. A State School of Mines and Industries has also been established, and there are technical schools at 9 country centres and also special trade schools for apprentices. The public library, museum, art gallery and local institutes are supported or assisted by the State.

STATE FINANCE.

Year.	Revenue.	Expenditure.	Debt.
	£	£	£
1927	10,784,898	11,834,947	84,908,267
1928	11,346,903	11,621,834	90,612,402
1929	10,840,914	11,771,772	92,653,531
1930	9,847,201	11,473,023	93,419,118
1931	10,725,811	12,539,668	29,527,447

Banking.—There are 10 banking institutions in Adelaide, in addition to the Commonwealth Government Bank and the State Bank of South Australia, with about 445 branches and agencies, and £42,000,000 paid-up capital, having a total liability of £24,851,760 and assets £30,106,513 in June quarter, 1931. The savings banks on June 30, 1931, had 568,059 accounts open with £21,422,059 to their credit. Over 90 per cent. of the population have Savings Bank accounts.

PRODUCTION AND INDUSTRY.

Agriculture.—Of the total area about one-half is farmed or grazed, and 7,400,000 acres cultivated —under wheat 4,180,000 acres, hay 601,000, oats 218,000, barley 252,000, orchards and vineyards 82,000, with 2,483,000 acres lying fallow. Wheat produced 34,870,000, bushels. Oranges, lemons, apples, apricots, peaches, and all stone fruits and olives are successfully grown, and fruit drying is profitable. There were 52,000 acres of vines, with a production of 9,100,000 gallons of wine; 152,000 cwt. of currants, and 157,000 cwt. of raisins. Considerable quantities of fruits (fresh and dried) and also wine are annually sent to oversea countries, principally the United Kingdom and the other Australian States. Brandy and other spirits are also produced. The land is also very suitable for the growing of all kinds of root crops and vegetables.

Live Stock (Dec. 31, 1930).—There were 5,980,959 sheep, cattle 218,985, horses 183,529, pigs 82,991. Wool production, 63,478,524 lb.

Minerals.—Copper and gold, silver, lead, manganese, bismuth, iron, gypsum, salt, phosphate rock, coal, &c., are found, the total mineral output being valued at £1,288,238 (1930). Over £33,095,000 of copper have been produced since the foundation of the State.

Manufactures.—In 1930 there were 1,814 factories, employing 33,159 hands, the gross value of the output being £30,312,784, and the wages paid £6,964,963. Plant, machinery, land, and buildings were valued at £19,223,713.

Value of Production, 1929-30.—Crops, total value, £11,957,903, average per head, £21; manufactures, £10,637,552; pastoral, £2,989,297; minerals, £1,320,805; dairying, £1,950,572; poultry, fisheries and game, forestry, &c., £2,229,790. *Total value of production*, £31,085,919, average £54 per head.

Trade and Commerce Oversea, 1929-30.—The total value of the *Imports* was £9,367,357 (U.K. £3,917,226, or 42 per cent.; other British countries £1,283,641, or 14 per cent.; foreign countries £4,166,490, or 44 per cent.). The total value of the *Exports* was £15,009,496 (U.K. £8,742,833, or 58 per cent.; other British countries £1,446,142, or 10 per cent.; foreign countries £4,820,521, or 32 per cent.). In 1930-31 the imports were £3,915,536 and exports £10,061,590, consisting of breadstuffs £3,359,557; pastoral and dairying products £1,991,342; fruits and wine £1,056,590; minerals £2,860,734; and miscellaneous £753,367.

Transport, &c.—There are 3,821 miles of railway in South Australia, 156 miles of electric tramways, 46,000 miles of roads and several good harbours. The River Murray is used for conveying the produce grown on the irrigation settlements along its banks. On June 30, 1931, there were 56,287 motor vehicles in use, classified as 37,541 cars, taxi-cabs, &c., 10,532 lorries, trucks, &c., 8,152 motor cycles and 62 road tractors. There are 897 post offices in the State, which transmit annually 60,000,000 letters,

10,000,000 newspapers, 18,000,000 packets and parcels, and also 2,000,000 telegrams.

Shipping (1929-30).—Ships entered numbered 1,280, tonnage 5,042,157; British 1,054 (4,165,275 tons), foreign 226 (858,882 tons).

TOWNS.

ADELAIDE, the chief city and capital, population (1930) 324,420, inclusive of suburbs within 10 miles radius. Other towns are Moonta (4,250), Kadina (5,000), Wallaroo (3,250), Port Pirie (10,000) on the east, and Port Augusta 3,350) on the west of Spencer Gulf, and Kapunda (2,100), Gawler (5,000), and Peterborough (3,300) on the line from Adelaide to the north, Victor Harbor (3,450) in the south, Mt. Gambier (6,000) in the south-east, and Port Lincoln (2,850) on Eyre Peninsula. Murray Bridge (3,600) and Renmark (3,750) on the River Murray.

Transmission of mails from London to Adelaide, approximate, 29 days.

IV.—QUEENSLAND.

This State, situated in lat. 10° 40′—29° S. and long. 138°—153° 30′ E., comprises the whole north-eastern portion of the Australian continent.

Queensland possesses an area of 670,500 square miles (*i.e.*, equal to more than 5½ times the area of the United Kingdom).

POPULATION.—At the Census of 1921 the population numbered 755,972 (398,969 males and 359,003 females). On March 31, 1931, the estimated population was 952,483.

Increase of the People.

Year.	Births.	Deaths.	Marriages.
1926	19,765	8,215	6,428
1927	19,830	8,079	6,278
1928	19,783	7,976	6,321
1929	18,487	8,308	6,169
1930	18,939	7,455	6,159

Religion.

Since 1861 no State aid has been afforded to religion. At the Census of 1921 there were 309,786 Church of England, 172,662 Roman Catholics, 91,610 Presbyterians, 77,566 Methodists, 17,891 Lutherans, 14,735 Baptists, and 44,132 other Christians, with 4,267 Muhammadans and Pagans, besides "Indefinite," "No religion," &c.

PHYSIOGRAPHY.

The *Great Dividing Range* on the eastern coast of the continent produces a similar formation to that of New South Wales, the eastern side having a narrow slope to the coast and the western a long and gradual slope to the central plains, where the *Kirby's Range* divides the land into a northern and southern watershed. The Brisbane, Burnett, Fitzroy, and Burdekin rise in the eastern ranges and flow into the Pacific, the Flinders, Mitchell, and Leichhardt in the Gulf of Carpentaria, and the Barcoo and Warrego rise in the central ranges and flow southwards.

Climate.—At Brisbane the mean temperature for 1930 was 68·7°, the maximum and minimum shade temperatures being 95·7° and 40·7°; mean barometer, 30·091. The coastal regions are warm and moist, the plateaus dry and temperate, whilst in the very far west the rainfall is scanty. The rainfall during 1930 was 41·215 inches, and there were 142 wet days.

GOVERNMENT.

Queensland was constituted a separate colony with Responsible Government in 1859, having previously formed part of New South Wales. The executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of 10 members.

GOVERNOR.

Governor of Queensland, His Excellency Lt.-Gen. Sir Thomas Herbert John Chapman Goodwin, K.C.B., C.M.G., D.S.O., F.R.C.S. (Feb. 1927)	£3,000
Private Sec., Col. L. E. C. Worthington-Wilmer	300
Aide-de-Camp, Capt. N. A. H. Campbell	300
Official Sec., F. Ryder	380
Lieut.-Governor, Sir Jas. W. Blair	

EXECUTIVE COUNCIL.

(H.E. the Governor presides.)

Premier, Chief Secretary and Vice-President of Executive Council, Hon. A. E. Moore	£1,300
Treasurer, Hon. W. H. Barnes	1,000
Secretary for Agriculture and Stock, Hon. H. F. Walker	1,000
Secretary for Public Lands, Hon. W. A. Deacon	1,000
Secretary for Mines, Hon. E. A. Atherton	1,000
Attorney-General, Hon. N. F. Macgroarty	1,000
Secretary for Railways and Main Roads, Hon. Godfrey Morgan	1,000
Secretary for Public Instruction, and Secretary for Public Works, Hon. R. M. King	1,000
Home Secretary, Hon. J. C. Peterson	1,000
Minister for Labour and Industry, Hon. H. E. Sizer	1,000

AGENT-GENERAL IN LONDON.

Agent-General in London, Sir Edward H. Macartney, 409-410 Strand, W.C.2	£1,500
Acting Agent-Gen. & Official Secretary, L. H. Pike, A.C.I.S., J.P.	750

THE LEGISLATURE.

Parliament consists of a *Legislative* Assembly of 72 members, elected by universal adult suffrage.

Speaker, Hon. Charles Taylor	£1,000
Chairman of Committees, T. R. Roberts	700
Clerk, C. A. Bernays	780

THE JUDICATURE.

There is a Supreme Court, with a Chief Justice and six Puisne Judges; an Industrial Court, with a President and another Judge; and Inferior Courts at all the principal towns, presided over by Police Magistrates.

Chief Justice, Supreme Court, Hon. Sir J. W. Blair	£2,250
Senior Puisne Judge, H. D. Macrossan	
Puisne Judges, W. F. Webb; H. H. Henchman; E. A. Douglas; F. T. Brennan; R. J. Douglas	each 2,000

EDUCATION.

Primary Education is compulsory, secular and free. In 1930 there were 1,726 State schools, including 109 Provisional and 13 High schools in operation, with 4,410 teachers and an average daily attendance of 115,326 children; and in 1929, 195 private and 10 grammar schools, with 1,266 teachers and an average attendance of 27,808. A State-aided University was established during 1910.

FINANCE.

Revenue, Expenditure, and Debt of Queensland for five years ended June 30 :—

Year.	Revenue.	Expenditure.	Debt (Gross).
	£	£	£
1927	16,147,787	16,490,954	106,479,916
1928	16,718,070	16,707,564	111,733,969
1929	16,736,188	16,902,145	112,862,049
1930	15,997,870	16,721,055	112,148,979
1931	15,072,652	15,914,696	112,706,190

Banking.—Assets of Joint Stock Banks at June 30, 1930, £43,092,732, liabilities £37,754,740. The deposits at the same date amounted to £37,044,028. The Commonwealth Bank of Australia also has a branch in Queensland with assets June 30, 1930, £7,718,196, and liabilities £9,177,163. Depositors' balances in Queensland branch of the Commonwealth Savings Bank £23,901,136, averaged £47 14*s.* 0*d.* to each of the 501,074 depositors.

PRODUCTION AND INDUSTRY.

Agriculture and Live Stock.—Of the total area of 429,120,000 acres the Government have parted with the fee simple of 18,642,703, and 88,592 acres have been granted without payment; under a system of deferred payment, 6,860,667 acres more are in process of alienation, and an additional area including preferential pastoral leases of 200,716,960 acres leased out for sheep and cattle runs, 75,961,276 acres for grazing farms and homesteads, 21,168,520 acres are held under occupation licence, 356,593 acres under gold-mining and mineral lease, 635,417 for special purposes, 3,901,261 acres perpetual lease selections, scrub selections 12,348 acres, 12,342 acres held as auction perpetual leases, prickly pear leases 12,636,240 acres, reserves and roads 20,856,574 acres, leaving 67,282,507 unoccupied. Wheat, oats, and barley flourish on the Darling Downs, while large areas are devoted to maize, which yields an average crop of about 26·52 bushels per acre. Both English and sweet potatoes are cultivated, as also are coffee, cotton, oranges, peaches, pineapples, grapes, bananas, cocoanuts, mangoes, plums, and various English fruits. India-rubber and sisal hemp plantations have also been recently started. In the year 1930, 516,783 tons of sugar were produced. The live stock in January 1931 included 5,463,724 cattle, 22,542,043 sheep, 481,615 horses, and 217,528 pigs. Wool, meat, sugar and butter are the principal products.

Climate.—The *Bureau of Seasonal Forecasting* of the Council of Agriculture, Turbot Street, Brisbane, makes researches into the climatic sequences of Queensland and issues forecasts, the beneficial nature of the work being much appreciated by farmers and graziers in Queensland and the adjoining States.

Forestry.—There are about 24,000,000 acres of commercial timberland in Queensland, of which there have been reserved for forestry purposes 5,330,980 acres. In 1929-30 the wealth produced by the timber industry of Queensland was between three and four million pounds, and there were 3,867 hands employed in the sawmills and plywood mills. At June 30, 1930, the total area of reforestation plantations was 4,917 acres, and in addition 54,230 acres had been treated for natural regeneration by the State Forest Service, which employs 298 persons, and is engaged actively in timber farming and wood-trading operations. An area of 160,611 acres has been reserved for National Parks.

Minerals.—The total mineral output in 1930 was £1,263,236. There are rich deposits of gold, copper, tin, lead, silver, antimony, limestone, ironstone, and wolfram, while coal is found in several districts. The gold output in 1930 was valued at £33,224; silver, £5,527; copper, £174,075; tin, £49,708; coal, £952,856; wolfram, £1,491; molybdenite, £398; lead, £4,169; opals and gems, £5,748; arsenic, nil; cobalt, £973; zinc, nil; fluorspar, £1,439.

Commerce.—The chief articles of export oversea, the produce of the State, in 1929-30 were: Wool, £6,914,819; meat, including extract, and bacon, hams, and pork, £2,646,013; hides, £341,904; skins, sheep, £177,406; skins, other, £455,992; tallow, £258,629; butter, cheese, and milk, £2,980,461; sugar, £2,194,245.

TOWNS.

CAPITAL, Brisbane, with an area of 385 square miles. Population Census, April 4, 1921, 210,032. Estimated Dec. 31, 1930, 313,251. The status of the chief magistrate of Brisbane was raised to that of Lord Mayor in 1930.

The contour of the Queensland coast-line and the relative position of its inland parts operate against any centralisation similar to that at Melbourne, Sydney, or Adelaide, and numerous ports of considerable size extend along the coast:—Brisbane, Rockhampton (30,000), Maryborough (12,000), Townsville (31,800), Port Douglas, Mackay (9,230), Thursday Island (1,200), Cooktown, Cairns (9,750), Bowen (3,080), and Bundaberg (11,250), Gladstone (2,525). Other places of importance are Ipswich (26,233), Toowoomba (26,145), Charters Towers (9,200), Gympie (9,588), Mt. Morgan (4,000), Warwick (7,000), Roma, (4,000) and Cloncurry.

Transmission of mails from London to Brisbane, approximate, 32 days. Air mail takes about a week less.

V.—TASMANIA.

Tasmania is an island in the South Pacific Ocean, off the southern extremity of Australia, from which it is separated by Bass Straits about 140 miles wide, in which are situated the Furneaux Group and King Island, included within the State. It lies between 40° 33′–43° 39′ S. lat. and 144° 39′—148° 23′ E. long., and contains an area of 26,215 square miles.

POPULATION.—At the Census of 1921 the population numbered 213,780 (107,743 males and 106,037 females).

Year.	Birth Rate.	Death Rate.	Infant Mortality.	Marriage Rate.
1926	23·62	9·05	46·5	6·79
1927	23·01	9·68	53·0	6·82
1928	22·12	10·05	64·0	7·07
1929	22·44	10·17	53·2	8·01
1930	22·10	9·00	50·6	6·70

Religion.

All religions are free. In 1921 there were 112,222 members of the Church of England, 35,456 Roman Catholics, 27,171 Methodists, 14,796 Presbyterians, 4,543 Congregationalists and Independents, and 5,332 Baptists.

PHYSIOGRAPHY.

The surface of the country is generally hilly and timbered, with mountains from 1,500 to 5,000 feet in height, and expanses of level, open plains. There are numerous streams, the Derwent and the Tamar being the largest. The climate is fine and salubrious, and well suited to European constitutions; the hot winds of Australia do not reach the island. At Hobart the mean annual temperature averages 54·4°, the mean temperature for Dec., Jan., and Feb. being 61·5°, and that of June, July, and Aug. 46·9°. The western side of the island is very wet, the eastern side having a rainfall similar to that of eastern England; the average rainfall varies from 20 inches to 100 inches in different parts.

GOVERNMENT.

The island was first settled by the British in 1803 as an appendage to New South Wales, from which it was separated in 1825. In 1851 a partly elective legislature was inaugurated, and in 1856 Responsible Government was added. In 1901 Tasmania became a State of the Australian Commonwealth, *q.v.* The State executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of responsible Ministers.

GOVERNOR.

Actg. Governor of Tasmania, Hon. Sir Herbert Nicholls, K.C.M.G., Chief Justice.

EXECUTIVE COUNCIL (June 15, 1928)

Premier, Treasurer, and Minister Controlling Hydro-Electric Department and Minister for Forestry, Hon. J.C. McPhee
Chief Secretary and Minister of Railways and Mines, Hon. C. E. W. James
Lands, Public Works and Agriculture, Hon. Sir Walter H. Lee, K.C.M.G. .....
Attorney-General and Education, Hon. H. S. Baker .....
Without Portfolio, Hon. Charles W. Grant; Hon. Edward Hobbs; Hon. A. Wardlaw

AGENT-GENERAL IN LONDON.

Agent-General in London, (vacant).
Address, Australia House, Strand, W.C.2.
Acting Agent-Gen. & Official Secretary, H. W. Ely, I.S.O.

THE LEGISLATURE.

Parliament consists of two Houses, a *Legislative Council* of 18 members, elected for six years; and a *House of Assembly* of 30 members, elected by proportional representation for three years, the electors for the latter being all adult Tasmanians who have resided continuously in the State for 6 months; the electorate for the Council is smaller, having a property or educational qualification for both sexes.

President of the Legislative Council, Hon. W. B. Propsting, C.M.G. .....
Speaker of House of Assembly, Sir John W. Evans, K.C.M.G. .....
Clerk of the House, Henry McPherson .....

THE JUDICATURE.

There are justices of the peace and courts of petty, general and quarter sessions, and a Supreme Court with a Chief Justice and two Puisne Judges.

Chief Justice, Hon. Sir H. Nicholls, K.C.M.G. (*b.* 1868) £1,800
Puisne Judges, Hons. H. Crisp; A. J. Clark .....each 1,500
Solicitor-General, P. L. Griffiths .....
Registrar Supreme Court, A. G. Brammall
Recorder of Titles, A. A. Richardson .....

EDUCATION.

Primary education is compulsory, secular, and free, there being 499 State schools in 1929, with 38,080 children on the registers. *Secondary* education is also provided by the State (5 high schools with 1,619 scholars), and by private endowment. There is a *University* at Hobart, and technical schools at Hobart, Launceston, Queenstown and Zeehan.

FINANCE.

Year.	Revenue.	Expenditure.	Debt.
1926-27 ...	£3,040,220	£2,855,077	£24,303,068
1927-28 ...	2,962,687	2,867,605	24,872,785
1928-29 ...	2.766,434	2,855,977	23,324,630
1929-30 ...	2,956,272	2,981,992	22,921,211
1930-31 ...	2,609,290	2,854,394	23,389,079

Banking.—Dec. 31, 1930, the banks of issue had total deposits £7,243,890; the savings bank deposits were £5,738,437.

PRODUCTION AND INDUSTRY.

Agriculture and Live Stock.—Of the total area of 16,778,000 acres there were, in 1929-30, 265,317 acres under crops. The principal crops are apples, potatoes, oats, and hay, followed by wheat, peas, green forage, fruit and hops. The live stock included 214,643 cattle, 2,091,113 sheep, 52,899 pigs, and 34,336 horses. The wool production was 14,800,000 lb. The butter produced amounted to 8,488,932 lb.

Electrical Energy.—The Hydro-Electric Department of Tasmania has completed an important waterpower development at the Great Lake, in the centre of the State, the capacity of the installation being 81,000 h.p. The advantage of cheap power is steadily attracting new manufacturing industries.

Forestry.—Timber reserves total 950,538 acres. Area held under lease or forest permits for sawmilling, logging, &c., 266,261 acres. The amount of timber milled for 1929-30 was 60,037,967 super feet, exclusive of piles, poles, fencing, and for practically all sleepers. The utilisation of forest waste for the production of wood-pulp has, after long investigation, been brought within the scope of business operations. An experimental plant is now in operation with every prospect of large-scale production to follow.

Minerals.—The chief minerals produced are copper, tin, silver, lead, coal, the value of all minerals produced in 1930 being £1,043,268.

Manufactures.—The chief factories for export are metallurgical, fruit preserving, woollen mills, cement, and confectionery; the value of production in 1929-30 was £3,562,225, the capital invested in the 845 establishments being £9,944,000 in 1929-30.

TOWNS.

CAPITAL, Hobart. Population (1931), 58,100.
Other towns are Launceston (pop. 31,040), Devonport, Ulverstone, Burnie, and Queenstown.
Transmission of mails, approximate, 31 days.

VI.—WESTERN AUSTRALIA.

Includes all that portion of the continent west of 129° E. long., the most westerly point being in 112° 52′ E. long., and from 13° 30′ to 35° 8′ S. lat. Its extreme length is 1,500 miles, and 1,000 miles

st to west, and its total area 975,920 miles.

POPULATION.—At the Census of April 4, 1921, the population was 332,732 (177,278 males, 155,454 females); in 1930 the total was estimated at 420,606 (226,713 males, 193,893 females).

Natural Increase of the People.

Year.	Births.	Deaths.	Marriages.
1926	8,301	3,350	2,844
1927	8,481	3,393	3,107
1928	8,764	3,640	3,309
1929	9,051	3,930	3,367
1930	9,200	3,774	3,205

Religions.

There is no State aid to religions. At the Census of 1921 there were 153,285 persons belonging to the Church of England, 64,488 Roman Catholics, 39,116 Methodists, and 28,377 Presbyterians.

Physical Features.—Large areas of the State, for some hundreds of miles inland, are hilly and even mountainous, although the altitude, so far as ascertained, rises nowhere above that of Mount Bruce (4,024 ft.) in the north-west division or that of Bluff Knoll (3,640 ft.) in the Stirling Range in the south-west. The coastal regions of the west and of the north are undulating, with an interior slope to the unsettled central portion of Australia. The Darling and Hamersley ranges of the west have a western slope to the Indian Ocean, into which flow many streams, notably the Swan, Murchison, Gascoyne, Ashburton, Fortescue, and De Grey. In the north the Fitzroy flows from the Leopold range into the Indian Ocean, and the Drysdale and Ord into the Timor Sea. The greater portion of the far interior may be described as a great tableland, with an altitude of from 1,000 to 2,000 ft. above sea-level, the surface of which consists in parts of sand-dunes, varied by wide stretches of clayey soils. The climate is one of the most temperate in the world. The total rainfall at Perth during 1930 was 39·80 inches, the average for the past 55 years being 34·70. Of the area of Western Australia, which is equal to more than half that of European Russia, probably about two-thirds is suitable for pastoral purposes, immense tracts having already been proved eminently so.

Government.

Western Australia was first settled by the British in 1829, and in 1870 it was granted a partially elective legislature. In 1890 responsible government was granted, and the Administration vested in a Governor, a Legislative Council, and a Legislative Assembly. The present constitution rests upon an Amending Act of 1899, further amended by the Constitution Acts Amendment Act, 1911; the Executive is vested in a Governor appointed by the Crown and aided by a Council of responsible Ministers.

Governor.

Governor of Western Australia, (vacant).
Private Sec., Maj. B. Kerr-Pearse, C.M.G., M.V.O.
Administrator, His Excellency John Alfred Northmore (June, 1931.)

Executive Council.

Premier and Treasurer, Hon. Sir James Mitchell, K.C.M.G., M.L.A. £1,700
Minister for Lands, Immigration and Health, Hon. Charles G. Latham, M.L.A. 1,500
Attorney-General, Hon. Thomas A.L. Davy, M.L.A. 1,500
Minister for Railways, Mines, Police, Forests and Industry, Hon. John Scaddan, M.L.A. 1,500
Minister for Public Works and Labour, Hon. John Lindsay, M.L.A. 1,500
Chief Secretary and Minister for Education, (vacant).
Minister for Country Water Supplies and Trading Concerns, Hon. Charles F. Baxter, M.L.C. 1,500
Minister for Agriculture, Hon. Percy D. Ferguson, M.L.A. 1,500

Agent-General in London.

Agent-General in London, Hon. William C. Angwin. *Offices*, Savoy House, 115–116, Strand, W.C. 2. ..... £2,000
Secretary, C. B. Rushton, I.S.O. 810

The Legislature.

Parliament consists of a *Legislative Council* of 30 members elected for 6 years, and a *Legislative Assembly* of 50 members elected for 3 years by universal adult suffrage; the electorate of the Council is restricted by a property qualification, that of the Assembly being subject to residence and registration.

President of the Legislative Council, Hon. Sir John Waters Kirwan £800
Speaker of the Legislative Assembly, Hon. S. Stubbs 800

The Judicature.

There is a Supreme Court presided over by a Chief Justice and three Puisne Judges, which has complete jurisdiction in all criminal and common law matters. There are courts known as local courts which have limited civil jurisdiction. There are Courts of Session, dealing with criminal matters outside Perth, and there are Magistrates' courts and Children's courts.

Chief Justice, Hon. J. A. Northmore (*acting*).
Puisne Judges, Hons. J. A. Northmore, T.P. Draper, C.B.E., and J.P. Dwyer, each £2,000

Education.

Education.—Education is compulsory and free, and numerous elementary schools are under the control of the Minister of Education. There are a training college, technical schools, a school of mines and a Goldfields High School at Kalgoorlie (State Secondary Schools in various centres and the capital), and a University. The total amount expended on education during the year ended June 30, 1931, was £673,202; in addition, a grant of £31,000 was made to the University.

Finance.

Revenue and Expenditure and gross public Debt for 5 years ended June 30:—

Year.	Revenue.	Expenditure.	Debt.
	£	£	£
1927	9,750,833	9,722,588	70,606,175
1928	9,807,949	9,834,415	76,427,764
1929	9,947,950	10,223,919	69,355,449
1930	9,750,515	10,268,518	70,174,350
1931	8,686,756	10,107,294	75,465,110

Banking.—There were, including the Commonwealth Bank of Australia, 10 cheque-paying banks, formerly banks of issue, in the State on June 30, 1931, with total assets £26,298,800 and liabilities £14,552,441. The amount due to depositors in the State Savings Bank at June 30, 1931, was £7,992,329; in the School Savings Bank, £86,720; and in the Commonwealth Savings Bank the amount due to depositors in Western Australia on March 31, 1931, was £2,720,090.

Production and Industry.

Crops and Live Stock.—Of the total area (624,588,800 acres) 4,794,500 acres were under crops in 1930–31, wheat for grain accounting for 3,958,313 acres. In 1930 the live stock included 811,844 cattle, 9,874,970 sheep, 100,664 pigs, 19,007 goats, and 156,973 horses. There were about 5,000 acres of vineyards.

Manufacturing Industries.—There were on June 30, 1930, a total of 1,466 industrial establishments in the State employing either machinery or at least four hands. The total number of persons employed in them was 19,643. The combined output of these establishments for 12 months ended June, 1930, was computed at £16,891,482.

Forestry.—The forests contain some of the very finest hardwoods in the world. Two of these, jarrah (*Eucalyptus marginata*) and karri (*Eucalyptus diversicolor*), are largely exported. The quantity of timber cut during the 12 months ended June, 1930, is computed to have been 159,642,788 super feet.

Minerals.—The groups of the Coolgardie goldfields (covering a vast portion of the interior and extending to the 125th meridian), as well as other fields, are being constantly worked, production of gold being 416,369 ozs. in 1930. The total amount produced in the State from its discovery to June 30, 1931, is 38,529,101 fine ozs. Magnetic iron, lead, copper and tin ores exist in large quantities, as also coal.

Trade.—The principal ports are Fremantle, Albany, Bunbury, Geraldton, and Broome. The opening of the Trans-Australian Railway in Oct. 1917 afforded another means of ingress and egress, both for travellers and merchandise. The imports chiefly consist of machinery, vehicles, manufactured hardware, clothing and textiles, tobacco, cigars and cigarettes, also (mainly from the sister states of the Commonwealth) provisions. Principal exports for the year ended June 30, 1931:—Gold, £5,788,496; Wool, £2,386,538; timber, £503,696; sandalwood, pearls and shell, hides and skins, £488,192; wheat, £5,228,252; flour, £635,518; and fresh fruit, £302,085.

Towns.

Capital, Perth. Population (1930) of Metropolitan area, including Fremantle, 204,780.

Perth, the capital, stands on the right bank of the Swan River estuary, 12 miles from Fremantle. The King's Park (approximately 1,000 acres), on a hill overlooking the city and the wide estuarine reaches of the river, possesses unique natural beauty. Other towns are Fremantle (including suburbs, 33,535), Albany (4,580), Kalgoorlie and Boulder (10,500), Lan[illegible] (5,070), Claremont (6,500), Geraldton (4,627), Midland Junction (5,300), Northam (4,975) and Collie (3,720).

Transmission of mails from London to Perth, approximate, 27 days.

WORLD MOTOR VEHICLES PRODUCTION, 1929 AND 1930.

The following table shows the production of motor vehicles in the five principal producing countries in 1929 and 1930; the figures are those published in the *United States Commerce Reports*, May 25, 1931, with the exception of those relating to the United Kingdom, which have been provided by the Society of Motor Manufacturers and Traders, Limited. The figures relate only to complete vehicles manufactured by companies strictly national in character, and not to the output of assembly plants in various countries.

Producing Country.	1929.			1930.		
	Passenger Cars.	Commercial Vehicles.	Total.	Passenger Cars.	Commercial Vehicles.	Total.
United States	4,587,400	771,000	5,358,400	2,784,800	571,200	3,356,000

THE DOMINION OF NEW ZEALAND.

(By the Rt. Hon. G. W. FORBES, P.C., *Prime Minister.*)

NEW ZEALAND has been aptly described as the "Britain of the South Seas" in that, while far remote from the Homeland, the Dominion still retains to a marked degree the national characteristics of the early settlers who, scarcely more than one hundred years ago, came to her shores from various parts of the British Isles. Even at the present time the population of the Dominion is probably more distinctly British than any other part of the Empire, the latest available census figures in this connection showing that approximately 99 per cent. of the population is of British nationality.

New Zealand is primarily an agricultural and pastoral country, her chief exports being in the following order:—butter, frozen meat, wool, cheese and hides. Approximately 85 per cent. of the Dominion's exports are disposed of within the Empire, about 74 per cent. being exported direct to the United Kingdom, while imports to the extent of 68 per cent. of the total are derived from British sources. I venture to suggest that from an imperial point of view no other part of the Empire can show better results than these. New Zealand's total external trade per head, I may mention, is higher than that of any other country in the world.

The importance of the United Kingdom and of the British Empire as a market for the raw materials and foodstuffs which the Dominion can produce is fully realised by the Government and the people of New Zealand, and it is realised also that the prosperity of the United Kingdom depends to a large extent upon the fullest possible extension of inter-Empire trade. It is the earnest desire of the Government and of the people of New Zealand that every facility be given to permit of this development, and as a practical expression of this desire the Dominion grants to British-made goods a very substantial measure of preference by means of differential rates of customs duties.

New Zealand is also noted for its humanitarian legislation, and, in fact, was one of the first countries in the world to introduce a national system of old age pensions. Reference may also be made, in passing, to the Industrial Conciliation and Arbitration Acts, whereby industrial disputes have been reduced to a minimum.

Finally, enjoying an equable climate and a diversity of scenic attractions and natural phenomena unsurpassed in their variety by those of any other country, New Zealand offers unlimited scope to the tourist. In the North Island is found the world-famed thermal region, while in the South Island, in addition to lake and mountain scenery and the famous fiords, what has been justly described as the "finest walk in the world" is accessible to the tourist. In addition, the attractions from the sportsman's point of view, the deep-sea fishing, the angling thrills of the numerous lakes, rivers, and coastal waters, and the opportunities for excellent deer stalking, all combine to make the Dominion's scenic resorts one of its most important natural resources.

Prime Minister of New Zealand.

PHYSIOGRAPHY.

The Dominion of New Zealand is distant about 1,200 miles south-east of the mainland of Australia, and consists of three main islands in the South Pacific Ocean, known as the North, South, and Stewart Islands, having a length of 1,100 miles, between 34° 22′ and 47° 18′ South latitude and 162° East longitude – 173° West longitude, with several groups of smaller islands lying at some distance from the principal group.

Geographical.—The two principal islands of New Zealand have a total length of 1,040 miles, the total coast-line reaching 4,330 miles. A large portion of the surface is mountainous in character. The principal range is that of the Southern Alps, having its culminating point in Mount Cook (12,349 ft.). The North Island mountains include several active and dormant volcanoes. Mt. Ruapehu (9,175 ft.) and Mt. Ngauruhoe (7,515 ft.) are the most important. Of the numerous glaciers in the South Island, the Tasman (18 miles by 1½) is the largest. The North Island in particular is noted for its hot springs and geysers. For the most part the rivers are too short and rapid for considerable use in navigation. The more important include the Waikato (220 miles in length), Wanganui (140) and Clutha (210). Lakes (Taupo, 238 sq. miles in area; Wakatipu, 112; and Te Anau 132) are abundant; many of them of great beauty.

Meteorological.—Owing chiefly to its great length, New Zealand's climate varies very considerably in its different divisions. In general it is mild with an abundant rainfall. Snow is rarely seen except upon the higher levels. Annual averages:—North Island, mean temperature 57° F., rainfall 47 in. (days with rain 163), sunshine, 2,134 hours; South Island, mean temperature 52° F., rainfall 56 in. (days with rain 145), sunshine, 1,956 hours.

GOVERNMENT.

The west coast of the South Island of New Zealand was discovered by Abel Jansen Tasman, the navigator (voyaging under the direction of the Netherlands' East India Company), on December 13, 1642. The islands were visited in 1769 by Captain Cook, who returned to them in 1773, 1774, and 1777. In 1793 the Government of New South Wales despatched H.M.S. *Daedalus* to the islands on a diplomatic mission. The first settlement of Europeans was made in 1814, but no colonisation took place until 1825. In 1840 British sovereignty was proclaimed, and on May 3, 1841, New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales. On Sept. 26, 1907, the designation was changed to *The Dominion of New Zealand*. The Constitution rests upon the Act of 1852, under which the executive authority is entrusted to a Governor (now Governor-General) appointed by the Crown and aided by an Executive Council, with a Legislature of two houses.

GOVERNOR-GENERAL.

Governor-Gen. and Commander-in-Chief of New Zealand, His Excellency The Right Hon. Lord Bledisloe, P.C., G.C.M.G., K.B.E., D.SC., *apptd.* 1930 (Salary £7,500; H.E. has relinquished £1,500) £6,000
Military Secretary, Major Arthur H. Bathurst.
Official Secretary, A. Cecil Day, C.M.G., C.B.E.
A.D.C.'s, Lt. Sir John Hanham, Bt.; Lt. J. C. Elworthy, R.N.

*§ EXECUTIVE COUNCIL.

His Excellency the GOVERNOR-GENERAL.

COALITION CABINET (Oct. 1931).

Prime Minister, Minister of Railways, of External Affairs, and in Charge of Scientific and Industrial Research, Public Trust, Electoral and High Commissioner's Departments, Rt. Hon. G. W. Forbes, P.C. ..... §£3,000
Minister of Public Works, of Transport, and in Charge of Unemployment and Roads and Public Buildings, Rt. Hon. J. G. Coates, P.C., M.C. ..... §£1,053
Minister of Lands, Commissioner of State Forests, and Minister in Charge of Land for Settlements, Scenery Preservation, Discharged Soldiers' Settlement, and Valuation Departments, Hon. E. A. Ransom ..... §£1,053
Minister of Finance, of Customs, of Stamp Duties, Attorney-General, and Minister in Charge of State Advances and Land and Income Tax Departments, Hon. W. Downie Stewart ..... §£1,053
Minister of Native Affairs, of Cook Islands, and in Charge of Native Trust, Government Life Insurance, State Fire and Accident Insurance, Legislative, Public Service Superannuation, Friendly Societies and National Provident Fund Departments, and Member of the Executive Council representing the Native Race, Hon. Sir Apirana Ngata, Kt. ..... §£1,053
Minister of Health, of Immigration, and in Charge of Mental Hospitals and Printing and Stationery Departments, Hon. J. A. Young ..... §£1,053
Minister of Education and of Industries and Commerce, Hon. R. Masters, M.L.C. §£1,053
Minister of Agriculture and of Mines, Hon. D. Jones ..... §£1,053
Minister of Defence, of Justice, and in Charge of Pensions, Police, and Prisons, Marine, and Inspection of Machinery Departments, Hon. J .G. Cobbe ..... §£1,053

* Members of the Executive Council travelling within the Dominion on public service are entitled to an allowance not exceeding £1 10s. *per diem* when so engaged, but not during attendance at a session of the General Assembly. A house allowance of £182 is also paid where a Government residence is not provided.
§ Salaries subject to 10 per cent cut.

Postmaster-General, Minister of Telegraphs, of Labour, of Internal Affairs, and in Charge of Tourist and Health Resorts, Publicity, Registrar-General's, Government Statistician's, Audit, Museum, and Advertising Departments, Hon. A. Hamilton ..... §£1,053
Member of Executive Council without Portfolio, Hon. R. Masters M.L.C.

HIGH COMMISSIONER IN LONDON.

High Commissioner in London, Sir T. M. Wilford, K.C.M.G., K.C., New Zealand Government Offices, 415 Strand, W.C. 2 £1,800
Secretary, F. T. Sandford 860

THE LEGISLATURE.

Parliament consists of a General Legislative Council appointed by the Governor (prior to 1891 the appointments were for life; since that date for 7 years only), at present consisting of 40 members; and a House of Representatives consisting of 80 members elected for 3 years. Four of the members are Maoris elected by the natives. Women are entitled to vote and to be elected Members of the House of Representatives (Women's Parliamentary Rights Act, 1919). Members of the Upper House receive £283 10s. *per annum*, and of the Lower House £405 *per annum*, in each case with travelling expenses and deductions for non-attendance.

Speaker of the Legislative Council, Hon. Sir W. C. F. Carncross, Kt. £648
Speaker of the House of Representatives, Hon. Sir C. E. Statham (plus sessional allowance of £90 per annum and free sessional quarters) 810

THE JUDICATURE.

The judicial system comprises a Supreme Court and Court of Appeal; also Magistrates' Courts, having both civil and criminal jurisdiction.

Chief Justice, Hon. Sir Michael Myers, K.C.M.G. £2,250
Puisne Judges, Hons. Sir A. L. Herdman, J. R. Reed, C.B.E., A. S. Adams, W. C. MacGregor, H. H. Ostler, A. W. Blair, D. S. Smith, R. Kennedy ..... each 2,000
Judge, Court of Arbitration, Hon. F. V. Frazer 2,000

In 1930, 63,120 civil cases were tried in Magistrates' Courts, while summary convictions in criminal cases were 47,247. In 1930 convictions (or sentences) in Supreme Courts were 1,524. Civil cases to number of 456 were tried, and 659 judgments were recorded for a total amount of £260,870.

POLICE.

On March 31, 1931, the strength of the Police Force was 1,161 of all ranks, equivalent to 1 for every 1,292 of the population. Average cost of police protection per inhabitant was, in 1930-31, 6*s.* $0\frac{1}{2}$*d.*

LOCAL GOVERNMENT.

For purposes of local government the Dominion is divided into counties and ridings, with incorporated boroughs, under elected county and municipal councils, town, road, electric power, and harbour boards.

For cities or boroughs, any adult of either sex resident in the town may register as an elector. Non-resident ratepayers may also exercise the franchise.

For counties, adult ratepayers of either sex may register as electors, and may have one, two, or three votes according to the value of their property.

Revenue of local bodies, 1929-30	£16,757,718
Receipts not revenue, 1929-30	5,495,427
Expenditure, 1929-30	22,061,088
Net indebtedness, March 31, 1930 ...	61,595,740

PASSPORTS.

With certain exceptions, no person over 15 years is permitted to land unless in possession of a passport issued by a competent British authority.

DEFENCE.

Army.

The New Zealand Defence Forces consist of the Permanent Force, the Territorial Force and the Senior Cadets.

Units of the N.Z. Permanent Forces are the New Zealand Staff Corps, the New Zealand Permanent Staff, the Royal New Zealand Artillery, the New Zealand Permanent Air Force, the New Zealand Army Ordnance Corps, the New Zealand Permanent Army Service Corps, and the New Zealand Army Medical Corps. The compulsory territorial system (including Senior Cadets) is at present in abeyance, for reasons of economy. It has been replaced by a volunteer system on a reduced scale. Recruitment for volunteer units is at present in process.

Navy.

In 1909 New Zealand presented the battle-cruiser *New Zealand* to the Imperial Government. The Naval Defence Act, 1913, provides for the establishment of a New Zealand Naval Force by voluntary enlistment for a prescribed period (fixed at 12 years or until age 30), members on discharge to be drafted into the New Zealand Royal Naval Reserve for such period as may be prescribed for service only in time of war: the ships and personnel forming the Force to pass under the control and to be at the disposition of the Imperial Government in time of war. A Naval Board controls all matters relating to the Naval Forces, and is vested with the executive command of the Naval Forces. By Order-in-Council of the 20th June, 1921, it was provided that the ships and personnel shall be described respectively as forming and belonging to "The New Zealand Division of the Royal Navy." Expenditure on naval defence 1930-31, £632,240. The New Zealand Division comprises the cruisers *Diomede* and *Dunedin*, the depôt ship *Philomel*, the trawler *Wakakura*, and oil-tanker *Nucula*. Two sloops, *Veronica* and *Laburnum*, are maintained by the British Government for duties in the South Pacific within the limits of the New Zealand station.

*FINANCE.

Year.	Revenue.	Expenditure.	Gross Debt.
1927	£24,942,107	£24,355,965	£245,850,889
1928	25,123,980	24,944,905	251,396,252
1929	23,599,676	24,176,928	264,191,983
1930	25,349,861	25,200,882	267,383,343
1931	23,068,931	24,708,042	276,033 358

* Financial year ends March 31; railway revenue and expenditure are excluded throughout, and post and telegraph revenue and expenditure in 1929, 930 and 1931.

—*At the end of 1929 there were six* issue doing business, two of which were land banks. Total assets (average of ers of year), £69,748,071; liabilities, 419; value of notes in circulation, 717.

-office and private savings banks had, at se of the year 1930–31, 1,081,510 depositors, £57,355,133 to their credit.

EDUCATION.

State system of education is free, secular, ompulsory. There were (December, 1930) public primary schools, with 6,433 adult hers and 220,813 scholars; there are also 306 stered private primary schools, with 26,451 lars, and, in addition, 138 village schools for Maoris with 7,070 scholars. The higher cation of boys and girls in the cities and e towns is carried on in 46 endowed colleges d grammar schools, in 21 technical high and chnical day schools. In addition there are 81 econdary depts. of district high schools, and 2 junior high schools, 48 private secondary schools, and 12 secondary schools for Maoris. The University of New Zealand consists of Auckland University College, Victoria University College, Canterbury University College, and the University of Otago, the four colleges having 4,821 students in 1930, and has power to confer degrees.

PRODUCTION AND INDUSTRY.

Agriculture and Forestry.—The total area of the Dominion (excluding annexed islands) is 66,390,262 acres, and, apart from boroughs and holdings under 1 acre, 43,368,653 acres of this were in occupation in 1930, this acreage representing 85,167 holdings. New Zealand is a pastoral rather than an agricultural country, but the quantity of wheat and oats grown is sufficient for the Dominion's requirements. The area under wheat in 1929-30 was 235,942 acres, giving a yield of 7,239,556 bushels. An area of 67,722 acres of oats was threshed, the yield totalling 3,022,288 bushels; while 190,072 acres were converted to chaff, hay, or ensilage. Other acreages in 1929–30 were: barley, 18,631; peas, 9,855; rye-grass, 30,055; and potatoes, 23,214. An area of 485,773 acres was sown in turnips and mangolds. Amongst the forest productions are the Kauri pine (found only at the northern extremity of the islands), much valued for shipbuilding and for its resin (Kauri gum). New Zealand flax is used for the manufacture of ropes and twine.

Live Stock.—The cattle in 1930 numbered 3,765,668; sheep, 30,841,287; pigs, 487,793; and horses, 297,195. Sheep in 1931 numbered 29,702,506. The pastures of the South Island produce the celebrated sheep of the Canterbury Plain.

Manufactures.—Statistics of factory production show (1929–30) 5,177 factories in operation, employing 85,797 hands. Value of output for year, £93,464,526.

Minerals.—Coal-mining is one of the largest industries, the output in 1929 being 2,535,864 tons, the approximate total output to the end of 1929 being 71,299,000 tons. Gold-mining, both alluvial and quartz, is an important industry in many districts, and rich iron ore, in the form of ironsand, occurs in great abundance in Taranaki, and in the form of brown hæmatite at Onakaka and Parapara, near Nelson.

EXTERNAL TRADE.

Year.	Imports.	Exports.	Total
1926...	£49,889,563	£45,275,575	£95,165,138
1927...	44,782,946	48,496,354	93,279,300

Frozen Meat ...	10,937,382
Cheese ...	6,438,438
Hides, Skins and Pelts ...	2,198,967

The external trade of 1930 was shared by the principal countries as under:—

Country.	Imports from.	Exports to.
United Kingdom ...	£21,132,142	£36,015,393
Australia ...	3,674,073	1,562,281
United States ...	7,391,361	2,116,752
Canada ...	3,804,909	2,539,212
Japan ...	550,856	154,741
France ...	385,015	519,727
India ...	627,543	406,878
Ceylon ...	693,576	9,066
Germany ...	736,683	401,054
Belgium ...	388,301	199,048
Dutch East Indies...	807,500	13,019

COMMUNICATIONS.

Railways.—In March, 1931, there were 3,322 miles of Government railway lines in working order, and more under construction; and 117 miles of private lines, together with an excellent system of road service cars. The number of passengers carried on Government lines in 1930-31, including season-ticket holders, was 22,813,708, and in addition 3,187,654 on railway road motor services, while goods carried amounted to 6,963,073 tons. Operating revenue and expenditure were £6,781,388 and £6,406,144 respectively.

Shipping.—During 1930 the vessels entered inwards numbered 592 (tonnage, 2,267,074), and those entered outwards 607 (tonnage, 2,357,166), exclusive of coasting vessels.

Posts and Telegraphs.—The annual postal circulation was (1930), 322,732,067 letters and postcards, 47,647,098 newspapers, 165,180,054 books

and packets, and 6,447,194 parcels, and the work is effected by 1,773 post-offices. There are 12,588 miles of telegraph line, with 63,656 miles of wire. The telephone service is highly efficient and universal in all centres. Telegrams transmitted during year, 17,222,462.

TOWNS.

CAPITAL, WELLINGTON, in the North Island.

The estimated population of the Urban Areas, at April 30, 1931, was as follows:—Wellington, 143,000; Auckland, 217,000; Christchurch, 127,300; Dunedin, 86,500; Wanganui, 27,850; Invercargill, 24,000; Palmerston North, 22,800; Napier, 19,300; Timaru, 18,350; New Plymouth, 18,200; Hamilton, 18,100; Hastings, 16,750; Gisborne, 16,250; Nelson, 12,500; Masterton, 8,600; Oamaru, 7,600; Whangarei, 7,600; Greymouth, 6,180; Ashburton, 5,380; Blenheim, 5,330; Rotorua, 5,270.

THE ISLANDS OF NEW ZEALAND.

The following islands form part of the Dominion proper:—*North Island* and adjacent islets, *South Island* and adjacent islets; *Stewart Island* and adjacent islets, and *Chatham Islands*, between 43° 30′ S. lat. and 175° 40′–177° 15′ W. long. Chatham Islands have a population of 620, half of whom are Maoris and half-castes. They support large flocks of sheep and some cattle.

The following are included in the geographical boundaries of New Zealand as proclaimed in 1847:—*The Three Kings* (discovered by Tasman on the Feast of the Epiphany), in 34° 9′ S. lat. and 172° 8′ 8″ E. long. (uninhabited). *Auckland Islands*, about 290 miles south of Bluff Harbour, in 50° 32′ S. lat. and 166° 13′ E. long. The islands contain several good harbours, but are uninhabited. *Campbell Island* (uninhabited). *Antipodes Group* (49° 41′ 15″ S. lat. and 178° 43′ E. long.) uninhabited, and *Bounty Islands* (47° 43′ S. lat., 179° 0′ 30″ E. long.) uninhabited.

The following islands have been annexed to New Zealand:—

The Kermadec Group, between 29° 10′ to 31° 30′ S. lat., and 177° 45′ to 179° W. long, includes Sunday, Macaulay, Curtis Islands, and L'Espérance, and some islets. The group is uninhabited.

Cook Islands, included in the boundaries of New Zealand since June, 1901, consist of the islands of Rarotonga, Aitutaki, Mangaia, Atiu, Mauke, Mitiaro, Manuae and Te Au-o-tu), Takutea, Palmerston, Penrhyn (or Tongareva), Manahiki, Rakahanga, Pukapuka (or Danger), Niue (or Savage), Suwarrow, and Nassau. The population at the Census of 1926 numbered 13,877, all except 313 being Natives. The chief products are bananas, oranges, and other tropical fruits, copra, coffee, pearl-shell, and hats (Niue). The trade is chiefly with New Zealand and the United States of America. The exports (1930) were valued at £125,315, and the imports at £122,098. Rarotonga is the chief island, with a native population of 3,731, and a population other than native of 205. The government is administered locally under the direction of New Zealand. The Island Council of the Cook Islands is under the direction of the Resident Commissioner at Rarotonga. The five Arikis of Rarotonga are of equal rank and all members of the Council. Rarotonga is a call for the mail steamers between N.S.W., and Wellington, N.Z., and cisco, U.S.A.

Resident Commissioner, Rarotonga, H. Ayson, C.M.G.

Resident Comm., Niue, W. M. Bell, C.B.E.

Ross Dependency—By Imperial Order Council of July 30, 1923, the coasts Ross Sea, with adjacent island and territ were proclaimed a British Settlement the control of the Governor-General of Zealand.

Tokelau or Union Islands.—A group of (population 999), transferred from Gilbert Ellis Islands Colony in 1926, and now administered on behalf of New Zealand by Administrator of Western Samoa.

The Mandated Territories are:—

Western Samoa, consisting of the islands Savai'i, Manono, Apolima, Upolu, Fanuatapu, Namua, Nuutele and Nuulua (the remaining islands of the Samoan group belonging to the U.S.), have a total area of 1,135 square miles and a population at the Census of 1926 of 40,229. 36,880 were Samoans, 1,079 Chinese and Melanesians, and 2,270 half-castes and Europeans. The largest islands are *Savai'i* (703 square miles) and *Upolu* (430 square miles). Upolu contains the harbours of Apia and Saluafata, of which the former is the capital. In 1889 a very heavy sea set up by a cyclone wrecked three U.S.A. warships and the *Eber* and *Adler* of the German Navy, H.M.S. *Calliope*, of the British Navy, effecting its escape. The disaster is recorded in "A Footnote to History," by R. L. Stevenson, whose home was at Vailima (near Apia). The natives of the islands are Christians of different denominations, including a few adherents of the Latter Day Saints (Mormons). Coco-nuts (copra), cocoa, bananas and rubber are the chief products of the islands. The exports were valued in 1930 at £284,515 (copra £166,221), and the imports at £275,355.

Administrator, Brigadier-General H. E. Hart, C.B., C.M.G., D.S.O., V.D.

NAURU ISLAND.

Nauru Island, situated in longitude 166 degrees east, and 26 miles south of the Equator, was proclaimed German territory on Oct. 1, 1888, and was administered as part of the (German) Marshall Islands group until its surrender to the Australian Forces in 1914. The island was included in the cession of colonies made by Germany in 1919, and is now administered by the United Kingdom, the Commonwealth of Australia, and the Dominion of New Zealand under a mandate from the Allied and Associated Powers, 1919, the first and second Administrators having been appointed by agreement by the Australian Government. The island has a population (April 1, 1930) of 2,684, of whom 147 are Europeans. There are valuable deposits of phosphates on the island, and in 1929 the exports of phosphates were 326,125 tons (valued at £346,052). The value of the imports in 1929 was £101,692.

Administrator, W. A. Newman (*address*, Nauru, Central Pacific).

AREA AND POPULATION.

Provinces.	Area (English Sq. Miles).	Census of 1921. European.	Census of 1921. Total.	European Population, 1931 (Preliminary).
Cape of Good Hope	276,536	650,609	2,782,719	748,455
Natal	35,284	136,838	1,429,308	177,424
Transvaal	110,450	543,485	2,087,636	695,963
Orange Free State	49,647	188,556	628,827	205,324
Union of South Africa	471,917	1,519,488	6,928,580	1,827,166
South-West Protectorate .	312,194	19,432	227,739	24,115

Of the European population of the Union, 1931 (Parliamentary figures), 930,031 were males, and 897,135 females. The increase in the European population of the Union (1926–31) was 8·9 per cent. For the Provinces it was as follows:—Cape, 5·9 per cent.; Natal, 11·6 per cent.; Transvaal, 14·4 per cent.; Orange Free State, 1·2 per cent.

Births, Deaths, and Marriages of European Population.

Number.				Rate per Thousand.			
Year.	Births.	Deaths.	Marriages.	Year.	Births.	Deaths.	Marriages.

† Preliminary figures.

A law (No. 17 of 1923) amending and consolidating the pre-Union Acts in force in the four Provinces was passed and came into force as from the 1st January, 1924. Under this law registration of all European, Asiatic and Coloured (as distinct from Native) births and deaths was compulsory throughout the Union. Registration of Native births and deaths is compulsory only in urban areas. Only marriages solemnized under the prescribed civil laws are subject to registration.

PHYSIOGRAPHY.

Boundaries.—The provinces of the Union extend from the southernmost point of the African Continent to the course of the Limpopo River, *i.e.*, from 34° 50′ – 22° South latitude, and include all the British territories within those limits, with the exception of Basutoland and the Swaziland and Bechuanaland Protectorates, while provision is made for the future inclusion within the Union of those territories and of the territories of the British South Africa Company.

Relief.—The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous *Table Mountain* (3,582 feet), while the *Great Zwarte Bergen* and *Lange Bergen* run in parallel lines from west to east of the Cape province. Between these two ranges and the *Roggeveld* and *Nieuweveld* to the north is the Great Karroo Plateau, which is bounded on the east by the *Sneeuwbergen*, containing the highest summit in the province (Compassberg, 7,800 feet). In the east are ranges which join the *Drakensbergen* (11,000 feet) between Natal and the Orange Free State.

The Orange Free State presents a succession of undulating grassy plains with good pasture-land, at a general elevation of some 3,800 feet, with occasional hills or kopjes. The Transvaal is also mainly an elevated plateau with parallel ridges in the *Magalies* and *Waterberg* ranges of no great height. The veld or plains of this northernmost province is divisible into the Hooge Veld of the south, the Banker Veld of the centre, and the Bush Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a mimosa-covered waste. The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the Drakensberg and the coast, the interior rising in terraces as in the southern provinces.

Rivers.—The *Orange*, with its tributary the *Vaal*, is the principal river of the south, rising in the Drakensbergen and flowing into the Atlantic between the Protectorate of South West Africa and the Cape of Good Hope. The *Limpopo*, or Crocodile River, in the north, rises in the Transvaal and flows into the Indian Ocean through Portuguese East Africa. Most of the remaining rivers are furious torrents after rain, with partially dry beds at other seasons.

HISTORICAL SKETCH.

The *Cape of Good Hope* was discovered in 1486 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an ocean route to India. Diaz merely doubled the Cape and returned home. Eleven years later, in 1497, Vasco da Gama not only doubled the Cape and landed in what is now Natal, but successfully accomplished the voyage to India. The Portuguese, however, did not make any permanent settlement at the Cape, although it was used by their vessels, and subsequently also by those of England and Holland, as a place of call in going to and from the East Indies. In 1652 the Netherlands' East India Company took possession of the shores of Table Bay, established a fort, and occupied the adjacent lands, in order to be always ready with supplies for their passing ships. In 1814 the Cape was formally ceded to the British Crown.

Natal derives its name from the fact of its discovery on Christmas Day, 1497, by the celebrated Portuguese navigator, Vasco da Gama. The first European settlement was formed (1824) by a small party of Englishmen, who came by sea and established themselves on the coast where Durban now stands. Natal was then a part of the great Zulu kingdom under T'Chaka. Between 1835 and 1837 another settlement was formed by a large body of Dutch Boers, who came with their waggons overland from the Cape Colony and settled in the northern districts, where to this day the Boers preponderate. In the year 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1893 acquired responsible government.

The *Transvaal* was formed as the *South African Republic* by parties of Dutch Boers from the English colonies who "trekked" into the interior of the continent and wrested the land across the Vaal river from the native chiefs. The discovery of the goldfields within its borders led to the settlement of large numbers of foreigners, and eventually to hostilities with the British Government. A war of nearly three years' duration was fought with great tenacity, and its close was marked by the inclusion of the South African Republic within the British Empire, "responsible government" being granted almost immediately.

The *Orange Free State* was founded, in much the same way as the Transvaal, by Boer emigrants from Cape Colony, and its independence was granted in 1854. Its subsequent history is identical with that of the Transvaal.

Delville Wood.—The title deeds of Delville Wood, containing the graves of South African troops who fell there during the battles on the Western Front in France in the Great War, are held by the Government of the Union of South Africa, and Delville Wood is part of South Africa.

GOVERNMENT.

The Union of South Africa is constituted under the South Africa Act, 1909 (9 Edw. VII., cap. 9), passed by the Parliament of the United Kingdom on September 20, 1909. In terms of that Act the self-governing Colonies of the Cape of Good Hope, Natal, the Transvaal and the Orange River Colony became united on May 31, 1910, in a legislative Union under one Government under the name of the Union of South Africa, those Colonies becoming original Provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal and the Orange Free State respectively.

The Union Government is seised of all State property, and the Railways, Ports, Harbours and Customs are administered by Union Commissioners for the benefit of a Consolidated Revenue Fund. The former debts of the Provinces are administered by and form a first charge upon the funds of the Union. Provision is made in the Act of 1909 for the admission to the Union of Rhodesia, and for the transfer to the Union Government of the administration of protected and other native territories. The Union was inaugurated by H.R.H. the Duke of Connaught, K.G., in 1910.

The Government publishes annually an "Official Year Book of the Union of South Africa," giving full statistics and descriptive information on all matters of public concern.

The seat of the Government is Pretoria; the seat of the Legislature is Cape Town.

The Executive is vested in a Governor-General appointed by the Sovereign, and aided by an Executive Council, with a Legislature of two Houses.

Governor-General (Cape Town and Pretoria), The Right Honourable the Earl of Clarendon, G.C.M.G. ..... (1931)	£10,000
Secretary, Capt. H. T. Birch Reynardson	900
Private Secretary and Comptroller, Lt.-Col. E. H Davidson, C.B.E., M.C.	600

Minister of Railways and Harbours, Hon. C. W. Malan 2,500
Minister of Lands, Hon. P. G. W. Grobler 2,500

HIGH COMMISSIONER IN LONDON.

High Commissioner for the Union, C. T. te Water, South Africa House, 73 Strand, W.C. 2.
Secretary, J. G. Hubball.

TRADE COMMISSIONERS.

Trade Commissioner, J. H. Dimond.
Envoy Extraordinary and Minister Plenipotentiary, The Hague, D. J. de Villiers.
Envoy Extraordinary and Minister Plenipotentiary, Washington, D.C., U.S.A., E. H. Louw.
Trade Commissioner for the Union in East Africa, Nairobi, Col. Beresford Turner, C.M.G., D.S.O.

THE LEGISLATURE.

The *Senate* consists of 40 members. For ten years after the establishment of Union eight were nominated by the Governor-General-in-Council and 32 were elected, eight for each Province. The first election was made prior to the establishment of the Union by the two Houses of each of the Colonial Legislatures sitting as one body, and a vacancy was filled by the choice of the Provincial Council in respect of whose Province a vacancy occurred. Since 1921 the Provincial element has been elected, according to the system of proportional representation with the single transferable vote, by the Members of the House of Assembly and of the Provincial Council for each Province sitting together and presided over by the Administrator of such Province. Vacancies amongst elected Senators are filled in the same manner, but only for the period which the Senator in whose place the new Senator is elected would have held his seat. Originally, under Section 24 of the South Africa Act, nominated Senators held their seats for a period of ten years, but this provision was amended by Act No. 54 of 1926, and nominated Senators are now required to vacate their seats on the dissolution of the Senate or upon a change of Government. Of the eight nominated Senators, four are selected on the ground of their thorough acquaintance, by reason of their official experience or otherwise, with the reasonable wants and wishes of the coloured races.

The *House of Assembly* consists of 148 elected members, 58 of whom represent the Cape of Good Hope, 17 Natal, 55 Transvaal, and 18 the Orange Free State. Members of both Houses must be British subjects of European descent.

The Fifth Delimitation Commission, appointed on July 19, 1927, has divided the country into the following constituencies: Cape of Good Hope, 58; Natal, 17; Transvaal, 55; Orange Free State, 18.

President of the Senate, Sen. the Hon. C. A. van Niekerk ... £1,200
Speaker of the House of Assembly, Hon. H. H. De Waal ... 2,000

LOCAL GOVERNMENT.

A Provincial Council in each Province has power to legislate by ordinance on certain subjects specified in the Act, and on such other subjects as may be delegated to it. All ordinances passed by a Provincial Council are subjected to the veto of the Governor-General in Council. Members of the Provincial Council are elected on the same system as Members of Parliament, but the restriction as to European descent does not apply. Provincial administration is in the case of each Province vested in an Administrator, with an Executive Committee of four members. The Provincial Council in each case consists of the same number of elected members as there are electoral divisions of such Province for the House of Assembly, unless that number is less than 25 (as in the cases of Natal and the Orange Free State), when the number is 25. Each Council exists for a period of three years. Direct taxation is permitted for Provincial purposes, and legislation is authorised on certain specified subjects.

Administrators of the Provinces.

Cape ... The Hon. J. H. Conradie £2,500
Natal ... The Hon. H. G. Watson, I.S.O. 2,000
Transvaal ... The Hon. J. S. Smit 2,500
Orange Free State... The Hon. C. T. M. Wilcocks ... 2,000

Provincial Secretaries.

Cape ... A. S. Weisbecker 1,390
Natal ... A. E. Charter 1,180
Transvaal ... C. E. Viljoen, B.A., LL.B. 1,415
Orange Free State ... R. A. Gregorowski 1,210

Native High Court, Natal.

Judge President, Hon. I. Grindley Ferris 1,500
Judges, A. W. Leslie ; S. A. McCormick ; E. H. Britter .....each 1,400

DEFENCE.

The South Africa Defence Act, 1912, became law on June 14, 1912. This Act, as amended by the South Africa Defence Act Amendment Act of 1922, provides for the establishment of Defence Forces comprising :—

1. *The South Africa Permanent Force*, which consists of :—
(i) The South African Staff Corps.
(ii) The South African Instructional Corps.
(iii) The South African Naval Service.
(iv) The South African Field Artillery.
(v) The South African Permanent Garrison Artillery.
(vi) The South African Engineer Corps.
(vii) The South African Air Force.
(viii) The South African Service Corps.
(ix) The South African Medical Corps.
(x) The South African Ordnance Corps.
(xi) The South African Veterinary Corps.
(xii) The South African Administrative, Pay, and Clerical Corps.

The South African Naval Service includes the officers and men of the South African Division of the Royal Naval Volunteer Reserve engaged for whole-time service.

2. *The Coast Garrison Force*, which consists of :—
(i) The South African Garrison Artillery.
(ii) The South African Coast Defence Corps.

3. *The Citizen Force*, which consists of :—
(i) The Active Citizen Force.
(ii) The Citizen Force Reserve.
(iii) The National Reserve.

4. *The South African Division of the Royal Naval Volunteer Reserve.*

5. *Special Reserves.*

Every citizen between the ages of 17 and 60 is liable to render personal service in time of war, and those between 17 and 25 are liable to undergo a prescribed peace training with the Active Citizen Force spread over a period of four consecutive years. The Act states, however, that only 50 per cent. of the total number liable to peace training shall actually undergo that training unless Parliament makes financial provision for the training of a greater number.

The establishment of Rifle Associations, under the Citizen Force Reserve, is a marked feature of the Act ; citizens between the ages of 21 and 25 who are not entered for peace training with the Active Citizen Force are to be compelled to undergo training during these four years in a Rifle Association, thus ensuring that, in course of time, all citizens will at least know how to handle and use a rifle.

Provision is made in the Act for the cadet training of boys between 13 and 17 in urban and other populous areas, where facilities can conveniently be arranged.

The Union is divided into 6 military districts. To each military district has been allotted various units of different arms, to which the citizens entered for peace training in their 20th and 21st years are posted.

EDUCATION.

In the South Africa Act, Section 85 (iii.), it is provided that "Education, other than higher education, for a period of five years and thereafter, until Parliament otherwise provides, shall be and remain under the jurisdiction of the respective Provincial Councils."

Under Act No. 5 of 1922 a definition is given of the term "higher education." Section 11 of that Act, as amended by Section 14 of Act No. 46 of 1925, reads as follows :—The expression "higher education" as used in Section 85 of the South Africa Act, 1909, shall include *inter alia* : (*a*) Education provided by universities and university colleges incorporated by law ; (*b*) education provided by the South African Native College ; (*c*) education provided by such technical institutions (including schools of art, music, commerce, technology, agriculture, mining and domestic science) as the Minister of Education may declare to be places of higher education ; (*d*) such part of the education provided by other technical institutions as the Minister of Education may, after consultation with the provincial administration concerned, declare to be higher education ; (*e*) any other education which, with the consent of the provincial administration concerned, the Minister of Education may declare to be higher education.

In terms of clauses (*c*), (*d*) and (*e*) above, the Provinces have been relieved of all vocational education (technical, industrial and agricultural), and the Department of Education under the Minister is therefore now concerned with—

I. Universities and university colleges comprising the following :—

1. *University of South Africa*, with the following constituent colleges—
Potchefstroom University College, Potchefstroom.
Grey University College, Bloemfontein.
Rhodes University College, Grahamstown.
Huguenot University College, Wellington, C.P.
Natal University College, Pietermaritzburg.
2. *University of Capetown.*
3. *University of Stellenbosch.*
4. *University of the Witwatersrand.*
5. *University of Pretoria.*

II. Technical colleges which have been established under Act No. 30 of 1923 at Capetown, Durban, Johannesburg, Port Elizabeth, East London, Pretoria, Pietermaritzburg, and Bloemfontein.

III. Industrial, trade and agricultural schools (State and State-aided) at various centres throughout the Union.

The number of students at universities and university colleges for the year 1930 was 6,990. The State expenditure on higher education as above defined during the financial year 1930-31 was £857,300.

Primary Education and Education other than Higher Education.—The central direction of public education (other than higher education) is exercised by the Provincial Education Department in each of the four Provinces of the Union. Each Department is controlled by a Director or Superintendent of Education. In the Cape

Province practically all the schools are State-aided. In Natal they are partly State schools and partly State-aided. In the Transvaal and Orange Free State they are in the main State schools. In all Provinces primary education is free.

Number of State and State-aided Schools in the Union in 1930.—For European scholars, 4,926; for Non-European scholars, 4,038; total, 8,944.

Number of Scholars and Teachers in 1930.—European scholars, 353,942; Non-European scholars, 382,707; total, 736,649. Teachers—In European Schools, 15,846; in Non-European Schools, 9,961.

State Expenditure on Education in 1930.—Cape, £3,413,712; Natal, £755,707; Transvaal, £2,886,457; Orange Free State, £935,327; total, £7,991,203.

Private Schools in 1930.—European, 264; Non-European, 474; total, 738.

Number of Scholars.—European, 20,652; Non-European, 20,800; total, 41,452.

Number of Teachers.—European, 1,194; Non-European, 598; total, 1,792.

In all Provinces Normal Colleges and other institutions for the training of teachers are maintained by the Education Departments.

Superintendent-General of Education, Cape, Prof. M. C. Botha, M.A.

Supt. of Education, Natal, F. D. Hugo, B.A.

Director of Education, Transvaal, N. M. Hoogenhout, M.A., Ph.D. (*Strassburg*).

Director of Education, Orange Free State, S. H. Pellissier, B.A.

UNION FINANCE.

The ordinary Revenue and Expenditure of the Union (exclusive of subsidies to Provincial Administrations and interest on Railway capital) for the five years ended March 31, 1930, are stated as under:—

Year.	Revenue.	Expenditure.
	£	£
1925–1926	26,986,778	21,014,444
1926–1927	28,577,003	21,850,419
1927–1928	30,094,004	22,840,768
1928–1929	30,501,650	23,180,076
1929–1930	30,486,458	24,414,770

DEBT.

The Funded Debt of the Union at March 31, 1930, was £235,372,357 and the Floating Debt £14,278,840.

PROVINCIAL FINANCE.

Since their establishment in 1910 the powers and functions of the Provinces have undergone various alterations, and their powers of taxation have been limited from time to time. An Act (No. 46, 1925) to amend the laws regulating the financial relations between the Union and the several Provinces thereof was passed in the 1925 Session of Parliament, and as from April 1, 1925, the sources of revenue available to the Provinces are:—

(1) A subsidy from the Union Government based upon the average attendance of pupils receiving education within the Province, and the extent of other educational functions carried on by the Province.

(2) Certain scheduled and limited taxes.

(3) Certain taxes collected by the Union and assigned to the Provinces without power to legislate in regard thereto.

(4) Special grants of £75,000 each to the two smaller Provinces of Natal and the Orange Free State.

The requirements of the Provinces in regard to capital expenditure are supplied by the Union Government by way of loans. Special loans repayable in 10 years have been made by the Central Government to finance the deficits on the Provincial Revenue Funds at March 31, 1924.

The ordinary Revenue and Expenditure for six years ended March 31, 1930, were as follows:—

Financial Year.	Revenue transferred or assigned	Subsidies.	Total Ordinary Revenue.	Total Ordinary Expenditure.
	£	£	£	£
1924–25	4,419,065	4,429,486	8,848,551	9,201,899
1925–26	4,349,768	5,300,776	9,650,544	9,499,283

Manufactures.—The development of local industries has been most marked during the last three years, the scarcity of oversea supplies, with the consequent increase in prices, having served as a very effective measure of protection, under which enterprise has flourished to a degree previously unknown. New industries have sprung up in the principal centres of trade, and existing industries have largely extended their operations. From the recently published returns of manufactures in the Union, the total output during the year 1917-18 was £60,123,111 sterling; 1918-19, £70,934,098; 1919-20, £92,913,844; 1920-21, £98,307,910; 1921-22, £79,446,299; 1922-23, £74,436,292; 1923-24, £79,789,348; 1924-25, £84,159,604; and 1925-26, £91,536,926; 1926-27, £97,878,822; and 1927-28, £106,981,697. Amongst the new industries which have been established during the period of the War may be mentioned the following:—Wattle extract; industrial alcohol (motor fuel) from molasses; calcium carbide; sulphate of ammonia; bottle-making; starch from maize; iron smelting (still in the initial stage); arsenic production; detinning of scrap tin; copper manufacture, &c. The production during 1927-28 of certain specified industries is indicated by the following figures:—

PARTICULARS OF CERTAIN MATERIALS USED OR TREATED AND OF ARTICLES PRODUCED IN SPECIFIED INDUSTRIES DURING 1927-28.

Industry.	Quantity.	Value.
		£
Woolwasheries—		
Wool scoured	17,312,021 lb.	—

Total value of materials used	—	2,584,121

Mines and Minerals.—Gold mining still continues the chief source of the country's mineral wealth. At the outbreak of war the diamond mines closed down. The value of the output of the principal minerals of the Union in 1930 was:—

	£		£
Gold	45,520,166	Silver	83,414
Diamonds	8,340,719	Asbestos	340,795
Coal	3,494,350	Osmiridium	69,267
Copper	520,048	Corundum	17,635
Tin	118,200	Platinum	327,884

The mineral production for the Union of South Africa was as follows:—

Gold.

1921*	8,128,710	fine oz.	£43,082,162
1922*	7,009,858	,,	32,343,485
1923*	9,149,073	,,	41,574,945
1924*	9,575,040	,,	44,739,377
1925	9,597,592	,,	40,767,981
1926	9,954,762	,,	42,285,139
1927	10,122,491	,,	42,997,608
1928	10,354,264	,,	43,982,119
1929	10,412,326	,,	44,228,748
1930	10,716,351	,,	45,520,166

The labour employed in the gold industry in December, 1930, Transvaal, was 22,950 Europeans and 216,922 coloured.

Diamonds.

1922	669,559	metric carats	£2,266,631
1923	2,053,095	,,	6,038,207
1924	2,440,398	,,	8,033,406
1925	2,430,128	,,	8,198,128
1926	3,217,967	,,	10,683,597
1927	4,708,038	,,	12,392,308
1928	4,372,857	,,	16,677,772
1929	3,661,212	,,	10,590,113
1930	3,153,591	,,	8,340,719

The average labour employed in diamond mining, including individual diamond digging, was in 1930: Transvaal, 6,279 Europeans, 36,169 coloured; Cape, 3,231 Europeans, 12,337 coloured; O.F.S., 637 Europeans, 4,644 coloured; a total of 10,147 Europeans and 53,150 coloured. The value of diamonds owned throughout the world was stated to be £600,000,000 in 1918, one-half being owned by residents in U.S.A.

Coal.

(Tons of 2,000 lb.)

1930.

Transvaal	7,545,167	tons	£1,878,209
Cape	4,597	,,	3,167
O.F.S.	1,101,695	,,	305,260
Natal	4,454,854	,,	1,307,714
Totals	13,106,313	,,	£3,494,350

The average labour employed in coal mining in 1930 was: Natal, 628 Europeans, 15,315 coloured; Transvaal, 800 Europeans, 13,151 coloured; Cape, 8 Europeans, 84 coloured; O.F.S., 142 Europeans, 2,466 coloured; a total of 1,578 Europeans and 31,016 coloured.

Silver.

There are no silver mines in the Union. The output, valued at £83,414 in 1930, represents silver contained in gold bullion and base metal ores.

Copper.

(Tons of 2,000 lb.)

In 1930, 8,254 tons of concentrates were produced in the Transvaal, and 4,047 tons in the Cape Province. The total shipments of copper during the year amounted to 9,754 tons, valued at £520,048.

* Premium included—1920, 1921, 1922, 1923, 1924—£10,950,842, £8,553,598, £2,567,521, £2,712,151 and £4,067,191 respectively.

Tin.

(Tons of 2,000 lb.)

The Union figures for 1930 are 1,277 tons, valued at £118,200.

Other Minerals.

The value of the total mineral production of the Union for 1930 was £59,284,501. The value of miscellaneous products: quarry products, £91,297; lead, £104; magnesite, £4,239; graphite, £1,636.

EXTERNAL TRADE.

The total value of the Imports and Exports in the six years 1925–1930 (exclusive of silver and copper specie) was as follows. Note amended figures (exports) include Gold Specie:—

Year.	Imports.	Exports.	Total Trade.
	£	£	£
1925	67,928,799	89,377,614	157,306,413
1926	73,159,054	86,011,547	159,170,601
1927	74,069,308	95,355,152	170,424,460
1928	79,087,658	96,460,170	175,547,828
1929	83,449,195	97,757,434	181,206,680
1930	64,558,504	83,409,477	147,967,981

Imports.	1929.	1930.

COMMUNICATIONS.

Railways.—The first railway in South Africa was commenced in April, 1859, the first sod being turned by the then Governor of the Cape of Good Hope, Sir George Grey. This was very shortly followed by Natal, which started the construction of a line running from Durban. Another two lines finally linked up at Heidelberg in 1895. The Cape line was opened for public traffic to Stellenbosch in 1862 and to Wellington in 1863, while a track to Wynberg was opened to traffic in 1864. Little progress was, however, made in succeeding years, and it became evident that the development of the country could not be left to private enterprise. The existing Cape lines were therefore purchased by the Government on Jan. 1, 1873, and in 1876 Natal followed by acquiring the railways in that colony. Increased working at once took place, and the construction of four lines was pushed inland from Cape Town, Durban, Port Elizabeth, and East London. Bloemfontein was reached in 1890, and two years later a line to Germiston linked up with the system already established in the Transvaal.

The total open mileage of Government-owned lines at the end of March, 1930, was 12,873 miles (comprising Cape 5,094, Orange Free State 1,595, Transvaal 3,281, Natal 1,472, and South-West Africa 1,431), of which 11,977 miles are 3 ft. 6 in. gauge and 896 miles 2 ft. gauge. The capital expenditure on Government railways up to March 31, 1930, amounted to £143,327,541. The gross earnings for the year ending March 31, 1930, were £26,130,549, and the net profit, after payment of interest, £63,491. Working expenditure (excluding depreciation) amounted to £18,988,306, or 72·67 per cent. of the gross revenue, as compared with £18,798,664, or 72·05 per cent. of the gross revenue for the previous year. The *Cape to Cairo Railway*, projected by Cecil Rhodes, had advanced to Buluwayo by 1902, 1,362 miles from Cape Town and 3,600 miles from Cairo. Through communication by rail is now available from Cape Town to Port Francqui in the lower Congo, 3,300 miles, all 3' 6" gauge. The *Trans-Zambesi Railway, from Dondo (on the Beira-Mashonaland* line) to the Zambesi, was opened July 1, 1922, thus placing the Union in direct communication with Nyasaland.

Posts and Telegraphs.—On March 31, 1931, there were 3,260 post and 2,849 telegraph offices open in the Union. During the year 1930-31, 376,480,000 articles of mail matter, including 3,537,000 registered articles, addressed to places within and without the Union, were handled. An Air Mail service in conjunction with incoming and outgoing European mails operates between Cape Town and Port Elizabeth, with branches to Durban and Germiston. The number of money orders issued was 610,266, valued at £2,732,781, while 576,972 orders, value £2,496,420, were paid. 4,370,354 postal orders were issued, and 3,884,563 postal orders paid. The number of depositors in the Savings Bank was 441,816, with £6,861,625 standing to their credit. 5,644,638 inland telegrams (including press messages) were received and despatched during the year. 36,075 miles of telegraph wire were in use. There are 5 wireless telegraph stations in the Union, which during the year received from and transmitted to ships 16,828 messages, in respect of which £6,804 accrued to the revenue of the Department. The telephone system consists of 405,933 miles of wire, with 104,050 telephone instruments in the service of 77,964 subscribers, by whom approximately 170½ million (inclusive of 11 million trunk) calls were made through departmental telephone exchanges. The combined cash revenue from Posts, Telegraphs and Telephones was £4,029,173, comprising Postal £1,925,977; Telegraphs £506,275, and Telephone £1,596,921. The combined cash expenditure totalled £3,203,153.

Shipping.—In 1930, 5,702 vessels (15,699,478 *tons*) *entered, and* 5,692 *vessels* (15,678,302 *tons*) cleared at the ports of the Union of South Africa.

Railways and Harbours Board.

Chairman, Hon. C. W. Malan, M.P., Minister of Railways and Harbours.

Members, A. Kuit, R. B. Waterston, and D. Hugo.

Secretary, P. D. Troskie.

The railways, ports, and harbours of the Union are administered and worked under the control and authority of the Governor-General in Council, exercised through a Minister of State, who is advised by a Board consisting of three Commissioners.

The management and working of the railways and harbours are subject to the control of the Minister of Railways and Harbours, carried on by the General Manager, who is governed by such regulations as the Minister may from time to time frame, after consultation with the Board.

South-West Africa.

(*Suidwes-Afrika.*)

Administered under Mandate as an integral part of the Union of South Africa.

Administrator, Albertus Johannes Werth.

Secretary, H. P. Smit.

SOUTH-WEST AFRICA lies between S. lat. 17° 23′ and the Orange River, with a narrow strip between 18°–18° 30′ S. lat. extending from 21° to 25° E. long., known as the Caprivi Zipfel, and gives access to the Zambesi. The estimated area of the country is 322,394 square miles, and the population (1930) is approximately 275,522, of whom approximately 31,586 are Europeans. The estimated native population (1930) is distributed as follows: Territory proper, 100,603; *Ovamboland*, 117,000; *Kaokofeld*, 4,309; *Okawango*, 14,000; *Caprivi Zipfel* (eastern portion only) 8,024. Running more or less parallel to the coast, and roughly at a distance of 60 to 100 miles from it, is a broken range of mountains, from which there is a gradual slope to the sea. The country between these mountains and the coast is barren desert except towards the North, and is known as the Namib. Towards the East from these mountains the land slopes eastward and forms the western edge of the great Kalahari Plateau. The boundaries are the Okavango and Kuene Rivers, in the north, and the Orange River, in the south, all perennial streams of considerable volume. On the Orange are the *Aughrabies Falls*, twice the height of Niagara.

The native races are:—In the South, Hottentots. In the centre, Hereros and Bergdamaras, with the exception of the Rehoboth district, which is occupied by a mixed race known as the Bastards; and in the North, Ovambos. To the North and East there are many small bushmen tribes, some pure bushmen, but the remainder a mixture of aboriginal native tribes and bushmen. The Kaokoveld (the North-Western area) is very scantily inhabited by Hottentots and Ovatyimbas; the only Europeans are those allowed in under permit for the purpose of prospecting for minerals. It is very mountainous, and in many places well supplied with water.

The Administration of the country is exercised by the Governor-General, who has, however, delegated most of his powers to an Administrator appointed by the Union Government. The territory is divided into 17 Districts ruled over by Magistrates as the representatives of the Government. The territory of Walvis Bay, which is actually part of the Cape Province of the Union, is administered so far as possible as a portion of South West Africa, and its magnificent harbour will undoubtedly in the future prove of great benefit. The constitution granted under Union Act No. 42 of 1925 provides for a Legislative Assembly consisting of 12 elected and 6 nominated members, an Executive Committee of 4 members elected by the Assembly with the Administrator as Chairman. The powers of legislation granted exclude the following matters which are permanently reserved to the Union Government:—

(*a*) Native affairs or any matters specially affecting natives, including the imposition of taxation upon the persons, land, habitations or earnings of natives.

(*b*) Mines, minerals, mineral oils and precious stones; or the moneys derivable therefrom or payable to the administration in respect of licences for prospecting or winning the same or as share of the produce thereof or any taxation in connection therewith;

(*c*) The acquisition, construction, management, regulation, control and working of railways and harbours in the territory; and the organization, discipline and conditions of employment of and the payment of pensions, retiring allowances and financial benefits to persons in the employment of the railways and harbours administration;

(*d*) The organization of and discipline and conditions of employment of persons in the public service who are serving in the territory, and the payment of pensions, retiring allowances and financial benefits to such persons;

(*e*) The constitution and jurisdiction of courts of justice, whether superior or inferior, and the practice or procedure to be observed therein;

(*f*) The administration, management and working of the postal, telegraph and telephone services;

(*g*) The establishment or control of any military organization in the territory;

(*h*) The movements or operations of any unit of the South African Defence Forces within the territory;

(*i*) The entry of immigrants into the territory or of other persons;

(*j*) Tariffs of customs and excise duties and the control and management of customs and excise;

(*k*) Currency and banking and the control of banking institutions.

The following matters are reserved for a period of three years,* after which period the Assembly may by resolution assume control thereof:—

(*a*) The establishment or control of any police force in the territory;

(*b*) Civil aviation;

(*c*) Primary or secondary education in schools supported or aided from the revenues of the territory;

(*d*) The establishment, management or control of any land or agricultural bank in the territory;

(*e*) The allotment, sale, lease or disposal of Government lands in the territory.

In regard to finance, the Assembly may not initiate any ordinance imposing taxation unless recommended to it by the Administrator.

The railway system in South-West Africa, now controlled and worked by the South African Railways and Harbours Administration, and connected with Union Lines (De Aar to Nakop Protectorate border 343 miles), comprises Union Lines 398 miles, S.W. Territory Lines 1,482 miles, and privately owned Lines 74 miles, a total of 1,954 miles.

The Capital of the Protectorate is Windhoek, which lies practically in the centre of the country at 5,500 ft. above sea-level. (Urban white population, 1926, 3,809.) Other inland towns are Keetmanshoop (Urban white population, 1926, 1,159), Aroab, Bethanie, Gibeon, Gobabis, Grootfontein, Karibib, Okahandja, Omaruru, Otjiwarongo, Outjo, Rehoboth, Warmbad and Maltahoehe. The ports are Walvis Bay (Urban white population, 1926, 662) and Lüderitz Bay (Urban white population, 1926, 1,234).

* The period of 3 years has expired, but a resolution for the extension of powers has not yet (October, 1931 been passed by two-thirds majority of the members of the Assembly as required by the Constitution Act.

Provinces of the Union of South Africa.

CAPE OF GOOD HOPE.

The Province of the Cape of Good Hope reaches in S. lat. from 26° to 34° 50′, and in E. long. from 16° 25′ to 30°. The extent of the country is, N.E. to S.W. 750 miles, and from N.W. to S.E. 800 miles, with a coast-line of nearly 1,300 miles.

Area and Population.

	Sq. miles.	Pop., 1925. (*European only.*)	Eur. Pop. 1931. (Preliminary.)
The Colony	250,185	690,079	—
East Griqualand	6,602	7,065	—
Tembuland	3,339	4,693	—
Transkei	2,504	2,477	—
Pondoland	3,906	1,823	—
Cape Province	276,536	706,137	748,455

In 1931 the European population numbered 748,455 (males 377,621, females 370,834).

Of the non-European population in 1921, 7,696 were Asiatics, 1,640,162 were Bantu, and 484,252 were of mixed and other races. Of the European population in 1921, 81,685 were primary producers, 38,370 industrial, 14,366 transport and communication, 45,142 commercial, 26,490 professional, 11,308 personal service, 7,991 independent, 412,141 dependent, 13,116 others. Of the coloured population, the great majority are engaged in agricultural or domestic employments.

Year.	Births.	Deaths.	Marriages.
	European.		
1926	18,675	7,053	5,972
1927	18,537	7,212	5,978
1928	18,032	7,519	6,351
1929	19,008	7,315	6,569
	*Non-European.**		
1926	38,793	26,114	9,154
1927	37,514	28,679	9,037
1928	37,719	28,157	9,377
1929	39,426	25,637	9,620

* Partial Registration.

Religion.—European only (1926 census).

Dutch Churches	410,227	Roman Catholics	28,023
Anglican	132,403	Baptists	10,149
Presbyterian	25,539	Other Christian	14,350
Congregational	4,494	Jews	23,984
Methodists	42,043	Other	868
Lutherans	10,781	No religion	1,514

Education.—Local School Administration is conducted by school boards and school committees, the unit of administration being the school district. The Province is divided into 111 school districts, each under the control of a School Board, a portion of the members being elected by the ratepayers and a portion partly nominated by the Provincial Administration and partly by the Local authorities. Education is compulsory for children of European parentage. The necessary grants are provided from Provincial Council revenues, education up to the age of 15 being free.

State and Aided Schools, Dec. 31, 1930, 4,766. There are 139,930 European pupils and 11,990 non-European. Total number of teachers 11,637 (6,438 in European schools and 5,552 in non-European schools). Provincial Government expenditure on education, exclusive of Higher Education (for which see Union of S.A.), for 1930 31, £3,413,712.

Hospitals.—The daily average number in all hospitals (1929) was 1,693·58; ordinary revenue £157,176, ordinary expenditure £308,552, Government grants in aid £136,649.

Harbours and Works.—There are magnificent harbours at Table Bay (Cape Town), Port Elizabeth, East London, and Mossel Bay. There are electric tramways in Cape Town, Port Elizabeth, East London, and Kimberley.

Administration.—The Province is administered by an Administrator, appointed for five years by the Governor-General, aided by a Provincial Council of 58 members (elected for three years). There is an Executive Committee of four members in addition to the Administrator, who is Chairman of the Committee.

Local Government.—There are 128 municipalities, each governed by a Mayor or Chairman and Councillors, a certain number of whom are elected annually by the ratepayers. There are 92 Divisional Councils and 86 Village Management Boards and 20 Local Boards.

Administrator, Hon. J. H. Conradie £2,500
Executive Committee, J. I. Mann; P. J. Du Plessis; A. B. Cunningham; B. Muller.
Prov. Sec., A. S. Weisbecker.
Superintendent-General of Education, M. C. Botha, M.A.
Professional Assistant, W. de V. Malan, Ph.D.
Secretary, P. A. Millard.

Capital, CAPE TOWN. Total population (1926), European (with suburbs), 130,568.

Cape Town is 5,979 miles from Southampton; transit, 16 days.

NATAL.

The Province of Natal comprises an area of 35,284 square miles (including Zululand, 10,427 square miles), with a seaboard of 360 miles. In 1926 the European population was 158,916 (males 81,170, females 77,746).

In 1928 the European births registered numbered 3,514, deaths 1,498, and marriages 1,525. The race question in Natal is complicated by the presence of large numbers of Indian subjects of the Crown, brought over during the latter half of the nineteenth century to supply the deficiency of local labour.

Education.—There is a University College at Pietermaritzburg, and there are 168 primary schools (exclusive of 263 farm schools), and 28 beyond primary schools for European children. There are also 2 technical colleges, 1 physical culture school, 3 night continuation classes, 1 training school for teachers, 82 Asiatic schools, 696 native schools, and 22 other coloured schools, which are maintained or aided by Government, and a large number of private schools.

Administration.—The Provincial government is administered by an Administrator aided by a Provincial Council of 25 members (elected for 3 years). There is an Executive Committee of 4 members.

Administrator, Hon. H. Gordon Watson, I.S.O.
Executive Committee, F. C. Hollander; Capt. G. M. Botha; J. Macaulay; T. N. Wadley.
Provincial Secretary, A. E. Charter, O.B.E.

PIETERMARITZBURG, the capital and seat of the Provincial Government, is situated about 54 miles inland from Port Natal. Total population (European and coloured), 36,023 in 1921. The 1926 Census figures for the European population of Pietermaritzburg are 19,748.

In Durban (population, 1921, 151,642; for 1926 European population of Durban was 70,883), or Port Natal, is the only harbour of any importance on the south-east coast. The entrance is now safe and navigable for any vessel at any time; the average low-water depth at the entrance, L.W.O.S.T., the bar being no longer existent, for 1927 being 37 feet.

Natal, 6,800 miles; transit, 20 days.

ZULULAND.

Zululand, annexed in 1897, comprises about two-thirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River; on the south-east by the Indian Ocean; on the north by the Portuguese possessions; and on the west by the new territory (formerly Utrecht and Vrijheid districts of the Transvaal) and Swaziland. The *Amaputaland Protectorate*, created by proclamation of Nov. 22, 1897, was annexed to Zululand on Dec. 27, 1897, and now forms part of the Province. The *Northern Districts* territory (consisting of the Magisterial Divisions of Vrijheid, Utrecht, Paulpietersburg, and Babanango) was annexed to Natal on January 27, 1903.

THE TRANSVAAL.

In 1931 the European population numbered 695,963 (males 357,470, females 338,493).

The Province of the Transvaal has a total area of 110,450 square miles, about 20,000 square miles lying within the tropics. The Census of 1921 showed a population of 2,087,636, of whom 1,159,430 were males and 928,206 females. In 1929 there were 18,227 European births, 6,389 European deaths, and 7,101 European marriages.

Religion.—The religious statistics for 1921 are:—

Churches.	Europeans.	Others.
Dutch Churches	287,630	49,578
Anglican	98,849	94,543
Presbyterian	31,715	12,407
Methodists	37,921	143,441
Roman Catholics	23,419	14,490
Lutherans	4,583	136,335
Other Christians	19,542	64,437
Jews	33,515	4
Hindus, &c.	1,804	15,499
No Religion	4,507	1,013,417

There were 1,239 Government schools for European children in 1930, with an average enrolment of 134,367 and an average attendance of 125,175, and 4 normal colleges. There were also 594 native schools, 15 Asiatic, and 30 coloured schools, with 80,129 pupils.

Administration.—The government is administered by an Administrator, aided by a Provincial Council of 55 members (elected for 3 years). There is an Executive Committee of 4 members.

Administrator, Hon. J. S. Smit.

Executive Committee, S. P. Bekker; J. F. Brown, C.M.G.; F. W. R. Robertson; I. J van Heerden.

Provincial Secretary, C. E. Viljoen, B.A.

Asst. do., C. H. Sheard, B.A.

Director of Education, Dr. N. M. Hoogenhout.

Sec. to the Education Dept., F. S. Malan, B.A.

The Capital is PRETORIA, pop. 1926, European 54,326. Pretoria, which is also the seat of the Union Government, is pleasantly situated on the Aapies River, and has wide, shady streets and magnificent buildings. The principal town is JOHANNESBURG, 5,500 feet above sea-level, about 35 miles S. W. of the capital. Johannesburg is the centre of the Witwatersrand goldfields, and possesses magnificent buildings. Among its other industries are printing, brickmaking, brewing, tobacco manufactures and iron foundries. The population in 1926 was (European) 170,741.

Pretoria is distant from London 7,200 miles; transit, *viâ* Capetown, 19 days.

ORANGE FREE STATE.

The Province of the Orange Free State has a total area of 49,647 square miles, and is divided into 33 districts. The population at the last six censuses was:—

Year.	White.	Coloured.	Total.
1904	142,679	244,636	387,315
1911	175,189	352,985	528,174
1918	181,678	...	...
1921	188,556	440,271	628,827
1926	202,985	...	...
1931	205,300	...	...

In 1931 (preliminary), of the Europeans, 104,735 are males and 100,589 females.

The number of European births registered in 1929 was 5,334, deaths 1,627, and marriages 1,955.

Religion.—Europeans only (1926 Census):—

Dutch Churches	163,504	Lutherans	893
Anglican	13,235	Roman Catholics	2,516
Presbyterian	3,945	Jews	5,753
Congregational	116	Other	5,545
Methodists	7,478		

Education.—Higher education is under the control of the Union Ministry. In 1930 there were 811 public and aided private schools, with an enrolment of 45,099 pupils, and, except when the parents object, both official languages are taught.

Administration.—The government is administered by an Administrator aided by a Provincial Council of 25 members (elected for 3 years). There is an Executive Committee of 4 members.

Administrator, Hon. C. T. M. Willcocks.

Executive Committee, J. A. D. Serfontein; H. J. Odendaal; C. T. van Schalkwyk, jr.; J. C. Buys.

Provincial Secretary, R. A. Gregorowski.

BLOEMFONTEIN, the Capital and seat of the Provincial Government, had a population of approximately 29,000 Europeans in 1931. The city is an important railway centre, is developing rapidly, and continues to hold its place as one of the foremost cities in the Union. Many fine buildings have been erected, and a new Town Hall (costing £220,000) will be erected very shortly.

Bloemfontein is distant from London 6,700 miles; transit, *viâ* Capetown, 19 days.

Imperial Crown Colonies and Protectorates.

NOTE.—*The Indian Empire, The Dominion of Canada, Newfoundland, The Commonwealth of Australia, The Dominion of New Zealand,* and *The Union of South Africa* are shown separately in the preceding pages.

BARBADOS.

(*See* BRITISH WEST INDIES.)

BERMUDA.

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (15 or 16 only of which are inhabited, the rest being mere rocks) situated in the west of the Atlantic Ocean, in 32° 15′ N. lat. and 64° 51′ W. long., comprising an area of about 19 square miles, with an estimated population (1928) of 30,884 (15,556 white and 15,328 coloured). These islands derive their name from Bermudez, a Spaniard, who sighted them in 1527; but they were first colonised by Admiral Sir George Somers, who was shipwrecked here in 1609, on his way to Virginia. The nearest point of the mainland is Cape Hatteras, in North Carolina, 580 miles distant.

The Government is administered by a Governor, who is also Commander-in-Chief of the military forces. He is advised by an Executive Council of 7 members, appointed by the Crown. There is also a Legislative Council, composed of 9 members appointed by the Crown; and a representative House of Assembly consisting of 36 members.

The climate is mild and healthy. There are no streams or wells, and the inhabitants are dependent on the rainfall stored and preserved in tanks. Vegetation is prolific, the principal trees being the Bermuda cedar (juniper), formerly of great importance for shipbuilding. The islands produce large quantities of onions, potatoes, and green vegetables, which are largely exported, together with cut flowers and lily bulbs, to New York. Arrowroot and bananas are also grown, but meat, flour and other articles of consumption are imported from the U.S. and Canada. Fish are plentiful round the coasts. The islands are much frequented as a health resort by Americans and Canadians.

Hamilton, 2,970 miles; transit, 10 days.

BORNEO.

Borneo is a large island in the Eastern Archipelago, extending from lat. 7° 4′ N. to 4° 10′ S. and from long. 108° 50′ to 119° 20′ E. It is about 850 miles in length and 600 in breadth, and contains an area of 284,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 1,846,000, consisting chiefly of Dyaks, Malays, Kyans, Papus or Negritos, Chinese, Bajaus, Dusuns, Muruts and Bugis (the aboriginal Celébes). The island was discovered by the Portuguese in 1521, and at the present time rather more than two-thirds of the island is included within "Netherlands India." The remainder of the island is under British protection.

BRITISH NORTH BORNEO.

The territory of British North Borneo occupies the northern part of the island, with a total area of about 31,000 square miles, and a coast-line of about 900 miles. The population is 270,043, consisting mainly of Muhammadan settlers on the coast, aboriginal tribes inland, and a large number of Chinese traders, artisans, and agricultural labourers. The interior is mountainous (Mount Kinabalu, 13,455 feet) and is densely timbered.

The two chief towns are Sandakan, on the north-east coast, and Jesselton, on the west coast. All legislation is passed by the Legislative Council, which consists of 9 official and 5 unofficial members, who have the local title of Honourable. The appointment of the Governor is subject to the approval of the Secretary of State. For administrative purposes the whole State is divided into 4 Residencies. The laws are based on the Indian codes of criminal and civil procedure, amended and adapted by local ordinances. There is an Imam's Court for Muhammadan law.

The chief products are timber, tobacco, rubber, copra, cutch, birds'-nests, salt fish, damar, sago, coco-nuts, rattans, and all varieties of jungle and sea produce. The country is suitable for the cultivation of sugar, tapioca, coco-nuts, kapok, ground nuts, rubber, pepper, and gambier on a large scale. Gold has been found. Coal of good quality is now being produced at the rate of 3,500 tons per month at Sebattik, in the south-eastern corner of the territory.

A railway runs from Jesselton, the chief port on the west coast, and down the coast to Beaufort, the centre of the rubber industry, where it turns inland to Melalap, in the interior; there is a branch from Beaufort to Weston (20 miles). There are several wireless stations. There is a State bank at Sandakan with a branch at Jesselton.

There is an Armed Constabulary numbering 676 all ranks, composed of Indians and Natives under European officers, armed with S.M.L.E. rifles and Lewis guns. There is a Church of England and a Roman Catholic mission, and churches at Sandakan, Kudat, and Jesselton.

BRUNEI.

Sultan, H.H. Ahmed Tajudin Akhazul Khairi Waddin, *suc.* Sept., 1924.
Joint Regents, Pengiran Bendahara and Pengiran Pemancha.

A native State on the north-west coast of the island of Borneo. The total area is about 2,500 square miles, the population being 30,162 (April, 1931), of whom 26,997 are Malays and Bornean races. The territory was placed under British protection in 1888, and on Jan. 2, 1906, the Sultan accepted by treaty a British Resident to assist and advise him in the administration. The chief town, Brunei, has a population of nearly 12,000. Native industries include fishing, cloth-weaving, brass foundries, and silversmiths' work. The chief imports are rice, cloth, tobacco, sugar, petroleum, and sundries; the exports are chiefly cutch (mangrove extract), rubber, jelutong, and sago.

	1929.	1930.
Revenue	£40,283	£38,858

Debt (Dec. 31)	47,483	46,483
Imports	173,167	295,916
Exports	145,989	94,202

High Commissioner, The Governor of the Straits Settlements.
British Resident, Brunei, P. A. B. McKerron, M.C.S.

Brunei is 5 hours by steamer from Labuan, and is distant 758 miles from Singapore (transit 4 days). There are wireless stations at Brunei, Labuan, Temburong, and Belait.

BRITISH GUIANA,

which includes the Counties of Demerara, Essequebo, and Berbice, is situated on the north-east coast of South America and has a total area of 89,480 square miles, with a seaboard of more than 300 miles. The population, Dec. 31, 1930, was estimated at 312,489, of whom 130,075 were East Indian immigrants. The birth-rate was 33·4, and the death-rate 23·0 per 1,000 of the population. The colony is bounded on the south by Brazil, on the east by Dutch Guiana, on the west by Venezuela, and on the north and N.E. by the Atlantic Ocean. The climate, although hot, is pleasant and healthy. The cultivated portion of the country, amounting to about 155,852 acres (of which 57,244 acres are in sugar-cane and 49,702 in rice), is confined to the sea-coast and to a short distance from the rivers. The coastland is very like the Netherlands, being below the level of the sea, and intersected with canals constructed by its former Dutch owners. At the junction of the boundaries of British Guiana and Venezuela is Mt. Roraima, a flat-topped mountain 8,740 feet above sea level, and on the Potaro River (a tributary of the Essequebo) are the *Kaieteur Falls*, with a clear drop of 741 feet and a total fall of 822 feet. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April, and from the middle of August to the end of November. The meteorological records taken on the coast-lands during a period of 84 years show, as regards temperature, that the climate is a very equable one. The mean temperature is 80·4°, its recorded extremes during this long period ranging between 68° and 92°, but these extreme temperatures are very rarely recorded, the usual extremes during a year being 70° and 89°. In the interior the mean temperature is higher—82·6°, its extremes ranging from 66° to 103°. The yearly rainfall is, on the contrary, subject to marked variation, its mean on the coast lands being 91·00 inches distributed over 192 days of the year, and its range from 52·7 to 135·2 inches per year. In the interior the average recorded rainfall is 58·5 inches per year, ranging from 45·2 to 80·4 inches per year. The chief product is sugar, which forms 53 per cent. of the export trade. The leading exports are sugar (£1,128,934 in 1930), rum, diamonds, gold, timber, balata, bauxite, rice and copra. There are about 9,000 aboriginal Indians; they

* Exclusive of land sales.

are occupied largely in fishing, hunting, and raising crops of cassava.

The British Guiana Order in Council, 1928, providing for the Government of the Colony and for the Constitution of a Legislative Council in place of the Court of Policy and Combined Court which have been determined, came into operation on July 18, 1928. The Legislative Council consists of the Governor as President, of 10 Official Members and of 19 Unofficial Members. Executive and administrative functions are exercised by the Governor and an Executive Council. There are 3,941 miles of post-office telephone wire, with 13 miles of aerial, and 23 of submarine, cable, and 561 of telegraph lines, with 73 post-offices and postal agencies. There are 95 miles of railway.

BRITISH HONDURAS.

British Honduras, in Central America, lies within 18° 29′ 5″ to 15° 53′ 55″ N. latitude and 89° 9′ 22″ to 88° 10′ W. longitude. Its extreme length and breadth are approximately 174 m. and 68 m. respectively; it is bounded on the north and north-west by Yucatan (Mexico), on the west and south by Guatemala, and on the east by the Caribbean Sea. The total area is about 8,598 sq. miles, with a population (Census 1931) of 51,347—25,524 males and 25,283 females. The climate generally is damp and hot, but unhealthy. The temperature ranges from 50° to 98°. The average lies between 75° and 80°, but this is considerably tempered by the prevailing sea-breezes. In September 1931 a disastrous hurricane devastated the capital of the colony, with a loss of nearly 1,000 lives, Mansion House Fund being raised for the sufferers. The country consists chiefly of primeval forest, with savannahs and so-called "pine-ridges," which are open sandy plains covered with a wiry grass and dotted with pine-trees, affording fair runs for cattle. The ground is level and swampy along the coast-line, and generally flat for about ten or twenty miles inland; after which hills from 500 ft. to 4,000 ft. high succeed each other to the western boundary.

The staple products are the natural woods of the colony, principally mahogany and logwood. Sugar, rubber and cacao grow readily. Fruit, including bananas, plantains, coco-nuts, pineapples, oranges, and mangoes also grow well, while inland there are extensive regions of good pasturage. About 60,000 acres are under cultivation. The best description of cacao trees grow wild in the bush. There are 82 primary schools in the colony, and 4 schools with secondary departments in Belize. The shipping entered and cleared at the port of Belize in 1930 was 625,960 tons. There is a radio-telegraph station at Belize.

British Honduras is governed as a Crown colony. There is an Executive Council of 3 official and 4 appointed members and a Legislative Council of 6 official and 7 appointed members. The Governor is President of both Councils.

BRITISH WEST INDIES.

The West Indies, so named in 1492 by Columbus who believed the islands to form the western limits of India, are a number of islands and islets, some of them mere rocks, situated between 10° to 27° North and 59° 30' to 85° West. The whole archipelago extends in a curve from the Florida Channel (North America) to within 7 miles of the coast of Venezuela (South America), and is divided into three main groups: I. GREATER ANTILLES, which contain the largest islands, *Cuba* (44,000 sq. miles) and *Hispaniola* (28,000 sq. miles), being Independent; Jamaica and its dependencies, British; and Puerto Rico, a dependency of the United States. II. BAHAMAS, which are entirely British. III. LESSER ANTILLES, which are divided among the United Kingdom, France, Netherlands, the United States and Venezuela. The total area of the archipelago is nearly 100,000 square miles, of which 72,000 square miles are *Independent*, 12,300 *British*, 3,890 *United States*, 1,350 *French*, 430 *Netherlands*, and 90 *Venezuelan*.

Trade Enquiry Office in London, The West India Committee, 14, Trinity Square, E.C. 3.

THE BAHAMAS

The Bahamas (or Lucayos) are an archipelago of the British West Indies, lying between 21° 42'—27° 34' N. lat. and 72° 40'—79° 5' W. long., and extending from the coast of Florida on the north-west to Haiti on the south-east. The group consists of about twenty inhabited islands, and an immense number of islets and rocks, comprising an area of about 4,404 square miles, and a population in 1929 of 60,848, the most part being descendants of liberated Africans. The principal islands are: New Providence (containing the capital, Nassau), Cat Island, Abaco, Grand Bahama, Long Island, Eleuthera, Exuma, Harbour Island, Inagua, Andros Islands, San Salvador or Watling Island, Rum Cay, Long Cay, Ragged Island and Biminis. Originally settled by Englishmen, the Bahamas were, in 1781, surprised by the Spanish, but at the peace of Versailles were restored to the English. The climate is salubrious, and in the winter Nassau, which is outside the tropics, is frequented by many Americans. The chief industry is sponge-gathering; the exports of sponge in 1930 being valued at £75,351. Tomatoes are cultivated in large quantities for shipment to the United States. *Mahogany, lignum-vitæ, mastic, ironwood*, ebony, logwood, and satinwood are found throughout the islands. A fibre industry is largely established. The imports are chiefly foodstuffs, wines, spirits, cotton, silk and worsted fabrics, and hardware.

The Government is vested in a Governor, aided by an Executive Council of 9 members, a nominated Legislative Council of 9 members and an elective Representative Assembly of 29 members.

Nassau is distant from Liverpool 4,000 miles; transit, 14 to 21 days, *viâ* New York.

BARBADOS,

the most windward of the West India Islands, is situated in 13° 4' N., and longitude 59° 37' W. It is nearly 21 English miles long by 14 broad at the widest part, and comprises an area of 106,470 acres (about 166 square miles), about 100,000 acres being cultivated. The population (Census of 1921), was 156,312; estimated at 170,391 on Dec. 31, 1929. The principal exports are sugar, molasses, rum, and cotton, and the imports rice, salted meat, corn, salted fish, butter, flour, and Indian corn meal. Liberal provision is made for elementary education, and the Lodge School and Harrison's College provide for higher education for boys, and Queen's College and Codrington High School for girls. Barbados alone of the W.I. Islands makes local provision for University training, Codrington College having been founded under the will of Christopher Codrington, who died in 1710. Unlike most of the neighbouring islands, Barbados has always remained in the possession of Great Britain, by which it was settled in 1625. In 1885 it was constituted a distinct government, with a Governor, aided by an Executive Council and an Executive Committee, a Legislative Council of 9 members appointed by the Sovereign, and a House of Assembly of 24 members elected yearly on the basis of a moderate franchise.

The CAPITAL and port is Bridgetown (pop., 1921, 13,486), on the shores of an open roadstead (Carlisle Bay).

Barbados, distant 3,635 miles; transit, 13 days.

JAMAICA,*

aboriginally Xaymaca, or Land of Wood and Water—an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within 17° 42′—18° 32′ North lat. and 76° 11′—78° 23′ W. long. It is the largest and most valuable of the British West Indian Islands, being 144 miles in length and 49 in extreme breadth, containing an area of 4,450 square miles, and a population, in April, 1921, of 858,118 (males, 401,973; females, 456,145); whites, 14,476; coloured, 157,223; blacks, 660,420; East Indians, 18,610; Chinese, 3,696; not specified, 3,693.

Jamaica was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1509; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the *Treaty of Madrid*.

From the sea-level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges, dividing the large rivers, and attaining, in the culminating Peak of the Blue Mountains, in the eastern part of the island, an elevation of 7,388 feet. From these mountains at least 70 streams descend to the north and south shores, but none are navigable except the Black River, and that only for small craft. There are several excellent harbours, and the island is intersected by good roads. There are 210 miles of railway open. Telegraph stations and post offices are established in every town and in very many villages; the number of accounts open in the Govt. savings banks was 108,834 (1930). Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported; the latter is still counted the best in the world; and the coffee raised in certain districts of the Blue Mountains fetches a high price. There is an extensive trade in fruits and nuts, chiefly bananas, oranges and coconuts, with the U.S.A. and U.K. Maize and Indian corn grow luxuriantly. The Guinea grass, from four to six feet in height, grows wild, and is superior to any other for pasturage, while the woods furnish an abundance of rich dye-stuffs, drugs, and spices, and there are some rare cabinet woods. The Governor is assisted by a Privy Council not to exceed 8 members; the Legislative Council consists of the Governor, the Senior Military Officer, the Colonial Secretary, the Attorney-General, the Director of Public Works, and the Collector-General (all *ex officio*), of 10 Nominated Members, and of 14 elected by the people, being one for each parish of the island. The island is divided into three counties, Surrey in the east, Middlesex in the centre, and Cornwall in the west. The principal city is Kingston, the seat of government and the largest port and town, pop. (Census, 1921) 62,707; the next in importance are Spanish Town, pop. 8,694; Montego Bay, 6,580; and Port Antonio, 6,272. Chief exports (1930): bananas, £2,309,741; sugar, £591,806; coffee, £161,621; pimento, £192,502; cocoa, £81,323.

* The Government publishes annually a *Handbook of Jamaica*, full of information respecting the history and personnel of the island.

Protector of Immigrants, F. N. Isaacs (*acting*) £225

Kingston is distant from London 4,000 miles; transit, 14 days.

The Cayman Islands.

The Cayman Islands, forming a dependency of Jamaica, between 79° 44′ and 81° 26′ W. and 19° 15′ and 19° 46′ N., consist of three islands, Grand Cayman, Cayman Brac, and Little Cayman, with a total area of 225 square miles. They are said to have been discovered by Christopher Columbus on his return voyage from Porto Bello to Haiti, and called "Las Tortugas." Population (1921) 5,253.

The principal town is Georgetown, in Grand Cayman, population (1921) 1,070.

Revenue, 1930, £6,466; expenditure, £6,228.

Imports, 1930, £41,762; exports, £11,450.

Commissioner & Judge of the Grand Court, G. H. Frith (*with house and fees*) £450

Turks and Caicos Islands.

These West India islands geographically form a sort of annexe of the Bahama group, from which Government they were separated in 1848. In 1873 they were annexed to Jamaica, from the north-east of which they are distant about 450 miles. They have an area of about 170 square miles, and a population (1921) of 5,612, of which the principal island, Grand Turk, contains 1,568. Grand Turk is an important cable station. The islands are celebrated for producing the finest salt in the world.

A Commissioner administers the government of the Dependency, assisted by a Legislative Board. This Board has control of local finance, and passes local ordinances, subject to the assent of the Governor of Jamaica, who is also the medium of communication between the Commissioner and the Colonial Office. The Legislature of Jamaica has the power to pass laws applying to the Turks and Caicos Islands, and the jurisdiction of the Supreme Court of Jamaica extends to the Islands in matters of divorce and matrimonial causes, and is also a Court of Appeal.

The Leeward Islands.

The Leeward Islands of the West Indies under British authority consist of the 5 presidencies of (1) Antigua, with Barbuda and Redonda; (2) St. Christopher and Nevis, with Anguilla; (3) Dominica; (4) Montserrat; and (5) the Virgin Islands, with Sombrero; all, except the last, having their own local Legislature. These 5 presidencies are administered by a Governor, to whom the Administrators and Commissioners are subordinate, and there is also a General Legislative Council, possessing concurrent legislative powers with the local Legislature on certain subjects. The population of the federal colony at the Census of 1921 was 122,242. The General Legislative Council consists of 10 official and 10 elective members, with the Governor as President.

(1) Antigua and Barbuda.

Antigua is the seat of government and residence of the Governor-in-Chief. It lies in 17° 6′ N. lat. and 61° 45′ W. long., and is nearly 108 square miles in area, equal to 68,980 acres, of which nearly 17,000 are under cultivation. The coast-line is about 70 miles. The population (with Barbuda) in 1921 was 29,767, including 12,542 males and 17,225 females. In 1929 it was estimated at 30,974. Settled by the English in 1632, and granted to Lord Willoughby by Charles II., the island has always been distinctively English. It is much less hilly and wooded than the other Leeward Islands, and is largely given up to the cultivation of sugar, for which two central sugar factories have been erected. Cotton is planted on a small scale and the island also exports molasses, tamarinds, pine-apples, and arrowroot. In March, 1898, the Crown Colony system of government was instituted.

	1929-30.	1930-31.

Barbuda is situated 30 miles N. of Antigua, of which it is a dependency, in lat. 17° 35′ N., long. 61° 42′ W. Area, 62 square miles. Population, 900. The island is flat and is fertile in parts, producing cotton, corn, pepper, tobacco, and vegetables, and was formerly a possession of the Codrington family. Wild deer are plentiful and afford excellent sport, and there is good tarpon and other fishing. *Warden*, Capt. G. Downing, (*and quarters*) £360.

Redonda is uninhabited.

(2) ST. KITTS-NEVIS WITH ANGUILLA.

The islands of St. Kitts, Nevis, and Anguilla were united in 1882 to form one Presidency, and taken together they have a population (Dec. 31, 1929) of 35,365 and a total area of about 150 square miles. The climate is decidedly healthy for the tropics, the temperature being from 66° to 88°.

St. Kitts (population Dec. 31, 1929, 17,978), the principal island, is the oldest colony in the West Indies; it is situated in lat. 17° 18′ N. and long. 62° 48′ W., and comprises an area of 68 square miles, its greatest length being 28 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green estates sweeping up all round the coast from the sea towards the central range, which rises to a height of 3,711 feet (Mount Misery). Cotton is also grown to a considerable extent. The capital, Basseterre, is a port of registry.

Nevis (population 12,503—probably an overestimate) is separated from St. Kitts by a strait some 3 miles wide and has an area of 50 square miles. Cotton and coco-nuts are exported, and cattle and vegetables are raised. Its greatest elevation is 3,596 feet. The chief town, Charlestown, is a port of entry.

Anguilla (population 4,794) is about 60 miles N.W. of St. Kitts, 16 miles in length, and varies in breadth from 1 to 3 miles, containing an area of 35 square miles. There are no hills. Salt is the principal product, and small stock are raised.

(3) DOMINICA,

the largest island of the colony, and the loftiest of the Lesser Antilles, is situate between 15° 20′—15° 45′ N. lat. and 61° 13′—61° 30′ W. long., 95 miles S. of Antigua, and is about 29 miles long and 15 broad, comprising an area of 305 sq. miles, or 195,200 acres, of which about 70,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the altitude, from 55° to 85°. The cultivation of sugar has been practically replaced by cocoa, limes, coco-nuts, vanilla, and fruit. The population was estimated at 42,343 on Dec. 31, 1930; included in this total are 400 Caribs, of whom about 100 are of pure blood. The climate is healthy, and during the winter months very pleasant. Yellow fever is unknown, and from November to June the island is suitable as a health resort for pulmonary and rheumatic invalids. There is an Executive Council composed of official and unofficial members, and a Legislative Council consisting of the Administrator, who sits as President, and 6 official and 6 non-official members, 4 of whom are elected, and 2 nominated by the Governor. The principal towns are Roseau, on the south-west coast, population 7,042, and Portsmouth, population 3,069.

(4) MONTSERRAT

is situated in 16° 41′ N. lat. and 62° W. long., 26 miles S.W. of Antigua. It is about 11 miles in length and 7 in breadth, comprising an area of 32½ square mile., with a population (1930) of 12,196. Discovered by Columbus in 1493, it was settled by Irishmen, conquered and held by the French for some time, and finally assigned to Great Britain in 1784. It is justly considered one of the most healthy and beautiful of the Antilles; it contains three active soufrières and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island are mountainous, the rest well cultivated. A great part of the island was devastated by hurricanes in 1924 and 1928. The chief exports during the year 1930 were cotton-seed meal, cotton, cotton-seed oil, onions, limes and its products, sugar, tomatoes and animals of all kinds. The chief town is Plymouth, with a population (1921) of 1,709. A wireless station was opened in 1925.

(5) THE VIRGIN ISLANDS,

a group of islands belonging chiefly to Great Britain and the U.S.A., form a connecting link between the Greater and Lesser Antilles. Such of the islands as are British became so in 1666; the principal are—Tortola (the largest), situate in 18° 27′ N. lat. and 64° 40′ W. long.,

* Including £31,490 from Imperial Government.
§ Including £33,326 from Imperial Government.

Virgin Gorda, and Anegada. The area of the British possessions is 58 square miles, and the population in 1921 was 5,082. There is good pasturage for cows, sheep, and goats. Sugar, cotton and coco-nuts are grown in increasing quantity, and a tobacco and cigar industry has been established; fishing and poultry-rearing are also carried on. The capital of the group is Road Town, on the south-east of Tortola; population (1921), 463.

TRINIDAD AND TOBAGO.

Trinidad, the most southerly of the West India Islands, lies close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. The island is situated between 10° 3′—10° 50′ N. lat. and 60° 55′—61° 56′ W. long., and is about 50 miles in length by 37 in breadth, with an area of 1,862 square miles, and a population at the Census of 1921 (including Tobago) of 365,913, estimated at 413,119, on Dec. 31, 1930. The island was discovered by Columbus in 1498, was colonised in 1588 by the Spaniards, and capitulated to the British under Abercromby in 1797. The chief town and port of entry, Port of Spain (pop. 69,534), is one of the finest towns in the West Indies, with sewerage, electric lighting, tram and telephone services. Other towns of importance are San Fernando (pop. 11,978), about 30 miles south of the capital; Princestown (pop. 5,826), and Arima (pop. 4,711). A remarkable phenomenon is the asphalt lake, 110 acres in extent, near the village of La Brea, from which (1930) 118,055 tons of asphalt (£313,397) were exported. The soil of Trinidad is rich and productive, the most important products being sugar, cocoa, molasses, rum, copra, limes, and coco-nuts, and various kinds of timber and fruits. The chief exports (1930) were petroleum £2,790,695; cocoa £1,363,789; and sugar £775,167. On Dec. 31, 1930, there were 14 companies actively engaged in the production of oil, the royalties payable on oil won from Crown Lands being £77,260. Coal, iron, graphite and gypsum exist in small quantities; and traces of gold have been found in the Northern Range. On Dec. 31, 1930, there were 287 Elementary and Intermediate Schools, 43 being Government and 244 Assisted, Trinidad having 251 and Tobago 36, in addition to 7 colleges for higher education, which also receive a grant-in-aid. There are 118 miles of railway open, and the island is in communication with Tobago and the mainland by telegraph and wireless. The Government is vested in a Governor, an Executive Council, and a Legislative Council of 12 official and 13 unofficial members, 6 of the latter being nominated by the Crown and 7 elected.

	1929.	1930.
Revenue	£1,870,553	£1,860,731
Expenditure	1,613,810	1,743,804

Tobago lies between 11° 8′ and 11° 21 N. lat. and between 60° 30′ and 60° 50′ W. long., about 75 miles south-east of Grenada, 18 miles north-east of Trinidad, and 120 miles S.S.W. of Barbados. The island is 26 miles long, and from 6 to 7½ broad, and has an area of 114 square miles, with a population estimated (1930) at 26,407. It is one of the healthiest of the West Indies; the temperature varies from 81° to 88°. There are two towns in the island, viz., Scarborough (pop. 1,651) and Plymouth (pop. 486).

THE WINDWARD ISLANDS.

The Government of the Windward Islands is made up of the three colonies of Grenada (the seat of government), St. Vincent, and St. Lucia, with their dependencies, the Grenadines being divided between Grenada and St. Vincent. The total area is 508 square miles, with a population (1921) of 162,254. There is one Governor for the three islands; but there is no General Legislative Council as in the Leeward Islands, and no common tariff or treasury. Each island retains its own institutions, and in the Governor's

absence is governed by an Administrator subordinate to him.

Governor and Commander-in-Chief, Sir Thomas Alexander Vans Best, K.B.E., C.M.G. (1930) £3,000

Transit to Grenada from London about 14 days.

GRENADA AND THE GRENADINES.

Grenada is situated between the parallels of 12° 30′–12° 58′ N. lat. and 61° 20′–61° 35′ W. long., and is about 21 miles in length and 12 miles in breadth; it is about 96 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. Area, about 85,120 acres; population (including some of the Grenadines), 66,302 (Census of 1921). The country is mountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in 1498, and named Conception. It was originally colonised by the French, and was definitely ceded to Great Britain by the Treaty of Versailles in 1783.

The soil is very fertile, and cocoa, spices, rubber, cotton, coffee and fruit are grown. The forests are rich in timbers. The imports chiefly comprise dry goods, bread-stuffs, hardware, &c. The Legislative Council consists of 16 members, 8 of whom are officials, 3 nominated and 5 elected.

St. George's, on the south-west coast, is the chief town, and possesses a good harbour.

	1929.	1930.

Chief of Police, Maj. E. E. Turner (*and quarters*) £450 to 500

The Grenadines are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carriacou, attached to the Government of Grenada, pop. (1921) 7,104.

ST. LUCIA,

the largest and most picturesque of the Windward group, situated in 13° 54′ N. lat. and 60° 59′ W. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 24 miles S. of Martinique, is 27 miles in length, with an extreme breadth of 14 miles. It comprises an area of 233 square miles with a population (Dec. 31, 1930) of 58,494. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports (1930) are sugar, cocoa, coco-nuts, copra, limes, lime-juice, lime-oil, logwood, molasses, syrup, and fruit. The chief places are Castries, the capital (pop. 1921, 5,899), and Soufrière (pop. 1921, 2,480).

Port Castries, one of the finest in the W.I., is a coaling depôt. In 1930, 335 steamers (tonnage 874,510) entered Port Castries.

ST. VINCENT,

an island about 95 miles west of Barbados, situate in 13° 10′ N. lat. and 60° 57′ W. long., is 18 miles in length and 11 in breadth, comprising an area, with its dependencies, of 150 sq. miles, and a population (Census of 1921) of 44,447. In 1846 a large number of Portuguese labourers, amounting to 2,400, entered the island, and proved a valuable acquisition. St. Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1783 it was secured to Great Britain.

The chief products are arrowroot, cotton, molasses, rum, cassava, cocoa, coffee, and spices. Its chief imports are linen, cotton and woollen manufactures, Canadian flour, fish, lumber, &c. Steps have been taken to settle the labouring classes on lands acquired for the purpose.

CAPITAL, Kingstown. Population (1921), 3,836.

CAMEROONS.

(Joint Franco-British Administration.)

The German Protectorate of *Kamerun* on the west coast of Africa between (British) Nigeria and French Congo (the Spanish Muni River Settlements occupying a small intervening area), was obtained by conquest by Franco-British forces during the War of 1914–18, and at the conclusion of Peace its administration was confided by the Supreme Council of the Allied Powers to Great Britain and France jointly.

The approximate geographical limits are between 2°–12° N. lat. and 8° 48′–19° E. long., and the area is about 187,596 square miles, containing a population estimated at 2,144,000.; of which total the French sphere is 153,846 square miles, with 1,550,000 inhabitants. The coast-line extends from the Rio del Rey to the Muni River. The territory occupies the north-

* Includes Imperial Grants of £6,664 and £2,400.
† Incl. £5,140 Colonial Development Fund.

west corner of the Central African Plateau, with Cameroon Peak (13,350 feet) near the capital, on the coast, and the Chebchi and Mandara Mountains on the north-west frontier. The Sanaga is a considerable river flowing into the Atlantic opposite Fernando Po; the Sanga and Dscha (or Ngoko) are tributaries of the Congo, and the Logone-Shari flows into Lake Chad. The inhabitants are Bantus and Sudanese, with some Haussas and Fula tribes, of whom the latter are Muhammadans and the remainder pagans. Cocoa cultivation is a highly successful industry of recent origin, and the Protectorate is rich in forest produce. The exports are rubber, palm oil, palm kernels, cocoa and dried fruits; the imports are chiefly clothing and textile goods, meat, fish and provisions.

In 1920 the whole area was divided into a British Sphere and a French Sphere.

The *British Sphere* lies between Nigeria and French Cameroons. The total area is 34,081 sq. miles, and the total population is 700,050. It is a narrow strip of land reaching from the Atlantic Ocean to Lake Chad, and lies diagonally between parallels of latitude 4° N. and 12° 30′ N. and parallels of longitude 8° 30′ and 15° E. The nature of the country varies to a remarkable extent from the coastal mangrove swamps and thick forest belts to the grasslands at heights of 4,000 ft. to 7,000 ft. and over; yet another contrast may be seen in the sandy and swampy areas in the region of Dikwa and Lake Chad. The highest point is the Cameroon Mountain, which rises to a height of 13,350 ft. It is volcanic, but has not been active since 1922. The Northern section is administered by the Residents of the adjoining Nigerian Provinces of Adamawa and Bornu; the Southern section by the Nigerian Government as a separate Province, the capital being Buea on the slopes of the Cameroon Mountain. The principal ports are Victoria (in Ambas Bay) and Tiko. Victoria is connected by railway with the capital, and Tiko connected to Victoria by motor road. 115 ships (222,848 tons) arrived in Victoria in 1930 and 102 ships (86,477 tons) entered Tiko, a total of 217 ships (309,325 tons).

Exports to U.K.	8,756	7,361

CEYLON,

an island in the Indian Ocean, to the south-east of the peninsula of Hindustan, is situated between 5° 55′ 9′ 50′ N. lat. and 79° 42′—81° 53′ E. long. Its area is (with outlying islands) 25,332 square miles, or more than three-fourths of that of Ireland. Its greatest length is from north to south, 270 miles; and its greatest width 140 miles. The climate varies with the altitude of the district; but on the whole, though tropical, it is healthy, except in the low-lying jungle. The coolest months are December and January; the hottest are April and May.

The population (Census of 1931) was 5,312,548 (including military and shipping), the most important element being the Sinhalese, descendants of colonists from the valley of the Ganges, who first settled in the island about B.C. 543. In 1505 the Portuguese landed in Ceylon and formed settlements along the coast; but about 150 years later they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements on the island, and annexed them to the Presidency of Madras; but six years after, in 1802, Ceylon was formed into a separate Crown colony. In 1815 the King of Kandy was deposed and banished; and his dominions, which had up to that time maintained their independence of European rule, were annexed to the British Crown.

The staple products of the islands are agricultural. The most important for home consumption is rice in its two forms of paddy and husked grain. The principal exports are tea, rubber, products of the coconut palm, plumbago, cacao, cinnamon, citronella oil, cardamoms, areca nuts, ebony, and a little vanilla.

About one-fifth of the island is under cultivation, and the approximate areas in 1930, in acres, were:—Rice, 800,000; other grain, 105,000; tea, 457,000; coconuts, 1,100,000; rubber, 534,000; cinnamon, 26,000; cacao, 34,000; and tobacco, 14,000. The live stock in 1930 included 1,660,000 horned cattle, 57,000 sheep, 181,000 goats, 45,000 pigs, and 1,300 horses. Among the more important native industries are gold, silver, brass, ivory and tortoiseshell work, pottery, mats, fans, and wood-carving. Ceylon is famous for precious stones, especially catseyes, rubies, &c.; and for the pearl fishery in the Gulf of Mannar, off the N.W. of the island. The manufacture of salt is a Government monopoly.

There are 951 miles of railway open, 834 being 5 ft. 6 in. gauge and 117 miles 2 ft. 6 in.; and 844 post offices, 445 money order offices, and 261 telegraph offices, with 12,511 miles of telegraph wire.

The government of Ceylon is administered by a Governor, aided by a *State Council* of *46 members (elected on a territorial basis) with 8 nominated unofficial members, and 3 Officers of State (Chief Secretary, Legal Secretary and Financial Secretary). The elected and nominated members are divided into 7 Executive Committees: (1) Home Affairs, (2) Agriculture and Lands, (3) Local Administration, (4) Health, (5) Labour, Industry and Commerce, (6) Education and (7) Communications and Works, each with an elected Chairman who is the Minister for the subject dealt with. The Chief Secretary is in charge of External Affairs, Defence and the Public Services; the Legal Secretary and the Financial Secretary in charge of Legal and Financial Affairs. The Officers of State and the Ministers form a Board of Ministers which prepares the Estimates of Revenue and Expenditure in consultation with the Financial Secretary.

For administrative purposes the island is divided into 9 provinces, at the head of each of which is a Government agent. The larger towns have municipalities, Urban District Councils, or local boards; and in the country districts the Ceylonese retain their village councils and tribunals for matters of minor importance.

The MALDIVE ARCHIPELAGO lies to the S.W. of Ceylon, a few degrees north of the equator. Malé, the seat of government, is about 400 miles distant from Ceylon, to which the islands have always been nominally tributary. The Sultan acknowledges his allegiance by sending an annual embassy to Colombo. The natives are Muslims. The islands are unhealthy, and the main exports are dried fish, cowrie shells, coco-nut coir, and tortoiseshell.

Colombo, distant from London (overland) 5,868 miles; transit, 19 days.

THE CHANNEL ISLANDS,

situated off the north-west coast of France (at distances of from ten to thirty miles), are the only portions of the *Dukedom of Normandy* now belonging to England, to which they have been attached ever since the Conquest. They consist of Jersey (28,717 acres), Guernsey (15,654 acres), and the following dependencies of Guernsey—Alderney (1,962 acres), Brechou (74), Great Sark (1,035), Little Sark (239), Herm (320), Jethou (44), and Lithou (38), a total of 47,083 acres, or 73·4 square miles. The 1931 Census population of Jersey was 50,455, and of Guernsey, &c., 42,606 (Guernsey 40,470, Alderney 1,505, Sark 575, Herm 53, Jethou 2).

The climate is mild, and the soil exceptionally productive. The land under cultivation in 1916 was 49,678 vergées (2¼ vergées = 1 acre), the principal product of the soil of Jersey being potatoes, tomatoes and wheat, and of Guernsey green crops and oats, fruits tomatoes and flowers. The famous Jerseys and Guernsey breeds of cows have earned a well-deserved celebrity. The principal officer in each island is the Lieut.-Governor, who represents the King-Emperor (the Duke of Normandy). French is the official language of the local legislatures, called the *States*, and of the Royal Court, and is still spoken by the people, but English is now permissible in the Legislative Assembly. The Bailiff, appointed by the Crown, presides over the *States* and over the Royal Court or judicial body. The islands being all but exempt from imperial taxation they possess a very large trade. The chief town of Jersey is St. Helier, on the south side; the principal town of Guernsey is St. Peter Port, on the east coast.

The trade of the Channel Islands is principally with the United Kingdom.

CYPRUS

is an island in the Mediterranean Sea, between N. lat. 34° 33′ and 35° 41′, and E. long. 32° 20′ and 34° 35′. It is about 40 miles distant from the nearest point of Asia Minor; and 60 miles from Latakia, on the Syrian coast. The distance to Port Said, at the entrance of the Suez Canal, is 238 miles. The larger part of the island is an irregular parallelogram, 100 miles long and 60 to 30 broad; from which a narrow peninsula, 5 or 6 miles wide, runs out for 40 miles towards the north-east. The area is 3,584 square miles. The population at the census of 1931 was 347,959, of whom about 18 per cent. were Muhammadans, and the remainder mostly members of the autocephalous Church of Cyprus, which is a branch of the Orthodox Eastern Church. The principal productions are grain of various kinds, sesame, linseed, flax, wine and spirits, silk, olives, locust-beans (carobs), cotton, wool, hides, grapes, oranges, pomegranates, asbestos, aniseed, sponges, sumac leaves, terra umbra, gypsum, salt, pyrites, and chrome. In 1930 the wine export was 1,372,718 gals., and that of spirits 10,183 gals., the wine going to Egypt, the U.K., Syria, the Dodecanese, and Malta, and spirits to Egypt, Syria and Castellorizo. The climate varies in different localities. In the plains the summer heat is very great, and the British troops suffered when first stationed in the island. Excellent summer quarters were, however, found in the hills; and, owing to the enforcement of various sanitary measures, the death-rate of the whole island is nearly as low as that of any European country.

Cyprus was formally annexed to the British Empire in 1914. The inhabitants have been granted a political franchise, every man paying direct taxes having a vote. The government is administered by a Governor, assisted by a Legislative Council composed of 24 members, 9 being official and 15 elected. The island is divided into three electoral districts each returning one Muhammadan member, and 12 electoral districts each returning one non-Muhammadan member.

For administrative purposes the island is divided into six districts, in each of which the executive government is represented by a commissioner. For judicial purposes it is divided into three judicial districts The law courts were reconstituted in 1927, and there are now a supreme court, 3 divisional courts, 3 assize courts, 3 district courts, and also magisterial and assistant district judges' courts. In all the courts Cypriot judges (Christian and Moslem) take part. There are also 3 Mussulman religious tribunals, styled *Sheri* Courts, and a *Sheri* Tribunal of Appeal.

The capital is Nicosia (Lefkosia), near the centre of the island, with a population of 23,507 in 1931; the other principal towns are Larnaca (population 11,872), Limassol (15,349), Famagusta (8,979), Kyrenia (2,137), Paphos (4,517), and Morphou (4,335).

Important works at Famagusta have rendered the inner harbour accessible to steamers, and a narrow-gauge railway connecting the harbour with the capital (36 miles) was opened in 1905, and was extended to Morphou, 25 miles, in 1907, and to Evrykhou, 15 miles, in 1915. There is a regular service of steamers between Cyprus and Egypt, Syria, Cilicia, Palestine, Smyrna, Constantinople, Greece, France and Italy.

FALKLAND ISLANDS.

These, the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 51° 15′—53° S. lat.

* Exclusive of Grant-in-aid (£92,800); † exclusive of share of Cyprus of the Turkish Debt charge (£92,800).

and 57° 40′—62° W. long. They consist of East Falkland (area 2,580 sq. miles), West Falkland (2,038 sq. miles), and upwards of 100 small islands (islets, rocks, and sandbanks), comprising in the aggregate 4,618 sq. miles, and a population in 1921 of 2,094. Mount Adam, the loftiest peak in the colony, rises 2,315 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. A settlement was made by France in 1764; this was subsequently handed over to Spain, but the latter country recognised Great Britain's title to a part at least of the group in 1771. In 1820 the Argentine Republic established a settlement, which was destroyed by the Americans in 1831. In 1833 the islands were again taken possession of by the British for the protection of the seal-fisheries, and colonised, being the most southerly organised colony of the British Empire. On Dec. 8, 1914, a British squadron under Adm. Sir Doveton Sturdee defeated a German squadron (von Spee) off the Falkland Islands. A memorial erected in the harbour of Port Stanley in commemoration of this victory was unveiled on Feb. 26, 1927. The climate is cold, the thermometer ranging in winter from 20° to 50°, and in summer from 40° to 65° Fahrenheit. The islands are chiefly bog-land, and have proved suitable for sheep, 606,882 being carried in 1930; the output of wool is about four million lb. annually. The population is mainly British, and is principally engaged in sheep-farming. The chief exports are wool, tallow, hides and sheepskins; seal oil is also produced and exported. The only important settlement is Port Stanley, at the head of Port William, on the coast of East Falkland.

The government of the Falkland Islands is vested in a Governor, aided by an Executive Council of 3 official and 1 unofficial members, and a Legislative Council, of 4 official and 2 unofficial members.

CHIEF TOWN, Port Stanley. Population (1931), 1,213.

Dependencies of the Falkland Islands.

The total area of land and sea included in the dependencies of the Falklands is over 3,000,000 square miles. *South Georgia*, an island 800 miles east-south-east of the Falkland Group, with an area of 1,000 square miles, is the only part of the dependencies which is permanently habitable, there being a Resident Magistrate and other officials, and a permanent population (engaged in the whaling industry) at Grytviken Harbour. In the *South Shetlands*, Deception Island contains a harbour at Port Foster, ice-free for about five months in the year, with a land station which arrives and departs with the whaling fleet. The *South Orkneys* also have a seasonal land station, and the Argentine Government have, with the permission of H.M. Government, established a meteorological station, in connexion with a discovery that a cold winter in the Weddell Sea is a precursor of drought in the maize and cereal area of Argentina 3½ years later. The other dependencies, of which the principal units are the *South Sandwich Islands*, and a part of the *Antarctic*, or South Polar, continent known as *Graham's Land*, are even more inhospitable than those already named, being nearly covered with snow and ice and almost completely destitute of plant life. In spite, however, of the climatic and other disadvantages, the revenue derived from all the dependencies in 1930 amounted to £84,547. The local expenditure was £21,597, the surplus (after meeting administrative expenses at Port Stanley) being devoted to local research and development. The trade is considerable, the exports being valued at £2,726,175, and the imports at £499,829 in 1930. The whaling industry carried out from these dependencies is greater than that of the rest of the world combined. Fifteen companies (3 British, 12 Norwegian) caught 10,725 whales in the 1929-30 season, the landed value of the oil being £3,166,450.

In 1928 a claim was made by Norway to *Thomson* and *Bouvet* Islands in the Antarctic and by Argentina to the *South Orkneys*; these claims were not admitted by the British Government, but Bouvet Island was ceded to Norway in November, 1928, as an act of grace.

Port Stanley is distant about 8,130 miles; transit, 26 days from Liverpool. Telegrams by cable and wireless telegraphy *viâ* Monte Video and *viâ* Bergen.

FEDERATED MALAY STATES
(*See* MALAYA).

FIJI.

This is a group of 200 to 250 islands (of which some are, however, mere uninhabited islets and rocks) in the South Pacific Ocean, about 1,100 miles north of New Zealand, which extend 300 miles from east to west, and 300 north to south, between 15° 45′—21° 10′ S. lat. and 176° E.—178° W. long. The gross area of the group is about 7,083 square miles. The islands are of volcanic origin, with lofty mountains, and well wooded. The principal are Viti Levu (Great Fiji) and Vanua Levu (Great Land). The climate is equable and remarkably healthy for Europeans; the average temperature in the shade in the cool season is 72°, rising to 84° in the hot season, extremes lying between 60° and 94°. Vegetation is remarkably luxuriant, the chief products being bread-fruit, bananas, plantains, pea-nuts, yams, and dalo (taro), coco-nuts, sugar-cane, rice, maize, and cotton. The principal exports are sugar, copra, bananas, trocas shell, molasses, maize, fresh fruit and vegetables, and bêche-de-mer. The Governor is appointed by the Crown, and is assisted by an Executive Council consisting of 7 members. Laws are passed by a Legislative Council (of which the Governor is president) containing 13 nominated members, 6 European elected members, 3 native members, and 3 Indian elected members. Native administration is carried on through the

* Colony only.

chiefs under the Governor's supervision. The population (Dec. 31, 1930) was 182,576 (92,189 native Fijians, 75,117 Indians, 5,078 Europeans, and some Polynesians and others).

GAMBIA.

The West African river Gambia, which is navigable for some 300 miles from its mouth, was discovered by the Portuguese in 1447; and in 1588, the year of the Spanish Armada, Queen Elizabeth, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognised, by the *Treaty of Versailles*, as British. The Colony had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888. It now consists of the Island of St. Mary, British Kombo, Albreda, the Ceded Mile, MacCarthy Island, and various other islands and territories on the banks of the river. The total area is estimated at 4,132 sq. miles. The population of the Island of St. Mary, at the Census of April 24, 1921, was 9,227, and that of the Protectorate 201,303. The climate is unhealthy during the rainy season, viz., from June to October; but during the rest of the year it is less unhealthy. The chief export is ground nuts, which form ninety-five per cent. of the total exports; they are sent chiefly to Marseilles, where the oil is extracted and used for the same purpose as olive oil. Palm kernels, hides, and calabashes are also exported; and rice, cotton, maize, and a kind of millet called *kous* are produced in the countries bordering the Gambia, but not in sufficient quantities to meet local requirements. The chief imports are cotton goods, kola nuts, rice, soap, spirits, hardware, sugar, wine, and tobacco. A Company of the W.A.F.F. (4 officers and 120 non-commissioned officers and men) is stationed in the Colony, and there is an armed police force in the settlement (numbering 102 men), which performs both civil and military duties. There are 4 Government wireless statious. The Government, which is that of a Crown Colony, is vested in a Governor, assisted by an Executive Council consisting of 3 official members (besides the Governor), and by a Legislative Council of 5 official members and 3 unofficial members, nominated by the Crown.

Bathurst is distant from London 2,600 miles; transit about 12 days.

GIBRALTAR,

a rocky promontory, 2¾ miles in length and ¾ of a mile in breadth, and 1,396 feet high at its greatest elevation, near the southern extremity of Spain, with which it is connected by a low isthmus. It is about 14 miles distant from the

opposite coast of Africa. Gibraltar was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and ceded by the Treaty of Utrecht, 1713. Since that time it has remained continuously in possession of the British. Of the many attempts to retake it, the most celebrated was the great siege in 1779-83, when General Elliot, afterwards *Lord Heathfield*, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the N.W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade, and is becoming a popular tourist centre. During the year 1930 4,026 vessels (including 61 tourist steamers) entered, with a total tonnage of 7,257,828. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, beer, motor spirit and perfumery. There is an enclosed Admiralty harbour with an area of about 440 acres, containing three graving docks. The estimated civilian population (1930) was 16,558.

The Governor is in command of the garrison, and is aided in the administration by an Executive Council of 7 members; there is no Legislative Council.

GOLD COAST.

The Gold Coast comprises a portion of the coast of the Gulf of Guinea from about 3° 7′ W. to 1° 14′ E. of Greenwich. It is divided into three parts:—Gold Coast Colony, 23,937 sq. miles; Ashanti, 24,379 sq. miles; and the Northern Territories, 30,486 sq. miles—a total area of 78,802 sq. miles. It extends along the coast line about 334 miles and inland to an average distance of 440 miles, or to the 11° of N. latitude. It is bounded on the west and north by the French colonies of the Ivory Coast and French Sudan, and on the east by Togoland. The population (April 1931) was: *Gold Coast Colony*, 1,545,140; *Ashanti*, 582,866; *Northern Territories*, 717,283; total, 2,845,289, excluding 3,139 Non-Africans. The natives are almost all Pagans, but there are many Muhammadans, and the number of Christians is steadily increasing.

The trade in 1930 was principally with the United Kingdom (44 per cent.), U.S. (14), Germany (16), Netherlands (10) and France (3 per cent.). Gold is found in considerable quantities, and diamonds were discovered in 1919; there are also large deposits of high-grade manganese. The principal product is cocoa, more than half the world's supply being produced in the Colony. The principal exports in 1930 were: cocoa, £6,970,385; gold and gold dust, £1,055,634; manganese £418,490; and diamonds, £658,994. The chief imports are apparel, building materials, cotton goods, provisions, kerosene, hardware, motor spirit, motor cars and motor lorries, beer, ale, stout and porter, sugar and tobacco. The climate, generally, is hot and moist, but is becoming annually less unhealthy by the aid of medical science and sanitation. The Government assists the missionaries in educational matters and has established many schools of its own, and a college and school at Achimota, 6 miles from Accra, have been built and opened. Great efforts are being made to improve the sanitary condition of the coast towns. Accra, Kumasi, Sekondi (including Takoradi), Koforidua, Winneba and Tamale are lighted by electricity, and there are pipe-borne water supplies at Accra, Sekondi (including Takoradi), Cape Coast and Winneba; similar supplies are being installed for Kumasi and Tamale. 4,411 miles of telegraph land wire and 7,396 miles of telephone trunks have been established. Exchanges have been opened in the principal towns and are served by 2,840 miles of underground and overhead line wire. There is a wireless station at Tokoradi. A Government railway runs from Sekondi through Tarkwa, the centre of the gold-mining industry, to Kumasi and thence to Accra (362 miles), with branches (590 miles in all). In 1928 a harbour was opened at Takoradi.

The seat of government is Accra (population 59,895). The other principal towns are: Cape Coast (17,685), Ada (4,450), Elmina (4,797), Sekondi (16,742), Tarkwa (3,321), Keta (6,392), Axim (4,533), Kumasi (36,200), Saltpond (6,369), Koforidua (19,634) and Winnebah (10,990). The government of the Colony is administered by a Governor, aided by a nominated Executive Council. There is a Legislative Council of 15 official and 14 unofficial members, for the Colony, excluding Ashanti and the Northern Territories.

	1929-30.	1930-31.

Director of Geological Survey, Maj. N. R. Junner, M.C.	1,200

ASHANTI

Ashanti was placed under British protection on Aug. 27, 1896. Under Orders in Council of Sept. 26, 1901, the country was definitely annexed by Great Britain, the Governor of the Gold Coast Colony being appointed Governor of Ashanti, though only some of the laws and ordinances of the Gold Coast Colony apply to the annexed territory. The area is 24,379 square miles, with a population (census of 1931) of 582,866 (Europeans 447). Kumasi, the chief town, has about 36,200 inhabitants. In 1930 there were 1,207 children in the Government schools, and 3,918 in the mission schools; 54 students were in residence (1930–31) at the Agricultural and Forestry Training centre. Police force (1930–31) 269; prosecutions (1929–30) 4,203, but there is little serious crime. There are 1,193 miles of motor roads. Agriculture is extending; large areas are under cacao, and coffee and cola are also cultivated. Local receipts (1930–31) £65,158 (exclusive of royalties); local expenditure (excluding railway, posts and telegraphs) £384,000. In 1930–31 the export of cacao was 66,721 tons, and the gold output £675,513 (159,019 oz.). In the western parts of the colony are rich forests of mahogany, cedar, &c., and trees yielding fruits, oil, rubber and gum copal. Practically the whole of Ashanti is now connected by motor road with Kumasi and with the main trade routes to the north. The country is well watered, and with proper restraint it could contain inexhaustible supplies of valuable forest products. On the eastern side the forests are sparser, though timber and oil trees are common and game fairly plentiful; the products there are chiefly maize, yams, cocoyams, bananas, ground-nuts, and cacao, the plantations of which are rapidly extending.

Chief Commissioner, H. S. Newlands	£1,600
Deputy Chief Commissioner, E. A. T. Taylor	1,350
Provincial Commissioners:—

NORTHERN TERRITORIES.

In 1901 the Northern Territories lying to the north of the parallel of 8° N. lat., bounded on the west and north by the French possessions and on the east by Togoland, were placed under British protection. They are administered, under the Governor, by a Chief Commissioner with his headquarters at Tamale. By the census taken in 1931 the population was 717,365. The Muhammadans have substantial mosques; there is a Roman Catholic mission. Government schools have been established at Tamale, Gambaga, Salaga, and Wa. There are 3,030 miles of good permanent roads. The Northern Territories are capable of producing various agricultural crops (cereals, shea-butter, ground-nuts, indigo, tobacco), and are said to contain wide auriferous areas.

Chief Commissioner, Maj. F. W. F. Jackson, C.M.G., D.S.O.	£1,600
Provincial Commissioners:—	
Southern Province (*Tamale*) A. C. Duncan Johnstone	1,200
Northern Province (*Navaro*) Lt.-Col. P. F. Whittall, D.S.O.	1,200

Accra is distant from Liverpool, 3,920 miles; transit, 14 to 30 days.

HONG KONG.

The Crown Colony of Hong Kong consists of a number of islands and of a portion of the mainland, situated off the south-eastern coast of China, at the mouth of the Canton River, in 22° 9′ N. lat. and 113° 52′—114° 30′ E. long., and bounded on the N. by the Shum Chun River.

Hong Kong is an island about 11 miles long and from 2 to 5 miles broad, with a total area of 32 square miles; it lies close to the mainland, being separated at one point by a narrow strait (Lyee-moon) not more than a quarter-mile wide, and was first occupied by Great Britain in January, 1841, and was formally ceded by the Treaty of Nankin in 1842; *British Kowloon* was subsequently acquired by the Peking Convention of 1860; and the *New Territories*, being a peninsula in the southern part of the Kwangtung province, by a lease signed June 9, 1898. The whole colony comprises an area of about 391 square miles, with a population (Census, 1931) of 840,473. The non-Chinese residents, excluding naval and military, numbered 19,369.

The capital of the colony is Victoria, which lies along the northern shore of the island, facing the mainland; and between the mainland and the city is the harbour, which is one of the finest in the world, with a water area of some 10 square miles. With the exception of liquor, tobacco and motor spirit the port is free, and is fortified. It possesses excellent docks, capable of holding the largest vessels for the purposes of repair. There is a considerable ship repairing and construction industry. Shipping entered, (1929) 23,593,090 tons; (1930) 21,095,306 tons. A railway, of which 22¼ miles belong to the Government, runs from Kowloon to Canton; the length north of the Shum Chun River (which is the boundary of the British territory) is controlled by the Chinese Government. Good roads connect the principal districts with the railway.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is about 1,820 feet high. The Peak District is a favourite place of residence, and is reserved for Europeans. The New Territories contain peaks from 1,800 to 3,000 feet. The hot season lasts from May to October. During the winter months, from November to March, the climate is cooler, drier, and more invigorating. The average daily maximum temperature ranges from 87° in July to 63° in February, and the average daily minimum temperature from 78° in July to 55° in February. The average annual rainfall is 86 in., of which no less than 75 per cent. falls between May and September, when the S.W. monsoon prevails.

Hong Kong is the centre of a vast trade in many kinds of produce, chiefly camphor, coal, cottons, flour, gunnies, hides, iron and steel goods, leather *matches, oils, rice, silks, sugar, tea and tin.*

Much encouragement is given by the Government to education in the colony. In 1930 there were 1,024 schools subject to Government supervision, attended by 61,932 pupils. The University (opened in 1912) includes faculties of medicine, engineering, and arts.

Hong Kong is a Crown colony, and its government is administered by a Governor, aided by an Executive Council of 9 members, together with a Legislative Council of 18 members, including himself, a representative from the Chamber of Commerce, and a representative of the Justices of the Peace. There is also a Sanitary Board, partly elected, which controls certain sanitary measures.

CAPITAL, Victoria; population (1930), 577,500.

Hong Kong, 9,834 miles, *vid* Suez Canal; *transit*, 29 days, or *vid* Siberia, 18 to 23 days.

THE ISLE OF MAN (MONA),

an island in the Irish Sea, in lat. 54° 3′ – 54° 25′ N. and long. 4° 18′ – 4° 47′ W., nearly equidistant from England, Scotland, and Ireland. The total land area is 145,325 acres (227 sq. miles), with a population (1931) of 49,338 (22,489 males, 26,849 females). In 1930 the *births* numbered 667 and the deaths 727. The cultivated area (1931) was 79,001 acres, and the live stock included 3,417 horses, 19,477 cattle, 91,153 sheep, and 4,172 pigs. In the 9th century a body of malcontents from Norway emigrated to the

western isles of Scotland, and their prosperity drew upon them the anger of the Norwegian monarch Harold, who in the year 870 sent forth a great expedition and conquered the Orkneys and the Shetlands, the Western isles, and Man. For three centuries the Norwegian rule remained intact, but when, in 1263, Alexander III. defeated the famous Haco, at the battle of Largs, all these islands fell under Scottish rule. On his accession to the English throne, Henry IV. seized on the Isle of Man, and in 1406 bestowed it on the Stanley family. In 1827 the Crown purchased it for the sum of £417,144.

The land is rich in minerals, lead, iron, blende and slate, and exports large quantities of agricultural produce. Forty-seven miles of railway have been constructed, and about 25 miles of electric tram road.

Man is governed by a separate Legislature, called the Tynwald, consisting of two branches —the Governor and Council and the House of Keys. The Council consists of the Governor, the Bishop of Sodor and Man, the two Deemsters, the Attorney-General, 2 members appointed by the Governor, and 4 members appointed by the House of Keys. The House of Keys (possibly from the Scandinavian *keise*=chosen) is one of the most ancient legislative assemblies in the world. It consists of 24 members, elected by the male and female owners and occupiers of property, 16 from the six *sheadings*, 5 from Douglas, and 1 each from Castletown, Peel and Ramsey. Bills after having passed both Houses are signed by the members, and then sent for the Royal Assent. After receiving the Royal Assent, a Bill does not become law unless promulgated within the ensuing twelve months, and on the first "Tynwald Day" (July 5) following it is announced in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the Governor and the Speaker of the House of Keys. An annual contribution of £10,000 is made to the Imperial Government. In 1921 Tynwald accepted liability for the redemption of £250,000 War Stock as a contribution to the Imperial Government towards the cost of the Great War. In 1927 liability for a further sum of £500,000 of War Stock was accepted in final settlement of all responsibility to the Imperial Government in respect of the cost of the Great War.

CAPITAL, Douglas. Pop. (1921), 20,326 (Castletown is the ancient capital); the other towns are Peel and Ramsey.

KENYA.

Kenya Colony and the *Kenya Protectorate* are situated in Eastern Equatorial Africa. The eastern boundary has been settled by agreement with Italy, to whom the Province of Jubaland (35,812 sq. miles) was ceded by treaty in 1925; and on the north by an agreement with Abyssinia in 1908. On the west the Colony adjoins Uganda, the boundary being determined by an Order in Council in 1926 to include in Kenya an area on the west of Lake Rudolph and north of the River Turkwel, stretching from Mt. Elgon to Mt. Zulia (on the boundary of the Sudan), which was formerly part of the Uganda Protectorate. On the south Kenya adjoins the mandated Tanganyika Territory. The population of the Colony is estimated at 3,025,084 (Europeans 16,842, Indians 39,594, Goans 3,959, Arabs 12,162, Africans 2,951,196, and others 1,331). The area is 224,960 square miles.

A great portion of this vast region consists of pasture lands or barren wastes, but there are not lacking extensive districts of great natural fertility in the interior, as well as on the coast. The Colony is divided for administrative purposes into 9 provinces, which are subdivided into districts.

The districts most suitable for settlement by Europeans are those of Kyambu, North Nyeri, Laikipia, Nakuru, Naivasha, Kericho, Uasin Gishu, and Trans-Nzoia. There is also a considerable region still undeveloped.

Kenya Protectorate also includes the *Witu Protectorate*, a small tract of country at the mouth of the river Tana.

The telegraph and telephone systems of Kenya have 12,480 miles of wire. Telegraph lines connect Mombasa with Lamu and Witu, Mombasa with Gazi and Tanganyika Border along the coast and inland between Mombasa and Entebbe, the capital of the Uganda Protectorate. There are also extensions to Kahe, Lake Magadi, Machakos, Nyeri, Nanyuki, Meru, Isiolo, Narok, Rumuruti, Kericho, Chemagel, Songhor, Eldama Ravine, Lake Solai, Eldoret, Kitale, Endebess, Kimini and Moiben. Communication between Mombasa and ships at sea, Italian Somaliland and with Zanzibar (for Government traffic only) is maintained by radio-telegraphy. A short-wave wireless station (owned and maintained under licence from Government) is established at Nairobi and provides communication between the Colony and Protectorate and Great Britain. Telephone communication exists in the majority of the settled areas of the Colony. The Kenya and Uganda railways and harbours are State-owned; the railway, which is metre gauge, has a total route mileage of open lines of 1,625 miles, made up as follows:—*Main Line* (Mombasa—Kampala) 884 miles; *Principal Lines*—Nakuru Junction—Kisumu (132 miles), Tororo--Soroti (100 miles), Voi—Kahe Junction (91 miles); *Minor and Branch Lines*, Rongai—Lake Solai (26), Kisumu—Butere (43), Leseru—Kitale (40), Mbulamiti—Narnasagali (18), Kampala—Port Bell (6), Gilgil—Thomson's Falls (49), Nairobi—Nanyuki (145). The Konza—Lake Magadi Line (91 miles) is worked but not owned by Government. In addition, the Administration operates a marine service on Lakes Victoria, Kioga and Albert, and on the River Nile, with a route mileage of 3,676 miles.

The principal imports are cotton piece goods and manufactures, textiles and textile manufactures, motor cars, parts and accessories, motor spirit, cigarettes, cigars and tobacco, cutlery, hardware, instruments and implements; china and glass ware; motor lorries, parts and accessories, industrial machinery, and wearing apparel. The principal exports are coffee, raw

cotton, maize, sisal fibre and sisal tow, hides and skins, carbonate of soda, oil seeds, wheat, ivory, wattle bark and extract, tin ore and butter.

	1929.	1930.
Revenue	£3,333,742	£3,241,600
Expenditure	3,505,072	3,438,874

Exports to U.K. (do.)	2,591,662	3,379,387

NAIROBI, the capital of the Colony, and central station of the Kenya and Uganda railways and harbours, has a population of 47,512, of whom 5,195 are Europeans. There are also some 600 European farmers in the immediate neighbourhood of Nairobi. Mombasa, which is connected with Europe by telegraph, possesses perhaps the finest harbour on the east coast of Africa (population 43,252, of whom 1,132 are Europeans).

Governor and Commander-in-Chief, His Excellency Brigadier-General Sir Joseph Aloysius Byrne, K.C.M.G., K.B.E., C.B. (1931), *and Duty Allowance £2,500, and Allowance as High Commissioner for Transport £1,000*... £5,000

MALAYA.

The whole of the Malay Peninsula, from the southern boundary of Siam to the Strait of Singapore, is within the British sphere, the administrative groups being the *Straits Settlements*, the *Federated Malay States*, and the Protected *States of Johore, Kedah, Kelantan, Trengganu* and *Perlis*. The total area is 50,500 sq. miles (S.S. 1530, F.M.S. 27,430, other 22,040), and the total population of BRITISH MALAYA (1931) was 4,381,342 (as compared with 3,358,054 in 1921). Of the 1931 total, 2,596,045 were males and 1,785,297 females, the disparity being principally due to the large number of Chinese male immigrants. The total European population at the Census of 1931 was 17,767.

(1) THE STRAITS SETTLEMENTS.

The Settlements forming what is known as the Colony of the Straits Settlements consist of the island of Singapore (with its dependencies, including the Cocos or Keeling Island and Christmas Island), Penang (including Province Wellesley and the Dindings), Malacca, and Labuan. These Settlements have an entire area of about 1,535 square miles, with an estimated population (1931) of 1,113,992.

The Government consists of a Governor, assisted by an Executive Council of 11 members, and a Legislative Council of 13 official and 13 unofficial members, appointed by the Crown. Of the unofficial members 11 are nominated by the Crown and 2 are selected by the Chambers of Commerce at Singapore and Penang. The law of the colony is the common and statute law of England as it was in 1826, qualified by local ordinances. The Supreme Court consists of the Chief Justice and 3 puisne judges, and constitutes also a court of appeal, from which there is yet another appeal in certain cases, viz., to the Privy Council. The jurisdiction of the Supreme Court includes that of a Colonial Court of Admiralty. There are also in each Settlement district courts with limited civil and criminal jurisdiction, and the usual police magistrates' and coroners' courts. An ordinance passed in 1931 provided for the establishment of a Court of Criminal Appeal.

The climate of the colony is almost uniform throughout the year, and foliage is perennial.

There is railway communication from Singapore, across the Straits of Johore, to Bangkok, *viâ* Penang (West Coast) or Kelantan (East Coast.

The principal *imports* in 1930 were areca nuts cigarettes, coal, copra, cotton piece-goods, fish (dried and salted), machinery, milk (condensed

and sterilized), rubber, pepper, petroleum, lubricating oil, rattans, rice, sago, sarongs, sugar and tin ore. The principal *exports* in 1930 were areca nuts, petroleum, lubricating oil, copra, cotton piece-goods, cigarettes, fish (dried and salted) milk (condensed and sterilized), pepper, preserved pineapples, rice, rattans, rubber, sago, sarongs, sugar and tin.

SINGAPORE is an island situated off the southern extremity of the Malay Peninsula, from which it is separated by a narrow strait about three-quarters of a mile in width; its length is about 27 miles, and its breadth 14 miles; it comprises, with the adjoining islets, an area of 225 square miles, and a population (1931) of 557,802. It was first occupied in 1819, and formally ceded to the British Government by the Sultan of Johore in 1824. The seat of government for all the settlements is the town of Singapore, situated on the south side of the island in lat. 1° 17′ N. and long. 103° 50′ E., with 445,778 inhabitants in 1931. The climate is fairly healthy for Europeans, except for the absence of any marked change of temperature throughout the year.

The number of merchant vessels entered and cleared in 1930, exclusive of native craft, was 18,242, with a tonnage of 31,829,102. The total for the whole colony was 27,889, with a tonnage of 46,586,856. The total native craft entered and cleared at all four ports, Singapore, Penang, Malacca, Labuan, during the same year was 53,608 (tonnage, 1,942,704). The harbour, in the extent of its shipping, is one of the greatest ports in the world, being a port of call for vessels trading between Europe or India and the Far East, Australia, and Netherlands Indies, and is strongly defended. The Tanjong Pagar docks and wharves were taken over by Government in 1905 at a cost (fixed by arbitration) of $29,000,000 (£3,300,000). The King's Dock (opened in 1913) is the largest east of Suez, being 879 feet long, 100 feet wide, and 34 feet deep; its cost was $3,500,000. Singapore is a free port; no duties are levied, but excise is collected upon the release for consumption of opium, tobacco, spirits, wines, malt liquors, and petroleum.

Labuan is an island of the Malayan Archipelago, situated about 6 miles off the north-west coast of Borneo, in 5° 16′ N. lat. and 155° 15′ E. long. Its area is about 28 square miles and its population is 7,538 (1931). It was ceded to Great Britain by the Sultan of Brunei in 1846, being at that time uninhabited, and was incorporated in the Straits Settlements in 1907, becoming a separate Settlement in 1912. The island has a good harbour. The principal export is sago. Victoria Harbour, in the south-east, is the principal inlet, and affords good anchorage. There is a cable station of the Eastern Extension Telegraph Company on the island.
Resident, C. P. Smith, M.C.S.

The Cocos-Keeling Islands are a group of about 20 small islands about 700 miles south-west of Sumatra, and form part of the Settlement of Singapore. The population is 1,142, and the islands export about 800 tons of copra. There is a station of the Eastern Extension Telegraph Company on Direction Island.

Christmas Island, in the Indian Ocean, 222 miles S. of Java, and 529 miles E. of the Cocos-Keeling Islands, has an area of about 62 square miles and a population of 1,059 (1931). A District Officer is stationed on the island, which contains enormous phosphate deposits worked by the Christmas Island Phosphate Company. The amount exported in 1930 was 119,933 tons.

Penang is the northernmost of the Settlements. It includes Penang or Prince of Wales's Island (pop. 1931, 198,788), on the eastern side of which is Georgetown, the port and capital, and the strip of mainland opposite, known as Province Wellesley (pop. 1931, 160,959), and the territory of Dindings, west of Perak. Penang Island, about 15 miles long and 9 broad, is situated off the west coast of the Malay Peninsula, in lat. 5° 24′ N., long. 100° 21′ E., and was ceded to the Government of India in 1786 by the Raja of the neighbouring territory, Kedah. Area, 111 square miles. At the time it was founded, Penang was the only British settlement in further India; now it is the emporium for all the trade of the northern and more prosperous parts of Sumatra and the Malay Peninsula.

* Including $19,000,000 from Currency Guarantee Fund.

Province Wellesley is a strip of coast about 45 miles in length with an area of 282 square miles, ceded by the Raja of Kĕdah in 1800, with some land S. of the Krian River acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory, containing rice, spices, tapioca, rubber, and coconut plantations.

The Dindings Territory, ceded by the State of Perak in 1874 (area 182 square miles, pop. 1931, 19,592) is at present little developed; but it contains what is considered the best natural port on the western side of the peninsula. The headquarters are at Lumut, where a District Officer is stationed, and steamers call regularly at Pangkor and Lumut. The territory comprises a group of islands (of which Pangkor is the largest), and a strip of the mainland on the west coast of the peninsula, cut out of the State of Pĕrak, and measuring about 22 miles long by about 10 miles in width.

Malacca, the largest of the Settlements, situated on the western coast of the peninsula, between Singapore and Penang, and about 110 miles to the N.W. of Singapore, comprises an area of about 637 square miles. It is one of the oldest European settlements in the East, having been captured by the Portuguese in 1511, and held by them till 1641, when the Dutch drove them out. In 1795 it was captured by the British, and retained till 1818, when it was restored to the Dutch; it finally became a British possession, *in pursuance of the treaty with the* Netherlands, March 17, 1824, being exchanged for the British settlement of Bencoolen in Sumatra. The population in 1931 was 186,694.

SINGAPORE, the capital of the Straits Settlements, is distant from London 8,700 miles; transit, 22 days. Penang, 20 days; and Malacca, 23 days.

(2) THE FEDERATED MALAY STATES.

These States are situated on the mainland of the Malay Peninsula, and are closely connected with the Straits Settlements; they consist of the States of Pĕrak, Sĕlángor, Negri Sembilan, and Pahang, which have by treaty (1895) renewed their engagements with the British Government, and are administered under the advice of a Chief Secretary to Government, with Residents in each State, subject to the instructions of the High Commissioner, who is also Governor of the Straits Settlements. The total area of the Federation is 27,648 square miles, with a population in 1921 of 1,324,890. The principal towns are Kuala Lumpur (Sel.), pop. 80,424; Ipoh (Pk.), 36,860; Taiping (Pk.), 21,111; Kampar (Pk.), 12,325; Seremban (N.S.), 17,272; Klang (Sel.), 11,655; and Teluk Anson (Pk.), 10,859.

The first three States are on the west coast, and extend from the border of Province Wellesley to that of the independent State of Johore. Pahang is on the east coast. All are governed by their native rulers under the above-mentioned control.

There are 1,089 route miles of railway, practically all of which have been constructed from revenue. This mileage includes the Johore State Railway (121 miles), which is leased from the Johore Government. The line is of metre gauge throughout, and extends from Singapore (in the South) to Padang Besar (on the Siamese frontier), where it is connected with the Royal State Railways of Siam, affording direct communication with Bangkok. The journey between Singapore and Penang occupies 23 hours, and that between Prai (Penang) and Bangkok 32 hours (compared with a sea journey of 6 days). The railway runs direct between Singapore Island and the mainland, crossing the Straits of Johore by a causeway. At Gemas there is a branch from the main Singapore-Penang line running northwards through Negri Sembilan, Pahang and Kelantan as far as Tumpat. At Sungei Golok this line is connected with the Royal State Railways of Siam. There are 2,780 miles of metalled roads, 156 miles of unmetalled roads, and 1,850 miles of bridle-paths, while the principal rivers are navigable for small boats.

The Federated Malay States contribute largely to the supply of raw materials of the British Empire, and although production of plantation rubber and tin predominates, figures given below show that other products are produced and exported in large quantities. Gold has always been found in small quantities, chiefly in Pahang, and about half a million tons of coal are annually mined in Selangor and used locally. While with the growth of the rubber industry there has been a tendency to neglect some of the older agricultural products, such as indigo, coffee, sugar, pepper, nutmegs and other spices, it has been proved that large areas in the Federated Malay States are suitable for the cultivation of the oil palm, and 19,000 acres have already been planted and nearly 30,000 acres alienated for *this cultivation*.

Principal exports from the Federated Malay States:—

		1929.	1930.
Para Rubber	*Tons*	259,774	249,675
Para Latex	*Galls.*	1,306,395	287,511
Tin and Tin Ore	*Tons*	67,042	62,065
Copra	,,	69,026	71,043
Firewood, Timber and Planks	,,	47,274	45,667
Rice and Padi	,,	6,662	3,517
Pineapples, Canned	,,	3,337	4,455
Tapioca	,,	3,367	3,219
Areca-nuts	,,	1,052	811
Rattans	,,	749	865
Palm Oil	,,	1,941	3,288
Palm Kernels	,,	284	492
Gambier	,,	208	220
Gold	*Oz.*	21,851	25,912

Climatic conditions show little variation, and though the days are sometimes oppressive, owing to the high humidity, the nights are generally cool. The mean maximum shade temperature is about 90° F. inland, and rather lower on the coasts, while the mean maximum is about 72° F., inland and a little higher on the coasts. The average yearly rainfall varies from 65 inches at the driest places to 165 inches at the wettest. Although there are no clearly defined wet and dry seasons, there are well-marked seasonal variations in the rainfall. At inland stations and along the West Coast the months of January, February, June, July and August having at inland stations considerably less rainfall than the remaining months; along the East coast the middle of the year is usually dry, while from November to March is a period of heavy and persistent rain.

The States are policed by a mixed force of Indians and Malays, officered by Europeans.

Kuala Lumpur is distant 8,500 miles from London; transit, 21 days (*vid* Penang)

(3) OTHER STATES.

The Malay States not included in the Federation consist of Johore, Kedah, Perlis, Kelantan, and Trengganu. The relations of Johore with Great Britain are defined in the Treaty of Dec. 11, 1885, as amended by an agreement dated May 12, 1914, whereby the Sultan accepts, and acts upon, the advice of a British officer called the General Adviser. In respect of the other four States, the rights of Suzerainty, protection, administration and control were transferred by Siam to Great Britain by the Anglo-Siamese Treaty of March 10, 1909. In all these States the trade is almost entirely carried on with the Straits Settlements. Currency, weights and measures are the same. The religion is Muhammadanism.

JOHORE, with an area of 7,678 square miles and a population (census of 1931) of 505,309, occupies the southern extremity of the Malay Peninsula. In 1895 the Sultan undertook to receive a British Agent having the functions of a Consular Officer. In 1914, following an agreement of that date, a General Adviser was accepted. The Legislature consists of a Council of State to which European and Asiatic unofficial members are appointed. The judicial system resembles that of the Federated Malay States. Judges of Supreme Court of the Straits Settlements and of the Federated Malay States are *ex officio* Judges of the State of Johore and *vice versâ*. Johore is primarily an agricultural country producing, as major crops, rubber, coco-nuts, tapioca and pineapples. The cultivation of African oil palm is also making progress. Tin ore and iron ore are exported in considerable quantity. The Johore State Railway runs for 120 miles through the middle of the State. There are 785 miles of metalled road.

	1929.	1930.
Revenue	$17,633,212	$14,634,966
Expenditure	16,200,829	16,671,986

Controller of Labour, E. A. Ross (*acting*).
Protector of Chinese, W. E. Rigby.
Warden of Mines, F. C. Marshall.
Commissioner of Police, A. Hamilton.
Superintendent of Surveys, T. S. Spowers
Conservator of Forests, C. Smith (*acting*).

KEDAH, between 5° 5′ – 6° 35′ N., lies on the west coast of the peninsula, and includes the Langkawi group of islands. The population in 1931 was 429,645, and the approximate area 3,150 sq. miles. Rice is the principal crop in North Kedah, while coco- and betel-nut and rubber are cultivated in South Kedah. The capital is Alor Star, 8 miles inland on the Kedah River, with a population of about 18,646. The powers of the Sultan have, owing to illness, been vested in a Regent, who is assisted by a Council. There are 52 British officials, employed in the Public Works, Survey, Police, and Medical departments.

* All salaries are exclusive of allowances.

	1929.	1932-33.
Revenue	$5,586,701	$5,086,692

Regent, H.H. Tunku Ibrahim, C.M.G., C.V.O.
British Adviser, J. W. Hall, M.C.S. (*acting*)

PERLIS, the most northerly State, is on the west coast of the Malay Peninsula. The area is about 316 sq. miles, and the population is about 45,000, of whom 40,000 are Malays. The capital is Kangar, a few miles up the Perlis River, but H.H. the Raja lives at Arau, which is on the main trunk line from Singapore to Bangkok. Rice is the principal crop, and tin ore and rice are the principal exports. The State came under British protection in 1909.

	1928-9. (A.H. 1347).	1929-30. (A.H. 1348).
Revenue	$583,329	$487,436
Expenditure	584,085	573,738
Public Debt	nil.	nil.

Raja, H.H. Tuan Syed Alwi, C.B.E., C.M.G.
British Adviser, M. C. Hay.

KELANTAN lies between 4° 35′ – 6° 15′ N. and 101° 22′ – 102° 37′ E. on the east coast of the peninsula, with a total length of about 115 miles and a breadth of 60 miles. The total area is 5,713 square miles; population (1931 Census) 362,622. The northern portion is flat and fertile, producing rice, coco-nut and betel-nut and affording pasturage for large quantities of live-stock. Agriculture, fishing, and the production and weaving of silk are the principal industries. The southern and larger portion is in parts mountainous, but a railway is being constructed through the flatter part and good land will thus be made accessible for planting. Tin and gold are found. The capital, Kota Bharu, 6 miles from the mouth of the Kelantan River, has a population of 15,490. Kuala Krai is the headquarters of the Southern Administrative District, and Pasir Puteh of the Eastern.

	1929.	1930.
Revenue	$2,481,140	$2,182,905
Expenditure	2,215,771	2,426,079
Public Debt	4,080,684	4,980,684

Sultan, H.H. Sir Ismail, K.C.M.G.
British Adviser, Capt. T. P. Coe, M.C., V.D., M.C.S. (*acting*).

TRENGGANU, between 4° and 5° 55′ N. and 102° 15′ – 103° 30′ E., lies south of Kelantan on the east coast of the peninsula. Area, about 5,500 square miles. Population (1931). 179,664. Industries of agriculture (mainly rice), fishing and fish-curing, silk weaving, shipbuilding, and tin mining. The principal exports are Para rubber, tin ore, dried fish, cotton and silk, sarongs, gambier, areca nuts, copra, iron ore and wolfram. The capital, Trengganu, on the river of that name, contains 13,972 inhabitants.

	1929-30. (A.H. 1348.)	1930-31. (A.H. 1349.)
Revenue	$1,391,471	$1,235,230
Expenditure	1,524,706	1,445,709
Public Debt	2,600,000	3,250,000

Sultan, H.H. Sir Suleiman Badrul-alam Shah, K.C.M.G.
British Adviser, G. L. Ham (*acting*).

MALTA,

an island in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of 91½ square miles. The colony includes also the adjoining island of GOZO, with an area of 24¼ square miles; COMINO—the site of the *Sultan's* disaster in 1889 and several islets. The civil population of the whole group, on April 26, 1931, was 242,621. In religion the Maltese are Roman Catholics. The lower orders are mainly Punic in race. The Maltese language, which is generally spoken by all classes, is of Semitic origin, and is held by some to be derived from the Carthaginian and the Phœnician tongues. There is a Maltese order of nobility, recognised by the Crown, consisting of 29 families.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in 58 A.D. In the Dark Ages it was taken by the Moors, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger of Sicily. For 440 years it followed the fortunes of that kingdom, but was in 1530 handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grand Master La Vallette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then ceded to Great Britain, the cession being confirmed by the Treaty of Paris of 1814.

The climate, although not tropical, is very hot in summer. The mean temperature for the summer months in 1930 (June, July, August and September) was 81·7°. In winter the mean temperature was 51·3°. The islands are highly cultivated. The chief products are corn, oranges, melons, grapes, forage, cummin seed, onions, and potatoes; figs and honey are plentiful. The principal occupation of the people is in connexion with shipping.

Citta Vecchia, the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral, and the Seminary; its population has now dwindled to 982, but its suburb, Rabat, has 9,050 inhabitants. Citta Vecchia has been entirely eclipsed in importance by the modern capital of Valletta, which was founded in 1566. The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet.

Malta possesses a University and Lyceum; 89 elementary and infant schools, 6 central schools, 2 secondary schools, and 60 night schools; in addition there are garrison schools, a Dockyard school, and 49 private schools of which 15 receive grants-in-aid from the Government.

Under the Constitution of 1921 the Legislature consists of a Senate and a Legislative Assembly. The Senate is composed of 17 members, 10 of whom are special members representing the Clergy, the Nobility, the Graduates, the Chamber of Commerce and the Trade Union Council, the

other 7 being elected by a special electorate. The Legislative Assembly consists of 32, returned by 8 electoral districts, each represented by 4 members. The method of voting is that of Proportional Representation under the system of the single transferable vote. The Governor is assisted by two Councils—an Executive Council consisting of such of the Ministers as he selects and a Nominated Council consisting of the Lieutenant-Governor, the Legal Adviser and three officers chosen from the Navy, Army and Air Force. The Governor may summon these two Councils to sit together as the Privy Council of Malta. When any legislative or administrative act is done which, in the Governor's opinion, affects a reserved matter, he may submit the consideration of it to a Joint Committee consisting of three members of the Nominated Council appointed by himself and three members of the Executive Council appointed by the Head of the Ministry. The Constitution was temporarily suspended by an Order in Council (June 26, 1930) which empowers the Governor to make laws for the peace, order and good government of Malta.

In 1930 the Port of Valletta was entered by 2,201 vessels (*tonnage*, 3,561,513).

Malta is 2,280 miles by sea, and *viâ* Naples about 1,995; transit overland, 3½ days.

MAURITIUS.

Mauritius is an island lying in the Indian Ocean, 550 miles east of Madagascar, between 57° 17'–57° 46' E. long. and S. lat. 19° 58'—20° 33', and comprising an area of 720 square miles. The permanent population at the Census of 1931 was 393,418, made up of Indians, Europeans (mainly French), and natives of mixed descent.

Mauritius was discovered between the years 1507 and 1528 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Prince Maurice of Nassau. In 1644 they established a small colony on the shore, but in 1710 they abandoned the island, and in 1715 the French took possession of it and changed the name to Ile de France. Under the French it became a great centre of trade, but in 1789 the seat of French Government in the East was removed to it from Pondicherry, and it was taken by a British force in 1810. The French language and French law have been preserved under British rule when the ancient name, Mauritius, was restored.

Of the total cultivated area of 171,075 acres, 136,875 are under sugar, 20,000 under fibre, and 14,200 under other crops; the necessaries of life have all to be imported from abroad. Rice and grain are obtained from India, flour from Australia and India, oxen from Madagascar, and minor imports from South Africa and else-

where. 70 per cent. trade of the island is with Great Britain and British Dominions. Being just within the tropics it has a hot climate; but, except in Port Louis and some of the low-lying districts, it is not unhealthy. The island is subject to cyclonic disturbances, and a hurricane in 1892 was particularly severe; a cyclone lasted from March 5 to 7, 1930, and did considerable damage to sugar plantations and buildings.

There is an excellent harbour on the N.W. coast, on which the capital, Port Louis, stands, and the annual trade of the island passes entirely through Port Louis. The shipping entered and cleared, in 1930, amounted to 1,009,212 tons. In 1930 there were 144 miles of railway (120 of 4 ft. 8½ in. gauge and 24 of 2 ft. 6 in.); 59 post-offices, 49 telegraph offices and 10 telephone offices in the island, with 545 miles of telegraph, including block telegraph for the railway, and 150 miles telephone wires (Government).

The Government is administered by a Governor, aided by an Executive Council of four official members, and of such other persons in the service of the Government as the Governor, through instructions of the Secretary of State, may from time to time appoint, and a Legislative Council of 27 members, eight being *ex-officio*, nine nominated by the Governor, and 10 elected by a moderate franchise. Port Louis has two members, and each of the country districts one.

The inhabitants of European descent are mostly Roman Catholic. Education has two branches:—(1) *Superior or Secondary Instruction*, to which is attached the Government Royal College and the Associated Schools; (2) *Primary Instruction*, consisting of the Government schools and the grant-in-aid schools. The estimated expenditure on education for 1931-32 is Rs. 1,424,674.

CAPITAL, Port Louis. Population (1931), 54,403.

Puisne Judges, Hon. R. Marrier d'Unienville; Hon. J. E. Rouillard (*acting*) 18,000

DEPENDENCIES OF MAURITIUS.

(1) RODRIGUES, 350 miles almost due east of Mauritius. Population (Census 1921), 6,584. Area, 40 square miles. Cattle, beans, salt fish, and goats are the principal exports. The island is under the administration of a magistrate from Mauritius, who takes his orders from the Governor of Mauritius.

Magistrate, R. Brouard (*acting*) Rs. 9,000 to 12,000

(2) OTHER DEPENDENCIES. Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any disputes which may be referred to them. The chief product is coco-nut oil. The most important is Diego Garcia (pop. 1921, 445), one of the Chagos Archipelago, which lies on the direct route from the Red Sea to Australia, and possesses a good harbour. The total population of the "Other Dependencies" (1921) is 1,365.

Transit from London to Mauritius, 30 to 35 days.

NIGERIA.

The Colony and Protectorate of Nigeria includes the territories situated on the Bight of Benin, between Dahomey on the west and the Kameruns on the east. The Protectorate (Headquarters, Lagos) is in two main divisions, the Northern Provinces and the Southern Provinces, of which the northern group coincides with the former Protectorate of Northern Nigeria, and the southern group with the former Protectorate of Southern Nigeria. The area of the whole territory (including the mandated area of the Cameroons) is about 372,841 sq. miles, and the population is 18,765,790.

By Order in Council of Nov. 1922 (amended 1928) there is a Legislative Council for the Colony and the Southern Provinces of the Protectorate. The Legislative Council consists of the Governor as President, 27 official members, 3 nominated official members, 3 elected members representing the municipal area of Lagos (Dr. C. C. Adeniyi Jones, Eric O. Moore, and T. A. Doherty), 1 elected member representing Calabar (C. W. Clinton) and 14 nominated unofficial members. The Governor continues to legislate for the Northern Provinces.

The chief industry is agriculture, and crops consist of cotton, cocoa, ground-nuts, kola-nuts, maize, guinea-corn, millet, rice, coffee, yams, cassava, and tobacco. The export trade relies mainly upon certain staple articles of great value, principally palm oil and kernels, ground nuts, cocoa, cotton lint, and tin. The Udi coalfields are of great extent and the coal is of excellent quality. A railway is in operation comprising (1) a Western line from Lagos to Kano (704½ miles), crossing the Niger by bridge at Jebba, with branches from Minna to Baro (111 miles), and from Zaria to the Bauchi tin fields (Jos) (133 miles, light railway); and from Zaria to Kaura Namoda (137 miles), and from Ifo to Idogo (27 miles). An extension of the main line beyond Kano was opened as far as Ringim (45 miles) in 1929 and completed and opened to N'Guru (a further 100 miles) in 1930. (2) an Eastern line (569 miles) from Port Harcourt to Kaduna on the Western Railway, crossing the Benue by train ferry at Makurdi with a branch line connecting from Kafanchan junction (mile 458¼) with the tinfields (Jos)

62¾ miles. Centres of trade are Lagos, Abeokuta, Ibadan, Oshogbo, Illorin, Zaria, Kano, Onitsha, Lokoja, Warri, Bonny, Sapele, Calabar, Opobo, Forcados, and Port Harcourt.

The principal imports (1930) were cotton goods (£3,045,144), provisions, spirits, hardware, cutlery, cycles, kerosene, tobacco, building material, soap, motor-cars and lorries, motor spirit, cement and bags and sacks; the principal exports were palm kernels (£3,679,165), palm oil (£3,250,413), tin ore (£1,373,466), cocoa (£1,756,400), ground nuts (£2,195,756), hides and skins (£874,822) and cotton lint (£623,558). The total *imports from the British Empire* were £8,978,419 in 1931, and from U.S.A. £1,141,903.

	1929-30.	1930-31.

Inspector General of Police, C. W. Duncan, C.B.E. 1,400
Director, Geological Survey, Capt. R. C. Wilson 1,200
Chief Inspector of Mines, E. A. Langslow Cock 1,200
Port Engineer, Lagos Harbour Works, Major J. E. Bostock, O.B.E., M.I.C.E. 1,400
Chief Veterinary Officer, Capt. W. W. Henderson 1,200

Transit to Lagos from Liverpool, 14 days. Cable communication to Lagos. Inland telegraphs to all important places.

NYASALAND PROTECTORATE.

This country was proclaimed a British Protectorate on May 14, 1891. The Protectorate comprises the western shore of Lake Nyasa and the country southwards nearly to the Zambesi. The population of the Protectorate (Dec. 31, 1930) was 1,396,248, including 1,905 Europeans and 1,599 Asiatics, and it has a total land area of 37,890 square miles.

The principal exports are tobacco, cotton, chillies, coffee, ground-nuts, fibre, and tea. The cultivation and export of tobacco is considerable; tea, cotton, fibre and rubber are also exported in fair quantities. The principal imports are soft goods, provisions, and hardware. On Lake Nyasa there are three steamers. A railway from Port Herald (the "inland port" of the Protectorate) to Blantyre (113 miles) is open for traffic. An extension from Port Herald to Chindio (the terminus of the Central Africa Railway) on the Zambesi (61 miles) was opened in 1915. The Trans-Zambesia Railway, from Beira to Muraça (on the southern bank of the Zambesi River) was opened in April, 1922; the terminus is opposite to Chindio, and the line (174 miles) thus establishes direct railway communication between Beira and Blantyre. A further extension to Lake Nyasa is under construction. Main roads and "carrier" roads are open all over the Protectorate, the total mileage being 3,500. A road from Salisbury to Blantyre *via* Tete (Portuguese E. Africa) is open for light cars and is freely used during the dry season.

Mails to and from England are despatched every week *vid* Cape Town and Beira. Between Beira and Europe the means of communication are the Union-Castle Mail S.S. Co., Messrs. Rennie's Line *vid* Natal, the British India Steam Navigation Co., and other lines. The Protectorate is connected by telegraph overland with the Cape *vid* Salisbury. The telegraph lines extend northwards as far as Tukuyu, in Tanganyika.

The chief towns are Blantyre (population about 600 Europeans and 7,000 natives), Limbe (near Blantyre), and Zomba, the headquarters of the Government.

PACIFIC ISLANDS.

High Commissioner, His Excellency Sir A. G. M. Fletcher, K.C.M.G., C.B.E. ...£1,200
(In addition to £3,000 as Governor of Fiji, and allowance of £150 as Consul-General for Western Pacific.)
Secretary to High Commission, H. H. Vaskess (House Allowance £75). £700 to 800
Chief Judicial Commissioner, Capt. M. H. Anderson, C.B.E., K.C., R.N. (*ret.*) 400
(In addition to £1,200 as C. J. of Fiji.)

(1) *The British Solomon Islands*, protected since 1893, consist of Guadalcanal, Malaita, San Cristoval, New Georgia, Choiseul, Ysabel, and other islands situated east of New Guinea, with a total area of about 15,000 square miles, and a population (1931) of 497 Europeans, 193 Asiatics, and 90,719 natives. The *Santa Cruz Group* and several other islands were incorporated in the Protectorate in 1898 and 1899; and in 1900 Choiseul and Ysabel, with the islands in Bougainville Straits and Lord Howe's Group, were transferred by treaty from Germany. The revenue in 1930-31 was £62,728, and the expenditure £67,816; exports 1930-31 £304,310; imports, £215,269. The seat of government is Tulagi.

Resident Commissioner, Francis Noel Ashley (and £150 allowances) £1,200 to £1,400
Secretary to Govt., N. S. B. Kidson...£500 to £600

(2) *The Gilbert and Ellice Islands*, formerly a Protectorate, were formally annexed to the Empire in November, 1915. The Gilbert Group, situated between 4° N. and 3° S. latitude and 172° and 177° W. longitude, consists of 16 islands, with several small islands or islets depending upon them; and the Ellice Group, between 5° S. and 10½° S. latitude and 176° E. and 179·58° W. longitude, consists of nine islands. Ocean Island (or Paanopa), in lat. 0° 52′ S. and long. 169° 35′ E., which is the seat of government, was proclaimed British in 1900. Total area, 180 square miles; population (1929) 262 Europeans, 751 Asiatics (717 on Ocean Island), and 29,450 Pacific Islanders. Revenue (1928-29), £73,712; expenditure, £60,595; imports (1928-29), £190,436; exports, £348,272.

Fanning Island, in lat. 3° 30′ N., long. 159° 13′ W., and Washington Island, 66 miles N.W. by W. of Fanning Island. Pop., 37 Europeans, chiefly in connexion with Pacific cable station, and 399 Gilbert Islanders in copra industry. The islands were included in the Gilbert and Ellice Colony by an Order in Council of Jan. 27, 1916, and Christmas Island was included in 1919.

Resident Commissioner, A. F. Grimble, C.M.G., M.A. (and £100 allowances) £800 to £1,000

(3) *The Tonga or Friendly Islands.*—A protectorate over the Tonga Islands Kingdom was proclaimed May 18, 1900. These islands are situated in the Southern Pacific to the E.S.E. of Fiji, and 390 miles therefrom, with an area of 385 square miles, and an estimated population (1930) of 480 Europeans, 350 half-castes, 28,431 Tongans, and 350 others—total 29,611. The limits of the group are between 15° and 23° 30′ S. and 173° and 177° W. Nukualofa, on the Island of Tongatabu, is the seat of government. The present Queen Salote succeeded the late King George Tubou II. in 1918. Soil generally is fertile; the principal export is copra. Two of the smaller islands disappeared, owing to a tidal wave, in June, 1919. Revenue 1930-31, £71,672; expenditure, £78,660; imports (1930), £148,306; exports, £169,610. The total shipping entered and cleared in 1930 was 163,023 tons.

Agent and Consul, J. S. Neill, B.A., B.L. £800 to £1,000 (and duty allowance £200)

(4) *The Phœnix Islands* (McKean, Gardner Birnie, Hull, Enderbury, Phœnix, Canton, and Sidney), between 2° 30′ and 4° 30′ S. and 171° and 174° W.

(5) *Pitcairn Island*, situate in lat. 25° 3′ 30″ S., long. 130° 8′ 30″ W. Pop. (1927), 193, descendants of the mutineers of H.M.S. *Bounty*. Arrowroot is manufactured and exported.

Chief Magistrate, Richard Edgar Christian.

(6) *The New Hebrides Group*, about 500 miles west of Fiji and 250 miles north-east of New Caledonia, is under the administration of British and French officials as provided for by an Anglo-French Convention of 1906 and a protocol of 1914. The population is estimated at 56,564 (British Nationals 227, French Nationals 797, Foreigners 30, Asiatics and Protected French Subjects 5,510, Natives, 50,000). Principal products, copra, coffee, cotton, cocoa, maize, wool, sandalwood and shell. Joint revenue, 1930, £20,152; expenditure, £28,140. Total imports, 1930, £157,541; total exports, £250,520. A British steamer runs regularly between Sydney and the group, and French steamers from Sydney and New Caledonia; there is a two-monthly service with France, *viâ* Panama.

British High Commissioner, Sir A. G. M. Fletcher, K.C.M.G., C.B.E.
French High Commissioner, M. Guyon.
British Resident Commissioner, G. A. Joy. (*Allowances* £100) £800 to £1,000
French Resident Com., M. Carlotti.
President of Joint Court, Count de Buena Esperanza, K.C.M.G.
British Judge, P. C. Hubbard (*acting*).
French Judge, M. Sachon.

(7) There are also a large number of scattered groups and isolated islands.

PALESTINE.

Palestine, extending from the Mediterranean on W. to an eastern boundary formed by the Wady Arabah, Dead Sea, River Jordan and Sea of Tiberias, and from the Egyptian frontier on S. to the French Mandatory Sphere of the Great Lebanon on N., includes, in addition, a large area E. of the Jordan and S. of the Yarmuk.

Palestine is under British administration since the conquest of the country by the forces of General Allenby in 1918. The Administration is conducted under a Mandate from the League of Nations which entered officially into force on Sept. 29, 1923. The country consists of a W. maritime lowland, the mountain region of Judea (which forms the backbone of the district) and, on the E., the depression through which the Jordan wends its way from the Sea of Galilee (Tiberias) to the Dead Sea. The *Dead Sea*, 1,292 feet *below* the level of the Mediterranean, is 45 miles long and has an average width of 8½ miles; it receives the waters of the Jordan and of six other rivers, and has no outlet, the surplus being carried off by evaporation. Its water is intensely salt and has a specific gravity one-sixth greater than water, with 24 per cent. of salt. (The Great Salt Lake of Utah, U.S.A., is 80 miles long and 30 miles wide, at 4,218 feet *above* mean sea-level, and contains 25 per cent. of salt.) The area of Palestine W. of the Jordan is about 9,000 square miles, with a population (census Oct. 23, 1922), of 757,182, of whom 590,890 are Muhammadans, 73,024 Christians, 83,794 Jews, and 9,474 members of other faiths. The estimated population on July 1, 1929, was 816,064, *not including Beduin, who are about* 103,000 in number. The 1929 estimate includes 80,225 Christians, 572,443 Moslems, 154,330 Jews and 9,066 others. Since 1919 about 60,000 immigrants (mostly Jews) have settled in the country; in 1927 the Jewish immigrants came principally from Poland (35 per cent.), Russia (20 per cent.), Rumania (6 per cent.). In 1927, 2,713 Jews (956 men, 1,140 women, and 671 children) entered Palestine as immigrants; in the same period, 5,071 emigrated from Palestine, the net increase thus being 2,358.

Palestine is divided into 2 administrative districts, under District Commissioners, and the Jerusalem Division under a Deputy District Commissioner. English, Arabic and Hebrew are the official languages of the country. The chief town, *Jerusalem*, had been in Moslem hands since 1244, and under Turkish rule since 1517, until it surrendered to General Allenby on Dec. 9, 1917, to be entered the next day by British troops. The city, which occupies so prominent a place in the affections of the Jewish, Christian and Muhammadan peoples, had a population in Oct., 1922, of 62,578. The Church of the Holy Sepulchre at Jerusalem is visited annually by large bands of Christian pilgrims, principally of the Orthodox and Coptic churches. The site of Solomon's Temple is occupied by the Dome of the Rock, sometimes erroneously called the Mosque of Omar, which contains a relic of Mahomet and the "Holy Rock," the sacrificial altar of Abraham. A conflict of claims, Jewish and Arab, as to rights at the *Wailing Wall* of the Haram al-Sharif at Jerusalem has provided opportunities for disorder, and the Government submitted proposals to the Council of the League of Nations for a Commission to define and determine the rights and claims. In Jan., 1930, the Council appointed a Commission, as requested by the British Government. *Bethlehem*, the scene of Christ's Nativity, is 5 miles S. of Jerusalem. The Church of the Nativity, at the E. end of the present village, is reputed to be the oldest Christian church in existence. King David was also born in Bethlehem. *Nazareth*, about 25 miles S.W. of the Sea of Galilee, had a population of 7,424 in 1922. Other large towns are Jaffa (47,709), Tel-Aviv (40,000), Gaza (17,480), Acre (6,420), and Haifa (24,634). An archaeological museum, constructed, equipped and endowed at the cost of Mr. John D. Rockefeller, Jr., is in course of erection at Jerusalem.

The railway system of Palestine consists of five sections: *Rafa-Haifa*, continuing southward to Kantara to join up with the railways of Egypt, passengers and freight being transported across the Suez Canal at Kantara; *Haifa-Acre-Samakh*, continuing beyond Samakh to Damascus in the French mandated territory of Syria; *Jaffa-Lydda-Jerusalem*; and *Nablus-Afule-Tulkarem*. The main junction of the Government Railways is at Lydda, the general offices being at Haifa. In 1929 the kilometrage operated (excluding 113 kilometres Ma'an-Mudawara section) was 1,194 kilometres, the freight handled amounting to 569,285 tons, and the passengers carried numbering 1,329,475. The gross railway revenue was £P655,143 and the working expenses £P586,035.

The chief ports are Jaffa, Haifa and Acre. Harbour construction at Haifa was begun in 1929 and is now in progress. In 1929, 2,663 vessels (1,975,883 tons) engaged in foreign trade entered the ports, and 2,672 (1,999,438 tons) cleared. There are branches of Barclay's Bank, Anglo-Palestine, Banco di Roma, and Imperial Ottoman Bank in the main towns.

Although economic conditions are still primitive, modern methods are making headway, and there are good prospects of development and progress. The country is generally fertile, and cereals, wine, olives and various fruits are produced, while sheep and goats thrive in the lowlands, and in the mountains in time of drought. In 1928-29 there were 227 Government schools with 19,449 pupils, 162 Christian schools with 15,139 pupils, and 98 Jewish schools with 9,719 pupils. There are also training colleges for teachers, technical, trade and agricultural schools, and a Hebrew University (with faculties of Humanities and Science), which draws about half its students from Palestine and the remainder from Poland, Russia and Rumania.

TRANSJORDAN.

Emir, H.H. Abdullah, G.B.E., K.C.M.G., second son of King Hussein of Hejaz, *appointed* April, 1921.

Transjordan consists of the 4 Districts of *Maan*, *Kerak*, *Balqa*, and *Ajlun*, and is under the same mandate as Palestine. It is bounded on the west by Palestine, on the north by Syria, on the east by Iraq, and on the south by Hejaz and Nejd, and has access to the Red Sea at Akaba. No census has yet been taken, but it is estimated that the total population is 300,000, of whom 130,000 are settled, 120,000 semi-nomads, and 50,000 nomads; the great majority are Moslems. The area is unknown, as the boundaries are not definitely determined. The extreme west of the country is fertile, and agricultural and pastoral industries are carried on, but the rest of the country is almost entirely desert. The Hejaz Railway runs (with the exception of the first few miles) through Transjordan territory from Deraa to Kalaat el Mudowwara, where it enters Hejaz territory and continues to Medina. There is a Legislative Council of 6 official and 16 elected members, constituted in 1929.

RHODESIA.

The total area of Rhodesia is about 440,000 square miles, and the total population is nearly 2,500,000 (1931). The territory is named after *Cecil Rhodes*, the founder of the British South Africa Company, and extends from Lake Tanganyika and the Congo watershed in the north to the Limpopo River in the south.

SOUTHERN RHODESIA.

Southern Rhodesia is that part of the territory named after Cecil Rhodes lying south of the Zambesi River, the political neighbours being Northern Rhodesia and Portuguese East Africa on the N.; the Transvaal and Bechuanaland on the S. and W.; and Portuguese East Africa on the E. The total area is 150,344 square miles, and the population (1931) 1,108,949 of whom 49,904 are Europeans. The native population is 1,055,000, with 4,045 Asiatics and other coloured persons, including those of mixed race. The total number of European births in 1930 was 1,173 (a rate of 24·2 per 1,000) and of deaths 443 (9·2 per 1,000), the marriages numbering 553 (22·9 per 1,000). Responsible Government was instituted in Southern Rhodesia on Oct. 1, 1923. The Government is administered by a Governor appointed by the Crown, with an Executive responsible to the Legislature, which consists of a Legislative Assembly, but that body may pass a law constituting a Legislative Council, in addition.

The laws in force in the Cape Colony up to June 10, 1891, were adopted for Southern Rhodesia so far as they are applicable. Subsequent legislation has been by proclamation of the High Commissioner, by ordinances passed by the Legislative Council, and by Acts of the Legislature. Municipal self-government has been established in Salisbury, Bulawayo, Gwelo, Umtali, and Gatooma.

The main arteries of communication are the Rhodesia and the Mashonaland Railways, the total mileage of which at Sept. 30, 1930, was 2,628 miles (including 1,348 miles operated within the boundaries of Southern Rhodesia). The former is a continuation of the line from Cape Town to Vryburg, *viâ* Kimberley, and was opened to Bulawayo in November, 1897, the distance from Cape Town being 1,362 miles. A line connecting Bulawayo with Salisbury (301 miles) was completed in Oct. 1902. From Salisbury the Mashonaland Railway runs eastwards to Umtali and is continued by the Beira Railway Companies to the port of Beira (Portuguese), a total distance of 374 miles. The main northern extension of the railway was constructed from Bulawayo. It taps the Wankie coalfields and crosses the Zambesi at the Victoria Falls (282 miles). Branch lines primarily constructed in the interests of established mines are :—Salisbury-Sinoia (83 miles), Mt. Hampden Junction-Shamva (73 miles), Gwelo-Selukwe (24 miles), Bulawayo-West Nicholson (104 miles), Gwelo-Umvuma-Victoria (123 miles), and Somabula-Shabani (63 miles). There is also a short branch line, Bulawayo-Matopos. To provide facilities for the transport of passengers and goods in areas in process of development not directly served by existing railways, a system of road motor services has been organised. In September, 1931, routes covering 1,521 miles were in operation.

Southern Rhodesia is rich in mineral deposits, and it abounds in traces of the ancient gold-workers. The first regular crushing returns began in September, 1898, and the gold produced to December 31, 1930, was of the value of £75,098,148. The output for the year ended December 31, 1930, was valued at £2,316,649. Silver, copper, coal, diamonds, lead, chrome iron, asbestos, mica, platinum, corundum, and other minerals have also been produced in considerable quantities. Though the climate is sub-tropical, the average altitude makes it well suited for European occupation, and it possesses all the essential characteristics and facilities necessary for successful agriculture and cattle raising, and for the cultivation of European fruit trees, cereals, and vegetables, in addition to tobacco, cotton, and the indigenous products of the country. The staple crop is maize, and tobacco, cotton and citrus fruits are largely exported. The total area under cultivation in 1930 was 418,000 acres (maize 327,700, tobacco 10,500, cotton 6,200). The export of citrus fruit in 1930 was 165,000 boxes. Cattle (2,468,400 on Dec. 31, 1930) thrive well, and the annual shows at Bulawayo and Salisbury are regarded as among the premier shows of beef cattle in South Africa. The exports of cattle in 1930 were 61,303 head. Dairy products sold include butter 1,768,700 lb., milk 1,009,000 gallons, cheese 163,000 lb., and eggs 726,000 dozen. In addition to the main industries of mining and farming there are creameries, cotton ginneries, bacon factories, oil, soap and candle factories, cement and lime works, and many other undertakings. Land is cheap and may be had on favourable terms. Considerable efforts have been made by the Government during recent years to increase the number of new settlers. During the years 1925-27 settlers and dependents numbered 941 (396 under Empire settlers scheme, and 545 from High Commissioner's Office, etc.). In addition, a further 1,004 men and youths obtained situations on the land in 1925-27. This scheme is (1931) temporarily in abeyance.

Complete courses of primary and secondary education up to the standard of matriculation of the South African Universities are provided in the Government schools. For European children there are 87 Government and Government-aided schools (1 vocational, 12 secondary and 74 primary). Children in rural areas, where the population is too scanty for a school, are provided for by Government grants to tutors or governesses. The total number of European children in all types of schools at the end of 1930 was 8,586. There are seven schools for children of mixed race, with 612 pupils, and native education conducted by mission agencies with Government aid is provided in 1,446 schools, with 108,752 pupils. Grants in aid of native education in 1930-31 amounted to £49,511, the total educational (other than native) expenditure being £288,386 in the calendar year 1930.

SALISBURY, the capital, is situated on the Mashonaland plateau, altitude 4,880 ft. (total population, census 1931, 28,800, including 9,711 whites). BULAWAYO, the largest town in Matabeleland, altitude 4,460 ft. (total population of 31,000, including 11,727 whites). Other centres are Umtali, Gwelo, Gatooma, Que Que, Wankie, Fort Victoria, Selukwe, and Hartley.

NORTHERN RHODESIA.

Northern Rhodesia lies to the North of the Zambezi, its political neighbours being Tanganyika and the Belgian Congo on the north, Nyasaland and Portuguese East Africa on the east, Southern Rhodesia and South-West Africa on the south, and Portuguese West Africa on the west. The country comprises an area of 287,950 square miles, and with the exception of the Luangwa, Zambezi and Kafue Valleys the altitude in most places exceeds 4,000 feet. The permanent European population in May, 1931, was computed at 13,847; the native population was estimated (Dec. 31, 1930) at 1,331,229. Much of the country is suitable for farming, and contains large areas of good arable and grazing land. Over 2,500,000 acres of land are under settlement by white farmers. The chief crop grown is maize. Other crops are tobacco, coffee, wheat, oil seeds, and citrus. Stock raising is carried on by many farmers. The native-owned cattle in the territory is estimated at 362,768, and European-owned 103,201. Copper, zinc, vanadium, lead, gold, mica and coal have been discovered, and scientific prospecting is being carried on over large areas. The copper deposits have attracted much capital, the Roan Antelope mine having commenced output, while others are expected to follow. The copper mines of Northern Rhodesia appear likely to produce a large proportion of the world's supply. Many species of game are to be found, and good sport at a moderate cost is available for the big-game hunter, but the areas now open for hunting are somewhat restricted.

The trunk line of the Rhodesia Railway system traverses Northern Rhodesia from Livingstone to the Belgian Congo border. The Zambezi, Kafue, Chambesi and other rivers are navigable for a considerable portion of their courses. There are 44 post offices, 18 of which are money order offices. A telegraph line exists alongside the railway line throughout its whole length in the territory; other lines connect Abercorn with the Nyasaland and Tanganyika systems and also Fort Jameson with Nyasaland. The construction of 600 miles of new pole route was completed in 1931. A central wireless station (long and short waves) has been erected at Broken Hill, and large district short-wave stations, all equipped for telegraph and telephone communication, have been installed at Livingstone, Mongu, Abercorn, Fort Jameson and Mpika. The administration of the territory is in the hands of a Governor appointed by the Crown, assisted by an Executive Council of five official members. There is a Legislative Council of 16 members, with a majority of official members. The seat of Government is at Livingstone, near the Victoria Falls, on the Zambezi. The country is divided into 9 Provinces for fiscal and administrative purposes. The most important centres are Livingstone, Broken Hill, Fort Jameson, Lusaka, Mazabuka, Abercorn, Kasama, Fort Rosebery, Ndola and Mongu-Lealui.

Trade Enquiry Office in London, The Commissioner, 32, Cockspur St., S.W. 1.

ST. HELENA,

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 760 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,800 from the coast of S. America and 4,477 from Southampton, in 15° 55′ S. lat. and 5° 42′ W. long. It is 10½ miles long, 6½ broad, and encloses an area of 47 square miles, with a population (Census 1921) of 3,747. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, *interspersed with picturesque ravines.* Although within the tropics, the south-east "trades" keep the temperature mild and equable. St. Helena was discovered by the Portuguese navigator Juan de Nova Castella, on May 21, 1502 (St. Helena's Day), and remained unknown to other European nations until 1588. It remained uninhabited until the Dutch colonised it *circ.* 1645. The English East India Company seized it in 1651; but it was retaken by the Dutch in 1672. In 1673 it was again taken from the Dutch and was held by the Company, who had obtained a charter for its possession from Charles II., until 1834 (with the exception of the period 1815 to 1821, during which the British Government held it as a residence for the Emperor Napoleon, who died there May 5, 1821), when it was ceded by them to the Crown. It was formerly an important station on the route to India, but its prosperity decreased after the cutting of the Suez Canal. A phormium (flax fibre) and lace-making industry has been established. St. James's Bay, on the north-west of the island, possesses a good anchorage.

Ascension (*Resident Magistrate*, E. A. Willmott), an isolated island in the South Atlantic (3,417 miles from Plymouth, 760 from St. Helena, and 900 from Cape Palmas on the African coast), is of volcanic origin, the peak rising to the height of 2,820 feet, situated 7° 55′ 55″ S. lat. and 14° 25′ 5″ W. long. It is said to have been discovered by a Portuguese named João de Nova Gallego, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is 7½ miles, and extreme breadth 6 miles, with an area of about 38 square miles, and, being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabited till 1815, when the English took possession of it; in 1931 the population was about 150. The island was administered by the Board of Admiralty until Oct. 27, 1922, when by Royal Letters Patent it became a Dependency of St. Helena and was transferred to the Colonial Office. Georgetown, the capital, is situated in a small bay on the N.W. coast. Ascension is visited by the sea-turtle from January to May, which lay their eggs in the sand; the sooty tern, or "wide-awake," use the island as a nesting-place about every eighth month.

The government of St. Helena is administered by a Governor, with the aid of an Executive Council of 4 members, the Governor alone making all ordinances.

Special Commissioner for Sarawak in England Bertram Brooke (H.H. the Tuan Muda).
Offices, Millbank House, Westminster, S.W.1.

Sarawak is a state on the north-west coast of the island of Borneo, with a seaboard of about 500 miles, an area of about 50,000 square miles, and a population of about 475,000, composed of various races. The territory of the Raja of Sarawak extends from Cape Datu in the south to the Lawas District, where it touches the boundary of British North Borneo. The southern boundary is formed by three ranges, the Serang, Kelingkang, and Batang-Lupar mountains; the eastern boundary is a broken range of mountains with peaks rising to 10,000 feet. The principal rivers are the Rejang (navigable for about 160 miles), the Baram (navigable for about 100 miles), the Batang-Lupar, and the Limbang. Kuching, the capital, stands on a small river (the Sarawak) which is navigable from its mouth to Kuching (23 miles). The government consists of a hereditary sovereign and a Supreme Council of 9 (4 Europeans and 5 Malay magistrates), and a General Council of 50, composed of European and Malay officials and native chiefs, meeting every 3 years. The civil service is composed of English officials to the number of 110, appointed by the sovereign. The government of Sarawak was obtained in 1842 from the Sultan of Brunei by the late Sir James Brooke, who became well known as Rajah Brooke of Sarawak. Other concessions have been made in 1861, 1882, 1884, and 1890, when the Limbang River was obtained. The Lawas River was added in 1905. In 1864 Great Britain recognized Sarawak as an independent state, and under an agreement of 1888 the State has been placed under British protection. The country produces sago, gutta-percha, india-rubber, bees-wax, illipe nuts, birds'-nests, oil, gold, silver, antimony, quicksilver, tobacco, rice, rattans, coal, gambier, and pepper. The large petroleum field at Miri and Bakong, in the Baram district, is now a valuable asset; oil exports (1928) 593,389 tons; (1929), 734,454 tons; (1930) 645,399 tons.

CHIEF TOWN, Kuching. Population (1911). 30,000. Distance from London, 8,700 miles; transit, 25 to 30 days. There are 20 wireless stations, in communication with Singapore. Steamer leaves Singapore for Kuching and Kuching for Singapore every Saturday. There is also direct communication with Sibu and Miri.

SEYCHELLES.

The Seychelles Islands, in the Indian Ocean, which number altogether 90, were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1810. By letters patent of Sept. 1903 they were erected into a separate colony. The principal islands of the group are Mahé, Praslin, Silhouette, Curieuse, and La Digue, and the total area of the islands, with dependencies, is estimated at 156 square miles, of which Mahé occupies nearly 56 square miles: the most important of the dependencies are the Amirantes, Farquhar Islds., Coetivy, Aslove and the Aldabra Group. The population was estimated (Dec. 31, 1929) at 27,588. At the census of 1921 the population of Mahé was 19,426, Praslin 1,999, La Digue, 1,303, other islands 1,795. Victoria, the capital, on the N.E. side of Mahé, has an excellent harbour, and the lighthouses in the vicinity have been fitted up with modern automatic lights. Although only 4° S. of the Equator, the islands are healthy, the death-rate in 1928 being 16·12 per 1,000. There are 27 Roman Catholic and Church of England primary schools; there are also 2 secondary schools.

The principal exports are copra, vanilla, cocoanuts, coconut oil, tortoise-shell, cinnamon, essential oils, soap, and guano. Aldabra, one of the

dependencies of the Seychelles, and about 680 miles from Mahé, is famous for the gigantic land tortoises, whilst the unique double coco-nut, *Coco de Mer*, is found in Mahé, and, in larger quantities, in Praslin, where there is a famous valley. The Governor is assisted by an Executive Council of 3 members (2 *ex-officio* and 1 nominated), and by a Legislative Council of 3 official and 3 unofficial members

SIERRA LEONE.

The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs for the purpose of being used as an asylum for the many destitute negroes then in England. At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies, and great numbers of Africans rescued from slave ships have from time to time been liberated and settled there. The Colony has a coast-line of 210 miles, with an estimated area of 4,000 square miles. In 1921 its population was 85,163, of whom 1,161 were resident Europeans. Of the rest, more than half are the descendants of liberated Africans, while the remainder belong to the neighbouring tribes. A babel of tongues is thus to be heard in the streets of Freetown. In 1896 a Protectorate was declared over the territory adjoining the Colony to the northward and eastward. The extreme depth of the Protectorate from north to south is about 210 miles, lying between 7° and 10° N. lat., and the extreme breadth from east to west is 180 miles, between 10° 40′ and 13° 21′ of W. long. Its estimated area is 27,000 sq. miles, and its population about 1,456,148. For administrative purposes it is divided into 2 Provinces, under Provincial Commissioners, assisted by 2 Senior District Commissioners, 17 District Commissioners and 12 Assistant District Commissioners. The principal peoples are the Limbas and Korankos in the north, the Temnes in the centre, and the Mendis in the south.

The principal exports are palm kernels, kola nuts, palm oil, and ginger: piassava, hides, and rice are also exported. The value of the palm kernels exported in 1930 reached £664,591. The chief imports are cotton goods, coal, apparel, hardware, provisions, and tobacco. Freetown, the capital, possesses the finest and most important harbour in West Africa.

A railway runs inland from Freetown to Pendembu, a distance of 227½ miles, and a branch line 83 miles in length extends in a north-easterly direction from Bauya to Makeni. Motor roads are now being opened up in the Colony and Protectorate, in the Colony connecting the various towns and villages with the port, and in the Protectorate as feeder roads to the railway. There are (1930) 1,912 miles of combined telegraph and telephone service.

Sierra Leone is a Crown Colony, possessing a Legislative Council partly elected and partly nominated by the Crown, with full power to legislate for the Protectorate as well as for the Colony. The Governor is advised by an Executive Council.

SOMALILAND.

(The Somaliland Protectorate.)

Somaliland occupies the "North-Eastern Horn" of the African continent, jutting out into the Indian Ocean along the south of the Gulf of Aden, and is divided between Great Britain, France and Italy, while the interior is subject to Abyssinia. The British Protectorate, declared in 1884, contains about 68,000 sq. miles, its boundaries being defined by treaties with Abyssinia, France and Italy; the northern coast as far as 49° E. and the 8th parallel of N. latitude are the limits on the north and south. The population, mainly consisting of Somalis, a

† Exclusive of allowances.

Muhammadan people, is estimated at 344,700. The Protectorate garrison is now confined to a Camel Corps, 400 strong, and a Police force of 550, the Dervish power having been finally broken in 1920. The chief products of British Somaliland are cattle, sheep, goats, hides, skins and gum. There is wireless communication with Aden. The Protectorate was transferred to the administration of the Colonial Office on April 1, 1905.

SOUTH AFRICAN HIGH COMMISSION.

High Commissioner for South Africa, His Excellency Sir H. J. Stanley, G.C.M.G. £3,000

Private Secretary & A.D.C., Capt. L. Holbech, D.S.O., M.C.

Imperial Secretary and Accountant, (vacant) 2,000

Asst. Imperial Secretary, Shirley Eales, C.B.E. 1,190

Chief Clerk, H. L. Smith 750

Auditor, T. A. Williams 1,100

The Office of High Commissioner in and for South Africa was created by Letters Patent in 1878. In 1879 a second High Commissioner was appointed, to whom was assigned South-Eastern Africa, including Zululand and Amatongaland; but this arrangement ceased in 1881, when a Special Commissioner for Zulu affairs was appointed, who was also Governor of Natal (which now includes Zululand and Amatongaland). The High Commissioner for South Africa, who, under the Commission of 1889, was the officer for the time being administering the Government of the Cape, now represents the Crown in all matters occurring in South Africa beyond the limits of the Union and of Southern and Northern Rhodesia. The High Commissioner is *Governor of Basutoland*, and supervises the affairs of the Bechuanaland Protectorate and of Swaziland. Prior to October 1, 1923, Southern Rhodesia was administered by the British South Africa Company, and the High Commissioner exercised certain powers of control under the Southern Rhodesia Order in Council 1898. Upon the establishment of responsible government the Order in Council 1898 lapsed, but under the Southern Rhodesia Constitution Letters Patent certain of the High Commissioner's previous powers and functions in regard to native administration were reserved to him and the Southern Rhodesia Order in Council, 1920, whereby the Native Reserves were vested in the High Commissioner, was continued in full force and effect. On April 1, 1924, the functions which the High Commissioner had exercised in Northern Rhodesia during the British South Africa Company's administration of that Territory were, with the assumption of the administration by the Crown, transferred to the Governor of Northern Rhodesia.

The Office of High Commissioner, which was formerly held by the Governor of Cape Colony, was, by a Commission dated October 6, 1900, vested in Lord Milner, and by a similar Commission, dated March 15, 1905, in Lord Selborne. During the years 1910-1930 the Office was vested, by separate Commission, in the successive Governors-General of the Union of South Africa. This arrangement ceased upon the termination of the period of office of Major-General the Earl of Athlone, K.G. Sir Herbert Stanley, G.C.M.G., was then appointed by His Majesty to be High Commissioner for South Africa, and he holds that office concurrently with the newly created office of High Commissioner in the Union of South Africa for His Majesty's Government in the United Kingdom.

BASUTOLAND.

(*The Territory of Basutoland.*)

Basutoland is an inland Native Territory of South Africa, bounded North and West by Orange Free State, East by Natal, and South by Cape Colony, with an area of 11,716 square miles. The Census of 1921 showed 495,937 natives and 1,603 whites, 1,069 coloured and 172 Asiatics.

The territory is well watered, and enjoys a good climate. It is one of the finest grain producing districts in South Africa, and the abundant grass enables the Basuto to rear immense herds of cattle, sheep and goats, the mohair produced being of excellent quality. The Maluti Mountains, forming a part of the great Drakensberg chain, occupy most of the country, which is elevated, broken, and rugged. Basutoland has been called "The Switzerland of South Africa" and contains amongst its natural wonders the *Maletsunyane Falls* (670 feet).

The Territory is governed by a Resident Commissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority which is exercised by proclamation. The chiefs adjudicate on cases between natives, with a right of appeal to the magistrates' courts, where all cases between Europeans and natives are brought. The final court of appeal in the Territory is the Resident Commissioner's Court, appeal from which lies

direct to the Privy Council. The revenue is derived from Customs, native tax, income tax on Europeans, post-office, and licences. Telegraph offices have been opened at Butha Buthe, Leribe, Peka, Teyateyaneng, Maseru, Morija, Mafeteng, Mohale's Hoek, Quthing and Qacha's Nek. There are 597 native schools, with an average attendance (1930) of 37,150, a large proportion being in the schools of the French Protestant Mission; there are also 9 white schools. The education vote for 1930–31 was £55,405. The chief articles of export are wool and mohair, cattle and hides, the imports being chiefly blankets, groceries and hardware.

BECHUANALAND.

(*The Bechuanaland Protectorate.*)

The Bechuanaland Protectorate is a country of British South Africa, in the centre of the vast tableland stretching north to the Zambesi.

The Protectorate is bounded on the south and east by the Cape and Transvaal Provinces of the Union, on the north and north-east by Southern Rhodesia, the Zambesi and Chobe Linyanti) Rivers, and on the west by South-West Africa. It is about 500 miles long and 550 miles broad, with a total area of about 275,000 square miles; the *Caprivi Zipfel* was attached to the Protectorate for administrative purposes by Proclamation (1922), but was retransferred to S. W. Africa, Sept. 1, 1929. The population at the Census of May, 1921, was 152,983, of whom 1,743 were Whites, 52 Indians, 1,003 Coloured and 150,185 Natives.

The climate is healthy during part of the year. Malarial fever is prevalent during February, March, and April, but with ordinary precautions is not seriously detrimental to health. The country is essentially pastoral, although Kaffir corn, mealies, beans, pumpkins and melons are sown, and when the rainfall is adequate crops are reaped. Cattle thrive, and numbered 426,344 at the Census of 1921. Much of the country is thick bush. The High Commissioner for South Africa has the power of making laws by proclamation for the Protectorate, where he is represented by a Resident Commissioner. The population is almost entirely a native one, the principal tribes being those of Tshekedi, Regent during the minority of Seretse (Bamangwato), of Molefi Pilane (Bakgatla), of Kgari Sechele (Bakwena), of Bathoen (Bangwaketsi), of Seboko Mokgosi (Bamalete), and of Mathibe (Batawana).

The railway from Kimberley to Vryburg and Mafeking traverses the Protectorate on its way to Rhodesia. There is a telegraph line from Cape Province through from Mafeking, *vid* Gaberones and Francistown, to Bulawayo and Salisbury. The chief European centres are Lobatsi, Gaberones, Francistown, and Serowe, whither the late Chief (Khama) and all his people moved in 1901 from Palapye. The headquarters of the Protectorate Administration are at Mafeking, Cape Province.

SWAZILAND.

(*The Swaziland Protectorate.*)

Swaziland (called by the natives *Kwa Ngwane*) lies between the Drakensberg and Lebombo Mountains in British South Africa. The Transvaal Province forms a boundary on the south, west and north, the eastern boundary being Zululand (Province of Natal) and Portuguese East Africa. The total area is 6,705 square miles, and the population (1921) 112,951, of whom 2,205 are whites, the remainder being Ama-Swazi Bantus (or Swazis). Estimated European population (1931) 2,650. Swaziland is divisible into three longitudinal regions; the mountainous regions of the west, with an approximate altitude exceeding 4,000 feet; the Middle Veld, about 2,000 feet lower; and the Low Veld, bounded on the east by the Lebombo Mountains, with an average altitude not exceeding 1,000 feet. The country is well watered and healthy, the annual rainfall averaging 55 inches, the mean temperature being 62° Fahr. (30°–90°). The soil is generally fertile, particularly so in the Low and Middle Veld. The whole of the Territory forms excellent grazing for cattle, and cattle-ranching on

a large scale has been commenced by several companies. There were about 334,000 head of cattle in the Territory at the end of 1930. In the winter season sheep are brought to Swaziland for grazing from the high table-lands of the Eastern Transvaal.

The agricultural products are, maize (the staple product), tobacco, millet, ground-nuts, beans, pumpkins, and sweet potatoes Cotton growing from jassid resistant seed is becoming important. The country possesses considerable mineral wealth, including gold, tin, coal, copper and asbestos. During the year ended Dec. 31, 1930, 161 tons of cassiterite tin, valued at £23,414 were exported.

Mbabane, the headquarters of the Administration, is situated on the hills at an altitude of 4,000 feet. There are townships in the districts at Bremersdorp, Hlatikulu, Stegi and Goedgegun. There are schools for Europeans at various centres.

There is a daily South African Railway motor omnibus service between Breyten and Mbabane (89 miles); Bremersdorp and Stegi (43 miles); Piet Retief and Hlatikulu (57 miles); and Goedgegun to Hluti (33 miles). There are post offices, and telegraph and telephone offices at all the chief centres

STRAITS SETTLEMENTS.

(*See* MALAYA.)

THE SUDAN

The Sudan extends from the southern boundary of Egypt, 22° N. lat., to the northern boundary of Uganda, 3° 36′ N. lat., and reaches from the French Sahara about 19° 10′ E. (at 22° N.) to the north-west boundary of Eritrea (Italian) in 38° 30′ E. (at 18° N.). The greatest length from north to south is approximately 1,300 miles, and from east to west 1,200 miles. The northern boundary is the 22nd parallel of North latitude: on the east lie the Red Sea, Eritrea and Abyssinia; on the south lie the British Protectorate of Uganda and the Belgian Congo; and on the west French Equatorial Africa. The total area is about 1,008,100 sq. miles, with a population of about 5,600,000, partly Arabs, partly Negroes, and partly Nubian of mixed Arab-Negro blood, with a small foreign element, including some 3,000 Europeans. The Arabs and Nubians are all Muhammadans, as are some of the Negroes, but the latter are generally pagans. The *Gambeila enclave* (within the boundaries of Abyssinia) is leased from the Abyssinian Government as a trading post. The *Nile* enters at Nimule, in Mongalla Province, as the *Bahr el Jebel*, and leaves the Sudan at Wadi Halfa. From the Atbara confluence to the Mediterranean the river has a course of close on 1,600 miles, and from its sources to the confluence its length may be reckoned at 2,400 miles, giving a total waterway of 4,000 miles. Between Khartoum and Wadi Halfa occur five of the six *Cataracts*, the remaining (first) cataract being in Egypt at Assuan.

Government.—The Sudan is administered by a Governor-General, aided, since 1910, by a Council nominated from amongst the Officials of the Government. All Ordinances and Laws are made by the Governor-General in Council. No duties may be levied on imports from Egypt, and duties on imports *viâ* the Red Sea ports may not exceed those levied in Egypt. The Sudan is divided into 14 provinces (*Mudirias*) under governors (*Mudirs*). Each province is subdivided into districts with one (or more) District Commissioners in charge of each. Native administrative officials are employed under the District Commissioners. *Civil Justice* is administered by a Chief Justice and four puisne judges, one of whom is also Registrar-General of Lands. There are also Province and District Judges who are usually the Governors and District Commissioners of Provinces, but there are also District Judges who are professional lawyers in some of the more important centres. Appeals lie from the District Judges to the Province Judges or the High Court, and from the Province Judges and the High Court to the Court of Appeal, which consists of three judges of the High Court. The system of the law administered is "justice, equity and good conscience" in all cases in which there is no special enactment. There is no general code of civil and commercial law such as is in force in Egypt and many Continental countries. The religious law of Islam is administered by the Mohammedan Law Courts in matters of inheritance, marriage, divorce, and family relations generally amongst the Moslem population. There are District and Province Courts under District and Province Kadis, and a High (Mahkama) Court at Khartoum presided over by the Grand Kadi. *Criminal Justice* is administered chiefly by the Governors and District Commissioners and Mamours of Provinces and Districts, all of whom are magistrates. The Judges of the High Court and District Judges also have criminal jurisdiction as magistrates. The more serious offences are tried by courts consisting of three magistrates, and many native notables have been made magistrates for the purpose of sitting as members of such courts. The decisions of such courts require confirmation by the Governor of the Province or the Governor-General, who exercise powers similar to those of confirming officers in Courts Martial, and to them also appeals lie. Courts of Sheiks or Chiefs in all parts of the country have varying powers of limited jurisdiction in accordance with native customs. The Sudan is garrisoned by native troops, forming the Sudan Defence Force. A small garrison of British troops is quartered at Khartoum. The *Police* are locally enlisted and are under Provincial administration.

Education.—In addition to *khalwas* and *kuttabs* (vernacular schools) there are 10 *primary schools*, where instruction is given in English as well as Arabic, attended by about 1,300 pupils; a *secondary school* at Khartoum (Gordon College), and a *training college* (also at Gordon College); and *technical* or *trade schools* at Khartoum, Omdurman, and Atbara. There are also 21 *elementary vernacular schools for girls*, and a *Training College* for girls' teachers.

Production.—The principal grain crop is *dura* (great millet), which is the staple food of the people in the Sudan, and is also used as cattle and poultry food elsewhere. Egyptian cotton has been successfully established, and increasing quantities are being produced annually. *The Gezira Irrigation Scheme* at present (1930) enables an area of 630,000 acres to be cultivated between the Blue and White Niles, one-third of which is under cotton. The necessary water is stored by the Sennar Dam on the Blue Nile, about 170 miles south of Khartoum. Cotton cultivation in the irrigated area is managed by a syndicate, and is one of the largest cotton-growing schemes in the world (198,000 feddans in 1930). The Sudan is the chief source of the world's supply of gum arabic. Natural salt fields on the Red Sea coast near Port Sudan supply the whole needs of the country and maintain an export trade with Abyssinia. Work has been commenced on a new scheme for the further expansion of salt production on a large scale in this area. Other products include sesame, senna leaves and pods, ground-nuts, dates, hides and skins, and gold.

Trade.—The total value of trade in 1930 amounted to £E11,423,423. The principal export is cotton, the value of which, together with cotton-seed, amounted to £E3,256,625, or 65·7 per cent. of the value of the total exports. Gum arabic was exported to the value of £E980,157. Other exports are: sesame, cattle, hides and skins, dates, ground-nuts, dom-nuts, *dura*, salt, senna, ivory and gold.

Communications.—The railways and steamers throughout the country are administered by a Government department. During the past few years nearly 500 miles of new railways have been built, while other transport has been revolutionised by the opening up of a net-work of motor roads spreading all over the country during the dry season. In 1930 there were 1,995 miles of railways open for traffic. The gauge is 3 ft. 6 in. Since the opening of the eastern railway the Red Sea port of Port Sudan receives much of the trade which formerly passed northwards. A line from Sennar Town, crossing the Sennar Dam, was completed during 1929, and affords an alternative route (498 miles) for produce of the Southern provinces to Haiya Junction, 126 miles W. of Port Sudan. There are over 3,000 miles of the various reaches of the river Nile and its tributaries under navigation by a fleet of shallow draught steamers and barges. Three of these routes are only practicable in the flood season, June to September. In the southern provinces motor car services are maintained in the dry season (December to March) between Juba and Nairobi (800 miles), Juba and Kampala (600 miles) by private companies in Uganda, and by an all-weather route, Juba to Aba (143 miles), operated by the Sudan Government and also by private enterprise. In the interior of the country there are other dry season motor roads. All the principal towns are in direct telegraphic communication with Khartoum, the total mileage of telegraph lines being 5,737 miles in 1928. There are 80 stationary and 16 travelling Post and Telegraph offices, and 10 wireless telegraphy offices.

Finance.—The revenue is derived mainly from land tax, animal tax, royalties on gum and ivory, customs and railways, posts, telegraphs and steamboat services.

Advisory Engineer, C. G. Hodgson, O.B.E.

CAPITAL, KHARTOUM, at the junction of the White and Blue Nile. The town contains a large mosque for Mohammedans, a cathedral, and the Gordon College, with extensive Government buildings. Population 42,240. Opposite Khartoum, on the Blue Nile, is Khartoum North (102,512), and on the White Nile is Omdurman (102,983), the former Mahdist capital.

TANGANYIKA TERRITORY.

TANGANYIKA TERRITORY has a coast-line of about 500 miles and an estimated area of 373,500 square miles. The Sultan of Zanzibar's rights over the narrow strip of coast territory were acquired by Germany in 1890 for a payment of 4,000,000 marks. The coast-line extends from the mouth of the Umba to the mouth of the Rovuma River.

The native population consists mostly of tribes of mixed Bantu race, and was enumerated for the whole area (April, 1921) at 4,107,000, the coloured population (other than native) being 14,991. In 1930, the native population of Tanganyika Territory was estimated at 4,852,244. The total white population is about 6,870. According to German law every native born after 1905 is free, but a mild serfdom was continued under German rule. Legislation for the abolition of the status of slavery was enacted on June 9, 1922.

Considerable progress continues to be made with native education. In 1930 there were 94 Government schools, with 5,606 children in average attendance, and 3,044 *Mission schools* with average attendance of 97,745 pupils. The amount allotted to education in 1931–32 is £124,893. Two schools are maintained by the Government for the education of European children, one a day school at Dar-es-Salaam, and the other a small boarding school at Engare Nairobi, in the Northern Province. Assistance is given to 3 Dutch schools in the Arusha district, to 2 Roman Catholic schools in Dar-es-Salaam and Tabora, to 2 German schools in Tanga Province and to a private kindergarten at Dodoma. Thirty-six Indian schools, with enrolment of 2,300 pupils, are in receipt of financial assistance. Other schools in various parts of the Territory are unassisted. The Government publishes a monthly journal printed in Swahili to disseminate news and useful information among the vernacular speaking population.

The total area under forests is about 4,120 square miles, of which 3,896 square miles are included in the Government Forest Reserves, and about 70 square miles are privately owned. Non-native plantations are mainly for the production of sisal fibre and coffee, with small areas under tea and tobacco, minor crops being cotton, maize and coconuts. Native production consists chiefly of coffee, bananas, cotton, ground-nuts, rice, millet, maize, cassava and pulses.

In 1930 there were 5,170,162 cattle, 2,262,102 sheep and 3,259,443 goats in the Territory. The value of minerals produced in 1930 was—diamonds £27,211, gold £47,013, salt £36,790, mica £6,182 and tin £852. Companies desiring to investigate the mineral resources can obtain information and assistance from the Mines Department, Dar-es-Salaam.

The chief exports are sisal, cotton, coffee, ground-nuts, hides, skins, copra, grain, simsim, bees-wax, ghee, diamonds and gold; the chief imports being cotton piece goods, iron and steel manufactures, foodstuffs, machinery, building materials, kerosene and motor spirit, sugar, rice, spirits, and cigarettes.

	1929-30.	1930-31.
Revenue	£1,992,675	£1,749,478
Expenditure	2,084,898	2,102,501
	1929.	1930.
Imports	£4,285,952	£3,982,605
Exports	3,938,365	2,897,938

The Southern Brigade headquarters, the 2nd Bn., 6th Bn., Brigade Signal Section, S. and T. Sections, and a company of 1st Bn. (Nyasaland) of the King's African Rifles, are stationed in Tanganyika Territory. There is a Police Force of 1,880 all ranks.

The chief seaports are Dar-es-Salaam, Tanga, Lindi, Mikindani, and Kilwa, all of which are accessible to ocean-going vessels. In 1930, 585 steamers (exclusive of coastal boats) of 2,473,007 tons, and 4,098 dhows of 89,057 tons entered and cleared at the various ports from places beyond the Territory. There are two railways of metre gauge in the Territory. The Tanga Railway from Tanga to Arusha *via* Moshi (272 miles). The Kenya and Uganda Railways connect with this railway at Kahe Junction. The Central Railway from Dar-es-Salaam to Kigoma (772 miles), with a branch line from Tabora to Mwanza (235 miles). A branch line from Manyoni to Kinyangiri (93 miles) *via* Singida is under construction. A 60-c.m. tram line from Mingoyo near Lindi to Ndanda (57 miles) is worked by hand during certain periods of the year only. Steamers run on Lakes Victoria, Nyasa and Tanganyika. Dar-es-Salaam is in telegraphic communication with many inland centres, and with the adjoining territories Nyasaland, Kenya, Uganda and Northern Rhodesia. Cable communications exist between Dar-es-Salaam and Zanzibar, and communication with the Belgian Congo is effected by wireless between Kigoma and Albertville. There is a wireless station with a range of 450 miles spark transmission and 1,000 miles continuous wave transmission at Dar-es-Salaam, and a short-wave apparatus is also in use. There are 141 telegraph offices and

124 post offices and postal agencies (97 of which have telegraphic facilities). Telegraph Money Order and savings bank business are conducted at 22 head offices, and postal order and ordinary money order business at 21 sub-offices, while 20 others afford full postal facilities. Telephone exchange are established and trunk telephone communication is in operation between 38 inland centres, and also with Mombasa.

TOGOLAND.

(Joint Franco-British Administration.)

The total area is about 43,040 square miles, with an estimated population of 920,000. The British sphere consists of an area of about 13,040 sq. miles with a population estimated (1931) at 275,925, excluding 43 Non-Africans. The mandated sphere adjoins the eastern frontier of the Gold Coast and is administered as part of it.

TRISTAN DA CUNHA

is the chief of a group of islands of volcanic origin lying in lat. 37° 6′ S. and long. 12° 2′ W., discovered in 1506 by a Portuguese admiral (Trisão da Cunha), after whom they are named. The population numbers 127, and the inhabitants are said to be very long-lived. The principal settlement (Edinburgh) is in the north-west of the island. In spite of periods of distress the inhabitants refuse to leave the island for the Cape of Good Hope, to which they are attracted by offers of land. Two missionaries Rev. R. A. C. Pooley and Mr. Philip Lindsay) were sent out from England in 1927 on a 3-year mission to the islanders.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length; the island is the resort of penguins and sea-fowl.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and ¾ m. wide, and rises in two peaks, 960 and 1,105 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. Numbers of seals and sea-elephants visit these islands.

GOUGH ISLAND (or Diego Alvarez), in 40° 20′ S and 9° 44′ W., lies about 250 miles S.S.E. of Tristan da Cunha. The island is about 8 miles long and 4 miles broad, with a total area of 40 square miles, and has been a British possession since 1816. The island is the resort of penguins and has valuable guano deposits. There is no permanent population.

THE UGANDA PROTECTORATE.

The territories now comprised within this Protectorate came under British influence in 1890, and a portion of them was for a time administered by the Imperial British East Africa Company. In 1894 a British Protectorate was declared over the kingdom of Uganda and some of the adjoining territories. The present limits are approximately as follows:—On the north, the Uganda-Sudan boundary; on the east, a line drawn from Mt. Zulia, on the Sudan boundary, along the Turkana escarpment over the top of Mt. Elgon, and along the west boundary of the Colony of Kenya and the eastern shores of Lake Victoria; on the south, by Tanganyika Territory (late German East Africa); and on the west, by the eastern boundary of the Belgian Congo. Within these boundaries lie part of the Victoria Nyanza, part of Lake Edward, the whole of Lake George, half of Lake Albert, the whole of Lake Kioga, the whole of Lake Salisbury, and the course of the Nile from its exit from Lake Victoria to Nimule, where the Sudan commences. Total area, 94,204 square miles, including 13,616 square miles of water.

For administrative purposes, the Protectorate is divided into 4 Provinces:—

(1) *Eastern Province*, comprising the districts of Busoga, Bugwere, Bugishu, Budama, Teso, Lango, and Karamoja.

(2) *Northern Province*, comprising the districts of Bunyoro, Gulu, Chua, and West Nile.

(3) *Western Province*, comprising the districts of Toro, Ankole, and Kigezi.

(4) *Buganda Province* (with islands in Lake Victoria) comprising the districts of Mengo, Masaka, Mubende, and Entebbe. Owing to sleeping sickness, the islands of Lake Victoria were entirely depopulated, and the inhabitants (about 20,000) settled on the mainland in fly-free districts; but the work of repopulating these islands was undertaken and completed in 1921 and 1922, and natives and their cattle have been repatriated.

The whole Protectorate is now under direct administration; but the native kings or chiefs, whose rights are in some cases regulated by treaties, are encouraged to conduct the government of their own subjects. The province of *Buganda* is recognised as a native kingdom under a *Kabaka* (H. H. Sir Daudi Chwa, K.C.M.G., grandson of the celebrated Mutesa). He is assisted in the government by three native ministers and a *Lukiko*, or native Council, and each county and district chief also has his *Lukiko* to assist him in local government and in the administration of justice. In Buganda (and in *Bunyoro*, *Ankole* and *Toro*, also ruled over by paramount chiefs, as well as in most of the other parts of the Protectorate more directly administered), purely native matters are dealt with by the various *Lukikos*, but in serious cases there is an appeal to British courts. For Europeans and non-natives justice is administered by His Majesty's Courts. The principal British representative is the Governor, who (with the assistance of the Executive and Legislative Councils) makes Ordinances for the administration of justice, the raising of revenue, and other purposes. There are local British courts of justice, and a High Court with civil and criminal jurisdiction. The Appeal Court consists of the judges of the High Courts of Kenya, Uganda, Nyasaland, Zanzibar, and Tanganyika Territory. There is an armed constabulary force, under a British Commissioner of Police and British officers. There is also a battalion of the King's African Rifles stationed in the Protectorate, and a volunteer reserve of Europeans.

The total population of Uganda (December, 1930) is given as 3,513,625, composed as follows: Natives, 3,479,650; Asiatics, 14,002; Europeans, 1,973. At first educational work was entirely in the hands of the various Missionary Societies, who still receive grants towards scholarships, &c., for students and teachers; their efforts have for some years been supplemented by Government, which has also established a University College for natives at Makerere, Kampala. About 2,000,000 natives speak Bantu languages, the most important of which is Luganda, the language of the Baganda tribe, after whom the Protectorate is named. Swahili is also widely spoken. There are a few pygmies living near the Semliki river and the Mufumbiro mountains; the rest of the natives belong to the Nilotic, Hamitic and Sudanese groups.

	1929.	1930.
Revenue	£1,682,918	£1,412,242
Poll-tax	588,993	522,972
Customs	439,375	324,763
Expenditure (excl. loans)	1,607,997	2,040,294
Total Exports	4,274,758	2,060,453
Special Imports	2,318,177	1,614,164

The Customs Services are now merged in those of Kenya (*q.v.*). The export trade is mainly in cotton (£1,555,344 in 1930), coffee, chillies, oil-seeds, rubber, ivory, tin ore and hides and skins. The trade is chiefly with Great Britain, the United States, and India.

Nile steamers ply to Rejaf, which is about 8 days' march from Nimule, the Sudan port of the Kenya and Uganda Railway Marine Service on the Albert Nile and Lake Albert. The road between these two places is fit for motors for about five months only in the year. A regular steamer service is maintained by the *Kenya and Uganda Railway Administration* on Lake Kioga, between Masindi Port and Namasagali, the terminus of the Busoga railway; and on Lake Victoria between Kisumu and Entebbe and Port Bell and the other Uganda ports. The Lake Albert Marine, which has already been mentioned, provides a weekly service on the Nile between Butiaba and Nimule, and a fortnightly service on Lake Albert between Butiaba and the Belgian port of Kasenyi. The Railway Administration therefore provides a through service from Jinja and Kisumu to the Sudan and the Belgian Congo. The *Busoga Railway*, from Jinja (on Lake Victoria) to Namasagali, a point on the Nile below the rapids, which was completed in 1912, has recently been merged in the main line of the K. & U. Ry., which now runs from Jinja *viâ* Eldoret to Nakuru, where it joins the old line to the coast. The continuation of this main line to Kampala has now been completed, and a further extension from Tororo Junction to Soroti *viâ* Mbale was opened in 1929. There is a railway from Port Bell to Kampala, 7¾ miles in length. There is a fleet of Government motor vans, and there are aeroplane landing grounds at Entebbe, Tororo and Jinja. Good all-weather motor-roads connect the principal administrative centres. Hotels exist at Kampala, Jinja, Tororo, Masindi, Fort Portal and Masaka.

The unit of currency is the shilling, and the lower coinage is on a cental basis.

In 1920 Executive and Legislative Councils were constituted, and these came into being in Jan., 1921. The former consists of 6 appointed members and the latter includes the former, with the addition of unofficial members, and is presided over by the Governor. The headquarters of the British administration is at ENTEBBE; the chief commercial centres are Kampala (Buganda) and Jinja (Eastern Province).

Governor and Commander-in-Chief, His Excellency Sir William Frederick Gowers, K.C.M.G. (1925) (*and* £1,500 *duty*) £3,500
Chief Secretary,* P. W. Perryman, O.B.E. 1,800

Trade Enquiry Office in London, The Commissioner, H.M. Eastern African Dependencies, 32, Cockspur Street, S.W. 1.

CAPITAL (Administrative Hdqrs.), Entebbe.

ZANZIBAR.

(The Zanzibar Protectorate.)

Sultan, H. H. Seyyid Sir Khalifa bin Harub, K.C.M.G., K.B.E., *succeeded* Dec. 9, 1911.

The Zanzibar dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tunghi Bay and north as Warsheikh; but since the cession of the coast-line from Ruvuma to Vanga, including the island of Mafia, to Germany in 1890, and of the Benadir and Kismayu coasts to Italy in 1904 and 1924 respectively, they are now confined to the islands of Zanzibar and Pemba, a coastal strip from Vanga to Ras Kiamboni (Dick's Head), the islands of Lamu, Manda, Patta, and Siu. The Zanzibar dominions on the mainland are under the administration of H.M. Government through the Governor and Commander-in-Chief in the Kenya Colony and Protectorate (*q.v.*). Zanzibar has been a British Protectorate since November, 1890. On July 1, 1913, the Protectorate was transferred from the Foreign to the Colonial Office.

By a decree of Sultan Hamoud (1897) the legal status of slavery ceased to be recognised in the islands of Zanzibar and Pemba.

As the centre of the Arab power, Zanzibar, from the beginning of the 19th century until quite recently, dominated the trade of East Africa. The islands possess practically a monopoly in cloves (the export of which was valued at Rs. 97,56,600 in 1930) and produce quantities of copra (exports in 1930, Rs. 32,13,286). In addition, Zanzibar serves as a storehouse for the East African coast, where both imports and exports are received and distributed. Of late years its importance as a port of transhipment and distributing centre has decreased, owing to the development of the mainland, to the opening up of the coast ports to direct steamship service with Europe, and to the transfer to Aden of the seat of trade with the Benadir coast. Recent figures, however, tend to indicate that the island will continue, from the very fact of its geographical position, to retain control of the local traffic—of that portion of the trade which goes to small towns up and down the adjacent mainland coast. There are 241 miles of roads throughout the Protectorate suitable for motor traffic.

The principal imports are rice, grains, groceries, sugar, tobacco, copra, petroleum and piece-goods; the exports are cloves and copra, in addition to re-exports of previously imported rice, grain, copra and piece-goods.

The city of Zanzibar, on the island of the same name, is the largest in East Africa, and possesses a magnificent harbour, which presents great facilities for shipping and trade generally. The population of Zanzibar and Pemba (Census of 1931) was 235,428, the area of the former being 940 square miles, and of the latter 380 square miles.

Tonnage of ocean-going steamers which entered the port in 1930, 2,718,862; and 3,546 dhows (68,969 tons). Zanzibar provides the best water supply on the East Coast of Africa, and it is much in demand for shipping supplies.

	1929.	1930.

Zanzibar is distant 6,850 miles; transit, 20 days.

THE WORLD'S RUBBER.

In a Paper on "The Supplies of Rubber," Dr. George Rae, D.Sc., said the total area under plantation rubber at the end of 1929 was between 6,600,000 acres and 7,200,000 acres, of which the area under native rubber in Netherlands' India was variously estimated at between 1,100,000 acres and 1,700,000 acres. The remaining 5,500,000 acres consisted of approximately 3,360,000 acres in estates owned by Europeans and Americans; 510,000 acres in Asiatic owned estates over 100 acres, and 1,630,000 acres in native holdings under 100 acres. About 80 per cent. of all the estate rubber trees were tappable; 90 per cent. of the native rubber in Malaya and Ceylon was tappable, and probably less than 50 per cent. of the native rubber elsewhere was tappable.

The total exports of rubber from producing countries were 94,000 tons in 1910; 167,000 tons in 1915; 354,000 tons in 1920; 518,000 tons in 1925; 861,000 tons in 1929, and will be about 820,000 tons in 1930. The actual output of rubber for the year 1929, distributed according to the nationality of producers, was approximately as follows:—

—	Tons	Per Cent.
British:—U.K.	235,000	27·9
,, Local	69,000	8·1
Netherlanders	57,000	6·7
Other European	30,000	3·5
American	22,000	2·6
Asiatic estate	64,000	7·6
Malayan native	159,000	23·4
Neth Ind. native	108,000	12·8
Other native	36,000	4·3
Wild...	26,000	3·1
	847,000	100·0

The absorption of rubber by manufacturers (*i.e.*, the quantities of rubber they turned into rubber goods) was 85,000 tons in 1910; 150,000 tons in 1915; 310,000 tons in 1920; 560,000 tons in 1925; 790,000 tons in 1929; and approximately 705,000 tons in 1930.

1930	*108,864,207	11,891,143	2,019,696	122,775,046	17,064,426	4,107,209

* In 1930 a separate classification was provided for Mexicans who, up to that date, had been counted with the white population. The number of Mexicans reported in 1930 (1,422,533) is included for that year in the figure for "Other races," and its inclusion accounts for most of the increase between 1920 and 1930. It is estimated that the 1920 figure for the white population included 700,541 persons who would have been counted as Mexicans in 1930. If these are deducted from the 1920 total, there is obtained what might be termed an adjusted figure, 94,120,374, which is more closely comparable with the 1930 figure for the white population.

BIRTHS AND DEATHS.

The annual compilation of mortality statistics for that part of the Continental United States known as the "Registration Area" began with the calendar year 1900. This area at that time included 40·5 per cent. of the total population, and in 1929 95·7 per cent. The birth registration area was established in 1915; it included at that time 31·1 per cent. of the total population, and in 1929, 94·7 per cent. The following table shows the number of births and deaths in the respective Registration Areas, with rates per 1,000 of the estimated population, for the calendar years 1919 to 1929:—

Calendar Year.	Births.* Number.	Rate per 1,000.	Deaths.* Number.	Rate per 1,000.
1922	1,774,911	22·3	1,101,863	11·7
1923	1,792,646	22·2	1,193,017	12·2
1924	1,930,614	22·4	1,173,990	11·7
1925	1,878,880	21·5	1,219,019	11·8
1926	1,856,068	20·7	1,285,927	12·3
1927	2,137,836	20·6	1,236,949	11·4
1928	2,233,149	19·8	1,378,675	12·1
1929	2,169,920	18·9	1,386,363	11·9

* Exclusive of still-births.

IMMIGRATION AND EMIGRATION.

From 1820 to 1931, 37,859,151 alien immigrants landed in the United States. In the fiscal year ended June 30, 1931, 97,139 immigrants and 183,540 non-immigrant aliens were admitted, a total of 280,679. During the same year, 61,882 emigrant and 229,034 non-emigrant aliens, departed, a total of 290,916. The net decrease for the year was 10,237.

MARRIAGE AND DIVORCE.

The Law of Divorce differs in many of the States, while South Carolina has no Divorce Law. In general, adultery, cruelty, abandonment (desertion), habitual drunkenness, and imprisonment on conviction of felony, are legal causes of divorce.

Year.	Marriages. Total.	Divorces Granted. To Wife.	To Husband.	*Total.
1926	1,040,684	74,893	33,809	112,036
1927	1,201,053	134,048	54,637	192,037
1928	1,182,497	137,277	57,965	195,939
1929	1,223,559	142,187	57,148	201,468
1930	1,128,280	137,309	52,554	191,591

* The totals include divorces for which no detailed statistics were obtained.

PHYSIOGRAPHY.

The Republic occupies nearly all that portion of the North American Continent, between the Atlantic and Pacific Oceans, in latitude 25°-49° North and longitude 67°-124° 30′ West, its northern boundary being Canada and the southern boundary Mexico.

Its coast-line has an estimated length of about 5,565 miles on the Atlantic, 2,730 miles on the Pacific, 3,641 miles on the Gulf of Mexico, and 1,050 miles on the Great Lakes. The principal river is the mighty Mississippi-Missouri, traversing the whole country from north to south, and having a course of 1,700 miles to its mouth in the Gulf of Mexico, with many large affluents, the chief of which are the Yellowstone Platte, Nebraska, Arkansas, Ohio, and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Alabama and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a long river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the country from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table-land, consisting in part of stony and sandy desert and partly of grazing land and forested mountains, and including the Great Salt Lake, which extends to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the partly marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the country) large forests of valuable timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live-oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the forests which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilisation. The Mississippi valley is eminently fertile. The mineral kingdom produces much ore of iron, copper, lead, zinc, and aluminium; the non-metallic minerals include immense quantities of coal, anthracite, petroleum, stone, cement, phosphate rock, and salt. Precious metals include gold and silver, raised mainly in Colorado, California, and Alaska (gold), and Colorado, Montana, Utah, and Idaho (silver). The highest point is Mount Whitney at 14,496 feet above sea level, and the lowest point of dry land is in Death Valley, 276 feet below sea level; these two points are in California, only 86 miles apart. The mean elevation of the 48 States is approximately 2,500 feet.

GOVERNMENT.

The United States of America is a Federal Republic consisting of 48 States and 1 Federal District (of which 13 are Original States, 7 were admitted without previous organisation as Territories, and 28 were admitted after such organisation), and of 2 organised Territories.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to nineteenth Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 29, 1919, and Aug. 26, 1920), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE

THE *Executive* power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the *first Tuesday after the first Monday in November* of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet at their respective State Capitals on the *second Monday of the January* following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the *second Wednesday of February* by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes *ex officio* President for the remainder of the term. In case of the removal or death of both President and Vice-President, a statute provides for the succession of the Secretary of State, Secretary of the Treasury, Secretary of War, Attorney-General, Postmaster-General, Secretary of Navy, and Secretary of the Interior, so that the State can never be without a Head or Ruler.

The President must be 35 years of age and a native citizen of the United States. He receives a salary of $75,000, with a travelling allowance of $25,000. Executive duties:—

(1) He is Commander-in-Chief of the Army and of the Navy (and of the Militias when they are in Federal service), and he commissions all officers therein.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief (and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be invoked.

(4) He conducts the Foreign Policy of the Republic, and has power, "by and with the advice and consent of the Senate, to make Treaties, provided two-thirds of the Senators present concur." The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

THE PRESIDENT.

President of the United States (1929–1933), Herbert Clark Hoover, of California, *born* at West Branch, Iowa, Aug. 10, 1874, graduated mining engineer, Leland Stanford Jr. University, 1895; Chairman of the American War Relief Committee, London, Eng., 1914-15; Chairman of Commission for Relief in Belgium, 1914–19; U.S. Food Administrator, 1917–19; Secretary of Commerce, 1921-28. *Republican.*

1. *Vice-President*, Charles Curtis, of Kansas (*born* Jan. 25, 1860), *elected Vice-President* Nov. 6, 1928. *Republican.*

THE CABINET.

(In order of succession to the Presidency, after the Vice-President.)

2. *Secretary of State*, Henry Lewis Stimson, of New York, (*born* 1867), Secretary of War, 1911-13; Special Commissioner to Nicaragua, 1927; Governor-General of the Philippines, 1928-29, *appointed* March 5, 1929.
3. *Secretary of the Treasury*, Andrew W. Mellon, of Pennsylvania (*born* 1855), *appointed* March 4, 1921; *re-appointed* March 4, 1925; *present appointment*, March 5, 1929.
4. *Secretary of War*, Patrick Jay Hurley, of Oklahoma (*born* 1883), *appointed* Dec. 9, 1929.
5. *Attorney-General*, William De Witt Mitchell, of Minnesota (*born* 1874); Solicitor-General of U.S.A., 1925-29; *appointed* March 5, 1929.
6. *Postmaster-General*, Walter Folger Brown, of Ohio (*born* 1869); Assistant-Secretary of Commerce, 1927-29; *appointed* March 5, 1929.
7. *Secretary of the Navy*, Charles Francis Adams, of Massachusetts (*born* 1866), *appointed* March 5, 1929. [March 5, 1929.
8. *Secretary of the Interior*, Ray Lyman Wilbur, of California (*born* 1875); *appointed*

Secretary of Agriculture, Arthur M. Hyde, of Missouri (*born* 1877); Governor of Missouri, 1921-25; *appointed* March 5, 1929. [March 5, 1929.

Secretary of Commerce, Robert Patterson Lamont, of Illinois (*born* 1867), *appointed*

Secretary of Labour, William Nuckles Doak (*born* 1882), Dec. 9, 1930.

THE LEGISLATURE.

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a *veto* power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 1 for 211,877. The *Senate* consists of 96 members. The salary of a Senator is $10,000 per annum, with mileage at 20 cents per mile each session. The *House of Representatives* consists of 435 representatives besides a delegate from Alaska, a delegate from Hawaii, 2 resident commissioners from the Philippines, and a resident commissioner from Porto Rico. The salary of a Representative is $10,000 per annum, with mileage as for Senators. By the XIXth Amendment sex is no disqualification for the Franchise.

THE SEVENTY-SECOND CONGRESS.
(March 4, 1931—March, 3, 1933.)

President of the Senate, Charles Curtis, *Kansas* $15,000
Speaker of the House of Representatives, (to be chosen Dec. 7, 1931) 15,000

LIBRARY OF CONGRESS.

(National Library).
Capitol Hill, Washington, D.C.

The Library of Congress was established in 1800 and destroyed by fire in 1814. In 1815, purchase of Jefferson collection formed basis for a new collection. *Partially destroyed by fire*, 1851, and replenished in 1851-2. Since that date increased (1) by regular annual appropriations by Congress (now $182,500); (2) by deposits under the copyright law; (3) by gifts and exchanges; (4) by the exchanges of the Smithsonian Institution, the library of which was in 1866 (then 40,000 volumes; now over 550,000 volumes) deposited in the Library of Congress, with the stipulation that future accessions should follow it. The collection is the largest in the Western Hemisphere, but statistics of the four largest libraries in the world are not sufficiently uniform to tell their order in respect to numbers. The Library of Congress now contains 4,292,288 volumes (gain in 1930-31, 188,352). The building was first occupied in 1897, and in 1931 it contained about 627,674 square feet (nearly 14½ acres) of floor space. The total cost to June 30, 1931, is approximately $7,869,000. The book stacks, including the new stack built over the south-east and north-east interior courts, contain a little over 162½ miles of shelving. The library is maintained by Congress, the appropriation for 1931-32 being $2,328,877. An auditorium for chamber music (the gift of Mrs. F. S. Coolidge) was opened in 1925, and in the same year the Library of Congress Trust Fund Board was created under an Act of Congress. This Board is permitted to accept and administer gifts and bequests of personal property in the interests of the Library of Congress, its collections and its service.

Librarian of Congress, Herbert Putnam, LL.D $10,000
Chief Assistant Librarian, Frederick W. Ashley 7,500
Executive Assistant, Allen R. Boyd 5,000
Secretary, Jessica L. Farnum 3,700

THE SMITHSONIAN INSTITUTION.

The Mall, Washington, D.C.

Secretary, C. G. Abbot.
Asst. Secretary, A. Wetmore.
Chief Clerk and Administrative Assistant to the Secretary, H. W. Dorsey.
Treasurer, Nicholas W. Dorsey.
Editor, Webster P. True.

Board of Regents.

Chancellor, The Chief Justice of the U.S.
Chairman, Executive Committee, F. A. Delano.

Government Bureaux under direction of Smithsonian Institution.

National Museum.

Assistant Secretary in Charge, Alexander Wetmore.
Associate Director, J. E. Graf.
Administrative Assistant to the Secretary, W. de C. Ravenel.
Head Curators, Walter Hough, Leonhard Stejneger, R. S. Bassler.

National Gallery of Art.

Director, William H. Holmes.

Freer Gallery of Art.

(A unit of the National Gallery.)
Curator, John E. Lodge.

Bureau of American Ethnology.

Chief, M. W. Stirling.

International Exchanges.

Secretary (in Charge), C. G. Abbot.
Chief Clerk, C. W. Shoemaker.

National Zoological Park.

Director, William M. Mann.

Astrophysical Observatory.

Director, C. G. Abbot.

Regional Bureau for the United States International Catalogue of Scientific Literature.

Assistant in Charge, Leonard C. Gunnell.

NATIONAL COMMISSION OF FINE ARTS.

Interior Dept. Building, Washington, D.C.

The Commission of Fine Arts was created by Congress May 17, 1910, to advise generally upon the location, selection, and erection of statues, fountains, and monuments in the District of Columbia, and also to advise generally upon questions of art when required to do so by the President or by any committee of either House of Congress. Under this latter provision its functions have been enlarged by Executive Order to cover all works of Art with which the Federal Government is concerned, including designs of public buildings, public parks, within the D.C. An expenditure not exceeding $10,000 in any one year is authorised by Congress for travelling and other expenses. The members serve without remuneration.

Chairman, Charles Moore, *Detroit, Mich.*
Members, Benjamin W. Morris, *N.Y.*; Ferruccio Vitale, *N.Y.*; Ezra Winter, *N.Y.*; John W. Cross, *N.Y.*; Adolph A. Weiman, *N.Y.*; John L. Mauran, *Mo.*; Egerton Swartwout, *N.Y.*
Secretary and Executive Officer, H. P. Caemmerer.

THE JUDICATURE.

The *Federal Judiciary* consists of three sets of Federal Courts: (1) The *Supreme Court* at Washington, D.C., consisting of a Chief Justice and eight Puisne Judges, with original jurisdiction in cases affecting Ambassadors, &c., or where a State is a party to the suit, and with appellate jurisdiction from inferior Federal Courts and from decisions of the highest Courts of the States. (2) The *Circuit Courts of Appeal*,

dealing with appeals from District Courts, and consisting of the Justice of the Supreme Court for the Circuit and all the Circuit and District Judges within the circuit. (3) The *District Courts*, eighty-seven in number, each served by a District Court Judge.

THE SUPREME COURT

(The Capitol, Washington, D.C.).

Chief Justice, Charles Evans Hughes, *N.Y., born* 1862, *apptd.* 1930 ..... $20,500

Associate Justices (each $20,000).

Name.	Born.	Apptd.

DEFENCE.

The President is Commander-in-Chief of both Navy and Army, the former being controlled by a Secretary of the Navy, and the latter by a Secretary of War.

THE ARMY OF THE U.S.

The present authorised strength of the Regular Army is: Commissioned officers 12,402; warrant officers 1,028; enlisted men (approximately) 118,750, exclusive of the Philippine Scouts. The actual strength of the entire active Army of the United States on June 30, 1931, including retired personnel on active duty at the time, was 138,817, of whom 12,322 were commissioned officers, 1,028 warrant officers, and 125,467 were enlisted men. These figures include the 6,433 enlisted men of the Philippine Scouts. The Army is made up entirely of volunteers.

1929	259,580	218,335	477,915	229,889,986
1930	256 988	207,269	464,257	219,203,541
1931	255,033	196,400	451.433	234,419,721

The total disbursement in pensions since the War of Independence to June 30, 1931, is $8,403,978,194, of which $7,492,455,764 has been paid on account of the Civil War. The cost of maintenance and expenses of administration in the fiscal year ending June 30, 1931, excluding the cost of medical examinations and special field examinations, amounted to $1,374,344.

World War Pensions.

Disbursements in claims arising out of service in the World War between April 6, 1917, and July 2, 1921, are not included in the above totals, as claims of this nature are adjudicated in the U.S. Veterans' Bureau, which has jurisdiction over such matters. (*See* "Ordinary Expenditures" under "Finance," *post.*)

By Executive Order of July 21, 1930, the Veterans' Bureau, the Bureau of Pensions, and the National Home for Disabled Volunteer Soldiers, were consolidated in accordance with the Act of Congress, approved July 3, 1930, by the President. The combined organisation is known as the *Veterans' Administration*, under the direction of Brigadier-General Frank T. Hines, formerly Director of the Veterans' Bureau, now Administrator of Veterans' Affairs.

THE NAVY OF THE U.S.

On October 1, 1931, the Navy of the United States consisted of the following seagoing vessels: 15 battleships, 8 heavy cruisers, not "over-age"; 2 heavy cruisers, "over-age"; 10 light cruisers; 3 aircraft carriers; 78 destroyers, not "over-age"; 145 destroyers "over-age"; 14 light mine layers; 4 mine layers; 37 mine sweepers; 70 submarines, not "over-age"; 11 submarines "over-age"; 25 eagles; 24 submarine chasers; 5 gunboats; 8 river gunboats; 3 converted yachts; 8 destroyer tenders; 7 submarine tenders; 2 aircraft tenders; 3 repair ships; 5 store ships; 3 colliers; 19 oilers; 2 ammunition ships; 6 cargo ships; 2 transports; 2 hospital ships; 34 tugs; 6 submarine rescue vessels; 8 miscellaneous auxiliaries, and 28 unclassified vessels.

On the above-mentioned date there were under construction: 7 heavy cruisers, 1 aircraft carrier, 3 submarines and 1 destroyer. In addition to the foregoing new construction, there have been authorized: 8 cruisers; 11 destroyers; 1 Neff submarine; and 1 transport, the construction of which has not been begun.

Information as to characteristics, costs, &c., available for publication concerning naval vessels mentioned above, may be found in the *Ships' Data Book.*

EDUCATION.

State School Systems, 1927-1928.

In 1927-28 the total number of children in the United States 5 to 17 years of age was 30,887,167, of whom 25,179,695 (12,703,525 boys and 12,476,171 girls) were enrolled in public elementary and secondary schools, and (1927-28) 2,755,913 were enrolled in private elementary and secondary schools, and in private commercial and business schools. The average daily attendance in the public schools was 20,608,353, the average length of school term was 171·5 days, and the average number of days attended by each pupil enrolled was 140·4 days. In 1927-28, 831,934 teachers (138,193 men and 693,741 women) were employed. The average annual salary of all teachers was $1,364. The total number of buildings used as school houses was 254,726, and the estimated value of all public school property was $5,486,938,599.

The total money received for school purposes, excluding balances on hand, was $2,324,707,994. Of this amount, $26,390,797 was received from permanent school funds and from the rent of school lands, $308,392,472 from State taxes or State appropriation, $1,600,516,451 from local tax or appropriation, and $90,450,618 from all other sources, State and local. The total payments, excluding payments of bonds, were $2,184,336,638. This amount includes expenditures for sites, buildings, furniture, libraries and apparatus, $382,996,156; for salaries of superintendents, supervisors, principals and teachers, $1,207,046,110; and for all other purposes, $594,294,372.

Compulsory Attendance Laws, 1922.

Every State in the Union has a compulsory school attendance law. In general, children are obliged to attend school from 7 to 14 years of age, and those from 14 to 16 must attend school or secure employment certificates. The required attendance each year varies from eighty days in two States to the full term in thirty-six States. In all States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truant or attendance officers.

Universities, Colleges and Professional Schools, 1927-28.

Of the 1,076 universities, colleges, and professional schools, 226 are public institutions and 850 under private control or management. The total number of instructors in both private and public institutions was 67,209 (52,263 men and 14,946 women). The public institutions enrolled 347,537 undergraduate and graduate students (219,272 men and 128,265 women). The private institutions enrolled 571,844 undergraduate and graduate students (343,972 men and 227,872 women). In general engineering, 3,042 students were enrolled; in chemical engineering, 4,948; in civil engineering, 11,501; in electrical engineering, 15,781; in mechanical engineering, 10,434; and in mining engineering, 1,545.

The total number of baccalaureate degrees conferred in 1927-28 was 83,065 (45,912 men and 37,153 women); altogether 13,834 graduate degrees were conferred (8,976 men and 4,858 women); 1,245 honorary degrees were conferred.

The schools of theology enrolled 13,642 students and reported 1,233 graduates; law schools, 42,694 students and 8,652 graduates; schools of medicine, 21,427 students and 4,342 graduates; schools of dentistry, 9,282 students and 2,725 graduates; schools of pharmacy, 11,125 students and 2,468 graduates; and schools of veterinary medicine, 612 students and 138 graduates.

Teachers' Colleges and Normal Schools, 1929-30.

In 1929-30, 331 teachers' colleges and normal schools reported to the United States Office of Education. These schools are chiefly concerned with the training of elementary teachers. Of this number 273 are public institutions, and 58 are private institutions; 140 are teachers' colleges, 134 are public, and 6 are private institutions (schools granting a degree after four years' work beyond high school); 66 are State normal schools; 26 are city normal schools; 47 are county normal schools; and 52 are private normal schools. The total number of instructors in all teachers' colleges and normal schools was 14,473. The total number of students enrolled was 279,195 (60,935 men and 218,260 women). Of this total enrolment, 264,257 students are in normal training courses. The number of graduates from the normal training courses was 57,038 men and 42,189 women, making a total of 49,227. 11,073 bachelor's degrees were also conferred, 3,603 on men and 7,454 on women. Practice or model schools are usually operated in connexion with these normal schools, or the public schools are used for this purpose. The total enrolment in these model schools, so far as reported, was 90,601. The total receipts for normal schools (1929-30) were $69,983,932. The total number of volumes in the libraries was 4,055,076.

Nurse Training Schools, 1926-27.

The number of nurse training schools has increased very rapidly since 1900. At that time 432 schools reported to the Bureau of Education. In 1926-27 the number of such schools reporting was 1,797. The number of pupils enrolled in these schools in 1926-27 was 77,768 and the number graduated 18,623. Of the schools reporting, 75 are in hospitals for the insane. The capacity of the hospitals in which all nurse training schools reporting are located, is 359,077 beds, and the average daily number of patients is 276,194. In 1926-27 a large majority of schools required a minimum age requirement for admission of only 18 or 19 years. In general hospitals 954 schools required 8 hours of duty daily, 366 schools required 9 hours of duty, and 293 schools required 10 hours of duty. In hospitals for the insane, the number of hours of duty required was usually 10 or more. Thirty schools required 12 hours of duty, and none required more than 12 hours.

The remuneration granted the pupils in general hospitals is usually less than $200. In the first year 46·9 per cent. of the schools pay under $100, and 47·4 per cent. pay from $100 to $199; in the second year 26·2 per cent. of the schools pay under $100, and 65 per cent. pay from $100 to $199; in the third year of the course 18·6 per cent. pay under $100, and 68·5 per cent. pay from $100 to $199. In the schools in hospitals for the insane the remuneration usually exceeds $400. In the first year of the course 72·1 per cent. of the schools pay $400 or more; in the second year of the course 63·6 per cent. of the schools pay $400 or over; in the third year of the course 72·4 per cent. of the schools pay $400 or more.

More than 85 per cent. of all the nurse training schools in general hospitals offer a three-year course. About 10 per cent. offer a two-year or two-and-one-half year course. In hospitals for the insane, more than 86·7 per cent. of the

schools offer a three-year course, and the remaining schools offer a two-year course. 32·2 per cent. of the general nurse training schools require one year of high school work for admission, 31·2 per cent. require two years of high school work for admission, 32·8 per cent. require a full high school course, and 2·3 per cent. require only the completion of the elementary grades for admission.

Of the nurse training schools reporting, 180 are affiliated with colleges or universities. By this co-operation an excellent opportunity is afforded to the training schools to secure for their pupils a high type of instruction in technical and academic subjects.

Public High Schools, 1927–28.

In 1927–28, 18,116 public high schools reported to the Bureau. The total number of teachers in these secondary schools was 182,637 * (64,931 men and 117,706 women). The total number of pupils enrolled in these schools was 3,354,473 (1,598,605 boys and 1,755,868 girls). The total number of coloured pupils included in the preceding figures is 96,107. In the first year of the course 1,212,893 pupils were enrolled, in the second year 906,179, in the third year 670,089 and in the fourth year 565,312 pupils, including post-graduate and special pupils. In the 7th and 8th elementary grades organised as a part of junior high schools, 862,840 pupils were enrolled. The number of graduates reported was 474,736 (210,916 boys and 263,820 girls).

There were 11,555 regular high schools that reported a four-year curriculum. In these four-year high schools there are 2,194,254 pupils enrolled (1,050,287 boys and 1,143,967 girls). In addition, there are 1,403 junior high schools, with 839,388 pupils (418,220 boys and 421,168 girls); 2,429 junior-senior high schools, with 741,944 pupils (351,571 boys and 390,373 girls), and 494 senior high schools, with 379,518 pupils (181,503 boys and 198,015 girls).

Private High Schools and Academies, 1929–30.

The number of pupils in private high schools and academies, in general, has increased slowly but steadily. In 1900 the number of students enrolled in these schools was 110,797. In 1929–30 the number enrolled was 269,249. The number of schools reporting in 1900 was 1,978, and the number reporting in 1930 was 2,760. The total number of instructors in these private high schools in 1929–30 was 22,003 (8,577 men and 13,426 women). In this group of schools, more than any other, there is a tendency for the schools to be either for boys or girls exclusively, rather than co-educational. Of the schools reporting in 1930, 504 were for boys only, 873 were for girls only. Altogether, 116 of the schools had military drill in 1928, enrolling 16,528 students.

* Includes 7,305 men and 24,634 women teachers in junior high schools.

FIRE LOSSES IN THE UNITED STATES.

(Estimated by the *Journal of Commerce*.)

In the following table the losses for 1906 include the losses from fires following the disastrous earthquake in San Francisco. In 1923 the *Loss of Life* caused by fires was stated to amount to 15,000 persons. The Fire Losses in New York (1928) are stated at $16,624,381; Chicago (1928) $12,999,899; Montreal (1927) $2,599,603; in London, Eng. (1927) $1,773,900.

1914	27,470,703	26	79,101,283	74	1927	58,264,019	37	101,257,442	63
1915	26,693,736	29	66,901,818	71	1928	59,210,640	39	93,310,098	61
1916	35,829,742	34	68,143,163	66	1929	65,565,560	39	100,447,527	61
1917	37,870,464	37	64,678,782	63	1930	64,233,114	39	100,679,137	61
1918	38,489,763	42	52,980,156	58	1931	59,007,223	38	96,519,327	62

The lowest American percentage was 19 in 1880, 1881 and 1882; the highest was 91 in 1825.

PRODUCTION AND INDUSTRY.

Agriculture.—The total land surface, excluding Island possessions and Alaska, is 1,903,216,640* acres, of which in 1925 924,319,352 were farms (505,027,400 acres improved). The total number of farms in 1925 was 6,371,640, of which 2,326,155 are between 100 and 500 acres, 1,421,078 between 50 and 100 acres, and 1,450,643 between 20 and 50 acres. The gross value of farm products of the United States in 1928 was $15,881,706,000, as compared with $16,050,362,000 in 1927. Crops in 1928 were valued at $9,726,822,000, live-stock products (including animals sold or slaughtered) at $6,154,884,000

The gross value of the principal crops was as under in 1928 and 1929:—

Crop.	Gross Value. 1928.	1929.
Corn (Maize)	$2,384,784,000	$2,031,041 000
Wheat	914,925,000	855,034,000
Oats	597,133,000	531,864,000
Barley	205,045,000	167,358,000
Cotton Lint	1,302,110,000	1,231,373,000
,, Seed	226,876,000	200,675,000
Tobacco	277,506,000	285,583,000
Potatoes	281,572,000	470,533,000
,, Sweet	87,606,000	97,302,000
Truck Crops	316,598,000	343,400,000
Hay	1,202,455,000	1,257,671,000
Apples	203,291,000	195,211,000
Farm Gardens	303,306,000	284,350,000
Forest Products	311,091,000	322,268,000
Animal Products:		
Cattle and Calves	1,138,017,000	1,166,562,000
Hogs	1,406,064,000	1,481,808,000
Sheep and Lambs	198,301,000	188,978,000
Chickens	444,537,000	502,433,000
Milk	2,076,511,000	2,127,860,000

* Decrease in land area due to building of Pathfinder and Shoshone Reservoirs in Wyoming and several reservoirs in connexion with irrigation projects in Montana.

Minerals.—The total value of *all* mineral products of the U.S. in 1930 was $4,810,400,000; the value of metallic minerals produced was $982,550,000 (pig iron, $512,165,131; copper, $181,271,000; gold, $47,247,600, and silver $19,538,029), and of non-metallic minerals the total value was $3,818,950,000 (bituminous coal, $812,469,000; Pennsylvania anthracite, $354,574,191; petroleum, 896,265,000 barrels of 42 gallons, value $1,046,400,000); clay products, $373,409,391 (1929); stone, $178,832,000; natural gas, $412,000,000; cement, $231,189,287.

MANUFACTURES.

The manufacturing establishments enumerated at the biennial Census of 1927 numbered 191,866, the value of their products being $62,718,347,289, as compared with a value in 1925 of $62,668,259,591. The leading manufacturing States ranked according to value of products, are New York, Pennsylvania, Illinois, Ohio, Michigan, and New Jersey.

Cities Ranked by the Value of their Manufactured Products for 1925 and 1927.

City.	1925.	1927.
New York	$5,324,414,000	$5,722,071,259
Chicago	3,439,163,000	3,478,753,628
Philadelphia	1,937,415,000	1,861,501,951

Leading Industries (Ranked by Value of Products) in Principal Industrial Cities for 1927.

New York.—Clothing; Printing and publishing; Fur goods; Bread and other bakery products; Slaughtering and meat packing; Millinery; Sugar refining; Electrical machinery, apparatus, and supplies; Manufactured gas, illuminating and heating; Tobacco.

Chicago.—Slaughtering and meat packing; Printing and publishing; Clothing; Foundry and machine-shop products; Electrical machinery, apparatus, and supplies; Steel works and rolling mills; Bread and other bakery products.

Philadelphia.—Textiles; Printing and publishing; Clothing; Sugar refining; Electrical machinery, apparatus, and supplies; Bread and other bakery products; Petroleum refining.

Detroit.—Motor vehicles, not including motor-cycles; Motor vehicle bodies and motor vehicle parts; Foundry and machine-shop products; Printing and publishing; Brass, bronze, and copper products; Slaughtering and meat packing.

Cleveland.—Steel works and rolling mills; Motor vehicles, not including motor-cycles; Motor vehicle bodies and motor vehicle parts; Foundry and machine-shop products; Electrical machinery, apparatus, and supplies; Clothing.

St. Louis.—Motor vehicles, not including motor-cycles; Slaughtering and meat packing; Printing and publishing; Boots and shoes, other than rubber; Clothing.

Baltimore.—Smelting and refining, copper; Clothing; Sugar refining; Petroleum refining; Slaughtering and meat packing; Tinware; Printing and publishing.

Buffalo.—Flour and other grain-mill products; Motor vehicles, not including motor-cycles; Slaughtering and meat packing.

Milwaukee.—Motor vehicle bodies and motor vehicle parts; Motor vehicles, not including motor-cycles; Foundry and machine-shop products; Knit goods; Boots and shoes, other than rubber; Slaughtering and meat packing; Electrical machinery, apparatus, and supplies.

Boston.—Printing and publishing; Clothing; Sugar refining; Confectionery; Boots and shoes, other than rubber; Cutlery and edge tools; Boot and shoe cut stock, not made in boot and shoe factories; Foundry and machine-shop products; Bread and other bakery products.

Los Angeles.—Petroleum refining; Motion pictures, not including projection in theatres; Printing and publishing; Slaughtering and meat packing; Foundry and machine-shop products; Bread and other bakery products; Clothing; Lumber—planing-mill products.

Pittsburgh.—Steel works and rolling mills; Bread and other bakery products; Foundry and machine-shop products; Printing and publishing; Iron and steel (blast furnaces); Slaughtering and meat packing; Canning and preserving.

San Francisco.—Printing and publishing; Coffee and spice, roasting and grinding; Sugar refining; Tobacco; Canning and preserving; Slaughtering and meat packing.

Motor Vehicle Industry.—The value of the complete passenger cars and business vehicles manufactured in 1927 was $2,445,470,066; of parts and accessories, $1,112,862,378, and of tyres and tubes $774,055,051. The number of complete passenger cars produced was 2,826,274 and of complete business vehicles 331,272, while 64,362,497 tyres and 70,855,455 inner tubes were also manufactured in 1927. The factories gave employment to 369,399 wage earners, who received $612,955,061 in wages in 1927. The number of motor vehicles registered in 1928 in the U.S.A. was 24,493,124. The gasoline produced in 1928 amounted to 15,841,686,000 gallons, and that consumed to 13,810,944,000 gallons. The taxes levied on motor vehicles by the Federal, State, and Municipal Governments in 1928 amounted to $807,887,967. The number of motor vehicles (including chassis) exported in 1928 was 515,762, not including 66,969, shipped as "parts for assembly."

PUBLIC ROADS.—On Dec. 31, 1930, the total length of public roads was 3,009,066 miles, approximately 693,559 miles of which were surfaced roads. In 1930 the total expenditures for highways were approximately $1,680,493,095.

SHIPPING.—On June 30, 1931, the mercantile marine of the U.S. (vessels of 500 gross tons and over) consisted of 383 sailing vessels of 522,921 gross tons; 1,882 steam and motor vessels of 9,609,536 gross tons, a total of 2,265 vessels of 10,132,457 gross tons. In the year ended June 30, 1931, sailing and steam vessels of 79,584,265 tons entered at the various ports of the U.S.; of this total 29,607,139 tons were American and 49,977,126 tons foreign. The tonnage cleared from the various seaports was 77,942,285, of which 29,400,084 tons were American and 48,542,201 tons foreign.

POSTS AND TELEGRAPHS.—On June 30, 1930, there were 49,063 post offices in the U.S. handling 27,887,822,974 "pieces" of mail matter, of which amount 27,533,372,000 were domestic and 354,450,374 foreign. The telegraphs and telephones are not operated by the U.S. Government.

WEIGHTS, MEASURES AND CURRENCY.

The *Weights and Measures* in common use are shown on page 490. The Metric System of Weights and Measures is permissive, but is little used. The unit of *currency* is the *dollar* of 100 *cents*. The rate of exchange will be found on p. 478.

INDIAN POPULATION.

In 1930 the enumerated and estimated Indian population of the United States, exclusive of Alaska, was 340,541 by blood (Oklahoma containing 121,884, Arizona 47,072, New Mexico 28,113, S. Dakota 23,726, California 19,197, Montana 14,238, North Dakota 10,794, Washington 12,572, Wisconsin 11,705, and Minnesota 15,767, and the 38 remaining States less than 10,000 each). Total disbursements authorised for the fiscal year ended June 30, 1932, for Indian Service are $23,162,400. In addition to this the sum of about $5,000,000 is to be paid over to the Indians from receipts for oil and other leases, interest on trust funds, &c. The total wealth of U.S. Indians under the nominal control of the Indian Bureau on June 30, 1928, amounted to $1,716,815,123, of which $920,106,386 was tribal, and $796,708,737 individual.

RECLAMATION.

Commissioner, Elwood Mead, Interior Dept. Building, 19th and F, N.W., Washington, D.C. Employees: Washington Office, 55; Field, 1,500 to 2,000. Expenditure per year about $10,000,000.

The Bureau of Reclamation was organised as a bureau of the Interior Department, under the Reclamation Act of June 17, 1902. It is engaged in the investigation, construction and operation of irrigation works in 15 arid and semi-arid States of the far West. Twenty-seven projects, comprising about 3,000,000 acres, are under construction or operation, and the major works aid in serving an additional 1,500,000 acres under private canals purchasing stored water from the government reservoirs. The funds for this work have come chiefly from repayments by the water users, from oil leasing and other mineral operations, and from the sale of public lands. The money expended is returned to the fund by graduated payments of settlers.

The Bureau has built 17,467 miles of canals, ditches and drains (including 165,427 canal structures), involving the excavation of 292,105,859 cubic yards of materials. In connexion with this work there have been constructed 120 storage and diversion dams with an aggregate volume of 22,688,296 cubic yards, including the *Arrowrock Dam* (349 feet high), Idaho, on the Boise River, and the *Elephant Butte Dam* (306 feet high), New Mexico, on the Rio Grande. The Bureau has built 132 tunnels, 1,461 miles of road, 117 miles of railroad, 4,011 miles of telephone line, 37 power plants, and 3,226 miles of transmission lines. It has manufactured over 1½ million barrels of cement and sand cement. The construction cost to June 30, 1931, was $206,041,522.

Nearly 650,000 persons are living on the 40,354 farms irrigated by the Bureau, and in the project towns and cities. Of the 3,000,000 acres above referred to, 1,504,810 acres were irrigated and 1,550,967 acres were harvested in 1931, producing crops worth $65,007,270, or an average of $41·90 per acre. The 1,254,493 acres of additional lands using stored water yielded crops worth $54,654,550 more.

Public land farm units on the several projects are opened for settlement from time to time as canals are extended to make irrigation water available. Under present law, soldiers and sailors of all wars have a preference right of 90 days to enter these farms.

Information in regard to farms available for settlement may be obtained by addressing Commissioner, Bureau of Reclamation Dept. of the Interior, Washington, D.C.

The Bureau issues the "New Reclamation Era," an illustrated monthly publication, containing articles of interest to irrigation farmers and engineers, and numerous settlement and other booklets. An annual report is also issued, and other publications from time to time, relating to various phases of the work.

An engineering library of about 6,000 manu-

script and printed volumes on the subject of irrigation is maintained in the Washington office of the Bureau. This library contains descriptions of the construction and operation of the projects, with numerous photographs and maps, plans, specifications, cost data and results of original experimental investigations, and is available for consultation by those interested. The bureau also maintains a photographic file of about 40,000 negatives of scenes on the projects from the beginning of construction through the period of settlement and development.

GOVERNMENT PRINTING OFFICE,

North Capitol and G Streets, Washington, D.C.

The Government Printing Office of the United States was established by Congress in 1860 and has been in continuous operation since that time. The buildings have a floor space of 22 acres, and together with the machinery and equipment which they contain, represent an expenditure of approximately $10,100,000. The annual cost of operation and maintenance is over $14,000,000. There are over 4,900 persons annually employed in the various divisions of the office at a total yearly compensation of $10,000,000. In addition to doing all of the printing and binding ordered for Congress, the office executes all the printing and binding required by the various executive departments and independent establishments of the U.S. Government. The office has the largest battery of type-setting machines in the world, including 174 linotype machines, 2 Ludlows, 2 material casters, 100 monotype key-boards and 130 monotype casting machines, which produced about 2,470,000,000 ems of type in fiscal year 1931. The 182 presses of the office are credited with 2,470,000,000 chargeable impressions, not including 212,000,000 on money order forms and 1,485,000,000 on postal cards. During the year the office handled approximately 80,000 separate jobs. In addition to the execution of all kinds of printing and binding, this office produced 11,438,000 square inches of electrotypes and stereotypes, and 731,000 square inches of half-tones and linecuts, supplied blank paper to other Government establishments at a cost of $633,000, and manufactured its own printing and writing inks, rollers, glue, type and type metal, some of these supplies being furnished to various branches of the Government. It also has one of the largest industrial cafeterias and recreational rooms in the United States.

Public Printer, George H. Carter, *Iowa*. $10,000
Deputy Public Printer, John Greene, *Mass.* 7,500
Production Manager, Elwood S. Moorhead, *Pa.* 5,600

COTTON REPORT AS OF JULY 1, 1930.

The Crop Reporting Board of the United States Department of Agriculture, from the reports and data furnished by crop correspondents, field statisticians, co-operating State Boards (or Departments) of Agriculture and Agricultural Colleges, makes the following estimate of cotton acreage in cultivation on July 1, 1930.

U.S. Acreage in cultivation compared with last year, 97·3 per cent.

U.S. Acres in cultivation, Total, 45,815,000 aeres.

Estimate of Cotton Acreage, by States.

State.	Area in Cultivation. July 1, 1929. Acres.	July 1, 1929. Percentage of 1928.	July 1, 1929. Acres.	10-year average abandonment 1920–1929. Per cent.
Virginia	89,000	101	90,000	2·0

Lower California (Old Mexico) *c*	151,000	67	101,000	1·3

a Eight-year average, 1922–1929. *b* Including Pima Egyptian long staple cotton estimated at 46,000 acres this ear compared with 67,000 acres in cultivation July 1, 1929. *c* Not included in California figures, nor in United tates total.

Dependencies of the U.S.A.

THE PHILIPPINE ISLANDS

are situated between 4° 40′-21° 10′ N. lat. and 116° 40′-126° 34′ E. long., and are distant about 500 miles from the south-east coast of the continent of Asia. Their total land area is 114,400 square miles, of which total 103,288 square miles are contained in the eight largest islands, the 7,075 other islands having a combined area of 11,112 square miles. At the Census of 1918 the population was ascertained to be 10,314,310, almost all of Malayan stock, of whom (in 1928) 8,724,965 are Roman Catholic, 4,000,000 are Aglipayan, 200,000 are Protestant, (and 1918) 443,037 are Muhammadan, 508,596 are Pagan, 24,263 are Buddhists, and all others 5,454. Of the foreign-born residents about three-quarters are Chinese, and of the white population over one-half are from the United States (6,931 in 1921).

The Philippine Islands were discovered in 1521 by the Portuguese navigator Magellan, who was slain by the natives of Mactan. In 1565 Spain undertook the conquest of the islands, which were named "Filipinas," after the son of the King of Spain, and in 1571 the city of Manila was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustinian friars in Legaspi's train. In 1762 the capital of the Spanish colony was occupied by a British force, but in 1764 the newly-acquired territory was restored to Spain. In the nineteenth century there were frequent disturbances in the islands, and at the outbreak of the Spanish-American War of 1898 a rebellion under Aguinaldo, a native leader, had just died down. Aguinaldo was deported, but on his return his assistance was accepted by Admiral Dewey, the commander of the American Pacific fleet, after the annihilation of the Spanish vessels in Manila Bay on May 1, 1898. Manila was captured by the American troops under General Wesley Merritt on Aug. 13, 1898, and the Islands were ceded to the United States by the *Treaty of Paris* of Dec. 10, 1898.

On Aug. 31, 1928, the Philippine Scouts, which form a part of the United States regular Army, consisted of 88 officers and 6,239 enlisted men. On the same date the regular Army in the Philippines (other than the scouts) consisted of 512 officers and 3,788 enlisted men, many of these officers being on duty with the scouts. The Philippine constabulary, which is under the Philippine Government, in Oct., 1928, consisted of 397 officers and 6,119 enlisted men. All enlisted men in the scouts and constabulary are natives of the Islands, while almost all the constabulary commissioned personnel are Filipinos.

In 1927 the income of the Philippine Government was $39,842,988 and the bonded indebtedness $74,800,000. The expenditure on education in 1927 amounted to $13,809,753 for public schools only; the University had an enrolment of 7,533 students, and there were 1,099,306 pupils enrolled in the public schools. The principal exports are sugar, abaca (Manila Hemp), coconut oil, copra, tobacco, embroideries, desiccated coconut, lumber and timber, copra meal and maguey; the imports being cotton and its manufactures, iron and steel and their manufactures, mineral oils, meat and dairy products, automobiles and accessories, wheat flour, silk and its manufactures, paper and its manufactures and coal.

	1929.
Total Imports	$146,326,859
Total Exports	169,119,397
Imports from U.S.	87,362,503
Exports to U.S.	122,275,672

Towns.—Capital, Manila, in the island of Luzon; population (1928), 324,522. The next largest towns are Cebú (86,154), Legaspi (32,670), Iloilo (67,147), and Zamboauga (47,305); there are several others with populations from 25,000 to 40,000.

Governor-General, Col. Dwight F. Davis, *assumed office at Manila*, July 8, 1929.

GUAM.

Guam, the largest of the Ladrone or Marianne Islands in the North Pacific Ocean, lies in 13° 26′ N. lat. and 144° 39′ E. long., at a distance of about 1,506 miles east of Manila, the capital of the Philippine Islands, and forms a naval station between that dependency and the United States. The area of the island is estimated at 225 square miles, with a population of 20,857, of whom 19,611 are classed as native, 485 of the naval station, and 761 other than native. The natives are of Chamorro stock, mingled with Filipino and Spanish blood. The language is a Malay dialect containing many Spanish words, but English is fast becoming the language of the island.

CAPITAL, Agaña. Port of entry, Apra.

WAKE AND MIDWAY ISLANDS.

Wake Island, annexed in 1898, has an area of about 1 sq. mile and lies in the N. Pacific about 2,000 miles from Hawaii on the direct route to Hong Kong.

Midway Islands, with a total area of 28 sq. miles and a population (1930) of 35, lie in the N. Pacific about 1,200 miles from Hawaii. The group is administered by the U.S. Navy Dept.

PORTO RICO.

Porto Rico (Rich Harbour) is an island of the Greater Antilles group in the West Indies, and lies between 17° 50′-18° 30′ N. lat. and 65° 30′-67° 15′ W. long., with a total area of 3,435 square miles and a population of 1,543,913 at the census of 1930. Three fourths of the population are of Spanish descent and about one fourth coloured. The island is about 100 miles from west to east, and 40 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,400 miles distant from New York, and 982 miles from Key West. Porto Rico was discovered in 1493 by Christopher Columbus. It was explored by Ponce de León in 1508, and he was made Governor of the island in 1509. It continued a Spanish possession until Oct. 18, 1898, when it was ceded to the United States as a result of the Spanish-American War. Sugar is grown in the low-lying districts, and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes, rice, and yams are also grown. The trade is principally with the U.S. About 344 miles of railroad were in operation in June, 1931, and there are good harbours at San Juan and Ponce. The legislative functions are vested in a legislature which consists of 2 elective houses; the Senate, composed of 19 members (2 from each of the 7 senatorial districts and 5 senators at large), and the House of Representatives, composed of 39 members (1 from

each of the 35 representative districts and 4 elected at large). The term of the Legislature is 4 years. The Governor is appointed by the President of the U.S. and holds office at the pleasure of the President. A Supreme Court of 5 members is also appointed by the President. There is a Cabinet composed of 7 heads of Departments, two appointed by the President and five by the Governor. The Governor also appoints all inferior judges. Great improvement has been made in the progress and welfare of the Island during the present century—the Island is self-supporting, free public schools are established throughout, a system of good roads reaches every important city and town, public buildings are attractive and well built, health and sanitary measures are in force. The capital, San Juan, had 114,715 inhabitants in 1930, other towns being Ponce (53,430), Mayaguez (37,060), Arecibo (12,863), Bayamon (12,986), and Caguas (19,791).

TUTUILA, AMERICAN SAMOA.

American Samoa consists of the island of Tutuila, Aunuu, Ofu, Olosega, Tau, and Rose Islands, with a total area of about 56 square miles and a population of 10,055 in 1930, distributed (1930) as follows:—Tutuila and Aunu'u, 7,809; Ta'u, 1,243; Olosega, 438; Ofu, 466: Rose Island, uninhabited; and Swain's Island (annexed May 13, 1925), 99.

Tutuila, the largest of the group, has an area of about 40 square miles and contains a magnificent harbour at Pago Pago, the capital and seat of government. The remaining islands have an area of about 16 square miles. Copra is the only export of importance.

VIRGIN ISLANDS.

The three islands, St. Thomas, St. John, and St. Croix, in the Virgin Island group, West Indies, formerly the possessions of Denmark, were purchased by the United States from Denmark for the sum of $25,000,000, and proclaimed, January 25, 1917. The total area of the islands is 132 sq. miles, with a population in 1930 of 22,012. *St. Thomas* (28 sq. miles) has a population of 9,834; *St. Croix* (84 sq. miles) has a population of 11,413, the capital being Christianstad (or Bassin); *St. John* (20 sq. miles) has a population of 765, the capital being Cruz Bay. St. Croix exports sugar; St. Thomas is famous for its bay rum.

CAPITAL, St. Thomas, contains one of the finest harbours in the West Indies, accommodating vessels of large draught, and has a large coaling and oil refuelling station. The climate of the Virgin Islands is delightful at all times, and particularly so during the winter months.

Governor, Paul M. Pearson.
Government Sec., Boyd J. Brown.

THE PANAMA CANAL.

The administrative organisation for the canal is known as "The Panama Canal." Its headquarters are at Balboa Heights, Canal Zone, with the Governor of the Panama Canal (Colonel Harry Burgess, U.S.A.) at its head.

The first suggestion for a canal across the Isthmus of Panama was made by a Spanish engineer in 1530, and surveys were actively engaged upon by various private companies between the years 1825 and 1890. In 1876 a concession for the construction of a canal was granted to a French promotion corporation, which conducted surveys during a period of two years, and reported to an international congress held at Paris in May, 1879, over which Ferdinand de Lesseps presided. This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Interoceanic Panama Canal Company, of which de Lesseps was nominal head. The amount of work to be accomplished proved to be greater than was estimated, and resulted in the failure of the company, a receiver being appointed in 1889. A new company was formed to carry on the work, and excavation was resumed in 1894. This was continued until May 4, 1904, when the United States Government took possession of the effects of the French company in Panama.

Congress authorised the President in 1902 to purchase the effects of the French company for $40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of $10,000,000, of the territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 1903. The new Government was immediately recognised by the United States, and a treaty was signed on February 26, 1904, in which rights of sovereignty over a strip of land ten miles in width, extending across the Isthmus, were ceded to the United States. The canal is built through the centre of this territory. In 1922 a treaty between Colombia and the U.S. provided for the payment to Colombia of $25,000,000 in satisfaction of all claims arising out of the Canal controversy. The independence of Panama was recognised by this treaty.

Including the purchase of rights, payments to Panama, and construction and operation of the canal and its adjuncts, the total appropriations by Congress to June 30, 1931, were $532,387,255. The net revenue from tolls and other revenues (including business operations), to June 30, 1931, aggregated $151,636,478.

The Canal was opened to commercial traffic Aug. 15, 1914, and was closed from Sept. 18, 1915, to April 15, 1916.

Fiscal Year.	No. of Transits.	Canal. Net Tons.	Cargo Tons.
1915	1,075	3,792,572	4,888,454
1916	758	2,396,162	3,054,114
1917	1,803	5,798,557	7,058,563
1918	2,069	6,574,073	7,532,031
1919	2,024	6,124,990	6,916,621
1920	2,478	8,546,044	9,374,499
1921	2,892	11,415,876	11,599,214
1922	2,736	11,417,459	10,884,910
1923	3,967	18,605,786	19,567,875
1924	5,230	26,148,878	26,994,710
1925	4,673	22,855,151	23,958,836
1926	5,197	24,774,591	26,037,448
1927	5,475	26,227,815	27,748,215
1928	6,456	29,752,637	29,630,709
1929	6,413	29,837,794	30,663,006
1930	6,185	29,980,614	30,030,232
1931	5,527	27,792,146	25,082,800

The canal is fifty statute miles long (44·08 nautical miles), and the channel is from 300 to 1,000 feet wide at bottom. It contains 12 locks, and transit from sea to sea occupies 10 to 12 hours (passage through locks 5 hours). The least width is in Culebra Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The water depth when the surface of Gatun Lake is at 85 feet above sea-level varies from 85 feet

in some parts of Gatun Lake to 41 feet in the Atlantic entrance. The depth through Culebra Cut is 45 feet.

THE following Articles have been revised under the direction of the various Governments or of the British Representatives at Foreign Courts, to whom the Editor desires to express his warmest thanks. The Editor is also greatly indebted to the Embassies, Legations, and Consulates-General in London for various corrections and additions.

The Salaries and Allowances of Officers of H.M. Diplomatic, Commercial and Consular Services are fixed in accordance with the scale shown below:—

Salaries and Allowances.

Rank.	Salary.	Representation Allowances.	House Rent Allowances.
Diplomatic Service.	£	£	£
Counsellors	1,200–1,500	300–1,100	300–525
1st Secretaries	800–1,000	250–700	250–437
2nd Secretaries	300–600	150–650	150–437
3rd Secretaries			
Commercial Diplomatic and Consular Services.			
Commercial Counsellors	1,700	300	250
Commercial Secs., Grade I.	1,200–1,500	300	250
Insps.-Gen. of Consulates		300	..
Consuls-General		300	250
Commercial Secs., Grade II.	800–1,000	250	200
Inspectors and Consuls			
Commercial Secs., Grade III.	600 800	100	100 200
Vice-Consuls	300–600	50–150	100–200

ABYSSINIA or ETHIOPIA.

Emperor, His Imperial Majesty Haili Sellassie I, G.C.B., G.C.M.G., G.C.V.O., LL.D. (son of the late Ras Makonnen, Governor of Harar); *born* 1891; *crowned as Negus* Oct. 1928; *proclaimed Emperor* April 2, 1930; *crowned* Nov. 2, 1930.

Crown Prince, H.I.H. Prince Asfa Wosan, eldest son of the Emperor, *born* July 27, 1916.
Minister in London, Bajirond Zellaka. Aguedlou.
Legation. 83 Elm Park Gardens, S.W. 10.

The area of Abyssinia and its dependencies is estimated at 350,000 square miles, with an estimated population of 10 to 11 millions, of whom less than one-half are Abyssinians and the remainder Gallas, negro tribes on the west and south frontiers, and Danakils and Somalis on the east. The political neighbours are the Sudan, the Italian colony of Eritrea, French Somaliland, British Somaliland, Italian Somaliland, Kenya Colony and the Uganda Protectorate.

Abyssinia is volcanic and mountainous. It contains some mineral wealth; iron and coal are not uncommon, and gold is washed in various streams, while mica, platinum, salt, saltpetre, and sulphur are also procurable. The lower country and deep valley gorges are very hot; the higher plateaus are well watered, with a genial climate. In the hotter regions, sugar-cane, cotton, coffee, rubber, &c., flourish; in the middle zone maize, wheat, barley, wild oranges and other fruit trees, tobacco, potatoes, &c., are cultivated; and above 6,000 feet are excellent pastures with some corn cultivation. There are two seasons in the year, a dry winter and a rainy summer from June to September. The chief river is the Blue Nile, issuing from the Tsana lake; the Atbara and many other tributaries of the Nile also have their rise in the Abyssinian highlands. Horses, mules, donkeys, oxen, goats, and sheep, and camels in the lowlands, form a large portion of the wealth of the people.

The Abyssinians are Christian (a branch of the Coptic Church), and their rulers claim descent from Menelek, the son of Solomon by the Queen of Sheba. The government is nominally an autocracy, but the Emperor's power does not yet extend throughout the country. There is very little popular literature, but education shows signs of progress. In addition to foreign mission schools, there are 10 Abyssinian schools in the country, of which 4 are in Addis Ababa. The potential army numbers between 600,000 and 1,000,000. The principal pursuits are agriculture and cattle breeding, the chief exports being coffee, civet, wax, hides, rubber and gold. The import duty, except for non-spirituous liquors and for a few articles on the free list, is 10 per cent. *ad valorem*; there are certain consumption taxes collected additionally. A railway, which is under French control, links Addis Ababa, the capital, *viâ* Dire Dawa, with Jibuti, 495 miles away. The Government post and telephone administration is under French management, and the Italian Government have a concession that gives them control of a telegraph line from Addis Ababa to Asmara. The principal towns besides Addis Ababa are Dire Dawa, Harar, Goré, Jimma, Debra Markos (the capital of Gojam), Adua (the capital of Tigré), Gondar, Sayo, Aksum, Antalo, Dembecha and Ijube. There are ancient architectural remains at Aksum, Gondar, and Ankober.

CAPITAL, Addis Ababa (population fluctuates, but is ordinarily about 60,000). Harar, in Eastern Abyssinia, has a population of about 45,000.

Total imports (about) £2,500,000
Total exports (about) 2,000,000
Imports from U.K. 1930 (about) 70,000
Exports to U.K. 1930 (about) 30,000

FLAG: Green, red, yellow.

BRITISH LEGATION

Envoy Extraordinary, Minister Plenipotentiary and Consul-General, Sir Sidney Barton, K.C.V.O., K.B.E., C.M.G. (1929) £3,100
1st Secretary, J. M. Troutbeck.
Oriental Secretary, Ph. P. C. Zaphiro, C.M.G.
Archivist, M. E. Taylor.

BRITISH CONSULAR OFFICES.

Addis Ababa—Consul, Col. G. Mackereth, M.C.
Dangila—Consul, Major R. E. Cheesman, O.B.E.
Gorei—Consul, Capt. E. N. Erskine, M.C.
Harar—Consul, C. H. F. Plowman, O.B.E.
Jijiga—Consul, Capt. H. E. Long.
Mega—Consul, Maj. A. T. Miles, D.S.O., O.B.E., M.C.
Maji—Consul, Capt. R. C. R. Whalley.

Adis Ababa is 500 miles from Zeila, *viâ* Harar; letters from London are from 20 to 24 days in transit to Addis Ababa; train from Jibouti takes 3 days.

AFGHANISTAN

King of Afghanistan, H.M. Nadir Shah, *born* 1880, *acceded* Oct. 16, 1929.

Minister in London, H. E. Sardar Ahmad Ali Khan, 31 Princes Gate, S.W. 1.

Afghanistan lies on the N.W. frontier of India. Estimated area, 245,000 sq. miles, and pop. 6,380,500. It is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (boundary fixed 1896-7), on the N. by Asiatic Russia (boundary fixed 1886-7 and 1893-5), and on the E. by the N.W. Frontier Province (boundary fixed 1895). The northern boundary runs from Zulfikar on the Persian frontier to Kushk, the Russian railway terminus on the branch line from Merv, and thence N.E. to the Oxus, which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier was fixed by the Pamir agreement of 1895. The Indo-Afghan frontier was settled by the Durand agreement of 1893. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, who are much influenced by mullahs.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures. The population is very mixed. The Duranis have predominated since 1747, especially in Kandahar; next come the Ghilzais (military and commercial) and the Tajiks (aboriginals, who are cultivators or retail traders). All are Sunni Muhammadans, except the Hazaras and Kizilbashes, who belong to the Shiite sect. The national tongue is Pushtu, but Persian is more universally spoken.

Afghanistan is divided into five major provinces, Kabul, Kandahar, Herat, Turkestan, and Badakshan (with Qataghan, Kafiristan (now Nuristan), and Wakhan), and four minor provinces, the Eastern, Southern, Farah, and Maimena, which are under governors, with subordinate nobles and judges, police, and revenue officers. Amir Abdurrahman (1880-1901) established a strong central government, with a regular civil and military organisation, including offices for public works, posts, police, finance, trade, &c. He first formed a national army, paid and controlled by himself. Considerable quantities of rifles and artillery have been purchased in Europe and the army now consists of about 35,000 to 40,000 regulars. A small Air Force is maintained. Factories for arms and ammunition, and for various commercial products, have been erected in Kabul. The Afghan laws are based on the "Shariat," or Islamic law and tribal custom. Recently steps have been taken to develop education, hitherto controlled by the mullahs. Two schools under French and German superintendence respectively have been opened and a large number of middle and primary schools in the provinces. Most of the people are industrious cultivators, and the country has become fairly settled, peaceful, and prosperous. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Afghanistan is rich in fruits. Sheep and transport animals are bred. Silk, woollen, and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubies, lapiz lazuli, and gold are found. The roads are generally unsuitable for wheeled traffic, but are being improved. Goods are conveyed by pack animals. The chief trade routes to India are the Khyber Pass route, from Kabul to Peshawar (210 miles), and the road from Kandahar to Chaman (70 miles). The Sind-Pishin railway is now completed to the Baluchistan-Persian frontier. The exports to India are mainly fruits and nuts, raw wool, skins and *ghi*; while the imports therefrom are chiefly cotton yarn and piece goods, metals, leather goods, tea, and sugar. There is a large export of wool to Persia and Russia, cotton and silk goods, sugar, &c., being taken in exchange. The annual revenue is unknown, and consists largely of payments in kind. It may amount to £2,000,000. There are taxes on land, a grazing tax, customs duties, stamps, fines, receipts from State lands, monopolies, and factories, and mining royalties.

As the result of a British mission to Kabul in 1904-5 the engagements which had existed with the Amir Abdurrahman since 1880 were renewed by the treaty of March 21, 1905. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence. The Amir Habibullah Khan was assassinated on February 20, 1919; his brother, Nasrulla Khan, seized the throne by a *coup d'état* and temporarily held the reins of government at Kabul, but the Amir's third son, Amanulla Khan, soon after declared himself, and was recognised as King. Afghan troops crossed the Indian frontier on May 2, 1919, on which the Indian Government took immediate steps to expel them; fighting followed and Dakka was occupied by British troops, but overtures were made by King Amanulla and a treaty of peace was signed in August. By this treaty Afghanistan is left officially free and independent. By treaty of Nov. 22, 1921, Great Britain and Afghanistan agreed to respect one another's internal and external independence; to recognise boundaries then existent, subject to a slight re-adjustment near the Khyber; to receive Legations at London and Kabul and consular officers at Delhi, Calcutta, Karachi, Bombay and Kandahar and Jalalabad respectively. The Afghan Government import free of customs duty such material as is required for the strengthening of their country. The export of goods to British territory from Afghanistan is permitted without payment of customs duty. A Trade Convention was concluded and Afghanistan adhered to the International Postal and Telegraphic Union. In 1929 Amanulla Khan, whose modernist reforms had brought on him the charge of infidelity, was expelled. After a usurpation of some months by a local free-booter Kabul was captured (Oct. 1929) by Nadir Shah.

CAPITAL, *Kabul* (about 80,000). The chief commercial centre is Kandahar (60,000). Other provincial capitals are Herat (30,000), Mazar-i-Sharif (46,000), and Khanabad (5,000).

British Envoy Extraordinary and Minister Plenipotentiary, Sir Richard Roy Maconachie, K.B.E., C.I.E. (1929).

Counsellor, Maj. W. K. Fraser-Tytler, M.C.

Military Attaché, Capt. A. E. Farwell.

Surgeon, Maj. H. H. Elliott, M.B.E., M.C.

Secretary, Capt. A. E. H. Macann.

Oriental Secretary, Khan Sahib Sikander Khan.

British Consul at Kandahar, Khan Bahadur Saiyyid Siddiq Hassan.

British Consul at Jelalabad, Mufti Abdul Latif Khan.

ALBANIA.

(Shqipenia.)

King of the Albanians, Zog I, b. 1895; *elected President*, Jan. 31, 1925; *proclaimed King*, Sept. 1, 1928.

Prime Minister (Mch. 4, 1930), Pandeli Evangjeli.
Minister for Foreign Affairs, Hussein Bey Vrioni.

Minister in London, (vacant).
Legation, 134, Gloucester Terrace, W.2. [Pad. 0644].
Chargé d'Affairs, Malik Bey Libohova.
Sec. of Legation, Atlante Koçi.
Consul-General in London, Edwin Cripwell, 119, Finsbury Pavement, E.C. 2. [Met. 8615.]

Albania (the former Turkish Province of Scutari and parts of Kossovo and Yanina) lies on the west of the Balkan peninsula on south-eastern Europe, the western boundary being the Adriatic; total area about 11,000 to 12,500 sq. miles; total population (Census of 1930) 1,003,104. The political neighbours are, on the north and east, Yugoslavia, and on the south-east and south, Greece. Albania was declared independent by a National Assembly at Valona, Nov. 28, 1912, and its independence was confirmed by the *Treaty of London* of Dec. 20, 1912. The first King of Albania (Prince William of Wied) abandoned the throne in Sept. 1914, having been in power only six months, and during the Great War the country was invaded by troops of the Central Powers and of the Allies, and remained in a state of anarchy. After the Armistice a National Council at Durazzo established a provisional government, supported by an Italian military occupation of the country. The independence of the country was reaffirmed and guaranteed by the Supreme Council of the Allies. The provisional government was in power until 1920, when a revolt overturned it and set up a new government which remained in power until upset by a further revolution in December, 1924. A new Constitution was proclaimed on Jan. 21, 1925, under which Albania became a Republic under a President (elected for 7 years), with a Council of Ministers, a Senate, and a House of elected Representatives. On Sept. 1, 1928, the Constituent Assembly proclaimed the country a democratic monarchy and offered the crown to Ahmed Bey Zogu, the President, who assumed the title of Zog I, King of the Albanians; the Senate then ceased to exist, and a High Council of State was formed of 10 members appointed by the King.

The country is very primitive, agriculture and sheep and goat rearing being the principal industries, and olives and olive-oil, grains and tobacco the principal products; but there is some mineral wealth which remains largely undeveloped. A harbour, under construction at Durazzo to accommodate vessels up to 4½ metres draft alongside in all weathers, is expected to be completed in 1932.

	Gold Francs. 1930-31.	1931-32.
Estimated Revenue.....	31,385,000	29,097,000
Estimated Expenditure...	31,385,000	31,533,422
Estimated Debt;—		
*Italian Economic loan	—	50,000,000
Budget deficit	—	2,436,422

* In July, 1931, the Albanian Government accepted the offer of the Italian Government of annual loans of 10,000,000 Gold Francs, maximum for 10 years, making a total maximum of 100,000,000 Gold Francs, from 1931.

	1930.

BRITISH LEGATION.
(Rruga Tomorica, Durazzo.)

British Envoy Extraordinary, Minister Plenipotentiary and Consul-General, Sir R. Hodgson, K.B.E., C.M.G. (1928). £2,700
Naval Attaché, Captain R. B. Ramsay, R.N.
Asst. Naval Attaché, Eng.-Com. G. Villar, R.N.
Military Attaché, Lt.-Col. H. R. G. Stevens, D.S.O.
Air Attaché, Group Capt. T. G. Hetherington, C.B.E.
Archivist, F. W. Borman.
Albanian Secretary (local rank), Triphoni Toni.

BRITISH CONSULAR OFFICER.

Durazzo—Vice-Consul (local rank of 2nd Secretary), Edward H. L. Hadwen.
„ *Pro-Consul*, F. W. Borman.

ANDORRA.

A miniature Republic in the Pyrenees, with an area of 175 sq. miles, and a population of 5,500; it is under the joint suzerainty of France and Spain. There is a Council of Twenty-four, elected by certain of the inhabitants, a judge, and two lay vicars appointed by France and the Spanish Bishop of Urgel.

ARABIA.

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30'—60° E. long. and 12° 45'—34° 50' N. lat. The north-western limit is generally taken from Akaba, at the head of the Gulf of Akaba, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the form of a horse-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Aden, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in the Sultanate of Oman.

The total area is estimated at 1,200,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, and Dahna deserts), and the total population is believed to be about 5,000,000. The various Arab States are shown below:—

THE KINGDOM OF HEJAZ AND NAJD.

King of the Hejaz and Najd and its Dependencies (Jan. 11, 1926), H.M. Abdul Aziz Ibn Abdul Rahman el Faisal al Saud, G.C.I.E., *born* 1882.

Minister in London, Sheikh Hafiz Wahba, 42 Eaton Place, S.W. 1. (Sloane, 3898.)
1st Sec., Mahmood Riyad Zada.
2nd Sec., Youssof Salama.

In the 18th century Najd was an independent State and the stronghold of the Wahabite sect. It subsequently fell under the Turkish yoke, but in 1913 the present King threw off Turkish rule and captured from the Turks the Province of Hasa. In 1921 he added to his dominions the territories of the Rashid family of Shammar, which he captured by force of arms, and in 1925 completed the conquest of the Hejaz, and accepted the surrender of the greater part of Asir, the whole of which is now part of the Kingdom.

Najd ("Plateau") has no definite frontiers, but may be said to extend over about 800,000 square miles of Central Arabia, including the Nafud and Dahna Deserts, and reaches eastward to the Persian Gulf (Hasa). The population is largely nomadic and is estimated at 1,275,000 Arabs, negroes and half-breeds, the majority being Muhammadans of the Wahabite movement. There is little agriculture, but wheat and barley are grown; the principal industry is camel and sheep raising. The exports are woven cloaks, dates, live stock, hides and skins. The capital is Riyadh, and the principal trading centres are Hufuf, on the Persian Gulf littoral (30,000), Shaqra, Anaisah, Buraida, Haïl and Hauta (Central), which have populations of 8,000 to 10,000. The only ports (Persian Gulf) are Qatif and Ojair, which are suitable only for sailing craft. Riyadh is a station on the Pilgrims' trans-Arabian caravan route from Hasa to Mecca, and contains a large mosque, the "Westminster Abbey" of the Wahabites.

The *Hejaz* extends from Asir in S. to Transjordan in N., and from the Red Sea, the Gulf of Akaba in the W. to the ill-defined boundaries of Central Arabia. The coastline on the Red Sea is about 800 miles, and the total area is about 112,500 sq. miles, with a population of from 350,000 to 400,000, including many nomad tribes. On the coast are the small ports of El Wedj, Yambo, Rabigh and Jeddah (the chief port of the country and the pilgrims' port), which contains the reputed "tomb of Eve, the mother of mankind"; and inland are many settlements through which runs the course of the Hejaz Railway. The *Oasis of Khaibar*, east of the railway, contains a considerable population, descendants of former negro slaves, with a centre at Kasr el Yahudi. The importance of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. *Medina* (*Al Medina*, "The City"), 820 miles by rail from Damascus, and the present terminus of the Hejaz Railway, has a permanent population of about 20,000, and is celebrated as the burial place of Muhammad, who died in the city on June 7, 632 (12 Rabia, A.H. 11). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad. *Mecca*, the birthplace of the Prophet, is 55 miles east of the seaport of Jeddah, by road, and about 200 miles south of Medina, and has a fixed population estimated at 60,000. The city contains the great mosque surrounding the *Kaaba*, or sacred shrine of the Muhammadan religion; in which is the black stone "given by Gabriel to Abraham," placed in the south-east wall of the Kaaba at such a height that it may be kissed by the devout pilgrim. *Jeddah*, the principal port, has a considerable trade in hides, mother-of-pearl, coffee and carpets. The course of the *Hejaz Railway* runs from Medina in S. through the Syrian Desert to Damascus and Beirut, and is connected with the projected Baghdad Railway at Aleppo.

Asir extends, geographically, from a line drawn inland from Lith on the southern limit of Hejaz to the northern boundary of Al Yemen (about lat. 17° 15′ N.) and includes the seaboard down to lat. 16°. Its breadth extends about 180 miles eastwards to Bishah in the north and to the boundary of the Beni Yam in the south. According to Arabian geographers, Asir is part of Al Yemen. The territory includes the Farsan Islands. The maritime lowland is interspersed with fertile areas near the wadis, which afford pasturage and bear grain. The capital is Sabia, a small inland town.

The total cost to the British Government of the subsidies paid to King Ibn Saud during the years 1917 to 1923 is approximately £542,000. No subsidy was paid before 1917 or after 1923, and the subsidy was given in the first instance in consideration of assistance in the war against Turkey. The later payments were made subject to the following conditions:—

(1) That Ibn Saud refrained, and restrained his adherents from aggressive action against the Hejaz, Kuweit, and Iraq.

(2) That he afforded co-operation in the matter of the Haj (pilgrimage to Mecca) by maintaining the safety of pilgrim routes to his territory.

(3) That he consented to be guided generally by the wishes of His Majesty's Government in regard to his foreign policy, and to co-operate with them in promoting their own policy, which had for its object the maintenance of peaceful conditions in Arab countries and the promotion of the economic interests of both parties.

No terms of repayment were suggested.

CAPITAL, Riyadh (pop. 20,000).

British Envoy Extraordinary, Minister Plenipotentiary and Consul-General, Sir Andrew Ryan, K.B.E., C.M.G. (1930).

Jeddah—Vice-Consuls, C. G. Hope Gill; T. Wikeley; G. W. Furlonge; Munshi Ihsanullah.

„ *Pro-Consul*, Basil W. Seager.

THE PRINCIPALITY OF KUWAIT.

Ruler, Sheikh Sir Ahmad al-Jabir as-Subah, K.C.I.E., C.S.I., *acceded* March, 1921.

Kuwait (or Koweit) has been semi-independent for many years, and is in treaty relation with British India. It extends along the shore of the Persian Gulf from Mesopotamia to Najd (El Hasa). The important harbour and gulf port of Kuwait, the capital (pop. 60,000), is an entrepôt for goods for the interior, and for the export of horses, pearls, wool, &c. It was designated as the terminus of the Berlin-Constantinople-Baghdad railway as originally projected in 1903. The trade of Kuwait (1929-30) was valued at £71,825 for imports, and £182,900 for exports.

British Political Agent, Lt.-Col. H. R. P. Dickson, C.I.E.

THE SULTANATE OF OMÃN.

Sultan, H. H. Seyyid Sir Taimur bin Faisal bin Turki, K.C.I.E., C.S.I., *born* 1886, *succ.* Oct. 5, 1913.

Omãn (*area 82,000 sq. miles, estimated pop.* 550,000) is a Muhammadan State in S.E. Arabia with a coast-line of about 1,500 miles along the Persian Gulf, the Gulf of Omãn, and the Arabian Sea from El-Katar to Ras Sair. The country, much of which is arid and desert, attains in Jebel Akhdhar an elevation of 10,000 feet. The population is chiefly Arab, but includes also a considerable foreign element—Indians, Persians, Baluchis and Swahili negroes. The Sultan is in

treaty relations with, and subsidised by, the Government of India, who have a political agent at his capital. In 1913, at the end of the reign of the last Sultan, the tribes of the Interior rose in rebellion, and, having elected their own Imam or Spiritual Ruler, have since administered the whole of Omān proper, the efforts of the Sultan to establish his control having been, up to date, unsuccessful. This rebellion has, with the war, interfered with the prosperity of the country. The Sultan is pledged not to cede territory to any Power but the British Government. Muscat has a considerable trade, amounting in 1929-30 to £459,446, and in 1930-31 to £415,275. Dates and dried fish are the chief export, and rice, wheat, coffee, cotton and silk goods the chief imports. The capital, Muscat (with the sister town of Matrah), has an estimated population of 12,600.

Muscat—British Consul and Political Agent, Maj. T. C. Fowle, C.B.E., *per mensem* Rs. 2,300.

THE IMAMATE OF YEMEN.

Imam, Yahya Muhammad Hamid-ud-din, *born* 1869.

Yemen occupies the S.W. corner of Arabia between Asir and the Aden Protectorate, with an estimated area of 74,000 square miles and a population of 3½ millions. Under Turkish rule, it was divided into the vilayet of Sana, Taiz, and Hodeida, and it extends inland to the borders of the Hadramut. The highlands and central plateau of Yemen, and the highest portions of the maritime range form the most fertile part of Arabia, where wheat, barley, millet, coffee and oats, are extensively grown. The chief port of Yemen is Hodeida which is noted for the export of coffee, shipped from Hodeida to Masawa and Aden, and thence to Europe. The trade from Yemen perhaps exceeds that of the remainder of Arabia. The Imam is the head of the Zeidi sect of the Shiah Division of the Muhammadan religion; about half of his subjects are Zeidis, the remainder being Shafais, over whom he rules by *force majeure* alone. On the withdrawal of the Turks from Yemen, the Imam took over occupation of the territory bordering on the Aden Protectorate populated by the Shafai sect of Sunni Muhammadans, and also the Tihama, or coast lands, from S. of Hodeida to Sheikh Said. Since 1920 the Imam of Yemen has been gradually encroaching on the Aden Protectorate, which is populated by tribes of the Shafai sect, but has now been ejected by air action from Aden, in support of the Protectorate tribes. In 1925, the Imam occupied Hodieda, which had been evacuated by the Idrisi, and later took the ports of Midi and Loheiya, together with the intervening country between the highlands and the coast, all of which is populated by Shafai tribes. The rule of the Imam is very unpopular with the Shafais owing to his exactions. About 60 miles to the south of Sani is the town of Dhammar, an ancient seat of learning.

CAPITAL, Sana; population, about 40,000.

BAHRAIN.

Ruler, H. E. Sir Isa bin Ali Al Khalifah, K.C.I.E.
Heir Apparent and Regent, H. E. Shaikh Hamid bin Isa Al Khalifah, C.S.I.
Financial Adviser, C. Dalrymple Belgrave.
Political Agent, Capt. C. G. Pryor.

Bahrain is the largest of a group of islands (Bahrain, Maharaq, Sitra, Nabi Saleh and some uninhabited islets) half way up the Persian Gulf near the Arab Coast (El Hasa). Bahrain is the headquarters of extensive pearl fisheries and a distributing centre for the adjacent mainland. Pearls are the principal export, varying in value from 1 to 2 millions sterling per annum. The principal imports are rice, cottons, dates, sugar and spices. The people (about 115,000) are Muhammadans. Bahrain has been in treaty relations with the Government of India since 1820. In 1880 the ruler engaged not to make treaties with any other state and in 1923 the active control of affairs was handed over to the present regent.

CAPITAL, Manama; population, about 25,000.

THE HADRAMUT TRIBES.

The coastal region of Southern Arabia, between Yemen and Aden on the west and Oman on the east, and extending inland (northwards) to the Dahna Desert, contains a coastal strip of some 550 miles. Parallel with the coast (at a distance of 50 miles from the Arabian Sea) is an extensive plateau inhabited by the Hadharim, an ancient people of Arabian stock (Hadoram was the son of Joktan, *Genesis* x, 27). There are many settlements on the coast and in the interior, but the latter are being steadily enveloped by the sand of the northern desert. There are sacred shrines near Kasm (Qabr Hud) and Shibām (Qabr Sālih). The eastern districts, known as Mahra and Gara, are very sparsely populated. The estimated area of Hadramut is 32,000 sq. miles, and its Muhammadan population, of independent Arab tribes, is estimated at 150,000. The most important Coastal Chief is the *Sultan of Shehr and Mokalla* (H.H. Sultan Omar bin Awadh) who is in treaty relations with Great Britain. Inland, the most important tribe is the Kathiri, whose chief towns are Saiwun and Terim. The Kathiri are noted as travellers and traders, and many of them are settled and carry on commerce at Singapore and Java. A long-standing feud between the Kathiri and the Qa'iti (by whom the former were expelled from the coast) was settled by treaty in 1919 on the initiative of the Aden Government. Under this Treaty the Ka'iti *Sultan of Mokalla* permits access to the port of Mokalla on the part of Kathiri traders. Agriculture and cattle raising are the principal industries, together with the cultivation of dates, indigo and tobacco.

TRUCIAL COAST.

The independent tribes on the *Pirate Coast*, which partly encloses the Persian Gulf from Ras-el-Kheima to Odeid, are bound under treaties with the Government of British India to maintain a maritime truce for the prevention of piracy and slavery, and for the cessation of hostilities at sea. Hence their chiefs are sometimes called the "Trucial" chiefs. The British Political Resident in the Persian Gulf is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. In 1892 these tribes agreed not to enter into relations with, or cede territory to, any other Power than the British. The trade of the coast ports largely consists in exports of pearls to India *viâ* Lingah and Bahrain.

ARGENTINE REPUBLIC.

(República Argentina.)

**President of the Provisional Government*, General José F. Uriburu (*assumed office*, Sept. 8, 1930).

Min. for Foreign Affairs, (vacant).
Interior, Mg. Octavio Pico.
Finance, Dr. Enrique Uriburu.
Justice and Public Instruc., Dr. Guillermo Rothe.
Agriculture, Dr. David Arias.
War, General Francisco Medina.
Marine, Admiral Carlos Dairreaux.
Public Works, Dr. Pablo Calatayud.

Ambassador in London, His Excellency Señor Dr. Don Manuel Malbran, 30 Grosvenor Gardens, S.W. 1.
Counsellor, Señor Don Carlos Miguens.
First Secretary, Señor Dr. Don Pablo Santos Muñoz.
Military Attaché, Col. Avelino J. Alvarez.
Naval Attaché, Capt. Dalmiro Saenz.
Air Attaché, Señor Don Pedro Zanni.
Civil Attachés, Señor Don R. Q. Blamey Lafone; Señor Don R. C. Quesada; Señor Don Julián Duggan.
Commercial Counsellor, Señor Dr. Don Juan E. Richelet.
Attaché, Señor Don A. Scilingo.
Consul-General, Señor Don Ernesto C. Perez, 7 Gower Street, W.C.1.

There is a Consulate-General at *Dublin*, and there are also Consulates at *Liverpool, Southampton, Cardiff, Newcastle-upon-Tyne, Newport*, and *Glasgow*; and Vice-Consulates at *Aberdeen, Belfast, Bristol, Hull, Manchester, Middlesbrough*, and *Swansea*.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly 2,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. On the west the mountainous Cordilleras, with their plateaus, extend from the northern to the southern boundaries; on the east are the great plains, those in the north are thickly wooded and are known as *El Gran Chaco*, and further south lie the treeless pampas, which together constitute *La Plata*, extending from the Bolivian boundary in the north to the Rio Negro; and south of the Rio Negro are the vast plains of Patagonia. Argentina thus contains a succession of level plains, broken only in Cordoba by the San Luis and Cordoba ranges, in the north-western states by the eastern spurs of the Andes, and in the southern portion of the Province of Buenos Aires by the Tandil Hills (about 1,000 ft.) and the Sierra Ventana, near Bahia Blanca (about 3,000 ft.). The Paraná River, formed by the junction of the Upper Paraná with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Paraná. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into Samborombon Bay (Atlantic). In the south the Colorado and Rio Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic.

The Republic is composed of 14 provinces and 10 territories, comprising in all about 1,132,000 square miles, with a population of 10,522,035 in 1928. Immigration is encouraged, and comes principally from Spain and Italy, but legislation, introduced in 1919, requires intending immigrants to produce certificates of good character and ability to work. In 1929 the immigrants numbered 148,916, and the emigrants numbered 82,805. The climate is moderate. Spanish is the language of the country.

Government.—The estuary of La Plata was discovered in 1515 by Juan Diaz de Solis, but it was not until 1534 that Pedro de Mendoza founded Buenos Aires. In 1810 (May 25) Spanish rule was defied, and in 1816 (July 9) the Independence of Argentina was declared by the Congress of Tucumán. In 1853, after more than thirty years of disturbances and civil wars, the country settled down, and is now a well-governed and progressive Republic. The constitution dates from 1853 (revised 1859) and is modelled on that of the U.S. of America, but each province enjoys practically complete autonomy. The executive is in the hands of the President, who selects his Cabinet. The National Congress consists of a Senate of 30 members and of a House of Deputies of 160 members. Members of Congress receive $18,000 (paper) *per annum*.

Production.—Of the total area about one-third is suitable for agriculture and cattle raising. The principal productions are wheat, maize, oats, linseed, sugar, wine, wool, hides, cattle, sheep, and horses. There were (1930) 31,974,000 cattle, 43,084,000 sheep, 9,839,000 horses, 523,416 mules (1922), 4,819,835 goats (1925), and 3,764,000 pigs (1930). The exports are made up entirely of pastoral and agricultural products, with the exception of quebracho, copper, manganese, and wolfram. In 1929 the exports of wheat were 6,613,000 metric tons, oats 413,000, casein (1930) 13,700, cotton (1928) 18,500 tons, linseed 1,617,000, maize 5,048,000 metric tons, butter (1930) 23,000 tons, wool (1930) 135,000 tons, sheepskins (1928) 19,400 tons, chilled meat (1930) 355,500 tons, frozen meat (1930) 58,700 tons, frozen mutton and lamb (1930) 82,000 tons. Oil has been found in various parts of the Republic and is worked to a considerable extent in the neighbourhood of Comodoro Rivadavia, in the Department of Escalante. The Argentine State Oilfields produced 5,207,000 barrels in 1930; the output of private companies was approximately 3,702,000 barrels in 1930.

Communications.—There were (1930) 23,795 miles of railroad open. The railroads are almost entirely in the hands of British companies, and absorb about £234,000,000 of British capital. Telegraphs about 75,250 miles, mostly Government lines. There are 22 wireless stations, of which one is reserved for communication between England and the Argentine. There are aeroplane services between Argentine centres. The principal ports are Buenos Aires, Rosario, La Plata, and Bahia Blanca. In 1930, 2,557 vessels (9,886,812 net tons) entered at all ports; of the total, 4,289,682 net tons (43·38 per cent) were British.

Defence.—The Navy consists of 2 super-

* Presidential Election was held in Nov. 1931.

Dreadnought battleships (reconstructed in 1925), 1 old cruiser, 2 destroyer leaders, 4 destoyers, 4 coast defence ships, and auxiliary vessels. Two light cruisers, 3 destroyer leaders and 3 submarines are being obtained in Europe. Strength about 800 officers and 14,000 men. The principal naval base is at Puerto Belgrano, near Bahia Blanca, and there are minor bases at La Plata and Buenos Aires, while a new submarine base is being built at Mar del Plata. The naval aviation base is at Puerto Belgrano, with a subsidiary base at Punta Indio. The Army is organised in 5 divisions, and numbers about 1,500 officers and 25,000 men on a peace footing. Each divisions would consist of about 40,000 men on a war footing.

Education.—Primary Education is secular, free and compulsory from the ages of 7 to 14. The scattered population of the country districts constitute a problem in attendance which is being gradually solved. *Secondary* Education is controlled by the National Government in National Colleges, numbering 51 in 1929, with 17,600 students, average annual fees $45 (paper); in Normal Schools, numbering 86 in 1923, with 30,000 students who pay no fees; and in 60 Special Institutes for Commerce, Arts and Crafts, Mining, Agriculture, &c. There are *National Universities* at Cordoba, Buenos Aires, La Plata, and Tucuman, and Faculties at Santa Fé, Rosaria and Paraná.

AUSTRIA.

(Oesterreich.)

President of the Federation (Dec. 6, 1928), Dr. Wilhelm Miklas.
Federal Chancellor (June 20, 1931), Dr. Karl Buresch.
Vice-Chancellor and Minister of Foreign Affairs, Dr. J. Schober.
Justice, J. Schürff.
Education, Dr. Emmerich Czermak.
Finance, Dr. Weidenhoffer.
Agriculture and Forestry, Dr. Dolfuss.
Commerce and Communications, Eduard Heinl.
Interior, F. Winkler.
Military Affairs, Karl Vaugoin.
Social Welfare, J. Resch.

Minister in London, Baron George Franckenstein, 18 Belgrave Square, S.W. 1.
Counsellor, Baron Lothar Wimmer.
Secretary, Count Max Attems.
Consul-General, Charles D. Seligmann.

Prior to the War the Austrian Empire, joined to the Kingdom of Hungary, was the largest Empire, next to Russia, on the continent of Europe, situated between 42°–51° N. lat. and 9° 30′–26° 20′ E. long. It embraced an area of 240,456 sq. miles, and a population (1914) of nearly 53,000,000. At the conclusion of the Great War, the territories of Austria comprised an area of 32,175 square miles with a population (1923) of 6,534,481 (estimated Dec. 31, 1927, at 6,678,527).

On June 28, 1914, the assassination of the Austrian Archduke Francis at Sarajevo (Bosnia) was presumed to be the outcome of a plot fostered by Serbia, and after negotiations an ultimatum was presented by the Empire to the Serbian Government (July 23), and non-compliance with its terms led to the European War of 1914–18. Before the armistice of Nov. 11, 1918, the Hungarians, Czechoslovaks, Poles, Jugoslavs and Rumanians had seceded from the "Dual Monarchy," and a Republic of "German Austria" was declared Nov. 12, 1918, the throne being abdicated by the Emperor Karl (Nov. 28, 1918).

Under the *Treaty of St. Germain* (Sept. 10, 1919) the political neighbours of Austria are Germany and Czechoslovakia on the N.; Italy and Yugoslavia on the S.; Switzerland on the W., and Hungary on the E.

Under the new Constitution (Nov., 1920), Austria became a Republican Federation of eight Provinces :—

Province.	Area (sq. miles).	Population 1923.
Lower Austria and Vienna ..	7,560	3,346,229
Upper Austria	4,627	876,074
Carinthia	3,679	370,817
Styria	6,320	978,845
Salzburg	2,765	223,025
Tyrol	4,881	313,885
Vorarlberg	1,010	139,995
Burgenland (West Hungary)	1,533	285,609
Total.....	32,175	6,534,481

Under the Constitution the Bundesrat and Nationalrat were constituted; a government formed, and a President elected; Vienna was later formed into a separate Province. The elections resulted in a majority for the *Christian Socialists* over the *Social Democrats*, the *Pan-Germans* coming next in order. In June, 1921, the Ministry resigned in favour of a non-party Government, which gave way (May, 1922) to a Christian Socialist Pan-German Coalition Government under Doctor Seipel (a priest). Elections were held again in October, 1923, March, 1927, and November 1930, and a similar Government was returned on each occasion.

Complete religious liberty is one of the fundamental laws of the new Republic. The prevailing religion is Roman Catholic.

Defence.—During the War of 1914–18 about 5,000,000, all ranks, were passed into the common Army of Austria-Hungary. The total casualties exceeded 2,500,000, of whom over 700,000 were returned as killed. Under the *Treaty of St. Germain* the military, naval and air forces were demobilised and reduced to minimum requirements and all warships were surrendered to the Allies, those under construction being broken up. Service in the Republican Army is by voluntary enlistment for twelve years.

Education.—Primary education is compulsory and free, the children in attendance at schools numbering about 720,000 in 1927. Secondary education is provided in gymnasia, and real-schools and there are universities at Vienna, Graz and Innsbruck.

Finance.—The finances of Austria went from bad to worse for four years after the Armistice, owing to heavy deficits and incessant inflation. The deficit on the State Budget was estimated in July, 1922, at considerably more than one billion crowns, and by Oct. 1922, the exchange value of the crown had sunk to about one-fifteen-thousandth of its nominal value, £1 being equal to 325,000 crowns (in place of 24·22). The circulation on Sept. 30, 1922, was over two billion crowns. In September and October, 1922, the League of Nations worked out a scheme for the restoration of the Austrian finances within two years under the control of a High Commissioner appointed by the League, the Governments of Great Britain, France, Italy, and Czechoslovakia agreeing to guarantee four-fifths of a loan of 520,000,000 gold crowns (about £25,000,000) in order to fill the deficit in the Budget during the two years. The guarantees for the remainder were given by other powers and a short term loan of £3,500,000 was issued in March, 1922. In the following June the big League of Nations loan was successfully floated, nearly one-half in London, about £5,000,000 in New York, and the rest in various continental capitals. The sum actually received amounted to over £26,500,000. About £11,000,000 was used to repay the previous short term loans made in 1922 and 1923. The High Commissioner, Dr. Zimmerman, appointed by the League of Nations to supervise the carrying out of their scheme for the reconstruction of Austria, entered on his office in Dec. 1922. Great progress has been made since in reducing Government expenditure and increasing the revenue. Thus about 79,000 superfluous officials were dismissed or pensioned off by the end of December, 1924, and on the completion of the work of reconstruction Dr. Zimmerman left Vienna in July, 1926. The issue of uncovered bank-notes was stopped on Nov. 18. 1922, and the Austrian crown was stabilised at about Crs. 345,000 = £1. In 1925 a new currency was introduced, the unit being the Austrian *schilling* (=10,000 paper Crowns), the rate of exchange in Sept., 1929, being 34·37 *sch.* = £1 sterling. Since the Armistice (Nov. 11, 1918), the British Government has advanced about £10,000,000 to the Republic. The favourable condition of the Austrian State lasted until 1929, but in 1930 there was a small deficit on working account and in 1931 measures were passed to reduce expenditure and increase revenue.

	1929.	1930.
Receipts	£43,300,000	£43,600,000
Current Expenditure	38,400,000	44,000,000
Working Surplus ...	4,900,000	...
Deficit.....	...	400,000
Capital Expenditure	4,200,000	7,200,000

In 1930 and 1931 Austria has been severely affected by the general trade depression which caused an increase in the number of unemployed, a falling off in production and foreign trade, and a decline in the revenue. In May 1931 the leading bank, the Oesterreichische Credit Anstalt, got into difficulties and had to be supported by the Government. In order to relieve the strain on the Austrian National Bank, the Bank of England advanced £4,300,000 to the Austrian Government on June 16. In August 1931 the Austrian Government applied to the League of Nations to make an enquiry into its situation, and experts were sent.

	1929.	1930.
Total Imports.....	£95,960,000	£79,283,000
Total Exports.....	63,930,000	54,574,000
Imports from U. K.	3,450,000	2,708,000
Exports to U. K. ...	2,820,000	2,950,000

Communications.—In Sept., 1919, there were about 4,140 miles of railway (exclusive of narrow guge lines). The mercantile marine was considerable in 1914, but the new Republic is land-locked.

Industries.—The principal industry is agriculture, the chief products being wheat, barley, oats, rye, maize, and potatoes. Forestry and stock raising are important. The forests are principally coniferous trees. The live-stock includes horses, cattle, sheep, pigs, and goats. The vine is extensively cultivated. The most important mineral production is that of iron ore, magnesite, and salt; there are also lead, zinc, copper, common and brown coal, and graphite. The principal manufactures are woollens, cottons, steel, wood-work, brewing, and machinery.

CAPITAL, Vienna, on the River Danube. Pop. (1923) 1,865,780; other large towns are Graz (152,706), Linz (102,081), and Innsbruck (56,401).

A Kingdom of Central Europe, with a total area (1927) of 11,750 square miles and a population, Dec. 31, 1930 (including Eupen and Malmédy) of 8,129,824. Belgium is bounded on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxemburg, and on the W. by the North Sea. The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by a Conference of the European Powers, and by the *Treaty of London* (April 19, 1839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia. On Aug. 2, 1914, the Germans invaded Belgium and ultimately overcame the resistance of the fortresses and overran almost the whole country. In revenge for the heroism of its defenders the Germans sacked and destroyed many cities, burning Louvain (with its library), Termonde, and other places, and established a reign of terror. They levied a war contribution on Belgium of close on £100,000,000, apart from enormous fines on localities, firms, and private persons. On Friday, Nov. 15, 1918, at the great turn of the tide, Antwerp was reoccupied by the victorious Belgian army, and Brussels and the remainder of Belgian soil a few days later. About 10,000 persons were added in 1919 by the cession of Moresnet and part of Malmédy by Germany, and the district of Eupen, with the remainder of the district of Malmédy, were ceded by Germany and annexed by Belgium (Sept. 20, 1920) after a plebiscite, thus adding a further 50,000 to the inhabitants.

French and Flemish are the joint official languages, but while French is the language of the upper classes, Flemish is spoken by the majority, preponderating in Flanders, Limburg, and Brabant, including Antwerp. Nearly all the inhabitants are, at least nominally, Roman Catholics.

Belgium has a frontier of 831 miles, and a seaboard of 42 miles. The Meuse and its tributary the Sambre divide it into two distinct regions, that in the west being generally level and fertile, whilst the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 sq. miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 536 feet. The principal rivers are the Schelde (Escaut) and the Maas (Meuse). Brussels has a mean temperature of 50° F. (summer 65°, winter 37°).

GOVERNMENT.—The constitution jointly vests the legislative power in the King, the Senate, and the Chamber of Representatives. The 154 senators (with the exception of 40 elected by the provincial councils and 20 elected by the senators themselves) and 187 representatives are elected by the people, the former for eight, the latter for four years. Universal male suffrage, with plural voting up to three votes by property and educational qualifications, was introduced by the Electoral Law of 1894, proportional representation being secured by an Act of 1900. In April, 1919, the Belgian Parliament decided as an emergency measure to hold 1919 elections on a "one man one vote" basis for Senate and Chamber. (Unmarried widows of soldiers killed before Jan. 1, 1919, or failing widows, the mothers; widows or mothers of civilians shot by

enemy; women imprisoned by enemy for patriotic acts, also voted.) This Parliament, anomalous, and unconstitutionally elected, was required to make constitutional the machinery by which it was elected; *i.e.*, to revise article 47 of the Constitution. This was done (Feb. 7, 1921) and a new Chamber was elected in 1925. The present Chamber (elected in May, 1929), consists of 77 Catholics, 28 Liberals, 70 Socialists, 11 Frontists (extreme Flemish Nationalists), and 1 Communist. Deputies receive 42,000 francs a year and a free pass over the railways. There are in addition representative Provincial and Communal Councils, elected on a somewhat more liberal franchise.

PRODUCTION.—Agriculture and forestry are important industries, the chief crops being oats, rye, wheat, potatoes, barley and sugar-beet. Under Annex IV. of the *Treaty of Versailles* Germany undertook to deliver to Belgium certain live-stock to replace the animals seized or destroyed during the War of 1914-1918. Belgium is essentially a manufacturing country, and it is largely dependent upon foreign supplies for its food. The mineral kingdom yields coal, iron, zinc, lead, and copper. The leading industries are collieries, quarries, and metallurgic (Mons, Charleroi, Liège, Namur, Hainaut, Brabant, and Limbourg), glass, textiles (Ghent and Verviers), lace (Brussels, Mechlin, Bruges, &c.), flour and starch mills, sugar, distilleries, breweries, &c.

DEFENCE.—In 1928 a new Recruiting Law was passed, entailing compulsory service for an average of 12 months, including rappels. The annual contingent is fixed at 44,000, and the Army consists of a Field Army of 3 Corps, each of 2 Divisions, and 1 Cavalry Corps of 2 Divisions.

EDUCATION.—Schools are maintained by communal taxation, with provincial and State grants, while many are under ecclesiastical control. Roman Catholic largely predominating. There are 134 State high schools, including 44 for girls, and numerous private institutions. Special schools abound. The Universities of Ghent and Liège are maintained by the State; those of Brussels and Louvain are free institutions. Louvain University has been rebuilt. After considerable opposition, and by way of a compromise, Ghent University, which had hitherto transacted its business and given its teaching in French, was in 1923 made bi-lingual, many Flemish lectures being substituted for French, and Flemish becoming the official language of the University.

Revenue (1929)	*Francs* 13,776,198,446
Expenditure (1929)	12,281,192,019
Debt (Dec. 31, 1930):—	
Internal consolidated	24,933,262,636
External ,, ...	26,766,067,083
Total	51,699,329,719
Internal floating	1,042,480,000
Total	52,741,809,719
Imports (1930)	*Francs* 31,041,317,000
Exports (1930)	26,340,409,000
Imports from U.K. (1930) ...	2,831,234,000
Exports to U.K. (1930)	4,598,666,000

The imports in 1930 were: manufactured articles (9,348,623,000 francs), raw materials (14,569,053,000), foodstuffs and beverages (6,787,025,000), and live animals (217,048,000); the exports were: raw materials (8,168,181,000 francs), manufactured articles (15,995,266,000), and foodstuffs and beverages (1,932,952,000) and live animals (152,642,000).

COMMUNICATIONS.—In 1929 there were 4,800 kilometres of State railways (normal gauge) and 5,137 kilometres of narrow gauge. In 1929 there were 48,009 kilometres of telegraph wire. The navigable rivers and canals have a length of 1,231 miles (1919), and there are 6,177 miles of roads. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine consisting (1930) of 160 vessels (520,310 tons), in addition to which there were 552 fishing boats. In 1930, 18,413 vessels entered at Belgian ports (tonnage 29,113,791). The principal port and commercial entrepôt is Antwerp, on the River Scheldt. Other ports are Ostend, Ghent, Bruges, Nieuport, Blankenburg and Zeebrugge (blocked by the British Fleet April 23, 1918, and since re-opened for traffic). The vexed question of the Scheldt, of which the right bank is in Netherlands territory and the left in Belgium, appears likely to be settled by negotiation between the respective Governments. The navigation is to be free to both countries, from the mouth to Antwerp, and the Netherlands war vessels are to be removed from the river.

The Capital, BRUSSELS, had a population (Dec. 31, 1930) of 885,924 (with suburbs). Other towns with over 100,000 inhabitants are Antwerp, the chief port (451,334); Ghent (208,539), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; and Liège (169,565) the centre of the iron industry. Brussels is 224 miles from London; transit, 8 hrs.

THE BELGIAN CONGO.

Governor-General, His Excellency Lieutenant-General Auguste Constant Tilkens.

The Independent State of the Congo, founded in 1885, became a Belgian Colony on Nov. 15, 1908. Situated between long. 12°-31° E. and lat. 5° N.-13° S, the colony comprises an area of 909,654 sq. miles, with a native population estimated (1928) at 10,000,000. The total European population (Jan., 1930) was 25,679, of whom 17,676 were Belgians, 1,392 were British, 1,582 Portuguese, 1,490 Italians, 717 French, 695 Greeks, 544 Americans, 315 Swiss, 350 Dutch, and 918 others of various nationalities.

The Congo River is navigable for large vessels from its mouth at Banana to Matadi (95 miles), where the European steamers discharge and recharge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 249 miles in length. A narrow-gauge line runs from Boma to Tchela in the Mayumbe (86 miles). Above Leopoldville the river and its numerous affluents are navigable by steamer for about 7,000 miles, the falls on the Upper River being avoided by a metre-gauge line from Stanleyville to Ponthierville (78 miles), and another from Kindu to Kongolo (355 kilometres). Another line from Kabalo to Albertville on Lake Tanganyika (170 miles) connects the West Coast of Africa with British East Africa and the East Coast. The Katanga-Bukama Railway (446 miles) links up the Rhodesian Railway system with the steamers plying on the Upper Congo River, connecting with both the East and the West Coast. The Bukama-Port-Franqui Railway (702 miles) commenced in 1923 and opened in 1928 makes it possible to travel by train direct from Cape Town to the river Kasai, a distance of 3,400 miles. This new route plays an important part in the export of copper from the Katanga mines, its possibilities being limited only by the capacity of the Port of Matadi. Other railways are Kindu-Kongola (223 miles), Aketi-Bondo (95 miles), Charlesville-Makumbi (56 miles) and Manono-Mayumba (32 miles), making a total for the Colony of 2,112 miles. A new line has been completed from Katanga to join the recently completed Benguela Railway in Portuguese Angola, and work has been started on a line from Stanleyville to Lake Albert which will provide the last link to direct river and rail communication between the Cape and Cairo. Regular air services are established from Boma to Leopoldville, Luebo and Elisabethville, from Luebo to Kabalo and from Leopoldville to Coquilhatville. Motor roads total over 6,250 miles. The most important motor road is the *Route Royale Congo-Nil* (563 miles from Djamba, on the Rubi, to Redjaf, on the Nile. Another runs from Bukama (*viâ* Kanda-Kanda and Luebo) to Djoko-Punda, on the Kasai (625 miles). A complete system of telegraphic communication has been established throughout the Colony and is connected with the international system.

The West Coast District has rather scanty rain (40 inches), but on the Mayumbe Hills and in the whole interior the rainfall averages between 60 and 80 inches, and the country is very fertile and productive. Sleeping sickness, once very prevalent and destructive, is now decreasing. Extensive forests cover the central districts; oil palms are plentiful everywhere, and supply an ever-increasing trade in palm-oil and palm-kernels. Cotton, cocoa, rubber and coffee are successfully planted. The Colony is rich in minerals. Extensive radium deposits exist in the Katanga which has also enormous deposits of copper, and the smelters at the Lubumbashi produce about 10,000 tons monthly (1928). Bukama is the centre of an extensive tin-belt, and alluvial and reef gold are found in the North-eastern Congo. Diamond-bearing gravels are worked in the south. The chief exports are palm-kernels and palm-oil, cotton, cocoa, gum-copal, rubber, ivory, copper, gold, tin, radium, and diamonds. Capital, Leopoldville (pop. 2,766 whites). Principal towns, Boma (pop. 420 whites); Elisabethville (Katanga) (pop. 3,084 whites); Stanleyville, Eastern Province (752 whites); Coquilhatville (406 whites).

Ruanda and *Urundi* (ceded July, 1919) formed the N.W. corner of German East Africa from 5° S. lat. to the S. borders of (British) Uganda and have an area of about 15,000 square miles, with an estimated population of 3,000,000. They lie W. of the Victoria Nyanza and N.E. of Lake Tanganyika, through which are their respective outlets. The soil is poor, and the only exports are live-stock and hides. The administrative capitals are Nianza (Ruanda) and Kitega (Urundi), the commercial capitals being Kigali (Ruanda) and Usumbura (Urundi).

BOLIVIA.

(República Boliviana.)

President, Dr. Daniel Salamanca (*assumed office*, March 4, 1931.)
Vice-President, Señor José Luis Tejada Sorzano.

Envoy Extraordinary, Minister Plenipotentiary in London, Señor Don Carlos Victor Aramayo. 16 Grosvenor Place, W. 1.
1st Secretary, Señor Don Mamerto Urriolagoitia.
Secretary (*Specially Attached*), Señor Don Eduardo Aramayo.
Financial Counsellor, Señor Carlos Navarro.
Military Attaché, Col. Meliton Brito.
Attaché, Pastor Llobet.
Consul-General, Señor Don Mamerto Urriolagoitia, 16 Grosvenor Place, W. 1

The Republic of Bolivia extends between lat. 8° and 23° S. and long. 57° 30' and 73° W., and its area is officially estimated at 594,460 square miles (other estimates giving an area of 708,195 square miles), with an estimated population of 2,911,283. The Republic derives its name from its liberator, Simon Bolivar (born 1783, died 1830).

The chief topographical feature is the great central plateau (6,500 square miles) over 500 miles in length, at an average altitude of 12,000 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Illampu (Sorata), and Illimani, two of the highest peaks of the western hemisphere. The total length of the navigable streams is about 12,000 miles, the principal rivers being the Itenes, Beni, Mamoré, and Madre de Dios.

Mining and agriculture are the principal industries, the mineral productions being very valuable. The ancient silver mines of Potosi are now worked only for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes; the tin output is, after that of the Straits Settlements, the largest in the world, while copper, antimony, wolfram, bismuth, salt, and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, coca, indigo, india-rubber, cacao, potatoes, cinchona bark, medicinal herbs, &c. Manufactures are in a very undeveloped state. The principal exports are tin and silver ores, crude rubber, copper ores, bismuth, lead ores, wolfram, wool, coca, hides, and antimony; the chief imports are iron and steel products, textiles, machinery, sugar, flour, and coal. There are (1929) 1,314 miles of railways in operation, and the construction of a line from Cochabamba to Santa Cruz, in two sections of 115 and 110 miles respectively is in the preliminary stages. There are 4,000 miles of telegraph wire, and wireless services between Riberalta, La Paz, Cobija, Capitandi (Chaco). There is direct railway communication to the sea at Antofagasta (2 days), Arica (1 day), and Mollendo (2 days), and also to Buenos Aires (3½ days); branch lines run from Oruro to Cochabamba, and from Rio Mulato to Potosi. Construction on the railway between La Quiaca (on the Argentine frontier) and Atocha (in Bolivia) is now completed. There is through railway communication with Buenos Aires from La Paz. Communication with Peru is effected by rail to Guaqui and thence by steamer across Lake Titicaca to the railroad at Puno. The principal line is the Antofagasta and Bolivia railroad (719 miles), and a line from La Paz to the province of Yungas (the first section of which is open) may eventually connect with the steamers on the rivers Beni, Mamoré, and other tributaries. A line from Potosi to Sucre, the legal capital, is under construction, and trains run to Betanzos.

Bolivia is without a sea-coast, having been deprived of the ports of Tocopilla, Cobija, Mejillones, and Antofagasta by the "Pacific War" of 1879–1882 (*see* Chile). The Peace Army amounts to about 5,000, all ranks, the War Effective being about 105,000.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvares Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela; on the west by Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean; and extends between lat. 5° 10′ N. and 33° 45′ S. and long. 34° 45′ and 73° 59′ 22″ W., being 2,327 miles from north to south, and 2,321 from west to east; with a coast-line on the Atlantic of 3,577 miles. The Republic comprises an area of 3,298,870 square miles, with a population (Census 1920) of 36,635,605, estimated at 39,103,856 in 1928.

The northern States of Amazonas and Pará are mainly wide, low-lying, forest-clad plains. The central state of the Matto Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. In the extreme south, towards the interior, the land rises by gentle gradations to the height of 2,000 to 5,000 feet above sea level. The principal ranges are *Serra do Mar* in São Paulo; the *Serra*

Geral (Caparao 9,393 feet) between Minas Geraes and Espirito Santo, the *Serra do Mantiqueira* (Itatiaya, 9,163 feet), and the *Serra do Espinhaço* (Itacolumi, 5,748 feet), in the south-east of Minas Geraes; the *Serra do Paranán*, between Goyaz and Minas Geraes, the *Serra dos Aymores*, which divide Espirito Santo from Minas Geraes; and the *Serra da Gurgueia, Branca* and *Araripe*, which envelop Piauhý.

Brazil is unequalled for its rivers. The *River Amazon* has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic, with a total length of some 4,000 miles. Its principal northern tributaries are the *Napo* and Marañon, the *Putumayo* or *Ica*, *Rio Branco*, *Rio Negro*, and *Japurá;* its southern tributaries are the *Juruá*, *Purus*, *Madeira* and *Tapajos*, while the *Xingu* meets it within 200 miles of its outflow into the Atlantic. The *Tocantins* and *Araguaya* flow northwards from the Plateau of Matto Grosso and the mountains of Goyaz to the Gulf of Pará. The *Parnahyba* flows from the encircling mountains of Piauhý into the Atlantic. The *São Francisco* rises in the South of Minas Geraes and traverses Bahia on its way to the Eastern coast, between Alagoas and Sergipe. The *Paraguay*, rising in the south-west of Matto Grosso, forms a boundary with Bolivia on its way through Paraguay to its confluence with the *Paraná*, which rises in the mountains of that name and divides Brazil from Paraguay. On the Iguassu, which unites with the Uruguay at the Argentine boundary, are the majestic *Falls of the Iguassu*, and on the São Francisco are the no less famous falls of *Paulo Affonso*.

GOVERNMENT.—Brazil was colonised by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King João VI. of Portugal, the centenary of Brazilian independence being celebrated by an International Exhibition at the capital (Sept. 7, 1922, to July 2, 1923). On Nov. 15, 1889, Dom Pedro II., second of the line, was dethroned and a republic was proclaimed. The constitution rests on the fundamental law of Feb. 24, 1891, which established a federal republic under the name of *Estados Unidos do Brazil*. The President and Vice-President are elected for 4 years by the direct votes of all male Brazilians over 21 years who can read and write; they are ineligible for the succeeding term. They are aided, as an executive, by a Council of Ministers, who are responsible to the President and not to the legislature. Congress consists of a Senate of 63 members and of a Chamber of Deputies of 212 members; members of both houses are paid. The language of the country is Portuguese, foreign languages being read and spoken in the following order:—French, Italian, English, German and Spanish.

PRODUCTION.—The minerals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. The immense iron deposits have been scarcely touched. Manganese is exported, and there are important deposits of monozite sand. Low-grade coal deposits are in the south. Its agricultural produce is abundant and its forests are immense. Cattle-raising is an important industry, the number being 34,270,324 (Census of 1920). The chief products of the country are coffee, maize, sugar, raw cotton, hides and skins, cocoa, oleaginous fruits, *herva-maté*, rubber and tobacco: the rubber comes from the more northern provinces, especially the valley of the Amazon, and is shipped from Pará and Manáos; coffee coming chiefly from São Paulo. Tobacco and cocoa are grown largely, especially in Bahia. Cotton is being largely cultivated. Sugar-cane is grown in large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar-producing zone. The exports include also meat, hides, maize, beans, and *herva-maté* (tea). The principal imports are machinery, wheat, iron and steel products, cotton goods, and coal and coke.

Foreign trade of Brazil, 1930:—

Imports from:		Exports to:	
U.S.A.	£12,955,468	U.S.A.	£26,523,271

Portugal	1,047,293	Belgium	2,082,559

DEFENCE.—The peace effective of the Army is about 54,910 all ranks. The Navy consists of 2 Dreadnoughts, 1 battleship, 11 destroyers, 1 tender, 4 submarines, and some small vessels and aircraft.

EDUCATION.—*Primary* education is carried out by private initiative and at the cost of municipalities and States, in some cases with a Federal subsidy; there were 1,783,571 pupils in 1928. *Secondary and Technical* education is carried out by Federal, State and Municipal authorities, with 2,440 pupils in Federal schools, 7,975 in State and Municipal institutions, 42,061 in private schools, and 24,688 in technical institutes in 1928. Higher education (11,661 students in 1928) is carried out by Federal and State governments at the State *University* of Rio de Janeiro, and at the University colleges at Manáos (Amazones) and Curityba (Paraná) and other private colleges.

COMMUNICATIONS.—In January, 1930, there were 19,840 miles of railway open. Length of telegraph lines, about 75,000 miles. In 1928 steam and sailing vessels of 44,154,937 tons (of which 8,790,384 were under the British flag) entered Brazilian ports, the principal harbours being Manáos, Pará, Maranhão, Pernambuco, Maceio, Bahia, Victoria, Rio de Janeiro, Santos, and Rio Grande.

Press Secretary, Dr. T. Tchitchovsky.

The Kingdom of Bulgaria is bounded on the north by Rumania, on the west by Yugo-Slavia and Greece, on the east by the Black Sea, and on the south by Greece. The total area is stated at 39,824 square miles, with a population (Dec. 31, 1930) of 5,944,000. The prevailing religion of the Bulgarians is the Eastern Orthodox Church. For secular purposes, the Gregorian (Western) Calendar is in use.

A Principality of Bulgaria was created by the *Treaty of Berlin* (July 13, 1878) and in 1885 Eastern Roumelia was added to the newly-created principality. In 1908 the country was declared to be an independent kingdom, the area at that date being 37,202 square miles, with a population of 4,337,500. In 1912-13 a successful war of the *Balkan League* against Turkey increased the size of the kingdom, but in August, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of about 2,000 square miles to Rumania. On Oct. 12, 1915, Bulgaria entered the War on the side of the Central Powers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29, 1918, made an unconditional surrender to the Allied Powers. On Nov. 29, 1919, she signed the *Treaty of Neuilly*, which ceded to the Allies her Thracian territories (later handed over to Greece) and some territory on the western frontier to Yugoslavia.

GOVERNMENT.—The executive power is vested in the Tsar, and is exercised by a Council of Ministers, appointed by him. The legislature is a single chamber National Assembly or *Sobranyé* of representatives (1 per 20,000 inhabitants), elected for a maximum term of four years by adult manhood suffrage. Members receive 12,000 *leva* a month and free railway travel.

PRODUCTION.—About 80 per cent. of the population is agricultural, farming and small holdings, the principal crops being wheat, rye, barley, oats, maize, beans, tobacco, oleaginous seeds and sugar beet. The rearing of the silkworm is an important industry. The live-stock includes sheep, goats, cattle, pigs, horses, asses and mules. Rich and extensive brown and black coal deposits produce about 1,500,000 tons yearly for home needs, mainly from the State mine at Pernik. Certain areas are well mineralised with copper, lead, zinc, iron, manganese, etc., and also rock salt and bituminous shales. There is a variety of thermal and mineral springs, several of which have been modernised. The only minerals worked on a commercial scale are copper and lead. Local industry, encouraged by tariff protection and other inducements, is rapidly expanding, and

cotton and woollen textiles, chemicals, leathers, timber, oils, soaps and metal articles are being produced. The exports consist chiefly of cereals, oil seeds and cake, leaf tobacco and cigarettes, eggs, poultry, dairy produce, live-stock, flour, attar of roses, silk cocoons, minerals, nuts and skins. Imports include raw materials for textile and other industries, cotton and woollen piece goods, metals, agricultural and industrial machinery and appliances, motor cars, rolling stock, chemicals, tanning materials, leathers, mineral and vegetable oils, paper, timber, earthen and glass ware, colonial goods and food products.

DEFENCE.—Before the War of 1914-1918 service in the Army was universal and compulsory, and on a peace footing it numbered about 58,000, all ranks. During the War (Oct.-1915-Sept. 1918) about 560,000 passed into the ranks of the Army. By the *Treaty of Neuilly* the Bulgarian Army is limited to 20,000 all ranks.

EDUCATION is free and compulsory and the proportion of attendances is good; the number of illiterates in Bulgaria is comparatively small. There are several technical schools. Sofia has an Agricultural College and 2 Universities.

COMMUNICATIONS.—On Dec. 31, 1930, there were 15,015 miles of roads of which 10,090 miles were open, 4,055 miles under construction, and 868 miles traced. Of roads in actual use 4,718 miles were State and 4,716 miles Communal. There were 1,507 miles of normal and 296 miles of narrow gauge railway open in 1929. In 1930 there were 578 post and telegraph offices, 551 telephone exchanges with 17,225 subscribers (7,901 in Sofia). The principal Black Sea ports are Varna and Bourgas; and Rustchuk, Svistov, Vidin and Lom on the Danube. In 1930 the vessels engaged in foreign trade cleared at Black Sea ports numbered 788 (1,381,440 tons).

CHILE.

(República de Chile.)

President (Dec. 5, 1931-1937), Juan Esteban Montero.

Ambassador in London, Señor Don Enrique Villegas.
Chancery, 3 Hamilton Place, Park Lane, W.1.
1st Secretary of Embassy, Don Luis Renard.
1st Secretary of Legation, Don Carlos Nieto.
Commercial Counsellor, Don Jorge Buchanan.
Commercial Attaché, Don Santiago Monk.
Consul, Don Raul Cousiño, 56 Victoria Street, S.W.1.

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from the Rio Sama to Cape Horn south, between lat. 17° 15′ and 55° 59′ S., and long. 66° 30′ and 75° 48′ W. Extreme length of coast-line about 2,800 miles. Its extreme length is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain a great height—the highest being, in Aconcagua Provincia, 7,019 metres (23,025 feet) with many others over 20,000 feet. The chain, however, lowers considerably towards its southern extremity. There are no rivers of great size, and none of them are of much service as navigable highways. In the north the country is arid. Chile is divided into 16 provinces and 2 territories (Aysen and Magallanes) and the aggregate area is estimated at 289,798 square miles. In 1929 Chile signed a treaty ceding the province of Tacna to Peru but retained the province of Arica in return for a payment to Peru of £1,200,000.

The population (Census of 1930) was 4,287,445. Included in the population are four distinct racial divisions; (*a*) the Spanish settlers and their descendants; (*b*) the indigenous Araucanian Indians, Fuegians, and Changos; (*c*) mixed Spanish-Indians; and (*d*) European immigrants, who were represented in 1920 by 25,962 Spaniards, 12,360 Italians, 7,200 British and Irish, 8,950 Germans, 7,200 French and 5,000 Syrians. In 1929, the births numbered 176,030 (40·1 per 1000); marriages, 42,004 (9·6 per 1000); and deaths, 110,006 (25·1 per 1000).

GOVERNMENT. — Chile was discovered by Spanish adventurers in the 16th century, and remained under Spanish rule until 1810, when a

revolutionary war, culminating in the *Battle of Maypu* (April 5, 1818), achieved the independence of the nation. The present constitution was voted by an overwhelming majority at the plebiscite held on Aug. 30, 1925, and superseded that of May 25, 1833. It was drafted by a Committee appointed *ad hoc* by President Alessandri. In accordance with the new Constitution, the President is to be elected by direct vote of all Chilean citizens who have the right to vote. The National Congress consists of a Senate of 45 members, and of a Chamber of a number of Deputies to be fixed by a new electoral law in 1925. There is universal suffrage for persons who have attained the age of 21, can read and write, and are on the electoral roll.

PRODUCTION, &C.—Agriculture and mining are the principal occupations. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, hemp, Chile pepper, potatoes, onions and melons are grown extensively; the vine and all European fruit-trees flourish; the exportation of fruit to the United States is increasing yearly. Excellent wines are produced, and the Government is taking steps to develop their exportation. The live stock includes (1925) 1,918,433 cattle, 4,093,872 sheep, 323,581 horses, 357,033 goats, and 246,636 swine. The mineral wealth is considerable, the country being extremely rich in copper-ore, iron-ore and manganese ore. The production of bar copper in 1930 was 197,530 metric tons, Chile being the second greatest copper producing country in the world. The rainless north yields more especially nitrate of soda, iodine, borate of soda, copper, gold and silver, a large number of mines yielding both being in actual work in Tarapacá, Guanaco, and Cachinal in Atacama, and Caracoles in Antofagasta; the centre, copper, iron, manganese and silver; and the south, iron and coal (1,309,222 metric tons of coal were mined in 1930. In 1929-1930 the production of nitrate was 3,002,783 metric tons, the exports of this fertilizer being in the same period 1,794,024 tons. Early in 1930 a law was passed constituting a national nitrate company, to be called Compania de Salitro de Chile (*Cosac*), with a capital of £75,000,000 with State participation, to take over the whole of the nitrate industry, the export tax being abolished, and its place in the budget taken by a fixed payment to the Government during the first three years, and after that by the Government's share in the company's profits. There are smelting-works for copper and silver, tanneries, corn and saw-mills, starch, soap, biscuit, rope, glassware, paints, mineral waters, boot and shoe, hosiery, hat, cloth, cheese, furniture, candle, match, brush, cordage and paper factories, breweries and distilleries; and the domestic industry furnishes cloth, embroideries, baskets, and pottery. No. of industrial establishments in 1928 10,496, employing 96,983 persons; capital invested 2,205,244,660 pesos (nominal capital 1,402,282,150 pesos). The many ports favour commerce, and 13 lines of steamers connect the country with Panama and the Magellan Strait direct with Europe, a passage to Liverpool occupying from 30 days. The staple articles of export are nitrate of soda, iodine, oats, borax, frozen meat, wheat, copper bars and ores, silver ores, corn, flour, hides, wool, barley, honey and beans. The imports include silks, woollens and other textiles, food, and agricultural and mining machinery, and motor vehicles.

COMMUNICATIONS.—There were (1929) 5,428 miles of railway, of which 1,748 miles are British controlled. In April, 1922, a convention was signed by Chile and the Argentine for the construction of two more Trans-Andine lines. In 1929 there were 34,396 kilometres of telegraph, 909 post-offices, and 8,967 kilometres of telephone, with 13 public wireless stations. The mercantile marine (1929) numbers 119 vessels (143,769 tons). In 1929 1,083 vessels (3,473,392 tons) entered Chilean ports from abroad, and 18,558 coasting vessels (26,505,409 tons); legislation was passed in February, 1922, reserving the coasting traffic to vessels of the Chilean mercantile marine.

DEFENCE.—All able-bodied male citizens from 20th to 45th year must serve in the army for a training period. The peace effective of the active army is 19,000. The Air Force has a peace strength of 136 machines with 150 pilots and 1,000 mechanics. The navy consists of 1 battleship (recently renovated), 1 ironclad, 3 cruisers, 11 destroyers and 9 submarines, with a complement of 6,000 officers and 8,000 other ranks.

EDUCATION is free, and in July, 1920, elementary education was made compulsory, and 64·5 per cent. of the children attended the 3,732 schools in 1929 of a total on the registers of 564,966. There is a State University at Santiago. The National Library contains 293,085 volumes. The language of the country is Spanish and the religion is Roman Catholic.

Consul-General, London, Dr. Kuangoon Young, 6 Strathmore Gardens, W. 8.

AREA AND POPULATION.

Territory.	Square miles.	Population.
China Proper	1,532,800	414,011,519
Manchuria	363,700	22,083,434
Tibet	463,320	6,500,000
Chinese Turkestan ...	550,580	2,491,000
Mongolia	1,360,000	4,000,000
Total...	4,270,000	449,085,953

The estimated foreign population of China was as follows in 1925: British, 15,247; Japanese, 218,851; Russian, 79,785; American, 9,844; Portuguese, 3,739; German, 3,050; French, 2,576; the total being 326,841. Out of a total of 7,921 foreign firms in China, 725 were British, 1,141 Russian, 3,940 Japanese, 184 German, 377 American, and 229 French (in 1923).

China became a Republic on Feb. 12, 1912, with a President and Vice-President and an Executive Ministry, and a Legislature of a Senate (*Tsan Yi Yuan*) of 264 members and a House of Representatives (*Chung Yi Yuan*) of 596 members. The government of the 18 provinces is entrusted to civil and military governors, the latter (*Tuchun*) ranking first and holding practically all the powers of government; under them each province is subdivided into circuits superintended by *Taoyins* or intendants, and again into districts. All the territorial officials are appointed by the central Government, and the provincial governors, though free to act independently in many matters of local detail and finance, are responsible to the central Government at Peking in all important questions, and especially so in foreign affairs. The *Treaty of Kiakhta*, 1915, between China, Russia, and Outer Mongolia recognises the Hutukhta Khan as Ruler of Outer Mongolia, while China, as the Suzerain Power, appoints Residents at Urga and three other towns. *Mongolia* has since developed into an independent self-governing republic, and is in alliance with the *Soviet* Government at Moscow. The civil government of the three Manchurian provinces and of Turkestan is now similar to that of the province of China proper. The exact status of Tibet is still unsettled.

On Oct. 1, 1930, *Weihaiwei*, the island of *Liu Kung* and certain other islands, leased to Great Britain in 1898, were restored to China. The area comprised in the lease was about 285 square miles, with a population of about 170,000. On Jan. 15, 1931, the Belgian concession at Tientsin was also formally restored to China.

The revolution of 1911 brought out a victorious general in the person of Yuan Shih-kai, but from his death in 1916 until June 1928 his subordinates and their successors fought for supreme power. Presidential elections were held and their results disputed, and the Parliament elected in 1913 held occasional meetings in 1924, but its measures were not carried into effect. The Emperor (who had lived in the Imperial Palace since his enforced abdication) was stripped of his title and driven out of the Capital in 1924, and such government as existed in 1927 was centred in Peking (for Northern China), while the Kuomentung (People's National Party) was represented by a Nationalist Government at Canton (for Southern China). In June 1928 Peking was captured by the Nationalists, and the capital of the country was transferred to Nanking, and on October 10, 1928 (the anniversary of the outbreak of the Revolution at Wuchang in 1911), Chiang Kai-shek, the commander-in-chief of the victorious Nationalist armies, was installed as President of the Republic.

EDUCATION.—In 1918–19 there were 134,000 schools in operation, with 4,500,000 pupils. There is a University in Peking. In 1922 there were upwards of 1,250 Chinese newspapers and magazines, published at regular periods, in Peking, Shanghai, Tientsin, and the other large

centres, in addition to English and other Foreign daily newspapers.

COMMERCE.—The net trade of the open ports is stated as follows in *Haikwan taels.*

Year.	Imports.	Exports.	Total.
1914	569,241,382	356,226,629	925,468,011
1926	812,853,874	807,755,813	1,620,609,687
1927	1,012,932,000	918,620,000	1,931,552,000
1928	1,212,635,000	1,103,185,000	2,315,820,000
1929	1,265,778,821	1,015,687,218	2,281,466,039
1930	1,309,755,742	894,843,594	2,204,599,336

The import of Indian opium is now prohibited.

External Trade, 1930.

COMMUNICATIONS. — *Railways.* — About 7,000 miles were open in Jan. 1922, inclusive of the Manchurian lines, while 2,500 miles more are projected or under construction.

Shipping.—The China Merchants Steam Navigation Co. have a fleet of 31 ships of an aggregate tonnage of 60,000. Besides this, there are a large number of small vessels engaged in the coasting trade and on the Yangtse. In 1927 the total tonnage of the 154,275 vessels and junks entered and cleared at Chinese ports was 116,210,785 tons. Of these ships 33,791 (40,258,049 tons) were British, 27,105 (35,745,535 tons) Japanese, and 4,844 (5,577,115 tons) U.S.A. In June, 1918, a vessel of 14,750 tons, constructed at the Kiangnau Dock and Engineering Works at Shanghai, was launched and supplied to the order of the United States Shipping Board.

Telegraphs are being rapidly constructed by the Central Government, and Peking is in communication overland with Europe and Tibet, the line being extended to Lhasa. In 1922 there were about 50,000 miles of land lines and several high-power wireless installations.

CUSTOMS AND POSTS.—The Chinese Maritime Customs is the controlling service; this body consists of nearly 1,000 Europeans, a large proportion of them British subjects, all under the control of the *Inspector-General* (F. W. Maze.) By an Imperial Decree of May, 1906, the Maritime Customs Dept. was transferred from the Foreign Board to the Board of Revenue, and two Chinese Administrators-General were appointed. But the change has not materially affected the powers hitherto exercised by the Inspector-General. In addition to the collection of dues at the Treaty Ports, this service manages the lighting and navigation thereof, and keeps a small fleet of cruisers to enforce its regulations. The Chinese Post Office, formerly a branch of the Customs, was transferred in 1911 to the Ministry of Communications, and a Foreign Co-Director General, with a considerable foreign staff, was appointed; letters can be sent all over the 18 provinces at a uniform rate of 3 cents for 20 grammes. The number of Chinese post offices (1921) was 2,429, and of postal agencies 8,877. In 1922, 426,363,616 postal packets and 4,791,420 parcels were handled.

BUDGET (1930–1931).

Revenue	*Taels* 500,000,000
Expenditure	640,000,000

Chinese Debt (Jan., 1920).

War Loans outstanding	£30,000,000
Boxer Indemnity do.	48,000,000
Railway Loans do.	40,000,000
General Loans do.	50,000,000
Japanese Loans do.	30,000,000
Short term Loans do.	17,000,000
	£215,000,000

About 10*s.* 2*d.* per head of the population.

At the end of September, 1922, according to the official statement of the Ministry of Finance, the total debt was *taels* 1,906,000,000, or less than 5 *taels* (11*s.*) per head of the Chinese population. Included in the expenditure of 1919–20 is the sum of 214,000,000 *taels* towards repayment of debt.

OUTLYING TERRITORIES.

Manchuria lies to the north of China Proper, and has a total area of about 360,000 square miles, with a population estimated at 11,000,000. The capital is Mukden (pop. 250,000), a station on the Manchurian railroad and connected with the Russian system. Indigo, opium, cotton, tobacco, and various cereals are grown, and there is great mineral wealth.

Mongolia has an estimated area of about 1,360,000 square miles, and a population of 3,000,000 to 5,000,000, of whom the greater number are Buddhists. In 1915 Mongolia threw off its allegiance to China, and by the Treaty of Kiakhta was recognised as an Autonomous Republic. Negotiations with Russia, after the 1917 revolution, led to an alliance, and by Treaty (May 31, 1924) the U.S.S.R. acknowledge the suzerainty of China over Outer Mongolia.

North-West (or Outer) *Mongolia* covers an area of about 360,000 square miles, and consists of an elevated plateau bounded by the Russian Altai range (N.W.), the Sayans (N.E.), the Kentei (S.E.), and the Ektagh Altai (S.W.). The plateau contains many lakes and is watered by numerous rivers, among which are the headwaters of the Yenisei, the Irtish and the Selenga. Agriculture is almost unknown, but excellent pasture provides grazing grounds for numerous cattle and sheep, and particularly for transport animals (camels and oxen). The exports are wool, hides and skins, and gold. The chief centres are Urga (Kuren, or Ulan-Buotr-Khoto, "Town of the Red Knight"), Uliassutai, and Kobdo, all of importance as trading centres on the main caravan routes. Part of Outer Mongolia has declared itself independent of its suzerain as the Republic of *Tannu Tuva.* The districts affected lie between the Sayan and Tannu Ola ranges, the capital of the Republic being Chem Belder (or Krasuy, "Red Town").

Inner Mongolia covers an area of about 1,000,000 square miles and includes the *Gobi*

("Desert"), or *Sha-mo* ("Sand Desert"), which covers nearly one-third of the total area, and in the extreme south-east the *Ordos* Desert, bounded on the south by the Great Wall of China, and encircled on the north by part of the main stream of the Hwang-ho river. In the north-east of Inner Mongolia rises the Keru-lun, which flows into the Dalai Nor in Manchuria. Agriculture is carried on wherever Chinese influence has been exerted, but is mainly confined to the south-eastern borders. The principal industry (as in North-West Mongolia) is sheep and cattle raising and the breeding of camels, oxen and horses for transport, in order to supply the caravan routes from China to Siberia. The centres of population depend mainly upon the overland commerce of China and Eastern Russia across the Gobi, the general direction of the caravan routes being from south-east to north-west. The principal centres are: Kalgan, Kuku-khoto. Kuku-erghi, Dolon-Nor and Biru-khoto. In the north-east, Keru-lun (on the river of that name) is a junction of the southern routes from the Chinese province of Pechili and the western route from Urga, in N.W. Mongolia.

Tibet (area, 750,000 square miles; pop. 3,000,000) borders on British India. (*See* p. 677.)

Chinese Turkestan (or *Sinkiang*) has a total area of 600,000 square miles and a population estimated at 2,000,000. It includes *Zungaria* and Chinese *Tartary*, and provides sheep, cattle, and transport animals for the caravan routes. The chief centres are Kashgar and Urumchi. (*See* p. 677.)

CAPITAL OF THE CHINESE REPUBLIC, Nanking. Population (1928), 1,000,000.

Nanking, selected as the capital of China in 1928 in place of Peking, is the principal city in the province of Kiangsu, and the seat of the provincial government of Kiang-nan (embracing the three provinces of Kiang-su, Kiang-si and Ngan-hui. About 1000 A.D. it was named Kiang-nan, but in 1368 this was changed to Nanking ("Southern Capital.") The city is built on the south bank of the Yangtse Kiang river, about equidistant from Canton and Peking, and is connected by railway (192 miles) with Shanghai. *Peking*, the former capital, had an estimated population of 1,300,000 in 1921.

Shanghai comprises (*a*) the *International Settlement* administered by the Shanghai Municipal Council (for the defence of which British Forces were despatched), the estimated population being: 1,007,868 of whom 917,397 were Chinese, 18,478 Japanese, 6,221 British, 3,487 Russians; (*b*) the *French Concession*, an independent administration (population: Foreigners, 7,811, and Chinese, 297,720); and (*c*) the *Shanghai City*, *Chapei* and *Nantao* areas surrounding these settlements.

The population of the principal ports is estimated as follows:—Amoy, 400,000; Canton, 1,370,000; Changsha, 1,272,000; Chingkiang, 500,000; Chungking, 1,011,600; Foochow, 1,500,000; Hangchow, 729,950; Hankow, 290,000; Harbin, 365,000; Ichang, 450,000; Kiukiang, 380,000; Kiungchow, 590,000; NANKING, 1,300,000; Ningpo, 2,200,000; Shanghai, 2,000,000; Soochow, 1,100,000; Tientsin, 838,000; Tsingtau, 310,000; Wanhsien, 752,000; Wenchow, 1,750,000; Wuchow, 350,000.

FLAG: White sun on blue ground.

BRITISH LEGATION, PEKING.

Envoy Extraordinary and Minister Plenipotentiary, Sir Miles Wedderburn Lampson, K.C.M.G., C.B., M.V.O. (1926) £5,000
Counsellor, E. M. B. Ingram, O.B.E. (*acting*)

COLOMBIA

(República de Colombia).

President (1930–1934), Dr. Enrique Olaya Herrera, *born* 1867, *assumed office* Aug. 7, 1930.

Envoy Extraordinary and Minister Plenipotentiary in England, Señor Dr. Don Alfonso Lopez.
Counsellor, Don Jorge Garcés.
Attachés, Sr. Dr. Don Bernudo Samper; Sr. Dr. Don Camilo Cruz Santos.
Consul-General, Don Alejandro Lopez, 7 Sicilian Avenue, Southampton Row, W.C. 1.
Consul-General in Liverpool, Señor Don Carlos Vernaza, 41 North John Street.

The Republic of Colombia lies in the extreme north-west of South America, having a coast-line on both the Atlantic and Pacific Oceans. It is situated between 2° 40′ S. to 12° 25′ N. lat. and 68 to 79° W. long., with an estimated area of 461,606 square miles, and a population (Census 1928) of 7,851,000, of whom more than one-half are whites and half-castes. The country is intersected by three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important, as it consists of a series of vast table-lands, cool and healthy. This temperate region is the most densely-peopled portion of the Republic.

The principal rivers are the Patia, Cauca, Magdalena, Caquetá and Putumayo. The Patia flows through the famous *Minima Gorge* of the Western Cordilleras, and one of its tributaries (the Carchi, or Upper Guiatara) is spanned by the Rumichaca Arch, or *Inca's Bridge*, of natural stone. On the Funza is the Great *Fall of Tequendama*, 480 feet in height.

The Colombian coast was visited in 1502 by Christopher *Columbus*, and in 1536 a Spanish expedition under Quesada established a government of certain coastal communities under the name of New Granada, which continued under Spanish rule until the revolt of the Spanish-American colonies of 1811-1824. In 1819 *Simon Bolivar* (born 1783, died 1830) established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Venezuela and Ecuador. In 1829-1830 Venezuela and Ecuador withdrew from the association of provinces, and in 1831 the remaining territories were formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in 1861 to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panama seceded from Colombia, and is now a separate Republic.

The Colombian forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal; petroleum is available in enormous quantities, and in the year 1930 the output was 20 346,000 barrels; it is possible that new oilfields will shortly be opened near the Venezuelan frontier. The principal agricultural products are coffee, cotton, plantains, and bananas, and in some parts tobacco, wheat and other cereals. Manufactures, for home consumption, consist of woollen and cotton stuffs. The chief exports are coffee, petroleum, gold, bananas, and hides. All religions are tolerated.

The standing army consists of about 10,000 men; the navy has been nearly abolished. Railroads are in their infancy, about 1,800 miles being open in 1930, with 21,900 (1928) miles of telegraph; there are (1930) also 3,589 miles of motor roads. There is a daily passenger and mail service (German) between Bogotá and Barranquilla and a bi-weekly service in concert with Pan-American Airways to the U.S. New York can be reached in 3½ days and mail is delivered in England 11 or 12 days after leaving Bogotá. There are wireless stations at Barranquilla, Bogotá, Medellin, Cali and Cúcuta.

Spanish is the language of the country.

COSTA RICA.

(República de Costa Rica.)

President (1928–1932), Cleto Gonzalez Viquez, *assumed office* May 8, 1928.
Minister of Foreign Affairs, Leonidas Pacheco.

Minister in London (vacant).
Consul-General, London, John C. Eggers, 33–36 King William Street, E.C. 4.

The Republic of Costa Rica, the most southern State of Central America, extending across the isthmus, between 8° 17′ and 11° 10′ N. lat. and from 82° 30′ to 85° 45′ W. long., contains an area of about 23,000 English square miles, and a population (Jan. 1, 1931) of 516,031.

For nearly three centuries (1530–1821) Costa Rica formed part of the Spanish-American dominions, the seat of government being at Cartago. In 1821 the country joined in the War of Independence, and from 1824–1839 it was one of the United States of Central America.

The principal agricultural products are coffee, bananas, rice, maize, sugar-cane, potatoes, cocoa and beans, the soil being extremely fertile. The chief exports (1930) are coffee (£2,129,500), bananas (£894,243), cacao, gold and silver bullion, skins and hides, fresh fruit and timber. The imports are dry goods, hardware, provisions, railway materials, machinery, paints, and general merchandise (in 1930, 50 per cent. from United States, 12·13 from United Kingdom, 12·28 per cent. from Germany).

The chief ports are Limon, on the Atlantic coast, through which passes the bulk of the important banana trade with the U.S. and U.K., as well as by far the larger part of the other exports and imports; and Puntarenas on the Pacific coast. In 1930, 595 vessels (1,313,078 tons) entered at Costa Rican ports. About 420 miles of railroad were open in 1929. In 1930 there were 205 post offices, and 205 telegraph offices (3 wireless), with 2,612 miles of telegraph and telephone line. A considerable amount of English capital is embarked in the Republic. Spanish is the language of the country.

CUBA.

(Repúblics de Cuba.)

President of the Republic, Gen. Gerardo Machado (*assumed office*, May 20, 1925; *re-elected and assumed office* May 20, 1929 *until* 1935).
Foreign Affairs, Dr. José Clemente Vivanco.

Minister in London, Señor Dr. Don Guillermo Patterson. *Legation*, 30 York Terrace, Regent's Park, N.W. 1.
Counsellor of Legation, Dr. Don Gabriel Suarez Solar.
2nd Sec., Señor Don Alberto Diaz Pardo.
Commercial Attachés, Señor Don Ramon Vasconcelos Maragliano; Señor Don Luis Marino Perez.
Consul, Señor Don Francisco Sanchez Garcia, 95 Linden Gardens, Notting Hill Gate, W. 2.

Cuba (the largest of the "West India" Islands) lies between 74° and 58° W. long., and 19° and 23° N. lat., with a total area of 44,178 sq. miles and a population of 3,661,582 (June 30, 1930).

The island of Cuba was visited by Christopher Columbus, during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the 16th century the island was conquered by the Spaniards, to be used later as a base of operations for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. The slave trade was abolished early in the 19th century, and the slaves were emancipated from 1880–1886. The government of Spain was marked by a generally corrupt administration, complicated by internal unrest fomented by external influences, and the various attempts at independence met with severe military repression. The separatist and autonomous agitation culminated in the closing years of the 19th century in a fierce and bloodthirsty war, and although a conciliatory movement was evinced by the Madrid authorities in 1897, the struggle was continued by the party of separation in the island. In 1898 the government of the United States put into execution a threat of interference by the despatch of the battleship *Maine* to Havana harbour, and in February of that year the vessel was sunk by an explosion, the cause of which appears likely to remain an unsolved mystery. On April 20, 1898, the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. From Jan. 1, 1899, to May 20, 1902, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were

instituted. On May 20, 1902, an autonomous government was inaugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from July to Sept., 1906, when the U.S. Government resumed control. On Jan. 28, 1909, a republican government was again inaugurated.

Of the total area of 28,000,000 acres, only about 1,375,000 acres are cultivated, 50 per cent. of these being under sugar cane and 30 per cent. under tobacco, sweet potatoes and bananas. Rice, coffee, cocoa and maize are also grown and tropical fruits (oranges, coco-nuts, pineapples, &c.) flourish. The chief agricultural products of the island are tobacco and sugar; sugar crop 5,157,222 tons (1928-9), 4,671,230 tons (1929-30); the chief product of the forests is mahogany, while cedar is also used for boxing the tobacco crop. The live stock includes about 4,500,000 cattle and 600,000 horses, the vast savannahs of Central Cuba being particularly suitable for cattle ranges.

3,600 miles of railroad are open and about 6,000 miles of telegraph line; there are about 1,500 miles of roads.

Spanish is the language of the island.

Consul, Josef Bujnák, 18 Bedford Square, W.C. 1.

Part of the Austro-Hungarian Monarchy declared its independence on Oct. 18, 1918, as the Czechoslovak Republic, and ten days later the *Národní Výbor* (National Council) of Czechoslovakia took over the administration of the independent territories. The political neighbours of the Republic are the Austrian and Hungarian Republics on the S., the German and Polish Republics on the N., the German Republic on the W., and the Polish Republic and the Kingdom of Rumania on the E. Within these limits are the former Austrian Provinces of Bohemia and Moravia and part of the Province of Silesia; and Northern Hungary from the Danube (at Bratislava, on the Austrian frontier) to the Carpathians (at the headwaters of the Ung River in the eastern slope of Mt. Vereezka) —a total area of about 54,877 sq. miles, with a population (Census of 1930) as under:—

Bohemia	7,106,766
Moravia and Silesia	3,563,157
Slovakia	3,330,885
Subcarpathian-Russia	725,350
Total	14,726,158

Of the total population it is estimated that 65·5 per cent. are Czechoslovaks, 23·3 per cent. Germans, 5·5 per cent. Magyars, 3·4 per cent. Ruthenians, and 0·5 per cent. Poles. The new State was recognised by Austria in 1918 and by Hungary on March 10, 1919. The National Assembly, consisting of a Senate and a Chamber of Deputies, is elected by universal adult suffrage of both sexes. The executive power is exercised by a Council of Ministers, appointed by the President. The coalition of Czech parliamentary parties (which with short intervals had monopolised the executive from the foundation of the Republic) broke up in the Spring of 1926. For a time the Government was carried on by a non-parliamentary cabinet. At present a coalition of the Czech, German and Slovak "bourgeois" parties are in office. In the present Ministry two portfolios (those of Justice and Public Works) are, for the first time, held by representatives of the German minority, and in January, 1927, two representatives of the Slovak Peoples (Catholic) Party joined the Ministry. The Constitution guarantees religious and political freedom. About 80 per cent. of the people are Roman Catholics.

By the Peace Treaty Czechoslovakia acquired about 80 per cent. of the whole industry of the former Austrian Empire. It has several rich coalfields, and possesses valuable mineral resources which, notably in Slovakia, have not yet been fully developed. Radium, gold, silver, iron, graphite and lead are all mined, while the whole country is rich in mineral and thermal springs. Bohemia has rich deposits of clay, kaolin and sand. The whole country is well farmed, and agricultural production is on a very high level of excellence. In foodstuffs, however, the country is not self-supporting. Thirty-three per cent. of the total area of the country is forest land, and both in the productiveness of the forests and the quality of the timber the forest wealth of the Republic is enormous. In its industrial development Bohemia may be compared to Belgium. In Bohemia, Moravia and Silesia, which have a total population of 10½ millions, more than four million people are engaged in industry. The various industries are well organised, and as regards both machinery and modern improvements the factories are as well equipped as any in Europe. Except in Slovakia and Ruthenia illiteracy is almost unknown, and both the German and Czech elements which compose the working-class population are hard-working and in many cases highly skilled. The new Republic possesses, therefore, many valuable economic advantages, and it is no exaggeration to state that Czechoslovakia is in a far more flourishing state than most of its neighbours.

Czechoslovakia has no direct access to the sea, but has a right of access over the Elbe and Oder to Hamburg and Stettin, for which purpose the Government proposes to canalise the Upper Elbe in order to connect it with the Oder and the Danube. If this proposal is carried out, the country will be traversed by a waterway affording a communication from the North Sea and Baltic, *viâ* the Danube, to the Black Sea.

Liberec (Reichenberg)—Vice-Consul, S. P. Elliott.

DANUBE COMMISSIONS.

The *International Danube Commission* (Headquarters, Vienna) was created by the Treaty of Versailles (1919), the States represented under the Treaty being Austria, Bavaria, Bulgaria, Czechoslovakia, France, Great Britain, Hungary, Italy, Rumania, Württemburg, and Yugoslavia. The Commission maintains the liberty of navigation and the equal treatment of all flags of the Danube from Ulm (Württemburg) to Braila (Rumania) and its international system, obtaining funds for administrative expenses from equal contributions of all the States represented. From Braila to Sulina (the mouth of the Danube), the navigation is controlled by the *European Commission of the Danube* (Headquarters, Galatz), created by the Treaty of Paris 1856, after the Crimean War; the representation on this Commission is confined to France, Great Britain, Italy and Rumania. The river is connected by canals with the Main, a tributary of the Rhine (Ludwig Canal); a new and deeper canal is under construction to permit the passage of larger craft than at present, thus linking up the whole Rhine and Danube systems across Europe from the North Sea to the Black Sea. The total length of the river is about 1,738 miles, and ocean-going vessels reach Braila, where transshipment into river barges is necessary. A pilotage and river-improvement service is maintained by the International Commission at the Iron Gates (headquarters, Orsova), the expenses being met by shipping dues.

The chief towns on the Danube are the Black Sea port of Sulina, with Galatz (confluence of the Sereth), Braila, Turnu-Severin and Orsova (Iron Gates), in *Rumania*; Russchuk, Vidin and Lom Palanka, in *Bulgaria*; Belgrade, the capital of *Yugoslavia*; Buda-Pest, the capital of *Hungary*; Bratislava in *Czechoslovakia*: Vienna (the seat of the Commission), and Linz, in *Austria*; Passau and Regensburg, in *Bavaria*: and Ulm, in *Württemburg*.

The financial situation of the European Commission is shown below:—

	Gold francs
Receipts during 1929	4,652,550
Expenditure, 1929	3,807,530

The receipts consist almost entirely of navigation dues (5,030,653 francs in 1927). The expenditure (1927) included 2,062,191 francs on the prolongation and strengthening of the embankments at Sulina, and 251,507 francs in repayment of the British portion of the loan raised by the Commission in 1924.

THE INTERNATIONAL DANUBE COMMISSION.

British Delegation, Col. Sir John G. Baldwin, K.C.M.G., C.B., *Plenipotentiary Commissioner (Delegate)*; O. S. Phillpotts, O.B.E., *Commercial Secretary (Asst. Delegate)*.

EUROPEAN DANUBE COMMISSION.

British Delegates, Col. Sir John G. Baldwin, K.C.M.G., C.B. (*Plenipotentiary Commissioner*); T. B. Wildman (*Deputy Commissioner*).

DANZIG.

(Freie Stadt Danzig.)

Under Articles 100 and 102 of the *Treaty of Versailles*, the City of Danzig with the surrounding territory (constituting a total area of about 726 sq. miles, with a population estimated at 390,000) was set up as a Free City, under the protection of the League of Nations, Poland undertaking to conduct her Foreign Affairs. The Free City was constituted Nov. 15, 1920, with an executive Senate and an elected Legislature of 72 members. The harbour is administered by a mixed board of Poles and Danzigers under a neutral President, and the League of Nations is represented by a resident High Commissioner. In Jan., 1922, the Free City entered the Polish Customs Union. The principal exports are coal, timber, cereals, cement, bacon, eggs, mineral oils and sugar, and the imports herrings, iron ore, machinery, scrap-iron, artificial manures, fats, foodstuffs and textiles. The tonnage of ships entered in 1930 was 4,143,098 tons, and of those cleared 4,142,802 tons.

Danzig — High Commissioner of League of Nations, Count Manfred Gravina.

Vice-Consul, Birger Dons Möller.
Consulates at Falmouth, Hull, Liverpool, Manchester, Newcastle-on-Tyne, Glasgow, Leith and Belfast.

A Kingdom of Northern Europe, and the smallest of the Northern States, consisting of the islands of Zeeland, Fünen, Lolland, &c., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34′—57° 44′ N. lat. and 8° 5′—12° 40′ E. long., with an area of 15,042 square miles, and a population (Nov. 5, 1930) of 3,551,000. Nearly one-half of the population live exclusively by agriculture, and one-fourth by manufactures and trade.

In 1864 Denmark was attacked by Prussia and Austria and deprived of Schleswig-Holstein (Prussia taking the whole territory after a further war with Austria in 1866). At the conclusion of peace between the Central Powers and the Allies in 1919, the question of Schleswig-Holstein was subjected to a plebiscite of the inhabitants, and North Schleswig is now part of Denmark.

The common products are wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep, and butter. Its manufactures are, for the most part, for home consumption. Its principal imports are coals, manufactured goods (woollens, silks, cottons) iron, hardware, wine, fruit, coffee, tea, maize and colonial produce. In 1930, 1,323,000 hectares were under corn crops, 32,800 sugar beet, 411,000 forage roots, and 797,800 hay crop. In July, 1930, the live stock numbered 494,500 horses, 3,057,400 cattle, 193,000 sheep, and 4,871,900 swine. The crops in 1930 included 9,976,000 hkg. (hkg. = 100 kilogrammes) of oats, 10,510,000 of barley, 2,547,000 rye, 7,496,000 mixed corn, and 2,780,000 qrs. of wheat. Its chief exports are agricultural produce, including wheat and barley, bacon, hams, flour, butter, eggs, hides, skins, corn-meal and oil-cake, horses, and cattle. Sea-going mercantile marine (1930) 599 steamers, with a gross tonnage of 735,490. There are (1930) 5,294 kilometres of railway and 12,053 km. of telegraph line.

DEFENCE.—The Army consists of about 12,000 trained men, the vote for 1930-31 amounting to Kr. 35,000,000. The Navy consists of 4 coast-defence ironclads and 1 completing, 2 small cruisers, 23 torpedo-boats (built and building), 14 submarines (built or building). Vote, 1930-31, Kr. 22,000,000.

EDUCATION is free and compulsory, the schools being maintained by local taxation. Special schools are numerous, technical and agricultural predominating. There are Universities at Copenhagen and Aarhus.

The outlying possessions and colonies of Denmark have an area of about 50,000 square miles, with about 40,000 inhabitants. They include the FAROE, or Sheep Islands (515 sq. m., pop., 1930, 24,200); GREENLAND (ice-free portion about 50,000 sq. m., total area about 830,000 sq. m., population, 1921, 14,400), the trade of which is a Government monopoly.

Copenhagen, distant 728 miles; transit, 36 hours.

DOMINICAN REPUBLIC.

(República Dominicana.)

President (1930), General Don Rafael Trujillo, *Sworn in*, Aug. 16, 1930.
Vice-President and Minister for Foreign Affairs, Señor Lcdo. Rafael Estrella Ureña.
Envoy Extraordinary and Minister Plenipotentiary in London, Señor Rafael Brache, 13 Onslow Gardens, S.W. 7.
Secretary of Legation and Consul-General, Señor Dr. Don Conrado Licairac.
Consul, Señor Octavio Ventura.
Vice-Consul, Señor A. M. Ventura.

The Republic of Santo Domingo, formerly the Spanish portion of the island of that name, is the oldest settlement of European origin in America. The island was discovered by Christopher Columbus in December, 1492, who named it "La Española" or "Little Spain." In 1496 he ordered his brother, Bartholomew Columbus, to found the capital at the mouth of the Ozama River, on the south of the island, which city he called Santo Domingo. The island immediately became the objective for adventurous Spanish colonists, who exploited the native Indians almost to the point of extermination for the sake of the gold found in the streams. African negroes were imported for the sugar and other plantations both in Santo Domingo and Haiti, and this accounts for the present large proportion of negroid blood in both countries. A short time after its discovery Santo Domingo became the "jumping-off point" for other adventurers proceeding from Spain to the newly-found mainlands of the western hemisphere, and this greatly diminished the importance of the island and caused an exodus to those places.

In 1821 Santo Domingo broke away from Spain and declared itself independent, but in 1822 it was invaded and subjugated by its negro neighbours from the west, the Haitians. The latter were driven out in 1844, when the Dominican Republic was definitely proclaimed by the natives, and has so remained except for an interregnum of two years (1862-1864) when the Spaniards again took possession, but were eventually forced to withdraw.

On November 29, 1916, American military forces landed in Santo Domingo and a Military Government was proclaimed. From October 21, 1922, a Provisional Dominican Government was in office until July 12, 1924, when a properly elected Constitutional Government was installed, with complete authority over all matters except the collection of the customs and the redemption of foreign obligations, which continue to be administered by an American official.

The Dominican Republic comprises an area of about 19,322 square miles, with a population estimated at 1,000,000. An extensive system of motor highways, totalling nearly 700 miles of first class roads, has been built, but they have been allowed to fall into very poor condition for want of proper maintenance. There is a direct road from Santo Domingo City to Port-au-Prince, the capital of Haiti, enabling the journey from capital to capital to be made in one day. There are about 150 miles of public railway, and a telephone system connects practically all the towns of the republic. There are six wireless stations, and the All America Cable Company maintains an efficient service with all parts of the world.

Sugar and cocoa beans are the most important crops, and coffee and tobacco are grown in fair quantities, the other products being mahogany, furniture woods, lignum vitae, log-wood, dividivi, cotton, wax, honey, maize, hides and turtle-shell.

The total import trade in 1930 was $15,229,219, of which 56·12 per cent. came from the United States, 7·04 per cent. (rice) from British India, and 5·88 per cent. from the United Kingdom. British trade is hampered by distance (as compared with the U.S.), by lack of resident British merchants and industrial undertakings, and by indifferent and slow steamship services from Europe.

	1929. (U.S. $)	1930. (U.S. $)
Receipts	$13,984,860	$9,975,674

ECUADOR.

(República del Ecuador.)

Minister of Interior, in charge of the Executive Power, Dr. Alfreda Baquerize.
Minister of Foreign Affairs, Sr. Carlos Manuel Larrea.
Education, Dr. Francisco Pérez Borja.
Finance, Sr. Juan D. Martínez Mera.
War and Marine, Sr. Leonardo Sotomayor.

Minister in London, (vacant).
Chargé des Archives, Sr. Carlos Arrarte.
Consul-General in London, Sr. Carlos Arrarte, 23 College Hill, Cannon St., E.C. 4.
Consuls at *Liverpool*, *Birmingham*, *Hull*, *Glasgow*, and *Cardiff*.

An equatorial State of South America, extending from lat. 1° 38′ N. to 6° 5′ S., and between 60° 20′ and 81° W. long. (according to the Ecuadorian geography, but there are boundary disputes with Peru), comprising an area of 276,000 English sq. miles.

The former *Kingdom of Quito* was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century *Pizarro's* conquests led to the inclusion of the present territory of Ecuador in the Spanish Vice-Royalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount Pichincha (May 24, 1822).

The Republic of Ecuador is divided into 17 provinces and one territory. It has a population of about 2,000,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The territory of the Republic extends across the Western Andes, the highest peaks of which are Chimborazo (20,702 ft.), Iliniza (17,405 ft.), Carihuairazo (16,515 ft.), Cotocachi (16,301 ft.), and Pichincha (16,000 ft.) in the Western Cordillera; and Cotopaxi (19,498 ft.), Antisana (18,864 ft.), Cayambe (19,160 ft.), Altar (17,730 ft.), Sangay (17,464 ft.), Tungurahua (16,690 ft.), and Sincholagua (16,365 ft.) in the Eastern Cordillera. Ecuador is watered by the Upper Amazon, and by the rivers Guayaquil, Mira, Santiago, Chones, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common. The *Witch-broom* disease, which appeared (1921) in the cocoa plantations, has had a disastrous effect on the agricultural wealth of the country. The average yearly output previous to 1921 was one million quintals (of 100 lb.) as compared with 335,052 quintals in 1929 and 387,424 in 1930.

Its chief products are cocoa, petroleum, rice, vegetable ivory, bananas, cotton, coffee, india-rubber, sugar, orchella weed, straw hats and hammocks, bark, yams, tobacco, fruits, sarsaparilla, wheat, &c. Its minerals consist of gold, quicksilver, lead, iron and copper; emeralds and rubies are occasionally met with, and sulphur is found in many parts. The chief exports are cocoa, petroleum, caoutchouc, vegetable ivory and gold, cinchona bark, Panama hats, coffee, and cattle; the chief imports are textile machinery, foodstuffs, and manufactured goods. A railroad connecting Guayaquil and Quito was opened in 1908. The *Galápagos* (Tortoise) *Islands* (2,870 square miles) belong to Ecuador.

In October, 1926, an American Financial Mission arrived in the country and their recommendations have been enacted as laws. A new customs tariff, prepared by the Mission, came into force on July 1, 1927, and produced 26,727,725 *sucres* in the year ended Dec. 31, 1928, 26,249,203 *sucres* in 1929, but only 11,221,132 *sucres* in the first six months of 1930, and a new monetary law reintroducing the gold standard, the currency being stabilized at 5 *sucres* = $1 U.S. A Central Bank was established on March 4, 1927, and a new banking law enacted.

In November, 1927, the Swedish Match Company of Stockholm secured the exclusive right to import and manufacture matches in Ecuador for a period of 25 years in return for a loan of 8,800,000 *sucres*, which sum was applied towards the establishment of a Mortgage Bank.

The language of the country is Spanish.

Egyptian Minister in London, H.E. Hafez *Pasha* Afifi.
Offices of Legation, Bute House, 75 South Audley Street, W. 1.
Counsellor, and Chargé d'Affaires ad interim, (vacant).
2nd Secretary, Georges Cattaui *Effendi*.
2nd Secretary, Radi Abou-Seif Radi *Effendi*.
Attaché, Hassan Moharram *Effendi*.
Archivist, Mohamed Mostafa Yassin *Effendi*.
Asst. do., Stagiaire Hassan Abdel Gaffar *Effendi*.
Consul, Mohammed Hussein *Effendi*.

The territory of Egypt comprises (1) *Egypt Proper*, forming the N.E. corner of the African continent, divisible into (*a*) the valley and delta of the Nile, (*b*) the Libyan or Western Desert, and (*c*) the Arabian or Eastern Desert; (2) *The Peninsula of Sinai*, forming part of the continent of Asia; and (3) a number of *Islands* in the Gulf of Suez and Red Sea, of which the principal are Jubal, Shadwan, Gafatin and Zeberzed (or St. John's Island). This territory lies between 22° and 32° N. lat. and 24° and 37° E. long. The northern boundary is the Mediterranean, and in the south Egypt is conterminous with the Sudan. The western boundary runs from a point on the east, N. of Sollûm (long. 25′ E.), inland in a south-westerly direction for some distance and then turns S. along a meridian line approximately in long. 24° E. until it meets the parallel of 22° N. lat., which forms the N. boundary of the Sudan. The E. boundary follows a line drawn from Rafa on the Mediterranean (34° 15′ E. long.) to the head of the Gulf of Aquaba, from which point the remainder of the E. boundary is washed by the waters of the Gulf of Aquaba and the Red Sea. The "settled land area" is stated officially at 7,667,000 *feddâns* (12,431 square miles) and the area of lakes at 641,000 *feddâns* (1,039 sq. miles), a total of 8,308,000 *feddâns* (13,470 sq. miles); but within the boundaries above-mentioned is enclosed an area of about 363,781 sq. miles. The population (Census of 1927) numbered 14,168,756, distributed as under:—

Division.	Population. 1917 Census.	Population. 1927 Census.
LOWER EGYPT:—		
Alexandria	444,617	570,314

Total	5,186,872	5,692,544
Nomads	32,663	35,462
TOTAL	12,750,918	14,168,756

Of the total population in 1917 males numbered 6,369,517 and females 6,348,738; in 1927, males numbered 7,036,298 and females 7,096,996 (Nomads being excluded in each case).

Physical Features.—The Nile valley varies in width from less than half a mile in the southern granitic region to over 10 miles in the northern limestone region, and the cliffs in some places rise to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they

* A *Waqf* is an institution of Muhammadan Law similar to the "trust" of English law. When property is made *Waqf* it is dedicated expressly or implicitly to some charitable or religious object, or for the benefit of private individuals. The nearest British equivalent is "The Public Trustee."

(†) Dahkla and Kharga Oases. (‡) Including Siwa Baharia and Farafra.

spread out into the irregular fan-shaped formation of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country. The *Nile* has a total length of 3,470 miles from the Victoria Nyanza to its mouths. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river has a regular yearly rise and fall, attaining its maximum level about the middle of September and its minimum about the end of May. At Cairo the average rise and fall is about 13 feet. Westward from the Nile Valley into Tripoli stretches the *Libyan Desert*. Though as a whole it constitutes one of the most arid and inhospitable regions of the world, the Libyan Desert contains a number of depressions wherein wells and springs furnish water in sufficient quantity to irrigate small areas and to support populations of several thousands. These depressions are the *Oases*, of which the principal from S.E. to N.W. are known as Kharga, Dahkla, Farafra, Baharia, and Siwa. On the eastern edge of the Libyan Desert, a few miles south-west of Cairo, stand the Pyramids of Giza, of which the highest, the *Great Pyramid*, is 451 feet high. Close to the pyramids is the *Great Sphinx*, 189 feet long. In the Eastern Desert a great back-bone of high and rugged mountains extends north-westward from Abyssinia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile, are plateaux of sandstones and limestones, dissected by wadis (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main *wadis* from well to well, and here and there are to be found small encampments of wandering Arabs. The north (Mediterranean) coast of Sinai is flat and sandy. Inland, the ground gradually rises into a highly dissected limestone plateau, which extends southward for about 150 miles and terminates in the great scarp of El Tih. South of El Tih the character of the country abruptly changes, the southern third of the peninsula being formed of rugged granitic mountains intersected by deep ravines. Springs and wells occur in fair abundance, mostly in the *wadis*, and running water (mostly brackish) is found at a few points.

Native Population.—There are three distinct elements in the native population of Egypt. The largest, or "Egyptian" element, is a Hamito-Semite race, known in the rural districts as *Fellahin* (*fellâh* = ploughman, or tiller of the soil). The *fellahin* have been mainly Muhammadans since the conquest of the country in the 7th century, but 834,474 Coptic Christians are enumerated in the towns and villages. These Egyptian townsmen and peasantry numbered 12,404,942 in the total of the Census of 1917 (including 126,432 local subjects of foreign origin). A second element is the *Bedouin*, or nomadic Arabs of the Libyan and Arabian deserts (32,663 Bedouins and 107,364 Sudanese and Berbarin), of whom about one-seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated land of the Nile Valley and the Fayûm. The third element is the *Nubian* of the Nile Valley between Aswân and Wadi-Halfa, of mixed Arab and negro blood. The Bedouins and Nubians are Muhammadans.

Foreign Population.—At the Census of 1917 the foreign residents were 205,998, of whom 30,797 were Turks, 56,731 Greeks, 40,198 Italians, 24,354 British, 21,270 French and Tunisians, 2,789 Austro-Hungarians, 4,225 Russians, 157 Germans, 23,932 other Europeans and Americans, and 1,496 Persians.

Religions.—At the Census of 1917 there were 11,623,753 Muhammadans, 1,026,107 Christians, 59,581 Jews and 8,814 other religions. The chief Muhammadan religious authorities in Egypt are the *Sheik el Gami el Azhar* and the *Mufti el Di-yâr el Masriya*.

Government.—From B.C. 30 to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christian inhabitants were subjugated by Moslem invaders, and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire, and was governed by pashas sent from Constantinople until the beginning of the 18th century, when for about 100 years the ruler was chosen from among the Mamelukes, or bodyguard. *Mohammed Ali*, who was proclaimed *Pasha* in 1805, exterminated the Mamelukes in 1811, and was eventually made hereditary governor of Egypt and the Sudan by a *firman* from the Sultan of June 1, 1841.

Rulers of Egypt since 1811.

Name.	Born.	Reigned.
Mohammed Aly (*Vali*)	1769 ...	1805-1848
Ibrahim (*Vali*).....	1789 ...	1848

Hussein Kamel (*Sultan*)....	1853 ...	1914-1917
Fuad I (*King*).....	1868 ...	1917-

Legislature.—Legislative power is exercised by the King in concurrence with the Parliament within the limits laid down in the Constitution established by Royal rescript of April 19, 1923, and general elections took place for a Parliament, consisting of two houses, which first assembled March 15, 1924. Parliament consists of a Senate of 121 members of whom two-fifths are nominated by the King, the remainder being elected on the basis of 1 Senator for every 180,000 inhabitants; and of a Chamber of Deputies elected on the basis of 1 for every 60,000 inhabitants.

Executive.—The executive power is exercised by the King through his Ministers within the limits of the Constitution, the Ministry being held jointly responsible to the Chamber of Deputies.

Local Government.—The chief towns constitute governorships (*muhâfzas*), and the remainder of the occupied country is divided into provinces (*mudirias*), which are subdivided into districts (*markaz*), each under a *mamûr*, who controls the head man (*omda*) of each village in his district. By the law of 1883 provincial councils were instituted, consisting of two representatives from each *markaz*, under the presidency of the *mudir* (or governor) of the province. These councils were reorganised in 1910 and were made the elementary education authority for the province, with certain restricted powers of local government.

Defence.—In 1882, a military revolt, headed by an officer of the Egyptian Army (Ahmed Arâbi *Pasha*) assumed alarming proportions, and a British expedition was despatched to re-establish the authority of the Khedive. Meanwhile a revolt had broken out in the southern provinces, headed by Sheikh Mohammed Ahmed,

of Dongola, who proclaimed himself a *Mahdi* of Islam, and the British expeditionary force, sent to quell the rebellion of 1882, remained in the country as an army of occupation. The defence of Egypt is reserved by the Constitution and remains under British control, the British garrison (under the command of a British general officer) amounting to 3 cavalry regiments, 3 batteries of artillery, 2 companies of engineers, 7 battalions of infantry and 1 armoured car company, a total of 11,420. Service in the *Egyptian Army* is nominally compulsory on all Egyptian subjects between the ages of 19 and 27, the recruits required each year being chosen by ballot; but certain classes (professors, students, Government employees, &c.) are exempt, and exemption may also be purchased for £E20, if paid before the ballot. Natives of the Sudan are enlisted voluntarily for service in the Egyptian Army, which had a strength of about 11,220 all ranks in 1927.

There is no *Navy* in the proper sense of the term; there are 3 small cruisers belonging to the Coast Guard and Fisheries service, and 4 vessels under the Ministry of Communications, while the different Government Departments possess steamers on the Nile for inspection purposes.

The *Egyptian Police* (under the Ministry of the Interior) consists of City and Provincial Police, the former comprising 306 officers (75 Europeans), 476 European constables, and 6,585 men, the latter 369 officers and 6,162 men. There are also 60,859 *ghafirs*, or native night-watchmen.

Education on native lines has long been given in elementary vernacular schools. The native system of education is completed by the more promising pupils at the Azhar University in Cairo, the principal University of the Moslem world. In 1922-3 there were 151 *Elementary Schools* (*Maktabs*) under Government supervision, with 23,996 pupils and 3,710 *Maktabs* under inspection for grants-in-aid with 279,409 pupils; there were also 54,528 pupils in other elementary schools. The government primary schools give a 4-years' course and prepare for admission to secondary, agricultural and other special schools. There were also 1,148 Egyptian institutions with 111,935 pupils and 569 foreign institutions with 56,916 pupils. There are *Colleges* of Medicine, Law, Education, Engineering, Commerce, Veterinary Science and Agriculture at Cairo. Much assistance is given to education by private enterprise and benevolence and foreign schools abound. A National University was founded in 1908 at Cairo.

Agriculture.—The total area of Egypt is estimated at approximately 222,400,000 English acres, of which about 8,450,000 acres are formed of the alluvium brought down by the Nile from the Abyssinian hills, the remainder being chiefly limestone desert. Only the former are cultivable, and only the portion that can be irrigated from the waters of the Nile—this portion amounts at present to 5,600,000 acres (1926), and is capable of extension (to 7,600,000 acres) by the improvement of water storage facilities and means of distribution. In 1930 the land was held as to 5,303,568 *feddâns* by 2,170,033 native owners, and as to 489,741 *feddâns* by 6,294 foreign owners. The principal crops grown during *Saifi* (summer) are cotton, rice, sugar cane, and Sorgho (a variety of maize). *Nili* (flood) part of *Saifi*, has the date of its commencement fixed by the Irrigation Department according to the quantities of water available before the flood, which reaches its highest level in September—it generally commences in July. The principal crops are maize and rice. *Chitwi* (winter) commences in November and ends in June. The principal crops are cereals, bersim (a variety of clover) and—mainly in Upper Egypt—beans, lentils, onions and helba. The total cotton crop and the value of the quantities exported in recent years:—

Year.	Kantars.	Export value.
1924-25	7,273,974	£E57,544,253
1925-26	7,964,645	43,825,564
1926-27	7,652,189	35,961,447
1927-28	6,041,499	45,138,000
1928-29	8,070,000	41,361,000
1930-31	8,015,400	...

Live Stock.—In 1929 the cattle numbered 800,853, buffaloes 822,587, horses 38,371, mules 21,738, donkeys 739,121, sheep 1,002,683, goats 731,176, and camels 172,619.

Minerals.—The riparian districts of the lower Valley of the Nile are ill-provided with workable mineral deposits, with the exception of abundant building materials. The mineral resources of Egypt, therefore, are situated in its otherwise barren deserts. Known deposits are chiefly situated at great distances from one another and from the Nile. This fact has retarded exploration and development, but of late years considerable progress has been made. Owing to lack of knowledge of mining, consequent upon their pursuit being entirely agricultural, the local industrial classes have had very little hand in the existing enterprises, whose capital and organisation are chiefly foreign.

Manufactures and Industries.—The principal articles of Egyptian manufacture are cotton and woollen fabrics, silks, embroideries, brass, silver and copper ware, leather goods, rugs, pottery, alcoholic beverages, sugar, perfumery and cigarettes. The principal Egyptian industries are dyeing, tanning and cement.

Railways.—The principal lines radiate from Cairo to Alexandria (and on to Rosetta), Damietta, and Ismailia (continuing northwards to Port Said and southward to Suez). From Cairo the line runs southwards for a distance of 554 miles to Shellal, the First Cataract. At this point a steamer connexion runs to Wadi Halfa, connecting the Egyptian State with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line, which it is hoped to extend eventually to the frontier at Sollûm, thus joining Tripoli to Egypt. The total length of the Egyptian State Railways (excluding the Auxiliary Railways of Upper Egypt and the Western Oases Railway) on March 31, 1930, was 2,300 miles. 27,585,000 passengers and 5,780,491 metric tons of merchandise were carried during 1923-4, the net receipts being £E1,810,487. The gauge is standard (4 ft. 8½ in.), with the exception of 138 miles between Luxor and Shellal, which are 3 ft. 6 in. gauge. There are two other State-owned lines in Egypt, namely, the Auxiliary Railways of Upper Egypt, consisting of 282 miles of standard gauge, and the Western Oases Railways, a length of 141 miles (75 centimetre gauge) connecting the oasis of Kharga with the Nile Valley. In addition to the Government lines, there are 865 miles of light railways exploited by public companies.

Motor Vehicles.—On Dec. 31, 1928, there were 14,122 private motor cars, 6,311 taxi-cabs, and 4,045 lorries and omnibuses.

Caravan Routes.—The principal caravan routes lead to the Oases of the Libyan Desert (though Kharga can now be reached by train), whence there is a route, known as the Darb el 'Arbain, leading to Dar Fûr and the south of the Sudan. There are many well-known routes across the Arabian Desert to the Red Sea, that from Qena to Qoseir being probably the most frequently used.

Shipping.—For the SUEZ CANAL *see* page 868.—Apart from the three great seaports of Alexandria, Port Said, and Suez, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollûm and Matruh on the Mediterranean, Tor, Abu Zenima, Zeitia, Jemsa and Hurghada in the Gulf of Suez, and Safaga, Qosseir and Halaib on the Red Sea. The Khedivial Mail Steamship Line (which is under British management) has its headquarters at Alexandria and a depôt at Suez. The principal port is Alexandria, where 2,102 vessels (4,781,305 tons) entered and 2,106 vessels (4,800,655 tons) cleared in 1925.

Posts and Telegraphs.—There were in 1925 3,311 post offices and stations, dealing with 58,753,000 letters and post-cards, and 26,391,000 newspapers, &c., and a total foreign correspondence of 43,000,000. There were on March 31, 1925, 136,522 miles of telegraph and telephone wire. A system of savings banks has been introduced, under the control of the Post Office, the actual deposits being collected in rural districts by the *sarrâf* (village tax-collector).

	1929–30.	1930–31.
Revenue	£E41,886,428	£E36,277,000
Expenditure	41,128,413	44,915,000

	1929.	1930.
Imports	£E56,274,912	£E47,488,760
Exports	52,186,625	31,941,592
Imports from U.K.	£12,576,000	£9,808,000
Exports to U.K.	23,583,000	13,910,000

Debt.—The *Caisse de la Dette*, a body representing the creditors of the Egyptian Treasury, has considerable powers and special privileges. The *Caisse*, appointed during an era of bankruptcy, succeeded in protecting the interests of the boudholders, but as Egypt became solvent and prosperous, its stringent regulations prevented the development of the country out of surplus revenue, a large part of which was held in suspense as contingent security for the service of the debt. Though the *Caisse* still exists, its duties are now limited to receiving the revenues necessary for the interest and for the payment of the coupons as they become due, while it also holds a considerable reserve fund (£E36,965,140 on April 30, 1928), the interest on which reduces the amount of the Treasury contribution. The Egyptian debt was stated as follows (in £ sterling) on April 1, 1928 and 1929:—

Debt.	1929.	1930.
Guaranteed Debt, 3 per cent.	£ 4,227,900	£ 3,994,400
Privileged Debt, 3½ per cent.	30,633,980	30,633,980
Unified Debt, 4 per cent.	55,426,320	55,250,460
Total	90,288,200	89,878,840

The *Cost* of the Debt (in the Budget for 1930–31) inclusive of £E664,826 assigned to the service of the Ottoman Loans of 1855, 1891 and 1899, which were guaranteed on the Egyptian Tribute, was stated at £E4,697,284.

CAIRO, the capital (population 1927, 1,064,567), stands on the E. bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman bastions and Coptic churches. The earliest Arab building is the Mosque of 'Amr, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 12th century. The bazaars are always interesting, especially the Khân-el-Khalili, the Hamzâwi, and the Brass Bazaar, though the Muski, which leads to them, is fast losing its oriental character.

ALEXANDRIA (*population 1927, 573,023*), founded B.C. 332 by Alexander the Great, was for over 1,000 years the capital of Egypt. Its great Pharos, or lighthouse, was one of the "Seven Wonders of the World" (*see* p. 87). It now contains two royal palaces, Ras-el-Tin and Montaza, while almost the entire cotton trade of the country is here controlled by the big dealers and brokers. At the census of 1927 the towns of Tanta (90,014), Port Said (104,603), Mansura (63,696), Assiut (57,132), Faiyûm (52,372), Zagazig (52,351), and Damanhur (51,709), also exceeded 50,000 inhabitants.

CAPITAL, Cairo.

Cairo is 2,520 miles from London; transit *vid* Trieste, 5 days; *vid* Marseilles, 6 days.

ESTONIA.
(Eesti Wabariik.)

Head of the State, M. Konstantin Päts.
Foreign Affairs, M. Jaan Tonisson.

Minister in London, Dr. Oskar Kallas, 167 Queen's Gate, S.W. 7.
Counsellor of Legation and Consul-Gen., Hans Markus.
Secretary, V. Ojanson.

The most northerly of the Baltic provinces, is bounded on the N. by the Gulf of Finland, on the S. by Latvia, on the W. by the Baltic Sea, and on the E. by Lake Peipus and *Soviet* Russia (along a line roughly parallel with the eastern shore of the lake). The islands of Dago, Osel and other smaller islands in the Baltic form part of the Republic. It has an area of about 18,632 sq. miles (within the boundary settled by agreement with *Soviet* Russia), with a population (Jan. 1, 1929,) of 1,116,474 (87·8 per cent. Estonians, 8·2 per cent. Russians, 1·7 per cent. Germans). Agriculture and dairy farming are the chief industries, engaging 59 per cent. of the population. The value of the agricultural production in 1926 was £15,000,000, rye, oats, barley, flax and potatoes being the chief crops, and butter, bacon, and eggs the chief products of dairy farming. There are important manufactures, including cotton, woollen, paper, timber, matches and distilling, with annual production valued at £7,000,000. There were (1929) 702 miles of broad gauge and 398 miles of narrow gauge railway in operation.

Legislature consists of a single-chamber Assembly (Riigikogu) of 100 members elected for 3 years by universal adult suffrage. The executive is entrusted to a council of Ministers, the Prime Minister being the Head of the State. The supreme organ of the Judicature is the State Court of Justice in Tartu (Dorpat).

Military Attaché, Col. Aejmelæus-Äimä, C.B.E.
Commercial Attaché, J. E. Lundström (*acting*), 103 Cannon Street, E.C. 4.

A country situated on the gulfs of Finland and Bothnia, which was conquered by Russia from Sweden, and united to the Russian Empire, as an autonomous but not sovereign Grand-Duchy, in 1809. When the Russian Empire broke down in 1917 Finland declared herself an independent sovereign state (Dec. 6, 1917). The following year the country sustained severe disturbances on account of the aggression of Russian Bolshevism, but succeeded in restoring order, and the relations between Finland and Russia were finally settled by the Treaty of Dorpat (Oct., 1920). The area is 149,926 square miles, with a population (1930) of 3,634,047, of whom (in 1920) 2,574,228 were Finnish-speaking, 340,963 Swedish-speaking, and 1,603 Laps, leading a nomadic life in the north. Nearly all the inhabitants are Lutherans. The *Aland Archipelago*, a group of some 300 small islands at the entrance to the Gulf of Bothnia (area 557 square miles, population about 27,000), forms part of the Republic. There are 3 universities, 1 at Helsinki (Helsingfors) and 2 at Turku (Åbo); the university of Helsinki (founded 1640 at Turku and removed to Helsinki in 1828) has nearly 5,000 students, of whom about 1,000 are women. In addition, there are 1 technical and 2 commercial schools. The leading crops are rye, barley, oats, potatoes. Saw mills, wood pulp, cellulose and paper manufacture provide the chief industry, and the forests (62,400,000 acres)

are a great source of wealth; there is no European country so wealthy in forests except Russia, the exports of timber in 1928 being 1,141,000 standards; wood pulp, cardboard and paper, and dairy produce are also exported. There are (1931) 3,378 miles of railroad and about 3,900 miles of telegraph, with a well developed telephone system (32 per 1,000 inhabitants). There is railway connexion with Sweden and Russia, and telephone connexion with most European countries and with U.S.A. The *merchant fleet (1930) consists of* 983 vessels (231,032 tons), of which 527 are steamers.

Service in the Army is universal and compulsory, the peace effective being about 25,000 all ranks; there is also a volunteer organisation of Civic Guards with an enrolled strength of about 100,000.

The country was formerly governed by the Finnish Senate of 22 members, with a Diet of 4 estates elected by the people; but under the Constitution of Jan. 1, 1907, there is a single Chamber elected by universal suffrage of both sexes, women being likewise eligible for election to the Chamber. Finland was thus the first country to concede woman suffrage and representation, and it is noteworthy that it was gained without agitation.

Finland is a Prohibitionist country, the only one in Europe.

Finnish and Swedish are the official languages.

Consulate General, 51 Bedford Square, W.C. 1.
Consul-General, M. Goiran.
Consul at Liverpool, M. de Ledoulx.

There are also Consuls at Manchester, Southampton, Newcastle-upon-Tyne, Cardiff, Glasgow, Dublin, and in Jersey.

The most westerly State of Central Europe, extending from 42° 20′ to 51° 5′ N. lat., and from 7° 45′ E. to 4° 45′ W. long., bounded on the north by the English Channel and Straits of Dover (Pas de Calais), which separate it from England. Its circumference is estimated at about 3,000 miles, and its area (in 1914) at 207,076 square miles, divided into 87 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The territory ceded by the *Treaty of Frankfort* (May 10, 1871) amounted to

5,602 square miles; that regained by the *Treaty of Versailles* (June 28, 1919) to 5,819 square miles, making the present area of France (exclusive of Algeria) 212,895 square miles, with a population (census of March 6, 1926) of 40,743,851 (inclusive of Alsace and Lorraine).

Divorces (Number)	19,353	20,409

France has always been attractive to foreigners, of whom (1926) 2,498,230 were resident there, including (in 1921) 470,873 Italians, 415,546 Belgians, 303,141 Spanish, 55,456 British, 34,027 Russians, and 30,948 Americans.

GOVERNMENT. — The monarchical system of government was overthrown by the *French Revolution* (1789–1793), and the First Republic endured until the Great Napoleon (born Aug. 15, 1769, died May 5, 1821) founded the First Empire in 1804. The monarchy was restored in 1814, and also after the "Hundred Days" of Napoleon (March 20–June 29, 1815), until the Second Republic of 1848, which became the Second Empire on Nov. 22, 1852. On Sept. 4, 1870, the Emperor Napoleon III. (nephew of the Great Napoleon) was deposed, and the Third Republic was set up. The head of the Republic is the President, elected for 7 years by the National Assembly of the two houses of the Legislature, the *Senate* of 314 members (elected by indirect vote for 9 years, one-third being renewable every 3 years) and the *Chamber of Deputies* of 612 members (elected by direct vote for 4 years). Members of the legislature receive 62,000 francs a year and travelling facilities over the railways.

PRODUCTION.—The chief agricultural products are wheat, barley, rye, maize, oats, potatoes, beetroot (for the manufacture of sugar), hops, &c. Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c. The agricultural production is shown in the following table:—

Production (*Metric Tons*).

Crop.	1929.	1930.
Wheat	8,705,000	6,291,000
Rye	1,002,000	750,000
Barley	1,285,000	1,000,000
Oats	5,744,000	4,400,000
Potatoes	13,429,000	14,000,000

Forestry is an important industry, the principal forests being those of the Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut and the cork-tree in the south. The vine is cultivated to a very great extent (924,243,000 gallons of wine were produced in 1930), as the names Bordeaux, Burgundy, Champagne, &c., universally testify; cider-making is also an important industry, and the production in 1929 amounted to 512,160,000 gallons. The live stock (1928) included 15,005,080 cattle, 10,415,010 sheep, and 6,016,940 pigs. The mineral resources include coal, pig iron, copper, lead, silver, antimony and salt. Under Article 50 of the *Treaty of Versailles*, the coalfields of the *Saar Basin* are ceded to France for 15 years, at the end of which time the inhabitants are to decide by a *plébiscite* whether they will remain French, return to Germany, or become a self-governing community. The coalfields abut on Lorraine, and have an area of 217 square miles, with a population of 640,000, and they include the towns of Saarbrück (60,000), Saarlouis (16,000), and Merzig (10,000), on the River Saar. In 1911 the coal mines of France produced 30,000,000 tons, and the production of the enlarged area reached 54,000,000 tons of coal in 1929. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, woollens, carpets, linen, silk and lace. Glass manufacture and pottery are also important, and the sardine fisheries and the culture of oysters are a source of wealth.

DEFENCE.—The *National Army* of France consists of the Metropolitan Army, the Colonial Army, the Gendarmerie and Republican Guard, and of the partly native armies of Algeria, Morocco, and Tunis. The peace strength of the Metropolitan Army (1930-31) was 316,992 all ranks, including the (Military) Air Force (36,800). The Naval Air Force (for Coast Defence) is included in the Naval personnel. In the War of 1914–1918 over 20 per cent. of the French people were mobilised, and 9,717,000 all ranks passed into the Armies of France (exclusive of troops from Algeria, Tunis and Morocco). The *French Navy* was manned in 1930 by 57,415 officers and other ranks. For strength *see* Tables pp. 286 and 287.

ARMISTICE MONUMENT.—In the Forest of Compiègne is a *Carrefour de l'Armistice*, from which the *Clairière de la Victoire* leads to the Armistice Monument, unveiled Nov. 11, 1922. The monument marks the spot where the Germans signed the armistice terms presented by Maréchal Foch, and bears the inscription *Ici le 11 Novembre 1918 succomba le criminel orgueil de l'Empire Allemand vaincu par les peuples libres qu'il prétendait asservir.*

EDUCATION.—The educational system is highly developed. *Central Administration* comprises (*a*) Ministry of Public Instruction; (*b*) Superior Educational Council, charged with the actual administration; (*c*) Consultative Committee (advisory); (*d*) Educational Bureaux and Inspecting Staffs, whose heads report direct to the Minister. *Local Administration* comprises (*a*) Territorial Academies, with inspecting staffs for all grades; and (*b*) Departmental Councils, presided over by the *préfet*, charged especially with *primary* education. By the Law of July, 1904, all congregationist institutions are to be suppressed within 10 years, and many were at once closed, some re-opening under lay management. (i.) *Primary: Secular, comp.* and *free.* Age 6–13. Schools include (*a*) infants; (*b*) lower primary; (*c*) higher do. Supplementary courses, and courses for adults. Lower and higher primary certificates granted. Numerous private courses are aided from local funds. Schools are for boys, for girls, or mixed. (ii.) *Secondary:* State lycées, communal colleges, and many private establishments, 7-yrs. course, either (*a*) purely classical; (*b*) purely modern; (*c*) Latin and sciences; or (*d*) Latin and modern languages. Degree of Bachelor conferred on completion. For females, a similar organisation, course 5–6 yrs. Sèvres school and the Sorbonne Association well-known. (iii.) *Special Schools*

are very numerous, many public institutions being dependent on ministries other than that of Public Instruction. (iv.) *Universities* (State universities alone grant degrees, but numerous private faculties and private institutions further higher education): Aix, Algiers, Besançon, Bordeaux Caen, Clermont, Dijon, Grenoble, Lille, Lyon, Montpelier, Nancy, Paris, Poitiers, Reunes, Strassbourg, and Toulouse.

COMMUNICATIONS. — The length of the *Routes Nationales* in 1928 was 24,426miles. The principal rivers of France are the Seine, Loire, Garonne, and Rhône; the navigable waterways having a length of (1924) 4,222 miles, with 3,291 miles of canals. The system of railroads in France is very extensive; they are almost entirely *concédés*, and become State property after the expiration of the concession. The length of lines of general interest, inclusive of local lines, open for traffic on January 1, 1930, was 26,177 miles, of which over 750 miles are electrified. The length of telegraph wires (1929) was 221,427 miles, and of telephone lines 120,000 miles, with nearly 1,000,000 subscribers. In 1928 there were 642,744 private motor-cars registered in France, of which (1926) 541,438 were touring cars. Goods transport vehicles numbered 305,587, cycle-cars 27,450, motor-cycles 232,201, and motor-boats 3,313. In 1927 the passengers carried in civil aircraft numbered 15,857, the weight of cargoes being 1,644,000 lb. (exclusive of 276,000 lb. of mails).

Shipping.—The gross tonnage of the French mercantile marine in 1930 was 3,530,879 gross tons, of which 146,911 tons were motor vessels and 60,288 tons were sailing ships. During the year 1929 the tonnage of French and foreign vessels entering French ports amounted to 58,091,343 tons, of which 14,426,216 tons were French; while the total clearings amounted to 49,192,613 tons, of which 12,772,845 tons were French. The chief ports are Marseilles, Cherbourg, Le Havre, Rouen, Bordeaux, Calais, Boulogne, and Dunkirk. A bill was passed by the Chamber in 1921 for the canalisation of the Rhone, which will make the river navigable for 1,200 ton vessels from the sea to Switzerland, and will also provide electric power and irrigation to the surrounding departments.

COMMERCE.—The principal imports are wool, cotton, coal, silk, oleaginous fruits and seeds, machinery, raw skins, cereals, timber, caoutchouc, copper, petroleum oils, coffee, and wines. The principal exports are cotton tissues, silk tissues, wool, woollen tissues, wines, smallwares, automobiles, &c., silks, raw skins, millinery and artificial flowers, dressed skins, tools and metal goods, machinery, pig iron, butter, table fruits, refined sugar, brandy and liqueurs, fish, and cheese.

1930	22,692,000	49,186,000

Alsace-Lorraine. — *High Commissioner*, M. Mirbau (1920). Alsace-Lorraine, formerly a part of the Holy Roman Empire, was ceded to France in 1648 at the Peace of Westphalia, and was ceded to Germany by the *Treaty of Frankfort* (May 10, 1871), after the Franco-Prussian War. At the close of the War, 1914-1918, the Provinces were regained by France under the *Treaty of Versailles* (June 28, 1919). They embrace the fertile plain between the Rhine and the Vosges, and stretch beyond these mountains as far as Luxemburg. Wine, tobacco, hops, iron, and coal are among the leading productions, and the cotton industry is most flourishing. The area is 5,605 square miles; the population in March, 1921, was 1,709,749. Principal towns, Strasburg (pop. 174,492), Mulhouse (99,892), and Metz (69,624).

Algeria.—The three departments of Algeria—Algiers, Oran, and Constantine—form an integral part of France, under a Governor-General, assisted by a Consultative Council. These departments lie between 4° 36′ W. to 6° 16′ E. longitude, 37° 6′ N. to an undetermined S. limit, about 30° N., covering an area estimated at 222,120 square miles, with a population (1926) of 6,064,865, of whom 872,439 were Europeans and 5,192,426 natives. The revenue in 1931 was estimated at *francs* 1,199,056,329, and the expenditure at *francs* 1,195,401,883. The bulk of the trade is with France, the exports to France amounting in 1929 to *francs* 2,923,723,000 (total exports *fr.* 4,036,589,000), and the imports from France to *fr.* 4,552,960,000 (total imports *fr.* 5,849,950,000). The exports consist mainly of wine, wheat and other cereals, sheep and oxen, skins, fruits, zinc and iron ores, olive oil, phosphates, cork wood, esparto grass, manufactured tobacco, and vegetables. The principal imports from the U.K. were coal and patent fuel, machinery, cotton oil, cotton tissues, tin plates, clothing, and prepared skins. Iron, copper, quicksilver, zinc, and lead mines are being worked. In 1926 there were 2,696 miles of railroad open for traffic; and in 1928 the number of ships engaged in foreign trade entering Algerian ports was 4,322 of a net tonnage of 6,985,250 tons. The principal town is Algiers, the capital (municipal population, 1926, 226,218), a most important coaling station and much frequented as a health resort; other large towns are Oran (150,301), Constantine (93,733), Bona (51,895), Sidi-bel-Abbas (43,000), Phillipville (30,000), Mascara (28,000), and Tlemnçen (27,000). *Governor-General*, M. Jules Carde (1930).

CAPITAL, Paris, on the Seine. Population (1931), 2,871,039; there are 82,127 houses and 1,149,366 families according to the census of March 1921. Fourteen other cities exceed 100,000 — Marseilles 652,196, Lyons 570,740, Bordeaux 256,026, Lille 201,921, St. Etienne 193,737, Nantes 184,509, Nice 184,441, Toulouse 180,771, Strasburg 174,492, Le Havre 158,022, Rouen 122,898, Roubaix 117,209, Toulon 115,120, Nancy 114,491, Clermont-Ferrand 111,701, and Reims 100,998. Mulhouse, Amiens and Limoges exceed 90,000, and 30 others exceed 50,000.

FLAG: The "tricolour," three vertical bands, blue, white, red (blue next to flagstaff).

BRITISH EMBASSY.

Embassy, 39 Faubourg St. Honoré, Paris. VIII.
Ambassador Extraordinary and Plenipotentiary, His Excellency The Rt. Hon. Lord Tyrrell, G.C.M.G., K.C.B., K.C.V.O. (1928) £15,500
Envoy Extraordinary and Minister Plenipotentiary, R. H. Campbell, C.M.G.
1st Secretaries, R. F. Wigram; V. F. W. Cavendish-Bentinck.
3rd Secretary, C. E. Steel; Hon. R. G. Hare.
Hon. Attachés, Capt. A. Paget; Capt. G. Bambridge, M.C.
Press Attaché, Sir C. Mendl.
Commercial Counsellor, J. R. Cahill, C.M.G.
Commercial Sec. (Grade II.), A. H. S. Yeames.
Naval Attaché, Capt. J. U. P. Fitzgerald. R.N.
Asst. Do., Engr.-Com. G. Villar, R.N.
Military Attaché, Col. G. G. Waterhouse, M.C.
Asst. Do., Maj. Hon. W. Fraser, D.S.O., M.C.
Air Attaché, Group Captain R. J. Bone, C.B.E., D.S.O.
Superintending Archivist, W. E. Fuller, O.B.E.
,, (*Assistant*), E. J. Moignard · W. F. Redmond.

BRITISH CONSULAR OFFICES.

Paris—Cons.-Gen., A. L. S. Rowley, C.M.G.
,, *Vice-Consuls*, R. H. Tottenham-Smith; H. E. Slaymaker; F. Butler (*acting*).
,, *Pro-Consuls*, Horace J. Dorey; John W. M. Gray; Lt.-Col. Herbert A. Douglas.
Rheims—Vice-Consul, G. H. Olliver.
Ajaccio—Consul, Maj. W. Follett Routley.
,, *Pro-Consul*, Raymond K. Kemp.
Bastia—Vice-Consul, A. Bezert.
,, *Pro-Consul*, S. H. Bezert.
Algiers—Cons.-Gen., G. P. Churchill, C.B.E.
,, *Vice-Consuls*, B. G. Chamberlain.; Capt. F. K. Brennan.
Bône—Vice-Consul, G. C. Bowker.
,, *Pro-Consul*, R. Ruffier.
Bougie—Vice-Consul, L. F. Lajeunesse.
Oran—Vice-Consul, T. J. E. Haskoll.
,, *Pro-Consul*, G. Viliesid.
Antananarivo—Consul, J. Helm Smith.
,, *Vice-Consul*, J. F. Spence.
Majunga—Vice-Consul, Albert Rowntree.
Tamatave—Vice-Consul, A. Rolls (*acting*).
Bordeaux—Consul, C. K. Ledger.
,, *Vice-Consul*, Albert E. W. Murphy.
,, *Pro-Consul*, J. Lambert.
Bayonne—Vice-Consul, Paul Schoedelin.
La Pallice—Vice-Consul, F. Link.
,, *Pro-Consul*, William H. Jones.
Pau & Tarbes—Vice-Cons., H. T. H. Hewetson.
,, *Pro-Consul*, A. C. Thompson.
Pauillac—Vice-Consul, Maurice Adde.
Tonnay Charente—Vice-Consul, E. Rizat.
Toulouse—Vice-Consul, G. W. Huggins
Brest—Consul, C. E. Gedge.
,, *Vice-Consul*, A. Mignon.
Congo—Consul, Henry Kelsall.
Libreville—V.-Cons., A. Leonard Smith, M.C.
Dakar—Consul-General, V. V. Cusden.
Duala—Vice-Consul, Vincent Teale.
Lomé—Vice-Consul, Herbert H. Edis.
Porto Novo—Vice-Consul, Herbert H. Edis
Djbouti—Vice-Consul, J. E. Lowe.
Guadaloupe—Consul, Louis Devaux.
Havre—Consul, H. C. Swan.
,, *Vice-Consul*, John P. Beecher, M.B.E.
,, *Pro-Consul*, A. T. Iredale.
Cherbourg—V.-Cons., Capt. J. C. Stark
,, *Pro-Consul*, A. Buhot.
Lille—Consul, Capt. J. K. V. Dible.
,, *Pro-Consul*, Capt. C. T. Morrow, M.B.E.
Amiens—Vice-Consul, Stuart Oswald, M.C.
,, *Pro-Consul*, Oscar Sydney Gadsby.
Boulogne—Vice-Consul, H.S. Bradbrook, M.B.E.
,, *Pro-Consul*, John Gilmour.
Calais—Vice-Consul, J. H. Hartshorn.

Dunkirk—Vice-Consul, Harry W. F. Whiting, M.B.E.
,, *Pro-Consul*, Gawin Wild.
Lyons—Consul, S. E. Kay, M.B.E.
,, *Pro-Consul*, E. G. King.
Grenoble—Vice-Consul, Alfred J. Swannell.
Marseilles—Consul-General, H. S. London.
,, *Vice-Consuls*, W. J. Sullivan; F. Besant (*acting*).
,, *Pro-Consul*, W. Miller.
Sète—Vice-Consul, Norman B. R. Brown.
Toulon—Vice-Consul, Charles H. Thomas.
Martinique—Consul, Henry J. Meagher.
Nantes—Consul,
,, *Vice-Consul*, F. Percy-Bush.
Lorient—Cons. Agent, Henry Joubert, M.B.E.
St. Malo—V.-Con.,
,, *Pro-Consul*, Col. E. L. Perry, D.S.O.

St. Nazaire—Vice-Consul, A. Raffin.
" *Pro-Consul*, J. F. Raffin.
Tours—Vice-Consul, Capt. L. Richardson.
" *Pro-Consul*, Victor Deacock.
New Caledonia—Consul, T. Johnston.
Nice—Consul, J. W. Keogh, O.B.E.
" *Vice-Consul*, Charles J. Beale.
Cannes—Vice-Consul, J. G. Taylor.
" *Pro-Consuls*, Walter Gray Taylor; A. P. Cunningham.
Mentone—Vice-Consul, A. S. Dean.
" *Pro-Consul*,
Monaco—Consul, (*see* Nice).
" *Vice-Consul*, W. M. L. Ainslie.
" *Pro-Consul*, J. C. Henry.
Pondicherry (*India*) — *Consul*, Maj. H. G. Tranchell, I.A.
" *Pro-Consul*, K. Natarajier.
Rouen—Consul, H. E. Bowle.
" *Vice-Consul*, Capt. G. J. Neill.
Dieppe—Vice-Cons., P. U. Allen.
" *Pro-Consul*, Maj. R. W. Lamb, M.C.
Tréport and Eu—Vice-Consul, E. M. Griffiths.
Saigon—Consul-General, F. G. Gorton.
" *Vice-Consuls*, W. K. Smith (*acting*); Alexander Denholm.
Haiphong—Vice-Cons., T. L. Christie, M.C.
Strasburg—Consul-General, T. J. Morris, C.M.G.
" *Vice-Consul*, A. H. Douglas
Tahiti—Consul, Dr. W. J. Williams.
" *Vice-Consul*, I. E. Walker.
Tunis—Consul-General, E. G. Lomas, O.B.E.
" *Vice-Consul*, A. W. Robertson.
" *Hon. Physician*, Dr. Joseph Valletta.
Bizerta—Consul, Major W. H. Fox.
Gerba & Zarzis. Cons. Agent, F. Farrugia.
Mehdiah—Cons. Agent,
Sfax—Vice-Consul, A. R. Farrugia.
" *Pro-Consul*, Sauveur Damato.
Susa and Kairouan—Vice-Con., Harry Engerer.
" *Pro-Consul*, Jules Engerer.

BRITISH CHAMBER OF COMMERCE, 6 Rue Halévy, Paris, IXème. *President*, C. J. Henderson.

There are also British Chambers of Commerce at 2, Rue Beauvau, Marseilles, and 4, Avenue Massena, Nice.

Paris is distant from London 267 miles; transit, 7 to 8 hours.

FRENCH COLONIES.

Group.	sq. kilometres.	Population.
North Africa	3,770,000	13,000,000
Eastern Group	200,000	2,100,000
West Africa	7,640,000	19,560,000
America	100,000	500,000
Indian Ocean	640,000	5,900,000
Indo-Chinese	740,000	21,000,000
Pacific	20,000	100,000
Total	13,010,000	62,160,000

Trade of French Colonies (1927):—	
With France ..... *Francs*	15,000,000,000
With other countries ...	15,500,000,000
Francs	30,500,000,000

In ASIA.—*French India* includes Pondicherry, on the Coromandel coast; Chandernagore, on the Hooghly; Karikal, in the Cauvery delta; Yanaon, in the Godavery delta; and Mahé, on the Malabar coast—the total area being 200 square miles with an estimated population of (1922) 268,000. The trade of Pondicherry and Karikel in 1927–8 was valued at £268,529 for imports, £644,648 for exports, and £1,349,135 for re-exports. *French Indo-China* comprises the possession of Cochin-China and the four protectorates of Cambodia, Annam, Tonkin, and Laos. In 1898–9 the port of Kwang-Chow-Wan was also acquired on lease from China. The capital is Hanoi, in Tonkin, and the total area is 309,979 square miles, with a population (1922) estimated at 19,983,203, including the civil European population of about 17,500.

In ASIA MINOR.—The French mandatory sphere of *Syria* and *Lebanon* has a total area of about 150,000 square miles, with an estimated population of 4,500,000 (*see* also pp. 871–872).

In AFRICA.—*Algeria* (*see* above) is an integral part of France. *Morocco* (*see* p. 844–846) is a French (and partly Spanish) protectorate.

Tunis has been a French protectorate since 1881. It lies between Algeria and Tripoli, and extends southwards to the Sahara, with a total area of about 45,000 sq. miles and an estimated population of 2,000,000, of whom about 60c,000 are Berbers and 500,000 Arabs. The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The vine and olive are extensively cultivated. The principal minerals are coal, copper, lead, zinc and iron, and phosphates and marble are also worked. The chief exports are phosphates, olive oil, wheat, esparto grass, barley, beans, blankets, sponges, and dates; the chief imports are textiles and other manufactures, iron, steel, machinery and provisions. Eighty per cent. of the trade is with France and Algeria. In 1929 the imports were valued at 2,026,000,000 *francs* and the exports at 1,641,000,000 *francs*. Tunis, the capital, has a municipal population of 185,996; other towns are Sfax (27,723), Bizerta (20,593), Susa (21,298), Kairwan (19,426), Gabes (15,119), and Monastir (8,837). *French West Africa* extends from Mauritania to Dahomey, and has a total area of 1,509,733 square miles, and a population of 11,344,076. It consists of *Senegal* (74,000 sq. miles, pop. 1,250,500), capital, St. Louis; the trade of Senegal in 1926 was *francs* 909,998,954 imports, and *francs* 885,945,699 exports, the principal export being ground nuts (483,000 tons = *francs* 740,869,000 (and the principal import cotton fabrics (*francs* 200,549,000); *Upper Senegal Niger* (304,000 sq. miles), and the *Niger Military Territory* (533,000 sq. miles), which have a total population of about 6,036,200; *French Guinea* (92,600 sq. miles, pop. 1,737,350); *Ivory Coast* (126,100 sq. miles, pop. 1,216,300); and *Dahomey* (38,000 sq. miles, pop. 878,500); adjoining Dahomey is the French Sphere of the former German colony of *Togoland* (23,400 sq. miles, pop. 800,000); while the hinterland of these colonies forms the *French Sahara*, which has an estimated area of 924,16c sq. miles and a population of about 450,000. *French Equatorial Africa* consists of the *French Congo* (513,000 sq. miles, pop. 9,000,000) and of the French Sphere in the former German territory of *Cameroon* (267,000 sq. miles, pop. 2,750,000). *French East Africa* consists of the *Somali Coast* (46,300 sq. miles, pop. 208,000) and of the large island of *Madagascar* (226,000 sq. miles, pop. 3,153,500) with its dependencies (Nossi Bé, Sainte Marie, Réunion, and the Mayotte-Comoro Islands, and St. Paul, Amsterdam, and Kerguelen Islands). Agriculture and cattle raising are the principal industries; the minerals include

gold, silver, iron, copper, lead, and zinc. The chief exports are gold, cattle, bark, manioc (for arrowroot), beans, hides, skins, fibre, rice, timber and rubber; the chief imports are cottons, metal manufactures, wines and spirits, coal, clothing, lime and cement. The capital, Antananarivo, has a population of 75,000; other towns are Tamatave (the chief port), Majunga, Diego-Suarez, Mananjary, Tuléar, Andevoranto and Vohémar. Off the south-east coast are the uninhabited islands of St. Paul, Kerguelen and Amsterdam. There is now direct communication across French and British territory in Africa, with posts on the Atlantic and Indian ocean.

In AMERICA.—Off the south-east coast of Newfoundland are two small groups of islands, of which the largest are St. Pierre and Miquelon. In the West Indies, Martinique and Guadaloupe, with Basse Terre, Marie Galante, Ile des Saintes, Petite Terre, St. Bartholomew, and St. Martin; and in South America, Cayenne or French Guiana. Included in Cayenne is a group of islands (St. Joseph, Ile Royal, and Ise du Diable) known as Isle du Salut. On *Devil's Isle* Major Dreyfus was imprisoned from 1894–1899. The total area of French possessions in North and South America is 35,320 square miles, with a population of 428,850.

In OCEANIA.—New Caledonia (7,200 sq. ms., pop. 50,500) is a large island with dependencies, the Isle of Pines, the Wallis Archipelago, the Loyalty Islands (Mahé, Lifou, Uvéa, &c.), the Huon Islands, and Futuna and Alofi. The Society Islands (Tahiti, Moorea, &c.) have an area of about 650 square miles, and a population of about 14,000; the Marquesas (Nukahiva, Hivasa, &c.) 500 sq. miles, pop. 2,500. Leeward Isles (Huahiné, Raiatéa, Tahaa, Bora-Bora, Maupiti, &c.); the Gambier Islands (Mangareva, &c.); the Tubuai Islands (Rurutu, Raivavae, Rimatava, &c.); Rapa Island; Makatea; and Maiao Island. The New Hebrides are under joint Franco-British administration.

GERMANY.

(Deutsches Reich.)

President of the German Reich, General Field-Marshal Paul von Hindenburg, *born* Oct. 2, 1847, *assumed office* May 12, 1925.

MINISTRY (October 10, 1931).

Chancellor, Dr. Bruening.
Foreign Affairs, Dr. Bruening.
Interior, Herr Groener.
Labour, Dr. Stegerwald.
Finance, Herr Dietrich.
Agriculture and Food, Dr. Schiele.
Justice, Dr. Joel.
Defence, Herr Groener.
Communications, Herr Treviranus.
Posts, Dr. Schätzel.
Economy, Prof. Warmbold.

Ambassador in London, Baron von Neurath, 9 Carlton House Terrace, S.W. 1.
Consular Dept. of the Embassy, 9 Carlton House Terrace, S.W. 1.

The area of Germany is approximately 182,200 square miles, with a population on June 16, 1925, of 62,592,575 (without Saar district), of whom 30,196,421 were males and 32,396,154 were females. The population on Dec. 1, 1910, was 64,925,993. Births in 1930 numbered 1,126,829 and deaths 710,905, births being 17·5 per 1,000 of population, deaths 11·1 per thousand.

Religious confessions in the present area were in 1925:—Protestants 40,014,677, Roman Catholics 20,193,334, Jews 564,379, others 1,638,229.

There are 45 large towns with over 100,000 inhabitants, and of these 29 are in Prussia, 4 in Saxony, 3 in Bavaria, 2 each in Baden and Hesse, 1 each in Württemburg and Brunswick, and three Hanse Towns.

At the outbreak of war, Aug. 1914, "Germany" was a Confederate League, bearing the name "German Empire," under the hereditary presidency of the King of Prussia, holding the title of "German Emperor."

By the *Treaty of Versailles* the "Reichsland" of Elsass-Lothringen and the Saar coal basin (temporarily) were ceded to France; parts of Posen and West Prussia to the newly-formed Republic of Poland; North Schleswig to Denmark; and Moresnet and Malmédy to Belgium. Plebiscites held in June 1920 in parts of East and West Prussia yielded majorities for Germany. A plebiscite to decide the fate of Upper Silesia, which was held under the Peace treaty, resulted in division between Poland and Germany. Memel City with adjoining territory has been ceded to Lithuania.

The Colonial possessions of the German Empire extended over 1,035,086 sq. miles in Africa, 96,210 sq. miles in the Pacific, and 2,943 sq. miles in Asia—a total of 1,134,239 sq. miles, with a population estimated in 1914 at 15,000,000. By the *Treaty of Versailles* Germany renounced her overseas possessions, with all rights and titles therein, and the delegates to the International Council at Paris allocated Togoland and Kamerun to Great Britain and France; German East Africa to Great Britain; German S.W. Africa to the Union of South Africa; the German Pacific possessions N. of the Equator to Japan; and those S. of the Equator to Australia and New Zealand.

On Nov. 9, 1918, the German Emperor abdicated, and the Government of the country was taken over by the Council of the People's Commissioners in Berlin. On Nov. 11, 1918, Germany was granted an armistice, and on June 28, 1919, peace was signed at Versailles. In Jan. 1919, elections were held to a National Assembly on the basis of universal adult suffrage (male and female), and on Feb. 11, 1919, the first President of the German Versammlung was elected at Weimar. Under the new Constitution of August 11, 1919, the federal legislature consists of a *Reichstag* representing the whole nation and elected by popular suffrage (male and female), with proportional representation, and a *Reichsrat* representing the separate States. The people possess the right of initiative and the referendum. Bills dealing with economical questions or social issues arising thereout must first be submitted to the new advisory Economical Council (*Reichswirtschaftsrat*).

PRODUCTION AND INDUSTRY.—Germany is primarily an industrial country. On June 16, 1925, 41·4 per cent. of all persons with earning occupations were engaged in industry, 30·5 per cent. in agriculture, 16·5 per cent. in trade and communications, 4·7 per cent. in the public services and the professions, 1·8 per cent. in the health services, and 5·1 per cent. in domestic service. Of the total area in 1925 the area under agriculture was 25,598,000 hectares (whereof 20,681,147 hectares arable land in 1927), and the area under forests 12,737,292 hectares. The Live

Stock (Dec. 2, 1929) included 3,617,141 horses, 19,943,974 cattle, and 19,943,974 pigs. The production of coal in 1929 was 163,440,000 metric tons, lignite 174,454,000 tons, iron ore 6,373,500 tons, and potash salts 13,378,000 tons. Rock-salt, lead-ore, gold and silver ore, graphite, asphalt, petroleum, Epsom-salts, boracite, tin-ore, quicksilver-ore, antimony-ore, cobalt-ore, nickel-ore, arsenic-ore, manganese-ore, bismuth-ore, uranium-ore, wolfram-ore, pyrites, vitriolic-ore, and alum-ore are also worked. Crefeld, Elberfeld-Barmen, Chemnitz, Augsburg, and the provinces of Westphalia and Silesia are the great centres of the textile industries. By laws of 1919 and 1920, all coal, heavy iron and steel, potash and coal-tar producing concerns were compulsorily fused into All-German Syndicates, governed by assemblies representing Producers, Traders and Consumers, with equal representation for Employers and Employed.

ECONOMIC CONDITION.—Industrial production passed its highest point in 1927, but did not begin to sink rapidly until 1930. In 1931 output of iron and steel fell more than 40 per cent. below the highest post-war volume, and some manufacturing industries were occupied to less than half their capacity. In consequence of drastic increases in agrarian import duties, the production of primary food-products increased, and in 4 years the importable wheat-deficit fell from 2 million to about a quarter million tons. In February, 1930, the total number of unemployed was 3,366,000; February, 1931, 4,971,000; September, 1931, 4,324,000. Export trade in 1930 and 1931 fell off less than that of other commercial countries, and as import trade declined heavily very large active trade balances were attained. Shipping was badly depressed, 18 per cent. of tonnage being laid up in August, 1931. In the summer of 1931 a serious credit crisis, accompanied by bank failures, was caused by the summary withdrawal of foreign short-term credits, and the Reichsbank's reserves were dangerously depleted. The crisis was met by placing payments to abroad under Reichsbank control, expropriating foreign currency in private hands, and negotiating the suspension of further credit withdrawals until March, 1932. The stability of the reichsmark at gold parity was maintained. By emergency decrees under Art. 48 of the Constitution the Government drastically regulated Finance and Credit, reduced official salaries, increased social-insurance contributions and reduced benefits, and prescribed measures against unemployment.

OLD AGE AND INFIRMITY INSURANCE.—The German scheme of social legislation gives all subordinate bread-winners in Germany a legal right to pecuniary subvention when unfitted for work through sickness, accident, premature infirmity, or old age. Insurance is compulsory. This National Insurance is based on mutual insurance and self-administration. The Infirmity Insurance Act came into force Jan. 1, 1900. The insured include all persons working for wages or salary as workpeople, artisans, journeymen, apprentices, domestic servants, laundresses, dressmakers, sempstresses, housekeepers, charwomen; overseers, foremen, engineers, assistants, clerks and apprentices in merchants' offices (excepting assistants and apprentices in chemists' shops), schoolmasters, schoolmistresses, tutors and governesses, including foreigners working in Germany under these categories. Pensions for premature infirmity are given to insured persons when unfit for work; old age pensions to all insured persons on attaining the age of 70, though still capable of work. A comprehensive project of reform of the State insurance legislation became law in 1911. The new law codified previous legislation, established new Insurance Authorities, reduced working-class influence in the Accident Insurance organisations, provided pensions for widows and orphans, and made other changes of importance. Another Bill extending Insurance benefits to private officials, clerical employés and others above the class of manual workers, became law in 1911. A law establishing Federal Unemployment Insurance for all persons subject to Sickness Insurance and also for seamen, which is financed by equal contributions from employers and employed, came into force on Oct. 1, 1927.

DEFENCE.—By Article 160 of the *Treaty of Versailles* the German *Military Forces*, as from March 31, 1920, must not comprise more than seven divisions of infantry and three divisions of cavalry, a total force of 100,000 all ranks. By Article 181 of the Treaty, the German *Naval Forces* must not exceed 6 battleships of the Deutschland or Lothringen class, 6 light cruisers, 12 destroyers, and 12 torpedo boats. No submarine vessels are to be included in the naval forces, and all war vessels in excess of the above numbers are to be broken up or devoted to commercial purposes. Under the terms of the Armistice of Nov. 11, 1918, the German High Sea Fleet surrendered to the Allies (Nov. 21, 1918) and was interned in Scapa Flow, manned by German naval crews. It was scuttled by its crews in Scapa Flow, while in custody, on June 21, 1919. In consequence of this breach of the Armistice agreement by the German crews the Allies (Nov. 10, 1919) called upon the government to surrender 5 light cruisers, and certain floating docks, cranes, and dredgers, in addition to the previous naval surrenders. By Article 198 of the Treaty the armed forces of Germany must not include any military or naval *Air Forces*, and no dirigible balloons, aeroplanes, sea-planes or flying boats.

COMMUNICATIONS.—The total length of the full-gauge *Railroads* at end of 1928 was 56,359 kilometres, of which all except 3,735 kilometres belonged to the German Railroads Corporation, which under the *Dawes Reparation Scheme* of 1924 acquired all the lines taken over by the Republic from the States in 1921. In addition there were 1,864 kilometres of narrow-gauge railroads. The number of registered automobiles (July 1, 1931) was 510,608, motor cycles 792,075, and motor lorries 161,072. Length of *Telegraph and Telephone Lines* 392,700 kilometres; telegrams transmitted, (1930) 33,900,000; post, telegraph, and telephone offices, 51,213; telephone subscribers, 3,292,000; letters carried, 5,900 millions; value of cash on delivery orders, 3,168 mill. m.; money orders, 3,827 mill. m. The number of employés in the service of posts, telegraphs, and telephones was 376,605. The postal services have been financially separated from the general administration. In addition to some 6,000 miles of navigable rivers there are over 1,500 miles of canals and 1,600 miles of ship canals. At the outbreak of the War of 1914–1918 Germany ranked second to Britain in the list of maritime countries. On January 1, 1913, the Mercantile Marine consisted of 2,098 sea-going steamers of 17·65 register tons and upwards (4,380,348 tons gross register), and of

2,420 sailing vessels (447,870 tons gross register); number of seamen, 77,746. As a result of the War and of the Peace Treaty shipping in 1919 sank to 419,000 tons, but there has since been a rapid recovery, due mainly to native building, but partly to purchases from abroad. Finished new constructions of vessels exceeding 100 gross tons were in 1919, 134,535 tons; 1925, 280,937 tons; 1926, 259,281 tons; 1927, 261,105 tons; 1928, 299,117 tons; 1929, 357,600 tons. On June 30, 1929, shipping had increased to 4,058,000 gross tons. Recovery was helped by the establishment of eleven new yards during the War. The chief ports of Germany are Hamburg, on the Elbe; Bremen, on the Weser; Stettin, on the Oder; Königsberg, on the Pregel; Kiel, on the Baltic (connected with the Elbe by the Kaiser Wilhelm Canal); and Lübeck, on the Baltic. Kiel is being converted into a free port. Under the Peace Treaty Danzig became a Free State, subject in its foreign affairs to the Polish Republic. Traffic in the chief ports has increased since the War at a great rate, and now exceeds that of 1913. Arrivals at all ports were: 1913, 34,396,691 net tons; 1929, 42,079,360 net tons. Traffic in the *Kiel Canal* in 1929 was: vessels 49,000 tons, net tonnage 21,740,087.

FINANCE.—Under Articles 248-263 of the *Treaty of Versailles* the German Government undertook to pay the cost of the Armies of Occupation from Nov. 11, 1918, until they shall be withdrawn, the occupied area extending to the Rhine (with "bridgeheads" on the right bank) from Eiten, on the Netherland's frontier, in the north, to the junction of the German-Lorraine frontiers, in the south. The amount of the reparations due by Germany under the Treaty was fixed in January, 1921 (by the Financial Council of the Allies at Brussels) at 132 milliards of gold marks (£6,600,000,000) payable in bonds, to be redeemed by annual payments of 2 milliard gold marks, together with a sum equivalent to 26 per cent. of German exports. Of the amounts thus payable the various shares from 1921–1929 were apportioned to France 52 ninety-second parts, Great Britain 22, Italy 10 and Belgium 8 ninety-seconds; from 1929–1932 the shares are varied to France 130 two hundred and thirtieth parts, Great Britain 55, Italy 25 and Belgium 20 two hundred and thirtieths; and for the succeeding 31 years France 156 two hundred and seventy-six parts, Great Britain 66, Italy 30 and Belgium 24 two hundred and seventy-six parts. A new *Reparations Scheme* was agreed to by Germany and the Allies in August, 1924, providing for annual payments rising to 2,500 million gold marks, liable to increase according to an index of prosperity, the money to be supplied from (1) taxation, (2) railway bonds, and (3) bonds imposed on private industry. In 1930, by an agreement come to at the Hague on the basis of recommendations by a Committee of Experts which met in Paris in the spring of 1929, Reparations were definitely settled. Germany agreed to pay during a term of 37 years annuities averaging 1,989 million marks, and thereafter until 1987–88 annuities varying between 1,711 million and 898 million marks. The Reparations control of German taxes and the mortgages on the railways and on industry were removed. In connection with the settlement German occupied territory was evacuated in 1930. On the initiative of president Hoover, Reparations Payments were suspended for one year from July 1, 1931.

In November, 1923, was put through a *Currency Reform*, consisting in the creation of a *renten-mark*, nominally worth 1 gold mark, and in the stabilisation of the depreciated paper-mark at 1 billion paper-marks to 1 gold-mark. The stabilised paper mark notes have since been withdrawn from circulation, and the renten-marks are being gradually replaced by reichs-marks of pre-war gold value, issued by the Reichsbank as reconstituted under the Reparations settlement of 1924. Although the currency reform of 1923 was only provisional it reacted beneficially on the Finances, stopping the rise in the cost of administration and preventing depreciation in the value of the taxes received. For covering the deficits in the weeks intervening between stabilisation and complete balancing of the budget, the Republic obtained limited credits from the new Rentenbank. In the financial year 1924-25 a complete budget balance was attained, but in consequence of declining revenue due to trade depression and of heavy expenditure for Unemployment Relief deficits have of late been the rule. The *Budget Estimates* for 1931–32 (in which are not included the separately financed Railways and Posts) were:—

General Administration Budget:—

	1,000,000 Reichs-marks.
Ordinary revenue	10,259
,, expenditure	10,299
Extraordinary revenue	98
,, expenditure	98
Budget Charge for Reparations	1,794

The German Debt.

The long and short term *Debt* of the Republic on May 31, 1931, totalled 11,494 million reichs-marks. Of this sum 780 million marks represented the outstanding liability on the Reparations Foreign Loan of (nominally) 800 million marks, 4,077 million marks represented the depreciated paper mark pre-war and war debts as valorised under the law of July 16, 1925, and 1,453 million marks the international 5½ per cent. (Young Plan) loan of 1930. Under the paper-mark debt valorisation law bondholders who acquired before July 1, 1920, will ultimately receive 12½ per cent. in gold marks of the nominal value of their holdings with interest. Bondholders who acquired later will receive 2½ per cent., but this will bear no interest until Reparations are paid.

GERMAN FEDERATED STATES.

PRUSSIA.

GOVERNMENT (April, 1925).

President, Herr Braun.
Interior, Herr Severing.
Finance, (vacant).
Agriculture, Herr Steiger.
Trade and Commerce, Dr. Schreiber.
Instruction and Worship, Herr Grimme.
Minister of Justice, Herr Schmidt.
People's Welfare, Herr Hirtsiefer.

The Republic of Prussia comprises the larger portion of Germany, with a total area in 1924 of 113,750 sq. miles and a population on June 16, 1925, of 38,120,173 (Saar district excluded).

The number of births in 1929 was 701,738, against 1,209,500 in 1913. The number of deaths in 1929 was 493,981 against 656,490 in 1913. Marriages were 365,301, against 323,709. The surplus of births over deaths in 1929 was 207,757.

Prussia possesses a large number of navigable rivers intersecting the country—viz., the Pregel, Oder, Elbe Weser, and Rhine. The coasts of the Baltic and North Seas form a number of gulfs and bays. The principal mountains are the Harz and the Giant Mountains, the latter reaching an altitude of 5,255 feet. The forests are extensive, occupying an area of 18,053,000 acres, chiefly consisting of fir. Minerals consist of coal, iron, copper, lead, potash, alum, nitre, zinc, cobalt, sulphur, nickel, arsenic, baryta, amber, agate, jasper, onyx, &c., and, to a small extent, silver. Salt (from the brine springs of Prussian Saxony) is abundant. Metallic ores, coal, salt, precious stones belong partially, and amber totally, to the Crown. Agriculture and the rearing of cattle are the industries employing the largest number of persons, but Prussia has long ceased to be a mainly agricultural State. Wheat, rye, oats, barley, peas, millet, rape-seed, maize, linseed, flax, hemp, tobacco, sugar-beet, hops, &c., are extensively cultivated. Prussia's manufactures comprise practically all branches. The cotton works are extensive, and there are numerous manufactories of silk, woollen, mixed cotton and linen fabrics, including shawls, carpets &c., and woollens, with leather, earthenware, glass, paper, and tobacco manufactures, as well as metallurgical works of great importance and large output. Brewing is a business of great importance.

	1,000,000 Reichs-marks.
Budget (net), 1931–32	2,248

The whole of the old *Funded* Debt of Prussia was taken over by the Republic under the arrangement for transfer of the Prussian State Railways. It will be valorised on the same conditions as those laid down for the Federal Debt under the law of July 16, 1925.

CAPITAL, Berlin, on the Spree. In 1920, by fusion of suburban municipalities and of some adjacent rural communes, was created Great Berlin with a population on June 16, 1925, of 4,013,583.

Other largest cities are Cologne, on the Rhine (698,064), Breslau, on the Oder (554,801), Essen, on the Ruhr (468,696), Frankfort, on the Main (461,849), Düsseldorf, on the Rhine (431,096), Hannover, on the Leine (422,435), and Dortmund on the Emscher (320,256).

BAVARIA.

Minister-President Dr. Held.

The Republic of Bavaria is divided into two unequal parts. The eastern portion, comprising eleven-twelfths of the whole, is situated between 47° 16′—50° 34′ N. lat. and 9° 01′—13° 50′ E. long.; the western part, forming the Palatinate, on the left bank of the Rhine. The total area is 29,486 sq. miles, and the population on June 16, 1925, 7,411,589. The rivers are the Danube, Rhine, Main, Lech, Isar, and Inn. The Bavarian forests are extensive, covering nearly a third of the country; the soil is highly productive, wheat, rye, oats, and barley being the chief products; buckwheat and maize are also grown, and tobacco is one of the staple articles. Wine is produced in the Palatinate, in Lower Franconia, and in Middle Franconia. The hop-plant is most extensively cultivated. Many important manufactures are carried on. The brewing of beer is carried to great perfection. The chief imports are sugar, coffee, woollens, silks, stuffs, drugs, hemp, cotton, tobacco, and flax; the chief exports are timber, grain, wine, hops, beer, leather, glass, jewellery, &c. The Thüringian Duchy of Coburg was incorporated in Bavaria in 1921.

	1,000,000 Reichs-marks.
Budget (net), 1930–31	648

CAPITAL, Munich, on the Isar. Population (1925), 680,704. Other large towns are Nürnberg, N.W. of Munich (392,494), and Augsburg, on the Wertach-Lech (165,522).

SAXONY.

The Republic of Saxony has an area of 5,856 English square miles, with a population on June 16, 1925, of 4,980,689. More than one-half of the surface is arable, and has always been in a high state of cultivation, producing the usual cereals and leguminous plants, with rape, buckwheat, flax, and fruits. The forests supply timber of excellent quality; minerals are rich and abundant (coal, silver, tin, bismuth, cobalt, iron, zinc, lead, nickel, arsenic, &c., besides marble, porcelain, earth, and various gems); special manufactures of Saxony are:—Machinery, cottons, worsted yarns, soft wool tissues, carriages, furs, clothing, jute, furniture stuffs, hosiery, gloves, and other knitted goods, laces, embroideries, curtains, paper, wood and straw pulp, bottle glass, musical instruments, chocolates, sweets, cigars, and Meissen porcelain. The imports are chiefly corn, wine, salt, cotton, silk, flax, hemp, wool, coffee, tea, &c. Its chief town, after the capital, is Leipzig (pop. 679,322), the great book-market, with, next to those of Berlin and Munich, the most frequented University of Germany (having 5,925 matriculated students in 1912–13); Plauen (pop. 111,398), and Chemnitz (pop. 331,641), the Manchester of Saxony.

	1,000,000 Reichs-marks.
Budget (net), 1930–31	452

CAPITAL, Dresden. Pop. (1925), 618,684.

WÜRTTEMBERG.

The Republic of Württemberg has an area of 7,534 English square miles, and a population (in 1925) of 2,595,114, of whom 30 per cent. are Roman Catholics. It possesses rich cultivated fields, orchards, gardens, and hills covered with vines; the forest, grain, and pasture-land being nearly equally distributed throughout. Spelt, wheat, rye, oats, barley, hemp, hops, potatoes, beans, maize, and turnips are the principal agricultural products. The minerals, consisting chiefly of salt, iron, granite, limestone, ironstone, fireclay, &c., abound in the kingdom; mineral springs are also numerous. The principal rivers are the Neckar and the Danube. The manufactures generally are linen, woollen and cotton fabrics, carpets, paper, leather, gunpowder, firearms, tobacco, iron and steel goods, pianos, clocks, pottery, cabinet work, &c. There are also many oil mills, breweries, and brandy distilleries. The principal exports are grain, cattle, wood, gunpowder, firearms, pianos,

clocks, salt, oil, leather, woollen, hosiery, cotton and linen fabrics, stays, beer, wine, &c.

1,000,000 Reichs-marks.

Budget (net), 1930-31 271

CAPITAL, Stuttgart. Population (1925), 341,461.

MINOR STATES.

Baden, separated by the Rhine from France (Alsace) and Switzerland, has an area of 5,819 square miles, with a population (1925) of 2,336,498. A great part of the surface is mountainous and covered with forest trees, including the Schwarzwald (Black Forest) and the Odenwald, but more than three-fifths of the total area is under cultivation, corn, wine, fruit, potatoes, tobacco and hops being the chief agricultural products. The principal manufactures are cigars, cotton and silk stuffs, brushes, jewellery and trinkets, clocks, chemicals, paper and machinery. More than half the population are Roman Catholics. Capital, Karlsruhe, pop. (1925) 145,694. Other large towns are Mannheim (247,486), Friburg (91,559), Pforzheim (78,434), and Heidelberg (74,892).

Land Thüringen. The Thüringian States, Saxe-Weimar-Eisenach, Saxe-Meiningen, Saxe-Altenburg, Schwarzburg-Rudolstadt, Schwarzburg-Sondershausen, Reuss-Greiz, Reuss-Gera, and Gotha, have been constituted into a single state under the title Land Thüringen, with an area of 4,541 square miles, a population of 1,628,398, and two seats in the Federal Reichsrat. In size Land Thüringen is sixth among German states. The new state is governed by a "Volksrat." Capital, Weimar (46,028).

Hesse, in the West Centre, consists of Northern and Southern portions, nearly equal in size, on either side of the Main River, with a total area of 2,968 square miles and a population (1925) of 1,358,445, of whom more than half are Protestants. The country is mountainous but fertile, and agriculture is flourishing. Capital, Darmstadt, pop. (1919) 89,095. Other large towns are Mayence (Mainz) at the confluence of the Main and the Rhine (109,285), Offenbach (78,780) Worms (47,006), and Giessen (33,517).

Mecklenburg-Schwerin, between the Elbe and the Baltic, has a total area of 5,068 square miles, with a population (1925) of 686,838. Agriculture and stock raising are the principal industries, the Mecklenburg breed of horses being famous. The chief manufactures are bricks and machinery. Capital, Schwerin, pop. (1925) 48,157.

Oldenburg, on the North Sea, between the estuary of the Weser (at Bremen) and the Prussian province of Hanover, has detached territories in Lübeck (between Holstein and Mecklenberg) and Birkenfeld (Rhine Province of Prussia). The total area is 2,479 square miles, with a population (1925) of 553,670. The chief industries are agriculture, bee-keeping and stock-raising; the principal manufactures are brewing and distilling, tanning, tobacco and corks. Capital, Oldenburg, pop. (1925) 52,187.

Brunswick, 1,418 square miles, pop. (1925) 508,660; in Northern Germany. Capital, Brunswick, pop. (1925) 146,654.

Anhalt, 906 square miles, pop. (1925) 351,692, is in Central Germany. Capital, Dessau, pop. (1925) 70,316.

Lippe, 470 square miles, pop. (1925) 166,023. Capital, Detmold (16,171).

Mecklenburg-Strelitz, between Mecklenburg-Schwerin, Pomerania and Brandenburg, has a total area of 1,130 square miles, with a population (1925) of 112,052. Chief industries are agriculture and wood products. Capital, Neustrelitz, pop. (1925) 12,338.

Schaumburg-Lippe, 130 square miles, pop. (1925) 48,660. Capital, Buckeburg (6,745).

Waldeck was incorporated in Prussia in 1928.

The *Free Hanse Towns* comprise the three cities of *Lübeck*, on the Trave (area 115 square miles, pop. 127,540), *Bremen*, on the Weser (area 99 square miles, pop. 332,547), and *Hamburg*, on the Elbe (area 160 square miles, pop. 1,128,753). Each has a small rural territory and has full Federal independence, with a Council of State (under the Presidency of a Burgomaster).

TRADE FLAG: Black, red and gold.

CAPITAL OF THE GERMAN REPUBLIC, BERLIN.

BRITISH EMBASSY.

Secretary, M. John Kyndinis.
Naval and Air Attaché, Capt. D. Phocas.
Consul-General, George Dracopoulos.
Vice-Consul, George Seferiadis, 131 Gower Street, W.C. 1.

A maritime Republic in the south-east of Europe, bounded on the N. by Albania, Yugoslavia and Bulgaria, on the S. and W. by the Ionian Sea, and on the E. by the Aegean and Turkey, with an estimated area of 50,271 sq. miles and a population (census of May 15, 1928) of 6,204,684.

Prior to the Balkan Wars of 1912–13 the area was less than 25,000 sq. miles, the addition of portions of *Macedonia* and *Epirus*, *Crete* (2,950 sq. miles, pop. 336,151), and certain *Aegean Islands* increasing the area to 43,522 sq. miles. During the War of 1914–1918 Greece eventually declared for the Allies against the Central Powers, and her territories were increased by the occupation of *Thrace* (including the monastic republic of *Mount Athos*), and the islands of *Imbros* and *Tenedos*. Under an arrangement with Italy, to come into effect after the ratification of the *Treaty of Sèvres*, *Rhodes*, *Egeo*, and the *Dodecanese* (12 islands) were surrendered by Turkey, and these were to be handed over to Greece by Italy. Greece also received under the Treaty a mandate for the occupation and administration of the town and district of *Smyrna*, but military operations by forces of the Angora Government, under Mustapha Kemal Pasha, recovered the mandated region in Sept. 1922, the Greek forces being annihilated, and Smyrna was evacuated on Sept. 8, 1922, and that part of the Greek population of Asia Minor which escaped massacre by the Turks took refuge in Greece. By the *Treaty of Lausanne* (1923) Greece lost Eastern Thrace (that part lying E. of the Maritza river) and the islands of Imbros and Tenedos, which were retroceded to Turkey. The country is thus composed of a continental portion (the southern part of the Balkan Peninsula), and of islands in the Ægean, Mediterranean, and Ionian Seas. The surface is nearly all mountainous; the coasts are elevated, irregular, and deeply indented.

Government.—Greece became independent in 1830, after a successful insurrection against the Turkish government, to which the country had been subjected since the 15th century, and after a succession of rulers of the Glucksburg dynasty was declared a Republic by the Constituent Assembly on March 25, 1924. The legislature consists of a Senate of 120 members, and of a Chamber of Deputies (or *Boulé*) elected for 3 years by universal manhood suffrage.

Production.—Agriculture is the principal industry and employs more than half the population. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-vine. The principal minerals are silver, lead, zinc, emery, copper, magnesium, sulphur, salt, and marble. The chief manufactures are smelting, textiles, and shipbuilding. The imports are cotton and other manufactures, corn, timber, cattle, hides, sugar, salt fish, and coal. The exports consist of wine, olives, olive oil, tobacco, currants, figs, cognac, hides, lead, iron ore, magnesite, iron pyrites, chrome ore, emery, marble, sponges and carpets.

Defence.—Service in the Army is universal and compulsory between the ages of 21 and 57. Both the land and sea forces were reorganised during the War of 1914–1918, and about 150,000 all ranks fought with the Allied Armies. The Navy consists of 1 armoured cruiser, 1 cruiser minelayer, 4 modern t.-b.-d., 7 torpedo-boats, and 6 submarines with 5 patrol vessels (small torpedo boats).

Education is free and compulsory, maintained by local taxation supplemented by State grants. Secondary education is somewhat backward, particularly in the country districts. The University at Athens is of some repute.

Finance.—The debt in 1912 was 1,040,900,000 *drachmæ*, and the Balkan Wars of 1912–13 added 354,960,000 *drachmæ*, the Great War added 1,028,000,000 *drachmæ*, and subsequent military operations to March, 1921, were responsible for 1,776,140,000 *drachmæ*. On May 31, 1930, the total was stated at £110,077,506.

Communications.—There were (1928) 1,993 miles of railroad open for traffic. There is a ship canal cutting through the Isthmus of Corinth for ships up to 1,500 tons. The post offices number 1,146, telegraphs, 4,960 miles. The mercantile marine consists (1931) of 547 steamships (1,407,808 tons and 729 sailing ships (58,508 tons). The principal harbours are the Piræus (port of Athens), Syra, Patras, Salonica, Volo, Corfu, Calamata, Laurium, Cavalla, and Canea (Crete).

Budget, 1930–31.

GUATEMALA.

República de Guatemala.

President (1931-1935), General Jorge Ubico, *assumed office* Feb. 14, 1931.
Minister of Foreign Affairs, Señor Don Alfredo Skinner Klée.

Minister in London (vacant).
Charge d'Affaires and Consul-General in London, Señor Dr. Don Francisco A. Figueroa, 444 Mansion House Chambers, 11 Queen Victoria Street, E.C. 4.

Guatemala, the most northerly of the Republican States of Central America, is situated in N. lat. from 13° 45′ to 17° 49′, and in W. Long. from 88° 12′ 40″ to 92° 13′, 43′ and comprises an area of 42,456 square miles, and a population in 1921 of 1,600,535. The Republic is divided into 22 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea; earthquakes are frequent, and the capital (which is at an altitude of 4,800 ft.) was destroyed by an upheaval in Jan., 1918. The country is well watered by numerous rivers; the climate is hot and somewhat malarious near the coast, but very temperate and healthy in the higher regions. About 690 miles of railway were open for traffic in 1930. There were 4,267 miles of telegraph working in 1925. The chief ports are *San José de Guatemala* and *Champerico* on the Pacific, and Livingston and Puerto Barrios on the Atlantic side. The principal export is coffee, other articles being bananas, sugar, timber, *chicle* (chewing gum), hides and beans. Spanish is the language of the country.

	1931-32.

HAITI.

(République d'Haïti.)

President, Stenio Vincent, *assumed office* Nov. 18, 1930.
Foreign Affairs, M. Abel N. Léger.

Minister in London, Dr. Louis Baron.
Consul, W. Haines, 4, Denmark Street, N.17.

The Republic of Haiti is the western or French portion of the island of San Domingo, which, next to Cuba, is the largest of the "West India" Islands. Formerly a French colony it was proclaimed independent on Jan. 1, 1804, and is governed under a Constitution ratified on June 12, 1918. The legislature consists of a Senate and a Chamber of Deputies. The President is elected by the legislature for a period of six years. In 1915 a treaty was entered into with the U.S.A. whereby certain public services of the Republic were to be controlled by U.S. officials. The Treaty expires in 1936. On Oct. 1, 1931, the U.S. officials in charge of Public Health, Public Works, and the Agricultural Technical Service, were withdrawn. The Financial and Constabulary services still remain under U.S. control.

The area of the Republic of Haiti is estimated at 10,204 square miles, with a population estimated (Jan. 1, 1927) at 2,300,200 inclusive of white foreign residents and military forces of the United States. The mountains are richly

* At par 1 *Quetzal* = $1 U.S.

and heavily timbered, and susceptible of cultivation nearly to their summits; it is probably the most fertile spot in the West Indies, whilst its harbours, especially Port-au-Prince, offer considerable facilities to foreign trade. The principal productions are coffee, logwood, cocoa, cotton, hides, sugar, honey, gums, and oilseeds, these being the chief exports. It is said to contain mines of gold, silver, copper, tin, and iron. Its commercial prosperity has been almost annihilated by repeated revolutions. The principal foreign trade is carried on with the United States, Great and Greater Britain, France, and Germany; the principal articles imported from Great Britain are piece-goods, jute bags, hardware, and agricultural tools. An armed Constabulary, urban and rural, was formed in 1916. This force is officered in part from U.S. Marine Corps and Navy, and consisted (Oct. 1, 1931) of 197 officers (U.S. and Haitians) and 2,950 other ranks. A coastguard service is attached to the Constabulary. There are about 135 miles of railway. In 1925-26 the entries and clearances at Port-au-Prince were 408 steam vessels (1,001,007 tons). French is the official language of the country, but most of the people speak a debased dialect known as Creole French.

HONDURAS.

(República de Honduras.)

President, Dr. Vicente Mejia Colindres, *assumed office* Feb. 1, 1929.

Consul-General in London, Señor Don H. Blanco Fombona, 9 Oxford Street, W. 1.

The Middle State of Central America, stretching in N. lat. between 13° 10′ and 16°, and W. long. between 83° 10′ and 88° 40′; containing 44,275 English square miles, with a population estimated at 775,000 (1930).

Christopher Columbus landed at Cape Honduras in 1502, and in 1524 the country was settled by the Spaniards. In 1525 *Hernando Cortes* founded the city of Puerto Cortes, and from 1539 to 1821 the country formed part of the Captaincy-General of Guatemala. From 1821 to 1839 Honduras was included in the Confederation of Central America.

The Republic of Honduras has a coast-line of nearly 400 miles on the Caribbean Sea, chief ports, Truxillo, Puerto Castilla, Puerto Cortes, Omoa, Roatan, Tela, and La Ceiba; but only about 40 miles on the Gulf of Fonseca, on the Pacific side, chief port, Amapala. (NOTE.—Amapala is on Tiger Island; port on mainland is San Lorenzo, 2 hours in gasoline launch from Amapala.) From San Lorenzo by auto to capital, Tegucigalpa, 88 miles, good road, 5-6 hours. Road from Tegucigalpa to the Atlantic coast has now been completed as far as Potrerillos, the terminal station of the unfinished Interoceanic, and is in fair condition. The journey to the lake takes from 9 to 10 hours in automobile; the lake is crossed in 1 hour by auto-ferry and thence to the head of the railway at Portrerillos the road is completed, cars taking from 2 to 3 hours. Potrerillos is 2 hours by rail from San Pedro Sula, and 3 hours from Puerto Cortes. By taking express automobiles and express car on the railway, it is now possible to make Puerto Cortes from Tegucigalpa in 24 hours, thus reaching New York in 5 or 6 days. There is also an aeroplane service from Tegucigalpa to Tela, connecting up with the direct steamers for Avonmouth from the latter. There are railway connections between San Pedro Sula, and Tela and La Ceiba. The country is mountainous, being traversed by the Cordilleras. The soil is very fertile, the products being bananas, mahogany, fruit, cattle, sugar, rice, tobacco, coffee, indigo, sarsaparilla, hides and skins, indiarubber, cedar, fustic, rose, and Lima wool (Kapok). There is an immense amount of uncultivated land. The number of cattle in 1920 was approximately 500,000. The forests are extensive, but there is a lack of communications and transport. Its mineral wealth is great. In 1925 there were 1,432 kilometres of railway open, all on the North Coast. The language of the country is Spanish.

	1928-29.	1929-30.
Revenue	£1,412,386	£1,431,430
Expenditure	1,323,418	1,502,170

Without Portfolio, M. John Mayer.

Minister in London, Baron Ivan Rubido-Zichy, 35 Eaton Place, S.W. 1.
Offices of Legation and Passport Office, 35B Eaton Place, S.W. 1.

By unanimous vote of the National Assembly, Hungary was re-constituted a Kingdom in 1920, after having been declared a Republic on Nov. 17, 1918. The area of present-day Hungary is about 36,179 sq. miles, its territories being decreased from the area of the former Kingdom of Hungary (which was united to the Austrian Empire by the identity of sovereigns) through the transfer of Transylvania to the Rumanians and of Croatia and Slavonia to the new Yugoslav Kingdom (*q.v.*) and of Slovakia and Ruthenia to Czechoslovakia (*q.v.*). The population (almost entirely Magyar) was 8,661,787 (Dec. 1929). The political neighbours are Czechoslovakia on the N., Yugolsavia on the S., Rumania on the E., and Austria on the W.

On the declaration of Republican institutions in 1918 Count M. Károlyi assumed office as Provisional President, but on March 22, 1919, Count Károlyi resigned, and was succeeded by a "Bolshevik" administration with a "Soviet" (Workmen's Council), in which Bela Kun (or Cohen) was the dominant personality. This administration was driven out of power by the successes of the Rumanian military forces (which invaded Hungary and occupied Budapest) and was followed by a Socialistic Government under Julius Peidel (Aug. 1, 1919). Six days later the Socialistic Government was superseded by an administration appointed by the Archduke Joseph, who accepted office as Provisional President, Aug. 7, 1919, but resigned in consequence of the protests of the Supreme Council in Paris.

On March 1, 1920, Admiral Nicholaus von Horthy of Nagybána was elected Governor of Hungary by vote of the National Assembly, which gave him sovereign rights, with certain restrictions.

In 1921, the ex-king Karl made two efforts to regain the throne, remaining in the country from March 26 to April 5, and from Oct. 21 until removed under escort. On each occasion the Hungarian Government was informed that a Hapsburg restoration would not be tolerated by the European Powers.

All religions are tolerated; the greater number of Magyars are Roman Catholics, but there is a large Protestant minority. The parcelling out of the great estates, which was forcibly attempted during the Karolyi régime, has been continued to a small extent, but on an economic basis; a land-reform bill aiming at "a more equitable distribution of landed property," was carried out in 1920–1925, reducing by about 10 per cent. the total area of large estates.

A single chamber National Assembly (introduced Jan. 4, 1920), was replaced in Dec., 1926, by a Parliament composed of a Chamber of Deputies elected by universal suffrage, and an Upper Chamber, which corresponds in a modified form to the Chamber of Magnates as it existed before the revolution of 1918.

The greater part of the area of present Hungary consists of the Alföld or Great Plain, parts of which may be considered as among the most fertile for agricultural purposes in the world, producing grain of excellent quality and supporting a number of horses, cattle and swine. The mountainous districts having been ceded to surrounding states by the Peace Treaty, Hungary has lost the greater part of the forests and mines, which formerly contributed so largely to the national wealth.

No part of Hungary touches the sea. The length of navigable rivers is 687 miles; there are about 5,000 miles of railways and 5,800 miles of telegraph in the present Kingdom.

Pengös.

ICELAND.

(Island.)

King, Christian X. (*see* Denmark).

Presidents of Al-thing, G. Olafsson; A. Asgeirsson.

Iceland is a large, volcanic, and treeless island in the North Atlantic Ocean, extending from 63° 23′ to 66° 33′ N. lat., and from 13° 22′ to 24° 35′ W. long., with an estimated area of 40,497 square miles, or greater than that of Ireland. The population was estimated at 100,000 in 1928.

An Act for the creation of a Danish-Icelandic Federal Constitution, Denmark and Iceland to be free and independent States under the same Sovereign, came into force on Dec. 1, 1918, but since the constitution granted in 1915 the assembly (Al-thing) had been more or less independent of the Government at Copenhagen in internal questions. The principal products of the island are sheep, cattle, ponies, and fish, and the imports consist of almost all the necessaries of life, the chief items being grain and meal, sugar, coffee, salt, cotton goods, tobacco, spirits, hardware, and timber. Total imports (1929): £3,219,715; exports, £4,000,286. Iceland is in direct telegraphic communication with Great Britain.

CAPITAL, Reykjavik. Population, about 30,000.

Other towns are Isafjörður, Akureyri, and Seydisfjord.

IRAQ.

(Mesopotamia.)

King of Iraq, Faisal I., G.C.M.G., *born* 1884; elected King of Iraq, Aug. 10, 1921, *married* (1906) the Sherifa Huzayma, daughter of the Sherif Nazir, *acceded* Aug. 23, 1921.

Crown Prince, H.R.H. the Emir Ghazi, *b.* March 21, 1912.

Prime Minister, Nuri Pasha al Said, C.M.G., D.S.O.

Minister for Foreign Affairs, Ja'far Pasha al Askari.

Minister in London, (vacant).

Chargé d'Affaires, Hussein Bey Afnan, M.A.

Legation, 51, Queen's Gate Gardens, S.W. 7.

Iraq, or *Mesopotamia*, "the land between the rivers" (Euphrates and Tigris), extends from Kurdistan on N. and N.E. to the Persian Gulf on the S. and S.E., and from Persia on E. to Syria and the Arabian Desert on W. the approximate position being between 37½° to 48½° E. long., and from 37½° to 30° N. lat. The territory was freed from Turkish rule during the War of 1914-18 by Anglo-Indian and British Dominion troops under Generals Nixon, Maude, and Marshall (Gen. Maude succumbing to cholera after the capture of Baghdad). Under the Treaty of Lausanne, ratified on Aug. 6, 1923, Turkey renounced the sovereignty over Mesopotamia, and its future administration has been entrusted to Great Britain by the Supreme Council of the Allies. A provisional Arab Government was set up by the High Commissioner in Nov. 1920 and in Aug. 1921 the Emir Faisal (3rd son of ex-King Hussein of the Hedjaz) was elected King of Iraq, to be enthroned on Aug. 23, 1921. By Treaty between Great Britain and Iraq (Oct. 10, 1922) the former undertakes to exercise its good offices to secure the admission of Iraq to the League of Nations, and as soon as that admission has been accomplished all the responsibilities of Great Britain as the mandatory power will be terminated; by a protocol signed April 30, 1923, the duration of the treaty was cut down from 20 years to 4; but in a new treaty signed at Baghdad on Jan. 13, 1926, provision was made that the treaty of Oct. 1923 should remain in force for a period of 25 years from Dec. 16, 1925, unless before the expiration of that period Iraq shall have become a member of the League of Nations. In March, 1924, a Constituent Assembly met in Baghdad, ratified the treaty between Great Britain and Iraq, and passed an organic law and an electoral law for the election of a Chamber of Deputies. The constitution thus instituted is a Constitutional Monarchy, hereditary in the family of King Faisal, with a Senate of 20 members nominated by the King, and a Chamber of Deputies of 88 members elected by manhood suffrage. The first Parliament under this Constitution was opened by King Faisal on July 16, 1925. In September, 1929, the British Government gave an assurance that they would support Iraq's candidature for admission to the League of Nations in 1932. On June 30, 1930, a new Treaty was signed at Baghdad by the High Commissioner and the Prime Minister. This Treaty which, if ratified, will come into force on the entry of Iraq into the League of Nations, is of 25 years' duration and regulates the relations between Great Britain and Iraq during that period on the basis of an alliance between two equal and independent States.

The total area of the districts comprised within the British Mandatory Sphere is about 116,000 sq. miles, the distance from Basra in the south to Mosul in the north being approximately 500 miles. The sphere comprises the former Turkish vilayet of *Mosul*, *Baghdad* and *Basra*. At the Census of 1920 the population was ascertained to be 2,849,282, as under:—

Baghdad vilayet	1,360,304
Basra vilayet	785,600
Mosul vilayet	703,378
Total	2,849,282

Baghdad includes the Baghdad, Samarra, Diyala, Kut, Diwaniyah, Hillah and Dulaim Divisions (*Liwas*); *Basra* includes the *Liwas* of Basra, Amara and Muntafik; and *Mosul* includes Mosul, Arbil, Kirkuk and Suleimani. (Mosul covers a great part of the ancient kingdom of *Assyria*, the ruins of Nineveh, the Assyrian capital, being visible on the banks of the Tigris, opposite Mosul.)

Of the total population there were in 1920 1,146,685 Sunni Muhammadans, 1,494,015 Shiite Muhammadans, 87,488 Jews, 78,792 Christians, and 43,302 other religions.

Mesopotamia is capable of supporting a population many times in excess of its present inhabitants if irrigation is developed and extended. In 1908 certain works were undertaken, following on the report of Sir W. Willcocks, and since the British occupation notable improvements have been effected; the Irrigation Department is at present confining itself to small and immediately remunerative schemes. The

wealth of the country depends entirely upon agricultural development, and two harvests can be gathered in the year, the chief crops being wheat, barley and beans, and rice, and Indian corn; wheat averages 464lb. per acre, barley 612lb., and rice over 1,000lb. In 1918–19 there were 1,547,000 acres (deriving their water from the Tigris and Euphrates) under general cultivation, an increase of 64 per cent. on the previous year. Cotton growing is a developing industry and it is estimated that Mesopotamia could yield 300,000 bales annually if sufficient labour is forthcoming. A concession for the exploitation of the oil in the Baghdad and Mosul vilayets was granted to the Turkish Petroleum Company (now the Iraq Petroleum Company), in March, 1925. The results of the geological surveys made by the company suggest that Iraq may contain one of the richest oilfields in the world. A number of wells have been drilled in the neighbourhood of Kirkuk, and in October, 1927, the first "gusher" was struck and capped at Baba Gurgur. The Khanaqin Oil Company (a subsidiary of the Anglo-Persian Oil Company, holds a concession which is confined to the Transferred Territories (an area on the N.E. frontier transferred from Persia to Turkey in 1913–14), which is an adaptation of the D'Arcy concession held by the A.P.O.C. Since the war oil has been struck near Khanaqin and the field is considered a promising one. The Khanaqin Oil Company have opened a refinery near to Khanaqin town which produces sufficient petrol, kerosine and crude oil for the needs of Iraq. The country is being opened up and existing communications improved and secured. Schools, hospitals and dispensaries have been established under British auspices. Basra was equipped with wharves, railway sidings, &c., for military purposes, and is thus suited for commerce. The chief imports are textiles, sugar, and tea, and the chief exports are dates, wool and barley.

The *Euphrates* (which has a total length of 1,800 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (415 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Erzerum, and flows westwards to a junction with the Kara Su, or Frat Su (275 miles), the latter rising in the north-west of Erzeroum in the Dumlu Dagh. The *Tigris* has a total length of 1,150 miles from its source to its junction with the Euphrates at Garmat Ali, 70 miles from the Persian Gulf, and rises in two arms south of the Taurus mountains, in Kurdistan, uniting at Til, where the boundaries of the vilayets of Diarbekir, Van and Bitlis conjoin.

The Baghdad Railway.—In 1899 the Anatolian Railway Company obtained a concession from the Sultan of Turkey for the construction of a railway from Konieh (the eastern terminus of the Anatolian Railway) to the Persian Gulf at Koweit, *viâ* Baghdad, a total length of 1,550 miles, with a single track of 4 ft. 8½ in. gauge. Its projected course was from Konieh to Adana, thence S.E. to Aleppo, Jerablus (where it would cross the Euphrates and enter Mesopotamia), and Mosul, and thence S. down the right bank of the Tigris to Baghdad and the Persian Gulf. The section Konieh-Eregli-Bulgurlu (124 miles), was opened in Oct. 1904, and at the outbreak of the Great War about 1,200 miles (out of the total of 1,550 miles) were in operation, with gaps in important sections (notably in the hills N.W. of Aleppo, and in the Mesopotamian desert W. & S. of Mosul). The line crosses the Euphrates at Jerablus and is open to goods and passenger traffic as far as Nisibin. The track actually extends a further 10 miles into Syrian territory in the direction of Mosul. Railheads at Nisibin and Kirkuk are connected by a motor service, and through bookings by this route from Europe to Baghdad are obtainable. The first through train from Basra to Baghdad left Basra on Jan. 13, 1920. The total length of line open at that date was 945 miles compared with 1,113 miles during the War, some unimportant lines having been disused since the cessation of hostilities with Turkey; since that time lines have been laid from Baghdad to Kerbala and Baghdad to Kirkuk. The line to Kirkuk will be extended to Mosul.

The chief city is Baghdad, the former capital of the Abbasside dynasty, one of the Caliphs of that dynasty being Haroun al Rashid of "the Arabian Nights." Baghdad has an estimated population of 270,000, other towns being Basra, 85,000, and Mosul (opposite the site of Nineveh), 90,000.

	1927–28.	1929–30.
Total revenue	£4,432,275	£4,295,811

BRITISH HIGH COMMISSION.

High Commissioner and Commander-in-Chief Sir Francis Humphrys, G.C.V.O., K.C.M.G., K.B.E., C.I.E. (1929).
A.D.C., Lt. J. de B. Stansfeld.
Counsellor, Maj. H. W. Young, C.M.G., D.S.O.
Political Secretary, R. S. M. Sturges, O.B.E.
Financial Secretary, F. E. Stafford.
Legal Secretary, J. H. B. Nihill, M.C.
Consular Secretary, C. Empson.
Oriental Secretary, Capt. V. Holt.
Commandant, Iraq Levies, Brigadier J. G. Browne, C.M.G., C.B.E., D.S.O.

BRITISH CONSULAR OFFICES.

Baghdad—Consul-General, Sir Francis Humphrys, G.C.V.O., K.C.M.G., K.B.E., C.I.E.
" *Consul*, Charles Empson.
Basra—Consul, Gerald H. Selous, O.B.E.
Abadan—Vice Consul, (the Port Officer holds the rank of acting Vice Consul).

BRITISH CHAMBERS OF COMMERCE, Baghdad and Strand Road, Basrah.

CAPITAL, Baghdad.

Baghdad is 840 miles by air from Cairo, Egypt. Mails between London and Baghdad may be sent by weekly Air Mail Service *viâ* Egypt. Motor convoys carrying mails run twice weekly between Baghdad—Damascus (the normal route for letter post).

ITALY.

(Regno d'Italia.)

King, Victor Emmanuel, *born* November 11, 1869; *married*, Oct. 24, 1896, Princess Helen of Montenegro; *succeeded to the throne* July 29, 1900.
Heir Apparent, H.R.H. Humbert, Prince of Piedmont, *born* Sept. 15, 1904.

CABINET (June 30 1924: reconstructed 1925 and 1929).

Premier and Minister of Interior, *Signor Benito Mussolini.

*Signor Benito Mussolini is the accredited leader of *Fascism*, the *Fascisti* representing a revolutionary movement against the inactivity of post-War Italian statesmen. The uniform of the movement is a black shirt, and the name is derived from *fascio* or band (*cf.* the *fasces* of the Roman lictor) in which the movement was organised.

Justice, Signor Alfredo Rocco.
Finance and Treasury, Dr. Antonio Mosconi.
Foreign Affairs, Signor Dino Grandi.
War, Gen. Pietro Gazzera.
Marine, Adm. Giuseppe Sirianni.
Air, Gen. Italo Balbo.
Public Works, Signor Arnaldo di Crollalanza.
Corporations, Dr. Giuseppe Bottai.
Colonies, Gen. de Bono.
National Education, Prof. Balbino Giuliano.
Agriculture and Forests, Signor Giacomo Acerbo.
Communications, Count Costanzo Ciano.

Ambassador in London, His Excellency Antonio Chiaramonte Bordonaro, G.B.E., 20 Grosvenor Square, W. 1.
Counsellor, Signor Francesco Giorgio Mameli.
1st Secretary, Nobile Don Renato Prunas Barrago.
2nd Secretary, Signor Pasquale Jannelli.
3rd Secretaries, Nobile Giulio del Balzo dei Duchi di Presenzano; Baron Giovanni Scola Camerini.
Attaché, Signor Gaetano de Facci Negrati.
Naval Attaché, Capt. Angelo Jackino.
Military Attaché, Lieut.-Col. A. Infante, D.S.O.
Air Attaché, Lieut.-Col. Pier Francesco Bitossi.
Commercial Counsellor, Signor Giovanni Battista Ceccato.
Asst. do., Signor Giuseppe Massone.
Special Attaché, Signor Giuseppe Palliccia, O.B.E., M.C.
Chancellor, Signor Giuseppe de Grossi.
Royal Consul-General, Nob. Alessandro de Probizer, 68 Portland Place, W. 1.
Vice-Consul, Signor P. Righetti.

A Kingdom in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba, and about 70 minor islands (with certain dependencies hereinafter noted). It is bounded on the N. by the Republics of Switzerland and Austria, on the S. by the Mediterranean, on the E. by the Adriatic and Yugoslavia, &c., and on the W. by France and the Ligurian and Tyrrhenian Seas. The total area of the kingdom of Italy in 1914 was 110,623 sq. miles, and by the *Treaty of Versailles* (June 28, 1919) Italy gained from Austria-Hungary the Trentino (about 4,000 sq. miles) and Trieste (with about 1,000 sq. miles of the Adriatic Sea-board).

The total area of the Kingdom of Italy was estimated (Dec. 1927) at 119,743 square miles, with a population at the census of March 29, 1931, of 42,158,817. There is a large settled and floating population of Americans and English.

By a treaty signed at Rome (Jan. 27, 1924), the *Free State of Fiume* came to an end. Yugoslavia's sovereignty over Port Baros and the Delta is established by the treaty, and Italy acquired the town and harbour works of Fiume, together with a narrow strip of hinterland. Italy agreed to lease to Yugoslavia the Thaon di Revel quay at a rental of one gold lira for 50 years, the railway station being established as an international frontier station. Fiume is now the capital of the newly created Italian Provincia del Carnaro, and has the status of an Italian provincial town.

The Italian peninsula is traversed throughout its length by the chain of the Apennines; the Alps form its northern limits, dividing it from France, Switzerland, Germany, Austria and Yugoslavia. *Mont Blanc* (15,782 feet), the highest peak of the Alps, is in the French Pennine Alps, but within the Italian borders are Monte Rosa (15,217 feet) and several peaks from 12,000 to 14,000 feet. The chief rivers are the Po, the Adige, the Tiber, and the Arno.

GOVERNMENT.—Italian unity was accomplished under the House of Savoy, after an heroic struggle from 1848–1870, in which the great patriots *Mazzini* (*born* 1805, *died* 1872) and *Garibaldi* (*born* 1807, *died* 1882) were the principal figures. It was completed when Lombardy was ceded by Austria in 1860 and Venice in 1866, and through the evacuation of the Papal States by the French in 1870. In 1872 the King of Italy entered Rome, and that city was declared to be the capital. The government was that of a constitutional monarchy with a legislature of two houses—the *Senate* (of 385 life members appointed by the King), and the *Chamber of Deputies* of 536 members (elected by adult manhood suffrage). Under the reform instituted by Signor Mussolini an entirely new and complex form of government has been built up—the Fascist "syndical-corporative" state. The Senate and Chamber are retained but the latter are elected *en bloc*, a list being drawn up by the Fascist Grand Council and submitted to the electorate for acceptance or rejection as a whole. The basis of the composition of the list is roughly equal representation of capital and labour, the essence of the "syndical-corporative" idea being that the State should take charge of the economic development and functioning of the country.

PRODUCTION.—Agriculture (including the growing of grapes, olives and chestnuts) is the principal industry. Italian wines are numerous and celebrated, and olives and olive-oil are furnished by Tuscany, Liguria, and the province of Bari; while fruit abounds and is largely exported. The cultivation of the silkworm forms an important industry. Among the principal minerals are iron, lead, zinc, copper, manganese, and antimony ores, sulphur, gypsum, amianthus, alum, and boracic acid. Silver is found in Sardinia, and some gold in the Alps. Salt and tobacco are Government monopolies.

The principal exports are cotton, silk and woollen tissues, motor cars, olive-oil, wine, candied citron, sienna earths, pastes, coral, rags, boracic acid, raw and thrown silk, hemp, cattle, straw hats, rice, iron, zinc and copper ores, sulphur, marble, fruit, vegetables, fresh and prepared meats, poultry chemical products, woods, roots, &c., for dyeing and tanning, artistic works, &c. The imports chiefly consist of cotton, wheat, coal, coke, chemicals, colonial produce, yarns, jute and manufactured goods, woollens, raw silk, silkworms' eggs and cocoons, machinery, iron and steel in bars, plates and rails, hardware, raw hides, horses and cows, fixed oils, salt fish, dye-stuffs, tobacco, earthenware, &c. The manufactures are woollen, cotton, silk, hemp, and linen yarns and tissues, motor cars, rubber tyres and tubes, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, alabaster ornaments), &c. Sugar is extracted from beet in large quantities for home consumption.

DEFENCE.—The *Army* consists of 30 Infantry Divisions and 2 *Divisioni Celeri* (Cavalry and Cyclists) organized in 11 Army Corps, but a large number of Units and Services, *e.g.*, Bersaglieri, Alpini, Tanks, &c., are not included in these

formations. During summer months (with two classes of conscripts with the colours) the strength is about 400,000; in winter months 200,000 (with one class). Age of liability for recall to Military service was raised in 1929 and brings total numbers available in case of war to 4,000,000–4,500,000 men. The National Militia (Black Shirts) are also part of the Land Forces of Italy. Their establishment is 300,000, but only a small percentage are on permanent service, the remainder being in civil employ, ready for duty whenever required. The Militia supplies 2 Battalions to each Infantry Division in war. On May 24, 1915, Italy declared war on Austro-Hungary, and on Aug. 27, 1916, a state of war was declared to exist with Germany. The cost of the war to Oct. 31, 1918, amounted to 48 milliards of lire (£1,920,000,000). During the War of 1914–1918, over 15 per cent. of the population were mobilised, and 5,250,000 men passed into the Armies of Italy. *The Navy includes 5 modern* and 1 pre-Dreadnought battleship, 16 cruisers, 1 aircraft carrier, 11 flotilla leaders, 60 destroyers, 70 torpedo boats, 42 submarines, 12 gunboats and despatch vessels, 2 river gunboats, and 46 minesweepers and minelayers. The peace *personnel* of the Italian Navy is about 45,000 all ranks. Spezia and Pola, the chief naval and *military ports of the kingdom, are securely* fortified. The *Air Force* consists of 110 squadrons of aircraft, of which 10 are employed in the colonies. The official first-line strength of aircraft is 973 machines, with a further 100 in reserve. The *personnel* for 1929 includes 941 officers and 18,631 other ranks, the expenditure for 1929–30 being 700 million *lire*, of which 60 million is for *Civil Aviation*.

EDUCATION.—Primary Education is free and compulsory, and evening continuation classes are also compulsory for military recruits. It is maintained by local taxation and State grants. Secondary education is generally State-maintained, and schools are increasing in number. Several of the Universities are of very ancient foundation.

COMMUNICATIONS.—On July 31, 1930, there were 10,407 miles of railway open for traffic, 1,022 being electrified and 352 in course of electrification; the post-offices (1929) numbered 11,228, and there were (1929) 40,855 miles of telegraph line. The sea-going commercial marine (1929) consisted of 1,396 steamers (3,212,302 gross tons) and 2,692 sailing vessels (168,279 tons). In 1929 248,379 ships (77,177,450 net tons) entered Italian ports; the clearances were 248,494 (77,185,386 net tons).

Rome, transit, 44 hours.

ITALIAN COLONIES, &c.

Libia.—The Turkish vilayet of Tripoli and the Mutessarifat of Benghazi on the northern coast of Africa, were occupied by Italy in 1911–12, and under the Treaty of Ouchy (Oct. 1912) the sovereignty of the province was transferred to the King of Italy, the spiritual headship over the Muhammadan population being retained by the Caliph. Tripoli is the most easterly of the Barbary States, extending from the frontiers of Tunis to those of Egypt, a distance along the coast-line of nearly 1,100 miles, and inland to the south a distance of about 800 miles. The transferred territory comprises the four sub-provinces or Mutessarifilik of Tripoli, Khoms, Jabel-el-Gharb, and Fezzan, and also of Benghazi or Cyrenaica, a total area of 810,000 square miles, with a population of about 1,000,000. There are no rivers in the country, and, the rainfall being precarious, a good harvest can only be reckoned on every four or five years. Barley, dates, olives, oranges, lemons, and vegetables are produced, and the principal imports are metals, British and other European manufactures, tea, beads, wine and spirits, besides a number of articles for barter in Wadai, Bornu, and the Western Sudan, whither caravans proceed from Tripoli. The principal articles of exports are ostrich feathers, ivory, skins, sponges, hides, esparto grass, wool, cattle, and horses. The ancient ruins in Cyrenaica, *i.e.*, at Cyrene, Ptolemais, and Apollonia, are interesting to explorers, as well as those at Leptis Magna, which is close to Khoms, or 70 miles from the city of Tripoli. The population of Benghazi consists of Arabs, Greeks, Maltese, and a few Levantines. The commerce in cereals, wool, cattle for Malta, and other agricultural produce, is considerable, when a sufficient rainfall causes good harvests. The capital of "Tripolitana" is Tripoli (population 60,000), and of Cyrenaica, Benghazi (population 35,000).

Governor of Cyrenaica, and Tripolitana, Marshal Badoglio.

Eritrea is a Red Sea colony, and extends from Ras Kasar, 18° 2′ N., to Ras Demoira, 12° 42′ N., and is bounded on N.W. by the Anglo-Egyptian Sudan, on S. by Abyssinia, and on S.E. by French Somaliland. It consists of a triangular portion of barren and sandy lowland with a coast-line along the Red Sea of about 700 miles, and covers a total area of 64,000 square miles, with a population of about 510,000, of whom about 3,500 are Europeans. The capital is Asmara, Massowa being the chief port, where there is a good harbour. The principal products are potash, skins, and salt, of great value as being the monetary currency of Southern Abyssinia.

Governor of Eritrea, H.E. Duke Astuto di Lucchesi.

Somaliland.—Italian Somaliland comprises a coastal strip on the Gulf of Aden and the Indian Ocean, from 11° N. lat. to the Equator, and is bounded on the N. by the Gulf of Aden, on E. by the Indian Ocean, and on W. by British Somaliland, Abyssinia, and British E. Africa. The total area, including the territory of Jubaland (and the port of Kismayu) transferred from Kenya by Great Britain in 1925, is about 220,000 sq. miles, and the population is estimated at 900,000. Agriculture and camel and cattle rearing are the principal industries. The capital is Mogadisho, on the Indian Ocean.

Governor of Italian Somaliland, Signor M. Rava.

Tientsin.—Italy obtained in 1902 a concession of land fronting the Peiho river (China), with a total area of 20 square miles and a population of about 10,000 natives.

Ægean Dependencies.—Rhodes, Egeo and the Dodecanese (12 islands occupied by Italy in 1912 during the war with Turkey, viz.:—Stampalia, Scarpanto, Caso, Piscopi, Nisiro, Calimno, Lero, Patino, Cos, Simi, Calchi, and Lipso). The seat of administration is at Rhodes (Rodi) and the total population is about 100,000.

JAPAN.

(Nippon.)

Emperor (Tenno) of Japan, His Imperial Majesty Hirohito, K.G., G.C.B., G.C.V.O., *born* April 29, 1901; *succeeded* Dec. 25, 1926; *married* (1924) Princess Nagako (*born* March 6, 1903), daughter of the late Prince Kuniyoshi Kuni (*died* Jan. 27, 1929), and has issue three daughters:—
(i) H.I.H. Princess Shigeko.
(ii) H.I.H. Princess Kazuko.
(iii) H.I.H. Princess Atsuko.

Brothers of the Emperor:—
(1) H.I.H. Prince Yasuhito Chichibu, *born* June 25, 1902, *married* Sept. 28, 1928, Setsuko Matsudaira (*born* Sept. 9, 1909).
(2) H.I.H. Prince Nobuhito Takamatsu, *born* Jan. 3, 1905, *married* Feb. 4, 1930, Kikuko Tokugawa, grand-daughter of the late Shogun Tokugawa.
(3) H.I.H. Prince Takahito Sumi, *born* Dec. 2, 1915.

CABINET (April 14, 1931).

Prime Minister, Baron Wakatsuki.
Minister of Foreign Affairs, Baron Kijuro Shidehara.
Minister for Home Affairs, Kenzo Adachi.
Minister of Finance, Junnosuke Inouye.
Marine, Admiral Baron Kiyotane Abo.
War, General Minami.
Justice, Viscount Chifuyu Watanabe.
Education, Ryuzo Tanaka.
Commerce and Industry, Sachio Sakurauchi.
Agriculture and Forestry, Chuji Machida.
Communications, Matajiro Koizumi.
Railways, Shujro Hara.
Overseas Affairs, Baron Wakatsuki.

Ambassador in London, Tsuneo Matsudaira, G.C.V.O., 10 Grosvenor Square, W. 1.
Chancery of the Embassy, 37 Portman Square, W. 1.

Counsellor, Hirosi Saito.
1st Secretary, Renzo Sawada.
2nd Secretary, Kumaichi Yamamoto.
3rd Secretaries, Yutaka Ishizawa; Yoshitaro Yamada.
Attachés, Yuzo Isono; Kaoru Hara; Shinichi Sano; Akira Miyazaki; Hisanaga Shimadzu.
Military Attaché, Col. Masaharu Homma.
Asst. Military Attaché, Major Eiichi Tatsumi.
Naval Attaché, Capt. Shiro Takasu.
Asst. Naval Attaché, Lt.-Comdr. Shigeji Kaneko.
Financial Attaché, Juichi Tsushima.
Commercial Counsellor (1 Broad Street Place. E.C. 2.), Shinjiro Matsuyama.
Chancellors (37 Portman Square, W. 1), Iwao Kakegawa; Masatsugu Yamashita; Yoshio Sumino.
Consul-General (*London*), Shinjiro Matsuyama, 1 Broad Street Place, E.C. 2.
Consul (*Liverpool*), Issaku Okamoto.
,, (*Manchester*), Maj. W. P. Groves (*hon.*).
,, (*Middlesbrough*), Alfred William Bulmer.
,, (*Cardiff*), E. H. Trimby (*hon.*).
,, (*Glasgow*), A. Scott Younger (*hon.*).
,, (*Dublin*), A. M. Weatherill (*hon.*).

This ancient and extensive Empire consists of four large and many small islands, said to comprise in all above 4,223, the principal of which are Honshu, Shikoku, Kiū-shū, Hokkaidō or Yezo, situate to the north of the main island, from which it is separated by the Tsugaru Straits, and Formosa, called by the Japanese, Taiwan. The Ainu, an uncivilised but harmless tribe, who in ancient times occupied the greater part of the country, are still found in Yezo, but in diminishing numbers. The Kurile Islands have belonged to Japan since 1875, and in 1876 she incorporated the Luchu (Riu-kiu) Islands under the name of "Prefecture of Okinawa." The empire, with its dependencies, comprises an area of 260,783 square miles, with a population (Dec., 1928) of 83,536,911. The population of the mainland only on Sept. 1, 1929, was 62,938,200. The islands are eminently volcanic, and 18 of the summits are still active; the chief of these, Fuji-san, or Fuji-no-yama, the loftiest and most sacred mountain of Japan, about sixty miles from Tokio, is 12,370 ft. high, and has been dormant since 1707. Japan is also liable to frequent, and occasionally disastrous, earthquakes. The country is very mountainous, and not more than one-sixth of its area is available for cultivation. It possesses numerous fine harbours. The soil is productive, teeming with every variety of agricultural produce. Copper, iron, sulphur, lead, manganese, tin, tungsten, molybdenum, antimony, zinc, agate, cornelian, and rock crystal are found. Gold is found in the island of Sado, and silver mining is prosecuted on a small scale; while there is a good supply of middling coal. Petroleum is also being produced in quantities, especially in the Province of Echigo. Among the vegetable productions may be noted the camphor-tree, paper mulberry, vegetable wax-tree, and a lacquer-tree, which furnishes the celebrated "lacquer" of Japan. The principal timber trees are the Cryptomeria japonica, Pinus Massoniana, and Zelkowa Keaki; the Paulownia imperialis is largely used for fancy boxes and works of art; the maple is merely for ornament. Chestnut, beech, and elm are comparatively rare and little used. The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated; rice is the staple food of the people, about 347,500,000 bushels being consumed annually in Japan proper (home-grown crop 1930, 65,305,430 *koku*; koku=5 bushels, approximately). Agriculture, upon which the Japanese bestow great care, is their chief occupation. The coasts are extremely rich in fish. The floral kingdom is rich, beautiful, and varied, though scented flowers are comparatively few. Fruit is abundant, including the orange, persimmon and loquat; European fruits, such as apples, strawberries, pears, grapes, figs, and peaches are produced, and the American navel orange is extensively grown.

Commerce and Industry.—The chief manufactures are silk and cotton woven goods, cotton yarn (210 cotton spinning mills were in operation in Dec., 1928), matches, paper, glass, cement, chemicals and fertilisers, sugar, brushes, flour, insulated electric wire, woollen fabrics, rubber goods, soap, lacquer ware, porcelain, earthenware, mats, matting, hemp-braids, knitted goods, vegetable oil, crude camphor, camphor oil, straw-plaits, and bronze, while shipbuilding is an important industry in the yards. The chief imports are raw cotton from India, U.S.A., Egypt, and China; wheat from Canada, Australia and U.S.A.; oil cake from Kwantung Province and China; wool from Australia; crude rubber from Malaya; lumber from U.S.A.; and piece goods, metals, manures, woollens, wool, drugs, rails, locomotives, and machinery from the U.S.A. and Europe. Sugar is largely imported from the Dutch East Indies, Philippine Islands and Formosa; kerosene oil from U.S.A. and the Dutch Indies; beans, peas, and pulse from China, Kwantung Province, and Korea; and rice, principally from British India, French India, Korea, Siam, and China. The chief exports are silk, cotton fabrics, cotton yarns, tea, refined sugar, knitted goods, matches, coal, camphor, straw-plaits, porcelain, earthenware, marine products, paper, glass and toys.

Communications.—There were about 13,560 miles of Government and private railroad (steam and electric) on Dec. 31, 1929, in addition to 2,200 miles open in Korea, 951 miles in Formosa and 301 in Saghalien, while the South Manchurian Railway in China (754 miles) is under Japanese control. The mercantile marine of Japan and her dependencies consisted in 1929 of steamers and motor vessels of 4,215,772 gross tons, in addition to small craft and wooden ships. The total tonnage entered and cleared at the chief ports in 1929 was 133,140,249 (25,106 vessels). The three great ports are Kobé, Yokohama and Osaka, the first named having a large transhipment trade, in addition to direct imports and exports. In March, 1927, there were 8,784 post offices dealing with about 4,000,000,000 postal packets annually, and 166,271 miles of telegraph line carrying 67,165,166 messages outwards in the financial year 1926-27.

Defence.—Service in the *Army* is universal and compulsory between the ages of 20 and 40. The Army is divided into a first line (*Gen-eki*), and its reserve (*Yobi*); a second line (*Kobi*), and its reserve (*Kokumin*), with a third line to make good the wastage of war (*Hoju*). The peace strength of the first line is 17,786 officers and about 220,000 other ranks. The military *Air*

Force is organized in 8 flying regiments and a balloon corps; the Naval *Air* service consists of 17 shore-based squadrons, in addition to machines carried by aircraft-carriers and other ships, with 4 small air-ships and a balloon section. The *Navy* includes 6 battleships, 4 battle cruisers, 4 (10,000 ton) cruisers and 28 others, 5 aircraft carriers, 109 destroyers and 66 submarines. Japan declared war against Germany on Aug. 23, 1914, and captured the German fortress of Tsingtau in November, 1914.

Education is in the lower grades free and compulsory. High schools are State-aided, and prepare for a 3 years' course at the Universities. There are high schools for girls, and the technical and special schools are well attended. There are six State Universities of Tokio (2), Kyoto, Tohoku (at Sendai), Hokkaido and Kyushu (at Fukuoka), and 5 medical universities.

Finance:—

	1931–32.
Revenue (Budget)	*Yen* 1,458,771,000
Expenditure (do.)	1,448,523,000
Debt (April, 1930):—	
Internal	*Yen* 4,512,608,000
External	1,446,849,000
Floating Debt	204,000,000
Total	*Yen* 7,163,457,000

Trade of Japan:—

	1929. Yen.	1930. Yen.
Imports	2,216,000,000	1,546,051,000
Exports	2,148,000,000	1,469,852,000
Imports from U.K.	£13,435,000	£8,229,000
Exports to U.K.	£9,132,000	£8,064,000

Formosa.—The island of Formosa (Taiwan) was ceded by China to Japan (June 2, 1895) in accordance with the Treaty of Peace. On the E. coast of the island are the highest known sea cliffs in the world, 8,000 feet sheer above the water. Its total area is 13,500 square miles, with 4,410,114 inhabitants (1928). Imports, *Yen* 204,910,684; exports, *Yen* 271,893,266, in 1929. The colony has been self-supporting since 1906, producing 36,580,000 bushels of rice in 1930, and it is the principal source of the world's camphor supply. Estimated rev. and exp. (1928–29), *Yen* 109,246,000. Capital, Taihoku; pop. (1928), 219,566.

Saghalin (Karafuto).—The southern half of this island was ceded by Russia at the close of the Russo-Japanese war. The ceded territory has a total area of 9,824 sq. miles with a population (1928) of 240,502. The Japanese Government is encouraging the settlement of agriculturists, and there is a large fishing industry. Estimated revenue and expenditure (1928–29) *Yen* 27,340,000.

The *Kwantung Peninsula*, which had been leased to Russia by China, was similarly leased to Japan after the Russo-Japanese war. Area, 1,300 sq. miles; population (1930) 905,781. The port of Dairen provides Japan with a mainland port, ice-free all the year round, and the peninsula is fertile. Imports (1929), £22,396,353; exports, £38,501,930. Estimated revenue and expenditure (1928–29), *Yen* 24,091,717. Capital, Port Arthur (Ryojunko); chief port, Dairen; pop. (1930), 369,767.

The *Pescadores* (Bokoto) consists of about 63 islands, with a total area of 85 square miles, and a population (1928) of 62,606.

Korea (Cho-sen).—By a treaty of Aug. 23, 1910, Korea was annexed to Japan and became part of the Japanese Empire.

Korea is situated between 122° and 128° E. long., and between 34° and 43° N. lat., and the coast is fringed with innumerable islands, of which the largest is Quelpart. Total length, 600 miles from north to south, and greatest breadth 135 miles from east to west, with an area of about 85,156 square miles. Population estimated at 19,189,699 (Dec. 1928); there are 469,043 (Dec. 1928) Japanese in the country. The soil is fertile, but the arable land is limited by the mountainous nature of the country. The staple agricultural products are rice and other cereals, beans, cotton, tobacco, and hemp; fruit-growing is making progress and seri-culture is thought to have a bright future. Ginseng, a medicinal root much affected by the Chinese, is largely grown under Government supervision at Songdo (Kaijo), and, being a Government monopoly, forms a rich source of revenue. Gold, copper, coal, iron, and other minerals are distributed throughout the country. There are extensive forests in the extreme north. The principal exports are rice, beans, silk, fish, fish-oil and manure, iron and iron ore, raw cotton, livestock and hides. Manufactures are as yet in a primitive condition, but are growing, including cotton yarn, silk-reeling, sugar, paper, artificial fertilisers, cement, flour (output at present small in each case). The greater part of the sea-borne trade is carried in Japanese bottoms. Considerable progress is being made in the direction of the proper lighting of the coast. The total railway mileage open to traffic is (1929) 2,200 miles. Estimated rev. and exp. (1930–31), *Yen* 238,859,783. Capital, Seoul (Keijofu); pop. (1928) 321,848.

Imports into Korea, 1930 ..... *Yen* 367,050,000
Exports from Korea, 1930 ..... ,, 266,540,000

Pacific Islands.—Under the *Treaty of Versailles*, 1919, Germany renounced the sovereignty of all her over-sea possessions, and the German Pacific Islands N. of the Equator have been placed under Japanese mandate. These islands, in Micronesia, are (1) *The Marshall Islands* (pop. 9,678), with seat of government at Jaluit; (2) *The Caroline Islands* (pop. 38,647), with seats of government at Truk and Ponapé (Eastern group) and Palew and Yap (Western group); (3) *The Ladrone (or Marianne Islands* (pop. 16,596, with seat of government at Sipan. Estimated rev. and exp. (1927–28) for the Pacific Islands, *Yen* 4,546,526.

CAPITAL OF THE JAPANESE EMPIRE, Tôkyo, formerly called Yedo, the residence of the Emperor; population estimated at 2,294,600 (Sept. 1929). On Sept. 1, 1923, a disastrous earthquake destroyed great portions of the cities of Tokyo and Yokohama, but the work of reconstruction is now completed. The chief cities are—

Osaka	2,408,800	Sendai	189,300
Tokyo	2,294,600	Sapporo	181,100
Nagoya	904,700	Hakodate	180,300
Kyoto (ancient capital)	755,200	Kure	176,900
Kobé	755,200	Kumamoto	162,100
Yokohama	543,900	Otaru	156,800
Hiroshima	276,500	Kanazawa	156,400
Fukuoka	217,800	Kagoshima	143,000
Nagasaki	199,700	Yawata	141,900
		Okayama	136,400

FLAG: White, charged with rising sun (red).

Attaché, Monsieur Alfreds Ezeriņš.
Consul-General, Charles Louis Seya, 31, Kingsway, W.C. 2.
Vice-Consul, Charles E. Jumutz.

A Baltic Republic at the eastern and southern shore of the Gulf of Riga, formerly part of the Russian Empire. Latvia was proclaimed an independent state on Nov. 18, 1918. Its frontiers are common with Esthonia, Russia, Poland and Lithuania. The constitution is that of a democratic republic, with universal suffrage and proportional representation. Parliament (*Saeima*) consists of a single chamber of 100 members. The area is about 25,000 sq. miles, with a population of about 2,000,000.

The surface of the country is generally flat with marshy areas, interspersed with many lakes. Agriculture and dairy farming are the principal occupations of the people, and there are many flourishing industries. The fisheries are also of importance. The chief exports are flax, timber, butter, paper and glass; chief imports are agricultural machinery and implements and wood and metal machinery. The tonnage of ships entered in 1930 was 1,951,848 tons. The chief ports are Riga, Libau and Windau. In 1930 there were 1,860 miles of railway in operation.

An independent Negro Republic of Western Africa, occupying that part of the coast of North Guinea which is between the rivers Cavalla, S.E., and Mano, N.W., a distance of about 350 miles,

with an area of about 43,000 square miles, and extending to the interior to latitude 8° 50′, a distance of 150 miles from the seaboard. It was founded by the American Colonization Society in 1820, and has been recognised since 1847 as an independent State. The population is estimated at 1,500,000 to 2,000,000, including about 12,000 Americo-Liberians. The principal exports are palm-kernels, piassava, palm-oil, coffee, cocoa, ivory, kola nuts and rubber. The chief imports are rice, tobacco, Manchester goods, provisions, spirits, salt, hardware, glass and earthenware and building materials. The executive power is vested in a President elected for four years, assisted by a ministry; there are two houses of Legislature, the Senate, with 10 members elected for six years, and the House of Representatives with 22 members elected for four years. There is no regular army, but there is an enlisted frontier force of about 600 men under American and native officers. In 1927 arrangements were made with the Finance Corporation of America for a loan of 5,000,000 dollars, and the issue of the first half is to be completed by the end of 1930. The previous 1912 loan, in which British financial interests preponderated, was paid off from the proceeds of the new loan, which is secured by a first lien on customs revenues and head moneys. The Loan Agreement also provides for financial supervision by American officials. There are 15 ports of entry, including 4 river ports, along the 350 miles of coast and 12 interior ports. In 1929, 1,029 vessels (2,426,579 net tons) entered and cleared at all ports; of these 272 (825,933 net tons) were British.

	1928-29.
Revenue	U.S. $1,028,123
Expenditure	1,098,152
External Debt (1929)	2,000,000
	1929.
Imports	U.S. $2,064,429
Exports	1,475,356
Imports from U.K.	533,323
Exports to U.K.	174,794

Minister in London, His Excellency Vaclovas Sidzikauskas.

Legation, 10 Palace Gate, W. 8.

Consul-General, V. Gylys, 15 Endsleigh Street, W.C. 1.

The independence of the Lithuanian Republic (Lietuva) was proclaimed at Vilna on Feb. 16, 1918. The Republic consists of the former Russian Government of Kovno and portions of the Suvalki and Vilna Governments, and is bounded on the N. by Latvia, on the S. and E. by Poland, and on the W. by Germany and the Baltic Sea, the total area included in the Republic (including Memel Territory) being about 20,000 sq. miles, with an estimated population of 2,000,000. Under the *Treaty of Versailles* Germany renounced the sovereignty over the town and territory of Memel, and a French High Commissioner, with a small garrison, governed the Territory in the name of the Allies until Jan. 1923, when the Territory was invaded and occupied by the Lithuanians. The sovereignty of the Territory has been transferred to Lithuania, as set out in the Convention signed at Paris (May 8, 1924) and ratified Aug. 1925. The total area administered is 945 square miles, with a population of about 150,000, of whom about 36,000 inhabit the town of Memel.

The legislature consists of a single chamber Assembly (*Seim*), elected by universal adult suffrage, the Executive being entrusted to a council of ministers.

The chief industries are agriculture and forestry, the chief products of the Republic being rye, wheat, barley, oats and potatoes; the exports are flax, linseed, timber, livestock, and dairy produce; the chief imports are textiles, sugar, herrings, and machinery.

	1929.	1930.
Revenue	*Lits* 299,510,000	*Lits* 313,192,100

Grand Duchess, H.R.H. Charlotte, *born* Jan. 23, 1896, *succeeded* (on the abdication of her sister) Jan. 9, 1919; *married*, Nov. 6, 1919, Prince Felix of Bourbon-Parma. *Heir Apparent*, Prince Jean, *born* Jan. 5, 1921.
Minister of State, Joseph Bech.

Consulate-General in London, Moorfield House, Tenter Street, E.C. 2.

A Grand Duchy in Central Europe, bounded by Germany, Belgium, and France; it formed part of the Germanic Confederation, 1815–66, and was included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory under the sovereignty of the King of the Netherlands, on whose decease, Nov. 23, 1890, it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the commencement of the war in 1914, but was liberated in 1918, U.S troops entering the capital on Nov. 22. By the *Treaty of Versailles*, 1919, the country is declared to be free from all ties with Germany. The area is 999 square miles; the population (1929) 222,092, nearly all Roman Catholics. The principality is rich in iron-ore. The revenue in 1931 was estimated at 483,208,600 francs, expenditure 445,588,000 francs; debt (Jan. 1, 1930) 478,000,000 francs. There are 328 miles of railway. The army numbers about 300 men. The capital, Luxemburg (population 52,800), is a dismantled fortress.

FLAG: Red, white, blue.

BRITISH LEGATION.

British Envoy Extraordinary and Minister Plenipotentiary, The Rt. Hon. the Earl Granville, G.C.V.O., K.C.M.G. (1928) (*Ambassador at Brussels*).

Minister in London, Señor Don Leopoldo Ortiz, 48 Belgrave Square, S.W.1.
Consul-General in London, Señor Don Gustavo Luders de Negri, Bush House, Aldwych, W.C. 2.

Mexico occupies the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from 15° to 32° 30′ N. lat. and 87° to 117° W. long., and comprising one of the richest and most varied zones in the world. It comprises 27 states, 3 territories, and the federal district of Mexico, making in all 31 political divisions, comprehending an area of 768,883 square miles, with a popuiation (1930) of 16,404,030. Mexico is rich in archæological remains, and work is proceeding in every district to remove the earth covering which for many centuries has kept them from view. Near the City of Mexico are a number of pyramids built to a great extent with boulders from the river beds. The *Pyramid of the Sun* (now called "Tonatiuh") is 761 feet from N. to S., and 725 feet from E. to W., and rises to a height of 216 feet. The *Pyramid of the Moon* (now called "Mextli") is 426 feet × 511 feet, and rises to 150 feet. The staircases vary in construction between terrace and terrace and are found to be intact. Other places of interest are near Oaxaca, Papantla, Zempoala on the Continent, and Uzmal, Chichen-Itza and other points on the E. side of Yucatan.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are prolonged from the north to a convergence towards the narrowing Isthmus of Tehuantepec, their course being parallel with the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the Peninsula of California, with a mountainous surface, separated from the mainland by the Gulf of California. The Sierra Nevada, known in Mexico as the *Sierra Madre*, terminates in a transverse series of volcanic peaks, from Colima on the west to Citlaltepete on the east. The low-lying lands of the coasts form the *Tierra Caliente*, or tropical regions (below 3,000 feet), the higher levels form the *Tierra Templada*, or temperate region (from 3,000 to 5,000 feet), and the summit of the plateau with its peaks is known as *Tierra Fria*, or cold region (above 5,000 feet). The only considerable rivers are the *Rio Grande del Norte*, which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico, and the *Rio Grande de Santiago*, which runs from Lake Chapala to the Pacific. The remaining streams are governed by the formation of the land, and run in mountain torrents between deep-cut cañons or "barrancas." The largest fresh-water lakes are *Chapala* (70 miles long and 20 miles wide), and *Patzcuaro* and *Xochimilco*. In the north-west are saline lakes amid bare and dry regions. The climate varies according to the altitude. Yellow fever sometimes occurs at Merida, Yucatan.

The earliest invaders, or Toltecs, gave place in the 13th century to the *Aztecs*, who were conquered in the 16th century by Spanish adventurers under *Hernan Cortes*.* Spanish rule was established at *Tenochtitlan*, a 14th century Aztec city (now Mexico), and Mexico remained a Spanish dominion until its freedom was asserted by a revolutionary war, 1810–1821. From 1837–1848 the province of Texas gave rise to hostilities with the United States, terminating in a three years' war and a cession of the disputed territory to the victorious northern States. In 1810 a Republic was proclaimed, but Iturbide declared himself Emperor in 1821. He was shot in 1824, and a Republic was again established. In 1862 the French troops came to Mexico, and in 1864 an Empire under Ferdinand Maximilian of Austria was declared. In 1867 the downfall of the Empire

* The remains of *Hernan Cortes* have been definitely located in the Temple of Jesus, Mexico City. They are contained in a marble vault, with the funeral garments.

and the death of the Emperor gave rise to the new Republic, which has endured to the present day. The most prominent of modern Presidents is *Porfirio Diaz*, who ruled (except during 1880-4) from 1876 to May 25, 1911. Since the fall of Diaz internal disturbances, in which eleven Presidents have figured, have continued with varying degrees of intensity, and considerable friction (amounting almost to a state of war) has arisen with the United States. On July 15, 1914, Venustiano Carranza assumed control of the executive, but his anti-foreign attitude and legislation, together with the seizure of many properties (a few of which *belonged to British subjects*) led to a refusal of the British Government to grant recognition of his administration. The degree to which Carranza departed from his declaration of neutrality during the Great War undoubtedly influenced the British Government when this policy was adopted. Carranza was overthrown by a further revolution in 1920, and is believed to have been shot by the insurgents. After the fall of Carranza the executive power was assumed by de la Huerta as provisional President, and on Dec. 1, 1920, General Obregon, whose *coup d'état* had caused the downfall of Carranza, became head of the Republic. The determination of the new government to uphold the Carranza constitution of 1917, which has led to confiscatory measures in connection with nationalization of the petroleum of the country, and contains (among other departures from the accepted comity of nations) provisions which restrict the rights of foreigners, caused the British, American, French and Belgian governments to adopt a policy of non-recognition of the Obregon administration. The expropriation, without payment of compensation, of several hundreds of private properties, in pursuance of the Obregon agrarian policy, called forth strong protests from foreign Powers, but all the Powers except Great Britain eventually recognised the Obregon administration. General Obregon was afterwards assassinated. In 1925 relations between Great Britain and Mexico were re-established, and a Special Anglo-Mexican Claims Commission has since met.

Vera Cruz, Tampico, Progreso, and Puerto Mexico are the chief ports on the Atlantic or Gulf of Mexico, and Acapulco, Manzanillo, Mazatlan, Salina Cruz, and Guaymas on the Pacific. There were 16,110 miles of railroad open on Sept. 1, 1926, and 54,670 miles of telegraph. The railroads have in a large measure been built by American and English companies. In Sept. 1925 the Highway Commission of Mexico had constructed (to Dec. 31, 1928) 247 kilometres of road, finished with asphaltic treatment; 332 kilometres lacking only bituminous treatment, and 700 kilometres open to traffic, but still in various stages of construction. The city of Mexico is linked with Puebla, Tampico, Vera Cruz, Toluca, and Saltillo by telephone; the line is now extended to the U.S. border and thence is connected to Canada. The city is connected by wireless to U.K. and Europe.

The principal agricultural crops are maize, beans, wheat, barley, Chile-pepper, sugar, coffee, cotton, tobacco, vanilla, flax, grapes, and all kinds of tropical fruit. The maguey, or Mexican aloe, yields a favourite beverage, "pulque"; other species of the same plant supply pita-flax and sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony, and caoutchouc trees. The mineral wealth is very great; silver and gold, copper, lead, and quicksilver, iron and coal, are the leading products of the mines, and Mexico produced 50,150,610 barrels of petroleum in 1928. The mineral production is stated at:—

Mineral.	Kilograms.	
	1928.	1929.
Gold	21,745	20,276
Silver	3,375,966	3,381,038
Lead	236,485,856	248,400,858
Copper	65,505,652	86,553,669
Zinc	161,747,077	174,049,667
Mercury	87,419	82,636
Antimony	3,577,798	2,709,365
Arsenic	8,669,296	9,664,587
Cadmium	353,545	...
Graphite	4,972,051	5,720,741
Coal (Tons)	1,015,831	...

Petroleum Production.

Year.	Barrels.
1927	64,120,000
1928	50,151,000
1929	44,688,000
1930	39,600,000

Woollen and cotton spinning and weaving, the making of footwear, and other branches of industry, are encouraged by high protective duties. The imports, nevertheless, consist very largely of textile manufactures. Of the exports 20 per cent. consist of silver and gold, while 35 per cent. represents the value of petroleum and its derivatives, mainly shipped from Tampico. Other important exports are copper, lead and zinc, also sisal hemp (henequen), coffee, cotton, resins, fresh vegetables and dried vegetables.

The monetary system has been placed on a gold basis, with a gold *peso* = 50 cents U.S. currency or 24·58*d.*; there is a large amount of silver currency in circulation. In Sept. 1922, the Mexican Government undertook to set aside for the service of the debt the sum of 30,000,000 gold *pesos* in 1923, rising by 5 million gold *pesos* annually to 50 million gold *pesos* in 1927. However, this agreement with the International Commission of Bankers was amended in 1925, after the Government had found it necessary to suspend the service of the debt in June, 1924. The effect of the 1925 agreement was to eliminate the debt of the National Railways of Mexico from the public debt, thereby reducing this from 1,561 million Mexican gold *pesos* to 890 millions, as at Dec. 31, 1925. Furthermore, the 1925 agreement provided for the postponement of payment of the 75 million *peso* (which had not been met in 1924 and 1925) until 1928–1935. Service of the debt was resumed in 1926. In addition to the 890 millions above mentioned, other items which had not been included in the debt agreement of Sept., 1922, as amended in 1925, amounted to 108 millions as at Dec. 31, 1925, thus making a grand total of 998 million *peso* Mexican gold. The total debt, funded and floating and interest, was stated to be $1,253,105,699 as at Dec. 31, 1928.

The language of the country is Spanish.

Estimated revenue	(1931)	$298,000,000
Estimated expenditure	(1931)	298,000,000
Total Exports	(1928)	592,444,000
Total Imports	(1928)	357,858,000

	1929.	1930.
Imports from U.K.....	£2,537,652	£2,433,505
Exports to U.K.....	2,689,866	2,886,488

(Principauté de Monaco.)

Sovereign Prince, Louis Honoré Charles Antoine, *born* July 12, 1870, *acc.* June 25, 1922.
Heiress Apparent, Hereditary Princess Charlotte Louise Juliette (Duchess de Valentinois), *born* Sept. 30, 1898; *mar.* March 19, 1920, Prince Pierre de Monaco (Count de Polignac), and has issue a daughter, Princess Antoinette, *born* Dec. 28, 1920, and a son, Prince Rainier, *born* May 31, 1923.
Minister of State, Monsieur Louis Eugène Maurice Piette.
Secretary of State, M. François Roussel.

Consul-General in London, C. Nuthall Foreman, 37 Conduit Street, W. 1.
Chancellor, Edwin C. Isbell.

A miniature Principality on the Mediterranean, with land frontiers joining France at every point, and consisting of the old town of Monaco, La Condamine, and Monte Carlo, where is the famous casino. The Principality comprises a narrow strip of country about 3 miles long and 1½ miles broad, with (1927) 24,927 inhabitants, and a yearly average of over 1,500,000 visitors. The whole available ground is built over, so that there is no cultivation. There is a small harbour (24 ft. alongside quay), and the import duties are the same as in France. There is a local police force of 200 men.

CAPITAL, Monaco.

MOROCCO.

(Moghreb el aksa "The Farthest West")

French Protectorate, and Spanish and International Tangier Zone.

Sultan, Sidi Mohamed, *born* 1909; *proclaimed* Nov. 20, 1927.

Morocco, the largest of the Barbary States, is situate in the north-west of the African Continent, between 27°-36° N. lat. and 1°-11° 40′ W. long., with a total area estimated at 218,525 square miles, and a population of about 5,300,000. Morocco is traversed from the Atlantic coast in the south-west to the Algerian frontier in the north-east by five parallel ranges, known generally as the *Atlas Mountains*. Between the various ranges lie well-watered and fertile plains, the lower slopes of the northern flanks of the mountains being well wooded, while the southern slopes are exposed to the dry winds of the desert and are generally arid and desolate. The most northerly point of Morocco is the peninsula of Ceuta, which is separated from the Continent of Europe by the narrow strait of Gibraltar. The Jebel Musa dominates the promontory, and with the rocky eminence of Gibraltar was known to the ancients as *The Pillars of Hercules*, the western gateway of the Mediterranean. Between 32° N. and 30° N. is the headland Ghir, which encloses a bay containing the port of Agadir, formerly known as the "Gate of the Sudan."

The climate of Morocco is generally good and healthy, especially on the Atlantic coast, the country being sheltered by the Atlas Mountains from the hot winds of the Sahara. The extremes of temperature in Tangier and Mogador are 92° Fahrenheit in the summer and 37° in the winter, with a rainy season from November to April, but the summer-heat figures at all the intervening ports (Larache, Kenitra-Mehedia, Rabat-Sale, Fedalah, Casablanca, Mazagan, and Saffi) are markedly higher; the last-named port being the hottest. The Mediterranean coast is drier and less temperate, but not unhealthy, while the plains of the interior are intensely hot.

Government.—France is the paramount power, and represents the Sultan of Morocco in all foreign relationships, but the country is divided into three zones—the *French Zone*, the *Spanish Zone*, and the *International Tangier Zone*. Spain has had relations with Morocco for many centu-

ries. The northern portion of Morocco, as defined in the Franco-Spanish Treaty of 1912, forms a Spanish "sphere of influence." In this Spanish zone (which extended over the whole of Northern Morocco, with the exception of the International zone round Tangier) there were tribal risings in 1921, and during the operations to quell these risings the Spanish Expeditionary force met with serious reverses in the neighbourhood of Melilla. A Civil High Commissioner was appointed in 1922 over the Spanish zone to inaugurate a policy of pacification. In 1924 the military forces of Spain met with further reverses, and were withdrawn to a line running west from Rio Martin (on the Mediterranean) to within *fifteen miles of the Atlantic Coast, and thence* southwards to the French zone, near Alcazar el Kebir. In 1925 the French became embroiled and a considerable force was despatched from Algeria and France to strengthen the French Army in Morocco. In spite of the fact that he was fighting two European powers, however, Abd el Krim, the Riff leader, achieved such success as to be able to threaten the safety of Fez itself in July. But the danger was averted and after an anxious summer the autumn brought relief. The French and Spanish in conference in Madrid realised that their best chance of success lay in close co-operation, and the effect of this new policy soon made itself felt. In September the Spaniards landed at Alhucemas Bay and forced Abd el Krim to evacuate his headquarters at Ajdir. Simultaneously the French by pressure from the south were able to make progress which, if less spectacular, was of no less solid a nature, and by the time the rainy season forced a retirement to winter quarters the tide was definitely on the turn. In the Spring of 1926, following an abortive peace conference at Oujda, the French and Spaniards launched their final attack. By May 24 the Riff had been effectively crossed and Abd el Krim's headquarters at Targuist occupied, and on May 27 the Riff leader surrendered himself to the French. This was the signal for the general break away of the tribes. The French virtually restored peace in their zone and the Spaniards commenced a general movement for enforcing submission and disarmament in theirs, their arduous task being practically completed in 1927. The following year saw the work of pacification consolidated by development of all kinds. *Ceuta* (on the Mediterranean coast, opposite Gibraltar), in 35° 54′ N. lat. and 5° 18′ W. long., has been a Spanish possession since the close of the 16th century, and forms part of the administrative province of Cadiz, and the adjacent Alhucema and Zaffarin islands are Spanish possessions. A special international *régime* was designed for *Tangier* before the War by negotiations between the British, French and Spanish Governments, but the outbreak of the War prevented this *régime* from being put into operation. A new Convention instituting the *International Zone* of Tangier was, however, signed by the three governments at Paris on Dec. 18, 1923, and was brought into force on June 1, 1925. The Convention was modified by a Protocol signed at Paris, July 25, 1928, by the three Powers and Italy, who thereby adhered to the Convention. Both instruments have been adhered to by Belgium, The Netherlands, Portugal and Sweden, but the United States have not yet (Oct., 1931) signified their acceptance, and therefore retain their Capitulatory rights in the International Zone. The Convention provides for a complete international administration of the zone, except as regards native affairs, which are reserved to the Shereefian authority.

Production, Industry, etc.—Among the agricultural products are wheat, barley, maize, beans, peas, birdseed, linseed, coriander, cummin, fenugreek, esparto, and hemp, and the northern slopes of the Atlas produce many fruits, principally figs, almonds, pomegranates, lemons, olives, oranges, and grapes. the latter growing also in the plains. The live stock includes large quantities of horses, cattle, sheep and goats, while the egg industry is of importance. Important deposits of coal, manganese, iron ore, lead and zinc, as well as other minerals in smaller quantities, have been prospected, but their exploitation awaits transport facilities. Gold and silver are also found. Phosphates are exported in increasingly large quantities and constitute a great source of wealth for the French zone. The trade of Morocco is chiefly with France and Algeria, Great Britain, Italy and Spain, the chief imports being cottons, sugar, motor vehicles, petroleum, building materials, and soft goods, the exports being grain, phosphates, eggs, hides and skins, and wool. The unit of currency in the French protectorate is the Moroccan *franc*, which is closely allied to the French *franc*, while in the Tangier zones the franc, the *peseta* and the *Hassani peseta* are all current, and in the Spanish zone the two last of these currencies.

Communications.—The French Protectorate authorities are engaged in the serious development of normal gauge railways in their zone, and (Oct. 1931) 1,140 kilometres of normal and 1,300 kilometres of narrow gauge track are in working order. In addition, the completion of the Tangier-Fez full gauge system gives through service between Tangier and the principal towns of the French zone. Telegraphic communication is established by submarine cables from Tangier to Cadiz, Gibraltar, Rio Martin, Melilla, Tarifa and Oran, also between Casablanca and Brest. There are wireless stations at Tangier, Tetuan (military), Rabat, and Casablanca; inland lines have been built by the French connecting all important places in their zone, as well as to the borders of the Spanish zone, and the latter line is being extended to Tangier. The chief roads in the Tangier and Spanish zones are those linking Tangier to Ceuta *vid* Tetuan in the North, and to Arzila, Laraiche, and the French zone in the South. The French zone is well equipped with good main and secondary roads. *Air Services* are maintained between Casablanca and Toulouse (daily), and Casablanca and Dakar (weekly).

The principal *Harbours* are Casablanca, and Ceuta (for Tetuan), Tangier, Laraiche, Rabat, Mazagan, Saffi, Kenitra, and Mogador.

External Trade.—The imports into the *French Zone* in 1930 were valued at 2,209,727,000 francs, of which 300,000,000 francs represent the value of imports over the Algerian frontier; exports from French zone, 1930, *fr.* 719,000,000. The imports into the *Tangier Zone* were valued at 115,509,688 francs and the exports from the zone at 16,818,497 francs.

CAPITAL of French zone, Rabat, population 52,000 (Fez in the North, and Marrakesh in the South being the old capitals of the Sultans). The *French Resident-General* is M. Lucien Saint.

CAPITAL of Spanish zone, Tetuan, population 30,000 (principal ports, Laraiche and Rio Martin for Tetuan).

CAPITAL of International zone, Tangier, population 45,000.

Other towns (with populations exclusive of French army of occupation) are Fez (107,843) Marrakesh (193,582), Meknes (56,770) Sale (25,821), Casablanca (161,113), Rabat, with Sale (77,821), Mazagan (19,601), Saffi (26,158), and Oudjda (29,220).

Commercial Attaché, F. B. s' Jacob.
Consul-Gen., Th. H. de Meester, 28 Langham Street, W. 1.
Vice-Consul, D. E. E. Middelburg.
Agricultural Adviser, B. Gerritzen.

A maritime Kingdom of Central Europe, situate on the North Sea, in lat. 50° 46′—53° 34′ N. and long. 3° 22′—7° 14′ E., consisting of 11 provinces, and containing a total area of 12,761 square miles, with a population, May 1, 1931, of 7,938,114. The majority, about 55 per cent., belong to the several Reformed Churches, and the remainder are Roman Catholics, with about 115,000 Jews. The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The highest point is at Vaals, 656 ft. above mean sea level, but almost half the country is below the mean level of the sea. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Schelde. The chief native products are herrings and other fish, cattle, horses, swine, sheep, poultry, eggs, seed, potatoes, oats, rye, wheat, barley, beans, peas, buckwheat, sugarbeet, chicory, flax, hemp, tobacco, bulbs and dairy produce. The principal manufactures are shipping, bricks, margarine, cocoa, chocolate, linen, rich damasks, cottons, woollens, cigars and other manufactured tobacco, candles, confectionery, earthenware and pottery, glass bottles and ware, sugar, chemical and pharmaceutical products, matches, perfumery, bicycles, boots and shoes, starch, potato flour, engines, metal substances, iron and steel, wireless sets and parts, works of art in gold and silver, incandescent lamps, wireless apparatus and parts, machinery, motors, paper, printing, oils, beer, "geneva" and other liqueurs. Coal production (1930) 12,211,000 tons. Diamond-cutting employs numerous hands in Amsterdam.

Communications.—The total extent of canals is about 1,250 miles. There were 2,290 miles of railroad open in 1929, 1,330 miles of telegraph cable, and 2,782 miles of telephone cable. The mercantile marine, on Jan. 1, 1931, consisted of 902 steam and motor vessels of 6,944,000 cubic metres gross. In 1930 about 20,000 vessels (84,714,000 tons) entered and cleared at the various ports. An Act for the damming and draining of the Zuyder Zee was passed in 1918, and work is now in progress; the dam is expected to be completed in 1932.

Defence.—The Home Forces consist of a conscript army, with an annual levy of 19,500 men, producing a first-line army of 270,000, or (including reserves) 350,000 all ranks. The Royal Navy consists of 11 protected and 58 unprotected vessels.

Education.—Private State-aided primary instruction is encouraged rather than public, though the latter is provided if required, by local taxation. The average attendance at primary schools is 96 per cent. Secondary schools for working classes are numerous, well equipped and attended. The principal Universities are at Amsterdam, Groningen, Leiden,

and Utrecht, and there are technical universities at Delft (polytechnic), Rotterdam (commercial), Wageningen (agriculture), and Utrecht (veterinary).

Transit, 8 hours.

NETHERLANDS COLONIES.

I. *Netherlands' East Indies:—*
"Netherlands' India" comprises the islands of *Java* and *Madura*, the island of *Sumatra*, the *Riouw-Lingga Archipelago* (which with Karimon, Anambas, Natuna Islands, Tambelan, and part of Sumatra, forms the "Residency of Riouw"), the islands of *Bangka* and *Billiton*, part of the island of *Borneo*, *Celèbes Island*, the *Molucca Islands* (Ternate, Halmahera, Buru, Ceram, Banda, Timor-Laut, Larat, Bachiam, Obi, Kei, Aru, Babar, Leti and Wetar), part of *New Guinea*, part of *Timor Island*, and the islands of *Bali* and *Lombok*, with a total area of 730,000 sq. miles, and a population estimated at 53,000,000. The administrative capital is Batavia (pop. about 260,000).

Governor-General, Jonkheer Dr. A. C. D. Graeff, *appointed* March 26, 1926.

Java and Madura (51,000 sq. miles, pop. 1940,000,000) furnish sugar, tobacco, tea, coffee, tin, rubber, and other products for exportation. The "outlying" islands are frequently administered by their own princes, subject to the directions of a Netherlands Resident. The army was (1929) a colonial army of 1,293 officers and 37,100 men. The colonial revenue for 1931 was estimated at fl. 833,524,000 and the expenditure at fl. 887,102,000. The trade of Netherlands India was valued in 1929 at fl. 1,487,801,000 for exports and at fl. 1,166,305,000 for imports. The trade with Great Britain in 1930 was valued £4,510,429 for imports from, and at £6,586,2 for exports to Great Britain.

BRITISH CHAMBER OF COMMERCE FOR NETHERLANDS E. INDIES, Batavia, Java.

II. *Netherlands' West Indies:—*
"Netherlands' West Indies" comprise the mainland colony of *Surinam* ("Dutch Guiana in South America, and certain islands in the West Indies known as the "Colony of Curaçao (Curaçao, Bonaire, Aruba, part of St. Martin, St. Eustatius, and Saba) with a total area of 400 sq. miles, and a population estimated (1931) at 65,750. The administration capital of Surinam is Paramaribo (pop. 50,000); the capital of Curaçao is Willemstad (pop. 21,000).

NICARAGUA.
(República de Nicaragua.)

President (1929-1933), Señor Don José Maria Moncada, *assumed office* Jan. 1, 1929.

Minister in London, Señor Don Eduardo Perez-Triana, 4 Moorgate, E.C. 2.
Consul-General in London, General Carlos Castro Wassmer, 15 Union Court, E.C. 2.

The largest State of Central America, with long seaboard on both the Atlantic and Pacific Oceans, situate between 9° 45'—15° N lat. and 83° 40'—87° 38' W. long., containing an area of 51,660 English square miles and a population (1930) of about 750,000, of whom about three quarters are mixed blood and the rest Indian including the Mosquitos, who dwell on the Atlantic littoral and were formerly under British protection.

Nicaragua was discovered by Columbus in 1502, and was overrun by the Spaniards under Davila in the first quarter of the 16th century

forming part of the Spanish Captaincy-General of Guatemala until 1821, when its independence was secured. The present constitution rests on the fundamental law of Nov. 10, 1911 (amended 1913) and is that of a centralised republic. The President is elected by direct suffrage for four years.

The chief products are coffee, bananas, sugar, timber (cedar, mahogany, rosewood, &c.), tobacco, maize, rice, beans, cocoa, hides, gold and silver. Considerable quantities of foodstuffs are imported as well as cottons and other manufactures, principally from the United States, which also take the greater part of the exports.

There are (1930) 160 miles of railway, 2,842 miles of telegraph and 3,216 miles of telephone, and a powerful wireless station was completed at Managua in 1924. Good roads are very few, and transportation, especially in the rainy season (May-Nov.), is attended with great difficulties.

Corinto, on the Pacific coast, is the chief port of the country, handling about 70 per cent. of the total trade. Bluefields is an important port on the Atlantic coast, whence considerable quantities of bananas and timber are shipped to New Orleans. Owing to defective communications the Atlantic littoral is practically isolated from the rest of the Republic and the chief centres of population.

Education is backward, at least 60 per cent. of the population being illiterate.

The official language of the country is Spanish.

Counsellor, Daniel Steen.

Secretary, Rolf Andersen.

Agricultural Adviser, A. Riple (*Newcastle upon Tyne*).

Consul-General, G. Conradi.

Vice-Consul, Stig Thobro Olmer.

Norway, an independent kingdom, founded in 872 (fundamental law of May 17, 1814), was united with Sweden under the same King from Nov. 4, 1814, to June 7, 1905, when the union was dissolved. The Parliament of 150 members is called the "Storthing," which is divided into two sections, chosen by itself to discuss projected Bills, called "Odelsting" and "Lagting." Norway, the western and northern portion of the Scandinavian peninsula, is about 1,100 miles in length, its greatest width about 250 miles. It is divided into 20 provinces, or fylker, and comprises an area of 124,533 sq. miles with a population (1930) of 2,809,564. The coast-line is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. The cultivated area is about one-fortieth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or uninhabitable mountains.

The chief industries are agriculture and forestry, manufactures, fisheries and shipping. Agriculture and forestry give employment to one-third of the population but it has been necessary to import considerable quantities of grain. Manufactures are aided by great resources of water power, estimated at 10,000,000 kw., of which about 13 per cent. are utilized. The quantity of fish caught by Norwegian fishing vessels is next to that of Gt. Britain, and 60 per cent. of the whales killed are killed by Norwegian Companies. The imports consist chiefly of raw materials for the manufacturing industries and coal and oil fuel. The chief exports are fish, oil, and other products of the fisheries, condensed milk, tinned goods, pulp, paper, iron ore and pyrites, stone, cement, calcium carbide, nitrate of soda, aluminium, ferro-alloys, nitrate of lime, zinc, cyanide, &c.

Defence.—Service in the National Militia is universal and compulsory. The peace strength is about 10,000 all ranks. In time of war all males between the ages of 18 and 55 are liable for service. The Navy consists of 4 ironclads, 17 torpedo-boats, 3 destroyers, 9 submarines, and several minelayers. There are 60 seaplanes and aeroplanes.

* C$ = Córdoba, worth $1 U.S.

§ As at Feb. 28, 1931. Figures include Consolidated debt only and do not include claims arising out of the revolution of 1925-27, amounting to C$18,000,000, a figure which will be considerably scaled down.

Education is compulsory and free between the ages of 7 and 14, schools being maintained by local taxation with State grants in aid. The attendance is high. Secondary schools are provided by the State, by local authorities, and privately. There are many special schools and industrial and technical institutes. The University of Oslo was attended in 1930 by 3,476 students.

Communications.—The total length of railways open in 1930 was 2,383 miles, of which 228 miles were private lines. The length of telegraphs and telephones in 1930 was 36,596 miles (State, 23,015) with 588,129 miles of wire (State, 445,462 miles). The mercantile marine, Jan. 1, 1931, consisted of 3,953 vessels, of 2,294,000 net tons. The gross earnings of the Norwegian mercantile marine in foreign traffic amounted in 1930 to about 412,200,000 *kroner*.

SVALBARD.
(*Spitsbergen and Bear Island.*)

By Treaty (Feb. 3, 1920) the sovereignty of Norway over the Spitsbergen ("Pointed Mountain") Archipelago was recognised by the Great Powers and other interested nations, and on Aug. 14, 1925, the Archipelago was officially taken over by Norway.

The Svalbard Archipelago lies between 74°–81° N. lat. and between 10°–35° E. long., with an estimated area of 24,295 square miles. The archipelago consists of a main island, known as West Spitsbergen (15,200 sq. miles); North East Land, closely adjoining and separated by Hinlopen Strait; the Wiche Islands, separated from the mainland by Olga Strait; Barents and Edge Islands, separated from the mainland by Stort Fjord (or Wybe Jansz Water); Prince Charles Foreland, to the W.; Hope Island, to the S.E.; Bear Island (68 square miles) 127 miles to the S.; with many similar islands in the neighbourhood of the main group. The principal mineral is coal. In 1930 the coal export was about 195,530 tons. The wintering force in 1930–31, was 437 strong; the archipelago is also visited by hunters for seal, foxes and polar bears.

Svalbard revenue (1931–32) ..... *kroner* 72,000
do. expenditure (1931–32) ..... " 72,000

South Cape is 370 miles from the Norwegian Coast. Ice Fjord is 520 miles from Tromsö, 650 miles from Murmansk, and 1,300 miles from Aberdeen. Transit from Tromsö to Green Harbour (the postal station, with a high-power Telefunken wireless station) 2½ to 3 days; from Aberdeen 5 to 6 days.

JAN MAYEN, an island in the Arctic Ocean (70° 49′—71° 9′ N. lat. and 7° 53′—9° 5′ W. long.) was joined to Norway by law of Feb. 27, 1930.

BOUVET ISLAND, in the Antarctic (54° 26′ S. lat. and 3° 24′ E. long.) was declared a dependency of Norway by law of Feb. 27, 1930.

PETER Ist's ISLAND, in the Antarctic (68° 50′ S. lat. and 90° 35′ W. long.) was declared a dependency of Norway by resolution of Government, May 1, 1931

PANAMA.

(**Republica de Panama.**)

President (1931–1932), Señor Dr. Don Ricardo J. Alfars, *assumed office* Jan. 15, 1931.
Secretary of Government and Minister of Justice, Señor Don Francisco Arias.
Foreign Affairs, Señor Dr. Don J. J. Vallarino.

Minister in London, Señor Don Narciso Garay (*resides in Paris*).
Consul-General in London, Señor Don I. J. Valdés, 232 Finsbury Pavement House, E.C. 2.

Panama, formerly one of the nine Departments of Colombia, revolted in Nov. 1903, and

established a separate Government. The area of the Republic is 31,890 square miles, the population 442,486 (excluding Canal Zone). The soil is extremely fertile, but there is little cultivation and nearly one-half of the land is unoccupied. The chief crops are bananas, coconuts, cacao, coffee, and cereals. The imports are almost entirely manufactured goods and foodstuffs. A railway 47 miles in length joins the two oceans.

Revenue (Budget March 31, 1931–Feb. 28, 1933)	£4,107,265
Expenditure (Budget March 31, 1931–Feb. 28, 1933)	4,107,265
Imports (1930)	3,531,465
Exports (1930)	754,850
Imports from U.K. (1930)	614,314
Exports to U.K. (1930)	39,903

The total value of supplies purchased for the *Canal Zone Commissaries* for the fiscal year ended June 30, 1931, was $7,275,817 (U.S. $.).

The language spoken is Spanish.

CAPITAL, Panama. Population (1930), 82,827. Colon (1930) 33,460.

PAPAL STATE, The.

(Stato Città Vaticana.)

Sovereign Pontiff (260th), His Holiness Pope Pius XI. (Achille Ratti), *born* at Desio, March 31, 1857, *elected* Pope (in succession to Benedict XV.) Feb. 6, 1922.

The office of the ecclesiastical head of the Roman Catholic Church is vested in the Pope of Rome, who is the Sovereign Pontiff of the Western Church. The Papal States were incorporated with Italy from 1860 to 1870, and the territory of the Papacy was confined to the palaces of the Vatican and the Lateran and the Villa of Castel-Gandolfo. In 1870 the incorporation of the Papal States in Italy left the temporal power of the Pope in suspense until the treaty of Feb. 11, 1929, which recognised the full and independent sovereignty of the Holy See in the City of the Vatican. Accompanying the treaty were conventions regulating the condition of religion and of the Catholic Church in Italy and agreeing to pay 750,000,000 *lire* in cash and the income at 5 per cent. on 1,000,000,000 *lire* state bonds as a final settlement of the claims of the Holy See against Italy for the loss of temporal power.

BRITISH LEGATION,

(Via San Nicola da Tolentino 67, Rome 5.)

British Envoy Extraordinary & Minister Plenipotentiary to the Holy See. (vacant).
1st Secretary & Chargé d'Affaires ad interim, G. A. D. Ogilvie-Forbes.
Temporary Secretary, R. Thynne.

PARAGUAY.

(República del Paraguay.)

President (1931–35), Dr. Emilaino Gonzalez Navero.
Interior, Dr. Luis Escobar.
Foreign Affairs, Dr. Geronimo Zubizarreta.
Finance, Dr. Rodolfo González.
Justice and Instruction, Dr. Victor Rojas.
War and Marine, Dr. Luis A. Riart.

Minister in London (vacant).
Chargé d'Affaires and Consul-General in London, Señor Dr. Don Horacio Carísimo, 12 Russell Square, W.C. 1.

An inland State of South America, situate between 20°—6′ 30′ S. lat. and 54°—62° W. long. The area of Paraguay (exclusive of the Chaco) is computed at 61,600 square miles, and it contains a population estimated at about 800,000.

Paraguay was visited in 1527 by Sebastian Cabot, and in 1535 was settled as a Spanish possession. In 1811 Paraguay declared its independence of Spain, and from 1814–1840 was governed by Francia, a Paraguayan despot, who was succeeded by Lopez, 1840–1862. In 1862 Francisco Solano Lopez succeeded his father, and in 1864 declared war against Brazil, Argentina and Uruguay being involved in the struggle. Against these three nations Lopez conducted a

* Adrian IV (Nicholas Brakespeare, the only Englishman elected Pope, was born at St. Albans, elected Pope (on the death of Anastasius IV) 1154; died 1159.

five years' war, which terminated in his defeat and death at the *Battle of Cerro Corá*, March 1, 1870. This dogged struggle reduced the country to complete prostration, and the population, which was 800,000 in 1857, is alleged to have fallen in 1870 to 250,000, of whom barely 30,000 were men. The present constitution was adopted at the close of the war, and under its provisions the head of the executive is the President, elected by an electoral college for four years and ineligible for office for eight consecutive years after the expiration of his term. A Vice-President is similarly elected, and succeeds automatically in the case of the death, expulsion or absence of the President. There is a Cabinet of 5 members.

Paraguay proper consists of a series of plains, intersected by abrupt ranges of hills, some of which reach an altitude of 2,000 to 3,000 feet above sea level. The Paraguay and Alto Paraná rivers are navigable at all seasons for vessels of 6 to 7 feet draft. Many of the tributary streams are also navigable for much of the year. The Pilcomayo river is navigable for small craft for 180 miles from Asuncion; but is liable to shrink unduly with drought. Paraguay is a country of grassy plains and dense forest, the soil being marshy in many parts and liable to floods; while the hills are covered for the most part with immense forests. The streams flowing into the Alto Paraná descend precipitously into that river. In the angle formed by the Paranà-Paraguay confluence are extensive marshes, one of which, known as "Neembucu," or endless, is drained by *Lake Ypoa*, a large lagoon, south-east of the capital. The *Chaco*, lying between the rivers Paraguay and Pilcomayo and bounded on the north by Bolivia, forms the subject of a long standing dispute with that country; it is practically a dead level, though a slight and uniform rise westward is now known to exist, and suffers much from floods and still more from drought.

The chief agricultural products are tobacco, oranges and cassava (manioc), maize, rice, sugar-cane, ground-nuts, and other tropical and sub-tropical plants. The forests contain many varieties of timber, but only cedar and a few of the best known hardwoods find a market abroad. Stock-raising, lumbering, cotton and tobacco growing, and the gathering of *Yerba* (Paraguay tea), are the principal industries. The chief articles of export are hides, timber, yerba maté, tobacco, quebracho extract, cattle and meat products, oranges, and petit grain oil. The Army numbers 2,000 to 3,000 men. A railway, 232 miles in length, which belongs to an English company, connects Paraguay with the Argentine railway system. The journey from Asuncion to Buenos Aires (985 miles) occupies 53 hours. Train ferries enable the run to be accomplished without break of bulk. The language is Spanish.

	1928–9.	1929–30.

Attachés, Abdol Ahad Khan Yekta; Hussein-Ali Khan Gharageuzlou.
Honorary Commercial Attaché, Nubar Sarkis Gulbenkian.
Consulate-General, 10 Prince's Gate, S.W. 7. [Kens. 3341.]
Consul, (vacant.)

Persia—called by the natives Irán—comprises an area of 628,000 sq. miles, with a population estimated at 10,000,000.

Persia is mostly an arid table-land, encircled, except on the east, by mountains, those in the north rising to 18,700 ft. The central and eastern portion is a vast salt desert. The only navigable river is the Karun, which was opened to foreign navigation from Mohammerah to Ahwaz in 1888. There are 178 miles of railway open, including 80 miles of the projected N. to S. line, in the N. from Bander Shah to Aliebad; while 156 miles are nearing completion in the S. from Bander Shappur to Dizful. Caravans and pack-animals are also being superseded by motor transport of passengers and goods on the road between Tehran-Khanikin, Tehran-Pahlevi (Enzeli), Tehran-Tabriz, Tehran-Meshed, Meshed-Duzdab and Tehran-Bushire, while the German Junker

Company has recently secured a contract for the carriage of mails and passengers by aeroplane between Tehran-Khanikin, Tehran-Pahlevi (Enzeli), Tehran-Bushire and Tehran-Meshed.

The chief products are cereals, cotton, gums, dried fruits, silk, tobacco, and opium. The minerals (little worked) are salt, iron, coal, copper, lead, sulphur, &c., with turquoises. Oilfields in Southern Persia have been successfully worked by an English company since 1902. The only important manufacture is that of woollen carpets (mostly a domestic industry), but shawls, silks, and cotton fabrics are also produced. There are extensive forests in the north and west. Sheep and goats are numerous, and good wool is produced. The Persians are mostly Shiah Muhammadans; but there are many adherents of Bahaism (an eclectic form of Deistic religions), and Armenian Christians. The laws and popular education are based on the precepts of the Koran, but efforts are being made to approximate the educational system more closely to European models. Persia is divided into provinces, of which the principal are under Governors or Governors-General.

Owing to increasing popular discontent with a corrupt and incompetent administration and an extravagant Court, a nationalist movement began in Dec., 1905. In Aug., 1906, the Shah, Muzaffer-ud-Din, admitting the need for reforms, granted a Constitution. He was succeeded in 1907 by his son Muhammed Ali Shah, who was deposed by the National Assembly in 1909, to be succeeded by his son, Sultan Ahmad Shah (under the regency of Nasr-ul-Mulk, until 1914). As a result of the energy of Prime Minister H.H. Reza Khan the authority of the Persian Government was re-established over almost the whole of Persia by means of a disciplined army of 8,000 cavalry and 22,000 infantry, with 94 guns and 200 machine guns, and a number of aeroplanes and armoured cars. On Oct. 31, 1925, the Shah Ahmed Mirza, who had been absent from the country for some time, was deposed by the National Assembly which handed over the government to the Prime Minister. On Dec. 13, 1925, the Constituent Assembly elected Reza Khan Pahlavi, Shah of Persia. The Shah took the oath on Dec. 15 and was publicly proclaimed, and was crowned on April 25, 1926.

The revenue is derived from land tax, Crown lands, customs, opium and salt, while the recently enacted law concerning a sugar and tea monopoly is calculated to bring in £600,000 annually (at the present reduced rate of exchange), and this sum is being earmarked for the construction of railways; in 1928-29 £2,363,090 was so expended. British commercial interests in Persia much exceed those of any other country, the trade between the British Empire (including India) and Persia amounting to 45 per cent. of the total trade of the country (1929-30), inclusive of oil.

The leading imports into Persia are cotton fabrics, sugar, tea, and motor vehicles; the principal exports were heavy oils, benzine, petrol, carpets, opium, fruits, cotton and rice.

Revenue (1928-29)	£8,176,824
Debt (March, 1930)	2,036,975
Imports (1929-30)	15,859,534
Exports (1929-30)	27,152,363
Imports from U.K. (1929-30)	6,145,340
Exports to U.K. (1929-30)	13,166,187

Foreign Relations.—By the Anglo-Russian Convention of Aug., 1907, Great Britain and Russia mutually engaged to respect the integrity and independence of Persia, while marking out certain regions in S.E. and N.W. Persia respectively in which each had, for geographical and economic reasons, special interests.

In March, 1921, Persia signed a treaty with the Russian *Soviet* Republic, which provides (*inter alia*) for mutual diplomatic and consular representation, restores to Persia Firuzeh and Ashurada, annuls all concessions previously granted to Russians in Persia, hands over the Russian Discount and Loan Bank to the Persian Government, cancels all Persian debts to Russia, denounces all previous Russo-Persian treaties, abolishes the "capitulations" as regards Russian subjects in Persia, and denounces all treaties made between Russia and third Powers regarding Persia.

In 1922 the Persian Government engaged a number of American advisers (under Dr. Millspaugh) for the supervision and direction of the country's finances. Considerable strides have been made by the country under this new régime, a balanced budget and a programme for gradual development of the country's resources having been evolved; Dr. Millspaugh's contract has now come to an end; he has left the country and German and Swiss financial experts have replaced the Americans.

In May, 1928, the capitulatory régime came to an end; at the same time a new Tariff Convention was signed, giving Persia Tariff autonomy.

CAPITAL, Tehran (pop. 210,000); other large towns are Tabriz (180,000), Ispahan (80,000), Meshed (80,000), Kerman (50,000), Yezd (60,000), and Shiraz (60,000).

FLAG: White, bordered with green (top) and red (bottom), with arms (lion and sun) in centre.

Do. Cardiff, Señor Don A. J. Bovey (*acting*).

Peru is a maritime Republic of South America, situated between 1° 31′ 29″ and 19° 13′ S. latitude and between 69° and 81° 19′ W. The territory between 17° 47′ S. and 19° 13′ S. was occupied by Chile, as the result of the Pacific War of 1879–1882. In 1929 the Province of Tacna was returned to Peru, Chile retaining the Province of Arica. The area of the Republic is estimated at 358,000 square miles (including 6,000 square miles for Tacna), and the population (1921) at 5,550,000. It is bounded on the north by Ecuador and Colombia, as the latter claims a territory in the Amazonian basin; on the east by Brazil and Bolivia, and on the south by Chile and Bolivia.

Peru was conquered in the early 16th century by Francisco Pizarro (born 1478, died 1541), who subjugated the Incas (a tribe of the Quichua Indians), who had invaded the country some 500 years earlier, and for nearly three centuries Peru remained under the Spanish rule. A revolutionary war of 1821–1824 established its independence, declared on July 28, 1821. The constitution rests upon the fundamental law of Oct. 18, 1856 (amended Nov. 25, 1860), and is that of a democratic Republic under a newly drawn constitution of 1919. The President is elected for five years by direct vote of the people and under an amendment to the Constitution (1927) may be re-elected indefinitely. The Constitution is again to be amended by the Constituent Assembly, for which elections are held (as also for President) in Oct. 1931.

The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest points being *Huascaran* (22,050 feet), *Huandoy* (21,100 feet), *Arequipa* (or Misti) volcano (20,013 feet), *Hualcan* (20,000 feet), and *Lirima*, *Tocora*, and *Sarasara*, all over 19,000 feet. There are four distinct regions, the *costa*, west of the Andes, the *sierra* or western slopes of the Andes, the *punas* or mountainous wastes below the region of perpetual snow; and the inward slopes (*montaña*) and boundless forests of the Amazonian basin. The coastal area, lying upon and near the Pacific, is not tropical, though close to the equator, being cooled by the Humboldt-Current; its chief products are sugar, cotton, petroleum, wool, hides and skins, and it contains the chief towns and most of the white population. In the barren mountain section are to be found minerals in great richness and variety which await improved transport facilities before their production can be considerably increased; it is inhabited by Indians in a low state of civilization. Upon the eastern slope of the Andes are to be found very large tracts suitable for cultivation and stock raising, at present almost wholly unexplored owing to lack of communication, but efforts have been made in recent years to open up air routes. This part of the country should show most interesting developments in the future. The tropical lowlands lie east of the Andes towards the borders of Brazil, and consist mainly of unexplored or little known country inhabited by Indians in a savage state. There are here dense jungles, of which the principal commercial product is wild rubber. The mineral production in 1929 was valued as follows:—gold (6,311,516 *soles*) silver (28,477,521), copper (54,207,622), lead (8,053,234), zinc (4,454,082), vanadium (16,538,084) and petroleum (239,329,546 *soles*). The Lobos and other islands on the Pacific coast provide guano (151,000 tons in 1929).

The principal imports are coal, cotton, woollen, linen and silk goods, drugs, earthen and stone wares, machinery, explosives, metals and manufactures thereof, oils, stationery, paper manufactures, timber and wheat. The chief exports in 1929 were petroleum and derivatives (129,048,826 *soles*), minerals (95,896,000), cotton (51,315,280) and sugar (33,377,390 *soles*).

The total length of the railways open (1926) was about 2,500 miles, of which 1,084 miles are under the control of the Peruvian Corporation. There is also steam navigation on Lake Titicaca and the River Desaguadero. The eastern rivers are also navigated to some extent by steam craft. Wireless telegraphy stations have been established in many places. There is considerable activity in

air services. The Naval Air Force maintains services to Iquitos and other places in the interior. The coast district is served by a national company and by the Chile-U.S.A. route *viâ* Peru. National Air Mails are carried by Peruvian military machines.

Defence.—The Army is recruited by voluntary enlistment, supplemented by conscription, and numbers about 8,000 of all ranks; the Navy includes 2 cruisers built at Barrow, a destroyer bought from the French Government, and 4 submarines built in U.S.A. There is a military aerodrome at Chorillos (near Lima) and a seaplane station at Ancón.

Language.—Spanish is the official language of the country, but native dialects (of which Quichua is the most important) are spoken by a considerable portion of the Indian population.

Consul, M. Witold Hulanicki.

The Republic of Poland was proclaimed at Warsaw in November, 1918, and under the *Treaty of Versailles* (June 28, 1919) the assentors to the Covenant of the League of Nations, and the signatories of the Treaty of Peace, guarantee the independence of the Republic, which is reconstituted within the limits of the 18th-century "Polish Commonwealth." This State extended in the year 1772 over an area of about 286,000 sq. miles, and included a population of about 13,000,000. The political boundaries of the Republic are the Baltic Sea, Germany (East Prussia), and Lithuania, in the N.; Czechoslovakia in the S.; Rumania in the S.E.; Soviet Russia in the E.; and Germany in the W. The present area of the Republic may be estimated at 150,000 sq. miles, with a population estimated (Jan. 1, 1930), at 30,737,448 (of whom 18,660,000 are Poles, and 6,500,000 other nationalities). The predominant religion of the people is Roman Catholic, but all faiths enjoy equality, and there are a considerable number of Protestants and a very large number of Jews.

In 1919 hostilities broke out between Poland and Soviet Russia, and after initial successes the "Red" armies of Bolshevik Russia appeared (in August, 1920) likely to deal a crushing blow at Polish independence, the capital (Warsaw) being in peril of capture. A dramatic counter-attack by the Polish troops at the critical period reversed the nature of the campaign, and Poland was enabled to conclude peace on favourable terms.

Government.—A Republican form of government was adopted by the Constituent Assembly in 1919, the Chief of State exercising the executive authority through a Ministry responsible to the Legislature. The Legislature consists of a Diet (*Sejm*) elected by universal adult (male and female) suffrage, and of a Senate elected by adult (male and female) suffrage of those over 30 years of age. The Constitution voted on March 17, 1921, is very Liberal. Since Marshal Pilsudski's *coup d'état* of May 12, 1926, amendments have been inserted in the Constitution conferring on the President of the Republic the power of legislation by decree at times when the Diet is not sitting, subject to subsequent ratification by the Diet.

Production.—Mining, cotton, metal work, agriculture, sugar, forestry and stock raising are the principal industries, the chief crops being rye, wheat, oats, barley, potatoes, and sugar-beet; the live stock includes cattle, horses, sheep, and pigs. There are valuable coal mines in Upper Silesia, Congress Poland, and Little Poland (Galicia); zinc, lead ore, mineral and potassium salts, and in Galicia (Boryslaw) are famous oil fields; the output of crude oil (1930) was 663,000 metric tons. The chief manufactures are textiles,

§ Service on External Debt suspended May, 1931. The Kemmerer Financial Commission, which came to Peru in Jan. 1931, has issued a number of Reports and Recommendations.

§ Stabilized May, 1931, at 28 U.S. cents. In Oct. 1931, the exchange was approximately 14 soles=£1 sterling.

those of minor importance being machinery and metal works, chemicals, and leather. The exports are principally coal, timber, spelter, agricultural produce and textiles, the imports being raw wool, cotton and jute, woollen and cotton goods, and machinery.

Defence.—The peace effective of the army is 17,000 officers and 250,000 other ranks. A small navy, for coastal defence, has been organized.

Education.—Education is compulsory and free, and there is considerable voluntary effort in addition to the work of the State. Secondary education is conducted on a high level, with good attendances, and there are universities at Cracow (founded 1364), Warsaw, Lwow, Poznan, Lublin, and Wilno; Polytechnics at Warsaw and Lwow, and an Academy of Science at Cracow.

Communications.—There are about 10,000 miles of railway and over 25,000 miles of telegraph line, with well-developed telephone systems in all the large centres. Over 4,000 miles of navigable waterways exist on the Vistula, Narew, Bug, Warta, and Pilica, of which about 1,100 are navigable by steamers. The free city of Danzig is within the Polish Customs area, free transit for Germany being guaranteed. A purely Polish port is also being constructed at Gdynia, north of Danzig, with a total water area of 470·495 acres, and an estimated maximum handling capacity of 6 to 7 million tons a year, when complete. During 1930 Gdynia handled nearly 3,200,000 tons of goods. Direct railway communication is being built linking Gdynia with Upper Silesia and Czechoslovakia on the one hand, and with Rumania and the Black Sea on the other.

PORTUGAL.

(República Portuguesa.)

President of the Republic (1926–1930), General Antonio Oscar de Fragoso Carmona.

CABINET (1930).

Prime Minister, Gen. Domingos Augusto Alves da Costa Oliveira.
Finance, Dr. Antonio de Oliveira Salazar.
Foreign Affairs, Commander Fernando Augusto Branco.
Marine, Capt. Luiz de Magalhaes Correia.
War, Col. Antonio Lopes Mateus.
Colonies, Dr. Armindo R. Monteiro.
Education—Dr. Gustavo Cordeiro Ramos.
Justice and Religion, Dr. José d'Almeida Eusebio.
Interior, Dr. Mario Pais de Sousa.
Agriculture, Col. Henrique Linhares de Lima.
Commerce, Dr. João Antunes Guimarães.

Ambassador in London, His Excellency General Tomaz Antonio Garcia Rosado, K.C.M.G.
Embassy, 12 Gloucester Place, W.1.
1st Secretary, Senhor João de Lebre e Lima.
2nd Secretary, Senhor J. de B. Ferreira da Fonseca.
Attaché, Senhor Antonio Rato Potier.
Commercial Counsellor and Consul-General (London), Senhor Joaquim Pedroso, 40, Woburn Sq., W.C. 1.

Portugal lies between 36° 58′—42° 9′ 12″ N. lat. and 6° 11′ 48″—9° 29′ 45″ W. long., being 302 miles in length from N. to S., and averaging about 117 in breadth from E. to W. Continental Portugal contains an area of 34,500 square miles, with a population in 1920 of 6,032,991, and the Portuguese Colonies a total area of 800,400 square miles, with a population estimated at 10,384,381 The Azores and Madeira are regarded, not as colonies, but as a part of continental Portugal. The chief products are wheat, barley, oats, maize, flax, hemp, and the vine in elevated tracts; in the lowlands, rice, olives, oranges, lemons, citrons, figs, vines, and almonds. There are extensive forests of oak, chestnut, sea-pine, and cork, the cultivation of the vine and the olive being among the chief branches of industry; the rich red wine known to us as "port" is shipped from Oporto. Its mineral products are important—copper, lead, tin, antimony, coal, manganese, iron, slate, and bay-salt, which last, from its hardness and purity, is in demand. Its manufactures consist of gloves, silk, woollen, linen, and cotton fabrics, metal and earthenware goods, tobacco, cigars, &c. The exports consist to the extent of 50 per cent. of wine, which is the chief industrial product of the country; others are cork, cattle, tin, copper-ore, fruits, oil, sardines, and salt. The imports are manufactured goods—hardware, cotton and woollen stuffs, machinery, wheat, sugar, dried fish, coal, &c. The mercantile marine (1929) numbered 63 steam vessels, with a tonnage of 220,227. Railways 2,045 miles in extent were open for traffic in 1930, and there were 5,742 miles of telegraph line in 1928.

Defence.—Service in the militia is universal and compulsory. The peace effective is about

35,000. War strength, about 150,000. The Navy consists of a few small ships of old pattern. Air Fleet, 84 aeroplanes.

Education is free and nominally compulsory between the ages of 7 and 15, but is not strictly enforced, and about 54 per cent. of the population above 7 years old are illiterate. Secondary education is conducted in State lyceums. There are also military, naval and other special schools. There are Universities at Coimbra, Lisbon and Oporto.

	1930-31.
Revenue (estimate)	£21,042,420
Expenditure (estimate)	20,984,642
Floating Debt (March, 1930)	11,700,000
External debt (Jan. 1, 1930)	30,427,639
Internal debt (Jan. 1, 1930)	14,480,745

BRITISH CHAMBER OF COMMERCE IN PORTUGAL, 4 Rua Victor Cordon, Lisbon (Branches at 15 Rua Costa Santos, *Oporto*, and 81 Rua dos Netos, *Funchal, Madeira*).

Lisbon, distance 1,110 miles; transit, 50 hours.

PORTUGUESE COLONIES.

CAPE VERDE ISLANDS, off the west coast of Africa, have an area of 1,525 square miles and a population of 148,300. Estimated revenue and expenditure 1929-30, $20,987,832; total trade (imports and exports) 1929, $91,532,232; shipping entries (1929) 1,593 vessels (702 British).

SAO THOMÉ and PRINCIPÉ ISLANDS, in the Gulf of Guinea (area 442 square miles, population 59,060. Estimated revenue and expenditure 1928-29, $11,984,664; imports (1929), £450,060; exports, £739,850.

PORTUGUESE GUINEA, on the west coast of Africa, has an area of 14,000 square miles and a population of 806,973. Estimated revenue and expenditure 1927-28, $34,910,060; imports (1929), $39,778,129; exports, $45,337,000.

ANGOLA (Angola and Kabinda) on the west coast of Africa has an area of 486,000 square miles and a population estimated at 3,000,000. Estimated revenue 1929-30, $167,559,760, expenditure, $166,217,050; imports (1929), £3,142,160; exports, £2,819,200.

A transcontinental railway from *Benguella* (Lobito Bay) in Angola, traversing the Katanga mineral district of the Congo and thence running southwards through Rhodesia to Buluwayo and eastwards to Beira is being developed under British, Belgian and Portuguese control. This line makes through communication from Lobito Bay on the Atlantic to Beira on the Indian Ocean.

MOZAMBIQUE, in East Africa (Delagoa Bay, Gazaland, Inhambane, Mozambique, Nyasa, Quilimane, and Tete) has a total area of 287,756 square miles, with a population of 3,514,612. Estimated revenue and expenditure, 1929-30, £3,158,983; exports, 1929, 14,001,545 *escudos* (gold); imports, 11,335,517 *escudos* (gold).

PORTUGUESE INDIA has a total area of 1,470 square miles, with a population of 548,242, and includes Goa, Damaun, and Diu. Estimated revenue and expenditure 1928-9. Rs. 5,169,366; imports (1929), Rs. 16,727,423; exports Rs. 5,186,396.

MACAO, in China, on the Canton River, has an area of 4 square miles and a population of 157,178. Estimated revenue and expenditure 1929-30, *Patacas* 4,781,492; imports, (1929), *Patacas* 21,423,000; exports, *Patacas* 9,742,000.

§ The total National Debt of Portugal, not including the War Debt, amounted (Jan 1, 1930) to £74,463,655, after deducting £47,346,152, the value of the Government holding in the various loans.

PORTUGUESE TIMOR (the northern portion of the island), in the Malay Archipelago, has an area of 7,450 square miles, with a population of 394,518. Estimated revenue and expenditure, 1927-28, *Patacas* 1,288,780; imports (1929), $13,232,000; exports, $16,454,000.

RUMANIA.

Military and Naval Attaché, Com. Gheorghe Niculescu.
Consul-General, (vacant).
Consul-Gen. (*Hon.*), M. G. N. Gologan, 5-7 St. Mary Axe, E.C. 3.

Rumania is a kingdom of South Eastern Europe formerly the classical *Dacia* and *Scythia Pontica*, territory roughly defined by the three great rivers Danube, Theiss, and Dniester, whose central point is the line of the Carpathians. The kingdom is divided into the 7 Provinces of The Banat, Transylvania, Bukovina, Bessarabia, Muntenia, Oltenia and Moldavia. Rumania has its origin in the union of the Danubian principalities of *Wallachia* and *Moldavia* (and the addition thereto of a strip of Southern *Bessarabia*) under the *Treaty of Paris* (April, 1856). The principalities remained separate entities under the suzerainty of the Turkish Empire until 1859, when Prince Alexandru Ion Cuza was elected Prince of both Principalities, still under the suzerainty of the Porte. Prince Cuza abdicated in 1866 and was succeeded by Prince Charles of Hohenzollern-Sigmaringen, in whose successors the crown is now vested. By the *Treaty of Berlin* (July 13, 1878) a new Principality (consisting of the two above mentioned) was recognised as an independent State, and part of the *Dobrudja* (which had been occupied by the Rumanians) was incorporated in the new Principality. On March 27, 1881, the former *Principality* was recognised by the Great Powers as a Kingdom. Rumania is not a "Balkan" State. She took no part in the military operations of the Balkan League against Turkey in 1912-13. Her unexhausted military power secured for her a readjustment of her south-eastern (Dobrudja) frontier in 1913. In the War of 1914-1918, Rumania fought on the side of the Allies from Aug. 27, 1916, and after many vicissitudes (due mainly to the sudden collapse of the Russian Armies in 1917), she emerged in triumph at the cessation of hostilities. Her territories were greatly increased as a result of the War, and the *ante bellum* area of the Kingdom (74,461 sq. miles) may now be estimated at 123,000 sq. miles, and the 1915 population of 7,897,311 has been increased to nearly 18,000,000. The dominating religion is that of the Greek (Orthodox) Church.

GOVERNMENT.—The government is that of a Constitutional Monarchy, the legislative assembly consisting of a Senate (56 members) elected for 4 years, and of a Chamber of Deputies (361 members) elected for 4 years by universal suffrage, provision being made for the proportional representation of minority parties. The executive is entrusted to a council of ministers.

PRODUCTION.—The soil of Wallachia, Bessarabia, and Moldavia is among the richest in Europe. The agricultural produce consists of wheat, maize, millet, oats, barley, rye, beans, and peas. The wheat crop for 1931 was estimated at 3,480,000 metric tons. rye 400,000, maize 6,000,000, barley 1,530,000, and oats 810,000 metric tons. Vines and fruits are abundant. The fertile plain of Transylvania yields large crops of maize, wheat, rye, oats, flax, and hemp, and the rich lands of Bessarabia produce wheat, maize, barley, flax, tobacco, water melons, fruit, and grapes. Agriculture and sheep and cattle raising are the principal industries of the kingdom, but the climate of this part of South-Eastern Europe is of the Continental character, with intense winter cold and summer heat, and fierce summer droughts sometimes defeat these principal industries. The forests of the mountainous regions are extensive (17,795,353 acres), and the timber industry is important. The country is rich in minerals, and produces petroleum, salt, coal, liguite, iron, gold, and mica; the workers in the oilfields are the largest single unit of workers in any one industry; the production of crude oil was 1,885,225 metric tons in 1913, 3,669,354 metric tons in 1927, 4,300,000 metric tons in 1928, 4,827,278 metric tons in 1929, and 5,792,311 in 1930. Manufactures are in their infancy, and the imports are chiefly manufactured goods, textiles, machinery and metals; the exports consist principally of wheat, barley, maize, oats, *petroleum, timber, cattle, salt and hides.* All large estates have been expropriated and divided among the peasants.

DEFENCE.—Service in the *Army* is universal and compulsory. In the War of 1914-1918 over 900,000 all ranks passed into the Armies of Rumania, and of this number over 25 per cent. were killed or returned as "missing." At the resurgence of Nov. 1918, an army of 400,000 was again in the field. This force was the deciding factor in the Rumano-Hungarian question, and it drove the Bolshevik dictator (Bela Kun) into exile from Buda Pest. There is a small *Navy on the Black Sea and on the Danube* (30 vessels).

EDUCATION is free and nominally compulsory, there being 19,374 schools with 1,612,763 in attendance. Secondary schools are well attended. There are also special schools and Universities at Bucharest, Jassy, Cluj, and

Cernauti. A Government High School of Commerce was opened in 1913.

COMMUNICATIONS.—In 1930 there were 7,364 miles of railway open for traffic in the whole kingdom; railway communication requires great development in order to cope with the problem of carrying the cereal crops to the shipping ports. There are 23,000 telegraph and telephone offices. The mercantile marine consists of about 120 steamers and 600 sailing vessels. The Black Sea ports are Sulina and Constantza; the latter is linked with the interior by a railway.

Press Attaché, Alexis Veymann.

The Union of Soviet Socialist Republics.—The federal system of Russia was adopted by the 10th All-Russian Congress of Soviets on Dec. 31, 1922. The Union covers the greater part of the area of the former Russian Empire, from which the independent states of Finland, Poland, Estonia, Latvia and Lithuania have also been formed. The greater part of the remaining territory forms the Russian Socialist Federal Soviet Republic (R.S.F.S.R.), which is in union with other Soviet Republics in Russian territory to form the Soviet Union. Prior to the War of 1914–18 the *Russian Empire* of the Tsar Nicholas II. covered more than 8,500,000 square miles, with a population of about 183,000,000.

The constituent Republics of the Union are:—

Republic.	Sq. miles.	Population.
I. R.S.F.S.R. (Moscow).	7,638,004	94,865,174
II. Ukraine (Kharkov) ...	174,372	28,397,000
III. Transcaucasia (Tiflis)	71,899	5,938,100
IV. White Russia (Minsk)	49,041	4,151,076
V. Turkmenistan (Polterask)	188,609	1,100,000
VI. Uzbekistan (Taskent)	63,640	2,400,000
VII. Tajikistan (Stalinabad)	56,108	2,000,000
	8,241,673	138,851,250

The rural population forms 80 per cent. of the whole.

According to the latest census returns (Jan. 1, 1928) the total population was 146,964,386, of whom 71,010,659 were males and 75,953,707 females. The returns include 29,498 persons over 100 years of age (12,340 men, 17,158 women.)

The Union is governed by the Congress of Soviets of the Union, and during the intervals of sessions the supreme authority is vested in the Central Executive Committee of the Union, which consists of the Council of the Union and the Council of Nationalities. The regular session of the Union Soviet Congress is convened by the Central Executive Committee (*"Tsik"*) of the Union once a year. *The Council of the Union* consists of 371 members elected by the Soviet Congress of the Union from among the representatives of the several constituent republics, counted in proportion to the population of each republic. *The Council of Nationalities* is formed of representatives of the constituent and autonomous Soviet Socialist Republics on the basis of 5 representatives from each, and of representatives of the autonomous Provinces of the

* Stabilized March, 1929, at 813'59=£1.

R.S.F.S.R. on the basis of 1 representative from each. The composition of the Council of Nationalities as a whole must be confirmed by the Congress of Soviets of the Union.

(The autonomous Republics of Ajaria and Abkhasia and the autonomous Province of Southern Ossetia send one representative each to the Council of Nationalities.)

The regular sessions of the *Tsik* meet three times a year, and in the intervals the supreme authority is vested in its *Presidium*, formed by the *Tsik* of the Union, of 21 members, amongst whom are included the whole of the Union-Council Presidium and the Presidium of the Council of Nationalities.

Chairman of Presidium, Michael Ivanovitch Kalinin (*R.S.F.S.R.*); G. T. Petrovsky (*Ukraine*); M. Musabekoff (*Transcaucasia*); A. G. Tcherviakoff (*White Russia*); M. Aitakoff (*Turkmenistan*); M. Khaizula-Khodzhaieff (*Uzbekistan*); M. Nusratulla (*Tajikistan*).

Secretary, A. S. Yenukidsky.

Representatives are elected to the Soviet Congress of the Union by indirect votiug, each village *Soviet* sending representatives to a *Volost Soviet*, the *Volosts* to *Uyezd* (district) *Soviets*, the *Uyezds* to Government *Soviets*, and the last-named to the Congress of Soviets of the Union. The cities and townships *Soviets* send representatives to the Congress of Soviets Union on the basis of 1 deputy for each 25,000 electors, whereas the provincial *Soviets* send 1 deputy for each 125,000 inhabitants.

The principal executive and administrative organs of the *Tsik* of the Union are: The Council of People's Commissaries, the Council of Labour and Defence, and the Supreme Court of the Union.

The People's Commissariats of the Union are divided into (1) *Federal* People's Commissariats for the entire Union, and (2) *Joint* People's Commissariats of the Union. *Federal People's Commissariats* of the Union are: (1) War and Marine, (2) Foreign Affairs. (3) Foreign Trade, (4) Transport, (5) Post and Telegraph. The *Joint People's Commissariats* are: (1) Supreme Council of National Economy, (2) Finance, (3) Internal Trade, (4) Labour, (5) Workers' and Peasants' Inspection. The *Federal Commissariats* have their representatives in the constituent republics, who are directly subordinated to them. The *Joint Commissariats* exercise their functions through corresponding Commissariats of the several constituent republics on their territories.

Each of the constituent republics has within its territory its own Congress of Soviets, its Central Executive Committee (*Tsik*), and Council of People's Commissaries (*Sovnarkom*), the latter consisting of Chairman, Vice-Chairman, and the following Commissaries: (1) Chairman, Supreme Council of National Economy, (2) Finance, (3) Internal Trade, (4) Labour, (5) Workers' and Peasants' Inspection (all these are subordinate to the People's Commissaries of the Union), (6) Agriculture, (7) Education, (8) Health, (9) Social Welfare, (10) Justice, (11) Internal Affairs (the latter six independent), and also including, with an advisory or deciding vote, according to the decision of the respective *Tsik*, the representatives of Federal Commissariats of the Union, *i.e.*, of Foreign Affairs, Foreign Trade, War and Marine, Transport, Post and Telegraph.

The *Council of Labour and Defence* (*Soviet Truda i Oborony*, or *S.T.O.*) is attached and subordinate to the *Sovnarkom*, and in addition to a general direction of commissariats in their economic and military activity, has the power to ratify statutes of joint-stock companies and trusts.

The *Supreme Court of the Union* is attached to the Central Executive Committee, and has power and jurisdiction (1) to promulgate authoritative opinions on questions concerning general Federal legislation to the constituent republics, (2) to adjudicate controversies between the constituent republics, (3) to try charges against high officials of the Union for offences committed in the discharge of their duties. The Supreme Court consists of 11 members.

To the Council of People's Commissaries (*Sovnarkom*) of the Union is attached a Joint State Political Department, formerly known as the *Tcheka*, but since 1922 as the O.G.P.U. (*Obiedinionnoje Gosudarstvennoje Politicheskoje Upravlenie*), which is designed to combat political and economic counter-revolution, espionage and brigandage. The Chairman of the O.G.P.U. is a member of the Council of People's Commissaries of the Union. The O.G.P.U. is directed by special rules and regulations, which have not been promulgated. The control of the legality of the acts of the O.G.P.U. is exercised by the Attorney-General of the Union in accordance with a special decree issued by the *Tsik*.

Agriculture, M. K. Muralov.

Social Welfare, I. A. Nagovitzin.

Communal Economy, N. P. Komarov.

The **R.S.F.S.R.** consists of 50 Governments and includes 11 Autonomous Republics and 10 Autonomous Provinces. *Autonomous Republics*: Bashkir, Tartar, Kirghiz, Mountain, Daghestan, Turkestan, Crimea, Yakut, Karelia, Buriat-Mongol and Volga Germans. *Autonomous Provinces*: Chuvash, Kalmuick, Mari, Votiak, Zyrian (Komi), Oirad, Kabardian-Balkarsk, Karachai-Circassian, Adighe-Circassian, Tchetchen. From the economic point of view this vast territory is usually divided into "Black Soil" and "Other Zones," the *Black Soil Zone* being subdivided into (1) Central Agricultural Region, (2) Middle Volga Region, (3) Lower Volga Region, (4) Northern Caucasus, (5) Siberia, (6) Kirghiz Autonomous Republic, (7) Crimea; while the *Other Zones* are (1) Western Region, (2) North-Western Region, (3) Central Industrial Region, (4) North-Eastern Region, (5) Basins of the rivers Viatka and Vetluga, (6) Ural.

Government.—The *Soviet* Government, although composed of representatives indirectly elected by the masses, cannot be called representative, as no provision is made for "the opposition"

to the executive power; and although the rural population (*i.e.*, 80 per cent. of the population) elects usually a very small number of Communists (=*Bolsheviks*), nevertheless the Congress of the *Soviets* consists almost entirely of Communists. As to the cities and towns, only candidates nominated or approved by the *Bolsheviks* can succeed in these elections. Under *Soviet* rule individual liberty is considerably less than in the time of Tsardom, while freedom of speech and the liberty of the Press are definitely denied to the people.

Local Government was, and still remains, highly developed. The villages in Imperial Russia had their assemblies (*skhod*) under the presidency of a mayor (*starosta*); they were grouped into "volosts," the latter into districts (*uyezd*), and these into governments (*guberniya*). The districts and governments had their elective councils (*zemstvos*) for the administration of local affairs. Combined with this system of village communities was a highly organised system of co-operative trading, the population being grouped into voluntary local associations usually corresponding with local government areas. The produce of the soil was disposed of in return for manufactures obtained by the society and distributed at the co-operative shops. Municipalities were also administered by elective councils (*dumas*) under the presidency of a mayor (*golova*); but in many cases the local authority of such municipalities and local land councils (*zemstvos*) was overshadowed by the superior authority of the *bureaucratic* governor. After the Revolution, the village and other administrative units set up *soviets* of workers and peasants, and the provincial councils send representatives to the All-Russia Congress, municipalities having a double representation from their own *soviet* and from that of the province (or district) in which the municipalities are situated.

Education.—Under the Bolshevik *régime* popular education is administered by a commissary, in whose charge have been placed all educational institutions, theatres, museums, and galleries. Beyond this, the State has monopolised the photo-cinematographic industry and the publishing of manuals for schools of all types; and as the *Soviet* Government possesses almost all the printing houses, it practically controls the printing and publishing trades. The education of the workers in the towns is facilitated by lectures and school teaching; but among the peasants in the rural districts even the inadequate provision formerly made has in many places been discontinued. Generally speaking, only children of workers and officials are allowed to attend the primary schools in towns, and only those who belong to the Communist youth or are members of the Communist party may enter secondary school and universities; exceptions to this rule are reduced to the minimum. The average salary of a village schoolmaster does not exceed £2 a month, which very often is not paid regularly. Very often professors of universities and higher schools get a remuneration of £4 to £7 a month. Only schools established by the Communist party for special party purposes are well supplied in every regard. In 1926 there were stated to be 8,000,000 pupils in the 96,000 elementary and secondary schools, and about 2,000,000 in 6,000 advanced and technical schools; while there are two universities in Moscow and 21 in other large centres.

Religion.—The Orthodox Church was disestablished by the *Bolsheviks* and all its property confiscated. All ecclesiastic schools, seminaries and academies have been abolished, and the teaching of religion to persons under 18 years of age forbidden. But the law does not forbid the exercise of religion, and churches remain open in virtue of contracts concluded between the congregations and the local authorities. A recent questionnaire addressed to the soldiers of the Red Army shows that 70 per cent. of them believe in a Deity. The clergy live on voluntary donations from their parishioners. On Feb. 14, 1918, the Soviet Government adopted the Gregorian (Western) Calendar.

Soviet Union Budget, 1931.

Revenue	*Roubles*	21,774,018,000
Expenditure	,,	20,274,018,000

Debt.—The outstanding Foreign Debt of Russia on Jan. 1, 1917 (before the Revolution), may be stated as under:—

	Debt.
To Great Britain	£622,674,406
To France	*Francs* 3,950,000,000
To U.S.A.	$282,000,000
To Japan	*Yen* 256,000,000
To Italy	*Lira* 36,123,836

Since the revolution various internal loans have been raised, and these were stated to amount on Oct. 1, 1929, to 2,613,100,000 gold roubles.

Defence.—The *Red Army*, recruited by universal military service, consisted in 1928 of about 800,000 all ranks, including 37 cavalry brigades of about 3,000 men, and about 30,000 sailors serving on land. It was reported that the *Red Air Fleet* was to comprise an organisation of 10,000 aeroplanes for the year 1924; in 1926 it was stated to consist of less than 100 aeroplanes. The *Red Navy* is believed to consist of 2 Dreadnought battleships launched in 1911, 4 old cruisers, 13 destroyers, and 8 submarines.

The Five Year Plan.

The Soviet Five Year Plan (1928-1933).—The avowed object of the Five Year Plan is to increase the industrial and agricultural production of the U.S.S.R. so that it may overtake and outstrip all other nations. For this purpose the territory is being equipped with factories, railroads, steamships, telegraphs, motor vehicles and tractors. The land is to be made to produce food, houses are to be built, and opportunities for recreation provided, so that the population may have these amenities in greater abundance than the peoples of capitalist nations. The Plan has the political aim of making the U.S.S.R. a far more powerful industrial, economical and political State, and the political aim is being pursued at the expense of the people, the products of the soil being employed primarily in payment of imports required for industrial development, even if starvation is thus imposed on the people. The principal industries undergoing development are *asbestos* (at Azbest), *steel* (at Magnetogorsk), *manganese* (at Chia uri), *tractors* (at Cheliabinsk, Stalingrad and Kharkoff), *wheat* (at Gigant and Verblud), *petroleum* and *crude oil* (at Baku), and *tea* and *oranges* (at Chakwa). The factories are to be provided with electric energy from Dniepostroy, where a dam is under construction, the work being under the superintendence of U.S. engineers. The political

development of the Plan appears to be abreast, in most particulars, and in some directions ahead, of the time schedule; and in April, 1931, M. Kuibyshev, Chairman of the State Planning Commission, stated that the Five Year Plan would be completed in 1932 (one year ahead of the schedule), and the Government had therefore decided to begin work on a new Five Year Plan for 1933-1938.

Agriculture.—The *Soviet* Board of Statistics publish the following particulars of the harvests :—

Crop.	*Metric Tons.* 1928.	1929.
Rye	19,159,190	20,359,140
Wheat	21,316,080	18,877,820
Barley	5,334,580	7,213,530
Oats	15,843,290	15,739,260
Maize	3,378,950	3,018,660
Millet	2,945,960	3,112,670
Buckwheat	1,660,730	1,513,800
Other Cereals	1,862,920	1,906,630
Potatoes	39,904,300	45,629,700

The *Live Stock* are stated at :—

Animals.	1929.	1930.
Cattle	66,700,000	52,600,000
Horses	34,000,000	31,200,000
Sheep and Goats	147,200,000	89,900,000
Swine	20,900,000	12,200,000

Industry.—The natural riches of Russia in coal, iron-ores, copper, manganese, gold, platinum, timber, naphtha, and so on, are enormous. The value of the industrial output is stated at :—

Ores.	*Metric Tons.* 1927-28	1928-29.
Iron	5,357,000	7,265,000
Manganese	737,000	1,256,000
Copper	647,000	773,600
Coal	34,840,000	38,431,000
Refined Oil	8,768,000	10,721,000

External Trade.—The external trade of the S.S.R. for 1929-30 is stated as under in *thousands of roubles* :—

Exports from Russia to	Countries.	Imports into Russia from
138,158	Great Britain	160,000
114,254	Germany	234,389
44,579	U.S.A.	280,360
44,705	France	33,956
47,263	Italy	10,305
5,691	Czechoslovakia	23,593
70,083	Latvia	14,907
61,189	Persia	47,355
14,813	Poland	34,807
16,507	Turkey	9,967
32,645	Scandinavia	54,883
16,423	Mongolia	15,222
25,000	China	25,000
16,838	Japan	16,230
34,350	Netherlands	8,155
26,620	Belgium	7,594
94,124	Other countries	91,921
702,170	Total	1,068,644

According to the Soviet Custom Returns there is a Balance of Trade in 1929-30 *adverse* to the U.K. of 159,233,000 *roubles*, and in *favour of* the U.S.A. (235,780,000 *roubles*) and of Germany (1,135,000 *roubles*). The U.K. contributed 9·4 of the Imports and took 27 per cent. of the Exports, whereas the U.S. contributed 33·5 and took 5, and Germany contributed 28 and took 24 per cent.

Board of Trade figures for transactions between Russia and Great Britain :—

	1929.	1930.
Imports from U.K.	£3,766,000	£6,790,000
Exports to U.K.	26,506,000	34,245,000

Communications.—Length of railroads in use :

Year.	Miles.
1925-6	46,255
1926-7	47,022
1927-8	48,023
1928-9	48,236

The principal railway lines are the main *European* network from Leningrad, through Moscow to Astrakhan and across the Urals *viâ* Perm, Ufa, Samara and Saratov, with northern extensions to the Kola Peninsula and to Archangel and running southwards to the Baltic, the Crimea and the Caucasus; the *Trans-Siberian Line* from Chelyabinsk, on the Ural frontier, to Omsk, and round Lake Baikal to Chita and Stryetensk. From Chita the line crosses the Manchurian frontier (as the Eastern China Railway) to Harbin and Vladivostok, where a northward extension runs to Khabarovsk. The *Amur Railway* connects Stryetensk with Khabarovsk, and the Trans-Siberian line thus connects the western and eastern limits of Russia on Russian territory. The *Trans-Caspian Railway* runs from Krasnovodsk (opposite Baku) to Askabad, Merv, Bokhara, Samarkand, Khokand and Andijan, with a 200-mile branch from Merv to Kushk (near Herat) on the Afghanistan border. The *Orenburg-Tashkent Line*, from the European boundary, across the Kirghiz Steppe to Kazalinsk, Perovsk and Tashkent, whence a short line connects with the Trans-Caspian system. The *Trans-Caucasian Line* runs through Georgia, Azerbaijan and Armenia, from Batum and Poti, on the Black Sea, *viâ* Tiflis, to Baku, on the Caspian, where it is met by the European system of Rostov on the Don. From Tiflis branches run to Kars, and *viâ* Erivan to Mount Ararat on the Armenian frontier, and to the Persian frontier at Julfa. There are in the *Soviet* Union (1927) 228,600 miles of inland waterways, of which 54,500 are navigable by steam vessels, and nearly 110,000 miles by rafts. The principal seaports are Leningrad and Kronstadt on the Gulf of Finland, Sevastopol and Novorossiysk (Black Sea), Archangel on the White Sea, and Ekaterininsk in the Kola River (Murmansk), Vladivostok (Sea of Japan), and Petropaulovsk in Kamtchatka.

Capital.—On March 14, 1918, the seat of Government was transferred from Petrograd to Moscow, which had a population in 1930 of about 2,000,000. LENINGRAD (before the war "St. Petersburg," and until the death of Lenin, "Petrograd"), the former Capital, founded by Peter the Great on the banks of the Neva in 1703, had a population in 1930 of about 1,500,000. Other centres are Saratov (220,000), Rostov (300,000), Samara (150,000), Nijni-Novgorod (190,000), Voronezn (100,000), Kazan (180,000), Krasnova, formerly Ekaterinodar (150,000), Astrakhan (180,000), Orenburg (120,000), Irkutsk (104,000), Tomsk (90,000), Omsk (170,000), Vladivostok (100,000). Archangel had about 40,000 inhabitants in 1920.

II.—THE UKRAINE.
(Ukraina.)

President, V. J. Tchubar.

On Nov. 21, 1917, the greater part of "Little Russia," consisting of the former governments of Chernigov, Kharkov, Kieff, and Poltava (with Ekaterinoslav and Kherson in "South Russia," and Podolia and Volkynia in "West Russia"), was encouraged by Germany to declare itself independent as the *Republic of the Ukraine*. The new Republic was invaded by Germany in 1917–18, and subsequently overrun by Bolshevik forces, and a military and economic alliance was concluded between *Soviet* Russia and the *Ukraine Socialist Soviet Republic* (Dec. 28, 1920). The majority of the inhabitants belong to the Greek Orthodox Church. The chief town and seat of government is Kharkoff (pop. 1923, 312,000), other large centres being Odessa, the great port on the Black Sea (with a population in 1923 of 316,000), Kieff (pop. 1923, 406,000), Ekaterinoslav (pop. 1923, 127,000), Nikolayev (81,000), Poltava (88,000), and Taganrog (100,000). The Ukraine is the great cereal-growing district of Russia, and before the Great War the harvests exceeded 1,000,000,000 poods; during the Civil War the production was reduced to 385 million poods, but in 1923 it had increased to 700 millions. In 1922-3 there were 112 sugar-beet factories (200 in 1915) producing 10,000,000 poods (500 millions in 1914–15). The Ukraine also contains large deposits of iron ore and coal, and is the principal source of the European supply of quicksilver. Agriculture is the principal industry, and there are large iron and steel works. Before the Great War the exports from the Ukraine (grain, sugar, hides, bristles, quicksilver, and wool) were of the annual value of about £75,000,000, and the imports (manufactured goods and machinery) about £50,000,000.

CAPITAL, Kharkoff. Population (1926), 417,342. Other towns: Dniepropetrosk, 233,000; Kieff, 514,000; Nikolaieff, 105,000; Odessa, 481,000; Poltava, 92,000.

III.—TRANSCAUCASIA.
(Zakavkarskaya F.S.S.R.)

President of the Council of People's Commissars, M. D. Orakhelashvili.

The **Transcaucasian Federation** consists of three Socialist Soviet Republics:

Republic.	Sq. miles.	Population.
Armenia	15,065	1,339,969
Georgia	25,470	2,135,033
Azerbaijan	33,570	2,463,098
	74,105	5,938,100

Armenia, or Hyastan.
(S.S.S.R.A.)

President of the Council, M. S. Hambartsumian.

Armenia occupies the uplands between the Iranian plateau and Asia Minor, and is bounded by the Black Sea on the N., by Kurdistan on the S., by Azerbaijan on the E., and by Turkey on the W. Until the outbreak of the Great War it was shared between Turkey (35,600 sq. miles), Russia (20,587 sq. miles), and Persia (6,518 sq. miles). The rivers Euphrates, Tigris, Aras, Kur, and Tchorokh take their rise within its boundaries, and at the meeting of the former Turkish, Persian, and Russian boundaries is *Mount Ararat* (17,160 feet), the traditional resting place of "Noah's Ark." In the uplands the climate is severe, but in the valleys and plains the soil is fertile, producing all kinds of cereals, cotton, rice, sesame, hemp, flax, and tobacco. Sericulture (silkworm breeding), sheep-breeding, and fruit growing are capable of great development. Armenia has great mineral resources hardly as yet developed. Naphtha, sulphur, bitumen, and nitre abound, while the mountains yield salt (mineral and in solution), gold, silver, copper, lead, iron and valuable marbles; there are also numerous hot and cold mineral springs (similar in nature to those of Vichy); more than half the supply of copper from Russia was derived in 1914 from *Soviet* Armenia, and the value of carpets manufactured in 1914 exceeded 10,000,000 *gold roubles*. The Armenian Church is the oldest established Christian church, Christianity having been recognised as the State religion in 300, and from the 5th century there is a national language and literature. On account of their religion the Armenians have suffered a general persecution by Islam, particularly in the *vilayet* of Sivas, Bitlis, Diarbekir, Mamuret-el-Aziz, Van, and Erzerum, where massacres have frequently occurred. In 1915–17 there were wholesale deportations and massacres of the Christian population of Turkish Armenia, while the Armenian Christians of Azerbaijan and of Russian Armenia were similarly treated by Turkish and Kurdish hordes. In 1918 the Supreme Council of the Allied Powers recognised the independence of the *Republic of Armenia*. Under the Treaty of Peace with the Allies (May 11, 1920), Turkey recognised the independence of Armenia, with its capital at Erivan. In 1920 a Bolshevik movement set up the *Armenian Socialist Soviet Republic*, on the lines of the Moscow government.

CAPITAL, Erivan; population, 65,000. Leninkan (formerly Alexandropol) 43,000.

Georgia, or Sakartvélo.
(G.S.S.R.)

President of the Council, M. Ivanoff Kavkazsky.

The Socialist Soviet Republic of Georgia includes two autonomous Republics (Abkhasia and Adjaria), and one autonomous Province (Southern Ossetia).

Georgia, a former Kingdom in Transcaucasia with a history of more than 2,000 years as a State, was annexed by Russia in 1801 in violation of the Treaty of Alliance of 1783. At the beginning of 1918 it regained its independence, but in 1921 the country was occupied by Bolshevik forces and became a member of the Transcaucasian Federation. *Soviet Georgia* is bounded on the N. by the Caucasian Mountains, on the S. by Armenia, on the E. by the Republic of Azerbaijan, and on the W. by the Black Sea. There are 970 miles of railway, the trunk line connecting the Black Sea ports of Poti and Batoum with Baku, on the Caspian. Batoum and Baku are also connected by a petroleum pipe-line. The manganese ore beds are the richest in the world, more than one-half of the world's supply being derived from the Tchiatury mines (in the district of Sharopausky) in 1914. There are also abundant supplies of coal (5 million poods in 1914) and over 500 mineral springs partly unexploited. Wine is produced in considerable quantities, and

he tobacco plant (chiefly in Abkhasia) yielded 700,000 poods in 1914, a great deal of which was imported by Egypt and produced as local grown. Timber (especially box) is an important industry. Oil wells with unproved quantities of crude oil have been discovered in many places, particularly in the Shirak Steppe. The chief town and seat of government is Tiflis, population 300,000; the administrative centre of Abkhasia being Sukhum (62,000), and of Ajaria, Batum (32,000); other large centres being Kutais (50,000) and Poti (21,000).

CAPITAL, Tiflis. Population (1925), 400,000.

Azerbaijan.
(A.S.S.R.)

President, M. Musoabekoff.

Azerbaijan, on the south-western shore of the Caspian Sea, extends from the Caucasus in the north to Persia in the south, and from the Caspian on the east to Armenia and Georgia. It includes the provinces of Baku, Hanjin (Elisavetpol), the district of Zakathal and the autonomous territories of Nakhitchevan and Nagorni-Karabach. More than 75 per cent. of the people are Muhammadans. The *Azerbaijan Socialist Soviet Republic* entered the Union as a Member of the Transcaucasian Federation on Dec. 31, 1922. The Republic is very rich in minerals (naphtha, magnetic ironstone, and manganese), but oil is the principal industry, concentrated in the Baku region, the production being 466,800,000 poods in 1914, and 213,000,000 poods in 1922–3. Fishing is also important, and 15,000,000 poods of caviare were produced in 1922. The principal crop is cotton.

The CAPITAL is Baku (pop. 460,000) on the shore of the Caspian Sea, the centre of the petroleum industry. Baku is connected by railway with Batum (Georgia) on the Black Sea, via Tiflis, and with Moscow, via Rostov. Other towns are Hanjin (60,000), Kuba (14,000) and Nucha (23,000).

IV.—WHITE RUSSIA.
(Byelorussiya.)

President (and Chairman of the Central Executive Committee), A. G. Tchervyakoff.

The independence of White Russia was recognised by *Soviet* Russia in 1919, and a military and economic alliance was concluded Jan. 16, 1921. The independent republic covers the former government of Minsk and parts of Vitebsk and Moghiler. The political neighbours are Lithuania and Poland on the west, and the Ukraine on the south. The capital is Minsk (pop. 131,530), where there is a University founded by the *Soviet* Government; other towns are Gomel (87,000), Bobruisk (51,000) and Moghileff (50,000).

CAPITAL, Minsk. Population, 131,530.

V.—TURKMENISTAN.
(T.S.S.R.)

President, M. Atabaieff.

Turkmenistan is bounded on the west by the Caspian Sea and on the south by Persia, with Afghanistan as a south-eastern neighbour. Eighty-five per cent. of the inhabitants are Muhammadan Turkomans, with about ten per cent. Muhammadan Uzbegs and five per cent. Russians of the Orthodox faith. The seat of administration is temporarily at Poltarask (formerly Achabad), other centres being Merv (22,000) and Karichi (20,000). Krasnovodsk is a port on the Caspian and a railway terminus on the Trans-Caspian line.

CAPITAL, Poltarask (52,000).

VI.—UZBEKISTAN.
(U.F.S.R.)

	Sq. miles.	Population.
Bokhara	50,000	2,000,000
Khiva	13,640	400,000
	63,640	2,400,000

President, Achun Babaieff.

Bokhara lies between Turkmenistan (on the W.), the Kara Kalpak territory of the R.S.F.S.R. (on the N.), and is bounded on the south by Afghanistan. The majority of the inhabitants are Muhammadan Uzbegs. The former capital (Old Bokhara) is a station on the Russian Trans-Caspian Railway. The principal products are rice, wheat, fruit, hemp, cotton, silk, and carpets. Exports (mainly to Russia) are agricultural products and silk and cotton manufactures; imports are principally manufactured goods and sugar. The Emirate was abolished in 1920 and the Emir fled to Afghanistan. A *Soviet* Republic of Bokhara was established and its independence was recognised by *Soviet* Russia by treaty of March 4, 1921.

Khiva, or *Khorezm*, formerly the Khanate of Khiva, lies between Bokhara and the Kara Kalpak territory of the R.S.F.S.R., and has a population of whom about half are nomads, and nearly all Muhammadans. The country occupies the fertile delta of the Oxus and is highly productive (rice, wheat, cotton, silk, fruit, hemp).

CAPITAL OF UZBEKISTAN, Taskent (population 700,000). Other towns: Samarkand (106,000); Andijan (80,000), Bokhara (50,000), Kokand (70,000), Namagan (71,000). Khiva has about 20,000 inhabitants.

VII.—TAJIKISTAN.

Tadzhik.—The autonomous Soviet State of the Tadzhik lies between Bokhara (on the W.) and the Kara Kirghiz territory of the R.S.F.S.R., with Afghanistan as a southern neighbour. The inhabitants are largely nomads, and almost all are Muhammadans. The estimated area is 56,108 square miles, with a population of about 2,000,000.

CAPITAL, Stalinabad; population, 6,000. Other centres, Kojent 38,000, and Dura-Tube 22,000.

BRITISH EMBASSY.
(Sofiskaya Naberezhnaya 14, Moscow.)

British Ambassador, His Excellency Sir Esmond Ovey, K.C.M.G., M.V.O. (1929) £7,500
Counsellor of Embassy, W. Strang.
1st Secretary, E. A. Walker.
2nd Secretary, J. D. Greenway.
Commercial Counsellor, G. P. Paton, C.B.E.
Commercial Secretary (Grade III.), S. Simmonds.
Archivist and Accountant, G. W. Vincent.

BRITISH CONSULAR OFFICES.

Leningrad—Consul-General, R. W. Bullard, C.I.E.
„ *Vice-Consuls*, F. H. Todd; A. J. Cave.
Moscow—Consul, D. W. Keane.
„ *Vice-Consul*, L. Pott.

SALVADOR.

(República de El Salvador.)

President (1931-1935), Señor Arturo Araujo, *assumed office* March 1, 1931.
Vice-President, General M. Hernandez Martinez.
Foreign Affairs, Education, Justice, Charity and Health, Señor Dr. Don Reyes Arrieta Rossi.
Interior Development, Agriculture and Labour, Señor Dr. Don Joaquin Novoa.
Finance, Industry and Commerce, Señor Dr. Don Francisco Espinosa.

Consul-General, Señor L. A. Gallardo, 7 Union Court, Old Broad Street, E.C. 2.

The Republic of Salvador extends along the Pacific coast of Central America for 170 miles, with a general breadth of 43 miles, and contains an estimated area of 13,176 square miles, with a population estimated in 1931 at 1,437,157. It is divided into 14 departments. In 1929 there were 61,091 births and 24,689 deaths.

Salvador was conquered in 1526 by Pedro de Alvarado, and formed part of the Spanish vice-royalty of Guatemala until 1821. In 1840 the Republic broke away from the federation of Central American States. The government is based upon a written constitution and is composed of (*a*) the Executive power, which is exercised by the President; (*b*) the Legislative power, which is in the hands of the National Assembly, and (*c*) the Judicial power, which rests ultimately with the Supreme Court. Elections take place once every four years, and the President is ineligible for a successive term.

The surface of the country is very mountainous, many of the peaks being volcanoes. The highest peak is the Santa Ana volcano (8,300 feet). Much of the interior has an average altitude of 2,000 feet. The lowlands along the coast are generally hot and unhealthy, but towards the interior the altitude tempers the severity of the heat and much has been done in recent years to improve sanitary conditions and services. There is a wet season (winter) from May to October, and a dry season (summer) from November to April. Earthquakes have been frequent in the history of Salvador, the most recent being that of 1919, when great damage was done to the capital and other towns.

The principal river is the Rio Lempa. There is a large volcanic lake (Ilopango) a few miles to the east of the capital, while further away and to the west lies the smaller but very picturesque lake of Coatepeque, which appears to have been formed in a vast crater flanked by the present Santa Ana volcano. The eastern spur of this volcano forms the peak of Izalco, which is in an almost constant state of volcanic activity, and (on account of its visibility from the ocean) is known as "The Lighthouse of the Pacific."

The chief industry is the cultivation of coffee, which is grown under shade-trees principally on the slopes of the volcanoes; cane sugar is also produced, as well as maize, indigo, rice, balsam, &c. Cotton-growing on a large scale was commenced in 1924, but on account of the ravages wrought by insects it was practically abandoned after two seasons. In the lower altitudes towards the east henequen is produced. The principal exports are coffee (sometimes over 90 per cent. of total value), sugar, indigo, balsam, henequen, hides and skins. The chief imports are cotton textiles, flour, iron and steel goods, lard, motor cars, manures, jute sacks, chemical products, cement, petrol, thread. A British railway nearly 100 miles in length connects Acajutla with the capital and with the important coffee centre of Santa Ana. A line from the port of La Union (on the Gulf of Fonseca) to the capital was opened in 1922. Two new lines were opened in 1927, one from the capital to Santa Lucia, a suburb of Santa Ana, tapping the upper Lempa Valley; the other from the coffee centre of Ahuachapan to Santa Lucia. A new line from Santa Lucia to Zacapa (in Guatemala) was opened to traffic in 1930 and affords continuous railway communication between San Salvador and Guatemala City and Barrios. During 1924-26 the re-draining and re-paving of most of the capital were completed, and plans have been made for the macadamizing or paving of several hundred miles of rural roads, many of which are now impassable during the rainy season. There is a good motor road between the port of La Libertad and the capital, while motor transportation is usually possible in the dry season between the capital and Guatemala City, over the International road opened in 1923. The Pan-American Airways maintain regular sevices connecting San Salvador with the U.S. *viâ* Guatemala-Mexico-Brownsville, and *viâ* Havana-Miami, and connecting with Panama *viâ* Honduras, Nicaragua, Costa Rica.

There are 203 post-offices and 257 telegraph offices. There is a wireless (receiving and transmitting) station at the capital, and during 1926 a broadcasting station was inaugurated.

The language of the country is Spanish.

Cutuco—Vice-Consul, Capt. John E. Griffiths.

Salvador is 5,700 miles from London; routes (*a*) New York, New Orleans, Puerto Barrios (Guatemala) and thence by rail; (*b*) New York and direct steamer to La Libertad; (*c*) direct steamer to Panama Canal and thence by steamer to La Libertad. The first route is the quickest.

SAN MARINO.

Regents, Two "Capitani Reggenti."

Consul-General for San Marino in Great Britain, Grand-Uff. Melvill A. Jamieson, 42 Pall Mall, S.W. 1.

Vice-Consul, Comm. Giovanni Sovrani.

A small Republic in the hills near Rimini, on the Adriatic, founded, it is stated, by a pious mason of Dalmatia in the 4th century, and governed by a Council of 60, of whom two are elected as Regents for six months (1 April and 1 October), being thereafter ineligible for office for three years. The area is 38 square miles, the population 12,952. There is an army of about 1,000. The city of San Marino (pop. 2,000) occupies the slope of Mount Titano, and has an impregnable castle, where King Berengar of Lombardy took refuge in 950 A.D., a fine church and Government palace, and a theatre. The principal industries are wine, cereals, cheese, oil and cattle raising, in addition to the utilization and export of gravel from Mount Titano and production of white and hydraulic lime at Serravalle. A Treaty of Extradition was concluded between the Governments of Great Britain and the Republic of San Marino on Oct. 16, 1899. An electric railway is under construction from Rimini.

FLAG: Two horizontal bands, white, blue (with coat of arms of the Republic in centre).

British Consul-General, E. R. Seccombe (Leghorn, Italy).

SARRE TERRITORY.

Under the *Treaty of Versailles* Germany renounced the government of the Sarre Basin in favour of the League of Nations, the government being entrusted to a commission of 5 members nominated for one year by the League. At the expiration of 15 years from Jan. 10, 1920, the population will be called upon to decide by a plebiscite the government under which they wish to be placed. The total area is about 743 square miles, with a population of about 774,546. The chief towns are Sarrebruck (125,020), Neunkirchen (41,031) and Saint Ingbert (20,817).

SERBIA. *See* Yugoslavia.

SIAM.

(Muang T'ai.)

King, Prajadhipok, *born* Nov. 8, 1893; *succeeded* Nov. 26, 1925.

Foreign Minister, H.H. Prince Devawongs Varodaya.

Envoy Extraordinary & Minister Plenipotentiary in London, H.S.H. Prince Varnvaidya, 23 Ashburn Place, S.W. 7.

The Kingdom of Siam, or Muang T'ai (area about 195,000 square miles; population, 1929, 11,506,207), is a buffer State between British Burma and French Indo-China, and its integrity is guaranteed by the British and French Governments by the Anglo-French Agreement of April, 1904. The King is an absolute monarch, and appoints his successor. There is an Executive Council of Ministers with an adviser in Foreign affairs (usually of American nationality), and a financial adviser (hitherto always of British nationality), and, since 1895, a Legislative Council of State, consisting of the Ministers, eight royal princes, and over twenty members appointed by the King, who has an absolute power of veto. There is also a Supreme Council of Five which advises the King in important matters. A number of English, French, Italians, Danes, and Americans are employed in the various State departments. There is an army of nearly 50,000 men, and a few small gunboats; compulsory military service has been introduced. The Kingdom contains many Chinese (largely engaged in trade and industry), besides Shans, Laos, Malays, Burmese, and Cambodians, and over 1,800 Europeans. The principal religion is Buddhism. There are 364 Government schools and 4,124 schools of all kinds, attended by 448,380 children. The Chulalankarana University is organised with faculties of medicine, political science, engineering, and literature and science.

The upper part of Siam is mountainous, the lower flat. Bangkok is the only much-frequented port. Eighty-five per cent. of Siamese sea-borne trade, which centres at Bangkok, is with the British Empire, and is largely in the hands of British firms or of Chinese trading from Singapore and Hong Kong. Norwegian shipping holds the lead in tonnage, followed closely by British. The chief products of Siam are rice, teak, and tin (from Lower Siam). The area under rice is being much enlarged by irrigation and by railway extensions, bringing the provinces into closer touch with the capital. There is a large number of rice mills, mostly in or near Bangkok. The teak industry in the great forests of N. Siam is mainly in English hands. In 1928–29 rice constituted 69, tin 7 and teak 4·4 per cent. of the exports from the port of Bangkok; while hides and marine products are also exported in considerable quantities. Among imports are treasure, cotton goods and yarn, silk goods, provisions, gunny bags, kerosene, sugar, opium, metals and metal wares, machinery, &c. The general tariff rate is 5 per cent. *ad calorem*. Burma imports teak and cattle overland from Siam, and exports thither cotton and silk goods, &c. Except tin, wolfram, rubies and sapphires, there are no important mineral products as yet. About 1,880 miles of railroads (mostly State-owned) are now open for traffic. Railways from Bangkok run to Nairiedt (357 miles N.E.), with an extension (13 miles) to Tha Chang, Chiengmai (462 miles N. of Bangkok), Aranya Prades (159 miles E.); the southern line to Trang, on the west coast of the Malay Peninsula, was open to traffic in October, 1916, and in July, 1918, was completed to the Kedah border, where junction with the Federated Malay States Railway system was effected. The E. coast line to Sungei Golok (Kelantan) has also been opened to traffic. There is through railway connexion between Bangkok and Penang and Singapore. Good roads are few. There are 4,000 miles of telegraph lines.

SPAIN.

(España.)

On April 14, 1931, following the results of the Municipal Elections, which showed anti-monarchical feeling to be extremely high in all the chief towns of Spain, King Alfonso XIII. left the country and the Queen and other members of the Royal Family on the following day. A Republic was immediately proclaimed and a Provisional Government, drawn from the various Republican and Socialist parties, was formed. Elections for a Constituent Assembly were held on June 28, and the Assembly met on July 14 and passed a vote of confidence in the Provisional Government, which was later re-constituted as under :—

PROVISIONAL GOVERNMENT.

President of the Cabinet and Minister of War, Don Manuel Azaña.
Minister of Justice, Don Fernando de los Rios.
Marine, Don José Giral.
Finance, Don Indalecio Priato.
Interior, Don Santiago Casares Quiroga.
Instruction and Fine Arts, Don Marcelino Domingo.
Public Works, Don Alvaro de Albornoz.
Labour, Don Francisco Largo Caballero.
National Economy, Don Luis Nicolau d'Oliver.
Communications, Don Diego Martínez Barrios.
Foreign Affairs, Don Alejandro Lerroux.

Ambassador in London, Excmo. Señor Don Ramon Perez de Ayala, 24, Belgrave Square, S.W. 1.
Counsellor, Señor Don Bernardo Rolland.
1st Secretary, Señor Don F. Valdes.
2nd Secretary, Señor Don Javier Bermejillo.
3rd Secretary, Señor Don Jacinto Ventosa.
Military Attaché, (vacant).
Naval Attaché, Lieut.-Com. Señor Don J. Pastor.
Agricultural do., Señor Don José Da Casa.
Commerial Attaché, Señor Don Ramon de Oyarzum.
Consul-General, Illmo. Señor Don Enrique Gaspar, 20, Gordon Square, W.C. 1.
Consul, Señor Don Eduardo Danis.

A Republic situate in the south-west of Europe, between 36°—43° 45′ N. lat. and 4° 25′ E.—9° 20′ W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees ; and occupying the larger portion of the great Iberian Peninsula. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic—and it comprises a total area of 196,700 English square miles, and an estimated population, in Jan. 1924, of 21,763,000 —110 to the square mile. The interior of the peninsula consists of an elevated tableland surrounded and traversed by mountain ranges —the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, S. Morena, S. Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquiver, the Ebro, and the Minho. Spain is rich in iron, copper, and lead ; its mineral resources are only partially exploited, and principally by foreign capital under foreign direction. In 1930 the coal production was 7,547,094 tons, of which 6,546,824 were pit coal, 380,204 lignite, and 620,066 anthracite. The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, and dates. The agricultural products comprise wheat, barley, maize, oats, rice, with hemp and flax of the best quality. The vine is cultivated in every province ; in the south-west, Jerez, the well-known sherry and tent wines are made ; in the south-east, the Malaga and Alicante. The principal articles imported are raw cotton, spirits, fish, wheat and flour, sugar, coal, timber, woollen manufactures, machinery and railway materials, hides, &c. The principal exports are wine, copper and copper ores, lead, iron ores, olive oil, raisins, oranges, cork, esparto grass, wool, salt, quicksilver, grapes, &c. Trade was for many years mostly confined to France and Great Britain, but Germany had, before the War, become a serious competitor, while the United States and Belgium share an increasing proportion of Spanish trade. Home manufacture is protected by high customs duties.

In 1929 there were 10,197 miles of railway open and 70,000 miles of telegraph line. The sea-going mercantile marine over 50 tons, on Jan. 1, 1931, consisted of 1,276 steamers (1,189,655 tons) and 394 sailing vessels (50,277 tons). In 1929, 22,094 vessels of 33,627,024 tons entered and 19,534 vessels of 32,752,245 tons cleared at Spanish ports.

Defence.—In 1931 the Army was reduced from 16 Divisions to 8 Infantry Divisions and 1 Cavalry Division, having an authorized Peace establishment of 4,942 officers and 98,114 men for the Spanish Peninsular Army and of 1,876 officers and 45,849 men for the Army in Morocco.

The Navy consists of 3 (15,700-ton) battleships and 3 modern cruisers, with 1 old battleship and 4 old cruisers ; there are also 7 torpedo-boat destroyers, 20 torpedo-boats, 7 submarines, and 21 gunboats.

Education, Primary, is nominally compulsory and mainly free, and is State-aided, the public schools being maintained by local taxation. Many private schools are under clerical control, and supervision is lacking. *Secondary* High Schools are in each province, but the curriculum is defective. *Universities* at Barcelona, Granada, Madrid, Murcia, Oviedo, Salamanca, Santiago, Saragossa, Seville, Valencia, and Valladolid.

	Pesetas.

BRITISH CHAMBER OF COMMERCE FOR SPAIN, 8 Rambla de los Estudios, *Barcelona* (Branch, 9 Calle Marqués de Cubas, *Madrid*).

Madrid, 1,150 miles; transit, 45 to 50 hours.

The Balearic Isles, Ceuta, Melilla and the Canary Islands, are *integral parts* of *Spanish territory.*

The BALEARIC ISLES are an archipelago of 15 islands in the Mediterranean, the largest being Majorca, Minorca, Iviza, and Formentara; the total area is 1,935 square miles, with a population (1923) of 342,462. The archipelago forms a province of Spain, the capital being Palma in Majorca.

CEUTA, which forms part of the Province of Cadiz, is a fortified post on the Moroccan coast, opposite Gibraltar. The total area is 5 miles, with a population of 35,219.

MELILLA is a town on a rocky promontory of the Riff coast, connected with the mainland by a narrow isthmus. Melilla has been in Spanish possession since 1492 and is an integral part of Spanish territory. The population is 50,170.

The CANARY ISLANDS are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is 2,807 square miles, with a population of 473,497. The Canary Islands form a Province of Spain, the capital being Santa Cruz in the island of Teneriffe.

Spanish Colonies.

The Spanish Colonies consist of certain settlements in, and islands round the coast of, Africa, with a total area of close on 82,400 square miles, and a population exceeding 275,000.

FERNANDO PO (*Fernando Póo*) lies in the Bight of Biafra in 3° 12′ N. lat. and 8° 48′ E. long., about 20 miles distant from the west coast of Africa, and is a mountainous island (Pico de Santa Isabel, 10,800 feet), with forests of oil palm, ebony, mahogany, and oak, and sugar-cane, cotton, and indigo. Cocoa, coffee, sugar, tobacco, vanilla, and kola nut are cultivated, and large quantities of cocoa and other products are exported. With its dependencies it has an area of about 800 square miles, and a population estimated at 24,000. The capital is Basile, and the largest town Port Clarence (1,500 inhabitants). Dependencies are:—

Annobon Island (*Anno Bom*), in the Gulf of Guinea, in 1° 24′ S. lat. and 5° 35′ E. long.; population 1,391.

Corisco Islands, consisting of Corisco, Elobey Grande, and Elobey Chico, lie in Corisco Bay, and export ebony, logwood, and other forest produce. Total population 96,072.

RIO DE ORO AND ADRAR (Capital, Villa Cisneros) is a possession on the north-west coast of Africa, between Cape Bogador and Cape Blanco, or approximately between 21° 20′–26° N. lat., and extending eastwards to about 13° W. long. The territory is part of the waterless Sahara, with a sparse population of wandering Muhammadan Arabs; population 253.

Rio Muni (or *Spanish Guinea*) is a coastal settlement of West Africa between Cameroon and French Congo (1° N.–2° 10′ N. lat.), extending about 125 miles inland. The inhabitants are Bantu tribes, and the principal settlements are at the mouths of the Muni, Benito, and Campa rivers, and at Bata on the coast.

SPANISH MOROCCO. — Spain exercises a protectorate over a part of Northern Morocco (see "Morocco"), and on the Moroccan seaboard are certain Spanish *presidios*, formerly used as convict settlements.

Alhucemas is a settlement on the bay of that name, and includes six islands; population 322.

Peñon de la Gomera (or *Peñon de Velez*) is a fortified rocky islet about 40 miles west of Alhucemas Bay; population 398.

Spanish Southern Morocco.—Ifni, on the Atlantic coast of Morocco, about 100 miles south of Agadir, affords access to the interior of south-west Morocco, but has no great trade at present.

The Chaffarinas (or Zaffarines) are a group of three islands near the Algerian frontier, about 2 miles north of Cape del Agua; population 318.

THE SUEZ CANAL.

The Suez Canal.—The *Compagnie Universelle du Canal Maritime de Suez* (1 Rue d'Astorg, Paris VIII) is an Egyptian company, authorised in 1856, and confirmed in 1866, with a capital of 200,000,000 francs in 400,000 shares of 500 francs each. The British Government acquired from the Khedive in 1875 a total of 176,602 shares (cost £4,000,000, value March 31, 1931, £42,653,929). Since 1924 each 500 franc share has been divided into two 250 franc shares.

The Suez Canal was opened in 1869. The total length of the canal is 101 miles, with a minimum width of 45 metres (147 ft. 8 in.), the maximum draught of water allowed for vessels using the canal is 10·06 metres (33 feet). The average time for the transit through the canal is 14 hours 34 minutes. By a convention, signed on Oct. 29, 1888, the canal was exempted from blockade, and vessels of all nations, whether armed or not, are to be allowed to pass through it in peace or war. The management of the canal is entrusted to a council of 32 administrators, of whom 10 are British (three representing H.M. Government and seven the shipowning interest).

British Commercial Directors, The Earl of Inchcape, P.C., G.C.S.I., G.C.M.G., K.C.I.E. (*Vice-President of the Company*); Sir Alan G. Anderson, K.B.E.; Sir John Cadman, G.C.M.G.; Rt. Hon. Sir R. S. Horne, G.B.E., K.C., M.P.; T. Harrison Hughes; Sir E. Wyldbore-Smith; Sir Thomas Royden, Bt., C.H. *Representing H.B.M. Govt.*, Sir Ian Malcolm, K.C.M.G.; Sir J. T. Davies, K.C.B., C.V.O.; The Earl of Cromer, G.C.I.E., G.C.V.O.

The following table shows the number and tonnage of vessels which have passed through the Suez Canal since 1920, with the percentage of British vessels:—

Year.	No. of Vessels.	Net Tons.	British Tonnage.
			%
1920	4,009	17,574,657	61·7
1921	3,975	18,118,999	62·9
1922	4,345	20,743,245	64·5
1923	4,621	22,730,162	62·8
1924	5,122	25,109,882	59·7
1925	5,337	25,761,935	59·9
1926	4,980	26,060,377	57·4
1927	5,545	28,962,048	57·1
1928	6,084	31,905,902	56·8
1929	6,274	33,466,014	57·1
1930	5,761	31,668,759	55·58

The tonnage of the *merchandise* carried was 25,776,000 tons in 1913; 17,047,000 tons in 1920; and 28,500,000 tons in 1930. Details of the nationality of the vessels passing through the Canal in 1930 are appended:—

	No. of Vessels.	Net Tons.	Per cent (Tonnage).
British	3,125	17,600,438	55·58
German	600	3,388,842	10·70
Netherlands	591	3,312,531	10·46
French	357	2,001,837	6·32
Italian	307	1,502,559	4·75
Norwegian	193	965,827	3·05
Japanese	156	938,700	2·96
United States	106	670,391	2·12
Danish	83	431,965	1·36
Swedish	73	354,266	1·12
Belgian	38	162,051	0·51
Russian	46	129,554	0·41
Greek	54	95,363	0·30
Yugoslavian	8	35,322	0·11
Danzig	5	30,407	0·10
Finnish	6	22,480	0·07
Spanish	3	9,032	0·03
Egyptian	6	8,450	0·03
Portuguese	1	5,460	0·02
Polish	2	2,864	0·009
Siamese	1	375	0·001
Totals	5,761	31,668,759	100·00

The transit receipts in 1870 were 5,718,756 fr. (gold), and in 1930, 1,037,828,669 fr. (paper).

The rate of transit dues as from Sept. 1, 1930, is 6 fr. 65 (gold) per ton, and 3 fr. 325 (gold) for vessels in ballast.

The net dividends for the year 1930 amounted on the ordinary 250 fr. shares to 545 fr. 67 c. (575 fr. 90 c. *au nominatif*), and on the Actions de Jouissance to 536 fr. 45 c. (565 fr. 80 c. *au nominatif*).

The 5,761 vessels included in the total for 1930 are grouped under the following categories:—

	No.	Net Tonnage.
Merchant vessels (laden)	3,271	16,816,147
Mail steamers	1,646	11,164,178
Warships and transports	258	944,311
Government chartered vessels	26	182,207
Merchant vessels in ballast	560	2,561,916
	5,761	31,668,759

SWEDEN.

(Sverige.)

King of Sweden, of the Goths and the Wends, Gustaf V., *born* June 16, 1858; *succ.* December 8, 1907; *mar.*, Sept. 20, 1881, Victoria, dau. of Grand Duke of Baden (*born* August 7, 1862, *died* April 4, 1930) and has issue two sons.

Heir Apparent, Gustaf Adolf, Duke of Skåne, Crown Prince, *born* Nov. 11, 1882; *married* (1) June 15, 1905, H.R.H. the late Princess Margaret of Connaught (*died* May 1, 1920). (2) Nov. 3, 1923, Lady Louise Mountbatten, Princess of Battenberg, *born* July 13, 1889.

CABINET (June 7, 1930).

Prime Minister, C. G. Ekman.
Foreign Affairs, Baron F. Ramel.
Justice, N. Gärde.
Interior, S. Larsson.
Commerce, D. Hansen.
Communications, O. Jeppsson.
Finance, F. Hamrin.
Defence, A. Rundqvist.
Public Worship & Instruction, S. Stadener.
Agriculture, B. de Stockenström.
Ministers without Portfolio, R. Gyllensvärd; A. Holmbäck.

Envoy Extraordinary and Minister Plenipotentiary in London, Baron E. K. Palmstierna, G.C.V.O.
Legation, 27 Portland Place, W. 1.
Counsellor of Legation, Baron A. W. C. Leijonhufvud.
Attaché, U. G. L. Barck-Holst.
Military Attaché, Lt.-Col. A. R. Uggla.
Naval Attaché, Capt. E. A. Oberg.
Air Attaché, Col. E. Mossberg, C.B.E.
Agricultural Counsellor, M. W. F. de Wachenfelt.
Representative of the Press, O. U. K. Thorsing.
Chancellor, J. Stille (*Vice-Consul*).
Chaplain, Rev. F. J. D. Holmgren.
Consul-General, E. G. Sahlin, 329 High Holborn, W.C. 1.
Vice-Consuls, S. Allard; Baron L. A. W. Rappe.
Attachés, F. A. G. Hagström; L. H. Öhrvall.
Chancellor, O. Gad.
Swedish Church, Harcourt Street, Marylebone Road, W. 1.

Sweden comprises the eastern half of the Scandinavian peninsula, and comprises the capital and 24 governments, "Län," with an area of 173,147 square miles, and a population, Dec. 31, 1930, of 6,141,571, nearly all Protestant. This area includes the great lakes of Vänern, Vättern, Mälaren, and Hjälmaren. Nearly 40 per cent. of the population are devoted to agriculture, about 295,000 being owners and 80,000 tenants of the land they cultivate. The country may be divided into three separate districts, the northern, forest; central, mining and agricultural; the southern, agricultural. The climate in the south is favourable for producing grain. The principal articles of cultivation are oats, wheat, rye, barley, potatoes, roots and grasses. The forests are very extensive, covering over one-half of the surface of the country, and consisting chiefly of pine, birch, fir; these are of great importance, supplying timber, pitch, and tar, and the chief fuel of the country, in addition to sulphite and mechanical wood pulp for the paper-making industry. The mineral products are extremely rich: iron of excellent quality; lead, zinc, sulphur, manganese, arsenic, granite, porphyry, and marble. There is a railroad opening up the rich iron-ore districts of Lapland, and mineral trains run from Gellivare and Kiruna to Luleå on the Gulf of Bothnia and to Narvik on the Atlantic; coal is being worked in Scania (Skåne). The chief imports are coffee, tobacco, and other ordinary colonial produce, corn, coal, machinery, motor cars, mineral oils, cloth, cotton, wool, manures, skins, iron, copper, and yarn. The chief articles of export are timber, wood pulp, paper, machinery, iron ore, matches, butter, pork, and stone. In 1930 the exports of wood pulp and paper were 2,325,000 tons.

Railroads 10,447 *miles in length* (of which 4,127 are the property of the State) were open on Jan. 1, 1931; and 46,902 miles of telegraph wires (inclusive of 19,951 railroad telegraph wires), 133 control stations, and 1,950 railroad and 1,690 other telegraph stations. There were at the same date 618,119 miles of telephone wires.

Defence.—Service in the *Army* is universal and compulsory, about 24,500 being trained annually; war strength about 400,000. The *Navy* consists of 63 fighting vessels (350 guns), 11 being ironclads, with submarines, and some training ships, &c.

Education.—(i.) *Primary:* Compulsory and free. Illiteracy rare. Maintained by local taxation, with State grants. Attendance good. (ii.) *Secondary:* Well-developed, schools numerous and efficient. (iii.) *Special schools* make a feature of technics, commerce, and navigation. (iv.) *Universities: Uppsala, Lund*, and private faculties in Stockholm and Gothenburg.

Chancellor, M. Paul Hilfiker.

The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50′—47° 48′ N. lat. and 5° 58′—10° 30′ E. long. It is composed of 22 Cantons, of very dissimilar size, united under a Constitution dated 29 May, 1874, and comprises a total area of 15,950 square miles, with a population of 4,066,400 in 1930, who are divided between Roman Catholics, 41 per cent., and Protestants, 57 per cent., Jews numbering 21,000, and others 43,000. The population is formed by three nationalities, distinct by their language, as German 71 per cent., French 21 per cent., Italian 6 per cent., and Romansch (Grisons), 1½ per cent. It is the most mountainous country in Europe, having the Alps, covered with perennial snow and glaciers, rising from 5,000 to 15,213 feet in height, not only along its southern and eastern frontiers, but throughout the chief part of its interior; and the Jura mountains in the north-west. Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables are grown. The forests cover about one-fifth of the whole surface. The chief industries comprise the manufacture of silks, artificial silks and silk ribbons, wool, cotton and cotton ribbons, linen, embroideries, strawplait, machines, paper, chemicals, chocolate, condensed milk, dyestuffs, and tobacco; while the metallurgical, electrical and pharmaceutical industries are also extensive; clocks and watches have long been the staple products of Geneva and Neuchâtel. In 1930 there were 3,650 miles of railway in operation, 350 miles of telegraph line (17,000 miles of circuit), 20,500 miles of telephone line (910,000 miles of circuit), and 4,012 post-offices.

The legislative power is vested in a Parliament, consisting of two Chambers, a National Council of 187 members, and a Council of States of 44 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for four years, an election taking place in October. The executive power is in the hands of a Federal Council of 7 members, elected by the Federal Assembly, presided over by the President of the Confederation. The President has a salary of 35,000 francs; the Vice-President and other members of the Federal Council 32,000 francs each. The members of the Federal Council are elected for four years; each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year, the five other members for four years. Not more than one of the same canton may be elected member of the Federal Council.

Defence: Militia. Active Army, 12 yrs.; initial trg., 65–90 days. Subsequently 11 days per ann.; *then* Landwehr, 8 yrs.; 1 trg., 11 dys. for dismtd. branches only; *then* [Landsturm to age 48]. *War Strength*, Militia, 140,600; Landwehr, 65,000; Landsturm, 57,000.

Education.—Control by cantonal and communal authorities. No central organ. Illiteracy rare in Protestant cantons. (i.) *Primary:* Free and nominally compulsory, but attendance is not strictly enforced in the essentially Roman Catholic cantons. School age varies. (ii.) *Secondary:* Age 12–15 for boys. Schools numerous and well-attended, and there are many private institutions. (iii.) *Special schools* make a feature of commercial and technical instruction. (iv.) *Universities:* Bâle, Berne, Fribourg, Geneva, Lausanne, Zurich, and Neuchâtel.

SYRIA AND LEBANON.

Syria.—British forces, together with small French and Arab detachments, drove the Turks out of Syria and Lebanon in 1918, and occupied those districts and the district of Cilicia. By decision of the Supreme Council of the Allies the districts in question were entrusted to France, to be administered under a mandate (Cilicia was restored to Turkey by the French in 1922).

The Emir Feisal (son of the ex-King of the Hedjaz and, since 1921, King of Iraq) had from the outset assumed the administration of the districts of Aleppo, Hama and Homs, which had been assigned as Independent Arab districts under an earlier agreement of May, 1916, between France and Great Britain (the *Sykes-Picot Agreement*), and it was intended to allow the Emir to remain under French guidance, but on March 8, 1920, the "Syrian Congress" at Damascus declared Syria independent, and the Emir Feisal was crowned King of Syria. The action of the Syrian Congress did not receive the sanction of the Allied Powers, and General Gouraud occupied Damascus. Aleppo, Hama and Homs. The Emir Feisal left the country, and afterwards became King of Iraq (*q.v.*). The French Mandatory Zone was first divided into the four autonomous states of Great Lebanon, Damascus, Aleppo and the Alaouites (the region round Latakia), each having a French adviser responsible to the High Commissioner at Beyrout. The latter three States were later grouped together to form the *Syrian Federation* with a nominated Council. The Federation has now been abolished. *Damascus and Aleppo* have been amalgamated into a single State, and the *State of the Alaouites* (now known as the *Government of Latakia*) is again independent. The *Jebel Druze* forms a small independent State. The form of government differs in each of the actual States, but the guiding principle in each is French control.

Syria is a geographical term for part of the former Turkish territories in Asia Minor, and its Northern limits have recently been marked out by a Commission. The Northern boundary between Syria and Asiatic Turkey was defined in the agreement between France and Turkey, and is roughly as follows:—From a point immediately S. of Payas (on the Gulf of Alexandretta) to Meidan Ekbes (the railway station and environs remaining in Syria), thence S.E. to the railway station of Tchoban Bey, leaving the districts of Marsova to Syria and of Karnaba and Killis to Turkey; thence along the Baghdad Railway to Nussebin and along the old highway to Jizireh ibn-Omar on the Tigris (the districts of Nussebin and Jizireh-ibn-Omar remaining in Turkish territory, with the roadway between these two places). The E. boundary (not yet finally delimitated) separates Syria from Mesopotamia along a line running roughly N.E. from the E. side of Jebel Druze to a point 15 miles S.E. of Jezireh Ibn Omar (80 miles E. of Mardin); the S. boundary (which has been only partially delimitated) follows a line from Ras el Nakoura on the coast, N. of Akka, and running S.E. by E. to the Hedjaz railway line S. of Nasib, with a projection northwards to include the head waters of the Jordan, the Hule Lake and the Lake of Tiberias being included in Palestine. Within these limits the estimated area is about 60,000 sq. miles, with a population of about 3,000,000, of whom the greater number are Orthodox Muhammadans, with a proportion of Shiites and Druses. The products of Syria are wheat, tobacco, fruit, wine, silk, liquorice, copper and brass goods; there is little cultivation without irrigation, the inland districts being cut off from the moisture-laden winds by a mountain barrier running parallel with the coast. The mineral wealth is believed to be unimportant, but there is a certain amount of bitumen. The principal Syrian towns are Damascus (est. pop. 300,000), Aleppo (250,000), Homs (70,000), and Hâma (60,000). Damascus contains the Mosque of the Ommayedes and the tomb of Saladin, and in the south-western quarter is "The Gate of God," through which the pilgrimage to Mecca used to pass, while the "street called Straight" (Acts IX, 11) runs E. to W. through the city. Damascus is an important commercial centre, and among its industries are metal work and mother-of-pearl inlay, and also native-made silk and cotton stuffs. At *Baalbek* (Heliopolis), on the western slopes of the Anti-Lebanon range (35 miles N.N.W. of Damascus), are ruins of 1st to 3rd century Roman temples (the Circular Temple, the Great Temple and the Temple of Bacchus), and in the vicinity of the ruins is the largest cut stone in the world (60 × 17 × 14 feet), weighing

1,500 tons. The railway system consists of a line from Beyrout to Damascus (narrow gauge), with a connexion at Rayak for Homs, Hama and Aleppo (standard gauge). The line from Tripoli to Aleppo, *viâ* Homs, was reopened in 1921. A narrow-gauge tramway runs from Beirut to Mameltein along the coast. From Damascus there is railway communication with Palestine and with Transjordan, and the Syria railways link up with the Baghdad railway at Aleppo. Road communications between Beyrout and Baghdad, *viâ* Damascus, have been developed by the opening up of the desert motor routes. Baghdad is now within 24 hours of Damascus by car, and a weekly air service has been opened for mails and passengers.

In the autumn of 1925, following a revolt of the Jebel Druze in the Hauran, rioting took place in Damascus on Oct. 18, and the city was bombarded by French artillery, when part of the Azm palace and parts of the "street called Straight" were destroyed by shell-fire or burned. Soon after the receipt of news of the disturbances in Syria, the High Commissioner (Gen. Sarrail) was recalled by the French cabinet. A long period of disorder followed, but in Sept., 1927, public security was practically normal. In June, 1930, the French High Commissioner promulgated a new republican constitution for the State of Syria.

Beirut is the residence of the French High Commissioner and the capital of the Lebanese Republic. *Damascus* was the Federal capital, and has become that of the new State of Syria. *Latakia* is the capital of the Government of that name, formerly known as the State of the Alaouites.

The Lebanese Republic (the former Turkish provinces of Lebanon and Beirut), declared a State by the High Commissioner, under the title of *Etat du Grand Liban*, in 1920, extends along the Mediterranean littoral from the Palestine frontier to Nahr el Kebir (15 miles N. of Tripoli) and is bounded on E. by the Great Central Depression, known as the Bekaa, in which flow the rivers Orontes and Litani. Its total length is about 120 miles, and its width varies from 30 to 35 miles. The estimated area of the Lebanese Republic is about 4,300 square miles, with an estimated population of 579,778. The products of the soil are olives, wheat, grapes, oranges and mulberry trees. Great efforts are being made to develop the district as a summer resort. The capital is Beirut (pop. 150,000), which is the chief seaport and commercial centre, and the seat of the French mandate. Tripoli is the next important town and seaport. Minor ports are Jounieh, Tyre and Sidon. The national flag is the French tricolour with a Cedar of Lebanon on the white band.

Vice-Consul, Saffet *Bey.*
Chancellor, Abdullahat *Bey.*

The Turks belong to the Turanian Race, which comprises the Manchus and Mongols of North China, the Finns, and the Turks of Central Asia. Their numbers probably exceed 50,000,000, with the same language, religion and culture, but the actual Turkish State occupies only a small part of the area inhabited by the Turkish Race, the remainder being in Soviet Russia, China, Afghanistan and Persia. Under the Seljuks (Turkish rulers in Anatolia) the conquest of Asia Minor was completed in the 11th century. The Seljuks were succeeded, early in the 14th century, by the Osmanli dynasty, which remainded in power until the Great War.

During the 15th, 16th and 17th centuries the Ottoman Empire was one of the strongest Powers in the world, extending from the Caspian Sea to the Adriatic and Hungary, and from the Indian Ocean to Morocco and the Sudan. It comprised Asia Minor, half of present-day Russia, the Ukraine, the Crimea, the Balkan States and the whole of Arabia. The Black Sea, the Mediterranean, the Red Sea and the Aegean were dominated by Turkish ships, and the Ottoman dominions included not only the Byzantine Empire, but the greater part of the whole Roman Empire.

For two centuries preceding the Great War disintegration had reduced the power and extent of the Turkish Empire, and during the Great War its boundaries were further restricted, Iraq, Syria and Arabia passing into other hands under the Treaty of Sèvres. Attempts to wrest

further territory were defeated by Gazi Mustafa Kemal, who won a decisive battle at Afion, the results of which were confirmed at the Lausanne Conference.

Turkey now extends over an area of 410,000 sq. miles, from Adrianople to the Caucasus and Persia, and from the Black Sea to the Mediterranean, Syria and Iraq.

Government.—Sultan Muhammad VI., the last of the Osmanli rulers, fled from Constantinople to Malta on Nov. 20, 1922, and the Sultanate was abolished by the National Assembly. On Oct. 29, 1923,* the National Assembly declared Turkey a Republic and elected Gazi Mustafa Kemal President. On March 3, 1924, the Assembly passed a law abolishing the office of Caliph and ordering all members of the Ottoman dynasty to leave Turkish territory. The Grand Assembly is a single-chamber legislature elected for four years, and delegates its executive power to ministers acting in its name and responsible to it for their actions.

Turkey in Europe (23,975 sq. kilometres = 9,256 sq. miles) consists of Eastern Thrace, including the cities of Istanbul (Constantinople) and Adrianople, and is separated from Asia by the Bosphorus at Constantinople and by the *Dardanelles* (Hellespont)—about 40 miles in length, with a width varying from 1 to 4 miles—the political neighbours being Greece and Bulgaria on the west.

Turkey in Asia (738,761 sq. kilometres = 285,246 sq. miles) comprises the whole of Asia Minor, and extends from the Agean Sea to the western boundaries of Georgia, Erivan and Persia, and from the Black Sea to the Mediterranean, and the northern boundaries of Syria and Iraq. This area corresponds approximately with *Anatolia* ("Land of the Rising Sun," or Orient) and includes *Cilicia* round the Gulf of Alexandretta, assigned to France by the Allies, but restored to Turkey by the French. Cilicia is generally fertile and produces wheat, cotton, wool, sesame, &c., and is capable of considerable agricultural development; the chief port of Cilicia is Mersin.

Population. — The first general census of Turkey was taken on Oct. 28, 1927, and showed the population of the Republic to be 13,660,275, the excess of women over men being approximately 500,000. The population of each of the 8 Regions into which the country is divided was given as follows :—

Region.	Sq. Kil.	Population.	Per Sq. Kil.
Black Sea	73,621	2,174,425	29
Marmora & Ægean	92,744	2,746,069	29
Mediterranean ..	56,279	753,639	13
Turkey in Europe	23,975	1,044,306	43
Western Vilayet...	71,180	1,303,114	18
Central Anatolia...	228,791	3,499,707	15
S.E. Anatolia	40,125	604,303	14
Eastern Anatolia	176,621	1,534,712	8
Total..... ..	762,736	13,660,275	18

Religion.—The majority of the inhabitants are Muhammadans. There are a few Christians (of the Latin and Eastern rites) in Istanbul (Constantinople) and a small number of Jews. On April 10, 1928, the Grand National Assembly passed a law in virtue of which Islam ceased to be the State religion of the Republic. On Nov. 1, 1928, the Grand National Assembly passed a *bill establishing the neo-Latin alphabet* in place of Turkish characters. Education is nominally compulsory and free. There are primary schools, training schools for teachers, and at Istanbul a university, founded in 1900.

Production.—Although the soil of Asia Minor is generally fertile, agriculture is still very primitive in centres that are not served by railways. The peasant is, however, gradually adapting himself to the more modern methods, particularly in the vilayet of Aydin, Adana, and Mersin. The *live stock* in 1929 was 12,124,031 sheep, 8,878,406 goats, 2,804,685 mohair goats, 4,718,803 cattle, 496,954 horses, 849,485 asses, 74,803 camels and 496,060 buffaloes. Cereals are abundantly produced, as well as tobacco, raisins, figs, cotton, opium, beet-sugar, nuts, olives, valonea and liquorice root, and many varieties of fruit are grown. Samsun is the chief centre of the tobacco-growing industry, which is also of importance at Izmir (Smyrna), Ismit and Bursa (Brusa). The export of merchandise is considerable and consists principally of opium, tobacco, cotton, carpets, gums, mohair, wool, hazel-nuts, raisins and figs. The forests should be a source of wealth, but scientific exploitation is disregarded; beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple are among the chief varieties of trees. The mulberry is planted for the silk-worm industry, which centres round Bursa and Ismit, and this industry, which declined after the war, is now showing signs of revival. The mineral wealth of Asia Minor is stated to be considerable, but is almost undeveloped. Chrome ore, zinc, *manganese, antimony, copper, borax, corundum* (emery), coal and lignite, silver and arsenic, are among the minerals produced.

Communications.—In Europe Turkey has about 208 miles of railway, known as *The Oriental Railway* and run by a French Company. In Asia Minor the position as regards railways is the following :—

Lines under Exploitation.

	Klm.
Izmir-Aydin (British)	610
Smyrna-Kasabara (French)	703
Bozanti-Aleppo-Nissiberi	632
Mudanya-Bursa (narrow gauge)	41
Anatolian Railway	1,031
Mersin-Tarsus-Adana	67
Baghdad Railway.....	445
Angora-Cesarea-Sivas	590
Samsun-Zilé, to join up with Sivas	220
Kütahya-Tavsanli.....	51
Fevzi Pasha-Malatya	253
Samsun-Charshamda, narrow gauge	37

Lines under Construction.

Zilé to Sivas

Tavshanli to Balikessir (completed, but not yet working).

Ulu Kishla to Cesarea.

Filios to Irmak.

Malatya to Diarbekir.

There is also a line from Sari Kamis to the Russian frontier (78 miles, Russian broad gauge) and a narrow gauge line from Sari Kamis to Erzurum (156 miles), but both lines are in a bad state of repair.

* Turkish National Holiday.—Oct. 29 is observed throughout the Republic as a National Holiday.

It is the intention of the Turkish Government to construct the following lines, but no contracts have yet been granted: Eregli—Filios (about 35 mi'es); Sivas—Erzurum (about 300 miles); Ada Pazari—Bayindir (about 160 miles). There are electric trams in Istanbul, Scutari and Izmir. In 1930 the mercantile marine consisted of steam and motor vessels, with a total net tonnage of 87,224.

	1930 31.	1931 32.
Revenue (*Budget*)	£T222,992,199	£T186,705,599
Expenditure (*Budget*)	£T222,834,330	£T186,582,045
National Debt (Jan. 1, 1930)	—	£T186,200,000

(as against £T126,245,000 in 1916).

	1928.	1929.
Total Imports	£T223,531,775	£T256,191,172
Total Exports	158,420,998	155,216,989
Imports from U.K.	27,500,000	31,356,143
Exports to U.K.	17,600,000	14,951,996

Note.—The National Debt figures include Turkey's share of the repartitioned Ottoman Public Debt. The agreement reached between the bondholders and the Turkish Government for the resumption of the services of the Ottoman Public Debt was ratified by the Grand National Assembly on November 30, 1928.

The *Ottoman Debt* is administered by a Council: S. C. Wyatt (*Delegate of British and Netherlands Bondholders*); M. F. de Closières (*French*), M. B. Nogara (*Italian*), Vacant post (*Turkish*), A. H. Reid (*Ottoman Bank*). *Commissary*, Zekiai Bey; *General Manager*, M. Morel (*acting*). Mr. Wyatt and M. de Closières preside alternately.

CAPITAL OF TURKEY, ANKARA (Angora), an inland town of Asia Minor, about 200 miles E.S.E. of Istanbul, with a population (Census 1927) of 74,784. Ankara (or Ancyra) was the capital of the Roman Province of *Galatia Prima*, and a marble temple dedicated to Augustus (now in ruins) contains the *Monumentum* (*Marmor*) *Ancyranum*, inscribed with a record of the reign of Augustus Caesar. A new city is being laid out on modern lines, with parks, statues and avenues. ISTANBUL (Constantinople), the former capital, was the Roman city of Byzantium, and was selected by Constantine the Great as the capital of the Roman Empire about A.D. 328, and renamed by him; it became capital of the Eastern Roman Empire A.D. 364; population (Census of 1927) 673,029 (Istanbul 261,504, Pera 286,570, Scutari 124,555). Other cities are Izmir (Smyrna) 153,845, Adana 72,652, Bursa (Brusa) 61,451, Konya 47,286, Gazi-Ayintap 39,571, Kayseri (Cesarea) 39,544, Edirne (Adrianople) 34,669, Eskishehir 32,103, Diarbekir 31,511, Erzurum 30,801, and Samsun 30,333. There are also 14 localities with 20 to 30,000 inhabitants, 39 with 10 to 20,000, and 79 with 5 to 10,000 inhabitants.

FLAG: Red, with white crescent and star.

BRITISH EMBASSY.

Ambassador Extraordinary and Plenipotentiary, His Excellency the Rt. Hon. Sir George Clerk, G.C.M.G., C.B. (1926) £7,525
Counsellor (local rank), J. Morgan.

2nd Secretary, G. A. Rey-Alvarez.
Consulate-General, 55 Harrington Gdns., S.W. 7 [Ken. 7268].

The smallest Republic in South America, on the east coast of the Rio de la Plata, situate in lat. 30°—35° S. and long. 53° 25'—57° 42' W. containing an area of 72,180 square miles, and a population on Dec. 31, 1930, of 1,903,083.

Uruguay resisted all attempted invasions of the Portuguese and Spaniards until the beginning of the 17th century, and 100 years later the Portuguese settlements were captured by the Spaniards. From 1726–1814 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine Confederation captured the capital and annexed the province, and it was afterwards annexed by Portugal and became a province of Brazil. On Aug. 25, 1825, through the heroism of the 33 liberators (whose memory is perpetuated in the name of the province of *Treinta y Tres*), the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil, which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828. In 1830 a Republic was

inaugurated, with a Constitution of Sept. 10, 1829. The President is elected by the legislature for a term of 4 years and is ineligible for a consecutive period of office. By an amendment to the Constitution (which came into force March 1, 1919) an administrative council was appointed to share the Executive power with the President.

The country consists mainly (and particularly in the south and west) of undulating grassy plains. The principal chains of hills are the Cuchilla del Haedo, which crosses the Brazilian boundary and extends southwards to the Cuchilla Grande of the south and east. In no case do the peaks exceed 2,000 feet. The principal river is the *Rio Negro* (with its tributary the Yi), flowing from north-east to south-west into the Rio de la Plata. The boundary river *Uruguay* is navigable from its estuary to Salto, about 200 miles north, and the Negro is also navigable for a considerable distance. Smaller rivers are the Cuareim, Yaguaron, Santa Lucia, Quequay, and the Cebollati. On the south-east coast are several lagoons, and the north-east boundary crosses (the Brazilian) Lake Merim. The climate is extraordinarily healthy, with great uniformity of temperature, the summer heat being tempered by the breezes of the Atlantic and the geographical position causing a high thermometer in winter.

Wheat, barley, and maize are cultivated. The wealth of the country is obtained from its pasturage, which supports large herds of horned cattle (7,127,912 in 1930) and sheep (20,558,124 in 1930), the wool of which is of excellent quality. Gold mines exist at Cuñapirú. The exports are entirely animal products, and include frozen and preserved meat, wool, hides, horn, hair, tallow, and jerked beef; the imports are principally machinery, textiles and clothing, food substances and beverages, coal, oil, timber, fuel and bloodstock. The principal imports from the U.K. are woollen and cotton goods, hardware, and coals. There are 1,703 miles of railway open (1927), of which 1,564 miles are in British hands, and three short lines owned by the State; 45 kilometres of the State line from San Carlos to Garzón have been opened and 73 kilometres from San Carlos to Rocha are now open to traffic; and 4,850 miles of telegraph, with 19,039 miles of telephones. There were 995 post-offices, dealing with 116,687,496 letters and packets. The language spoken is Spanish.

	1929-30.	1931-32.
Revenue	$60,495,788	$65,095,726

Consulates at *Birmingham, Cardiff, Glasgow, Newcastle-upon-Tyne, Leith* and *Hull*.

The most northerly Confederation of South America, situated approximately between 1°40′ S. lat. and 12° 26′ N. lat. and 59° 52′—73° 15′ W. long. It consists of 20 States and 2 federal territories. The best authorities calculate the actual present area to be approximately 363,728 square miles. The census of 1925 gave the population as 3,026,878.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia (with which Republic the boundary is in dispute), east by British Guiana, and south by Brazil. Included in the area of the Republic are over 70 islands off the coast, with a total area of about 14,650 square miles, the largest being *Margarita*, which is politically associated with Tortuga, Cubagua and Coche to form the newly constituted State of *Nueva Esparta*. Margarita has an area of about 400 square miles.

Venezuela was visited by Columbus in 1498, and in 1499 by Alonzo de Ojeda and Amerigo Vespucci, the former naming the Gulf of Maracaibo Venezuela, or "Little Venice" (on account of the Indian pile-built settlements on the coast and shores of the lake), and the name was afterwards extended to the whole of the Orinoco basin. In 1550 the territory was formed into the captaincy-general of Carácas, and the country remained under Spanish rule until the revolt under *Simon Bolivar*, a native of Carácas, who defeated the Spanish forces in the battles of Lastoguanes (1813) and Carabobo (1821), and thus secured the independence of the country. Bolivar was an untiring hero in the cause of independence, and through his efforts (and those of his adjutant Sucre) Venezuela, Ecuador and Colombia (Upper Peru) achieved their freedom from Spain, while Peru was enabled to establish

its independence in consequence of his victories. He died in 1830, at the age of 47, and his remains were re-interred at Carácas in 1842. Venezuela formed part of the Federal Republic of Colombia from 1822–1830, since which time it has been independent. There have been many revolutions since 1846, particularly in 1849, 1868, 1889, 1891, 1900, and 1908. In 1854 President Monagas liberated the African slaves, and in 1864 President Falcón divided the country into States and formed them into a Federal Republic. The present constitution rests upon the fundamental law of June 13, 1919, under which the government is that of a Federal Republic of twenty autonomous States, a Federal District, and two Territories, with a President elected by the Federal Congress for seven years; a new Constitutional Law of 1925 left that position unchanged.

The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paria on the north-east. The main range is known as the Sierra Nevada de Merida, and contains the highest peaks in the country in Picacho de la Sierra (15,420 feet) and Salado (13,878 feet), the maritime ranges containing the Silla de Carácas (8,531 feet). Near the Brazilian border the Sierras Parima and Pacaraima and on the eastern border the Sierras de Rincote and de Usupamo enclose the republic with parallel northward spurs, between which are valleys of the Orinoco tributaries: The Sierra Parima contains Yaparana (7,175 feet) and Duida (8,120 feet), and Para Caima contains Maraguaca (8,228 feet) and Roraima (8,530 feet), the latter being on the Venezuela-Guiana boundary. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly *llanos*, or level stretches of open prairie, with occasional woods.

The principal river of Venezuela is the *Orinoco*, with innumerable affluents, the main river exceeding 1,500 miles in length from its rise in the north-western mountains of the republic to its outflow in the deltaic region of the north-east. The Orinoco is navigable for large steamers from its mouth for some 700 miles, and by smaller vessels as far as the Maipures Cataract, some 200 miles further up stream. Among the many tributaries of the main stream are the Ventuari, Caura and Caroni from the south, and the Apure (with its tributary the Portuguesa), Arauca, Meta, and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers. The upper waters of the Orinoco are united with those of the Rio Negro (a Brazilian tributary of the Amazon) by a natural river or canal, known as the *Casiquiare*. The costal regions of Venezuela are much indented and contain many lagoons and lakes, of which *Maracaibo*, with an area exceeding 7,000 square miles, is the largest lake in South America. Other lakes are Zulia (290 square miles), south-west of Maracaibo, and Valencia (216 square miles), about 1,400 feet above sea-level in the Maritime Andes. The *llanos* also contain lakes and swamps caused by the river floods, but they are dry in the summer seasons.

The climate is tropical and, except where modified by altitude or tempered by sea breezes, is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot wet season lasts from April to October, the dry cooler season from November to March.

The principal industries are agriculture and cattle raising. The oilfields are of increasing importance, the production being as follows:—

1923	*metric tons*	640,000
1924	,,	1,330,912
1925	,,	2,812,428
1926	,,	5,318,000
1927	,,	9,125,000
1928	,,	15,000,000
1929	,,	19,000,000
1930	,,	20,153,912

The principal imports are cotton prints and shirtings and cotton drill, mainly from the U.K., and hardware, principally from the U.S. The principal articles of export are petroleum, coffee (64,368 metric tons in 1929); cacao (21,118 metric tons in 1929); goatskins, asphalt, sugar, hides, and balata. The U.S. is the principal customer.

There are about 680 miles of railway in operation.

Spanish is the language of the country.

	1930-31.	1931-32.
Revenue	£8,000,000	£5,936,000

Naval and Air Attaché, Captain Vladimir Mariashevitch.

Yugoslavia consists of the former Kingdoms of Serbia and Montenegro and of Croatia and Slavonia, part of the Banat, Bosnia, Herzegovina, part of Carniola, and part of Styria, and has an estimated area of 248,050 square kilometres (94,230 square miles), with a population (Census 1931) of 13,930,918.

Montenegro (*Tzrna-Gora*) was, before the Turkish occupation of the remaining territory, a province of the Serbian Empire. Its independent existence ended with the decision of its Parliament (Nov. 29, 1918) to depose King Nicholas and reunite with Serbia. The chief towns are Cettinje (pop. 5,000) and Podgorica.

Pre-War Serbia had no seaboard, but the inclusion of Croatia, Dalmatia and Montenegro in the Kingdom of Yugoslavia gives access to the Adriatic down a lengthy coast. The principal Yugoslav ports are Susak, Split, Dubrovnik and Kotor, and by an agreement with the Greek Government Yugoslavia has a free zone at the port of Salonika. In 1926 there were 4,050 miles of normal gauge and 1,083 of narrow gauge railway in operation. The Danube forms a great commercial highway, and the tributary rivers Save and Tisa provide other important shipping routes; the port of Belgrade is now the second busiest on the Danube. The Paris-Istanbul service of the French Aviation Company (*via* Prague, Vienna, Budapest) calls daily at Belgrade, which has also regular air services to Bucharest and Salonika; a national company connects the chief towns with the capital. The Army on a peace footing consists of 130,000 officers and men, the war strength being about 250,000.

The Greek Orthodox, Roman Catholic, Protestant, Muhammadan and Judaic faiths are recognised by the State; nearly 47 per cent. of the population is of the Greek Orthodox faith. Education is compulsory and elementary education is free. In 1930 there were about 10,000 elementary schools, with 21,000 teachers and 1,000,000 pupils; about 20,000 attend continuation schools, and some 70,000 receive instruction at technical colleges. There are Universities at Belgrade, Zagreb, Ljubljana and Skoplje.

The principal industry is agriculture, over 80 per cent. of the population being engaged therein. In 1929 about 5,250,000 acres under wheat yielded 2,600,000 tons of wheat; maize (5,730,000 acres, 4,200,000 tons), barley (1,200,000 acres, 420,000 tons), oats (1,000,000 acres, 350,000 tons), rye (600,000 acres, 220,000 tons); about 500,000 acres are under vines, which yielded 60 to 70 million gallons of wine in 1929. The live stock in 1930 included 3,730,000 cattle, 1,141,000 horses, 7,736,000 sheep, and 2,700,000 swine. The mineral resources include coal (output 6,000,000 metric tons in 1929), iron, copper, lead, chrome ore, antimony, &c. The principal exports are maize, wheat, timber, live stock and meat products, prunes, eggs, poultry, skins and minerals; the imports are chiefly textile manufactures, machinery, food products and coal.

The International Institute of Agriculture.

(Villa Borghese, Rome.)

THE International Institute of Agriculture at Rome was founded in 1905 as the result of a Convention made between the representatives of 40 different countries. The number of nations subscribing to the Convention is 72, and the Institute may be regarded as the pioneer of official international institutions, and as the most representative of all. It is estimated that the countries and colonies adhering to the Institute represent over 95 per cent. of the population of the world.

The following is a complete list of the countries now adhering to the Convention of 1905, and therefore represented at the Institute and contributing to its funds:—

Abyssinia.
Argentina.
Austria.
Belgium.
  Belgian Congo.
Bolivia.
Brazil.
Bulgaria.
Chile.
China.
Colombia.
Cuba.
Czechoslovakia.
Denmark.
Ecuador.
Egypt.
Estonia.
Finland.
France.
  Algeria.
  French West Africa.
  Indo-China.
  Madagascar.
  Morocco.
  Tunis.
Germany.
Great Britain and
  Northern Ireland
  Australia.
  British India.
  Canada.
  Irish Free State.
  Union of South
    Africa.
Greece.
Guatemala.
Haiti.
Hungary.
Italy.
  Eritrea.
  Cyrenaica.
  Italian Somaliland.
  Tripoli.
Japan.
Latvia.
Lithuania.
Luxemburg.
Mexico.
Netherlands.
  Dutch East Indies.
Nicaragua.
Norway.
Panama.
Paraguay.
Persia.
Peru.
Poland.
Portugal.
Rumania.
Russia.
San Marino.
Siam.
Spain.
Sweden.
Switzerland.
Turkey.
United States.
  Hawaii.
  Philippine Islands
  Porto Rico.
  Virgin Islands.
Uruguay.
Venezuela.
Yugoslavia.

The essential objects of the Institute are defined in Article 9 of the Convention and may be summarised as follows:—

The Institute, confining its activities to the international sphere, shall:—

Collect, examine and publish, with the least possible delay, statistical, technical and economic information with regard to farming, crop and live-stock production, trade in agricultural products and the prices current on the different markets;

Indicate the wages paid for farm work;

Record any new diseases of crops which may have appeared in any part of the world, showing the countries affected by such diseases, their progress and, where possible, any effective measures for their control;

Study questions concerning agricultural co-operation, insurance and credit in all their forms; collect and publish all information that may be useful in the various countries for the organisation of systems of agricultural co-operation, insurance and credit;

Submit, should occasion arise, for the approval of the various Governments, measures for the protection of the common interests of farmers, and for the improvement of their conditions.

The Institute has its seat in Rome, in a palace in the Villa Borghese, specially erected through the munificence of H.M. Victor Emmanuel. The Governing Body consists of a General Assembly of Delegates of the adhering Governments, meeting once every two years, and of a Permanent Committee of Delegates, mostly resident in Rome, acting as its executive. Apart from the General Secretariat to which, in addition to the ordinary administrative offices, the Section of Agricultural Legislation is attached, there are special bureaus dealing with General Statistics, Agricultural Science, and Agricultural Economics, respectively. The Institute also possesses an important Library, containing about 125,000 volumes and pamphlets, and 80,000 unbound sets of periodicals from all parts of the world, while over 3,500 periodicals are received regularly. Thus the Library offers quite unusual facilities for the study of agricultural problems, and permission to utilise its resources is readily accorded to all properly accredited persons.

Information on agricultural questions is given mainly through periodical publications, issued in English and French and, in some cases, also in Spanish and Italian. These periodical publications include two Year-Books, the *International Year-Book of Agricultural Statistics* and the *International Year-Book of Agricultural Legislation*; the *International Review of Agriculture*, published monthly, and divided into three separate sections, dealing respectively with *Agricultural Science and Practice*, *Agricultural Economics and Sociology*, and *International Agricultural Statistics*, while in addition an *International Bulletin of Plant Protection* appears each month. These periodical publications are from time to time supplemented by monographs based on special research or specially acquired information.

A new feature in the publications of the Institute is the *Economic Commentary* published for the first time at the beginning of 1931, of which the second issue should appear at the end of the year. This *Commentary* discusses agricultural markets and prices, Government and unofficial action in relation to agricultural questions, and the position of farmers during the previous agricultural year. It is intended to serve as a volume complementary to the International Year-book of Agricultural Statistics.

In addition, special monographs dealing respectively with the Crop Results of the 193[illegible] season and with the provision of Experimental Stations and similar institutions in Tropical Countries have been published during the year. The various publications of the Institute may be obtained in London from Messrs. P. S. King and Son, or may be ordered from Bestetti and Tumminelli, 32 Via Michelangelo Gaetani, Rome.

The economic work of the Institute has been greatly strengthened by the recent appointment of its expert *Agricultural Economic Committee*, which advises on the economic and statistical programme in its international aspects in general, with special reference to the requirements of the Economic Consultative Committee of the League of Nations. With the establishment of this Committee the Institute

may be said to have completed the list of advisory bodies required to give the cachet of authority to its work. The *International Agricultural Scientific Council*, through the expert members of its various Commissions, is in a position to advise on any purely technical questions that may arise, and the *Permanent International Commission of Agricultural Associations* (which has now a regular monthly organ) provides means for ascertaining the views of practical agriculturists. At the same time liaison with other bodies interested in agriculture is maintained by the *International Commission for Co-ordination in Agriculture*, which is also attached to the Institute.

The *World Agricultural Census* of 1929-30, undertaken by the Institute with the object of obtaining on a uniform basis as complete an inventory as possible of the agricultural resources of the world, has, as a result of very careful and detailed work of preparation, achieved a large measure of success. The number of countries which made their census in accordance with the standard forms prepared by the Institute fully reached expectation, and many completed returns are already available. A beginning is now being made with the publication of these results, and in order to facilitate their utilisation they are being issued separately for each country as they come to hand, in as uniform a shape as possible, and in English and French as the most generally known languages. General studies interpreting the documentation thus collected and methodological studies—of which the particular object is the perfecting of future censuses—constitute the second stage in the programme of work which the Institute proposes to accomplish on the basis of the information supplied by this first world census of agricultural production.

The most important feature of the public work of the Institute during 1931 was the International Preparatory Conference of the 2nd World Wheat Conference, which took place at the Palace of the Institute from March 26 to April 2. Official Delegates from nearly 50 countries took part in the proceedings, and there were also present, as Observers or specially invited persons, representatives of the League of Nations, the International Labour Office, the International Chamber of Commerce, the London and Liverpool Corn Trade Associations, and similar bodies. The main questions discussed included the International Organisation of Wheat Production and of the Wheat Trade. International Agricultural Credit and Preferential Tariffs, and the Conference adopted an important series of resolutions, which have been communicated to the various Governments. *Inter alia*, special stress was laid on the necessity for an improved organisation of the Wheat Market, on the better organisation of world wheat production (which would largely depend on improvements in the provision of information and of statistical forecasts), and on the value of short term agricultural credit in the present crisis.

A direct outcome of the Conference was the meeting on May 18 at Canada House in London, under the Presidency of the Hon. George Howard Ferguson, High Commissioner for Canada, of representatives of Overseas and European wheat exporting countries for the purpose of drawing up a plan for dealing with the wheat export season 1931-32, and with existing stocks.

The question of Short Term Agricultural Credit was again discussed on August 12-13 at a meeting of experts convened by the Institute, when a scheme for the constitution of an International Agricultural (short term) Credit Bank was drafted.

A Conference of Experts preparatory to an International Diplomatic Conference on the Marking of Eggs in International Trade, which it is proposed to hold at an early date in Brussels, took place at the Institute on May 11-13. The Conference was of a fully representative character and drew up a Draft Convention, which will form the basis of discussion at the later meeting.

The two most important events at present arranged for 1932 include the Second World Wheat Conference and the Eleventh General Assembly of the Institute.

President: His Exc. Prof. G. De Michelis (Delegate of Italy).
Vice-President: M. Louis-Dop (Delegate of France).
British Delegate: H. L. French, C.B., O.B.E. (*Ministry of Agriculture and Fisheries*).
Delegate of the Irish Free State: M. Harvey Rafferty.
Delegate of the Indian Empire: Sir Bhupendra Nath Mitra (High Commissioner).
Delegate of the Union of South Africa: His Exc. Barend Pienaar.
Secretary General: Prof Alessandro Brizi.

DISTANCE OF THE HORIZON.

THE limit of distance to which one can see varies with the height of the spectator. The greatest distance at which an object on the surface of the sea, or of a level plain, can be seen by a person whose eyes are at a height of 5 feet from the same level is nearly 3 miles. At a height of 20 feet the range is increased to nearly 6 miles, and an approximate rule for finding the range of vision for small heights is to increase the square root of the number of feet that the eye is above the level surface by a third of itself, the result being the distance of the horizon in miles, but is slightly in excess of that in the table below, which is computed by a more precise formula. The table may be used conversely to show the distance of an object of given height that is just visible from a point in the surface of the earth or sea. Refraction is taken into account both in the approximate rule and in the Table.

At a height of		the range is	At a height of		the range is	At a height of		the range is

INTERNATIONAL in its origin, as well as in its effects, the financial crisis which swept like a typhoon over Great Britain in the holiday month of 1931 had been gathering force for a year or more, unseen by all but the most acute and experienced observers. Its immediate consequences at home were the fall of the Labour Administration, the institution of a National Government which will probably affect the whole field of politics for a generation, the suspension of the Gold Standard, and a general election fought under conditions which had never previously existed. As early as February, Mr. Snowden had indicated that all was not well with the national finances, and in his Spring Budget he showed anxiety concerning the world depression, but he seemed hopeful that the deficit might be cancelled out by the economies which were to be suggested by the committee which had been set up. But although that committee made a series of drastic proposals, the general situation, not only in Great Britain but throughout the world, had by that time gone from bad to worse. "To produce a properly balanced Budget in 1932," said Sir George May and his colleagues, "a deficiency of £120,000,000 has to be made good by new taxation and by economies." Mr. Snowden's own view of the position when he produced his emergency Budget was that the deficiency would be even greater—£170,000,000—and it was this enormous sum that the National Government set itself to cover by a combination of economies and taxes. "Nationally, we have for some time been living beyond our means and living to a considerable extent upon our capital," declared Mr. Snowden. There were, however, other important causes. The financial stability of Germany was one; the gold shortage caused by the withdrawals by the United States and France was another. Only a week after Parliament adjourned for the recess, the Bank of England realised that a serious situation might have to be met because of the outflow of deposits and the danger to gold reserves. Temporary credits were obtained, but these were nearly exhausted by the time the National Government took office. There is no doubt that but for the change of administration the £ would have crashed—not merely declined, as was the case when Britain went off the Gold Standard. There was a lack of confidence abroad, and the immediate need was to balance the Budget, so that a loan could be obtained. Even when the Budget had been balanced, the international position was too serious. In two months funds amounting to over £200,000,000 were withdrawn from the London market, the withdrawals being met partly from gold and foreign currency held by the Bank of England, partly from the proceeds of the first credit of £50,000,000 secured from New York and Paris, and partly from new French and American credits of £80,000,000. Finally the withdrawals, mostly for foreign account, became so constant, and the international financial markets so demoralised—so much so that they were liquidating their sterling assets regardless of their intrinsic worth—that the Government decided that there was no alternative but to protect the financial position of Great Britain by suspending the Gold Standard. The step was generally approved and was not so serious as it appeared. It was taken not because of internal financial difficulties, but because of excessive withdrawals of borrowed capital, a very different matter from going off the Gold Standard with an unbalanced Budget and uncontrolled inflation. Although the £ declined on foreign exchanges for some days after the decision, the fall was quickly arrested and slight improvements were made.

THE MACMILLAN REPORT.

THE Committee on Finance and Industry began work, under chairmanship of Lord Macmillan, in November, 1929, and issued its report on July 13, 1931, with approval of all members except Lord Bradbury. *Inter alia*, the report expressed: The 1925 return to Gold Standard had not fulfilled anticipations, but a reversal of policy would not necessarily mean making good mistakes. Important British income was derived from international banking and associated services. It is not our case that industry should be sacrificed to finance. It would not be possible for a country so intricately concerned with outside world as Great Britain to escape simply from repercussions of instability elsewhere. We must continue attempt to secure sound international currency. De-valuation of a currency standing at par without notice is emphatically inexpedient. International confidence is based on belief that national currencies will be maintained at fixed legal value. Great Britain's position as creditor country remains immensely strong. Stabilisation of world wholesale prices at present figures would be a world disaster. The aim of British monetary policy should be, with the co-operation of the central banks, to first raise and then stabilise a price level in commodities. Sound policy must lie at home in maintenance of foreign exchange parities, avoidance of a credit cycle, and price level stability. Managing authority should be the Bank of England, that would adapt itself to new conditions. After pointing out that sole use of a gold reserve was to meet deficits in international payments until measures could be taken to secure equilibrium again, it was laid down that central banks should not pass gold or gold certificates into currency, should give collective consideration to legal requirements for gold reserves, regard deposits in B.I.S. or other central banks as gold equivalent. Central banks should be autonomous, especially in collection of gold and stopping inflation. The long term investment should go with the present fashion of short terms, and tendencies in a country to keep excessive liquid balances should be curbed.

Present emergency called for greater willingness to buy and lend on part of creditor countries as first step towards restoration of price level. Otherwise, creditor countries would absorb remaining gold from debtors and create defaults. A concerted policy was essential between Central Banks of Britain, France and U.S.A. With Bank of England, policy was wrong in locking up gold instead of having it available for export. Parliament should give Bank power to issue notes up to £400,000,000 and to reduce gold holding to £75,000,000, but as statutory figures only. The Committee desired to give elasticity on occasion of necessity, but was not in favour of a reduction in the normal stock of gold. Joint Stock Banks were to reduce their holdings of notes. Increase should be made in total resources of Bank of England, including liquid funds abroad. Banks should assist in setting up financial organisations of type of Bankers Industrial Development Company to help industry. Suggestions were

put forward in distribution of trade statistics and information. The Committee reviewed recent international financial history—maldistribution of gold being held responsible for price falls—and dealt with production costs.

THE HOLMAN-GREGORY REPORT.

Royal Commission on Unemployment Insurance was appointed Dec. 9, 1930 (Judge Holman Gregory, K.C., Chairman), to enquire into working of Insurance Scheme, recommend means to make it solvent and self-supporting and suggest arrangements outside the Scheme to provide work for unemployed. Pressure was brought on Commission to furnish an early Report after hearing certain witnesses and this became available in June. The Majority Report (five members) drew attention to a surplus of £22,000,000 in the Unemployment Fund in July, 1921, and a deficit of £82,810,000 on May 23, 1931. Revision was necessary to limit benefits to 26 weeks in any year, increase all contributory rates in ratio to an adult male standard of 9*d.* from employee, employer and State, reduced benefits based on 15*s.* weekly for adult males, *plus* 8*s.* and 2*s.* for adult and children dependents. Transitional benefit should be same as insurance benefit, claimants having to show 8 contributions in preceding two years or (30) in six previous years; resources of applicant should be taken into account and no benefit to be paid to a person refusing work offered. Anomalies in regard to part-time workers, married women and seasonal workers were to be dealt with. The Minority Report (two members) objected to sweeping proposals in an interim report, desired maintenance of unemployed on a level not lower than that in force, accepted casual workers' proposals but differed themselves on limitations of benefit to married women. A Bill was subsequently introduced in Parliament and became Law, *Unemployment Insurance Act No.* 3, on July 31, putting into force most of the recommendations in regard to Anomalies. This Measure would effect small economies but left untouched the greater financial proposals of the Majority Report.

THE ECONOMY REPORT.

A Committee of seven, Sir G. E. May as Chairman, was appointed by Mr. MacDonald in March, 1931, to make recommendations "for effecting forthwith all possible reductions in national expenditure on Supply Services. . . ." Reports (majority signed by five and minority by two members) were issued July 31, Parliament had just risen for the summer adjournment. After pointing out Parliament's habit of voting expenditure, "enjoying benefits for which we are not providing the cost," with fixed amounts without taking into account the falling price level, the borrowing on behalf of the Unemployment and Road Funds, and additions to national and municipal burdens at a time when industrial enterprise and employment were decreasing, the Committee stated that with even optimistic revenue collections this year the Budget of 1931 would show a deficiency of £120,000,000, apart from any extra sums arising through the War Debt moratorium. This was "no transient feature to be bridged by temporary expedients." Tables in the Report showed a comparison between 1024 and 1931 national expenditure and grants (chief increases being Pensions and Insurance, £54,600,000; Education, Housing, &c., £22,100,000) to make a gross addition of £130,000,000 in social services and home developments. The Report submitted reductions of money obligations previously fixed to meet the rise in money value, national realisation of whether country can afford much of present expenditure considered desirable, but not necessarily essential, and trade restoration with reabsorption of unemployed into industry could only follow strict regard to State efficiency and economy. For the future, Parliament should be given more economic information than by one Budget speech annually, a Finance Committee on lines of Imperial Defence Committee established in Cabinet, and politicians curb their electoral promises of financial help. The Minority Report asked for the long view as against temporary reductions in expenditure, and if sacrifices are essential they should be distributed according to capacity to withstand and not only upon certain large sections of the community as recommended in the list of "cuts" by the Majority Report. The proposed cuts were:—

Development—	
Road Fund	£7,865,000
Agriculture and Fisheries	575,000
Forestry Commission	478,000
Empire Marketing Board	400,000
Colonial Development Fund	250,000
Social Services—	
Unemployment Insurance (20 per cent. benefit reduction and increased contributions)	66,500,000
National Health Insurance	1,000,000
Education (20 per cent. off teachers' salaries and grant revisions)	13,600,000
Universities	250,000
Defence—	
Back to 1925 pay for personnel	2,199,000
R.N. Dockyards	50,000
Army subsidies for transport and breeding	50,000
R.A.F. research	25,000
Clothing, inspection, technical development, etc.	854,000
Pay and Pensions—	
Dockyard preferential bonus	325,000
Police pay 12½ per cent.	925,000
Army Officers	590,000
Civil Service Marriage Gratuities	167,000

AUSTRIA AND GERMANY.

Next to the War itself, the root of collapse goes back to the action of Germany in 1923, in destroying the value of the old mark. Therefore forward, Germany could only carry on with the aid of foreign loans to meet reparation payments and finance home industry. Austria's position was weak, a particular sign being the compulsory acquisition of the Boden Credit Anstalt, and another bank by the Credit Anstalt, that became then the predominant financial house of Austria with 70 per cent. of the total bank deposits of that country. In May, 1931, the announcement was made of tremendous losses. The Austrian Government had subscribed 100,000,000 schillings, and the Austrian National Bank and Messrs. Rothschilds 20,000,000 each (1 = 35 sch.), in hope of sustaining public confidence, but foreign withdrawals were heavy. The B.I.S. lent 100,000,000 sch., the Austrian Parliament guaranteed payment of foreign short term credits, and the Government obtained permission from

the League of Nations Commission to borrow 150,000,000 sch. This was to be raised internationally, but owing to the pressure of time the Bank of England provided the whole on June 16. The Austalt's debtors included £76,000,000 belonging to foreigners, of which Great Britain was largest with £27,000,000. British money was thus locked away to this extent.

Though Germany was interested to the extent of only £5,000,000 in the failure, the reaction was felt acutely. German nationals began to withdraw home funds and remit overseas for fear of another mark collapse; credits by France, Great Britain, U.S.A., and other short term lenders began to be called in. The result was a banking crisis in Germany, the Darmstadter und Nationalbank having to suspend payment. Germany was also still feeling the effect of the big capital withdrawals of the September, 1930, election crisis. The Berlin Bank Rate increased from 5 to 7 per cent. on June 13, 1931, to 10 on July 15. The cover on notes had now fallen to less than the legal minimum of 40 per cent. The loss of gold by the Reichsbank, from May 23 to June 23, was 9·9 000,000 reichsmarks; foreign exchange holdings fell in same time from 171 to 90 million rms. To support the Reichsbank, a credit of 400,000,000 rms. was raised jointly in equal sums by Fed. Res. Bank of New York, Banks of England and France, and B.I.S. Now came an appeal from Germany against the Young Plan, on the ground that its assumptions were wrong. Germany possesses power to postpone payment for two years, apart from the 660,000,000 marks to be derived from State railway duties.

WAR DEBTS POSTPONEMENT.

On June 20, 1931, President Hoover issued from Washington a statement—"Subject to confirmation by Congress, the American Government will postpone all payments on the debts of foreign Governments to the American Government, payable during the fiscal year beginning July 1, 1931, conditional on a like postponement for the year of all payments of inter-Governmental debts." Obligations by Governments to civilians were not included. This moratorium became effective from July 6, apart from agreement on minor details. The relief to Germany in a year's payments was 800,000,000 marks. The total Inter-Government Debt repayments due to Great Britain in the year to June 30, 1932, was given in House of Commons, July 14, a-£42,790,000; this included £337,000 from South Africa that wished to make the payment, but not the £1,628,000 previously postponed by Australia. The experts, who considered the moratorium, recommended on Aug. 11 that the suspended payments for the year should be paid in ten equal annual instalments with interest at 3 per cent. from July 1, 1933.

LONDON CONFERENCE.

On July 8 a German guarantee syndicate was established to give collateral security of 500,000,000 marks through the Gold Discount Bank. This inspired confidence. The G. D. B. then closed with an old offer of a $50,000,000 credit in U.S.A. The June credit of 400,000,000 marks was extended to the Reichsbank. A run upon gold and foreign exchange resources (not a simple run upon the banks by the public) was in full swing in Germany. On July 20, the seven-power Conference summoned by the British Government met in London (Mr. MacDonald, Chairman). As a result of the private deliberations it was decided to call upon the B.I.S. to ascertain the further credit needs of Germany and the possibility of turning its short term into long term loans. Messrs. MacDonald and Henderson then paid a personal visit to Berlin, returning on July 29 with an announcement of "a most successful meeting." On Aug. 1 the Reichsbank raised its discount rate to 15 per cent.; the Darmstadter (Danat) Bank also re-opened to pay in full if needed, this being made possible by introduction of new industrial capital of 43,000,000 marks. German banks had been closed, except for small business, since July 24, but their re-opening did not lead to extraordinary withdrawals.

STERLING AND CREDITS.

A constant drain had been observable upon London Funds since the General Election of 1929. In 1929, the favourable credit balance was £138,000,000 in British Trade, though our imports exceeded exports by £366,000,000 thanks to foreign investment yields, shipping, banking and other services rendered the world by Britain. Within a year, the favourable credit balance had dropped to £39,000,000 in the estimate of the Board of Trade, and by the middle of 1931 the credit balance no longer existed. With that disappearance, the real basic strength of sterling had gone. On July 6, the Bank of England's return showed the highest gold holding of the year. Nine days later, immediately after the German bank crisis, the value of the £1 fell to below the point at which gold moves ($4·83 1/16 compared with 4·84 13/16). The French franc value moved upwards. In eight days £20,250,000 gold was taken from the Bank of England. To stem the tide of withdrawal from London, the bank rate of discount was raised from 2½ to 3½ per cent. on July 23. Then followed the visit of Messrs. MacDonald and Henderson to Berlin. Gold was still leaving the Bank. In the course of a week, the loss was £16,734,931, bringing down the holding to £133,309,000, with the result that the discount rate had to be raised to 4½ per cent. on July 30. At this point the Economy Committee Report threatening a deficit of £120,000,000 in the Budget appeared. On Aug. 1, the Bank of England raised credits of £25,000,000 each with Bank of France and Federal Reserve Bank of New York in the hope of maintaining the exchange for sterling. The Treasury now gave authority for the increase of the fiduciary issue from £260,000,000 to £275,000,000 (permission being extended in periods), thus enabling the Bank to ship gold, if necessary, without interfering with supply of currency. The credits soon disappeared and negotiations began with a view to further support. On Aug. 28, the Treasury announced that one year Loans for £40,000,000 each were to be raised in New York and Paris. Commissions and expenses of issue were £1,047,000. During these days, a political crisis was careering madly on in London, the world assuming the worst and the foreign exchange manipulators driving hard against the value of the £1. Britain was driven off the Gold Standard to which a return had been made after the war by the Act of 1925. Parliament passed the necessary Suspensory Act on Sept. 21. The Bank return of Sept. 30, 1931, showed a gold holding of £134,817,865, plus gold and silver coins of

£1,341,829. At this figure, apart from small interior collections, the stock is likely to remain since gold went up to over £5 8*s.* 6*d.* per oz. in the bullion market. (Under 1925 Act, Bank was bound to sell gold at £3 17*s.* 10½*d.* per oz.) Speculation had to be curbed on Stock Exchange by making all bargains for cash, and limitation of foreign exchange transactions to business essentials. Exchanges went naturally against Britain, falling as low as 3·75 against a par $4·866 on New York, and France 95 against fcs.124·21 par on Oct. 5. The gold holding of the Bank of France had grown to 59,346,170,000 fcs. in return of Sept. 25, 1931, from 56,525,000,000 on June 19 previous. Monetary gold in U.S.A. on Sept. 9 was $5,000,000,000, an increase of $197,000,000 from June 10. The U.S.A. had practically half of the world's gold.

Bolivia, Norway, Portugal and Sweden also temporarily abandoned the Gold Standard after Sept. 21, 1931. The Danish Government prohibited export of gold as from Sept. 22, and on Sept. 29 suspended the Gold Standard until Nov. 20, the note cover being reduced officially from 50 to 33⅓ per cent. N. and S. Rhodesia and Finland joined the list of countries that temporarily suspended gold payments on Oct. 11. Canada stopped the export of gold on Oct. 19, and so practically came off the gold standard.

An immense amount of capital has been lying "frozen" in the U.S.A. banks, failure to employ it undoubtedly making unemployment acute, and, in the hope of creating liquidity and confidence, President Hoover suggested in the first week of Oct. the establishment of a $500,000,000 Institution. The debentures were immediately subscribed by the banks, a 2 per cent. levy on deposits being proposed in the Presidential statement issued on Oct. 7 after an all-party Congress Conference. By discounting securities ineligible for discounting by the Federal Reserve Banks, this Institution will permit the release of locked-up credits. The widening of the Federal Reserve Act in giving more discount powers to the twelve Reserve Banks was also recommended by the President. In view of the U.S.A. bank collapses (Jan. 1-Sept. 30, 1,234 banks were suspended, involving $929,485,000 deposits; 202 with $121,555,000 were re-opened) Reserve Banks were requested to help in early payment of dividends to creditors. The U.S.A. felt a gold draught in September and October; the equivalent of the net gain in gold in 1929 and 1930 of $700,000,000 was exported in the course of six weeks, Europe being the destination. In October, M. Laval paid a visit from France to U.S.A.

BANK FOR INTERNATIONAL SETTLEMENTS.

First annual report of the B.I.S. was issued on May 19 to cover the period May 17, 1930 (date of beginning business) to March 31, 1931. Accounts are kept in Swiss francs. Deposits on latter date were 1,780,000,000 fcs.; assets, 1,900,000,000 fcs.; profit for 10¾ months working, 11,186,521 fcs., distributed between legal reserve fund 9 per cent., dividend on shares, 6 per cent., dividend reserve, 1,094,189 fcs., and general reserve, 2,188,378 fcs. Bank accepts deposits only from central Banks and Governments besides being trustee of German annuity reparation payments. B.I.S. reported having transferred surplus sums from certain markets for easing stringency in others whilst book transfers were made between Central Banks without transactions going through ordinary exchange markets, thus obviating wide exchange fluctuations. The monthly statement of July 31 showed a drop of deposits to 1,632,000,000 fcs., due, it was said, to changes brought about by the Hoover plan (Germany having paid only 51,000,000 marks of the Young Plan on July 15), central banks selling exchanges to meet withdrawals of capital from their markets, but losses in this direction were partly counterbalanced by increased deposits of banks of countries making the withdrawals. On Aug. 3 the B.I.S. renewed for three months a credit of £20,000,000 to German Reichsbank. In July the B.I.S. had loaned the Austrian National Bank, 100,000,000 schillings for the discounting of the bills of the Credit-Anstalt; the first instalment of 10 per cent. was repaid on Sept. 29. Deposits were shown in the B.I.S. statement of Sept. 30 as 1,273,617,673 Swiss fcs., a drop of a fifth in the month; this fall was due to withdrawals, owing to monetary situation and reparation re-arrangements.

PILOTS' EARNINGS.

The majority of the 320 pilots attached to the Port of London had net average incomes approaching £1,000 or over that amount during 1929.

An official return issued Nov. 8, 1930, shows that the average net earnings were:—

Service and Number Engaged.	Average Earnings.	Extra Services.
Channel pilots (76)	£1,059	£23
Cinque Ports pilots (70)	903	19
North Channel pilots (47)	863	30
Compulsory River Thames (85)	800	95
Home Trade pilots (2)	793	147

Two pilots at Rochester did even better, for they averaged £1,098, with £217 for extra services.

SIGNS OF THE ZODIAC.

The Signs of the Zodiac are shown below in accordance with the apparent motion of the Sun, from January to December.

In 1932 the Sun enters—

♒	*Aquarius*, the Water Bearer	Jan. 21
♓	*Pisces*, the Fishes	Feb. 19
♈	*Aries*, the Ram	Mar. 20
♉	*Taurus*, the Bull	April 20
♊	*Gemini*, the Twins	May 21
♋	*Cancer*, the Crab	June 21
♌	*Leo*, the Lion	July 23
♍	*Virgo*, the Virgin	Aug. 23
♎	*Libra*, the Balance	Sept. 23
♏	*Scorpio*, the Scorpion	Oct. 23
♐	*Sagittarius*, the Archer	Nov. 22
♑	*Capricornus*, the Sea Goat	Dec. 22

THE system of government by party in Great Britain is the outcome of a gradual constitutional development. Until the "Glorious Revolution of 1688," the principal Officers of State, chosen by the Sovereign, were responsible to him alone and not to Parliament or the nation at large. Such officers acted sometimes in concert with one another, but more often independently, and the fall of one did not necessarily involve the fall of another, although all were liable to dismissal at any moment. Parties came into existence and gained increased importance as Parliament claimed and secured predominance in affairs of State, and it has long been a custom of the Constitution for the Sovereign to entrust the conduct of affairs to the accredited leader of the party in Parliament which enjoys, or can secure, a majority of votes in the House of Commons. The principle of joint Cabinet responsibility is also fully established, and internal disagreement leads to a change of *personnel* or resignation of the whole.

In 1693 the Earl of Sunderland recommended to William III. the advisability of selecting a Ministry drawn from the political party which enjoyed a majority in the House of Commons. The existing parties were known as *Whigs* and *Tories*, names given by opponents to each other in the reign of Charles II., and continuing as political labels until Whig was changed to *Liberal* in 1828, and Tory to *Conservative* in 1830.

The first united Ministry was drawn in 1696 from the Whigs, to which party King William III. owed his throne, the principal members being Russell (the Admiral), Somers (the Advocate), Lord Wharton, and Charles Montague (afterwards Chancellor of the Exchequer). This group was known as the *Junto*, and was regarded with suspicion as a novelty in the political life of the nation.

At the accession of Queen Anne the government was largely in the hands of the great Duke of Marlborough, with a Tory Ministry and a strong Tory majority in Parliament, but in 1705 a Whig Parliament was elected with a gradual return to power of the Whig Ministers, but their persecution of Dr. Sacheverell offended Queen Anne and led to their downfall. At the end of the reign there was a Tory Parliament and a Tory Ministry under Lord Harley and Lord Bolingbroke. Harley was dismissed by the Queen, and Bolingbroke opened secret negociations for the return of the Stuarts, in which he was thwarted by the Duke of Shrewsbury, himself a former supporter of the exiled King, but in his later life an avowed Whig, and the most notable adherent of the Hanoverian succession.

The accession of George I. was a complete triumph for the Whigs, whose cause was strengthened by the suppression of the first "Jacobite Conspiracy" of 1715–16. The effect upon the development of the party system was even more marked, as the King was scarcely able to understand the English language. His attendance at meetings of the Cabinet became useless and irksome, and allowed the appearance of a Prime Minister, and his example has been so consistently followed as to have become a settled custom. The two foremost statesmen at the time were Lord Townshend and Lord Stanhope, but after the financial crash of 1720, which witnessed the failure of the South Sea Company and several others formed in connexion with it, Sir Robert Walpole took office and held it without a break for over twenty years (1720–42) resigning his various offices after a parliamentary election which returned a majority of members opposed to his policy.

During Walpole's strong administration the Tory party had sunk into insignificance in the House of Commons and opposition to Walpole was offered principally by a section of the Whig party, headed by Lord Pulteney and Lord Chesterfield. This section was joined by the remnant of the Tory party, but there was no great change in policy after Walpole's retirement, Lord Wilmington becoming Prime Minister until his death in 1743, when he was succeeded by Henry Pelham, brother of the Duke of Newcastle, who remained in office until his death in 1754.

Two years later William Pitt became Secretary of State under the Duke of Newcastle, who had led the government since his brother's death, but the accession of George III. was followed by the rise of Lord Bute, a Tory and an avowed advocate of the supremacy of the monarchy over parliament and parties. Lord Bute was appointed Prime Minister in 1761, and caused the resignation of Pitt as Secretary of State and leader of the House of Commons. Lord Bute was succeeded by George Grenville, who became unpopular at home owing to his attempted suppression of the liberty of the Press and in the North American Colonies through the imposition of the Stamp Act. Upon Grenville's retirement in 1765 the King invited William Pitt to form an administration, but Pitt declined owing to lack of parliamentary support and the post was accepted by Lord Rockingham.

In 1766 Pitt became Prime Minister and was created Earl of Chatham, but his health failed in 1767 and the Duke of Grafton (1767–70) and Lord North (1770–82) led the Tory party until the return of the Whigs to power under Lord Rockingham and Lord Shelburne.

In 1781, William Pitt, the younger, second son of the Earl of Chatham, entered Parliament at the age of 22, and became Chancellor of the Exchequer in Shelburne's government. In 1783 Lord Shelburne resigned, and a Coalition Ministry was formed by the Duke of Portland, with Charles James Fox and Lord North as Secretaries of State, the Ministry including the Whigs who followed Fox and the Tory supporters of North. This Coalition marked the first departure for over 60 years from the rule of strict government by party, but it soon broke up after a defeat on the India Bill introduced by Fox, and the Ministers resigned.

William Pitt became Prime Minister in 1783, when in his 25th year, and a general election in 1784 gave him an overwhelming majority in the House of Commons. He remained in office until 1801, when he resigned owing to the King's opposition to Catholic emancipation, and was succeeded by Henry Addington. In 1804 Pitt returned to office, but his health was failing and he died on Jan. 23, 1806. During his membership of the House of Commons, parliamentary debates were distinguished by the oratorial duels between Pitt and his great opponent Fox, and opposition and occasional support from Edmund Burke.

Pitt's second administration was followed by a National Ministry, known as "The Ministry of All the Talents," formed under Charles James Fox and Lord Grenville for the prosecution of the war with France. This Ministry was dissolved by the death of Fox in Sept. 1806, and the Duke of Portland became Prime Minister in

1807, followed by Spencer Perceval, who was assassinated in 1812. The death of Perceval was followed by the long administration of the Earl of Liverpool (1812–27).

George IV.'s accession did not alter the political course of the country, and in 1827 George Canning, who was an ardent supporter of Pitt in his early years and had held office under him, was Prime Minister for a few months. At his death he was succeeded by Lord Goderich, who resigned in 1829, when the Duke of Wellington accepted office as Prime Minister.

The Duke of Wellington's administration was marked by the passing of Catholic emancipation, largely through the aid of Robert Peel, and by means of support from the Whigs, but the Tory party had become disorganised, and Wellington resigned in 1830.

Parliamentary Reform had been advocated by the elder and younger Pitt, and was brought about at the beginning of William IV.'s reign in Earl Grey's administration (1830–34). The Whigs had adopted (1828) the name of *Liberal*, and the Reformed Parliament contained a large majority of Liberals, with an advanced wing, known since 1816 as "Radical Reformers" or **Radicals**. The Reformed Parliament also witnessed the growth of an Irish Party under Daniel O'Connell, formed from the Irish members brought into the House at the Union of 1801. The Tory Party also changed its name (at the instigation of John Wilson Croker, an Irish M.P.) to *Conservative*, and formed a compact opposition under the leadership of Sir Robert Peel, who became Prime Minister for a few months (1834–35) between the two administrations of Lord Melbourne, and held office again, with a considerable Conservative majority in the House of Commons, from 1841–46.

Sir Robert Peel entered office as an avowed Protectionist, but a potato famine in Ireland, and a disastrous harvest in England brought about the repeal of the Corn Laws with Liberal support. When Peel retired from office the Conservative party was disunited, the malcontents or "Young England" party including Benjamin Disraeli, who had been elected M.P. for Maidstone in 1837.

Free Trade was the dividing line between Conservatives and Liberals at the polls for many years, the principal exponents being Richard Cobden, termed the "Apostle of Free Trade," and John Bright. Free Trade carried the day, and from 1847 to 1865 the Government was in Liberal hands (with the exception of two short administrations under Lord Derby in 1852 and 1858), the great parliamentary figures (in addition to Cobden and Bright) being Lord John Russell, Lord Palmerston (whose Irish peerage enabled him to sit in the Commons) and William Ewart Gladstone, whose oratorical duels with Benjamin Disraeli revived the memories of Pitt and Fox.

Lord Derby was Conservative Prime Minister for a third time from 1866, with Benjamin Disraeli as leader of the House of Commons. Disraeli succeeded as Prime Minister on Lord Derby's retirement in February, 1868, but the House of Commons, elected after a Reform Bill passed by the aid of the Liberals, showed a large Liberal majority. Gladstone's first administration lasted from 1868 to 1874, when a General Election again placed Disraeli in power for six years, but in 1880 the Liberals were returned with a majority of 62, and the second Gladstone administration lasted until the Home Rule election of 1886, except for an interval of a few months in 1885, when the Conservatives were in office under Lord Salisbury.

Home Rule for Ireland temporarily displaced Free Trade as a dividing line between the two great parties in the State, and a new party had been formed in the House of Commons from Irish members pledged to Home Rule, following a movement initiated in 1871 by Isaac Butt, member for Limerick. A Home Rule resolution was defeated in the House by 314 to 52 in 1874 but the General Election of 1880 returned 60 members pledged to fight for Home Rule. Butt died in 1879 and was succeeded as leader by William Shaw, who gave way in 1880 to Charles Stewart Parnell,* member for Meath and afterwards for Cork City. Government by Party majority thus became complicated through the existence of a third party possessed of sufficient voting strength to turn the scale in a division.

Home Rule caused many secessions from the Liberal party (including Lords Hartington, Selborne and Derby, John Bright, G. J. Goschen, Joseph Chamberlain, Sir John Lubbock, and Sir Henry James) and resulted in the formation of a new party of *Liberal-Unionists*, who acted generally in concert with the Conservatives. In 1886 a General Election returned a majority of 114 against Home Rule, and Lord Salisbury became Prime Minister as leader of the Unionist party, which was in power, except for a Liberal Administration (1892–95), until 1905, Arthur James Balfour succeeding Lord Salisbury as Prime Minister in 1902.

In 1903, Joseph Chamberlain spoke at Birmingham on trade preference and reciprocity with the Dominions. His policy became known as *Tariff Reform*, and was vigorously opposed by the Liberals. Mr. Chamberlain claimed that the fiscal relations of the country had wholly changed since the days of Cobden and Bright, and he advocated retaliatory tariffs when the interests of Great Britain and the Dominions were threatened. The policy was much in prominence during the election of 1906, which, however, gave the Liberals the unprecedented majority of 356. But another party had come into being, *Labour* members being elected in a strong force. The pioneers in the cause of Labour had hitherto professed advanced Radicalism, and the small handful of 1895 (12) and 1900 (11) was increased to 52 in 1906.

In 1905 the office of Prime Minister, which had been in existence for nearly 200 years, was officially recognised, and its holder granted a place in the Table of Precedence.

Sir Henry Campbell-Bannerman, the new Liberal Prime Minister, died in 1908 and was succeeded by Herbert Henry Asquith, who remained in office until after the outbreak of the Great War. He was succeeded on Dec. 7, 1916, by David Lloyd George (who had been Chancellor of the Exchequer since 1908) at the head of a National Ministry formed from the Liberal and Conservative parties.

Home Rule had been granted to Ireland before the war, but the state of affairs in Ireland caused the Legislation to be suspended, and Irish members of the House of Commons numbered 105 until they were reduced to 13 by the passage of the Government of Ireland Act of 1921.

* Owing to trouble of a non-political nature the Irish Nationalists split in 1890 into Parnellites and Anti-Parnellites. Parnell died in 1891 and John Redmond became leader of the Irish Home Rule party in 1892.

The Coalition, or National Government, appealed to the country in 1918 and was returned to power with a majority of 263, the Opposition consisting of 80 Irish Nationalists, 63 Labour and 86 Independent Conservatives and Liberals. The Coalition was dissolved in 1922, and government was again conducted on party lines, 347 Conservatives being returned at the General Election, the Opposition (268) consisting mainly of 142 Labour and 59 Liberals.

Women of 30 were admitted to the Franchise at the election of 1918, but the first woman elected to Parliament (Countess Markiewicz) did not take a seat in the House, the first to do so being Lady Astor (1919). At the dissolution in 1931 there were 15 women members. Margaret Bondfield was the first woman member of the Cabinet and of the Privy Council. At the election of 1929 women had the vote on equal terms with men. Women so elected (up to the Dissolution in Oct. 1931) have been Labour (12), Conservatives (4), Liberal (4), and Independent (1). They have not formed a separate party.

Andrew Bonar Law was the first post-war Conservative Prime Minister, to be succeeded in 1923 by Stanley Baldwin. In November, 1923, Mr. Baldwin outlined a policy of protection for British Industries, which was vigorously opposed by Mr. Asquith and Mr. Lloyd George. In December a General Election resulted in the defeat of Mr. Baldwin's policy, although the Unionist party remained the largest, but without a clear majority (Conservatives 258, Labour 191, Liberals 156). After meeting Parliament in the following January Mr. Baldwin's Government was defeated by 328 votes to 256 on a Labour amendment to the address.

On Jan. 22, 1924, J. Ramsay MacDonald, leader of the Labour party, formed the first Labour ministry, and although a minority in the House, subject to occasional reverses in the lobbies, Labour remained in office until the dissolution in the following October.

The General Election of October 1924 was fought mainly on "Socialism or Anti-Socialism," tariff questions being excluded for the time being. The Liberal party suffered severe reverses, Mr. Asquith being unseated, and the leadership of the party devolved upon Mr. Lloyd George. Mr. Baldwin became Prime Minister for the second time, with Winston Churchill as Chancellor of the Exchequer, the House consisting of 413 Conservatives, 150 Labour, and 39 Liberals. The Conservatives remained in office until 1929, when a General Election, for the first time, returned Labour members as the largest single party (287) against 259 Conservatives and 59 Liberals.

In 1931, owing to disagreement in the Cabinet as to the method to be employed in restoring financial equilibrium and the balance of trade, Mr. MacDonald placed his resignation in His Majesty's hands (Aug. 23), and accepted office next day as Prime Minister of a National Government, with a Cabinet of 10 members, four of whom were Labour, four Conservative and two Liberal.

The change caused a definite cleavage in the Labour party, a small number following Mr. MacDonald, while the bulk of the party went into opposition under the leadership of Arthur Henderson, a member of Mr. MacDonald's cabinet in 1924 and 1929. Mr. Lloyd George was absent from Parliament through ill-health but after negotations he declined to support the National Government. After carrying certain emergency measures through Parliament the National Government appealed to the country in October, 1931, the opposition consisting of the bulk of the Labour party, the official Liberals under Mr. Lloyd George, and other independents, including the *New Party*, under Sir Oswald Mosley, but a considerable number of Liberals formed the Liberal National Party under the leadership of Sir John Simon in support of the Prime Minister.

There were 1,231 candidates for the 615 seats, made up of :—

For the National Goverment : National Labour (supporting Mr. MacDonald) 22 ; Conservatives 520 ; Liberal Nationals 40 ; Liberals (under Sir Herbert Samuel) 86 ; Independent Nationals 3.

Against : Labour (supporting Mr. Henderson) 513 ; Liberals (following Mr. Lloyd George) 34 ; Sir O. Mosley's party 24 ; Communists 25.

Women candidates numbered 62, of whom 21 were for the Government and 41 against.

The election resulted in the return of the National Government by the largest majority ever known in the House of Commons, 497, made up as shown on p. 181.

Of the Ministers who resigned on Aug. 23, Lord Sankey (Lord Chancellor), Mr. Snowden (Exchequer) and Mr. Thomas (Dominions), joined Mr. MacDonald in the *National Labour Party*. At the General Election in October Mr. MacDonald (Seaham) and Mr. Thomas (Derby) were returned by their former Constituencies, while Mr. Snowden (Colne Valley) did not seek re-election. All other members of the Labour Cabinet of 1929-1931 were defeated, with the single exception of Mr. Lansbury (Bow and Bromley Division of Poplar).

The *National Ministry* was reconstructed on Nov. 5, further appointments being made during the month. In its final form the Ministry (*see* p. 169) numbered 64 (Cabinet 20, other Ministers 44), drawn from the different Parties as under :—

Party.	Cabinet Ministers.	Other Ministers.	Total.
National Labour (MacDonald)	4	7	11
Conservative (Baldwin)	11	25	36
Liberal National (Simon)	1	3	4
Liberal (Samuel)	4	9	13
Total	20	44	64

ALLOTMENTS FOR UNEMPLOYED.

TOWARDS the end of 1930 a Committee was formed by the Government under the Chairmanship of Sir William A. Waterlow, Bart., K.B.E., to assist unemployed and partially unemployed men in obtaining and cultivating allotments. This plan was put forward not only for the economic value of their homes but also "in order to provide occupation for both mind and body, and to bring an interest into the lives of those who, in these difficult times, may lose hope and spirit." The necessary statutory powers were later obtained under the Agricultural Land (Utilisation) Act, 1931. The provision of the necessary land was the duty of the local authorities, and it was their task to find out what land was available for cultivation as allotment-gardens, and what were the numbers of unemployed men and women who were likely to take advantage of any facilities which might be provided for them. In the areas of some authorities where successful efforts had already been made to secure the cultivation of allotment-gardens by the unemployed, there were in existence Committees for maintaining and extending such cultivation. In these cases it was not necessary for new organisations to be set up, but where no such Committees were in existence Voluntary Committees were set up varying according to local needs and circumstances, but usually consisting of representatives of the District Council of Social Welfare and Local Trades Council, the manager of the local Labour Exchange, and the county Horticultural Adviser. Each Voluntary Committee appointed a Secretary and a Chairman, whose first task was to keep closely in touch with the Central Executive Committee which was set up by the Minister for the purpose of promoting generally the cultivation of allotment-gardens by the unemployed. Supplies of seeds, fertilisers, &c., were available at very low rates, but as supplies were restricted, and to prevent abuse, it was generally required that the financial status of the applicant was in accordance with the following scale. Total net weekly income after deducting expenditure on rent and rates not to exceed :—

Man and wife	22s.
Man and wife with 1 child	27s.
Man and wife with 2 children	30s.
Man and wife with 3 children	33s.
Man and wife with 4 childen or over	35s.

This assistance applied not only to unemployed or partly unemployed persons who already had allotment-gardens, but also to those persons to whom plots were newly provided. For approximately 6s. the following supplies could be obtained :—4 stones of special fertiliser, 4 stones of potatoes, and a special collection of 23 different kinds of garden seeds (or a smaller amount as selected by the member), while a spade or fork was provided at 1s. each, and 1 cwt. of lime was given free when specially recommended. For this outlay of 6s., therefore, a plot-holder had sufficient seeds to plant and cultivate a 10-rod allotment. To assist the plot-holders further, it was arranged that payment for seeds could be made by instalments either weekly or as arranged by the Committee. It has been calculated that by this means about 64,000 unemployed men throughout England and Wales have been assisted to grow their own food ; and in the Sheffield area alone, it was reported that 2,185 men were working their allotments, and that at a cost of about £1,500 vegetables to an approximate value of £15,000 were being grown. It has now been announced by the Minister of Agriculture and Fisheries, however, that in consequence of the present national emergency, no financial assistance will be forthcoming in connection with this scheme for the 1932 cropping season.

CAPITAL PUNISHMENT.

THE Report of the Select Committee of the House of Commons on Capital Punishment appointed in December, 1929, was issued in December, 1930. The Committee stated that their investigations fully warranted a recommendation for the immediate passing of a Bill to provide for the abolition of the death penalty for an experimental period of five years in cases tried by civil courts in time of peace, and that in the meantime the House of Commons should pass a resolution declaring that the Home Secretary and the Secretary of State for Scotland should, in tendering advice as to the exercise of the Royal prerogative of mercy, recommend in each case the commutation of the death sentence, the penalty to be substituted being that now attached to reprieved murderers, interpreted and administered in the same way as at present. In the event, however, of Parliament deciding to maintain the death penalty, alternative recommendations were made ; the McNaghten Rules on the subject of insanity to be revised so as to give fuller scope to general medical considerations and to extend the area of criminal responsibility in the case of the mentally defective and insane ; the death penalty to continue to apply to women on the same terms as men ; as 21 is the age when full civil responsibility is assumed, no person below this age to be sentenced to death ; a still larger exercise of the Royal prerogative to be made and, by means of a resolution of the House of Commons, the line that has come through precedent to mark the limit of its application to be raised. Amongst the statistics relating to capital crime given in the report it is stated that in 1929 the number of executions was almost the lowest on record, 7 for England and Wales, and none in Scotland, while the average for the whole country for the 10 years, 1920 to 1929, was 14·7 ; during this century 411 persons have been executed in England and Wales and 327 reprieved, the corresponding figures for Scotland being 20 and 15 respectively. The value of the Report was seriously diminished by the fact that, of the 15 members of the Committee, the 6 Conservatives were so opposed to the report as drafted that, being denied the opportunity of preparing an alternative, they withdrew and took no further part in the proceedings. As, according to the practice of Select Committees, the Report was not signed and no minority report was possible, there was no means of ascertaining whether it represented the unanimous opinion of the remaining members of the Committee, and in consequence it was criticised as lacking the authority demanded by the nature of the subject. Up to the present Parliament has taken no further steps in the matter.

THE CENSUS, 1931.

THE fourteenth census of the population of Great Britain was taken on Sunday, April 26, 1931, and in order to meet the more urgent

purposes for which the results were awaited, a preliminary report dealing almost entirely with England and Wales was issued on July 6; the figures are provisional, but judging by past experience no material discrepancy is anticipated. The totals for 1931 are the largest hitherto recorded:—

	1921.	1931.	Increase (+) or Decrease (−).
England	35,230,225	37,354,917	+ 6·0%
Wales	2,656,474	2,593,014	− 2·4%
	37,886,699	39,947,931	+ 5·5%
Scotland	4,882,497	4,842,554	− 0·8%

As regards England and Wales, the density is 685 persons per square mile, far higher than that of any other country recorded, with the possible exception of Belgium, and more than double those of a large majority of other countries. With the sole exception of the war decade, 1911-21, the numerical increase of 2,061,232 is less than that of any decennium since 1861, and the percentage increase is only half or less than half of any previously recorded. The comparative lowness of this increase is stated in the report to be wholly due to the enormous reduction in the number of births 1921-31, although marriage rates have been well maintained; the total births are 16·3 per cent. fewer than in 1911-21, which covered the war years, when the birth rate sank to a level lower than any before recorded, and are 25·4 per cent. less than the normal decennium 1901-11; the full significance of the fall will be but dimly appreciated for many years to come. The present rate of 16·3 per 1,000 is lower than in any country except Sweden, and is regarded as definitely insufficient to maintain a stationary population in the future, as the Registrar-General's estimate of the birth rate necessary to avoid a future decline in the population is about 19½ per thousand. A partial set-off against the decline in births is to be found in the death rate, which for the decade 1921-31 is lower than any previously recorded rate; the reduction is more than 10 per cent., which, if allowance be made for the increasing age and numbers of the population exposed to risk, represents a reduction in true mortality of more like 20 per cent. compared with 1911-21 (excluding deaths on active service), or 30 per cent. compared with 1901-11.

A further stage is recorded in the steadily increasing predominance of the urban as compared with the rural element of the population, the proportion now being roughly 80 and 20 per cent. respectively as compared with 79·3 and 20·7 in 1921 and 78·1 and 21·9 in 1911; this is not due to a drift from the countryside to the towns due to developing industries, but largely to the encroachment of urban upon rural areas consequent upon the natural development of the former. More than one-half of the total population is aggregated in comparatively dense units of 50,000 and upwards, and one-quarter in the 13 largest towns (counting London as one) with populations exceeding 250,000. The Census figures indicate that development is concentrated primarily in the South-Eastern counties, and that the London area is growing at the expense not so much of rural areas as of the provincial towns, particularly those of South Wales and of the North of England.

The figures for Greater London, which comprise the County of London and the Outer Ring, and coincides with the area of the Metropolitan and City of London Police Districts, are as follows:—

	1921.	1931.	Increase (+) or Decrease (−).
County of London	4,484,523	4,396,821	− 2·0%
Outer Ring	2,995,678	3,805,997	+ 27·0%
Greater London	7,480,201	8,202,818	+ 9·7%

It is considered that further time is required to prove whether the movement towards the metropolis, which has been somewhat precipitate, is more than a transient phase during the widespread industrial depression to be succeeded by an equally marked reaction if and when the older industries regain their former established positions.

Excluding the County of London, there are now 112 towns with populations exceeding 50,000 as compared with 100 in 1921; the figures for the six largest towns are:—

	1921.	1931.	Increase.
Birmingham	922,167	1,002,413	8·7%
Liverpool	805,046	855,539	6·3%
Manchester	735,774	766,333	4·2%
Sheffield	511,696	511,742	0·0%
Leeds	463,122	482,789	4·2%
Bristol	377,018	396,918	5·3%

The preponderance of females over males, which in 1921 rose as a direct result of the war, shows a decrease but is nevertheless greater than in 1911, the proportion to 1,000 males being 1,087 in 1931, as compared with 1,096 in 1921 and 1,068 in 1911.

The Census operations were handicapped by events and circumstances described at some length in the Report, and a complete enumeration only achieved by exceptional efforts; the authorities in face of very general demands for exclusive recruitment of unemployed labour were of opinion that compliance would have meant disaster, and their refusal was felt to be justified by subsequent experience; a careful and prudently conceived measure of resort to the unemployed, in the words of the Registrar-General, was, however, attempted, and the 40,016 enumerators for the 1,770 registration sub-districts were composed as follows:—

12,704	Unemployed.
1,821	Civil Servants.
6,347	Local Authority officers or employees.
19,144	Other employed or retired persons.

A tribute is paid to the preparatory word of explanation by the Press, B.B.C. wireless talk, large industrial concerns, and instruction in elementary and other schools by the co-operation of the Board of Education, local education authorities and school teachers.

CIVIL SERVICE COMMISSION.

A DIFFICULT task was completed during 1931 by the Royal Commission on the Civil Service, which under the chairmanship of Lord Tomlin, examined nearly two hundred problems and in its report made a number of important recommendations. On the question of remuneration in the Service, the Commission found no support for the view that there had been a lowering in the standard of remuneration as compared with that in the community generally. The claim

for a minimum wage of £3 10*s.* 0*d.* a week was rejected, as was that suggesting that Civil servants should be regarded as "a highly selected class in each field of labour" and therefore treated better than their fellow countrymen. The Commissioners were satisfied that the present general standard of remuneration of Civil servants was reasonable in the light of the wage levels prevailing, but they recommended that the remuneration should cease to be varied automatically in accordance with changes in the cost-of-living figure and that the practice should be abandoned of attempting periodic comprehensive reviews of the remuneration of all non-industrial Civil servants on the basis of a single formula. The majority of the Commissioners recommended that cost-of-living bonus should forthwith be consolidated with basic salary and that the bonus should meantime be considered at the then existing rate. A review of the consolidated rates should be made early in 1934, in their opinion, to consider what changes, if any, were necessary in the light of changes in general wage levels. They expressed the view that the fall in bonus had resulted in reductions which were felt most by adult Civil servants with pay, inclusive of bonus, not exceeding 70*s.* a week. The proposed consolidated rates would give £80 to those with a present salary of £77 10*s.* 0*d.*, £118 for £116, and £155 for £152, above which the proposed rate would mean a small reduction. New future scales were also recommended, but in view of the economic situation an immediate increase in salaries above £500 basic was not regarded as practicable. A few minor changes in the methods of recruitment were proposed, and in general the system of promotion was regarded as satisfactory. In filling the higher posts in the Service, the Commissioners declared, merit should be the only consideration; in the middle ranges merit should be the determining factor; but in the lower ranges seniority and length of service would necessarily carry weight. Even in the lower ranges, however, steps were urged to ensure that exceptional merit should be rewarded by accelerated promotion. "In regard to the Service generally," it was added, "the factor of seniority is unlikely to be undervalued, and we deprecate the exercise of any pressure designed to stress the claims of seniority as against exceptional merit." The Commission considered the question of the employment of women in the Service and agreed that the object should be to secure for the State the advantage of the services of women wherever those services would best promote its interests. Speaking generally, the Commissioners held that the best course was to adopt the policy of "a fair field and no favour," but that rule must be subject to modifications in certain areas of the Service. They were divided almost equally on the question of equal pay for women and a difference of opinion on the operation of the marriage bar was also recorded. A majority approved of the retention of the bar but agreed to some provision to meet objections as to the loss of experienced workers. The Commission as a whole agreed that if a discretionary power was to be adopted it should be a power which was capable of use. The view was expressed that the time had come when the practice of reserving temporary clerical posts to ex-Service personnel should be changed and that in future the main clerical classes should be recruited by open competition.

CONFERENCES.

WE are reaching a stage in the world's progress when the wisdom of "taking council together" is now widely acknowledged. Congresses and conferences are now the rule in almost every movement, profession and trade. A selective list follows, the choice being determined by their variety. Reference to many others will be found elsewhere in the ALMANACK. A full list with due resumés of proceedings could not be compressed within the compass of this volume.

Int. Con. of the World Assn. for Adult Education, Vienna, Aug. 20-11, Mr. L. Tyson, U.S.A., President. B.C.C. and L.C.C. were officially represented.

7th An. Convention of Advertising Association, Glasgow, June 20-24, Sir J. Gomer Berry, President. Delegates met to "re-examine functions of advertising in relation to trade, interpret its true value and importance to the general public, consider means for maintaining its effective use, power, and adaptability to changed conditions." Lt.-Col. E. F. Lawson, in referring to lack of confidence in nation, said advertising was the means to remove that depressing influence.

19th Session, Int. Con. for Air Navigation, London, June 1-6. Lt.-Col. F. C. Shelmerdine presided over representatives from 23 States. Matters dealt with included: Minimum air-worthiness certificates, new international maps with modification of signs used, new code for meteorological messages and methods for their communication, modification of night navigation lights, collection of details of cable obstructions, sanitary control of air navigation. Next session —May, 1932, in Paris.

British Commonwealth Education Con., London, July 24-30. Sir P. Nunn, President. Six hundred delegates from Britain and Overseas Empire reviewed progress and needs in education to meet changing conditions of life within the Empire.

Int. Con. on Coal Mining Industry in Europe, London, Sept. 30-Oct. 1. Mr. Evan Williams (Mining Assn. Gt. Brit.), President. Colliery owners sent representatives from Belgium, Czechoslovakia, France, Germany, Netherlands and Poland. Methods were sought for meeting the economic position of the coal industry; an agreed statement was achieved, and this was to be remitted for consideration by national organisations.

15th Int. Cotton Con., Paris, June. M. Laederich, Chairman. Present over-production, under-consumption, loss of markets, rationalisation, passing of cotton spinning from Lancashire to Japan, failure of Britain to work double shifts in mills, trade restrictions, finding of new uses for cotton were included in the discussions.

2nd Triennial Con. of Empire Surveyors, Colonial Office, July. Methods of survey and issue of maps discussed. Sir E. Dowson arranged 300 exhibits collected in mapping, photographing and surveying as a basis for a permanent exhibition. *Empire Survey Review*, recommended at 1928 Conference, made its first quarterly appearance in July, 1931.

Empire Wool Con., Melbourne, June 22-24. Sir G. Waddell (Chairman, Woolgrowers' Con.), President. Great Britain, South Africa, New Zealand, all Australian States were represented. Five different stabilisation plans were produced and rejected. Closer co-operation between wool producing countries within Empire was

established for marketing with co-ordination in publicity and research. Australian and South African growers agreed to interchange of complete statistics and reports.

Int. Con. of Geography, Paris, Sept. 16-22. Amongst 800 delegates were official representatives from 20 Governments, including British War Office and S. Kens. Science Museum.

Int. Illumination Con., London, Glasgow, Sheffield, Cambridge, &c., Sept. 1-25. Mr. C. C. Paterson, President. Methods of lighting under all conditions discussed. British conditions somewhat criticised in being left to Local Authorities without any sense of national standardisation. A month of floodlighting of public buildings in London (Buckingham Palace, Victoria Memorial, Westminster Abbey and Tower, etc.) attracted huge crowds at nightly exhibitions. Many provincial towns had like displays, including Dover Castle, Durham Cathedral and Hexham Abbey.

37th Meeting of Institute of International Law (Founded: Ghent, 1873), Cambridge, Aug. 3-8. Prof. Pearce Higgins, President. Discussions included mandates, minorities, navigation of rivers, limit of state criminal jurisdiction.

Inter-Parliamentary Commercial Con. was held in Prague, May. Sir J. S. Allen, M.P. W. Derby, was Chairman of the British Empire Delegation. Work of League of Nations, tariff walls and trade development were discussed, but decisions or opinions of delegates have no binding authority from individual Parliaments.

27th Con. of Inter-Parliamentary Union, Bucharest, Oct. 1-6, M. Lafontaine (Belgium), President. Surplus production, tariffs, armaments were again topics. The Union draws its delegates from parliamentary bodies but its resolutions have no binding force and are not recognised officially by Governments. Discussions, however, prepare the way for legislation.

54th An. Con. Library Assn., Cheltenham, Aug. 31-Sept. 3. Lt.-Col. J. M. Mitchell, Carnegie U.K. Trust, President. Dean Inge introduced opening session with discussion on library services for hospital patients, Sir B. Bruce-Porter following with suggestion for nationally organised plan. Other debates viewed library policy from all aspects.

Int.-Fed. of Library Assns., Cheltenham, Aug. 29. M. Collign, Stockholm, President. Dr. Bishop, Michigan, U.S.A., drew attention to absence in Britain and U.S.A. of any organisation for registering published works. Only books included in statistics were those for which copyright had been applied. Result was figures for other countries where every publication had to be registered often exceeded those of Britain and U.S.A.

2nd Int. Con. of Linguists, Geneva, Aug. 25-29, Pro. Chas. Bally, President. Discussions covered adoption of a recognised medium as an international artificial language, effects and influences on development of languages, origins (Sir R. Paget dealt with gestural origin), phonetics and linguistics. Next congress will be in Rome, 1934.

1st Int. Con. of Neurologists, Geneva and Berne, Aug. 31-Sept. 9. Professor Sachs (U.S.A.), President. A wide survey of the relation between nerve force and life was made by 800 medical experts.

2nd Int. Orthodontic Con., London, July. (First held, New York, 1926.) Mr. J. H. Badcock, President. Correction of teeth irregularities in children with subsequent prevention, thus benefiting health and altering shape of face.

15th Int. Con. of Navigation, Venice, Sept. 12-16. Signor Giurati, President. King of Italy attended opening meeting. *3rd Int. Motor-Boat Meeting* was held at same time.

1st Int. Con. on Public Cleansing, London, July. Mr. J. C. Dawes, Ministry of Health, President. Various methods employed in town cleansing, sanitation, disposal of refuse.

1st Nat. Con. of Rhabdomancy (divination by rods). Rome, March. Advantages that rhabdomancers could confer on agriculture were discussed Practical examples were given of divining metals and water supplies.

2nd Int. Con. of Science and Technology, *London*, June-July. Dr. C. Singer, President. Importance of science in teaching of history; relation between biological and physical science; interdependence of pure and applied science.

1st Imperial Sugar Cane Research Con., London, July. Conference was called by Empire Marketing Board to survey the scientific needs of the cane sugar industry of the British Empire.

4th (quinquennial) Con. of Universities of the Empire. Opened by Prince of Wales, as President, Guildhall, London, July 3. Seventy Universities were represented by 240 delegates. Meetings began at Edinburgh, July 6. An official luncheon to welcome delegates was given by Government.

World Social Economic Con., Amsterdam, August. Proposals put forward for stablisation of world industry by world scale application of principles of scientific business management; war debt moratorium for five years; maintenance of standards of living in advanced countries with levelling up of those in less developed nations.

17th Zionist Con., Basel, June 30-July 15. Dr. Weizman was officially President, but during his absence Mr. N. Sokolow acted and was elected new President. Development of Jewish industry in Palestine with establishment of corporations in all countries under a single association to forward business was approved. Forces were to be mobilised to support the Palestine Foundation Fund. The Revisionists, who are opposed to Jewish Agency extension, suffered defeat for their proposal to terminate agreement between Zionists and non-Zionists. Congress resolved to support Government's land development scheme subject to absolute equality of Arabs and Jews.

71st An. Meeting of British Chambers of Commerce was held in London April 23-4, Sir Walter Raine in Chair. Need for import duties on manufactured goods, re-consideration of expensive social services, and consideration of Russian trading methods were amongst accepted resolutions, but one objecting to the coupon system of trading was rejected.

6th Biennial Con. of International Chamber of Commerce took place at Washington, in May, President Hoover opening the assembly with a speech that suggested futility of co-operation between Europe and U.S.A. until the armament problem had been surmounted.

CO-OPERATION.

THE essential feature of co-operation is the association of individuals, either as consumers to purchase goods or services for their own consumption, or as producers to market those of their own production. The object of co-operation is to cheapen commodities to the consumer

or to obtain a better selling price for the producer. Co-operative societies are registered under the Industrial and Provident Societies Acts, but to obtain registration under these Acts it is not essential for a society to be co-operative in character provided that it restricts the interest which any member may have or claim in its shares to £200, and otherwise complies with the statutory requirements. In Great Britain, judged by its growth, the co-operation of consumers has been remarkably successful, but co-operation of producers comparatively slow and often a failure. A certain measure of production has been undertaken by the retail co-operative societies, and by the wholesale buying agencies established by them, but such production is mostly an assembly of costly materials produced elsewhere into more finished products, and adventures into the more basic forms of industry, such as agriculture and mining, have not as a rule been attended with so much success. There have been many proposals to link up the two lines along which co-operation is developing, and to make the one type of association serve the interests both of consumer and producer, but owing to the divergence of interest and the difficulty of arriving at a satisfactory and permanent basis of adjustment, the efforts in this direction have as yet been in the main unsuccessful.

(*a*) *Co-operation of Consumers.*—This form of co-operation in Great Britain has been based on an ideal, which in a large measure has been responsible for its successful development. Co-operative trading societies are so constituted that interest on share capital is limited to a fixed rate and members' control is not increased in proportion to their shareholding. After meeting interest on share capital, any surplus arising on trading is returned to the purchaser in proportion to the value of his purchases. Frequently, however, members do not exercise their right to withdraw in cash their share interest and dividends on purchases, but allow them to accumulate and so provide further working capital for the extension of the movement. In almost any year, societies as a whole, if they were able to alter their constitution and withhold dividends on purchases, could pay a 20 per cent. dividend on their share capital in addition to the customary fixed rate of interest of from 4-5 per cent. Moreover, reserves are continually piling up in the form of goodwill *with every extension of business. They are* never distributed, but are handed down free of charge from one generation of co-operators to another. Co-operation among consumers thus grows steadily in spite of outside competition and industrial set-backs. In 1930 there were 1,248 retail, 3 wholesale, and 68 productive † associations controlled by consumers. Sales of the retail societies totalled £216,327,000 and more than half these supplies were obtained from the wholesale societies whose sales at wholesale prices totalled £104,346,800. Sales by the productive societies amounted to only £3,483,000. These 1,319 consumers' societies had an aggregate membership of 6,372,000 or 239,000 more than in the preceding year, and capital (share and loan) and reserves of £204,875,000. The societies employed in all some 244,500 persons, and their total wages bill amounted to £31,914,000. The aggregate disposable surplus for 1930 of the retail societies amounted to £26,715,000, out of which the fixed share interest charges absorbed £4,804,000, and dividends on sales £20,433,000, or about 1*s.* 11*d.* in the £ on the retail sales. The following statement shows the productive output by the three classes of consumers' societies in Great Britain in 1930:—

—	Value of Productions (including Materials)	Cost of Materials used.	No. of Employees engaged.	Salaries and Wages.
	£	£		£
1. Food and Tobacco including farm and dairy produce.	57,552,000	44,485,000	29,400	4,212,000
2. Clothing and Textiles including boot making and repairs.	8,461,000	4,720,000	25,900	2,822,000
3. Building, Woodworking and Engineering.	5,482,000	2,836,000	12,800	2,142,000
4. Other Industries.	8,105,000	4,715,000	17,300	2,073,000
Total.....	79,600,000	56,806,000	85,400	11,249,000

Of the goods distributed by the retail societies, still at most only one-seventh of the wholesale value is created within the movement. In contrast to the volume of production undertaken by consumers' societies, it may be mentioned that co-operation by producers (i.e. associations of workpeople comprising some 9,200 employees) were responsible in 1930 for productions valued at only £3,347,000 (*including materials*), and that three-fourths of this total represented clothing and textile goods.

(*b*) *Co-operation in Agriculture.**—Societies engaged in agricultural co-operation fall into three groups: (1) *Requirement* societies, whose principal function is to supply their members with seeds, manures, implements, dairy utensils, &c.; (2) *Produce* societies whose chief object is to market members' produce; and (3) *Service* societies which supply some agriculture service, e.g., threshing. As will be seen from the following comparative statements for these three groups, agricultural co-operation in Gt. Britain, which showed signs of expansion during the war and immediate post-war years, has since declined, a decrease since 1920 of 34 per cent. in the number of trading societies (groups 1 and 2) being accompanied by a decline of 22 per cent. in membership. Many societies, including some of the larger county farmers' associations, bacon factories, and other societies engaged in the disposal of produce, have been compelled to wind up during the past few years, finding themselves in a hopelessly insolvent position, and consequently unable to obtain further working capital or credit. Many of the *consumers'* societies, too, have ceased to undertake farming as an auxiliary to their ordinary business. In the service societies (group 3), there was up to 1923 a rapid growth of small holdings and allotments societies, but there has since been a reduction

† Including laundries.

* A few societies connected with fishing are included; their transactions, however, were relatively very small.

of nearly 14 per cent. in the number of societies and of 15 per cent. in the acreage under cultivation.

(1) REQUIREMENT SOCIETIES.

	Number of Societies.	Membership.	Sales. £
1914	274	29,603	1,816,000
1920	667	115,553	13,260,000
1928	395	87,217	8,717,000
1929	374	85,484	8,482,000

This group in 1929 included 273 farmers' societies with 70,972 members. Their sales totalled £8,339,000 (including produce £908,000). The remaining societies included in the figures for 1929 were in respect of associations of allotment holders for supplying their members with requisites. The particulars for 1914 and 1920 include also figures in respect of the Agricultural Wholesale Society, Ltd., which went into liquidation in 1924 with a deficiency of nearly £300,000.

(2) PRODUCE SOCIETIES.

	Number of Societies.	Membership.	Sales. £
1914	129	10,401	936,000
1920	338	45,688	8,203,000
1928	287	38,078	7,143,000
1929	†291	39,959	7,480,000

The increase in the sales figure in 1929 was accounted for mainly by increases recorded by the Scottish Milk Agency, Ltd. (£424,000), several newly-formed egg-marketing societies (£135,000), and a new farmers' abattoir in Scotland (£120,000), but these were partly offset by a decrease of £365,000 in sales by English Hop Growers, Ltd., a co-operative central selling agency established in 1925, which found it necessary to go into liquidation in 1929. The successful operations of the small group of 33 Scottish sheep stock clubs again call for mention in the depression which prevailed among agricultural societies generally in 1929. These societies returned the largest aggregate profit for any group of produce societies in 1929, and by the end of the year their accumulated reserves amounted to double their share capital.

The produce marketed by the 291 societies in 1929 was of the following descriptions and amounts:—

	England and Wales. £	Scotland. £
Milk and Dairy Products	1,203,466	2,382,739
Hops, Fruit and Market Garden Produce	1,969,025	...
Dead Meat	545,662	167,250
Eggs and Poultry	370,630	85,040
Wool	157,593	174,848
Other Produce	40,710	44,545
Fish	97,572	30,314
	£4,384,658	£2,884,736

(3) SERVICE SOCIETIES.

	Number of Societies.	Membership.
1914	347	29,954
1920	937	153,046
1923	974	178,036
1928	862	164,004
1929	849	165,590

† In addition 143 *consumers'* co-operative societies had farming and dairying departments, the value of whose produce amounted to £1 676,000.

This group in 1929 included 666 associations whose objects are to provide their members with small holdings or allotments. The total membership for these associations was 140,085, of whom 90,500 were tenants with about 23,700 acres under cultivation.

Sales by all agricultural trading societies in Great Britain, including the agricultural produce of *consumers'* societies, totalled £17,638,000, societies in *England and Wales* disposing of requirements valued at £7,305,000, and produce £6,599,000, whilst societies in *Scotland* sold requirements valued at £479,000, and produce to the value of £3,255,000.

(c) *Co-operation in Housing.*—The following table shows the phenomenal growth of the Building Society movement in Great Britain, the figures given relating to all societies registered under the Building Societies Acts. The function of these societies is to assist their members in acquiring dwelling houses, business premises, &c., for occupation or investment, by making loans upon the security of a mortgage on the property.

	No of Members.	Advanced during year. £	Total Mortgage Assets. £
1914	627,240	8,762,000	61,050,000
1920	747,589	25,095,000	68,812,000
1929	1,265,329*	74,719,000	268,141,000
1930	1,449,432*	88,767,000	316,314,000

Building Societies are not wholly co-operative in character. It is true that to some extent they are managed by the borrowers, who themselves provide a substantial part of the capital required for advances, but, at the same time, they are open to the membership of persons whose main concern is to find a profitable outlet for their capital. Further statistics relating to Building Societies and a list of the principal ones will be found on pp. 471-73. The above figures for Building Societies completely dwarf the operations of those societies registered under the Industrial and Provident Societies Acts which are connected in various ways with the provision of housing accommodation. As some of the societies registered under the latter Acts are not co-operative in character, and in many the tenants have no interest in the societies otherwise than as tenants, it would seem that co-operation among consumers generally (*i.e.* tenants) in the provision of housing has made no great headway. At the end of 1929 the 288 societies registered under the Industrial and Provident Societies Acts had 25,657 members, and capital (including loans and reserves) amounting to £12,462,000. Rents receivable by these societies aggregated £753,000 and resulted in a net profit of £66,000 after meeting share interest charges amounting to £40,000. A number of these societies have received State aid in the form of loans and subsidies. Of the various co-operative housing schemes, mention may be made of the Bournville Village Trust, which has been followed by a number of similar societies, and of societies promoted by colliery and railway companies. In the latter, estates are being developed by the Great Western Railway Co. at Acton and Hayes. Mention may also be made of societies of a semi-philanthropic nature, such as those in Kensington, St. Pancras and Chelsea, which have recently been formed

* These figures represent the number of share investors. The number of depositors was returned at 428,000 and the number of borrowers 720,000 at the end of 1930.

for the conversion of slum property into blocks of residential flats; in the first mentioned the inclusive weekly rentals for flats ranging from 9*s.* 6*d.* for 2 rooms to 18*s.* 6*d.* for 4 rooms with addition of bathroom and scullery, with, in certain circumstances, a reduction in the rent by 1*s.* per dependent child. A number of co-operative stores run building or mortgage departments as auxiliaries to their trading departments, and are making headway. For example, the Bolton Co-operative Society, Ltd., which has assisted 13,000 of its members in house purchase, advanced a further £130,000 in 1929, while the Oldham Industrial Co-operative Society, Ltd., in the same year made further advances of £102,000. In the south, 1,358 houses had been completed by the Royal Arsenal Co-operative Society, Ltd., on its Bostall estate up to the end of 1929.

(*d*) *Co-operation in Recreation.* — Working men's clubs are registered under either the Friendly Societies Acts or the Industrial and Provident Societies Acts. Most of the older clubs were registered under the former Acts, but since 1920 a large number of clubs, particularly those formed for ex-service men, have been registered as Industrial and Provident Societies. Under the two Acts there were 4,448 clubs at the end of 1929 and they had 1,343,000 members. The income of these institutions is mainly derived from sales of refreshments, which amounted to £10,448,000 in 1929, an average of about 3*s.* 0*d* per member per week. The balance-sheet value of premises and furniture owned by the clubs was about £8,000,000, and their net balance of assets over all liabilities £3,700,000. The premises, etc., are usually acquired with the aid of loans, which are often obtained from local brewers, or in the ex-service men's clubs from the United Services Fund. The older clubs have usually been able to repay their loans, but the newer clubs established for ex-service men are not required to make any periodical repayment to the United Services Fund of their loans, and do not ordinarily make any provision for repayment. In addition to social clubs, special authorities have been given by the Treasury for registration under the Friendly Societies Acts of societies whose object is the promotion of music or sports and games. The advantage of registering such bodies is either not generally known or is ignored, as only a few societies, such as brass bands or quoits clubs, have been registered.

(*e*) *Co-operation in Investment.*—A few societies have been registered in the past under the Industrial and Provident Societies Acts with the object of enabling members to co-operate in the investment of their savings, but such societies were of relatively small importance until the advent of the First Co-operative Investment Trust, Ltd. Second, Third and Fourth Trusts have been formed under the same direction, and have received a large measure of public support. The early successes of these institutions led to the formation by other promoters of a number of trusts having similar objects and registered under the Industrial and Provident Societies Acts, but most of these have made little progress. The share capital of the original series of co-operative trusts at the end of their financial years in 1930, or early 1931, was "First," £1,652,943; "Second," £1,165,856; "Third," £160,693; "Fourth," £69,214. The total number of share investors in these four trusts at the end of 1930 was 43,546. The trusts have suffered heavily from the fall in market values of securities, but they contrived to maintain a dividend at the rate of 4 per cent. per annum for the second half of 1930, although their balance sheets showed their investments at values far in excess of market prices, against which their reserves, even in their entirety, offered but a very slender margin of cover. The excess of depreciation beyond reserves was much increased in 1930, and at the end of the year represented 26 per cent. of book values in the "First" and 20 per cent. in the "Second" Trusts. The "First" added about £13,000 to its reserves and undistributed profit for 1930, while the "Second" drew upon its past reserves to the extent of about £8,000. These amounts, however, bore no comparison to the extent of the fall in value of investments suffered during the year, viz., £270,000 in the "First" Trust and £200,000 in the "Second." The experience of the "Third" and "Fourth" Trusts was similar, although the volume of their business was very much smaller. A notable feature of these four trusts is that about two-thirds of their investments are outside Great Britain, the Irish Free State, and the British Dominions. In view of this distribution of investments and the changes which have taken place both in the value of sterling and securities, the balance sheets of these institutions for the second half of 1931 should be of considerable interest.

CO-PARTNERSHIP.

An account of Profit-sharing and Co-partnership in 1930, based on inquiries made by the Ministry of Labour, is given in the July, 1931, issue of the "Ministry of Labour Gazette." From this article, which relates to Great Britain and Northern Ireland, it appears that relatively small progress has been made in adapting schemes based on profit-sharing principles to industry. The total number of undertakings known to have schemes in operation at the end of 1930 was 491. The total number of workpeople employed by those undertakings was 502,000, and of these, 238,000 participated in the benefit of the schemes. Information was available as to the bonus paid under 422 schemes, and the average amount distributed per head was £9 18*s.*, and represented an average addition of 5·6 per cent. to earnings.

170 of the schemes were operated in conjunction with *Co-operative* societies. The industries or businesses with which the remaining schemes were in operation were as follows:—

Industry or Business.	No. of Firms.	No. of Workpeople Participating.
Agriculture	6	300
Glass, chemicals, &c.	17	22,900
Metal, engineering, &c.	44	21,100
Textile	28	20,600
Food and drink	29	28,500
Paper, printing, &c.	29	8,600
Gas, water and electricity	69	47,500
Insurance, banking, &c.	12	23,200
Merchants, warehousemen, and retail traders	40	11,900
Miscellaneous	47	20,600
Total	321	205,200

The types of schemes comprise "Share Issue" schemes; "Deposit" schemes (where interest varying with profits is paid on employees' deposits); and schemes where (*a*) bonus is paid in cash or credited to a savings or deposit account; (*b*) bonus is retained in a provident, superannuation or similar fund; (*c*) bonus is paid in shares or invested in capital of undertaking; and (*d*) bonus is paid in other ways.

It will be gathered from the above particulars that only a small proportion of workpeople are affected by profit-sharing schemes, and that the total amount distributed in bonus is a relatively small proportion of the total wage distribution.

The article includes a great deal of statistical and other detail as to the schemes in operation and those introduced or terminated in 1930, of which there were only 4 and 8 respectively.

COST OF LIVING.

RETAIL prices have not fallen to the same extent as costs of raw materials and imported goods. Labour in manufacture and merchandising has added considerably to prices, so that the consumers have not felt the benefit to anything approaching the full of the world-wide drop in price levels. If wheat alone determined the price of the loaf, bread would have been cheaper than in Victorian times. Great Britain enjoyed a gradual fall in food prices thanks to the overproduction in the world, but the tide began to ebb with the gold standard change and the lowering of the £1 value in the exchanges. Surplus from abroad will still assist in keeping prices on a lower grade, but the adverse exchanges must raise the prices of commodities since Britain depends so much upon imported foods. On July 2, 1931, the Minister of Labour stated in the House of Commons that compared with July, 1914, weekly full-time wages showed an increase of 70 per cent., and hourly rates 90-95 per cent. Taking into consideration the 45 per cent. increase in cost of living, the average increase in *real wages* appeared to have been 17 in weekly and 30 35 per cent. in hourly rates in the 17 years.

The following figures show official Ministry of Labour changes in living costs and in wages of reporting industries:—

1st day of Month.	Index Figure above that of July, 1914. (100.) Low. High.	Workpeople whose wages changed. (In 000's.)	Net Incidence in weekly wages. (In 000's £.)

CRIME IN LONDON.

IF London is any criterion for the whole of the country, crime is on the increase. In his report for his last full year of office, Lord Byng, the late Commissioner of the Metropolitan Police, indicated that all classes of crime in the area showed a large increase during 1930, as compared with the preceding year. Indictable offences numbered 20,553 against 17,664 in 1929, and the latter figure was higher than in 1928. The number of persons proceeded against for these offences also showed a substantial increase; the number was 13,022, while in 1929 it was 11,332. The number of murders was exceptionally low in 1928 (10), but in 1930 it rose again to the average number for the past 20 year (21). In nine of these cases the murderer committed suicide; in one—the murder of Agnes Kesson at Epsom—the murderer has not been traced. Ten arrests were made in connection with the other 11 cases, and seven of the accused persons (one of whom had committed a double murder) were found insane. The other three were acquitted, including two who were the survivors in suicide pacts. Manslaughter cases numbered 41 against 37, bigamy 105 against 83, and blackmail 48 against 20. The latter increase was attributed to the growing practice of permitting the suppression of the identity of the victims. The offences which involve the breaking into buildings—burglary, housebreaking, shopbreaking and the like—accounted for a considerable part of the increase in indictable crimes. The figures for burglary were 352, against 262 in 1929; housebreaking 2,865, against 2,543; and breaking and entering buildings other than houses, 2,191, against 1,539. Lord Byng declared that much more could be done by the public to protect themselves. "The number of cases in which entry can be made without the use of any tool, and in which once entry has been made there is absolute freedom to roam about the premises, is far too large. It cannot be too strongly emphasized that any precautions which make it more difficult to open doors and windows, and which are likely to cause trouble and delay, are well worth taking." He urged motorists to use garages instead of leaving cars unattended in the street, and said that a very large percentage of the motor vehicles reported stolen were recovered within a comparatively short time. Of 4,941 cars and 505 motor cycles reported stolen in the year, 4,759 and 407 were recovered. The opinion was expressed that the work of the mobile squad of the C.I.D., ensuring that patrols with wireless communication with headquarters were available by day and night, had resulted in a large number of apprehensions, and there was every reason to believe that their existence was a considerable deterrent to crime. As a result of redistribution measures, the force in many of the outer districts had been strengthened, but Lord Byng contended that these measures would not be sufficient fully to meet all requirements. Shortly after this contention was made public it was announced that the force would be increased by 400 men with the object of strengthening still further the protection in suburban areas.

DISARMAMENT.

MR. HENDERSON (Foreign Secretary) asked House of Commons on March 9, 1931, to approve of chapters I-IV of the General Act for the Pacific Settlement of International Disputes,

Parliament had given its approval on Jan. 27, 1930, to ratification of the Optional Clause and the General Act would complete Britain's acceptance of arbitration for non-justiciable disputes that the Permanent Court might not find a solution on legal grounds. On March 12, the Franco-Italian Naval Agreement was published. Each might build two capital ships up to 23,333 tons with 12-in. guns up to Dec. 31, 1936, subject to scrapping a battleship for each new one; capital tonnage for each to be raised to 181,000, as against 175,000 in Washington Agreement; each might complete aircraft carriers up to 34,000 tons, giving due notice of intentions; no further laying down of cruisers of more than 6·1-in. gun class; limitation of smaller cruisers and submarines to maximum replaceable before 1936. Experts from Britain, France and Italy continued an exchange of naval views following the agreement.

M. Briand's scheme of a *Federated Union of Europe* with a separate organisation was dropped by the Preliminary Commission of the League in its report of Mar. 25, but it became evident that delegates were divided between economic action and political co-operation. An important step taken was to invite Soviet Russia and Turkey to take part in the further deliberations. In the Aug. meetings of the Commission of Enquiry, a report from a sub-committee of economic experts stated the definite aim must be the "widest collaboration of the nations of Europe in the sense of making Europe a single market for the products of any and every country in it." At the final meeting of the Commission on Sept. 6 it was decided to ask for another Committee to consider a proposal from Russia for an Economic Pact of Non-Aggression. Meantime a recommendation was being sent to the League for its Economic Committee to pursue the questions raised.

The 12th Assembly of the League of Nations (M. Titulescu of Rumania re-elected President) met at Geneva Sept. 7. Signor Grandi suggested a real truce of armaments until Disarmament Conference had completed its work. M. Briand insisted on comprehensive assurances before real disarmament. Dr. Curtius raised the plea of the alternative of security coming from disarmament, not vice versa. Lord Cecil suggested asking all Governments to state before Nov. 1 whether they were in favour of a truce. The U.S.A. would accept the truce for its psychological effect in spite of embarrassment of American shipbuilding. Japan preferred to leave question over to the Conference.

With a view to preparing the ground for the Disarmament Conference that is to be held at Geneva in February, 1932, Mr. MacDonald, Mr. Baldwin and Mr. Lloyd George spoke at a demonstration at Albert Hall, London, on July 11. The League has been collecting full service details from all Powers in view of the forthcoming Conference.

DRUG TRAFFIC.

WORLD Conference for the Limitation of the Manufacture of Narcotic Drugs opened at Geneva on May 27, 1931, under presidency of M. de Brouckère (Belgium). The hope of the delegates was in the developing of an agreement by which the manufacture of narcotic drugs could be limited to the medical and scientific needs of the world. A Russian proposal was in favour of the creation of State monopolies in the manufacture and sale of drugs. A scheme that limited manufacture to determined quotas found favour, but had to be dropped owing to disagreement by Turkey and Yugoslavia and Japan's preference to an equal quota for every manufacturing country. Only Great Britain stood out against complete prohibition of heroin; a compromise was accepted that heroin should be exported only to Governments. The ultimately agreed Convention stipulated that countries should estimate the quantity required yearly for medical and scientific purposes, and not manufacture more than necessary to meet orders and maintain stocks. Any excess production one year is to be debited against next year's figures. No new product from coca leaf or opium is to be undertaken unless the Government of the country in which discovery of compound is made is satisfied that it is of medical and scientific use; further, no export business is to be done until the Health Committee of the League of Nations has expressed an opinion of its addiction properties. The Convention applies to cocaine, codeine, dionin, heroin, morphine and peronin. The operation of the agreement depends upon ratification by the countries concerned, but 28 States signed the Convention on July 13, when the Conference concluded. The British Government's Report for 1930 on the Illicit Drug Traffic stated that no large seizures had taken place at home, but abroad, especially in India, there was hardly any diminution in illicit drug traffic. The continued illicit traffic in cocaine from the Far East gave much concern.

EX-SERVICEMEN'S ORGANISATIONS.

BRITISH LEGION.

TENTH Anniversary of founding of British Legion was suitably celebrated on July 1, 1931, and following Sunday. The B.L. had been formed in 1921 by amalgamation of four existing ex-Servicemen's societies, a constitution being accepted at the Whitsuntide Conference of that year. The Royal Charter followed in 1925. The B.L. is now represented in nearly every part of Great Britain and Ireland, with 3,635 branches, and overseas with 51 branches. The Women's Section has 1,190 branches. It was announced on May 14, that as a result of the Prince of Wales's Legion Book Fund, the sum of £123,000 had become available for distribution. Of this, nine allocations amounting to £34,500 were made to various ex-Service organisations, and the balance employed in establishing a Pension Fund, the income from which would be used in augmenting official pensions or helping non-pensioners of 50 years of age and upwards. *Annual Conference* of B.L. was held at Queen's Hall, London, May 24–26. In view of 204 motions being on agenda, four committees were formed in hope of considering most of them. Resolutions included—Greater use of Remembrance Day as title in place of old Armistice Day for Nov. 11; No lessening of customary observance of that day; Poppy Day to be maintained then; one to provide a wider distribution of the Poppy Day receipts (now restricted to members who served in Great War) was defeated. Prince of Wales opened the London Group of Haig Homes at Morden, on May 29. He had made an appeal for these three years earlier. There are 123 houses for disabled men and adjacent are 68 for disabled officers, these being provided by Housing Association for Officers' Families. The *Poppy Day Collection* of 1930 amounted to £524,650 from all sources an increase of £6,160 5s. 7d. over 1929. Poppies cost 16 per

cent. of income to make, giving work through the year to 276 disabled ex-Servicemen in B.L.'s factory; other cost of collection was 5 per cent. of income.

Women's Section of B.L.—Duchess of York honoured Annual Conference at Kingsway Hall, London, April 24, with her presence. Lady E. Spencer-Churchill was Chairman. Haig Cup was won by Maidstone and Thrapston Branches. Lady Haig thanked Conference for passing a resolution calling upon First Commissioner of Works to secure new design for Haig Statue.

Officers' Association.—This is Officers' Dept. of B.L. Expenditure on relief, Feb. 1, 1920, to Sept. 30, 1930, £1,842,475. School fees were paid for 1,199 children in 1930.

King's Roll.—Officially announced in House of Commons, Feb. 26, that on Jan. 1, 1931, 25,908 employers were on the K.R., employment being given to 371,792 disabled persons. The *K.R. National Council*, at meeting of June 30, stated that 738 local authorities had agreed to give a preference to firms on King's Roll.

F.I.D.A.C.—Twelfth Annual Conference of the Federation Interalliée des Anciens Combattants met at Prague, Sept. 1931.

United Services Fund.—In year ended Sept. 30, 1930, 106,869 cases were relieved at a cost of £379,717, making a total of £5,726,062 in eleven years. Fund worked in co-operation with the B.L.

National Association for Employment of Regular Sailors, Soldiers and Airmen.—Meeting held June 8, 1931, announced 17,851 men had been placed in employment in past year, an increase of 370 over previous year.

Incorporated Soldiers' and Sailors' Help Society.—In year, 39,319 applications (increase of 2,280) received. Sales from Lord Roberts' Workshops, £126,000 (average disability of employees, 62 per cent.).

British Empire Service League.—Fifth Biennial Conference held at Toronto, Sept. 3, 1931, Lord Jellicoe presiding. Amongst resolutions passed was one urging British Government to obviate unrestricted importation of Russian goods in the interests of the Dominions.

In Hospital.—Numbers of war disabled men are still in hospital. Their interests are being watched and entertainments being organised by many voluntary bodies, of whom mention can be made of the *Not Forgotten* and *Lest We Forget* Associations.

FINANCE AND INDUSTRY.

THE Committee on Finance and Industry, appointed in November, 1929, under the chairmanship of the Rt. Hon. H. P. (now Lord) Macmillan, presented its report in June, 1931, signed by all the members except Lord Bradbury, whose memorandum of dissent was appended, together with addenda by other members. The report, which covers more than 300 pages, is in two parts, the first being historical and descriptive, the second giving the Committee's conclusions and recommendations and, in view of the diversity of the schools of thought on monetary problems represented by the members, the degree of unanimity is impressive. Owing to the wide scope of the report and the complexity of the subject it is only possible in these columns to outline briefly some of the more important findings and suggestions. The economic difficulties of the post-war decade were considered by the Committee to be due, not to any wanton misbehaviour on the part of the monetary factors themselves, but to unusually large and rapid changes on the part of non-monetary phenomena viz: (i) unusual instability in the demand for capital, (ii) war debts, (iii) the rapidity of technical changes in manufacture and agriculture, (iv) the shifting character of demand, (v) the rigidity of wage rates, (vi) the growth of tariffs, (vii) embarrassment of Budgets and (viii) violent change in speculative activity in New York and elsewhere. The recent world-wide fall in prices is therefore best described as a monetary phenomenon which has occurred as the result of the monetary system failing to solve successfully a problem of unprecedented difficulty and complexity set it by a conjunction of highly intractable non-monetary phenomena. Stress is laid upon two dangerous defects in the recent working of the international gold standard, the excessive rigidity of the reserve requirements of the Central Banks and the maldistribution of gold throughout the world. The disturbing factors, monetary and non-monetary, which prevent the satisfactory automatic working of the gold standard render it necessary that it should be "managed" and this can only be achieved by the international co-operation of the Central Banks whose main objectives should be to raise the world price level, i.e. to lower the international value of gold in terms of wholesale commodities and, after prices have been sufficiently raised, to maintain a stability of prices at the higher level. To deal with the emergency as it existed during the life of the Committee, creditor countries were urged both to buy and lend more freely and Central Banks and Treasuries to remove hindrances to the reception of foreign loans and also to permit a volume of domestic credit which would encourage the market to take full advantage of any foreign issues deemed attractive. As regards Great Britain, while the Committee were not in agreement as to whether the return to the gold standard in 1925 was right, they were unanimous in advocating continued adherence and in repudiating a devaluation of the currency, but subsequent events rendered impossible the policy advocated. The Bank of England is recommended as the authority for "managing" the currency, and some important changes are suggested to strengthen its position by means of an increase in capital and in the cash balances deposited by the joint stock banks; the maximum fiduciary issue should also be increased from the existing £260,000,000 to £400,000,000, subject to modification by law from time to time; the gold reserve should not fall below a statutory minimum of £75,000,000, except temporarily by permission of the Treasury. Closer co-operation between finance and industry is regarded by the Committee as necessary, and a further development of financial organisation is suggested by means of institutions to act as financial advisers to industrial companies and to carry out all types of financing business; the Bankers Industrial Development Company is recommended as a suitable nucleus, and for this purpose should be separated from the Bank of England, have an independent existence, and rely upon its profit-making capacity as a private institution. It must be borne in mind that the report was issued before the suspension of the gold standard in Great Britain.

FOREIGN FAIRS.

EXHIBITIONS and Fairs held abroad in 1931 included:—*Berlin*, German Building Exhibition, May 9–Aug. 2; this was in connection with

nternational Town Planning and Housing dis-lay. *Florence*, first National Fair of Arts and rafts opened March 22, included 900 exhibitors f Italian productions. *Gothenburg*, 14th Swedish ndustries Fair held May 9–17, at which 1,000 ational concerns were represented; construc-ion and furnishing of houses especially featured. *eipzig*, opened March 1, was on big German ational lines with cheapness being a character-stic. The Leipzig Autumn Fair was held Aug. 30–ept. 3. *Lyons*, International Fair, March 2–15, omprised some 6,000 exhibits, in which achinery, furnishing, building predominated. *aris*, Colonial Exhibition first planned in 1914, xed for 1919, and postponed until May–Oct. 931. British Dominions were represented, and uke and Duchess of York paid official visit uly 17–19. Netherlands Pavilion was burnt own June 27; a new one was built and pened Aug. 18. Exhibition cost approximately £3,250,000, this being raised mainly by lottery onds. *Stockholm*, International Aircraft Exhi-ition was held in May. *Vienna*, Spring Fair of larch 8–15 attracted a large number of foreign xhibitors. Preparations are in hand for the 933 Century of Progress Exposition to be held at *hicago*, but nothing is doing in the way of a big ritish Exhibition as a means for attracting oreign visitors and developing trade. A *Levant air* will be held at Tel-Aviv in April, 1932, nder patronage of High Commissioner of alestine. An *International Exhibition* will be l in Brussels in 1935—50th anniversary of gian Congo foundation and 100th of first tinental railway.

GREYHOUND RACING.

ORD BRENTFORD, as Home Secretary, stated Nov. 27, 1928, that "next year the sport be almost at an end." This prediction been entirely reversed in experience, with 00 and more people attending nightly single ks in London. On Saturdays, five or six tings operate in the Metropolitan area. st of the big cities in the Provinces have their ks. Total visitors to dog racing far exceed nbers for horse racing. Every London track have a totalisator in full operation to pete with the large number of bookmakers derive excellent incomes from betting on spot. The development of the sport can be reciated from the recent construction of ining kennels for 600 dogs at Northaw, mainly racing at Wembley. A world's record was le at Brighton on Aug. 29, 1931, by Sammy's venture of 565 yards in 32·61 secs. Mick the ler is possibly London's most popular dog—his ning stakes exceed £7,500 in three seasons. champion dog is probably Future Cutlet, ner of the Laurels Stakes worth £1,330 at mbledon on Sept. 11, 1931, when making ord time of 28·52 secs. for 500 yards.

THE IMPERIAL CONFERENCE.

t had been intended that the work of the perial Conference of 1930 should be continued a meeting of the Economic Section at Ottawa autumn, but owing to the world situation was postponed, it being announced when new Parliament opened that the meeting ld take place in 1932. Before the London herings concluded, an important statement the British Government's economic policy made to the Conference, but whether this since been modified by the change of Govern-nt or the altered conditions is not known. The statement by the British Government ruled out any question of extending existing prefer-ences. It declared that the interests of the United Kingdom precluded an economic policy which would injure its foreign trade or add to the burdens of the people; but that their fiscal policy did not preclude marketing propaganda and organisation which would secure valuable opportunities for the consumption of Dominion products in the United Kingdom. The British Government also declared that the existing preferential margins accorded to other parts of the Empire would not be reduced for three years, or pending the outcome of the Ottawa Confer-ence, subject to the right of the British Parliament to fix the Budget from year to year. No decision was reached on the questions of a quota, bulk purchase and import boards, but the British Government undertook to examine carefully the report of the Committee on a wheat quota in consultation with the Govern-ments of the wheat growing Dominions, and of India. Reports on quotas for other commodities and on import boards, bulk purchase schemes, and the organisation of channels of trade were referred to the Governments concerned for consideration. It was agreed that the Imperial Economic Committee should continue its work, and should complete the investigations into the marketing of Empire foodstuffs in the United Kingdom; and the extension of the Empire Marketing Board was recommended. It was decided to ask the B.B.C. to obtain views regarding the institution of an Empire Broad-casting Service, which the Conference considered would strengthen the ties of Empire, and tend to stimulate trade. The B.B.C. later announced that after consultations with the Dominions and Colonies concerned, they intended to proceed without delay to build an Empire Broadcasting Station at Daventry, which would give a 24 hours' service to all parts of the Empire. The policy of the ultimate establishment of a defended naval base at Singapore was maintained, the existing contract being continued, but expenditure required for completing the equip-ment of the docks and for defence works was postponed for five years, when the matter is to be reviewed. Another decision permitted the Dominions to recommend to the King advice regarding the appointment of Governors-General, and it was agreed that legislation, to be called the Statute of Westminster, should be brought forward in the Imperial Parliament to imple-ment the report of the Conference on the Operation of Dominion Legislation after the Dominion Parliaments had passed the necessary resolutions on the subject. This measure, de-signed to make clear the power of Dominion Parliaments and to promote the spirit of free co-operation among members of the British Commonwealth of Nations, was the only legisla-tion definitely indicated in the King's Speech when the New Parliament was opened.

INSURANCE.

Voluntary.

(a) Industrial.

Under the Industrial Assurance Act, 1923, "industrial assurance business" is, in the main, restricted to assurances on human life in respect of which weekly premiums are received by means of collectors; but here, under this head, is surveyed the whole field of what might be described as Voluntary Working Class Insurance.

From the table appended below it will be seen that the principal types of association which cater for the insurance of the working classes are responsible for about 92,000,000 assurances; and in view of the magnitude of this number, it is obvious that the same individual must be frequently insured in more than one institution. The most popular type of insurance undertaken is insurance against death, and the claims met on this benefit alone exceed £17,000,000 a year. Sickness benefit to the amount of £6,000,000 a year is still disbursed from the voluntary funds of Friendly Societies and Trade Unions. The total funds of the undertakings included in the table exceed £375,000,000.

In illustration of the magnitude of industrial assurances the Commissioner has pointed out that the number of assurances is one and a half times the whole population and the total sum assured is equivalent to nearly one-sixth of the National Debt.

Many friendly society officials are becoming perturbed at the increasing cost of sickness benefit, particularly in respect of members at the lower ages who have been admitted within the last few years. A number of societies have already adopted what is known as the "individual account" system to remedy matters, and others are considering its adoption. The main principle of the system is that surplus funds are allocated to members' individual accounts, and claims for benefit are met partly from the common fund and partly from the member's individual account. It is maintained that a very much lighter rate of sickness claims prevails under this system. The individual account also provides a fund which may be drawn upon at an attained age or in certain emergencies, and is thus in some respects similar to the endowment insurance undertaken by industrial assurance companies and collecting societies, which, in 1930, met claims on maturity of £6,520,000.

In trade unions the most disquieting feature of benefit expenditure is the rising cost of superannuation benefit.

As a result of Industrial Assurance Legislation, companies and societies now have to meet an increasingly heavy charge for surrender values. Since the Industrial Insurance Act of 1923, the amount has risen from £1,181,000 to £4,259,000. Surrender value payments are included as benefits in the following table:—

—	Year.	Number.	Membership.	Friendly Society Benefits.	Funds at end of Year.
			'000's	£000's	£000's
Friendly Societies .	1929	21,553	§7,585	§20,500	§104,060
Trade Unions† .	1929	472	3,779	12,333	11,561
Collecting Societies* .	1930	151	18,128	4,804	47,183
Industrial Assurance Companies*	1930	17	62,029	21,930	417,324

* Industrial Business only.
† Registered Unions of employees only.
‡ Based partially on estimated figures.
§ Not including £976,000 disbursed from union funds in unemployment benefit, and £398,000 in dispute pay.

The Post Office undertakes a small amount of life assurance business, which is not included above. The number of new assurances effected in 1929 was 52, for a total amount of £2,880; and in the same year the receipts in respect of all such contracts (i.e., premiums) amounted to only £18,030, and the claims on Death and Surrender to £27,479 in respect of 538 contracts.

Both the Post Office and the National Debt Office (in conjunction with Trustee Savings Banks) undertake Annuity business. The receipts in respect of such business were for the Post Office, 1929, £359,131; and the National Debt Office (and Banks) 1929, £307,024.

(b) Ordinary.

The Ordinary business (as distinct from "Industrial" business included above) of Life Assurance Companies may be summarised as follows:—

(i) Life Assurance Companies established in the United Kingdom (U.K. business only).
(ii) Do. (business out of the U.K.).
(iii) Do. established out of the U.K. (business in the U.K. only).

—		(i)	(ii)	(iii)
		£000's	£000's	£000's
Premiums and consideration for annuities.	1928	71,303	4,684	6,700
	1929	73,075	4,948	8,245
Claims	1928	45,170	3,143	1,935
	1929	47,071	3,400	2,191
Surrenders	1928	5,640	655	410
	1929	6,775	920	563
Annuities	1928	3,088	81	804
	1929	3,168	81	908
Cash bonuses and reduction of premiums.	1928	1,713	184	392
	1929	1,018	77	568

State Insurance.

Health.—The numbers of persons entitled to benefit in Great Britain in 1930 were: Men, 11,255,000; women, 5,757,000. The contributions of employers and workpeople amounted to £26,038,000, to which State grants added £7,354,000, and Interest, &c., on funds £5,954,000. The total of benefits disbursed was £32,919,000. Fuller details will be found in the table on p. 569.

Unemployment.—This branch of State insurance has been dealt with specially this year on pp. 568–9.

Widows' and Orphans' and Old Age Pensions Insurance.—The Widows' and Orphans' and Old Age Contributory Pensions Act, 1929, modified the provisions of the Act of 1925, and came into operation on Jan. 2, 1930. Under its provisions wives of insured men, who reached 70 before the introduction of the 65–70 old age pension in January, 1928, were given the right to the 65–70 pension. The main provision of the Act giving pensions to elderly widows did not operate until July, 1930. The following particulars relate to Great Britain.

In addition to the contributories for Health Insurance, who were also insured for pensions, 293,300 persons were insured for pensions only at

the end of 1930. The benefits disbursed in that year were: Widows, £16,428,000; Orphans, £346,000; and Old Age Pensions, £16,382,000. Fuller details will be found in the table on p. 566.

Since the Contributory Pensions Act, 1925, in all £99,688,000 has been paid in pensions during the quinquennium 1926–30, consisting of £50,740,000 (widows); £1,605,000 (orphans); and £47,343,000 (old age).

Apart from the contributory scheme £34,918,000 was disbursed by the State in non-contributory Old Age Pensions and £52,423,000 in War Pensions in 1930.

THE KING'S ECONOMIES.

THE King gave a striking lead to the country in the direction of economy shortly after the formation of the National Government, and before the revelation of its plans for reducing expenditure. In a letter to Mr. Ramsay MacDonald, the Keeper of the Privy Purse announced that in the grave financial situation with which the country was confronted, the King wished personally to participate in the movement for the reduction of national expenditure, and had decided that his Civil List should be reduced by £50,000 while the emergency lasted. When it is recalled that the full sum paid by the State as a provision for the honour and dignity of the Crown is only £470,000, of which £110,000 is applied to their Majesties' Privy Purse, the extent of this sacrifice by the King can be appreciated. In his letter to the Prime Minister, Sir Frederick Ponsonby said: "When, after the War, owing to the increasing cost of living and fall in the purchasing power of money, the Civil List settled by Parliament in 1910 was found to be quite inadequate, drastic economies were made, and therefore it is not easy to reduce the Civil List further without sacrificing some of the State functions which are traditionally associated with the Monarchy, and without throwing numbers of his Majesty's servants out of work. After careful consideration, however, the King has arrived at the conclusion that by the exercise of the most rigid economy it should be possible to reduce the Civil List by £50,000." It was also intimated that the Queen and the other members of the Royal Family in receipt of Parliamentary grants were all desirous that reductions of these grants should be made during the national crisis. The annuities granted by Parliament to the other members of the Royal Family were about £100,000. The King's lead was quickly followed. The Prince of Wales, for whom no provision was made in the Civil List, because he receives the income of the Duchy of Cornwall estates, announced his intention to contribute £10,000 to the Exchequer. When the emergency Budget was introduced, the Chancellor gave some remarkable examples of the widespread desire to help the nation. Old age pensioners had returned their pension books, war pensioners had offered to forgo their pension for the year, National War Savings Certificates had been returned cancelled, collections had been made and War Loan bonds had been sent for cancellation. Many gifts of cash were also sent to the Treasury, and for some weeks after the position was made plain the Ministry of Pensions received daily letters from all classes of war pensioners expressing their intention to resign the whole or a portion of their pensions, either for a period or in perpetuity. Another kind of sacrifice was provided by the B.B.C., which agreed to forgo out of the revenue derived from wireless licences £50,000 for 1931, and £150,000 for 1932.

LABOUR.

THE LABOUR PARTY.

FINANCE has been the problem with the Labour Party. The Annual Report issued at the Scarborough Conference, Oct. 5–8, 1931, Mr. S. Hirst, Chairman, mentioned that unless fresh means were forthcoming for raising funds for fighting bye-elections it would be essential to refrain from action in many cases. The year's income for 1930 amounted to £44,927, of which the special levy of 2*d.* a member, spread over three years as decided by the 1929 Conference, produced £9,498. There had been 475 Labour candidates endorsed for the next election. The Conference coincided with the final days of Parliament, and so proceedings took a platform aspect in view of the forthcoming clash in the constituencies. The rejection of Mr. J. McGovern as an authorised candidate, as proposed by Executive, was confirmed. A discussion on the Indian problem was avoided by 1,500,000 to 671,000. The I.L.P. delegates objected to the instruction that M.P.s should act in harmony with the standing orders of the Parliamentary Party, but the Conference supported obedience to orders by 2,117,500 to 103,000. Resolutions maintaining Socialism as the cure for human evils, cancellation of all war debts, public control of banks with a National Investment Board, vigorous trade union policy with public ownership of public utilities plus an Import Board, dealing with imports produced under bad conditions, public ownership of land, full self-government for India, restoration of economy cuts for teachers, social services and unemployed, were passed without division after discussion. The Labour Party has been associated closely with the Trade Union Congress as usual, the two bodies being jointly responsible for a manifesto on Aug. 27, 1931, against the newly-formed National Government. The Trade Unions (Amendment) Bill No. 77, that would have materially assisted the Labour Party in that it restored contracting-out for the political levy, did not become an Act, though a Government Bill. A Conference of Labour Women held at Blackpool in July, 1931, rejected a proposal for the public ownership of the liquor trade. The Pope's Encyclical, issued on May 23, 1931, contained the sentence "No one can be a good Catholic and at the same time a true Socialist." The fourth Congress of the Labour and Socialist International at Vienna, August, considered anti-war policy most important task.

COMMUNISM.

Communism makes very little progress in Britain. Mr. H. Pollitt admitted at the 11th plenum of the E.C.C.I. that the membership of the Communist Party in Great Britain was only 2,711; 53 per cent. were unemployed and 25 per cent. in the Minority Movement. In July, the Amalgamated Engineering Union expelled from its membership 13, some branch officers, who were considered to be supporting the Communist Party contrary to the rules of the Union. The Party has a newspaper mainly circulating in London known as the *Daily Worker*, but it does not appear to have a wide sale.

ENGINEERS.

In Dec., 1930, the Engineering and Allied Employers' National Federation invited the forty trade unions in the industry to discuss the whole wages question in view of grave position in trade. Negotiations went on to June 5, when an ultimatum was issued by the employers. Further meetings by trade unions led to acceptance of new terms to operate from July 6. These did not affect ordinary wages but varied piece rates, overtime, night rates and shifts. Annual Conference of *Amalgamated Engineering Union* took place at Blackpool May 28–29, Mr. W. H. Hutchinson presiding. It was decided to agitate for a 40-hour week and attempt the limitation of newcomers in industry; the Labour Government came in for criticism. Several members were expelled from A.E.U. for supporting the Minority movement. Industry is free from strikes, but a quarter of the workers are unemployed.

I.L.P.

Mr. J. Maxton, M.P., presided over 39th Annual Conference of 267 delegates from branches of the Independent Labour Party at Scarborough, April 5–7, 1931. A proposal for I.L.P. to disaffiliate from Labour Party was defeated 173 to 37, as was motion expressing dissatisfaction with lead given by executive, 157 to 109. A national planning commission to examine and plan control of country's resources was accepted, 125 to 99. A non-contributory unemployment insurance with considerable extensions received unanimous accord. Discussions took place on India, national finance and kindred subjects, but the majority of resolutions on the agenda were never reached. Mr. Maxton repudiated the Party headed by Sir O. Mosley, membership of I.L.P. being incompatible with that of Mosley Party. Between Communists and I.L.P. it was a question of tactics and not of principle. Mr. F. Brockway, M.P., was elected new Chairman, Mr. Maxton retiring after five years' service. Several M.P.'s resigned membership during year. The I.L.P. group of M.P.'s often came into antagonism with Labour Government, and, to a request for a statement on the position, the Secretary (Mr. J. Paton) of the I.L.P. wrote Mr. A. Henderson, M.P., that his council "cannot give unqualified assent to standing orders of the kind it is now sought to impose, and which are contrary to the established practice and relations of the two parties." The I.L.P. naturally went into opposition against National Government. *Scottish I.L.P.* Annual Conference was held at Glasgow, Jan. 10–11, Mr. P. J. Dollan being in the chair. A motion to disaffiliate I.L.P. from Labour Party was defeated. *Welsh I.L.P.* Annual Conference met at Treharris, Glam., July 11–12, Mr. J. L. Adkin presiding. Opinions were expressed that I.L.P. should secure more independence within Labour Party, additional taxation should be levied on incomes in excess of £500 per annum, and that following the Unemployment Royal Commission the conditions of the unemployed should not be worsened. Under the auspices of Labour Party members, a new organization was established in June under the title of the Society for Socialist Inquiry and Propaganda, Mr. E. Bevin being Chairman. Its organizers hope to work on I.L.P. lines and so secure that body's members in a more subservient auxiliary.

MINERS.

Unemployment appears stabilised in the mining industry at about one-third of workpeople available. Though under the 1926 Act, the Ministry of Labour possesses powers to issue regulations to restrict recruitment of labour for mining, these have never been used. An understanding has been in force that apart from certain eligibles, all mine labour must be obtained through Labour Exchanges. The result is newcomers are discouraged. Under the Coal Mines Act, 1930, trouble arose early in the year on the hours question and this was remedied by a new Act on July 8, 1931, for 7½-hour day in the mines. The 15th *International Labour Conference* at Geneva on June 18 decided in favour of maximum 46½-hour mining week. *Miners' Federation of Great Britain* held Annual Conference at Blackpool, July 20–24, Mr. E. Edwards succeeding Mr. T. Richards as President. Resolutions passed included—nationalisation of mines, disapproval of majority report on Unemployment Insurance, new Compensation Act for injuries, an international agreement on output and marketing of coal. Lord Mayor's Fund for relief of distressed mining areas received in donations £888,914 17*s.* 3*d.*, to which Government added an equal amount.

RAILWAYS.

National Wages Board for Railways issued on March 5, 1931, its findings following the Inquiry held in Jan.–Feb. arising out of a proposal of the companies to reduce wages. A reduction of 2½ per cent. on wages up to 40*s.* weekly and a further 2½ on remuneration above, in overtime and Sunday duty pay formed basis of award; a spread over of day's work to 12 hours was included. National Union of Railwaymen, Locomotive Engineers and Firemen, and Railway Clerks' Association held delegate meetings March 15–26 and accepted the awards. Slight trouble occurred with "go slow" methods of working at goods depots, but this form of protest against changes soon fizzled out. Annual Conference of *N.U.R.* was held at Ipswich, July 6–11, Mr. W. Dobbie, of York, as President, being re-elected for fifth year. Resolutions passed included—national organization of all transport under public ownership and control; amendment of 1927 Trades Disputes Act; approval of railway electrification; against lengthening of driving hours. Arising out of the August political crisis, Mr. J. H. Thomas resigned membership of N.U.R. and Political Secretaryship. *R.C.A.* held Annual Conference at Portsmouth, May 11–13, with Mr. T. H. Gill, M.P., as President, he being re-elected. The delegates, in spite of the wishes of the leading officials, passed a resolution calling upon their M.P.'s to ginger up the then Labour Government to do more on socialist lines. Nationalization of railways was demanded, Mr. A. G. Walkden, M.P., General Secretary, suggesting the purchase price at £6-700,000,000. The Prime Minister received a deputation from three unions on May 19, and promised to consider their appeal for nationalization. Mr. C. T. Cramp, N.U.R., gave evidence July 2 before Royal Commission on Unemployment Insurance with a view for the continuation of the "exception" in regard to permanently employed railwaymen. Mr. J. Bromley, M.P., of L.E.F.,

supported present conditions of unions being responsible for own unemployment insurance.

SHIPBUILDING.

This is the most depressed trade of all, over half of the 204,720 insured workers being registered as unemployed. The Great Yarmouth Annual Conference of the *Federation of Engineering and Shipbuilding Trades* (Mr. W. Sherwood, President) met on May 11 under depressing conditions. Resolutions were passed against further wage reductions, dispossession of jobs without compensation under rationalisation schemes, recent railway wages settlement; public control of transport services was proposed, and demand made upon Government to offer financial facilities to shipbuilding companies. Negotiations between employers and workpeople dragged on, meetings being held in April, May, June, July and August. Complete breakdown occurred on Aug. 20, employers deciding that wage reductions were essential. The first came into force on Oct. 5, and other would be affective on Jan. 1, 1932. The men were advised by leaders to continue at lower terms but under protest; a strike was out of the question in view of trade conditions.

National Shipbuilder's Security continued its buying up and closing of redundant yards, purchases having been made recently at Dalmuir, Old Kilpatrick, Ardrossan, Lowestoft, Stockton, Middlesbrough, Whitby, Sunderland, South Shield, Hebburn and Howdon. By reducing the productive possibility of yards to the probable requirements for new ships, it is hoped to concentrate on profitable work at the remaining yards.

Shipping. Chamber of Shipping in its report of Feb. 12, 1931, pointed out average freights for 1930 were 23 per cent. lower than 1929. In the world laid-up shipping amounted to 7–8,000,000 tons. The Annual Conference of the *National Union of Seamen* (Mr. W. R. Spence, General Secretary) was held in London, July 21. Wages had been maintained but subject to certain reductions in manning. The Union was hostile to the Minority Movement. The unemployment percentage for seaman has been as high as 35. Germany reported in August that 17·5 per cent. of merchantile fleet had been idle.

STRIKES.

Textile trades, owing to the January and February dispute over the increase of number of looms per worker, are responsible for the large loss of working days in 1931 compared with other industries. Coal comes second with trouble over wages and numerous small disputes over employment conditions. London electricians stopped work in March and April to extent of 3,000 to protest against withdrawal of special addition to London rates consequent upon a strike of 50 Dagenham employees for "London rates" at a border-line firm. Londoners retained their concession and the borderers brought to within 3*d.* per hour of London rates. Curtain and furniture workers were concerned in strikes over wage reductions. Generally, a spirit of give-and-take has applied and industrial conditions have remained quiet. It is realised that trade conditions necessitate reduction of costs of production, though obviously reduced wages by workpeople can never be welcomed.

TEXTILES.

Cotton has been faced with one unsettled problem—the reorganisation of the industry. Over 42 per cent. of the workpeople have been registered as unemployed at the Labour Exchanges. The question of eight instead of four looms per weaver was discussed for at least two years and brought to an issue on Jan. 19, 1931, by a lock-out. This was called off on Feb. 13 without any result having been effected. Negotiations have continued on the more looms proposal, but the operatives will not readily accept the change, apart from a few individuals who have been working eight looms. Wool textile workers and dyers have had from a quarter to a third of their people unemployed; negotiations over an approximate 10 per cent. reduction in wages extended for months. The tailoring industry has witnessed, after many ballots and long discussions, the amalgamation of three trade unions—Amal. Society, Garment Workers and Ladies' Tailors—into an organisation with 70,000 members.

TRADE UNION CONGRESS.

The 63rd Trade Union Congress was held at Bristol, Sept. 7–12, 1931, Mr. A. Hayday, M.P. (General Workers), as President. Membership of the Trade Unions affiliated was 3,719,400 (1930 actual total), being a decrease of 25,000 on 1930 Congress. Opening day was mainly occupied by presidential address and a survey by Secretary, Mr. Citrine, of the negotiations that led up to the fall of the Labour Ministry. The numerous resolutions adopted included—maximum 40-hour week, two weeks annual holiday with full pay for all workers, unremitting hostility to reduced benefits and increased contributions under unemployment insurance, enquiry into cinema employment conditions, new workmen's compensation insurance, reaffirmation of principles in Mond-Turner Report (2,818,000–160,000), planned and regulated economy in national life (2,866,000–749,000), nationalisation of mines and transport, public control of iron and steel trades (1,794,000–1,434,000), acceptance of a long report of 7½ pages from the General Council dealing with the financial situation in August. A resolution to compel by legislation employers to give written references to leaving employees was rejected. Fraternal messages were received from Canadian, Indian, French and U.S.A. trade unionists and the International Federation. The G.C.'s recom-

mendations in the Report were—cessation of deflation policy, reconstruction of basic industries, revision of debts and reparations, international co-operation for raising of level of wholesale prices, devaluation (raising Bank of England price for gold and thus lowering value of sterling in terms of other currencies), a full investigation into fiscal policy; the G.C. made no pronouncement on the question of a revenue tariff. The G.C. of the T.U.C. has been associated with the Labour Party Executive in practically joint working. A report on the working of the *Mond-Turner Conference* on Industrial Reorganisation and Relations was issued Dec. 31, 1930. After recapitulating the history from 1927, the opinion was expressed that "the fullest consultations between the representatives of organised employers and organised labour is essential to the welfare of British industry." Mr. J. Bromley (Railwaymen) was elected new T.U.C. Chairman.

TRADE UNION MEMBERSHIP.

Tables were published in the Ministry of Labour *Gazette* of Oct., 1931, for Trade Union Membership for the years up to 1930. The gradual decline in number of trade unions (due mainly to merging) and membership has continued following a big drop in 1921-2 from the inflated figures reached in 1920 from war-time effects, though in 1929 a partial recovery took place. Statistics collected by the Registrars include:—

Year.	T.U.s.	Membership in '000's. Males	Females.	Total.
1900	1,323	1,868	154	2,022
1910	1,269	2,287	278	2,565
1920	1,368	6,998	1,341	8,339
1922	1,213	4,745	871	5,616
1927	1,137	4,115	793	4,908
1928	1,123	4,001	791	4,792
1929	1,113	4,042	797	4,839
1930	1,098	4,034	791	4,825

(1930 figures are subject to revision.)

The membership of the Trade Union Congress, i.e. members of the 169 organisations that sent delegates, was:—

1933.....3,744,320. 1931.....3,719,401.

These figures are based on the membership of the previous year and not at the actual meeting date (September) of the Congress.

The Transport Services have the greatest number of trade unionists—Railways, 419,197; Water, 103,444; Road, dock and general, 759,143. Mining and Quarrying are second with 624,591. Metals and Textiles follow with 612,735 and 591,321.

THE LAND VALUE TAX.

AN important and much criticised revival of a tax on the ownership of land was introduced in the Finance Act, 1931, by the Labour Government. The scheme differs somewhat from its predecessor of 1910 in being a flat rate tax, subject to certain deductions and exemptions, on the freehold value of land, whilst the earlier scheme was a tax on the increase in value of land caused by communal growth. Broadly, the new tax involves the valuation of every piece of land in separate occupation (called a "unit") at its market value at the valuation date and with vacant possession, on the supposition that the land is devoid of everything but grass or heather (or trees and hedges in the case of agricultural land), although roads and works for its reclamation or protection from flooding must be taken into consideration: the value of any minerals, wayleaves, sporting rights, tillage and manures are to be disregarded. Agricultural land is to be dealt with somewhat differently; from the market value of the site is to be deducted the "cultivation value" of the land, i.e., the value of the land with its buildings, &c., as a farm or farmland. The resultant difference is the amount upon which the tax is to be based. A taxpayer may object to the unit or cultivation value by giving notice to the Inland Revenue Commissioners, from whose decision appeal may be made to one of a panel of referees. His decision, except on a point of law, is final. Except in the case of agricultural land, the value of any site thus ascertained is to be reduced by either (*a*) an amount equal to four times the annual value of the unit for income tax purposes, or (*b*) an amount equal to seven-eighths of the land value of the unit, whichever is the less. This reduction will also apply in the case of agricultural land where it exceeds the cultivation value of the unit. Numerous exemptions from the tax are provided for; these are land belonging to the Government, local authorities and drainage boards, the National Trust, railways and other statutory public concerns, registered friendly societies and certain charitable bodies, and land used as playing fields (as defined), public parks, burial grounds, and sites for places of public worship. The most important exemption, however, is that on units where the aggregate tax would not exceed 10s. per annum. The Act provides for a tax of one penny in the pound on the unit value thus determined, the first valuation to be as at Jan. 1, 1932. The task of valuing is entrusted to the Department of Inland Revenue, the Valuation Office being augmented by temporary staff for the purpose. The cost of the first valuation was estimated to be between £1,000,000 and £1,500,000, and involves the appointment of some 200 valuers, 600 valuation assistants, 200 draughtsmen, and 600 to 800 clerks, at salaries ranging up to £550 per annum. At the time of writing, however, recruitment of the additional staff is being heavily curtailed for a period of at least six months as an economy measure.

LITIGATION COSTS.

IN April, 1930, the London Chamber of Commerce circulated a memorandum on the high cost of modern litigation, and asked the Lord Chancellor to consider the remedies suggested; the Lord Chancellor received a deputation on the subject in November, and subsequently obtained the views of the General Council of the Bar and the Council of the Law Society on the general question. The Chamber of Commerce, while acknowledging that English procedure was the most perfect of its kind in the world, stated that it was an expensive luxury beyond the means of the majority of people, except the very poor or the very rich, and that the main cause of expense was the law of evidence, in that, apart from mutual arrangement, every document and every fact had to be formally proved by personal attendance in court of the parties and witnesses. The comments and suggestions of the Chamber of Commerce relate to litigation arising out of ordinary business relations, and exclude therefore cases of divorce, libel or slander. The principal suggestions were: (i) that all documents should be

accepted unless formally challenged and oral proof demanded, that evidence of witnesses should be in the form of signed statements attested by a credible witness and that evidence from abroad should be given by affidavit or declaration, a practice with precedents in commercial cases; (ii) that, in all cases involving technical matters, an assessor to assess damages should sit with the judge as advisor, as in Admiralty cases, and that no expert evidence should be given; (iii) that the "two-thirds rule" should be abolished, a practice under which junior counsel is entitled to a fee from three-fifths to two-thirds of his leader's fee; (iv) that proceedings before trial should be simplified; and (v) that dates should be fixed for trials. The reports of the Bar Council and the Law Society do not proceed on the same lines as each other, and do not cover the same ground as the memorandum of the Chamber of Commerce, but they are in agreement with a modification of the "two-thirds" rule, though they do not consider that in most cases it works unfairly, with the fixing of dates for trials so far as possible and with the desirability of a revision of procedure, various technical changes being recommended by which improvement in the proceedings before trial could be effected. The Bar Council disapproves of evidence being in the form of statements not on oath, and of the proposal for an assessor to sit with the judge in certain cases; to reduce the present expense of expert witnesses, they consider a limitation of their number by the Master or Judge preferable. It is manifest from the memorandum and reports that a reduction in the cost of litigation can best be secured by a revision of the rules of procedure and the law of evidence, but in addition a proposal, not dealt with in the reports, that only one appeal to a higher court should be allowed, has strong support, and would in many cases render less formidable the probable costs of contemplated litigation.

LONDON TRANSPORT.

IN 1929 Bills were promoted by the London County Council and the London Electric Railway Companies to co-ordinate passenger traffic in the London area by means of agreements between the various transport undertakings embodying the principles of common management and a common fund. The passage of these Bills was interrupted by the dissolution of Parliament in May, 1929, but they were again considered by the new House of Commons in July and, not receiving the support of the new Labour Government, were rejected; the Minister of Transport, however, promised an immediate examination of the problem. Subsequently, in March, 1931, he introduced a London Passenger Transport Bill which provided for a new Board to be set up, on the analogy of the Central Electricity Board, to be known as the London Passenger Transport Board, and composed of five members appointed by the Minister of Transport after consultation with the Treasury, and paid salaries, fees and allowances for expenses as determined by the Minister; its duties would be to secure the provision of an adequate and properly co-ordinated system of passenger transport for the London traffic area, and for this purpose it would take over the existing tube railways, the Metropolitan District Railway and the Metropolitan Railway, but not the suburban lines of the four main line groups, special arrangements being proposed in order to co-ordinate these suburban services with the Board's; in addition, the tramway undertakings in the London area, the London General Omnibus Company and other omnibus undertakings in the Metropolitan Police district would be taken over. The basis of the transfer would be, in the case of the Underground Group of undertakings and the Metropolitan Railway, an exchange of the existing stock for the Board's transport stock, and for other private undertakings payment partly in cash and partly by stock, the amounts to be agreed or, in default of agreement, determined by a specially created arbitration tribunal; in the case of the tramway undertakings the Board would assume responsibility for the service of the outstanding debt on the transferred undertaking. The area affected lies roughly within 25 miles of Charing Cross, covering approximately 1,846 square miles, and comprises, in addition to the County of London, large portions of Essex, Hertfordshire, Kent, Middlesex, Surrey and Buckinghamshire; the capital involved was estimated to exceed £130,000,000. Severe criticism was passed upon the wide powers conferred by the Bill on the Minister of Transport and upon the compulsory expropriation of municipal and private undertakings. During the Committee stage agreements as to the terms of transfer were announced as having been settled with the Underground Group, the London County Council and many of the other interests concerned; after full consideration the Joint Committee passed the Bill at the end of July with certain modifications and alterations, but no further progress was made owing to the fall of the Government in August and the inevitable absorption of its successor in urgent financial measures up to the dissolution of Parliament in October. The Bill was, however, kept alive by the procedure (said to be without precedent in the case of a public Bill) of a resolution passed by both Houses to carry it over to the next Parliament; it was stated that about £40,000 had been expended in counsel's fees and other charges, which would fall to be paid by the Treasury if the Bill were dropped, but by the new Transport Board if passed. Among the minor provisions it is interesting to note the inclusion of powers to run a service of passenger vessels on the Thames.

MUNICIPAL AERODROMES.

MANY municipal authorities have enquired, during 1930, into the possibilities and cost of erecting aerodromes to serve their town, but the difficulty of obtaining a suitable large site within easy distance of the town, the heavy expense of construction and maintenance, and the likelihood of being faced with an annual deficit for some time, have deterred many from proceeding after receiving a preliminary report and survey by aerodrome construction specialists. Interesting figures of the cost of establishing a civic air-port for the joint use of Brighton, Hove and Worthing, show the estimated capital expenditure required to be £36,666 for the land, 12 lock-up hangars, 1 main hangar, club and tea rooms, garage and parking ground, workshops, etc., while the annual cost of upkeep (including wages of ground staff) is estimated at £1,854—but no profit is anticipated for the first two or three years. With the single exception of Blackpool, civic aerodromes are at distances ranging from 3 miles in the case of Bristol to 13 miles in the case of Leeds from the principal town, but

it is hoped that future schemes will incorporate the Continental practice of establishing the aerodrome as near as possible to the centre of the town; this will, however, be a matter of great difficulty in cases where large central sites are scarce as in many northern industrial towns. The improvement of aircraft in the direction of shorter take-off runs and the development of vertical flight would solve this problem in many cases, and would certainly encourage municipal authorities who are alive to the ultimate necessity for the establishing of an aerodrome, but who are chary of incurring too great an expense to proceed with a scheme. To assist air-minded local authorities, the Public Works Facilities Act, 1930, empowered them to acquire land compulsorily for the provision of aerodromes.

THE NATIONAL ANTHEM.

AN anonymous protest against the wording and sentiment of the second verse of the National Anthem, which appeared in the *Times* in February, 1931, condemned the lines, "Confound their politics, Frustrate their knavish tricks," as "unchristian, indecent, disgraceful anywhere, in a church blasphemous, and in a cathedral a brawling obscenity." This vigorous onslaught produced many apologists for the actual words as well as suggested variants from those who felt that the spirit of the verse was in greater accord with the Old Testament than with the New. Dissatisfaction with the words of this verse is no new thing, and the suggestion of alternative verses not without precedent; of the latter, if any change were made, it was suggested by the Dean of Worcester that the most satisfactory would be the one already in use by at least one Philharmonic Society, which substitutes "Thy" and "Thee" for "his" and "him" in the second and sixth lines respectively, and becomes—

O Lord our God, arise,
Scatter *Thy* enemies,
And make them fall;
Confound their politics,
Frustrate their knavish tricks;
On *Thee* our hopes we fix;
God save us all.

In reply to a Parliamentary question as to whether the Government would consider the substitution of a new and more appropriate verse when the National Anthem was sung on special occasions for which the Government were responsible, the Chancellor of the Exchequer replied that tradition was everything in the matter, and that the Government did not propose to try to improve on it.

NATIONAL MARK.

STEADY progress has developed the National Mark on home productions. National Mark beef has been placed on sale at Leeds, Bradford and Halifax, as well as in Birmingham and London. There have been attempts by butchers to evade the scheme by displaying private marks on beef or refusing to sell the certified quality of the National Mark. But the public has realised what the National Mark implies, and is extending its insistence on the official marking. The National Mark has been extended to canned fruit and vegetables, fresh apples, cherries, cucumbers, strawberries and tomatoes, table poultry, cider and malt products. Shops to display National Mark goods have been opened by the Empire Marketing Board and Ministry of Agriculture. A special poster publicity campaign for National Mark goods was held Sept. 30–Oct. 21. The British Steelwork Association adopted on March 3, 1931, a mark for all British steel so that it could be distinguished from the imported variety, some of which often bore the misleading letters of B.S.

NATIONAL PARKS.

IN September, 1929, the Prime Minister announced the appointment of a Government Committee with the following terms of reference:—"To consider and report if it is desirable and feasible to establish one or more National Parks in Great Britain with a view to the preservation of the natural characteristics, including flora and fauna, and the improvement of recreational facilities for the people, and to advise generally, and in particular, as to the areas, if any, that are most suitable for the purpose." The Report of this Committee has now been published as a Blue Book. The Committee points out that the American model of National Park or National Reserve cannot be followed in this country owing to the density of the population and the developed nature of the greater part of the land, while, at the same time, these factors render more urgent adequate measures for the preservation of the countryside. The objects which the Committee desire to achieve by systematic schemes of National Reserves and Nature Sanctuaries are: (1) to ensure the preservation of large areas of exceptional natural interest against spoliation and disorderly development: (2) to improve recreational facilities and to afford to the community means of access to the countryside and areas of exceptional natural beauty; (3) to promote protection and preservation of flora and fauna. The Committee consider that these objects could be secured by a planning scheme for the regulation of the public development of areas to be selected and that the present powers of the Regional Committees under the Town Planning Acts should be extended. It is considered premature to select suitable areas, but a National Authority should be set up for this purpose and to give technical advice and assistance to the Regional Committees. The Committee distinguish between National Reserves such as, possibly, the Lake District, Snowdonia, a coastal area in Cornwall or Pembroke, a section of the Broads or South Downs, Dovedale, a section of the Wye Valley and of the Scottish Border and Regional Reserves such as the High Peak of Derbyshire and Forest of Bowland, Cannock Chase and areas in Outer London. In the case of the former, preservation is a primary consideration, but in the latter, while this is important, access is a fundamental consideration. If it is desired to make a National Park on American lines the Committee suggest that the Caingorm area would be most suitable, while the Clenmore area, already possessed by the Forestry Commission, might be utilised for recreation and as a base for pedestrians without the need for a more extensive scheme. The extended powers of the Regional Committees suggested are largely incorporated in the Town and Country Planning Bill which has unfortunately now been shelved owing to the financial situation.

NATIONAL TRUST.

ACQUISITIONS by the National Trust during the year ended June 30, 1931, were—Alport Height, Derbyshire; land near Avonmouth, Bristol; Figbury Rings, near Salisbury; Frankley Beeches, near Birmingham; Haresfield Beacon and Standish Park Woods, Glos; Lady's Well, Hempstead, Glos; Longshaw Moor, near Sheffield; Nare Head, Cornwall; Pendarves Point, Cornwall; Plaitford Common, New Forest; Town Walls Tower, Shrewsbury; additions to previous holdings at Bolt Tail, Devon; more land at Burton Wood and Hawksmoor. In August, 1931, it was announced that 15 acres near Ventnor, I.O.W., were being presented to the nation in memory of Nansen. Gifts made now to the National Trust are not subject to Death Duties. An offer of the remains of Odiham Castle, Hants, was declined by the National Trust in view of the repair and maintenance costs involved. In October the National Trust made an appeal for funds to preserve Whitehall, a 16th century house in Shrewsbury, built by Prynce in 1581. Assembly Rooms, Bath, were acquired by S.P.A.B. for N.T. in Oct., 1931.

In September, 1929, a Committee was appointed by Government to enquire into the question of establishing *National Parks*. The Report issued on Aug. 1, 1931, stated that it would be impossible to copy methods adopted in other countries owing to the English density of population and lack of available area. A system of National Reserves and Nature Sanctuaries was suggested. Cairngorm area was put forward as a site of a National Park on U.S.A. lines in Scotland. As schemes set forth, including compulsory acquirement of common land under conditions, would entail much expenditure, it can be taken for granted that for the present the Committee enquired in vain.

Other work in preserving ancient sites. Obtaining open spaces for the public, is being done by the Society for the Protection of Ancient Buildings, working through its own £5,000 limited liability company, of which Lord Esher is chairman; Oxford and Cambridge Preservation Trusts; Royal Society of Arts, owners of West Wycombe; Commons, Open Spaces and Footpaths Preservation Society; local authorities in the parks under their control.

OVER-PRODUCTION.

ALUMINIUM.

ALUMINIUM has been maintained in Britain for a long time at a standard price of £85 per ton owing to the International Cartel formed by Austria, Britain, France, Germany, Norway and Switzerland. The Cartel was due to expire at the end of 1931. Germany was responsible for 30,900, France 29,000, Switzerland 22,400, Norway 20,500, Great Britain 19,400 tons yearly output. North America has been extending output until it has reached that of the rest of the world. Only two producers control America, the Aluminium Company in the U.S.A., and Aluminium, Limited, elsewhere. Unless the Cartel is renewed and extended, there is a prospect of a general increase in output that will result in over-production and price-cutting.

COTTON.

Official estimate from Washington Board of Agriculture issued Sept. 8, 1931. was for a crop of 15,685,000 bales, compared with 13,932,000 bales of 1930. At that moment the Federal Farm Board had in hand through its Cotton Stabilising Corporation 1,300,000 bales purchased in previous year with object of maintaining price levels. The surplus so worried the authorities that suggestions were welcomed, and it is said 300 different schemes were submitted. On Aug. 28, the House of Representatives in Louisiana passed a Bill to forbid planting in that State during 1932, contingent upon action by other States. The Federal Farm Board has decided not to add to its stocks. The U.S.A. have been in touch with Egypt, expressing willingness to discuss the disposal of surplus supplies of both countries, but not the limitation of cultivation. Egypt's contribution was a decision on Sept. 20 to reduce 1932 acreage by 25 and 30 per cent. according to variety on the assumption that American acreage would be reduced. On Sept. 8 the Egyptian Government reduced the cotton tax on producers 50 per cent. to 2*s.* per kantar.

METALS.

Lack of demand for industry has led to the curtailment of production in the metal trades. Belgium, France, Germany and Luxemburg were all showing considerably less business than permitted them in the first half-year of 1931 under the quotas of the International Raw Steel Cartel. Germany had produced 1,166,814 tons less than permitted of her quota of 6,581,933 tons. U.S.A. iron and steel trades in September, 1931, were showing a reduced output of 50 per cent. on a year previous.

In April, 1931, the lead producers of the world agreed to make a reduction of 15 per cent. on *their outputs of 1930 in order to avoid a store of* unsold metal at end of year. The price of lead had fallen per ton from £36 5*s.* in 1925 to £12 at the time of agreement for further reduced output. Spelter had fallen 66 per cent. in price in same period. Canadian figures for lead production of first six months of 1930 and 1931 were 172,204,000 and 146,419,000 lbs. respectively.

NITRATES.

On March 20, 1931, the Compania de Salitre de Chile was constituted under local laws. Thirty-six nitrate-producing companies in Chile became part of the combine known as Cosach, the Chilean Government being owners of half of the authorised capital stock, 3,000,000,000 gold pesos. An international loan issue of $50,450,500 was begun in March through bankers in U.S.A.; an issue of £2,000,000 was made in London. An international meeting held in July at Lucerne broke down without an agreement, the Chileans withdrawing because of the introduction by Germany of a tariff wall against Chilean nitrates. Secret meetings were reported to have been held by European producers, but a world agreement was not in view in the following months. By this time Belgium, France, Germany, Poland and Czechoslovakia had instituted official import restrictions, practically banning the imports of nitrates. The world seems to have a surplus of nitrogenous fertilisers, but the state of much farm land suggests a want of manures.

RUBBER.

Over-planting in 1925-6 has had its result in making rubber a surplus commodity, that it is almost unsaleable at prices to cover cost of production. In 1930 the shipments from rubber-producing companies amounted to 815,000 tons, of which 96 per cent. came from British and

Dutch territories. The companies desire some plan of restriction, a popular one being a tax on exports to be used in destroying the surplus. The Dutch Government's position is that it would be contrary to their policy to place any compulsion on the native population. The British Government could hardly adopt restrictive powers alone—Lord Passfield stated, when Colonial Secretary, that the Government could not initiate but it would consider any agreed scheme by producers in all countries concerned. A Government Commission began an enquiry on Sept. 8, 1931, into the taxation of rubber companies in the Malay States. Whilst rubber remains at about 3*d.* a pound (Oct., 1931), dividends by rubber companies are almost out of the question, and about £125,000,000 British capital is locked up unremuneratively abroad.

TIN.

In March, 1931, the Governments of Bolivia, Dutch East Indies, Malaya and Nigeria agreed to an international restriction scheme of production, the quota for each country being based on the 1929 output figures. Dutch East Indies had a cut of 16·4 per cent., Federated Malay States 22·4, and Nigeria 25·5 (10,412 tons of 1929 giving a quota of 7,750). Complaints were made subsequently that Nigeria appeared to be unduly penalised. On Aug. 24, 1931, an International Tin Pool was formed with concurrence of the four mentioned Governments. The Pool is to acquire tin for release at prices on a sliding scale sanctioned by those Governments. The first release will take place of 5 per cent. of the holding when spot price of tin on the London market exceeds £150 a ton. At that time, tin was quoted in London at £116 per ton.

WHEAT.

Statisticians agree that the world output of wheat for 1931–2 will show a drop of 25–30,000,000 quarters compared with previous season. Climatic conditions rather than local contraction of cultivation are responsible. In U.S.A. the production is expected to reach 869,000,000 bushels at a time when a surplus, accumulated over five years, has reached 500,000,000 bushels. A world estimate of the surplus left over from 1930–31 was issued officially from Washington as 679,000,000 bushels. The problem of the disposal of the surplus has been worrying exporting countries. A World Wheat Conference in Rome, April, 1931, favoured extension of wheat in those countries where it was not largely consumed, disposing, if necessary, of surplus stocks at low prices. Wheat-exporting countries held a conference in London in May, but no remedial measure found acceptance. It was agreed that acreage could be reduced, other channels of use for wheat discovered, and an international system of orderly marketing established. An International Wheat Information Service was recommended for support officially by Governments concerned. The International Institute of Agriculture that met in Rome in August favoured an international short-credit bank for farmers with the national banks as shareholders. The European Union Commission at Geneva in September had in mind a preferential treatment of E. and S.E. Europe in the disposal of harvest surpluses. The Federal Farm Board of U.S.A., officially authorised to buy local produce for purpose of stabilising prices, made three big deals in surplus wheat. In Aug., 2,500,000 bushels of wheat were exchanged for 1,050,000 bags of Brazilian coffee; Sept., 450,000 tons of wheat and flour sold to China for exclusive use in flooded areas; Sept., 7,500,000 bushels of 1930 crop sold to Germany (Getreide Handelsgesellschaft). British farmers have suffered owing to foreign wheats being imported at low prices, but the consuming public has not gained to any extent in reduced prices of bread.

PILGRIM TRUST.

WORK began on Oct. 1, 1930, of the Pilgrim Trust, the body presided over by Mr. S. Baldwin, in the distribution of the sum of £2,000,000 presented by Mr. Edward Stephen Harkness, the rich U.S.A. philanthropist. The donor was entertained by the Pilgrims to lunch in London on June 24, 1931, and publicly thanked. Amongst the subscriptions made by the Trust during 1931 were—£25,000 to preserve amenities of Oxford and Cambridge, saving of Durham Castle (these were especially mentioned by the Archbishop of Canterbury at the lunch), £3,000 Cardiff Cathedral, £25,000 Foundling Site appeal, £500 National Birthday Fund (anæsthetics in maternity cases), £410 Gloucester Cathedral glass. The office of the Trust is 10 York Buildings, London, W.C.

THE POPE'S VIEWS ON MARRIAGE.

COMPANIONATE marriages and divorce, birth control and sterilisation, were roundly condemned by the Pope in an Encyclical upon Christian Marriage issued from the Vatican during the year. Showing a surprisingly wide knowledge of the social questions of the day, the Encyclical claimed that Christian marriage was a Divine ordinance and consequently indissoluble. The "inviolable stability" of marriage, the Pope said, was menaced "not secretly nor under cover, but openly with all sense of shame put aside, now by word and again by writings, by theatrical productions of every kind, by romantic fiction, by amorous and frivolous novels, by cinematographs portraying vivid scenes, by addresses broadcast by radio-telephone, in short, by all the inventions of modern times the sanctity of marriage was trampled upon and derided; divorce, adultery, and the basest vices are extolled or depicted in such colours as to be free from all reproach and infamy. The doctrines defended are offered for sale as the productions of a genius which is thought to have emancipated itself from all the old-fashioned and immature opinions of the ancients; and to the number of those antiquated opinions is relegated the traditional doctrine of Christian marriage." Another passage read: "Any use whatsoever of matrimony exercised in such way that the act is deliberately frustrated in its natural power to generate life is an offence against the law of God and nature, and those who indulge in such are branded with the guilt of a grave sin." "Conjugal honour," the Encyclical declared, consisted in "a deep attachment of the heart" and a perfect partnership in domestic life. "Conjugal fidelity requires the sacred loyalty of one party to the other, bound by true love. The wife should be subject to the husband, but this subjection does not deny the liberty which belongs fully to the woman in view of her dignity as a human being and her noble office as wife, mother, and companion. Nor does it bid her to obey her husband's every request when such a request is not in keeping with reason. Marriage

requires, on the part of the wife, her noble obedience." The Pope described "experimental," "temporary," and "companionate" forms of matrimony as "*hateful abominations which* beyond all question reduce our truly cultured nations to the barbarous standards of savage people." The burden of children, His Holiness went on, "leads some people to frustrate the marriage act. Such action is shameful and intrinsically vicious. While the Church sympathizes with those people, who, in extreme want, experience the greatest difficulty in rearing their children, care must be taken lest a more calamitious error should befall them." Similarly the Pope condemned the proposed sterilization of the unfit. "Those who act in this way," he declared, "are at fault in losing sight of the fact that the family is more sacred than the State and that men are begotten not for the earth and time, but for heaven and eternity."

R101 DISASTER.

THE Court of Inquiry into the loss of the R101 came to the conclusion that the disaster was caused by a sudden leakage of gas from one or more bags in the fore part of the airship associated with a heavy down-current of air. In their report, Sir *John Simon and his two* assessors pointed out that the precise details of the nature of the accident could never be ascertained as there were no survivors among those who where in the control car at the time. They considered that the airship first dropped her nose and descended at a steep angle but was brought back to an approximately horizontal position. Then, in spite of all efforts, she failed to get her nose appreciably up but continued horizontal until she dived again and struck the ground almost at once at an angle of at least fifteen degrees. "Although the vessel had lost much height during the first phase, if she had been in a normal condition there seems no reason why she should not have pointed her nose up again and regained altitude. From the fact that she failed to do so, it may be argued most conclusively that she was by then crippled beyond recovery, and the inference is that though momentarily on an even keel she was descending rapidly to earth." Reconstructing the position, they thought it possible that if the vessel, having become somewhat heavy, had been raised by a buffet of wind, the elevator would be put down by the coxswain, who had *just come on* duty, to check and counteract the movement. The coxswain might put his elevator rather more down than was necessary, or keep it down longer than was exactly right. The vessel's nose would drop. If, when her nose was inclined downwards she received a strong buffet of wind above her nose it would push her nose further down. If she were already heavy from loss of gas—especially if a rent had occurred in a gas-bag which involved progressively rapid inflation—the descent was emphasised. The coxswain would put his elevator up, but she did not come out of her dive as rapidly as she should because she was losing more gas all the time. "How the vessel began to lose gas can never be definitely ascertained. The weather was exceptionally bad; the gasbags were hard up against padded projections, some of which may have begun to wear the fabric; the bumpiness of the wind and the pitching of the ship would intensify the strain; and earlier flights had indicated the possibility of leakage through chafing, or, if the vessel rolled through an unusually large angle, through intermittent opening of the gas valves. *It seems very probable* that the *more serious* and sudden loss of gas which followed was connected with a specific misfortune such as the ripping of the forepart of the envelope. The explanation that the disaster was caused by a substantial loss of gas in very bumpy weather holds the field." The Court rejected any idea that the vessel broke up in the air from internal weakness, and entirely rejected any suggestion of inefficiency on the part of officers and crew. No blame was put upon those responsible for the decision to make the flight at that time, but the Court could not avoid the conclusion that the R101 would not have started when she did if it had not been that reasons of public policy were considered as making it highly desirable for her to do so if she could.

RENT RESTRICTION.

IN October, 1930, the Minister of Health and the Secretary of State for Scotland appointed an inter-Departmental Committee under the chairmanship of Lord Marley "to enquire into and report upon the present workings of the *Rent Restriction Acts* (excluding the special provisions relating to agricultural cottages) and whether any modifications or amendments should be made to them." A separate Committee, under the Chairmanship of Mr. Walter R. Smith, M.P., was appointed to consider and report upon the conditions of agricultural cottages. The Report of the Principal Committee was published in July, 1931. It is estimated that the total number of houses in England and Wales is now about nine millions, of which about one and a half millions have been erected since the war. Of the seven and a half million pre-war built houses about six and a quarter millions are still subject to control. Of the one and a half million new houses, about six hundred thousand have been built by local authorities and may be regarded as available for letting. These form practically the only supply of new houses to meet the demand of the poorer paid working classes, and there still exists a considerable shortage of houses for this class. As regards houses for the middle class or better paid artisan class, private enterprise has largely met this demand by the provision of houses principally for sale, and here the building societies have rendered invaluable assistance. The Committee divide controlled houses into three classes. In the case of Class A, i.e., houses with a rateable value of £45 or over in the Metropolitan Police district, £35 or over elsewhere in England and Wales and £45 or over in Scotland, it is recommended that control shall be discontinued forthwith. More than one-third of the houses of this class have already been decontrolled under the 1923 Act, owing to the greater mobility of the population, and there have been provided over 350,000 houses of this class, so that in fact it is a minority only of this class which is subject at present to control. Class B is defined as houses with a rateable value of less than £45 but over £20 in a Metropolitan Police district, less than £35 but over £13 elsewhere in England and Wales, and less than £45 but over £26 5s. in Scotland. Here it is recommended that control shall be continued in its present form. A large number of houses erected by private enterprise

belong to this class, as do a large proportion of houses built by local authorities. It is considered that the gradual decontrol by possession under the 1923 Act is less objectional than any method of gradual decontrol. Class C includes all houses the rateable value of which does not exceed £20 in the Metropolitan Police district, £13 elsewhere in England and Wales, and £25 5s. in Scotland. It is recommended that here control shall be continued and also that Class C houses shall cease to be subject to the decontrolling provisions of the 1923 Act. The effect of the 1923 Act is to immobilise working class tenants. The decontrolled rentals of such houses average 85 to 90 per cent. above the pre-war level as compared with 50 per cent. in the case of controlled houses. Only about one-eighth of Class C houses have become decontrolled, and the 1923 Act has not succeeded in encouraging private enterprise to erect houses of this type. It is not proposed that control shall be re-instated when Class C houses have already become decontrolled, owing to the many difficulties which such a course would involve. Further recommendations propose that all public houses should be decontrolled, and in the case of mortgages that control should continue so long as the mortgaged house is controlled, and that in the case of Class A houses control should continue for a period of six months after the decontrol of houses of this class. In regard to sub-letting, the tenant should be required to notify the landlord when he proposes to sub-let, and that in certain cases there should be a penalty for extortionate charges to sub-tenants, which should also be grounds for an application by the landlord for possession. Unfortunately, it is unlikely that Parliament will be able to give statutory effect to the recommendations of the Committee during the present year, although these would appear to meet with general approval.

Year.	Number Employed.	Number of Cases. Fatal.	Non-Fatal.	Total.	Compensation Paid.	Fatal Accidents per 10,000 Employed.	Disablements per 10,000 Employed.	Compensation Paid in Shillings per Employee.
					£

SAFETY FIRST.

THE increasing number of accidents, particularly street accidents, during the last few years has aroused considerable public concern. A number of voluntary organisations have been commenced at various times to endeavour to effect some improvement and, in 1924, the National "Safety First" Association was founded. This Association has as patron H.R.H. The Duke of York and is under the Presidency of Viscount Brentford. It comprises the British Industrial "Safety First" Association, the London and other "Safety First" Councils. It is supported entirely by voluntary subscriptions and is assisted to a considerable extent by voluntary unpaid workers. The "Safety First" movement is concerned with industrial safety as well as with safety on the highway and in the home. On the industrial side the following table, prepared from the Compensation Returns of the Home Office, shows the seriousness of the present position :—

It will be observed that the years 1927, 1928 and 1929, show a progressive increase in the number of both fatal and non-fatal accidents, and a corresponding increase in the compensation paid per employee. The Safety First Association endeavours by propaganda, a Freedom From Accidents competition, a Safety Engineer Service and by other means to educate the workers and employers and to effect a reduction. Other valuable work in the same direction is carried on by the Industrial Welfare Society, the Institute of Industrial Psychology, &c. On the side of public safety, street accidents are, of course, responsible for the great majority of accidents. The following table shows the increase in the numbers of drivers and vehicles during the last 10 years :—

Year.	No. of Motor Driving Licences.	Increase over Previous Year.	No. of Motor Vehicles (Excluding Trams).	Increase over Previous Year.
1921	1,106,000	—	860,082	—
1922	1,210,700	104,700	962,115	102,033
1923	1,416,400	205,700	1,127,590	165,475
1924	1,644,400	228,000	1,312,357	184,767
1925	1,923,900	279,500	1,523,210	210,844
1926	2,132,900	209,000	1,704,213	181,012
1927	2,349,000	216,100	1,874,681	170,468
1928	2,527,000	178,000	2,012,904	138,223
1929	2,687,000	160,000	2,149,228	136,324
1930	2,810,000	123,000	2,237,474	88,246

Up to 1925 the yearly rate of increase was progressive, but since then the rate has gradually declined, and 1930 shows a considerable drop. The following table, prepared by the National Safety First Association from the Home Office

and Ministry of Transport figures, shows the position for the last 10 years :—

Year.	Number of Accidents in which Mechanically Propelled Vehicles (excluding Trams) were involved.			No. of Fatalities per 1,000 Vehicles.	No. of Accidents per 1,000 Vehicles.	Vehicles per Accident.	No. of Accidents per 1,000 Motor Drivers Licensed.
	Fatal.	Non-Fatal	Total.				
1921	2,091	36,609	38,700	2·43	44·9	22	35
1922	2,222	43,058	44,280	2·31	46·0	22	37
1923	2,435	53,084	55,519	2·16	49·2	20	39
1924	3,019	64,318	67,337	2·30	51·3	19	41
1925	3,401	79,377	82,778	2·23	54·3	18	43
1926	4,155	86,890	91,045	2·44	53·4	18	43
1927	4,480	95,170	99,650	2·39	53·2	19	42
1928	5,223	106,753	111,976	2·59	55·5	18	44
1929	5,722	111,136	116,858	2·66	54·4	18	43
1930	6,222	114,927	121,150	2·78	54·1	18	43

While each year since 1921 has shown an increase in the number of accidents, the increase for 1930 over 1929 is less than in any of the previous years shown. Moreover, the relationship between the number of accidents and the number of vehicles and drivers licensed, has remained steady ever since the Association's campaign was started in 1926, whereas previously it had been getting worse each year. The fatality ratio, however, is still rising, and this is probably accounted for by the increase in the average speed and weight of vehicles. The total number of all street accidents in 1930 was 156,793, resulting in deaths to 7,305 persons, and injury to 177,895, a total of 185,200 killed or injured Compared with 1929 this represents an increase of nearly three and a half per cent. in the number of accidents, and four and a half per cent. in the number of killed or injured. These rates are practically the same as those a year ago, and considerably less than the corresponding rates in all other rates since the war. The National Safety First Association carry out an extensive propaganda to avoid road accidents. The Road Fellowship League set up by the Association, does a good deal of useful work to educate drivers of vehicles. An important branch of the work of the Association is the Safety First Institute for Children. The National Safety First work was first started in 1930 and has been very successful. A considerable drop in the number of accidents, both industrial and street accidents, took place during each Safety Week held, and there is no doubt also that the holding of Safety Weeks has a permanent educational value.

SAVINGS CERTIFICATES.

THE popularity of the National Savings Certificate is well maintained. During the twelve months ended August 31st, 1931 (the most recent date for which information was available before this Almanack went to press), the average weekly sales of Certificates was over a million and a quarter. Certificates were originally put on sale in 1916 and by the date given above the total number of Certificates sold was 1,048,574,774, representing a cash investment of £824,469,569, while the amount remaining to the credit of investors (accrued interest included) was approximately £499,000,000.

In January, 1931, the National Savings Movement celebrated the issue of 1,000,000,000 Certificates and His Majesty the King was graciously pleased to accept the special Thousand Millionth Certificate produced in honour of the event.

An outstanding feature in the development of the Savings Movement during 1931 was the successful implementing of an agreement for co-operation between the Movement and the Trustee Savings Banks. Co-operation with the Post Office Savings Bank having been brought about earlier, the position now is that the three great State-controlled systems of popular investment are working together for their common purpose. An important step with regard to Savings Certificates of the First Issue was taken during the year. Powers were given by the Finance Act of 1931 to prolong the currency of any First Issue Certificates to a date not later than March 31st, 1940.

Three different Issues of National Savings Certificates have been made :—

First Issue Certificates (cost price 15*s.* 6*d.* and ten-year maturity value 20*s.*) issued from Feb., 1916, to March 31, 1922.

Second Issue Certificates (cost price 16*s.* and ten-year maturity value 20*s.*), on sale from April 1, 1922, to Sept. 30, 1923.

Third Issue Certificates (cost price 16*s.* and ten-year maturity value 24*s.*) on sale from Oct. 1, 1923.

Holders of First Issue Certificates, instead of encashing the Certificates at the end of ten years, can adopt any of the following courses :—

1. Retain Certificates until March 31, 1932, with interest after the tenth year at one penny per month per Certificate.
2. Exchange them for Third Issue.
3. Transfer into 4 % National Savings Bonds.
4. Transfer into 4½% Conversion Loan (1940-44).

Powers have been given by the Finance Act of 1931 to prolong the currency of any First Issue Certificates to a date not later than March 31 1940.

Statistics.

Year.	Subscribed.	Repaid (excluding Interest.)	Remaining (excluding Interest.)
1915-6 1916-7	£75,607,798	£1,120,731	£74,487,067

SHOPPING CURIOSITIES.

THE first "Automatic Restaurant" was opened in England by Presto, Ltd., in the Strand, London, on May 4, 1931. Thirty machines were installed to cater for 2-300 customers. The shop is open for full 24 hours, customers being in a position to serve themselves when and how they please. Maximum price for a dish is 6*d*. The Austrian Ambassador was an early patron.

National Flying Services, Ltd., opened in Northumberland Avenue, London, in May, 1931, an "Aviation Shop" in which everything associated with flying, from goggles to an aeroplane, could be purchased. Interior of shop was designed like an air liner cabin, with an aeroplane wing for counter. It acted also as a booking-office for air trips. The fundamental idea is to increase public interest in aviation.

British Waltham Watch Company introduced first Public Time Ball signal in London at their Holborn premises on May 5. This was worked by signal from Greenwich, whereby at 1 p.m. a gilded ball would fall down a steel shaft, a 1,000-candle-power lamp lighted and a gong sounded.

In June, controversy arose over the time taken in making a suit following upon a reminder that in 1898 an American record was set up of 6 hrs. 4 min. from sheep's back to completion. On June 23, 1931, Yorkshire firms started clipping of sheep at 8.50 a.m.; wool was carded, spun, warped, dyed, wove, shrunk, pressed, sent to tailors, cut, stitched, with the final button taking its place at 12.27 p.m. The suit was to the measure of Mr. J. H. Thomas, M.P. On the following day Huddersfield, working with Leeds, set up a record of a finished suit from the time of beginning shearing of 2 hrs. 9 min. 45 sec. A suit made under such conditions was said to cost £100.

SUBSIDY FOR OPERA.

A season of grand opera assisted by a State subsidy took place at the Royal Opera House during the autumn as a preliminary to performances in the country. The scheme, when announced by the Chancellor of the Exchequer some time before the financial crisis, aroused considerable interest and some criticism, and the latter was increased when it was later intimated that despite the necessity for severe retrenchment no alteration was to be made in the arrangement. To assist in the performances of operas, both at Covent Garden and in provincial centres, the Treasury agreed to provide £5,000 at the beginning of 1931, and £17,500 a year for five years from April 1, 1931, as additions to the income of the British Broadcasting Corporation, who would hand the sums over to the Opera Syndicate in return for the right to broadcast performances. The Corporation thus became the agents for this expenditure, and a revised agreement with the Postmaster-General sanctioning this new activity was agreed to by Parliament. It was estimated that for the purposes of this presentation of grand opera a sum of £30,000 a year would be required for five years. In addition to the State grant of £17,500 a year, the B.B.C. were to grant £7,500 a year, and it was hoped to obtain the remaining £5,000 a year from private subscriptions. The first performances at the Royal Opera House were generally on the lines of those given in former years, and they were then repeated at popular prices, the company afterwards giving performances at popular prices in the provinces. The main purpose of the scheme was to encourage and stimulate British opera production, and it was unfortunate that the first performances should coincide with a time of crisis and depression.

SUMMER TIME ABROAD.

THE principle of altering the clock in order to begin the day of business and general life earlier in the solar day was conceived by Mr. William Willett of Chislehurst, the head of a well-known building business, about the year 1907, and was brought before Parliament in 1908 by Mr. Robert Pearce, Member of the House of Commons for Leek, Staffordshire, who introduced a Bill known as the Daylight Saving Bill which proposed that the clock should be put forward by twenty minutes in the mornings of four Sundays in April, so that during the Summer months clocks would be eighty minutes in advance of Greenwich Mean Time. This Bill passed second reading, but evidently there was much doubt whether it could be carried into effect. The Bill was amended in Committee by the proposition that the change should be made by putting the clock forward one hour on the third Sunday in April and one hour back on the third Sunday in September, and in this form it was re-introduced in Parliament in 1909. The matter, however, was shelved until 1916 when it was brought forward as a measure made advisable by circumstances of the war, *and a Bill became law in that year which*, with some modification, has remained in force *in Great Britain since*. It was brought into use for the first time on Sunday, May 21. Its purpose has been carried out with little difficulty and with little open objection by the majority of the people, though there are some to whom the change of time reckoning twice a year is repugnant, and a plea for its abolition on behalf of the agricultural industry and because of the supposed injurious effects on children sometimes finds its way into the public press. The scheme was approved in the same year, 1916, by the governments of Austria, Denmark, France, Germany, The Netherlands, Italy, Norway, Sweden, and Portugal, and brought into use in all of these countries, but has since been largely abandoned. From the following brief notes, which are not to be taken as complete, the state of affairs in this respect in most parts of the world may be inferred.

In FRANCE the system was adopted for the first time on June 15, 1916, and in each year since a period between certain dates has been set apart for its operation. The Law of May 24, 1923, prescribing the last Saturday in March at 23*h*. and the first Saturday in October, with power to vary, as the limits of the period, is in force in France and Algeria, and it is believed that though there is some small objection in agricultural centres there is no active movement against it. The same applies to Belgium. In recent years the system has been in use in FRANCE and BELGIUM during the same period in each year as it has been in England, but a note in the *Railway Gazette* states that the Governments of these countries have decided that, beginning in the year 1932, the Summer Time period shall begin on the last Saturday in March, or, if that is Easter-time as it is this year, a week later, which will nullify

nvenience to Continental travel and to nternational relationships that the lately ing uniformity has brought about.

ne NETHERLANDS conditions somewhat to those in France prevail. Summer was adopted in this country on May 3, efore it was in England, and remained in use until 1922, being continued after the war as a voluntary measure, but was then discontinued until 1925, when, because of the much-increased tourist traffic, Summer Time was imposed generally by legal enactment, but because of its disadvantages to the agricultural and industrial classes, the law was modified in 1928, and made compulsory only in regard to the traffic services, the period being from May to October.

In GERMANY and AUSTRIA Summer Time was brought into use on the night of April 30–May 1, 1916, and was continued until the end of the war; but the law was not renewed in Germany in 1919, nor has it been since, as there seems to be no general feeling in favour of the system, though a society exists with the object of reviving Summer Time. It has also been given up in AUSTRIA. In DENMARK Summer Time was in use from May 15 to September 30, 1916, but was found to be so unpopular with the farming community that the question of reviving it has not been considered. CZECHOSLOVAKIA is said to have given Summer Time a good trial, but has discontinued it, finding it not economic. NORWAY, where the system was first used at the same date as in England, May 21, 1916, and ITALY, who followed a week later, May 27, 1916, have since discontinued it. Summer Time is also not used in SWEDEN. In SPAIN, though it had been tried and found disadvantageous to the workers, and irksome generally to the inhabitants of towns and cities, it was decided to re-introduce the system in 1931 for the same period as in Great Britain, but this decision was reversed by the new Republican Provisional Government, and Summer Time did not operate in Spain or Portugal last year. According to a newspaper announcement, SOVIET RUSSIA decided to adopt Summer Time on July 18, 1930, but further details are not known.

Western Hemisphere. In CANADA there is no general regulation as to Daylight Saving, as the scheme is always called there and in the United States. When a Bill to introduce it was brought before the House of Commons at Ottawa in 1918, there was considerable opposition by the Canadian people, who, however, supported the innovation in the following year, and the result appears to be a species of local option. In ONTARIO, and probably in other provinces, each municipality determines what time it will use, and in general clocks are altered in the cities though not in the country places, which is naturally the source of much confusion. In the UNITED STATES a Daylight Saving Act has been repealed as a Federal law, and the actual practice seems to be as in Canada, the alteration of clocks being made, if at all, for local considerations. It appears that Daylight Saving is practised in Chicago, and it is read under date April 25, 1930, that the clocks of the Grain Exchange at Winnipeg were to be moved forward one hour to conform with the change in Chicago, New York and Liverpool. In the State of Alabama the Standard Time from Oct. 1 to Feb. 14 (approx.) is 5½ hours slow on Greenwich, which is nearly the local time of the eastern part of the territory, and six hours slow during the remainder of the year, which reverses the usual practice, since in the summer months the clock is slower on the sun than in the winter. In MEXICO the Summer Time system is now in operation. It appears that the plan of putting the clock forward throughout the year had been given up after trial.

As to South America, the Standard Time throughout CHILE is four hours slow on Greenwich during the summer months from Sept. 1 to March 31, but five hours slow in the other part of the year. According to a newspaper note, Summer Time was adopted in ARGENTINA for the first time on Dec. 1, 1930, the clocks being advanced one hour, the system to remain in force until March 31, and it is learned from a later press note that this proved so successful that it is certain that the alteration of clocks will be repeated. The scheme was adopted in BRAZIL for the first time on Oct. 3, 1931, for a period ending March 31, 1932, but since the effect or desirability of Summer Time is said to be a matter of latitude, details as to its operation, and reports of its success in different parts of these large areas, are wanted. In latitudes where the amount of twilight is almost negligible the new arrangement is considered as a boon to workers, since it provides them with an extra hour of daylight for recreation.

It appears that the experiment of varying the clock was made in AUSTRALIA in the year 1916, but was pronounced to be without advantage after short trial. There is a Summer Time Act, 1929, in force in NEW ZEALAND. Summer Time begins throughout the Dominion on the second Sunday in October and ends on the third Sunday in March. During this period the clock is advanced on New Zealand Standard Time by half an hour, so that during the operation of the Act the time is exactly 12 hours fast on Greenwich.

SUNDAY CINEMAS.

FOR the last twenty years it has been the policy of the London County Council, while granting cinemas licences subject to a condition prohibiting opening on Sundays, Christmas Day and Good Friday, to receive applications for Sunday opening and then to intimate that they would take no proceedings in respect of such performances on certain conditions, the principal one being that the net profit should be paid to a charity selected by the licensee from a list approved by the Council; as a result of this policy it was stated that about £200,000 had been paid to charities, including hospitals, in the course of recent years. In December, 1930, in an action brought at the instance of the Entertainment Protection Association, Ltd., a decision was given by a Divisional Court of the King's Bench, and subsequently upheld by the Court of Appeal, that in view of the provisions of the Sunday Observance Act, 1780, the Council had no power to permit the Sunday opening of cinemas. Under the Act of 1780 a common informer was enabled to institute an action to recover penalties for infringement, and proceedings by informers were commenced forthwith. The decision occasioned much controversy as to the expediency of the Sunday opening of all places of entertainment, and a strong claim was advanced on behalf of theatres for equal treatment with cinemas. After hearing the views of deputations from the various

interests concerned, the Home Secretary, in April, 1931, introduced the Sunday Performances (Regulation) Bill, empowering the council of any county or county borough to license and permit the taking of money on Sundays for musical and cinematograph entertainments, for exhibitions of animals or inanimate objects, and for debates; before exercising this power, however, the Council must satisfy itself that there was a substantial demand in the locality for the grant of such licences, and, after hearing any representations on the matter, must pass a resolution that it was expedient that such should be granted; in the case of cinemas the licence was to be subject to the conditions that such amounts as the Council might determine to represent the profits must be paid to charities approved by the Council, and that none of the Sunday employees should be employed in cinemas for each of the six previous days. The Bill was left to a free vote of the House, and the chief grounds of the strong opposition which it encountered were that it legalised illegality, that it discriminates unfairly between one form of entertainment and another, that the onus of decision should be borne by Parliament and not thrown upon local authorities, that the principle of Sunday opening would later be inevitably extended to other interests, and that the observance of Sunday as a day of worship should be carefully safeguarded, whereas this was an attempt to commercialise it. The main argument in favour of the Bill was that it merely made legal a practice deemed to be within the law for nearly twenty years, and that it was undesirable that the law should remain as at present, whereby every infringement of the Act of 1780 by the licensee of a cinema was open to an action by a common informer, with penalties following automatically on proof of the complaint. During the Committee stage a strenuous attempt was made to place theatres on the same footing as cinemas, but the motion was rejected by a substantial majority; consideration of the Bill was not completed before the adjournment for the summer recess. Having regard to its controversial character, the National Government during the emergency session decided not to proceed with the measure, but, in order to regularise the situation, an Act operative for one year was passed, permitting those licensing authorities which had during the past twelve months allowed Sunday opening for cinemas and concerts to continue their existing practice

SWEEPSTAKES.

HUGE sweepstakes (tickets 10s. each) have been conducted within a year by the Irish Hospitals' Trust, a procedure legalised by the South Irish Parliament. The figures are as follows:—

Manchester November Handicap, Nov., 1930:

Sales	£658,618
Hospitals received	131,724
First Prize	204,704
Second Prize	81,905
Third Prize	40,953

Grand National, March, 1931:

Sales	£1,755,963
Hospitals received	438,990
First Prize	354,544
Second Prize	177,272
Third Prize	118,181

Epsom Derby, May, 1931:

Sales	£2,789,69[illegible]
Hospitals received	697,42[illegible]
19 First Prizes ..... each	30,0[illegible]
19 Second Prizes ..... ,,	15,0[illegible]
19 Third Prizes ..... ,,	10,000

Other prizes were distributed to holders of tickets for runners, sellers of winning tickets, and so forth. The draw on each occasion was done publicly with the aid of large machines for shuffling counterfoils of tickets, and everything was tried to obtain extensive advertisement. A party of M.P.s were special guests at Dublin during the draw. Owners of tickets living in England took over 60 per cent. of the Derby prizes, in spite of endeavours by police and Post Office officials to stop the sale of tickets. Other prizes were gained by holders as far apart as Mexico and New Zealand, the sales being world-wide.

SWEEPSTAKES FOR HOSPITALS.

The British Medical Association, at its Eastbourne Conference on July 20, 1931, had two resolutions on the use of sweepstakes for hospitals, but did not record any definite vote, discussions being closured by motions to pass to next business. Dr. Brackenbury, Chairman of the Council, announced official countenance could not be given to sweepstake methods for helping hospitals. Mr. Clynes, then Home Secretary, mentioned at a public dinner on June 17, 1931, that Parliament was clearly disinclined to change the law, however unsatisfactory it might be. The Canadian Parliament, on June 19, declined by 34 to 22 votes to give a hospital sweepstake Bill a second reading. The N.S.W. Government decided in June to run State lotteries for hospital funds.

TAX COLLECTORS.

DURING the passage of the Finance Bill in June, 1931, it was stated by the Chancellor of the Exchequer that, out of about 3,000 tax collectors, roughly 750 were under the direct control of the Commissioners of Inland Revenue, but that of the remainder about 2000 were part-time men whose salary or commission did not amount to more than £1 a week, their ages ran as high as 86 and ten per cent. were over 70. Tax collectors in England and Wales have hitherto been appointed by the General Commissioners of Income Tax in the various districts or in default by the Commissioners of Inland Revenue, whereas in Scotland the collection has for half a century been carried out by permanent Civil servants. The principle underlying the method of appointment by the General Commissioners appears to have been that, to avoid giving the Crown and its servants too much power in the administration of the Income Tax, the duty of assessment was placed in the hands of the locally elected and unpaid Commissioners, who with their officers were to assess and collect the taxes, the power of Somerset House being limited to the supervision of the collection in the interests of the Crown. In 1921 an attempt was made to abolish the assessor and to transfer his duties to the Inland Revenue, together with the appointment of collectors, but in the face of determined opposition the proposal was dropped. In 1931 the question was again considered, and successful negotiations to

place between the Board of Inland Revenue and the National Association of Assessors and Collectors of Taxes with regard to the transfer of the appointment of collectors. The General Commissioners for a number of divisions, while advocating an improvement in the pay and status of collectors, passed resolutions urging the retention of the existing system, and representations were made from other quarters protesting against the removal of the buffer between the taxpayer and a bureaucracy, and pointing out that, if the collector were taken over, either the assessor must automatically follow or a separate office of assessor created, for which the remuneration would be insufficient, and that a case would then be made out for a similar absorption. The Finance Bill, 1931, however, contained a clause vesting in the Board of Inland Revenue the power in England and Wales of appointing collectors which, though strenuously opposed during the debate on the Bill, duly became law. The City of London was excluded from the scope of this clause on the ground that about one-sixth of the total amount of tax was collected in the City, with the result that the system of collection had already been perfected, and that none of the criticism which could be brought against the present system in other parts of the country could be applied to that area. With this exception, therefore, tax collectors will, by a gradual process, become Civil servants.

THAMES BRIDGES.

CHARING CROSS BRIDGE.

THE various stages of the protracted consideration of the problem of a new bridge at Charing Cross have been recorded in the ALMANACK since 1928. After the rejection of the London County Council's Bill by the House of Commons in May, 1930, the Council endeavoured to secure a final solution by appointing an Advisory Committee in July, 1930, to submit within nine months an agreed scheme for a bridge and approaches at an estimated cost of not more than £12,500,000. The Committee was composed of 16 members, representative of all the interests chiefly concerned, with Sir Leslie Scott as chairman, and gave detailed examination to nine different schemes, of which six were selected and embodied in their report, but were unable to produce an agreed scheme; a majority, however, recommended the adoption of a scheme (known as No. 6) which, although it followed in some of its features the one put forward in the rejected Bill of 1930, was claimed to be sufficiently changed to constitute a distinct scheme. In view of claims that the character and cost of one of the six schemes had been misunderstood by the Advisory Committee, the Committee, at the request of the Council, gave further consideration to this scheme, but reaffirmed their previous decision. The Council then decided, in July, 1931, to obtain Parliamentary powers to carry out scheme Number 6 at a net cost of £12,500,000, subject to the Government agreeing to contribute 75 per cent. of the cost, but were at once informed that the Government were unable to renew the offer of a grant from the Road Fund for the purpose; in coming to this decision the Government were mainly influenced by the serious economic position then developing, but also by the fact that no agreed scheme was forthcoming, and that future events, such as a rapid development in the electrification of main line railways, might profoundly affect the considerations which would determine the site of the railway station and the layout of the approaches on the south side of the river. There is, therefore, little likelihood for many years, if ever, of a new bridge at Charing Cross.

WATERLOO BRIDGE.

The fate of this bridge, which has been so long debated, is linked with the scheme for a new Charing Cross bridge. The Royal Commission on Cross River Traffic, in 1926, recommended that the bridge should not be demolished, but that four piers and arches should be rebuilt and the remainder underpinned; this decision was, however, contingent upon the construction of a new bridge at Charing Cross to relieve the congestion of traffic in the Strand. With the abandonment of the Charing Cross bridge scheme, apparently it rests with the London County Council to decide whether they will revert to their decision in June, 1926, before the appointment of the Royal Commission, to demolish the existing bridge and to construct a new one to take six lines of traffic.

ST. PAUL'S BRIDGE.

To relieve the volume of traffic passing over London Bridge and Blackfriars Bridge, and the congestion of the streets in the vicinity of the Mansion House, powers to construct a new bridge were obtained by the Corporation of the City of London in 1911. The bridge approach was intended to pass from the south end of Aldersgate Street along the line of Old Change on the east side of St. Paul's to the bridge head. In 1922 the London and Home Counties Traffic Advisory Committee advised that the bridge should be proceeded with, and steps were taken to acquire the necessary property; but in 1926 the Royal Commission on Cross River Traffic urged the abandonment of the scheme in favour of a new Ludgate Bridge, to be a high-level road bridge passing from Southwark Street over the river, close to and east of the Southern Railway bridge, to Holborn Viaduct. The City Corporation, however, after examining the proposed alternative were unable to agree with the recommendation, and in January, 1929, sought powers to extend until 1931 the time for the completion of the bridge authorised in 1911, but the Bill promoted to secure the extension was rejected. Further schemes have since been put forward, and it is understood that the matter is still under consideration. Considering the need for additional means of communication in the western part of the City, much dissatisfaction has been expressed with the decision of Parliament not to extend the time of completion of a scheme which had received its sanction after full inquiry many years before, and under which the City Corporation had made heavy commitments.

TOTALISATOR.

HOPED-FOR success has failed to materialise with the Totalisator on British racecourses. The Racecourse Betting Control Board was forced to announce in August, 1931, that with the exception of eight tracks (Ascot, Ayr, Birmingham, Hurst Park, Newbury, Newmarket, Nottingham and Wolverhampton) further employment of the electrical machine would not justify itself for the present, and the electrical indicators on hand-worked machines would be entirely discontinued. The deduction from the

pools by the R.B.C.B. has remained at 10 per cent., but from Aug. 31 instead of paying to the round sum as represented in pence, reversion was made to the old practice of the multiple of 3*d.* next below dividend. In some instances this is equivalent to 16 per cent. deduction. Ascot's four days showed the biggest pools—£44,803 18*s.*, £65,042 18*s.*, £66,818 6*s.*, £51,046 2*s.*—the highest figure being on Gold Cup day. Machine was confined to rings, no facilities being provided for the huge crowd on course. Year's report for 1930 was not issued by R.B.C.B. until end of May following. There were 92 racecourses with the Machine that operated on 614 racing days. Total expenses to end of 1930 were £624,146 for buildings and £1,127,828 for electrical equipment; for the year, administration cost £52,755 and total operation expenditure £225,141. The total receipts, including pool percentages, were £261,323. The most numerous patrons are holiday-makers with florin bets; the professional backers prefer the bookmakers, and often the turnover of one of the leading layers will exceed that of the Tote. Business improved in 1931; the turnover of 3¼ millions was reached by Oct. 10—the total for whole of 1930.

A question of legality arose over the Tote for the greyhound tracks, and to make the use of the Machine possible racing clubs have been established, membership of which permits betting with the Tote. The R.B.C.B. has no connection with the greyhound apparatus in either provision, control or profits. France has tackled the problem of getting bets made away from the course placed in the Machine. On March 3, 1931, 7 main and 62 sub-agencies were opened of the Pari-Mutuel-Urbain, whereby people living in towns could have their bets transmitted to the racecourse. In Britain an attempt was made to send money by post direct to the Tote on racecourses, but this was declared illegal. By arrangement with the R.B.C.B., Tote Investors, Ltd., can accept bets on credit to be placed in course Machines.

TRADE DEVELOPMENT.

DELIGHT can be expressed at the greater linking up of industries and departments in industry for the purpose of common improvement in trade that found expression following the Missions of 1930, in various forms during 1931, and promise to extend in 1932.

COTTON.

A Cotton Textile Exhibition, organised by the British Cotton Industry in conjunction with the Government, was held at White City, London, Feb. 16–28. Every section of the home cotton industry was represented, big fashion parades taking place daily with a view to interesting the public and other industries of the uses of cotton. The Queen honoured the Exhibition with a visit on the opening day. The actual net cost to guarantors worked out at £13,648, the industry considering the money well spent. A British Cotton Week followed on May 4–9, in which shops made a mass display of cotton goods with suitable posters and sold well. On April 4 the Cotton Mission (Sir E. Thompson, Chairman) returned to Liverpool after having been away in the Far East from the previous Sept. 19. The reports were made public on April 15 and May 7.

The Report pointed out that the Cotton Industry depended on foreign sales for 80 per cent. of output. Lancashire's production had fallen from 8,000 million linear yards in 1912 to 4,000 million in 1930. In international trade Britain's sales had fallen from 65 to 45 per cent.; Japan's had increased from 3 to 17 per cent. British exports to China and Hongkong had been four times those of Japan in 1913, but only one-tenth in 1930. Japan had become a closed market for British cotton. Though China is increasing her production, she is still a market provided our goods can compete in price with those from Japan. Lancashire had to reorganise and reduce costs if trade was to be recovered. Japan had lower wages and a double shift system, plus a greater output per weaver, who looked after more looms than was the British practice. At every stage, from purchase to packing, Japan had the price advantage. Our marketing was bad. Suggestions made included standardisation in goods offered, maintenance of stocks in China, organisation of a marketing body, long term credits, but, above all, cheaper goods.

Lancashire has also suffered from a boycott of goods organised by the National Congress Party. A protest meeting against the boycott was held by 7,000 members of the Manchester Royal Exchange on May 5. A Lancashire Cotton Corporation was incorported on Jan. 23, 1929, with the intention of rationalising the industry by the amalgamation of mills. The Corporation issued £2,000,000 6½ per cent. debentures in March, 1931, announcing at the time that 72 mills have been taken over and 36 were in negotiation. The Bankers' Industrial Development Corporation made the issue through the Bank of England. A Lancashire Industrial Development Council is educating public opinion to the need of more industries in the County Palatine.

WOOL.

The Far East Economic Mission also dealt with the position of wool in China. The market was open, apart from the new tariff, but it was a matter of prices, especially with the low silver figure. An Imperial Wool Fair was organised by the *Yorkshire Observer* at Bradford in May, and this continued until the Bradford Pageant in July.

ARTIFICIAL SILK.

An Exhibition of Artificial Silk was arranged by the *Drapers' Organiser* at the Albert Hall, Feb. 16–21. Mr. Amery, M.P., presided at the opening, and The Queen honoured the Exhibition with a visit on 19th. Great advances were shown in uncrushable cloths and dyes.

LEATHER.

A market enquiry was ordered in Sept. on behalf of the leather trades exporting to Denmark and Netherlands, the Overseas Trade Dept. co-operating with the National Leather Goods Association.

CANADA.

Federation of British Industries sent a Trade Mission (Sir J. Lithgow, Sir A. Duckham and Mr. M. Mackenzie) to Canada at invitation of Mr. Stevens, Dominion Trade and Commerce Minister, April–May. The report stated co-operation between home producers in building up a selling and service force was essential to meet competition from foreign countries.

Easier communications, uniformity of statistical publications within Empire, liaison between strong economic and investigatory committees, need of sympathetic touch between Governments, publicity, flow of home investment money to Canada were amongst recommendations. Britain's strongest competitor, U.S.A., had the advantage of being on the spot. Earl Jellicoe opened the 53rd *Annual Canadian National Exhibition* in Toronto on Aug. 28, at which certain home manufacturers were represented. A *World's Grain Exhibition* is to be held in Regina in 1932.

EGYPT.

A Trade Mission, Sir Arthur Balfour as Chairman, issued its Report in May covering its visit to Egypt, Jan. 31-Mar. 14. Recommendations included: Complete overhaul of production costs. U.K. manufacturers should study more on the spot the desires and tastes of Egyptians, standardisation of goods with organised trade marketing, knowledge of local languages with vernacular printed catalogues, holding of stocks locally and employment of cinema films for publicity. Share of trade in Egypt had fallen with British goods from 30·5 per cent. in 1913 to 20·3 in 1930, that of cotton piece goods from 81·8 to 42·8.

The British Africa Industrial Development Expedition opened in Cairo on July 27 with exhibits from 65 home firms, and proceeded later to Alexandria and then to the Cape, using a motor convoy for travelling purposes.

SOUTH AMERICA.

H.R.H. Prince of Wales (accompanied by his brother, H.R.H. Prince George) made an extended tour to South America, Jan. 18–April 26, during which he acted as the Empire's Trade Ambassador. He visited Peru, Bolivia, Chile, Argentina, opening at *Buenos Aires* on March 14 the *British Trade Exhibition*. Over 1,000 British and Dominion firms were represented at this B.T.E., the value of the exhibits being £5,000,000. Everything that might be provided by Britain to help Argentina in her development was shown. In the six weeks of the Exhibition, 1,300,000 visitors passed through the turnstiles. A Sheffield Mission had toured South America in the previous winter, making calls upon 439 importers and interviewing 79 officials and ministers. Recommendations were—industries should arrange for group representation, a special Trade Commissioner to follow up the Mission, and meeting of requirements in the way of cheap cutlery.

FLOATING EXHIBITION.

Lord Auckland was instrumental in the purchase of the S.S. *Leicestershire* from the Bibby Line for the purpose of fitting the vessel out as a Floating Exhibition of British Industries. She was renamed the *British Exhibitor* by Lord Derby on July 29, and was due to sail for South America on Nov. 1. Apart from individual exhibitors, chemical, furnishing and Birmingham jewellers were being represented collectively.

IDEAL HOME EXHIBITION.

The interest shown by the public in the *Daily Mail Ideal Home Exhibition* at Olympia, held during April, is a distinct pointer to increased trade possibilities. During the 23 days of the Exhibition 666,890 people paid for admission, an increase of 49,852 above previous record. A large volume of sales was done by exhibitors.

TELEPHONES.

Britain has not developed the use of telephones to the extent associated with the leading nation of the world. The 2,000,000th installation was celebrated by the G.P.O. in June, 1931, with the acceptance of a special micro instrument by the King for Buckingham Palace. A net increase of over 9,000 subscribers is being made monthly; the trunk calls exceed 10,000,000 monthly, being an increase of over 2 per cent. on 1930's figures.

BRITISH INDUSTRIES FAIR.

British Industries Fair was held in London (Olympia, with 1,152 exhibitors of lighter manufactures, occupying 300,000 ft. space; White City, with cotton textiles from 250 firms; Royal Albert Hall, for artificial silk goods, and Birmingham (Castle Bromwich, for heavy goods), Feb. 16-28. Combined attendances of Olympia and White City were 167,052 home buyers, 4,866 overseas buyers, and 33,844 general public (non-purchasers in evenings only). Birmingham's figures were—104,833, 1,865, 150,000. The Queen, Duchess of York and Duke of Gloucester paid visits. Large business was reported, the biggest order numerically being nine million jam-pot covers worth £12,000. The Fair not only means business on the spot, but the establishment of contracts that lead to orders later. The Empire Marketing Board with the Dominions was strongly represented. Arrangements for 1932 Fair, that will open on Feb. 22, include a special section for the whole Textile Industry at White City and a big extension at Birmingham to permit a letting space under cover of a quarter of a million square feet. A Committee was appointed in May, 1931, with Sir G. Garnsey as Chairman, for the purpose of securing permanent accommodation for the London Section and placing the Fair on a self-supporting basis.

TREASURE TROVE.

AN official notice was circularised through the British Museum in March, 1931, calling attention to the Laws applying to Treasure Trove. Gold and silver objects found in land or buildings and apparently without owners become treasure trove, and thus the property of the Crown. Prompt notification of the discovery will lead to either purchase of the articles at market value from the finder, or the goods returned to him if not wanted by the Authorities; in the latter case, the British Museum will attempt to find a buyer, should finder desire. The local Coroner is the official to be advised under the Act of 1887, and he is the Authority who conducts the enquiry into the finding and declares objects to be treasure trove. Finds in other metals or of ancient objects are not treasure trove, but in the interests of knowledge such discoveries should be described and reported to the British Museum, the Director being in a position usually to suggest a method of disposal if desired. Under an old Treasury Minute of 1886, finders received only four-fifths or nine-tenths of the value. The removal of this deduction should mean less retention and secrecy of discoveries.

THE 24-HOUR CLOCK.

DURING the past few years efforts have been made by the Royal Astronomical Society and others to secure the adoption of the 24-hour

method of expressing time; the change was recommended by a Home Office Committee as far back as 1919. On the Continent the use of the system on the railways and in post offices is familiar, while in England it is already used in Army, Navy and Air Force instructions; an example of its usage for the expression of times of high water, sunrise, sunset and astronomical phenomena generally may be found in the early *pages of this* ALMANACK. *The adoption of the* system nationally hinges upon its acceptance by the Post Office and the railway companies, and the assent of the latter has been made conditional upon a general desire for the change. The subject has been discussed in the House of Lords on more than one occasion, and in May, 1931, Lord Newton moved that the Ministry of Transport should invite the railway companies to adopt the 24-hour method from a certain date, and that it should be simultaneously introduced into the Post Office; careful and sympathetic consideration of the question was promised by the Government. The advocates of the change point out that the official use of the system for time-tables, notices and formal statements would not necessitate its use in ordinary conversation, and that alterations in the dials of clocks and watches would be unnecessary, but, if desired, the numbers 13 to 24 could easily be added to the numbers 1 to 12. The expression of a general and compelling demand by the public for an alteration of the present system is not easily conceivable, unless a definite lead is given by one or other of the interests mainly concerned.

UNEMPLOYMENT.

THE whole world seems to be faced with an unemployment problem. Not only has there existed a surplus of labour, but those in work have made a surplus of production. Consumption has not kept pace with machinery increase. In theory, the world solution seems to lie in distributing the work available to all, thus leading to a shorter labouring week with the possibility of the majority having to lower their standards of comfort to raise those of the minority. In Feb., 1931, the International Labour Office reviewed the problem, but could only pass it on to the next assembly. On July 2 the Geneva Unemployment Committee suggested an international exchange of workers, a placing conference, using idle money on public works, international co-operation in works essential to European economic development, and long term credits for transfer of surplus labour to land likely to absorb it. These proposals arose out of the enquiries into Mr. Briand's scheme of European Union.

Britain.—As will be seen from statistics that follow, unemployment has grown with seven-league boots. The sole reason is lack of markets abroad for manufactured commodities. Overseas countries have not had the means for purchasing our products. Either goods that we used to supply have been prepared locally at cheaper rates, or our prices have been undercut by competitive producing countries, or our manufactures have come within the luxury class and thus to be avoided in days of essential economy. Hope for the future lies in better methods of manufacture and merchandising with decreased selling prices, consequent upon lowering of production costs, plus the removal of the tariff walls that automatically raise the price of our goods sent to the countries so surrounded. Failure to sell abroad has meant in turn less money for spending here; that in its cycle has rendered more would-be workers unemployed. Inland trades that have suffered most are shipbuilding (55 per cent. unemployed), steel and iron mills (45), cotton (42), docks (40), coal (31). Least unemployment has been in the internal transport, printing, tobacco, electricity, gas and water supplies, and especially with tram and 'bus men and commercial clerks. The London and Southern areas have shown the biggest increases in unemployment, but these have still the fewest unemployed. The Unemployment Fund has been spending over a million more weekly than has been received as contributions, borrowing powers of the Fund being increased to £90,000,000 (March Act) and £115,000,000 (July Act). The advent of the National Government led in September to a decision not to borrow again, but to increase contributions and reduce benefits, whilst transferring those showing signs of being permanently unemployed to the Public Assistance Committees.

Weekly registrations by the unemployed at the Labour Exchanges have been as follows:—

Date (1931.)	Male.	Female.	Total.	Total in previous Year.
Jan. 26 ...	1,971,987	690,855	2,662,842	1,520,448
Feb. 23 ...	2,016,998	680,424	2,697,422	1,583,102
Mar. 23 ...	2,027,730	637,917	2,665,647	1,694,016
April 27..	1,967,922	624,858	2,592,780	1,760,520
May 18 ...	1,957,105	620,811	2,577,916	1,855,898
June 22 ...	2,068,072	638,723	2,706,795	1,911,749
July 27 ...	2,127,615	678,860	2,806,475	2,070,088
Aug. 24 ...	2,118,329	694,834	2,813,163	2,119,648
Sept. ...				2,188,400
Insured Persons	8,931,530	3,474,170	12,405,700	12,094,000

Average rates of unemployment among insured persons in Great Britain and Ireland have been for following years (excluding coal mining industry workers disqualified for benefit in 1921 and six owing to trade disputes)—

Year.	Per cent.	Year.	Per cent.
1921	17·0	1926	12·5
1922	14·3	1927	9·7
1923	11·7	1928	10·8
1924	10·3	1929	10·4
1925	11·3	1930	16·1

Each month in 1931 showed a gradually increasing percentage, 22·6 being reached in August.

Growth of debt on Unemployment Fund has been—

April, 1926 (Prior to General Strike)					£7,000,000
Nov., 1928, Borrowing Power increased to					£40,000,000
March, 1930	,,	,,	,,	,,	50,000,000
July, 1930	,,	,,	,,	,,	60,000,000
Dec., 1930	,,	,,	,,	,,	70,000,000
Feb., 1931	,,	,,	,,	,,	90,000,000
June, 1931	,,	,,	,,	,,	115,000,000

Australia.—Second quarter of year showed 27·6 per cent. of trade unionists unemployed. Premiers' Conference in Sept., 1931, asked Commonwealth Bank to supply further £5,000,000 for loan works, then giving employment to 100,000.

Canada.—According to firms reporting to Statistics Bureau, there has been slight employment increase from 1926. On Sept. 4, 1931, Ministry of Labour reported 530,000 unemployed.

Total relief was £14,000,000 in 1930, but 1931 winter expected to be worst with 150,000 drought-stricken Western farmers. Much public work in hand.

France.—Though unemployment returns show only 50,000 on exchange registers, short time working is in evidence. In July, 1931, 31 per cent. were working under 48 hours weekly.

Germany.—On Oct. 1, 1931, unemployment benefit was reduced from 26 to 20 weeks (seasonal trades 16) in view of an increase of unemployment to 6,500,000 in winter. Government Commission recommended in April, 1931, 40-hour week, no overtime and no double jobs as solution; Herr Stegerwald, Labour Minister, at Aug. Congress of General Federation of T.U., favoured some form of short time provided exports were not interfered with. He thought £100,000,000 would have to be raised for relief works before Mar., 1932.

New Zealand.—Camps are being formed for single men to be given work constructing roads and preparing lands for settlements, with Unemployment Board as controlling authority. Last available unemployment registration figure was 45,264.

U.S.A.—President Hoover announced on May 2, 1931, he did not propose to call an extra session of Congress to deal with the economic situation. "We cannot legislate ourselves out of the world economic depression. We can and will work ourselves out." By Sept., 1931, relief expenditure had been authorised for £18,000,000, apart from private and State schemes on building and roads. Mr. G. Swope, G.E.C., has a proposal in hand that is securing much support for regulation of production according to consumers' needs, with guarantee of involuntary idleness to workers. He includes a contributory unemployment insurance scheme.

WATCHING THE COAST.

THE coast-watching organisation of the Coastguard Service was described as "thoroughly efficient and adequate for the requirements" by a departmental committee appointed by the Board of Trade as the result of the suggestion of a Court of Inquiry into the loss of a vessel. At the same time the committee made a number of suggestions for improving the service. They expressed the opinion that the retention of coastguard stations on unfrequented parts of the coast merely to maintain continuity of the watching organisation could not be justified, and they recommended that such stations should either be closed or reduced to auxiliary stations for use in bad or thick weather only. Unless a station is on an important traffic route, overlooks serious navigation dangers, or supervises the work of a busy fishing port, harbour or area, the employment of full-time personnel on coast-watching duties at the expense of the State, they declared, could not be justified, and if local authorities desired a watching organisation for the protection of pleasure craft at seaside resorts, it was not unreasonable that they should themselves bear the cost of providing and maintaining the necessary look-outs. The committee proposed that the system of arranging stations in groups (usually of three stations) and placing each station in turn on night watch in fine weather should be amended, so that only those stations which afford the greatest amount of supervision of the coast and sea should undertake the necessary duties for a group of stations. The system whereby watch is kept from look-out huts is, in the committee's opinion, preferable to keeping watch by means of watchmen on patrol. They proposed to reduce the number of coastguard stations from 252 to 217 and to increase the auxiliary stations from 98 to 142. The total look-out positions would not be less than at present, but the coastguard personnel would be gradually reduced from 820 to 772. The report of the committee added that, at their request, the Board of Trade had developed a scheme for raising the general status of the auxiliary service and organising it in a Coast Life-Saving Corps, which they thought would materially add to the efficiency of the service. The Corps would be enrolled on a voluntary basis and would comprise life-saving appliance men, coast watchers, and an intelligence section, the groups in some cases including women. As many of the helpers would be working people, it would be necessary for the Board of Trade to provide for the adequate remuneration of the members of the Corps, but the additional cost would be offset by savings secured from the reduction of coastguard stations and personnel. Another recommendation was that each district should be supplied with one or more lamps capable of throwing a good beam for 200 or 250 yards, while it was urged that powers should be obtained by the Board of Trade to compel the owners and masters of all vessels employing paid hands to carry efficient distress signals. Finally the committee expressed the view that, with the further development of wireless telegraphy and telephony, the need for visual watching should gradually be reduced.

WEIR REPORT.

IN Sept., 1929, the Minister of Transport appointed a Committee of three (Lord Weir as Chairman, Sir Ralph Wedgwood and Sir William McLintock) to examine the "economic and other aspects of the electrification of railway systems in Great Britain, with particular reference to main line working." The Committee held 31 formal meetings and heard 19 witnesses. Their report, known as the Weir Report, which was issued on April 25, 1931, pointed out national generation of electricity at low costs constitutes a new favourable factor in favour of electrification, an efficient railway system is essential, and electrified suburban lines are being successfully worked. After observing that the increased demand for electricity would cheapen its supply for industry, and acceleration of rural electrification would follow its application to railways, the division of work was suggested that the Central Electricity Board should provide transmission lines and equip the sub-stations, with the latter controlled by railways. There were to be no half-measures; success would lie in a comprehensive scheme, leaving out only branch lines that might be worked more profitably by other haulage methods. Direct financial economies would follow from electrification, whilst speed, comfort, improved service and capacity would be gained. The main disadvantage would lie in dependence on the centralised electrical sources of supply.

Working out in practice would call for 15–20 years' programme and an expenditure of £261,000,000 approximately. Gross aggregate costs were estimated at £323,150,000, against which there would be realisable credits of £62,280,000. The Central Electricity Board

would be called upon to spend also £80,000,000 for generating plant, lines and stations. Taking a year's budget, railway working costs would be reduced from £52,604,127 to £32,199,424 (plus additional renewals, £4,461,000), thus making a saving of £17,296,703 (plus coal haulage charges of £254,000) a year. This would be equivalent to 6·1 per cent. on the cost of £261,000,000. Though the bulk of the savings were in connection with unwanted labour, the railway trade unions at their Conferences welcomed electrification. It might be noted that the Southern Railway has in hand a main line electrification scheme between London, Brighton and Worthing; this will be completed early in 1933.

The Report observed that the most promising alternative to steam haulage, other than electricity, was the oil engine with electrical transmission to driving-wheels. But experience in that was limited, and might be less economical on well-loaded lines. An independent scheme of railway traction by Diesel-oil-locomotives was submitted to the Ministry of Transport in Aug., 1931, in which it was set forth that the cost of oil-electric working would be £154,000,000 compared with the £341,000,000 for the electricity change-over. A list of advantages of the oil system over the electricity grid was set out, but against these needs be placed the statement in the Weir Report that preference should be given to a system using coal rather than oil as being in national interest.

A sum of £1,000,000 is being spent on the Grand Union Canal of 240 miles to permit employment of motor craft between Thames, Trent and Birmingham.

THE WEATHER OF 1930-31.

(1930) *October* was mild in all parts, and especially so during the third week. The month was wet in Scotland, Ireland and the western districts of England and Wales, but in the east of England it was both dry and sunny. The month opened generally cloudy and dry, but bright periods occurred in the east and south-east. On the 2nd rain began in the south of Ireland, and during the night of the 3rd to 4th and on the 4th heavy falls occurred in many parts of the British Isles. This rain marked the beginning of a spell of unsettled weather, which continued almost unbroken until the end of the month. There were, however, some bright periods, especially on the 6th and 9th. Some snow occurred on the hills in Scotland on the 9th, and severe ground frost occurred at many places during the nights of the 8th and 9th and the 9th and 10th. During the period 10th to 13th an anticyclone caused more settled conditions over the greater part of England, and good sunshine records were obtained in many places, but the unsettled weather with rain at times continued in Scotland and Ireland. From the 15th to 17th some unusually high temperatures for the time of the year were recorded, maximum temperatures of 65° F. and over in most parts of England and 70° F. in London on all three days, while night minimum temperatures on the 15th or 16th did not fall below 60° F. at places as far apart as Manchester, Ross-on-Wye and Margate. Rain occurred at most places during this period. On the 20th conditions changed, and during the next six days cool, squally, north-west winds, with occasional local thunder and hail, and gales on the 24th and 25th, were experienced. The coldest days were from the 24th to 27th. A renewal of the mild weather occurred on the 28th. On the 30th and 31st cold air again reached Scotland, but the weather continued mild in England. Monthly means of pressure were below the normal in all districts, while the prevailing winds were between south and west. Among the highest gusts were 69 m.p.h. at Butt of Lewis and Pendennis Castle on the 31st, and 67 m.p.h. at Lerwick on the 30th. Monthly mean temperature was above normal in all parts, especially in the east and south of England. The extreme temperatures of the month were (England and Wales) 71° F. at Canterbury on the 17th, and 23° F. at Rickmansworth on the 27th; (Scotland) 69° F. at Achnashellach on the 15th, and 24° F. at Braemar on the 31st; (Ireland) 67° F. at Dublin (Trinity College) on the 14th, and 33° F. at Ballinacurra on the 10th and at Lisburn and Dublin (Phœnix Park) on the 31st. The month was wet in the western districts of Great Britain and in Ireland, and dry in the east of England. Over the British Isles as a whole the precipitation expressed as a percentage of the normal for the period 1881–1915 was 119; the values for the constituent countries were: England and Wales 87, Scotland 149, Ireland 162. This is the fourth consecutive month when the general precipitation over Ireland has exceeded the normal. The distribution was very uneven, for while less than half the normal fell in the east of England, nearly twice the normal fell in parts of Cumberland, and in Scotland 14·36 inches fell at Glenbranter, but only 1·45 inch fell at Smeaton. The heaviest daily fall was 2·60 inches at Ardgour on the 18th. The month was on the whole sunny in the eastern and south-eastern districts of Great Britain, but in Ireland and the west of Scotland there was a well-defined deficiency of bright sunshine. Fog was most widely reported about the 4th, 19th and from the 27th to 29th. Aurora was observed in Scotland on the 13th, 14th, 15th, 17th, 18th, 20th, 26th and 27th, while that of the 17th was seen as far south as Market Harborough and Norwich.

November was generally wet, especially in England and Wales, where the general precipitation was one and a half times the normal. In spite of this, however, sunshine totals were in excess of the normal. The month opened with mild, rainy conditions, with local mist or fog. On the 2nd a violent squall crossed southern England, its passage being accompanied by severe thunderstorms in places, and gusts of 82 m.p.h. at Cardington, 78 m.p.h. at Scilly, and 77 m.p.h. at Shoeburyness were recorded. Considerable sunny periods occurred on the 4th and 5th. A depression off the south-west coast of Ireland on the morning of the 5th moved south-eastwards, and in the extreme south there was much cloud and rain. The 6th was generally sunny, many places recording more than 8 hours bright sunshine. From the 7th to 9th an unsettled westerly type of weather prevailed. Much rain fell in Scotland and Ireland on the 7th, and widely during the night of 7th to 8th. From the 10th to 13th mainly dry, sunny weather prevailed in the south and east, but the north-west came under the influence of an Icelandic depression, and though there was not much rain, the wind was frequently strong, gales occurring in exposed places on the 10th, 12th and 13th. On the 14th many places on the south coast enjoyed over 8 hours sunshine, and maxima reached or exceeded 60° F. at many places. There was rain in Scotland on the 14th, and general rain on the 15th. A mainly rainy and generally dull period occurred from the 18th to 26th. Heavy rain fell in several parts on each day except the 23rd, which was sunny, but heavy falls occurred in the south-west during the night of the 23rd to 24th. Gales occurred along parts of the coast, mainly in the English Channel, between the 22nd and 25th. Snow occurred generally in Scotland on the 22nd, and thunderstorms were reported in southern England on the 21st, 22nd and 26th. During the period 27th to 30th improved conditions, with much sunshine and local night fog, were enjoyed in the north and west, but in the south there was still much rain at times. Cyclonic conditions predominated during the month, and for the fifth consecutive month pressure means were below the normal. Winds were mainly westerly and were frequently strong. Gales were widespread on the 2nd and 3rd, in the south-west on the 5th to 8th, parts of Scotland on the 8th to 10th, widespread on the 22nd to 24th, and in the south-west on the 25th and 29th. Among the highest gusts recorded were 84 m.p.h. at Kirkwall and 79 m.p.h. at Butt of Lewis on the 10th, 79 m.p.h. at Pendennis on the 24th, 78 m.p.h. at Scilly on the 2nd and at Birmingham on the 22nd. In Scotland mean temperatures were below the normal, and over the country as a whole it was the coldest November since 1925. In most parts of England and Wales and

Ireland the mean was within 1° F. of the normal. The extreme temperatures for the month were (England and Wales) 64° F. at Shaftesbury on the 14th, and 13° F. at Rickmansworth on the 17th; (Scotland) 61° F. at Stonehaven and Aberdeen on the 13th, and 14° F. at Balmoral, Braemar and Logie Coldstone on the 18th; (Ireland) 62° F. at Waterford on the 9th, and 23° F. at Markree Castle and Birr Castle on the 17th, at Phœnix Park on the 17th and 28th, and at Foynes on the 29th. The general precipitation over the British Isles, expressed as a percentage of the normal, was 138, thus exceeding the normal for the fifth consecutive month. For the constituent countries the values were: England and Wales 152, Scotland 134, Ireland 110. Over England and Wales as a whole there have been only three wetter Novembers since at least 1881, viz., in 1888, 1926 and 1929. Among the largest daily falls were 95 mm. at Kinlochquoich on the 14th, 81 mm. at Ardgour on the 8th, and 43 mm. at Princetown on the 5th and 23rd. At Glenquoich there were four days on which more than 50 mm. fell, and at Baltasound and Gruline rain fell on each day of the month. In spite of the excessive rainfall, sunshine totals were generally well above the normal, especially in the eastern parts of Great Britain. Fog was reported on as many as 19 days in Manchester, 16 at Hull, and 10 in London. Aurora was observed in Scotland on several occasions, and as far south as Eskdalemuir on the 3rd and 26th. Solar haloes were observed at Oxford on 12 days. On the 27th the solar halo of 22° was visible practically all day, with contact arc about 15.45 G.M.T.

December was dull and mainly rather mild, with frequent mist and fogs. During the first six days of the month a persistent ridge of high pressure gave quiet, dull and dry weather generally. With the passage eastwards of a trough of low pressure, fairly heavy rain fell in the west and north-west during the night of the 6th and 7th and in most places on the 7th. Unsettled conditions prevailed until the 17th, during which period frequent but generally slight precipitation occurred. Snow or sleet occurred in the north on the 8th and locally in England on the 9th. The sharpest frost of the month occurred on the morning of the 10th. During the night 10th to 11th heavy rain occurred in the west and south-west and extended to most districts on the 11th. Gales were reported from exposed places on the 11th, and from then until the 13th mild, rainy conditions with bright periods prevailed. Fog was widespread on the 15th, and in the east and south-east day temperature was only a few degrees above freezing. From the 18th to 20th mild south-westerly winds spread over the country, and day temperature rose above 50° F. in several places, and in most parts the highest temperature of the month was registered during this period. On the 22nd an anticyclone extended over the British Isles, and in several places in England dense and persistent fog, with maximum temperature below 40° F., were reported on that day. From then until the end of the month depressions of increasing intensity crossed the country from the Atlantic, bringing generally unsettled weather, heavy rain or snow at times, but periods of bright sunshine, with temperature above normal. The Christmas period was mainly mild, with rain at times, and bright sunshine, although snow fell heavily in parts of north-eastern England on the 26th. Gales occurred generally in the west and north on the 26th and 27th and over southern districts on the 28th. Rain fell heavily in the west and north on the 28th, when 83 mm. fell at Borrowdale (Cumberland) and 75 mm. at Penrhyn (Carnarvon). In Scotland and Ireland monthly pressure means differed as a rule by less than 1 millibar from the normal, and in England generally 1 to 2 millibars below the normal. Winds were mainly southerly or westerly, and with the exception of gales about the 11th to 13th and 26th to 31st were generally light to moderate. Among the highest gusts recorded were 85 m.p.h. at Butt of Lewis on the 28th, 80 m.p.h. at Tiree on the 27th, and 77 m.p.h. at Quilty on the 11th and at Dunfanaghy on the 27th. The month was on the whole mild; the mildest days occurred generally at the beginning of the month and about the 13th, 19th and 27th. The extreme temperatures of the month were (England and Wales) 60° F. at Rhyl and Colwyn Bay on the 18th, and 16° F. at Bellingham on the 10th; (Scotland) 56° F. at Aberdeen and Stonehaven on the 18th and Gordon Castle on the 19th, and 13° F. at Braemar on the 10th; (Ireland) 59° F. at Newcastle (Wicklow) on the 18th and at Blacksod on the 27th, and 22° F. at Dublin (Glasnevin) on the 10th. Rainfall was generally about normal, the percentage values of the normal being: British Isles 99, England and Wales 99, Scotland 97, Ireland 101. The distribution was rather uneven, for while Skegness had only 52 per cent., Cromer 72, and Killybegs (Donegal) 63 per cent., Balbriggan had 140 per cent., Blacksod 118 per cent., and parts of Wales 125 to 150 per cent. At Rothesay rain fell on 30 days, while at Kinlochquoich there were 8 days with over 25 mm., the wettest being the 15th with 76 mm. Sunshine aggregates were below normal in almost all parts of England and Wales. In Scotland there was in general a slight excess, except in the south, whilst in Ireland aggregates were as a rule above the normal in the south and west, and below the normal in the east and north-east. The dull character of the month over the greater part of England is indicated by the large number of sunless days; at Huddersfield there were 25 and in London and Bradford there were 23 days with no bright sunshine. Fog was unusually prevalent throughout the month. It was observed in the mornings on 27 days at Hull, 24 days at Nottingham, and 16 at Kensington; in the early afternoon it was reported on 12 days at Harrogate and 11 at Greenwich. The fog in and around London on the 22nd was one of the most dense of recent years, and caused serious dislocation of all transport services. At Southampton, on no day during the month did the visibility in the morning or evening exceed 6¼ miles. Aurora was observed in Scotland on 7 occasions. On the 20th it was visible over the greater part of the country. Solar halo, with parhelion, was observed at Oxford on the 9th, 13th, 14th and 28th.

Year, 1930.—The outstanding feature of the year's weather was its persistent and excessive wetness, the annual rainfall exceeding the normal almost everywhere. Apart from a short hot spell at the end of August, during which 94° F. was recorded at London (Camden Square), the highest in the British Isles since July 13th, 1923, when 96° F. was recorded at the same station, there were no conspicuous departures from the normal. There were no prolonged and intense cold spells. Sunshine aggregates were in general deficient. The annual pressure means were from 2 to 3 millibars below the normal. Among the outstanding gales of the year were those of January 1st to 3rd and 12th. On the

and a gust of 91 m.p.h. was recorded at Liverpool, and on the 12th 102 m.p.h. at Pendennis, and 97 m.p.h. at Scilly, with mean hourly wind of 63 and 65 m.p.h. respectively. Annual mean temperatures were slightly above normal, in the majority of districts by less than 1° F. The extreme temperatures of the year were (England and Wales) 94° F. at London (Camden Square) on August 29th, and 3° F. at Newport (Salop) on March 20th; (Scotland) 87° F. at Ruthwell on August 27th, and 4° F. at Braemar on February 9th; (Ireland) 81° F. at Newcastle (Wicklow) on August 27th, and 17° F. at Markree Castle on February 19th. The year was a wet one; with the exception of the north-western seaboard and small areas in Scotland, English Lake District and the Thames Valley, all districts had an excess. The general precipitation expressed as a percentage of the normal for the period 1881-1915 was: British Isles 115, England and Wales 117, Scotland 110, and Ireland 114. Some memorable incidents of the year's rainfall were the thunderstorms near Ilkley on April 25th, in which 47 mm. of rain and hail fell in 30 minutes, the thunderstorm rains of June 18th, which in London, following heavy rain on the previous day, caused severe flooding and dislocation of traffic, and the persistent cyclonic rains of July 20th to 23rd near Whitby, during which 304 mm. fell at Castleton in the Yorkshire Wolds. Aurora was observed in northern districts in each month except during the months June to August. *January* was abnormally mild, wet and stormy, with destructive gales in the south on the 12th. After the first few days anticyclonic conditions prevailed during *February*. There was a pronounced frequency of winds between north and east and the weather was cold, quiet and decidedly dry. There was a return to unsettled mild conditions at the beginning of *March*, but after the first week a complete change occurred, and from the 9th to 23rd the British Isles lay in the broad Arctic current between a high-pressure system to the west and a low-pressure area over north-west Europe. After the 23rd conditions became mild and wet and continued on into *April*; from the 3rd to 7th and again from about the 12th to 21st, which period included the Easter holidays (April 18th–21st), cold winds between north and east and wintry, dull weather were prevalent. The last week was considerably warmer. *May* was generally dull and wet in the south-east of England, but dry in most other districts. In contrast to the dullness of the preceding months, *June* was sunny, with frequent moderately warm days and nights, a deficiency of rainfall except in parts of Scotland, and frequent thunderstorms from the 12th to 19th and on the 23rd and 24th. *July* was generally unsettled, dull and wet. Mainly cool, wet and unsettled weather prevailed in *August*, but from the 26th to 29th the weather was unusually hot and sunny in most parts of Great Britain. *September* was chiefly remarkable for its excess of persistent rainfall in all districts except in the north-west of England and west of Scotland. Sunshine was very much below the normal in Great Britain. The last three months of the year were on the whole mild and mostly wet, with much fog in December.

(1931) *January*.—The first half of the month was cold with much fog, and the second half mild, windy and wet, with fairly heavy rain during the last week. Bright periods were, however, frequent; a prominent feature of the month was the excess of sunshine recorded in most districts. The month opened with thick fog locally and low temperatures. During the period 5th to 9th severe frost occurred, both in the screen and on the grass. By the 11th mild conditions became general, with temperature reaching 50° F. at some places. From the 12th to 14th northerly winds and wintry precipitation prevailed generally, but many good sunshine records were obtained in many parts of England on the 14th. Westerly to north-westerly winds prevailed from the 15th to 19th, with gales on the 16th and 17th and snow in northern districts on the 18th and 19th. Heavy rain occurred during the night 22nd to 23rd and on the 23rd. The period 24th to 27th was mainly sunny, over 7 hours bright sunshine being recorded at several places, and on the 26th as much as 8 hours at Ross-on-Wye, a record at that station for a January day. The last two days were rather cold except in the south-west and in Ireland, and on the 31st there were further gales and heavy snow in the north and west. With the exception of south-west Ireland, mean monthly pressure was below the normal. Winds were mainly between south-west and north-west and frequently strong during the second half of the month. Generally the highest wind velocities were recorded during the westerly gales on the 16th and 17th. Among the highest gusts of the month were 85 m.p.h. at Bell Rock on the 17th, 83 m.p.h. at Butt of Lewis on the 16th, 78 m.p.h. at Tiree on the 16th, and 76 m.p.h. at Fleetwood on the 17th. Mean temperatures for the month were generally within 1° F. of the normal. The extreme temperatures of the month were (England and Wales) 55° F. at Dover on the 16th, and 14° F. at Newport (Salop) on the 5th; (Scotland) 55° F. at Cupar on the 16th, and 6° F. at Braemar on the 6th and 7th; (Ireland) 56° F. at Blacksod Point on the 16th, and 20° F. at Newtownforbes on the 3rd and at Lisburn on the 6th. Precipitation occurred frequently during the month, but was generally light, the only falls of importance occurring about the 23rd and during the last week. The general values expressed as a percentage of the average were: British Isles 107, England and Wales 103, Scotland 128, and Ireland 88. Among the largest daily falls were 70 mm. at Garelochhead and 64 mm. at Ardtornish and Princetown on the 31st. At Strathpeffer the monthly total of 6·43 inches was the highest for January there since before 1885. Sunshine totals were in excess of the average, and expressed as a percentage of the average ranged from 158 per cent. in the north-east of England to 103 per cent. in north of Scotland and the Channel Isles. The month was the sunniest January at Ross-on-Wye since 1914 and at Eskdalemuir since 1910. Aurora was observed in Scotland on the night of the 25th to 26th.

February. — Squally, westerly or north-westerly winds and frequent wintry precipitation were the chief features of the month. On the 1st gales prevailed in western districts, and then until the 5th quiet, cold weather, with north-easterly winds and varying amounts of sunshine, prevailed over the greater part of the country. During the night of the 5th to 6th and on the 6th rain or snow was widespread. Mild weather was general from the 8th to 12th. There was heavy rain in western Ireland on the night of the 7th to 8th, and over the country generally on the night of 9th to 10th and on the 11th. In the rear of a depression which crossed the country on the 11th, strong north-westerly

winds, reaching gale force in exposed places. In the north and west there was hail, sleet or snow. The 14th was sunny, many places in south-east England recording over 8 hours bright sunshine. On the 24th an anticyclone over the Bay of Biscay spread northwards, bringing with it air of tropical origin, and temperature rose to an unusually high level, 60° F. at Worksop and 59° F. at Aberdeen. On the 26th the winds veered north-west, and another cold spell ensued, and locally in the Midlands temperatures did not exceed 32° F. on the 28th. Gales occurred in the north and west on the 28th, and on the evening of that day snow fell generally over the whole country. With the exception of the extreme south of Ireland and the Channel Isles monthly pressure means were below the normal. The prevailing wind was westerly, and frequently strong and squally. The highest gusts recorded during the frequent gales were 87 m.p.h. at Butt of Lewis on the 27th, 79 m.p.h. at Tiree on the 12th, Scilly on the 1st, and at Lerwick on the 21st. Monthly mean temperatures were generally within 1° F. of the normal. The temperature readings for the 25th at many places were the highest in February for several years. Ground frost occurred frequently in most districts. The extreme temperatures of the month were (England and Wales) 60° F. at Worksop on the 25th, and 17° F. at Rickmansworth on the 22nd; (Scotland) 57° F. at Aberdeen on the 25th, and 9° F. at Dalwhinnie on the 23rd; (Ireland) 59° F. at Newcastle, Wicklow, on the 25th, and 26° F. at Dublin (Phœnix Park and Hazelhatch) on the 19th. The general precipitation of the British Isles and the constituent countries expressed as a percentage of the normal was: British Isles 118, England and Wales 124, Scotland 118, Ireland 104. A notable feature of the month was the frequency with which precipitation took the form of snow, sleet or hail. Practically every district had some snow, and owing to stormy conditions there was much drifting at times, and in the north many roads were blocked. Hail also occurred frequently in the north and west. Thunderstorms were reported from various districts on one or two days. Sunshine totals were generally below normal, but a slight excess was recorded in the Orkneys and Hebrides, on the east coast of Scotland, the south coast of England, and the south-east coast of Ireland. Fog occurred locally in various parts of England on the 5th, 7th, 9th and from the 24th to 26th. Aurora was observed in Scotland on 4 occasions, that on the 13th being observed as far south as West Linton. At Compton (near Wolverhampton) an upper arc of contact of the 46° halo with brilliant coloration at approximately 10.15 a.m. on the 24th. The arc was reported to be nearly a complete circle.

March was on the whole cold, and, except in Ireland and the south-west of England, dry and sunny. Noteworthy features of the month were the spell of wintry weather between the 6th and 10th, and the unusually mild weather round about the 20th. The month opened with strong northerly winds and in parts of the north and west it attained gale force, while snow accompanied it in Scotland on the 2nd. Heavy rain fell in the south-west on the 3rd. Easterly winds on the 4th were associated with a trough of low pressure over the southern half of the British Isles, and some heavy rain fell in the south-west during the night of the 4th to 5th and on the 5th. Cold weather and wintry precipitation were general during the next few days. On the 9th and 10th heavy snow fell in Wales and the Midlands and north of England, some roads remaining impassable until the 12th or 13th. On the 9th London had its heaviest snowfall of the winter, when from 3 to 4 inches fell. The day was unusually cold in the south-east, followed at night by very severe frost. At Kew Observatory the maximum temperature of 31° F. was the lowest on record for March, while on the grass the temperature fell to 4° F. After the 10th there was an appreciable rise in temperature, but at Kew it was not until the 14th that temperature exceeded the normal for the first time during the month. By the 16th mild weather had become general, and prevailed up to the 21st. Some good sunshine records were obtained during this period. From the 23rd to the 27th mainly dry weather, with fairly warm days but cold nights, and much sunshine, was general. By the 30th most of Great Britain experienced a return of the cold weather. The extreme south-west, however, had unsettled weather with much rain at times from the 27th to the end of the month. With the exception of a few exposed places the month was on the whole quiet, with a prevalence of south-easterly to north-easterly winds. Among the highest gusts recorded were 72 m.p.h. at Pendennis on the 6th and 70 m.p.h. at Lerwick on the 1st. In most parts of the country it was the coldest March since 1924, and with the exception of the extreme south-west of England and west and south-west of Ireland, monthly mean temperature was below the normal. The extreme temperatures of the month were (England and Wales) 69° F. at Cardington and Camden Square on the 20th, and 5° F. at Rickmansworth on the 10th; (Scotland) 65° F. at Ruthwell on the 20th, and 1° F. at Braemar on the 3rd; (Ireland) 60° F. at Rathfarnham on the 27th, and 18° F. at Hazelhatch on the 10th. The rainfall of the month was decidedly below the normal, the percentage values being: England and Wales 36, Scotland 42, Ireland 101, and British Isles 51. At Meltham it was the driest March for more than 50 years, while at Luton there was only one day when precipitation was measurable. The deficiency was most pronounced in the Midlands, where many places had less than 10 per cent. of the normal. In Scotland over large areas it was probably the driest March on record; at Glenquoich since at least 1876 there has been only one drier March (1924). In Ireland there was an excess in the east and south, while at Cork it was actually the wettest March in 48 years. With the exception of the extreme south-west of England and most parts of Ireland, sunshine was above the normal. At Copdock it was the sunniest March since 1907. Fog was rather prevalent during the month. Aurora was observed in Scotland on 6 nights.

April was on the whole unsettled and dull, with a pronounced excess of precipitation in England and Wales and in the eastern districts of Scotland and Ireland. Heavy rain, with local flooding, occurred in parts of Ireland and south-west England on the 1st and in Scotland on the 2nd. Persistent rain occurred in south-east England on the 2nd and 3rd, but in Scotland and Ireland it was fine and sunny on the 3rd. On the 4th the southern districts had bright sunny weather. This improvement was only temporary, however, and cool unsettled conditions prevailed

until about the 7th. In the south-east the 5th and 6th (Easter) were dull and wet. On the 7th there was a change to warm, fine weather. The 11th and 12th were amongst the sunniest days of the month. On the 13th there was a decided drop in temperature, and from the 18th to 19th, with the passage of a low-pressure system across the country, cold inclement weather prevailed. Snow, sleet or hail occurred at most places on the 17th, 18th and 19th, and thunderstorms were experienced locally in the eastern half of England on 17th, 19th and 22nd and at Durham on the 24th. Sunny conditions prevailed in Ireland and west Scotland during the period 18th to 20th. From then until the end of the month the weather became slightly milder but continued unsettled, with some bright periods. Heavy rain occurred in England and Wales during the period 23rd to 26th. Many good sunshine records were obtained between the 26th and 30th. With the exception of the extreme south-west of Ireland, monthly pressure means were below the normal. There was a considerable prevalence of north-westerly to northerly winds, and gales were recorded at several exposed places. Among the highest gusts were 74 m.p.h. at Sealand on the 17th, 66 m.p.h. at Lerwick on the 4th, and 65 m.p.h. at Pendeunis on the 19th and Butt of Lewis on the 4th. Mean temperatures for the month were within 1° F. of the normal in most districts. The extreme temperatures for the month were (England and Wales) 69° F. at Attenborough, Sparkhill and Sealand on the 11th, and 24° F. at Castleton on the 6th; (Scotland) 69° F. at Liberton on the 10th, and 20° F. at Eskdalemuir on the 6th; (Ireland) 68° F. at Kilkenny on the 10th, and 28° F. at Markree Castle on the 29th. In contrast to the dryness of March, rainfall totals for April were appreciably above the normal in most parts of the British Isles, the excess being most pronounced in the Midlands and the east of England. Expressed as a percentage of the normal the values were: England and Wales 173, Scotland 106, Ireland 111, and the British Isles 143. Over England and Wales as a whole it was the wettest April since 1920. At Reigate (Alvington) three times the normal fell, Westminster had 274 per cent. and Richmond (Surrey) where it was the wettest April since 1871, 251 per cent. In western Scotland rainfall was generally well below the normal, while in northern and eastern Scotland there was an excess. Although below normal in the west, there were several areas with only two rainless days. Over the south and south-east of Ireland there was a deficiency, but elsewhere it was in excess of the normal. Monthly aggregates of sunshine were decidedly below the normal. At many places in England the average loss exceeded 2 hours per day. So little sunshine has been recorded at Totland Bay only thrice in 30 years. At Tiree there was a total of 38 hours for the three days 18th to 20th, and over 39 hours for the three days 27th to 29th. Fog occurred most frequently during the period 8th to 12th. Aurora was observed in Scotland on 8 nights. On the 18th a solar halo of 22°, with mock sun ring and upper and lower arcs of contact, was observed at Hastings.

May.—The weather of the month was unsettled, wet and cloudy. The month opened in most parts with considerable fine periods, but on the 3rd there were cold north-easterly winds over most of England, and heavy rain in the south-east, although the north-west and Scotland continued to have sunny weather. During the period 5th to 9th it was generally bright, warm and sunny. From then until the 20th unsettled conditions prevailed, with rain at times. The 20th and 21st were cold and sunny, but then temperature rose generally and continued warm until the end of the month. Rain occurred in most places on the Saturday and Sunday of the Whitsun holidays (23rd and 24th), but on Whit Monday there was brilliant sunshine in most places. After this conditions continued unsettled, with local thunderstorms from the 26th to 29th. Severe thunderstorms, accompanied locally by torrential rain, occurred in the south-west on the 27th. Monthly mean pressures were everywhere below normal. The prevailing winds were southerly and often strong in coastal districts. Gales occurred on the 11th and 12th and 28th to 30th. Among the highest gusts recorded were 65 m.p.h. at Dunfanaghy, 63 m.p.h. at Tiree on the 11th, and 63 m.p.h. at Lerwick on the 29th. Mean temperatures were about normal or slightly above, mainly as a result of mild nights rather than warm days. The warmest days were between the 25th and 30th, while the coldest spells were from the 1st to 5th and 17th to 21st. The extreme temperatures of the month were (England and Wales) 78° F. at London (Camden Square) on the 27th, and 22° F. at Castleton (Yorks) on the 21st; (Scotland) 75° F. at Ruthwell on the 27th, and 25° F. at West Linton on the 3rd; (Ireland) 71° F. at Dublin (Rathfarnham) on the 26th, and 28° F. at Dublin (Phœnix Park) and at Newtownforbes on the 3rd. The month was decidedly wet, the wettest May generally since 1925. Both monthly totals and the number of days of precipitation were in excess of the normal in almost all districts, the only important exceptions occurring locally in the north-west of England and in the north-west and south-west of Scotland. The general precipitation expressed as a percentage of the normal for the period 1881–1915 was: England and Wales 150, Scotland 145, Ireland 162, and British Isles 151. Unusually heavy rain accompanied the thunderstorm of the 27th, among the largest falls being 106 mm. at Cardiff (91 mm. fell in 3½ hours), 83 mm. at Crickhowell, 79 mm. at Watchet 74 mm. at Newport, and 44 mm. at Shanklin in the Isle of Wight. Much flooding occurred as the result, and considerable damage was done by the hail. In most parts sunshine totals for the month were below normal, the most notable exception being round about the Firth of Forth, where an appreciable excess of sunshine was recorded. Fog, which was often dense in coastal areas, was recorded on several days.

June.—The weather during June was distinguished by a pronounced excess of precipitation everywhere, with the exception of the south-east of England, and by a general deficiency of sunshine. The first three weeks were unsettled, dull and wet, with severe thunderstorms on the 5th, 14th and 19th, followed by generally fine weather during the last week. Notable incidents in the month's weather were the tornado which visited Birmingham on the 14th and the widespread, severe thunderstorms and floods on that day. In most places the 14th was among the warmest days of the month, maximum temperature in London and the south-east exceeding 80° F. In the Rickmansworth and Chorley Wood district of Hertfordshire the thunderstorm of

the 19th was accompanied by hail of unusual intensity. Mean pressure of the month was slightly above normal in the south, but from 1 millibar to 2 millibars below normal in the north and west. In most districts prevailing winds were south-westerly and generally light or moderate in force. The tornado which occurred in the Birmingham district on the 14th commenced about 14.40 G.M.T. and travelled rapidly from the south to the north-east, causing a very great amount of material damage along its path, which varied in width from 800 to 200 yards. The storm ceased about 15.15 G.M.T. Monthly mean temperatures were below the normal in Scotland and north of England, but elsewhere were above the normal. The extreme temperatures of the month were (England and Wales) 83° F. at Bromley on the 14th, and 32° F. at Bellingham on the 25th; (Scotland) 73° F. at Strathpeffer on the 25th and Arbroath and Montrose on the 27th, and 33° F. at Balmoral, Logie Coldstone, Wolfelee and Eskdalemuir on the 25th; (Ireland) 71° F. at Kilkenny on the 27th, and 41° F. at Hillsborough on the 6th, Markree Castle on the 13th, and at Mountmellick and Newtownforbes on the 25th. Rainfall was much in excess of the normal in most places, and expressed as a percentage of the average for the period 1881–1915 the values were: England and Wales 148, Scotland 193, Ireland 174, and the British Isles 165. The most pronounced deficiency occurred around the mouth of the Thames, and locally in Kent and Essex; Margate recorded only 27 per cent., Dungeness 37 per cent., Shoeburyness 56 per cent. On the other hand, Southport, where the month, with one exception (June 1907), was the wettest June in 61 years' records, had 272 per cent. of the normal. Much flooding occurred during the month as the result of torrential rain accompanied by thunderstorms. At Braunton 59 mm. was measured at 9 h. G.M.T. on the 5th, most of which had fallen since 7 h. At Eskdalemuir on the 14th, 31 mm. fell during the hour 18 h. to 19 h.; the rainfall was reported to have been of an intensity unparalleled in living memory. Severe floods followed, involving the death of a farmer by drowning and the loss of numerous sheep and cattle. Sunshine aggregates were again below the normal. The daily deficiency at Eskdale and Harrogate was 2·4 hours, and at Dumfries and Douglas 2·3 hours. Some outstanding daily records were obtained, among them being 16·6 hours at Deerness, 16·4 hours at Kirkwall, 16·3 hours at Aberdeen, and 16 hours at Gordon Castle and Lerwick on the 25th. Fog was prevalent during the first half of the month and in the south-west of England on the 22nd–23rd.

July, like June, was wet and dull, with widespread thunderstorms. The belt of high pressure which covered the British Isles at the end of June gave way on July 1st before a depression advancing from the Atlantic. From then until the end of the month a series of disturbances followed one another in rapid succession. The fair intervals were of short duration, no district being free from rain for more than a day or two at a time. Monthly pressure means were decidedly below normal as a result of the general cyclonic character of the weather. At Southport the mean pressure was the lowest for July since 1888. Winds were mainly south-west to west, light to moderate in force. Among the highest gusts were 65 m.p.h. at Spurn Head on the 29th, and 62 m.p.h. at Liverpool (Bidston) on the 28th. At most stations mean temperature was round about normal. This was due rather more to mild nights than warm days. Ground frost occurred at Biggin Hill on the 1st, and at Leafield and Hampstead on the 21st. The extreme temperatures for the month were (England and Wales) 80° F. at Shoeburyness on the 12th, and 38° F. at Rickmansworth on the 7th and 21st, and at Cantref (Breconshire) on the 9th; (Scotland) 79° F. at Perth and Stirling on the 9th, and 39° F. at Balmoral on the 21st; (Ireland) 74° F. at Rathfarnham (Dublin) on the 13th, and 40° F. at Killarney on the 9th. The total rainfall for the month exceeded the normal for the fourth consecutive month, the percentage values for the constituent countries and the British Isles being: England and Wales 153, Scotland 136, Ireland 121, British Isles 142. In spite of this general excess, an area including part of north-east Ireland, Anglesea, south-west Scotland and the Isle of Man experienced less than the average. At Rhyl and Llandudno the fall was only about half of the normal. The unusual character of the month is shown by the following facts: at Redruth it was the wettest July since 1888, at Newquay by far the wettest July for 39 years, at Strelley only July 1888 and 1915 had more rain, and only three Julys less sunshine, and at Swyncombe House near Henley-on-Thames the month's total of 6·24 inches was equal to more than 50 per cent. of the fall for the previous six months. Among the heaviest daily falls were 53 mm. at Hawkshead on the 3rd, and Crossdovey (co. Cavan) on the 13th, 52 mm. at Nettlebed (Oxon) on the 14th, and 51 mm. at Oving House (Bucks) on the 7th. Many falls of hail were reported, and flooding due to the torrential rain caused much dislocation of traffic. Thunderstorms were reported on no fewer than 19 days during the month, and this accounted for a large proportion of the total rainfall at most stations. Sunshine was very much below normal in all districts, the deficiency approaching 50 per cent. in places. The brightest days generally were the 1st, 3rd, 7th, 9th, 11th and 23rd, on each of which at least twelve hours of sunshine were recorded over a wide area. Coastal fog occurred occasionally during the month, mainly on the northern and south-western coasts. Aurora was observed at Gordon Castle on the 3rd.

August was wet, cool and dull in England and Wales, and sunny and dry in west and north Scotland and outlying islands. In England a spell of thundery weather was experienced from the 3rd to 5th, the storms being accompanied, especially in the south, by heavy local rain and flooding; on the 5th 74 mm. fell at Petersfield in an hour, and in the evening about 25 mm. fell on the roof of the Air Ministry in half an hour. Meanwhile in the west and north fair sunny weather prevailed. Subsequently, cool northerly winds with cloudy weather and occasional rain prevailed, except in the extreme west, where conditions on the whole were fairer. Heavy rain fell in eastern England on the 8th. Cool north-westerly winds prevailed during the next few days. About the 13th conditions changed, and became very unsettled, with frequent thunderstorms and almost daily rain until the 21st. Little or no rain fell after the 22nd. On the 24th a deep depression caused severe gales in the English Channel, the wind in a gust reaching a speed of 79 m.p.h. at Pendennis. By the 26th anticyclonic conditions became established over

most of the country and excellent sunshine records were obtained in several parts during the last few days of the month. The mean pressure of the month was very uneven, for while in the Shetlands it was 10 millibars above normal, there was a deficiency of 3 millibars in the extreme south of England. Winds were mainly northerly to easterly, and in general mainly light to moderate, but in the English Channel there was a prevalence of strong winds and gales. With very few exceptions, mean temperatures were below the normal. The only really warm days occurred from the 3rd to 5th. The extreme temperatures of the month were (England and Wales) 81° F. at Hartest on the 5th, and 32° F. at Rhayader and Rickmansworth on the 26th and Newton Rigg on the 31st; (Scotland) 81° F. at Onich and Ardtornish on the 4th and at Glenbranter on the 5th, and 31° F. at Dalwhinnie on the 24th and at Braemar on the 30th; (Ireland) 79° F. on the 4th and 33° F. on the 25th at Markree Castle. The month was the fifth consecutive month in which the general precipitation exceeded the normal, and completed one of the wettest summers in England and Wales since comparable records began. At Greenwich Observatory the month's fall of 159 mm. was 284 per cent. of the normal, while in the Shetlands less than 10 per cent. of the normal was recorded. Among the largest daily falls were 155 mm. at Black Sluice and 145 mm. at Grand Sluice, Boston, Lincolnshire, on the 8th, 82 mm. at Jersey on the 25th, and 77 mm. at Nailsworth (Glos) on the 4th. August was a month of scanty sunshine except notably in the west of Scotland and the extreme north of Ireland. Much fog occurred during the early days of the month and from the 26th to 28th. Aurora was reported from Skye on the 7th, and a funnel cloud was seen at Newquay in the early afternoon of the 22nd.

The weather of *September* was rather cold and dull. Apart from warm days at the beginning and about the middle of the month, the days were generally rather cold. During the first four days of the month there was abnormally heavy rain, but afterwards it was mainly dry but dull. On the 1st day temperatures of about 70° F. were recorded at several places, and thunderstorms were widespread on the 2nd and 3rd, and local on the 4th, 5th and 7th. From the 6th there was a period of cool and mainly fair weather until the 10th, when a secondary depression south of Ireland moved south-east, and rain occurred locally on the 11th and 12th. By the 15th an anticyclone covered the British Isles, and temperature again rose to round about 70° F. at many places on the 15th, 16th and 18th. Winds became northerly, and a change to cooler conditions occurred about the 20th. Slight rain occurred in Eastern England on the 22nd and 23rd. As the anticyclone moved eastwards the weather became increasingly overcast, and rain set in in the west on the 29th and spread to other districts on the 30th, with warmer conditions in the south.

Monthly mean pressure was above normal in all districts, while winds were mainly north-westerly to north-easterly, light to moderate in force. Gales were recorded in exposed places, and on the 4th gusts of 60 m.p.h. at Scilly and 56 m.p.h. at South Shields were recorded.

Mean temperature for the month was generally below normal. In the east and south-east of England the deficit ranged from 3° F. to 4° F. At Hampstead (London) the mean temperature, 52·3° F., was the lowest for September since 1912. Ground frost was widespread during the period 5th to 13th, and in Scotland between the 20th and 23rd. The extreme temperatures of the month were: (England and Wales) 73° F. at Huddersfield and Attenborough on the 1st and 29° F. at Rickmansworth on the 7th and 8th, at Rhayader on the 8th, at Castleton on the 10th, at Houghall on the 11th, at Appleby on the 11th and 13th, and at Bellingham on the 13th; (Scotland) 72° F. at Arbroath on the 15th and 24° F. at Eskdalemuir on the 11th; (Ireland) 70° at Cork on the 1st, at Kilkenny on the 15th, and at Rathfarnham on the 1st and 17th, and 30° F. at Markree Castle on the 11th. The outstanding feature of the month's rainfall was the heavy falls of the first four days, which caused severe and widespread floods. Among the heaviest falls were 42 mm. at Cantref (Brecknock) on the 1st, 40 mm. at Burnley on the 2nd, 89 mm. at Newcastle (Wicklow), 81 mm. at Rathfarnham on the 3rd, and 127 mm. and 126 mm. at Castleton and Kildale (Yorks) respectively on the 4th. In Scotland, rainfall was generally much below normal, and at Deerners, Achnashellach and Glenquoich it was the driest September since 1894. While most of Ireland had less than the normal, Dublin had two and a half times the normal.

Sunshine totals were everywhere below the normal, the loss being most pronounced in the Midlands and north of England and in the lowlands of Scotland, where the mean daily duration of sunshine was in several places less than 2½ hours. At Southport it was the dullest September since before 1896.

Aurora was observed in Scotland on five occasions, that on the 21st being observed as far south as Leuchars.

STORMS AND FLOODS IN 1930-31.

October 9.—A dyke on the left bank of the river Néthe, near Lierre, gave way, leaving a gap 45 feet wide, and 25 acres of ground and houses were flooded. 14. As the result of heavy rains, serious floods occurred in various parts of France. In the valley of the Meuse the water was in some places up to the level of 1910. A terrific wind, lasting only a few minutes, occurred near Grenoble. Many cottages were unroofed and nearly 6,000 broken walnut trees lay on the ground. 26. Floods at Smyrna, following heavy rains, caused the death of 40 persons and about 100 houses collapsed. A heavy north-westerly gale in the Gulf of Lyons delayed and damaged shipping. At Montpellier heavy rain and floods caused a row of houses to collapse. 28. Government House, Madras, was struck by lightning, and considerable damage done. 30. Further heavy rain in Smyrna caused 2,500 families to be rendered homeless by floods.

November 4.—A 100-mile-an-hour gale caused much delay to shipping in the Atlantic. 10. A cyclone struck the island of Kyaukpyu, near Akyab, wiping out the town and its suburbs. 19. Many persons were killed and injured at Bethany, Oklahoma, when the town was struck by a tornado. 21. An express train was derailed between Oudon and Clermont-sur-Loire, due to a subsidence of the track caused by heavy rain and flooding of the Loire. 22. A violent storm

accompanied by torrential rain raged over northern, central and western France. Many low-lying stretches of country were flooded. Persistent rain caused many rivers in Belgium to overflow, and at some places near Mons the fields were 3 feet under water. 23. Many people were injured as the result of a severe storm which swept Vienna. Heavy rain over the greater part of France extended the floods which had already occurred. At Le Mans the Sarthe reached the highest level since 1881. Much damage was done in Germany by a storm. The gale reached hurricane force. A hurricane of short duration and small radius passed over the Fiji Group, and much damage was caused on the island of Ovalau.

December 16.—During a severe snowstorm the schooner *Warren M. Colp* was lost at Burnt Point, Newfoundland. Four of the crew were lost. 17. A violent hurricane, with heavy rain, broke over Algiers and raged for three days. Much loss of life, and damage to property occurred. At Blida 5 inches of rain fell in 24 hours.

January 7.—Exceptionally heavy rain in Pretoria caused damage estimated at £10,000 to the roads and sidewalks. 17. Snow fell in Algiers for the first time for seven years. 19. More than 50 persons were injured in a railway collision, at Readville, during a heavy snowstorm. 22. The Russian steamer *Zavaslia* foundered in the Black Sea during a violent storm. The crew of 36 as well as the 14 passengers were drowned.

February 5.—Unusually heavy rains in the south-eastern districts of Queensland caused serious floods. Large areas of Brisbane were under water. The Brisbane River reached its highest level for 30 years. Fourteen inches of rain fell in 24 hours on the Tweed River, seriously flooding the important towns of Lismore and Murwillumbah. 7. During a sudden and heavy snowstorm in New York, a ferry carrying 200 passengers was rammed by the steamer *Marion*, while crossing the Hudson. 13. Much flooding occurred at Valcov on the Danube. Out of 1800 houses only about 100 remained unflooded, and many collapsed. 22. Much damage was done to shipping by a gale in the Mediterranean. A storm of great violence broke over Sicily and Southern Italy. Torrential rain caused much flooding. Severe snowstorms and the subsequent drifts cut off several of the Alpine regions. 26. Eighty people were killed by a hurricane in the Ba district of Fiji, and 100 in Singatoka. At the hill station of Nadarivatu 84 inches of rain fell during the week; the Ba River rose 40 feet. About 20 per cent of the sugar crop was damaged.

March 4.—Storm and exceptional tides did much damage along the Atlantic Coast. In New England the damage was estimated at $3,000,000. 8. The Seine, which had been steadily rising for some days, overflowed its banks in the suburbs of Viry-Châtillon and Villeneuve-Saint-Georges. The level of the river at the Pont d'Austerlitz was about 17 feet above the normal. Heavy gales and torrential rain swept New York and New Jersey. Seven people were killed and many injured. 19. A severe storm 12 miles west of Algiers unroofed houses and uprooted many trees.

April 11.—During a storm off the south-west coast of Korea, 125 fishermen were drowned. 20. Thirteen inches of rain fell in the previous 48 hours near Hong Kong. The railway line at Taipo was undermined and 11 persons were killed in a railway accident. 25. Vilna was seriously flooded owing to the River Vilia rising 17 feet above normal.

May 7.—Heavy rains and an unusually rapid thaw caused much flooding in Sweden. Torrential rains flooded large areas in South Germany. 27. Thunderstorms damaged vineyards and fruit trees in the Rhine valley.

June 11.—A tornado which struck North Adelaide did many thousands of pounds worth of damage. The roofs of over 100 houses were torn off and some houses were wrecked. During a thunderstorm over the western end of Jamaica, six persons were killed and twenty-one injured by lightning. 14. During a sudden storm the French steamer *Saint-Philibert* capsized about five miles off Saint-Nazaire; between 300 and 402 persons were drowned. 19. Three persons were killed, more than 80 injured, and about 130 houses damaged, when a hurricane of the whirlwind type swept up the valley of the Else, in Westphalia.

July 6.—Four persons were killed in a violent cyclone at Sydney. The wind reached a velocity of 70 miles an hour and 5 inches of rain fell in 18 hours. 8. After a long drought there were heavy rainstorms over Denmark. The hay crops were spoiled and many bridges were carried away. 21. During a gale which did great damage to the town of Lublin (Poland) three people were killed and about 25 injured.

August 1.—A typhoon, with the record wind velocity of 136 m.p.h., struck Hong-Kong, doing much minor damage. 4. Severe floods in China, reaching in parts to a depth of 15 ft., rendered about 80,000,000 people destitute. The floods are likely to last for several months. A thunderstorm of exceptional violence caused 12 deaths and great material damage in Northern France. 6. A cloudburst caused extensive damage in the Valle Aurina to the south-east of Brenner Pass. 9. A violent storm which swept the coast in the neighbourhood of Toulon caused great damage and the loss of a number of lives. 12. Thousands of persons were rendered destitute and many drowned as the result of floods caused by the monsoon in the Malvan district of Bombay. 23. Floods on the River Murray caused many thousands of pounds worth of damage to settlements and townships in South Australia. The floods reached a depth of 11 feet A violent rainstorm drenched Gothenburg, and the Sahlgren Hospital was completely flooded. The damage amounted to about £5,500. 25. Torrential rain caused the River Lys to overflow and much flooding occurred in Eastern Flanders. Many small farmers lost their harvest.

September 2.—A typhoon which struck Hong-Kong did great damage to fishing fleets. About 200 Chinese were drowned. 8. Several miles of the Canadian Pacific main railway line were swept away by the flooding of the Columbia river in the Rockies. 10. More than 800 people perished in a hurricane which struck Belize. Hardly a house escaped damage, and the progress of the storm reached as far as 50 miles inland. 14. Four persons were killed when a severe storm swept over Timisoara, Rumania. 16. A hurricane struck the city of Vera Cruz and wrecked a number of ships in the harbour, and some damage was done to property. 26. A typhoon in Japan caused the heaviest rainfall recorded in Tokyo for 17 years. Landslips damaged many houses in adjoining districts and 16 people were killed.

BRITISH ASSOCIATION.—The British Association for the *Advancement of Science* held its Centenary Meeting in London from Sept. 23 to Sept. 30. General the Rt. Hon. J. C. Smuts, who succeeded Prof. F. O. Bower as President, delivered an address in which he described the trend of modern science as leading towards a less materialistic and more "organic" conception of the universe. The world, he said, consists not only of electrons and radiations, but also of souls and aspirations. Beauty and holiness are as much aspects of Nature as energy and entropy, and an adequate world-view would find them all in their proper context in the framework of the whole. Evolution was, perhaps, the only way of approach to the framing of a consistent world-picture which would do justice to the immensity, the profundity, and the unutterable mystery of the universe.

The Presidents of the various sections, and the subjects of their addresses, were as follows:—*A*, Mathematics and Physics, Sir J. J. Thomson, "The Growth in Opportunities for Education and Research in Physics during the Past Fifty Years"; *B*, Chemistry, Sir Harold Hartley, "Michael Faraday and the Theory of Electrolytic Conduction"; *C*, Geology, Prof. J. W. Gregory, "Geological Problems Contemporary with the British Association"; *D*, Zoology, Prof. E. B. Poulton, "A Hundred Years of Evolution"; *E*, Geography, Sir Halford Mackinder, "The Human Habitat"; *F*, Economics, Prof. E. Cannan, "The Changed Outlook in Regard to Population"; *G*, Engineering, Sir J. Alfred Ewing, "Power"; *H*, Anthropology, Prof. A. R. Radcliffe-Brown, "Present Position of Anthropological Studies"; *I*, Physiology, Dr. H. H. Dale, "The Biological Nature of the Viruses"; *J*, Psychology, Dr. C. S. Myers, "On the Nature of Mind"; *K*, Botany, Prof. T. G. Hill, "The Advancement of Botany"; *L*, Education, Sir C. Grant Robertson, "Educational Development, 1831–1931"; *M*, Agriculture, Sir John Russell, "The Changing Outlook in Agriculture."

The meeting in 1932 will be held at York, under the Presidency of Sir Alfred Ewing.

BEES COUNTED BY RADIO.—The New York Department of Agriculture, Industry and Commerce has worked out a method of counting bees by radio. A microphone is placed in the entrance of the hive, and as the bees crawl home, their feet scrape over the microphone, *generating a current which is amplified*, causing the operation of a counting device. Thus it is possible to take an effective census of the population of the hive.

BIRD SKELETONS FROM LA BREA PITS.—Dr. Hildegarde Howard has completed a census of bird skeletons in the La Brea asphalt pits near Los Angeles, which in the past have gained world-wide fame on account of the existing number of sabre-toothed tigers and other mammals found embedded in them. Of more than 4,100 birds recovered, 69 per cent. are predatory species; and of these, diurnal birds of prey far exceed nocturnal forms—evidence, similar to that yielded by the mammals, that most of the creatures caught in the glaur were in pursuit of others in difficulties. Some extinct forms are in large numbers: 500 individuals of the turkey, *Parapavo*, and more than a hundred of *Teratornis*, a vulture larger than any flying bird of the present day. The caracara, now confined to more southerly regions, is represented by 250 examples. Many species still existing in California occur profusely—the American golden eagle with more than 880 individuals, the California condor 190, the bald eagle 150, the red-tailed hawk 113, great horned owl 104. Ducks and geese are fewer, in all less than 100.

BLACK-NECKED GREBE.—The disappearance of the black-necked grebe as a British breeding bird followed the drainage of the fen area, but its reappearance in recent years shows that it has considerable powers of adaptability. In 1904 it was first discovered to be breeding in Wales, in 1915 in a western lough in Ireland, in 1918 at Tring Reservoirs, and in 1930 in a loch in the Forth area of Scotland. Now Mr. C. V. Stoney and Mr. G. R. Humphreys have found in western Ireland a colony which they estimate to consist of about two hundred and fifty pairs, in a lough not more than two or three miles long and half a mile wide. It has been assumed that the colonists in the British Isles were immigrants from the Continent, where the species breeds in Denmark, Germany, and Livonia. But the presence of the Irish colony makes it possible that the new breeding places may have been peopled from the west rather than from the east.

BLUE GOOSE.—After several years search in Baffin Island for the breeding ground of the blue goose, Mr. J. Dewey Soper has tracked the bird to its home on the Foxe Basin coast, near to the Arctic Circle. The blue goose was one of the few North American birds known only as a migrant. Its wintering grounds were on the coast of Louisiana, and before the breeding season it vanished northward. Mr. Soper began his explorations in 1923, and year after year he continued them, and eventually learned from the natives that the birds were known to breed in large numbers on the tundra beside Foxe Basin. He and two Eskimos pitched their summer camp on a tundra stream near Foxe Basin in latitude 65° 35′ north, and there he found the blue goose in thousands on the Blue Goose plain. His report, published by the Canadian Department of the Interior, gives a complete account of the breeding ground, migration, nests, eggs, and general habits of the bird, which, though for long regarded as a colour phase of the snow goose, with which it associates, now ranks as a distinct species. Mr. Soper's travels in search of the blue goose amounted to 30,000 miles.

BUTTERFLIES' PLACE-MEMORY.—Mr. F. Morton Jones has made a number of experiments in the Royal Palm Shade Park in Florida to check the observations of Mr. William Beabe that zebra butterflies possess memory, sociability and caution. *Heliconia clarithonia* is usually fairly abundant in the Park from mid-January to April. Six roosting places were discovered, and about these, while daylight was failing, the butterflies collected in numbers, making preliminary exploring surveys, and finally settling down for the night. The marking of several individuals showed that for several nights in succession the same butterfly may return to a particular twig. Was the homing due to place-memory or to scent? A simple experiment settled the question. Branches on which a number of *Heliconias* had roosted were removed during the day and placed on another bush. The butterflies returned at nightfall, circled about the old bush, apparently

observed that something was amiss, continued their exploring flights, and finally settled down on twigs in the old roosting bush. Some paused on the transferred twigs, only to leave them again and rejoin the flying group. After dark, 27 were found in new positions in the old bush, and only 1 on the transferred twigs, 10 feet away. Apparently place-memory is the guiding power.

CENTRAL HEATING FROM VOLCANO. — Professor Ponte, the director of the observatory on Mount Etna, has installed a system whereby steam from the volcano has been used to keep the building warm against the severity of winter. Pipes have been fixed deep into the steaming fissures near the principal crater and led into the observatory building, where the natural volcanic heat is regulated by a system of valve and stop-cock. As the strength of the furnace is somewhat out of proportion to the needs of the house, Professor Ponte has installed a system of overflow pipes, safety valves, and alarm whistles which come into operation when Etna begins to overdo the work of central heating.

CLOCK GOING FOR FOURTEEN YEARS. — T. Dieden, of Carlslund, Sweden, has invented a clock that apparently can go on continuously until any part wears out, and has already been running for fourteen years. According to a description in *Engineering*, in its main features it is similar to an ordinary clock, having a driving weight, a train of wheels driving the hands, and a torsion pendulum consisting of a heavy metal disc suspended by a thin steel ribbon. The power is obtained by the ordinary variations of the atmospheric pressure and temperature. The case of the clock contains seven closed elastic metallic boxes of the type used in an aneroid barometer. The lower box is attached to the case, but the column of boxes is otherwise free. The expansion or contraction of all the boxes due to changes in the temperature or pressure is communicated to the top box. When the column of boxes either increases or diminishes in height, the spindle carrying the ratchet wheels always rotates in the same direction and the driving weight is wound up. When the weight reaches its topmost position they are thrown out of action. The pendulum has a period of 7½ seconds, so that the length of the equivalent simple pendulum is about 185 feet.

COLOURED GLASS AND HOUSE FLIES.—Further experiments on the lines described in the 1931 WHITAKER have been made on the susceptibility of house flies, wasps, and bees to coloured glass. Prof. J. W. Munro made a number of tests with the object of finding whether rooms glazed with "Calorex" are freer from insects than rooms glazed with ordinary glass. Calorex glass is of a pale greenish-blue tint, and is designed to afford protection from excessive colour radiation by strongly absorbing infra-red radiation while transmitting the radiation within the visible spectrum. He found that house flies, exposed to sunlight in a box, one half of which was glazed with Calorex and the other with ordinary glass, showed a marked preference for the ordinary glass, the ratio of the numbers of insects in the two halves, averaged over several experiments, being about 9 : 4. These results were verified by other tests in which the insects were not enclosed within the box but were attracted to it by a suitable bait. Wasps and bees were found to behave in the same way as flies. Much of the preference is ascribed to the inequality of temperatures beneath the two kinds of glass, the disparity in insect population being greatest when the maximum temperature differences were observed. That an effect can definitely be ascribed to the colour of the light which has passed through Calorex was demonstrated by an experiment in which bees were enclosed in a glass cylinder, one end of which was closed with Calorex and the other with ordinary glass. By interchanging the glasses an immediate reaction was obtained, the bees moving to the end covered with ordinary glass.

CRAB'S LONG CRAWL.—Professor Greuvil, of the Paris Zoo, who, in collaboration with scientists from Cambridge University, has been studying the movements of sea-fish and crustaceans between the Indian Ocean and the Mediterranean Sea, has revealed the fact that a crab has crawled through the Suez Canal from the Red Sea—roughly 101 miles—in 29 years, an average speed of about 22 inches an hour. The crab in question, *Neptunus Pelangines*, is one of a number of his family specially marked 29 years ago in the Red Sea, and he arrived, still wearing his identity disc, at Port Said.

DAVID DUNLAP OBSERVATORY.—Mrs. D. A. Dunlap and her son, Mr. D. Moffat Dunlap, have decided to erect near Toronto an astronomical observatory, in memory of her husband, a keen student of astronomy. The outstanding feature of the David Dunlap Observatory, as it will be called, will be a large reflecting telescope 74 inches in diameter, made by Sir Howard Grubb. It will be housed in a circular metal building, in the midst of a large acreage which will be converted into a park, to be known as the David Dunlap Park. When the observatory is completed, it will be under the Department of Astronomy of the University of Toronto, while the park will be developed in a scientific way by the Faculty of Forestry.

DYING GLACIERS.—Experiments made on fifty glaciers of the Eastern Alps in Austria show that they, like the glaciers in Switzerland and the Canadian Rockies, are generally retreating. Only one, the Simonykees, in the Venediger group, showed any growth, the reason in this case being that the moraine debris surrounding it protects it from the effects of the sun. The growth was not more than 15 to 26 feet. On the other hand, in the Silvretta group, on the Vorarlberg-Swiss frontier, at the Bielthaler Ferner the glacier had shrunk 183 feet. At the top of the Fermunt Pass the carcass of a horse had come to the surface through the evaporation of the glacier top. Not for decades have horse-driven conveyances crossed this pass. The reduction of the glaciers has been very considerable in the Oetztal Alps in Tyrol; the Rosenkarferner shows a diminution since 1928 of 91 feet, and the Marzellferner 321 feet. The famous Pasterze Glacier, in the Glockner group, has lost in length from 3 feet to 15 feet. The depth of this glacier was found with the aid of seismic instruments to amount to 941 feet. It may be added that the great Nisqually Glacier on Mount Rainier, in Washington, has retreated 1,000 feet in 25 years.

ELECTRICITY FROM THE JORDAN.—Mr. H. J. Shepstone, in the *Engineer*, gives an account of the progress made with the scheme for supplying Palestine with electricity, generated in the valley of the River Jordan. In its passage from its source in Mount Hermon to the Dead Sea, the river has a fall of 3,000 feet, and it discharges more than 5,000,000 tons of fresh water into the Dead Sea daily. The scheme includes the provision of three hydro-electric plants, the first of which is situated at Jisir-el-Mujameh, seven miles south of the Sea of Galilee. For the storage and control of the water two dams and two concrete-lined canals have been constructed, and the first two units of 8,000 h.p. each have been installed in the power-house. Later on a second power-house will be built at Abadieh and a third at Jisir Banah Yakoub, which lie respectively south and north of the Sea of Galilee. Transmission lines will connect the hydro-electric plants with three fuel power-stations at *Jaffa*, *Haifa*, and *Tiberias*, and in the near future, it is hoped, every city, town, and agricultural settlement will be able to obtain electrical energy.

EMBALMED WHALES.—Mr. Percy Stammwitz, an official of the Natural History Museum, South Kensington, has been successful in embalming two whales, each 45 ft. long, and weighing 22 tons, in a Norwegian harbour, and bringing them to England. Immediately after capture the whales were towed as quickly as possible to the port of Aalesund, and there he at once set to work on embalming them. The whales were cleaned, and then packed with salt. Afterwards more than 60 gallons of formalin (embalming fluid) were pumped into their veins in the usual way. For the two whales he used 60 tons of salt and 130 gallons of formalin. The task was carried out successfully, and now the whales look just like crystallised fruit. This is the first time that whales have been embalmed in Europe. They were brought to England lying in salt in the hold of a ship, and each 24 hours they were injected with preserving fluid by means of a hypodermic syringe. It was expected that the whales would last two years.

ESKIMO CHARACTERISTICS.—Dr. Aleš Hrdlička has reported to the Bureau of American Ethnology the results of a journey among the Eskimo, which he made in 1926 for the purpose of an anthropological survey of these people. His conclusion is that the Eskimo throughout their territory are one and the same people. The strain is fundamentally related to that (or those) of the American Indian. It is also undoubtedly related to the yellow-brown strains of Asia. The Eskimo are remarkably alike over their whole territory in such characters as pigmentation, build of body, physiognomy, large brain, fullness of forehead and largeness of face and lower jaw. They differ in stature, form of head, and breadth of nose. Between east and west there is a regular gradation, due to adaptation and differentiation. They suggest a moderate stream of people of fairly broad but moderately high head, of good medium stature with a mesorhine nose, and other characteristics in common, reaching America from north-easternmost Asia after the related Indians, spreading along the coast until blocked by the preceding Indian tribes, and gradually modifying physically in adaptation to environment. The evidence shows that the more highly differentiated and divergent the Eskimo becomes, the greater the gap between him and his Indian neighbour. The facts point, therefore, to the original identity of the source from which the Indian, more particularly the latest branches, and the Eskimo were derived, and to the identification of this source with the palæo-Asiatic, yellow-brown peoples of lower northern Asia.

FACSIMILE TRANSMISSION AT 180,000 WORDS AN HOUR.—A new facsimile transmission system, which, it is claimed, will send 180,000 words from station to station in an hour, has been demonstrated at the International Telephone and Telegraph Laboratories at Hendon. Through a machine on which a number of lights played in and out, sheets of typescript were passed at the rate of one every minute. The receiving machine was in semi-darkness, relieved only by the glow of shrouded red lights. A blue lamp flickered: little points of yellow light glowed within a tube; and to the other end of the machine a long roll of white paper came pouring out. This was taken to a dark room, and a minute or two later perfect facsimiles of the typescript were supplied. The system consisted of scanning the messages in a series of fine parallel lines with a point of intense light. The reflections of light are led to a photo-electrical cell, which delivers signals corresponding in amplitude to the tone value of the picture element. The signals as transmitted are received on photo-electric paper, which can be quickly developed. The first machines to be put on the market will, it is claimed, transmit 120 pages of 1,500 words each an hour—a total of 180,000 words. In this way it will be possible to transmit a complete newspaper from London to Melbourne in an hour.

FISHES LIKE COMPANY.—At the Plymouth Laboratory of the Marine Biological Association Mr. G. M. Spooner has been trying to find out, by means of mirrors held in front of fishes, if they recognised their image and wanted to swim beside it. Sight is believed to have an important influence on the desire of fish to swim in shoals and schools, and Mr. Spooner's fish-mirror tests tend to uphold this theory. By an ingenious trick, he made fish want to swim in line with other fish which were not there, thus proving that fish like company, and therefore swim in shoals. Describing the behaviour of a fish when swimming near a looking-glass, Mr. Spooner says the fish spends a good deal of time swimming to and fro across the mirror surface with its face close against the glass, as though attempting to pass through it. It passes up and down, often making futile snaps at the surface and displaying other reactions characteristic of frustrated effort. Other tests show that fishes group more readily if disturbed or alarmed, and least when hunting for food. Little fishes will group with big fishes, but big fishes will not try to group with little fishes.

FOAMING OF BEER.—Prof. Alexander Findlay has described a number of experiments on the phenomena of the foaming of beer which were made by himself and his colleagues. While the stability of the foam, he says, will depend mainly on surface tension and viscosity, the size of "head" formed under the ordinary condition-

of pouring out a glass of beer will depend mainly on the rate of evolution of carbon dioxide from its supersaturated solution in the beer. This rate varies with the degree of supersaturation, which, in turn, depends on the nature of the beer and the method of its manufacture. A pale ale was found to evolve carbon dioxide more rapidly than a stout or export beer. The rate of evolution, moreover, depends greatly on the walls of the containing vessel and their effectiveness in supplying gas "nuclei" to start the evolution of carbon dioxide. Traces of grease on the surface of the glass are very effective in promoting the escape of gas; and the difference in "head" obtained with a dry and wet glass is probably due to this fact. In the case of a wet glass, there will be an absence of air bubbles on the surface to act as nuclei.

FRUIT MADE TO "SWOON."—A remarkable new refrigerating agent, which is 60 deg. colder than the temperature of the North Pole, is being manufactured at Billingham-on-Tees by Imperial Chemical Industries, Ltd. Known as "Drikold," this material, which is a preparation of carbon dioxide in solid form, resembles in appearance blocks of compressed snow, but since it has a temperature of 144 deg. of frost, it has some four times the refrigerating power of ordinary ice. It is intended to be used for the production of carbon dioxide gas, or as a refrigerating agent, which should last any time up to three months. It is well suited for the transport of fresh fruit. Fruit breathes, and if subjected to a suitable quantity of the gas "swoons," or goes into a state of suspended animation, until it is again exposed to the air. The gas may also be used to replace the usual vacuum for packing materials such as cocoa or tobacco. As a refrigerating agent, its complete absence of moisture enables it to be used in the packing of parcels to be sent by rail or through the post.

GLIDING ACROSS THE CHANNEL.—On June 19 the English Channel was crossed for the first time by a British-built glider with a British pilot, Mr. Lissant Beardmore. The pilot, having been towed by an aeroplane to a height of 14,000 ft. above Lympne, at 4.30 p.m. released his machine and glided in a continuously falling path, landing at St. Inglevert aerodrome just after 6 p.m. He was not, however, officially recognised as being the first person to glide the Channel, since he was prevented from applying to the British Gliding Association for the proper observation of his performance by the anomaly that he did not hold the most advanced of the certificates awarded to glider pilots, and was therefore not judged competent to undertake the feat. Herr Kronfeld, on a German-built machine, accomplished the same flight under official observation, on June 20. He flew from France to England, and thus became the holder of the official distinction. He afterwards made a return glide from Dover to St. Inglevert.

GREENLAND ICE CAP.—Dr. Sorge and his companions on the German Greenland Expedition have, by means of artificial earthquakes, tested the thickness of the ice cap which covers the interior of that country like a dome. Twenty-five explosions were made, and the resulting waves observed. At the Central Station, equidistant 250 miles from Greenland's eastern and western coasts, and on the 72° of latitude, they found, by reckoning the time taken for the return of the explosion wave reflected from the base of the ice-sheet, that the ice was 8,800 ft. thick at 9,840 ft. above sea level. Other members of the expedition working on the border of the inland ice, 38 miles from the coast, found the ice to be from 2,300 ft. to 3,000 ft. thick at 5,900 ft. above sea level. Greenland is therefore, as the late leader of the expedition, Professor Wegener, believed, an ice-filled bowl surrounded by mountains up to 2,000 metres in height. The valley in between falls away to 300 metres, and over this great expanse of rocky ground curves the enormous ice cap, which rises from 100 metres at its outer extremities to 3,000 metres at the top of its arch. Here millions of cubic miles of ice cover the rocky surface. It was Professor Wegener's theory that the conformation of Greenland was caused by this enormous mass of ice, the weight of which had during the ages gradually depressed the interior of the island.

GYROSCOPIC CHECK TO SEA-SICKNESS.—In order to reduce rolling movements to a minimum, and to save passengers from sea-sickness, the new ocean liner, *Conti di Savoia*, which the Italian Lloyd Sabando is building for the Atlantic service, will be equipped with three gyroscopic stabilizers at a cost of £200,000. Each of the gyro-stabilizers weighs 100 tons and has a diameter of 13 ft. They will be placed in the lower hold of the ship under the bridge. When the three big wheels, representing a total weight of 300 tons, are spinning in unison, the gyroscopic power they exert will be sufficient to counteract the motion of this 50,000-ton ship labouring in a heavy sea. The tendency of the ship to roll one way will be met by an opposing force, and the hull will thus be kept steady. It is estimated that the vessel will never roll more than 5 deg., no matter how boisterous the weather. Each wheel is driven by an electric motor of 560 h.p., but the full power will rarely if ever be required. The cost of running all three gyro wheels is estimated at not more than £12 a day.

GYROSCOPE IN WELL-BORING.—In the boring of oil wells many things lead to the deflection of the path of the drill from the vertical, and it is important that the mining engineer should be informed of such deflection. In conjunction with the Sun Oil Company the Sperry Gyroscope Company has now brought out the "Surwel" gyroscopic clinograph. The apparatus consists of a gyroscope with its axis set north and south, a box-level gauge, a chronometer and a film camera, these parts being contained in a steel cylinder 5½ in. in diameter, which can be lowered down the well. The bubble in the box-level shows the inclination; a pointer on the gyroscope gives the direction of the inclination; while the camera, timed by the chronometer, takes a series of photographs of bubble, pointer, and chronometer hands. As the rate of lowering is known, the exact depth at which each camera observation is made can be found, and thus the inclination and its direction can be determined at any given depth. The data recorded on the film can also be plotted on squared paper and a graphic picture of the well's course through the ground can be obtained.

HAIR AND CRIME.—Dr. John Glaister, continuing the researches begun as a study of the

significance of human and other hair in the detection of crime, has made a comparative investigation of the hairs of a large number of mammals. The results appear in "A Study of Hairs and Wools," published by the Faculty of Medicine of the Egyptian University, where the author is professor of forensic medicine. Dr. Glaister concludes that a critical examination of hair will always reveal the mammalian order or sub-order to which it belongs, in a very large number of instances will betray the family, and in many cases the species. If it be a human hair, in an appreciable number of cases it is distinctive of sex, in most cases it can be allocated to its site on the body, and in a very approximate manner may decide the age of the possessor, as very young, adolescent, adult, or aged, provided a number of hairs are available.

IRON ROAD.—The first cast-iron road in the world has been laid on a stretch of about 100 yards of Romford Road, Stratford, E., one of the busiest thoroughfares in London. Triangular plates of iron were laid on bitumen, which had been sprinkled on a concrete foundation. Mr. Frank Hough, the inventor of the new road, claims for the new surface less noise and vibration in all forms of traffic, an absence of skidding, and rapidity of renovation. It is 10*s.* a yard cheaper than the cheapest foreign granite, and it will last 50 years, after which 45 per cent. of the original value of the iron can be made out of the sale of the old road.

LARCH POLES FOR TELEGRAPH LINES.—Experiments have been carried out at the Forest Products Research Laboratory at Princes Risborough in the treatment of home-grown larch poles to render them suitable for use in telegraph, telephone, and power transmission lines. The objections to larch for transmission lines are based on the behaviour of creosoted poles used during the War. It was found that the creosote did not penetrate the pole to any depth, and consequently after erection the poles were liable to crack or split severely. Experiments carried out with poles from the larch woods in Tintern Forest have shown that these difficulties can be overcome. By peeling and making a number of incisions in the poles with a broad knife, a satisfactory penetration of the preservative is obtainable. Although the incisions have a slight weakening effect on their strength, home-grown larch poles so treated are said to be 25-30 per cent. stronger than imported poles of Scots pine of the same dimensions.

MECHANICAL EYE FOR FLYING.—A mechanical eye for aeroplanes, which can find any airway beacon at a distance of two miles in an ordinary fog has been devised by engineers of the General Electric Company. The device involves the use of photo-electric cells. It is mounted in two parts on the tail of an aeroplane. As the aeroplane approaches a beacon the device indicates by one set of signals whether the beacon is to the right or the left of the aeroplane, and by another whether the aeroplane is approaching or departing from it. The two sets of signals, together with altitude readings, make it possible for a pilot to calculate his landing exactly. The "eye" can be set so as to select the beacon desired from among hundreds of others merely by the rate of winking peculiar to that beacon.

MOON'S TEMPERATURE.—Messrs. Pettit and Nicholson, of the Mount Wilson Observatory, have made a series of experiments on the temperature of the Moon, using a delicate thermopile on the 100-inch reflector. They found that the Moon's surface under a vertical Sun has a temperature of 101° C., just above boiling water; at altitudes 60°, 30°, and 10° the temperatures are 88°, 40°, and −30° respectively were registered. During an eclipse of the Moon, a region that was at 60° C. before the eclipse began, fell to −100° when the region entered the umbra; and the return of heat after the eclipse was also rapid, suggesting that the Moon's surface is composed of loose volcanic ash and that the heat only penetrates a few inches below the surface. The temperature at night was found to fall below −150° C. There is thus a range of 250° C. between day and night in the equatorial regions of the Moon; which would tend to disintegrate rocks by alternate expansion and contraction.

MUSIC OF ELECTRIC VIBRATIONS.—The "new music of electric vibrations" was discussed in a paper read by Dr. Goldsmith before the New York Electrical Society. He illustrated it by an electric carillon, which can send out bell tones louder than any bell in the world. A series of small steel chimes, something like those of a household clock, are struck by electric hammers actuated by a keyboard similar to that of a piano. The sounds thus produced are only audible a few inches away, but the vibrations of the steel chimes create small electric currents in devices like the "pick-up" used in electric gramophones. These feeble currents are amplified millions of times by vacuum tube amplifiers, and can be clearly heard in the largest concert hall or for miles round a church tower by means of giant amplifiers. The operator of the electric carillon not only controls the notes to be played, but also can vary the volume of the tone to any desired extent. Dr. Goldsmith believes that the musical artist of the future will become more indispensable. The number of notes which the musician can play per second will not be limited by the speed of his fingers. Tones of any origin can be made to resemble those of any desired instrument by electrical methods. Each musician will be able not only to play the melody, but also to make it sound as if produced by any tyre of instrument. The new electric music will gradually evolve a new type of composer capable of utilising to the full the capabilities of emotional expression contained in electric music.

NEW PHOTO FLASH LAMP.—A fireless, smokeless, odourless and noiseless photographic flash lamp has been developed by the General Electric Corporation, Cleveland, Ohio. It consists of a clear bulb of standard design, filled with oxygen, with the flashlight filament coated with a special preparation, and with a quantity of thin aluminium foil in crumpled sheet form within the bulb. When the circuit is closed, the filament is lighted, and this, in turn, lights the foil. The flash is confined entirely within the bulb. The lamp operates on any 115-volt house supply, or with dry, storage, or flashlight batteries. A new lamp is needed for each flash. Requiring only a one-hundredth of a second to act, and being without hazard, the lamp will

make possible the taking of flashlight photographs in places heretofore practically impossible to "shoot," such as in trains, airships and theatres, and under water, and by insurance companies requiring night photographs in all weather conditions.

NIAGARA NOT "COMMITTING SUICIDE."—An international board of engineers, appointed in 1926 by Canada and the United States to study the past, present, and future of Niagara, has presented its final report, with a message of reassurance to those who have predicted the extinction of Niagara at a comparatively early date. The board finds quite unwarranted the statement that the famous cataract is "committing suicide" by degenerating into a mere cascade. These engineers find that the cliff now is cutting back at a decreasing rate; that the rate will continue to decrease; that in a century or two there will be little apparent difference in the Falls; and that inevitable recession will not endanger the Falls in less than 2,000 years. Certain remedial steps are recommended for the even diffusion of water over the shallow rims of the great horse-shoe. In recent years a great deal of water has been diverted for power purposes, but it is claimed that, by diverting to the flanks part of the deep stream which pours over the centre of the cataract, the beauty of an even and far-flung torrent may be maintained for many centuries.

NOISE MEASURED IN "DECIBELS."—A series of experiments in the measurement of noise has been conducted at the National Physical Laboratory at Teddington. A scale of measurements of loudness has been invented, zero being known as the "threshold" or point at which a noise becomes easily perceptible to the human ear. Degrees above this are calculated in "decibels," based on the fact that while loudness in the ear advanced by simple addition, the energy corresponding increased geometrically. Each "decibel" represents approximately the least change in loudness which the ear can detect. A table of noises has been worked out as follows:—

Home noises:	
Quiet whisper	10 decibels
Quiet garden	20 ,,
Clock ticking	30 ,,
Soft radio music	40 ,,
Conversation	50 ,,
Loud radio speech	60 ,,
Loud radio music	70 ,,
Restaurant noises:	
Quiet restaurant	40 decibels
Moderate clatter	50 ,,
Average music	60 ,,
Noisy clatter	70 ,,
Loud music	80 ,,
Street noises:	
Quiet suburban	30 decibels
Quiet London	40 ,,
Quiet car passing	50 ,,
Moderate London traffic	60 ,,
Accelerating traffic	70 ,,
Motor horn	80 ,,
Pneumatic drill	90 ,,
Vehicle noises:	
Saloon car (25 m.p.h.)	40 decibels
Quiet tram (windows shut)	50 ,,
'Bus, train	60 ,,
Tram, 'bus, train (windows open)	70 ,,
Quiet aeroplane	80 decibels
Noisy Tube train	90 ,,
Noisy aeroplane	110 ,,

It has been calculated that a Cup Final crowd of 100,000 at Wembley Stadium, all talking continuously and rather loudly, would provide as much speech-power as would, if converted, light a small electric lamp throughout the game. Alternatively, by the end of the match the acoustical energy expended would have been sufficient, if transformed into heat, to make one cup of tea. New York traffic noises, both in the street and in the underground car, are about ten decibels louder than in London. Lions and the Niagara Falls roar equally loudly. But the arch offender of all is the aeroplane engine at close quarters.

OCEAN BED SHIFTED.—The United States Coast and Geodetic Survey has confirmed the observations of Captain David Bone, commander of the Transylvania, that the ocean bed off Georges Bank, which is in the track of the great liners between Europe and New York, had shifted. An earthquake in 1929 shook the Atlantic seaboard from New York to Nova Scotia and Newfoundland. Subsequently Captain Bone made the discovery that the ocean bed, in an area approximately in latitude 41·20 north, longitude 66·20 west, had moved. Three attempts to touch bottom were without success. He anticipated that he would find a depth of 55 to 85 fathoms. He lost two lead lines with no results, and the third lead was paid out to 200 fathoms in another futile attempt at sounding. In subsequent experiments by sea surveyors, however, a new depth of more than 350 fathoms was charted.

OIL-WELL 10,030 FT. DEEP.—The long projected depth of a 10,000 ft. oil-well has been reached by the drilling of a hole to 10,030 ft. in Ventura County, California. This establishes a record, and it is anticipated that American oil-engineers will not rest content until a two-mile hole (10,560 ft.) has been drilled.

OLD ENGLISH MILE.—In a paper in the *Geographical Magazine*, Lt.-Col. J. B. P. Carslake shows that the old English mile was not less than 11 furlongs. This can be proved to be the mile of 1,500 paces. It was identical with the *leuga*, the common unit of maximum linear measurement in early Saxon times. It was introduced into England in the first century B.C., and it is the measurement used in the Domesday survey. Apparently it was replaced by the mile of eight furlongs by the use in Saxon times of the Roman mile of 1,000 *passus*, divided into eight *stadia*. So early as the ninth century, the *stadium* became the equivalent of the furlong. This mile of eight furlongs was adopted by the Post Office on its establishment in the reign of James I. for the determination of rates of horse hire for postal purposes. Thus mile-stones eight furlongs apart were set up, and this mile became the accepted standard of measurement in Great Britain.

ORIENTATOR.—An instrument known as the "Orientator," for enabling architects and builders to determine visually from plans the direction in which the sun's rays will fall on any window or wall during summer or winter, has been produced by Messrs. Cooke, Troughton and

Simms. It consists of a flat metal ring, to the central end of a radius of which is attached a thread which ends in a ball representing the sun. A portion of a second ring (which, if complete, would form a short cylinder), is fixed to it at such an inclination that if the first ring is horizontal the edges of the second follow respectively the paths of the sun in the sky at the summer and winter solstices. The instrument is placed on the plan with the centre of the horizontal ring over the window or wall and with an appropriately marked point in the north direction, and the thread is stretched by holding the ball between the fingers. When the thread rests against an edge of the inclined ring (on which a scale is engraved giving the hours of the day) its direction is therefore that of the sun's rays at the corresponding solstice. Observation of the plan from above then shows immediately what obstacles to sunlight are encountered. The instrument can be supplied for any latitude, north or south. It weighs 1 lb. and is 6 in. in diameter at the base.

OZONE AND THE WEATHER.—In a discourse at the Royal Institution an ozone and its relation to meteorology, Dr. G. M. B. Dobson described the chief results which have been obtained from researches on the ozone in the upper atmosphere carried out in many parts of the world during the last five years. The ozone, which is situated at a height of some 50 km. above sea-level, has a well-marked annual variation that is different in different parts of the world. At all places outside the tropics, there is a maximum in the spring and a minimum in the autumn, the range being greatest in high latitudes and least in low latitudes. In temperate regions there are large changes from day to day which are closely related to the weather conditions, cyclones and anti-cyclones each having their own characteristic distribution of ozone. The ozone in the upper atmosphere is responsible for shielding the earth from intense ultra-violet radiation from the sun, which would cause serious effects if it reached the surface. It further causes the upper atmosphere at a height of 40-50 km. to be at a temperature in the neighbourhood of the normal boiling-point of water. This, in its turn, gives rise to the zones of abnormal audibility of sound from large explosions at a distance of some hundred miles from the explosion itself.

PARAGUTTA.—For nearly 80 years the standard materials for insulating deep-sea cables have been gutta-percha and balata. In the *Bell Laboratories Record* Mr. A. R. Kemp gives a description of a new material, Paragutta, with which the new telephone cable between the United States and Cuba is insulated. Paragutta is a mixture of about 50 per cent. gutta-percha, 40 per cent. rubber, and 10 per cent. hydrocarbon wax. Its mechanical qualities are fully equal to those of gutta-percha, its electrical stability in water is the same, but it has much better specific electrical properties. The mixture can be extruded on to the conductor in a continuous sheath of multiple layers free from mechanical defects. The insulated conductor has then only to be drawn through cold water, when it quickly sets into a firm covering sufficiently tough and flexible to resist rough handling in factory or cable ship. The specific conductance of Paragutta is only one-thirtieth of that of ordinary cable gutta-percha, and its dielectric constant is 20 per cent. smaller. It is claimed that if Paragutta had been available to insulate the permalloy-loaded telegraph cable laid five years ago its speed would have been 30 per cent. greater, and its revenue-earning capacity increased 30 per cent.

PARASITES TO DESTROY A WHEAT PEST.—A cargo of 90,000 insects has been sent from England to Canada to wage war on the wheat-stem sawfly, which is Canada's most deadly wheat pest. They are grubs of the sawfly, and about 60 per cent. contain parasites—smaller insects which will ultimately destroy their hosts. The insects will go at first to the parasite breeding laboratories at Belleville, Ontario, and will afterwards be released in the Canadian wheatfields, where the parasites will be passed on to the local sawflies, and by this means it is hoped that the wheat pest will eventually be eradicated. Some parasitised sawflies, released in the summer of 1930 in Western Canada, have settled down well in their new surroundings, and the lesser fleas are biting the little fleas to some purpose.

PEKING MAN.—In an address on "Peking Man," delivered before the British Association, Prof. G. Elliot Smith said that the discoveries still being made at Chou Kou Tien, near Peking, only confirmed the profound significance of the skull found in December, 1929. The skulls of the Peking man were of unquestionable geological age (Early Pleistocene), and their qualities were not due to reconstruction. While definitely more primitive and generalised than *Pithecanthropus* and *Eoanthropus*, they revealed characters not hitherto known except in those, and gave coherence and conviction to our knowledge.

PHOTOGRAPHING THE EARTH'S CURVATURE.—Captain A. W. Stephens, of the United States Army Air Corps, whose photograph of Mount Ranier, taken at a distance of 270 miles, was described in the 1931 WHITAKER, has since succeeded in taking what is described as the first photograph to show the curvature of the earth's surface. It was taken from an aeroplane over a small town in South America. By using super-sensitive plates he succeeded in photographing what was invisible to him, a range of the Andes some 300 miles distant and the peak of the volcano Aconcagua, 320 miles distant, as well as the unbroken Pampas intervening. The mountain range appeared as a straight horizontal line, but the distant horizon of the Pampas was not straight, but bent slightly downward at one end.

PHOTOGRAPHING THE STOMACH.—A camera which takes flashlight photographs of the interior of the body is the latest application of photography to medical uses. It is the invention of two Austrian scientists, and has been demonstrated with success in London and the United States. The apparatus consists of a semi-flexible tube, carrying at one end 16 minute pinhole cameras, divided into two groups of eight each, and the resulting photographs can be pieced together to give a complete map in 16 sections. The tube is $\frac{5}{8}$ in. in diameter, and the cameras occupy a space of about two inches. The patient swallows the cameras, which are

introduced by means of the tube. Between the two groups of cameras is a source of light operated by the transformer. This yields a flash for the duration of 1-120th of a second. Through the tube are passed two wires, one for the flash and the other to operate the shutter which uncovers the 16 pinholes of the cameras. The films used are about the size of a piece of confetti, and the photographs have to be enlarged one hundred times. The value of the instrument will, it is hoped, lie in enabling cancer and other diseases to be recognised at a stage where present methods of diagnosis are inconclusive.

RAIL-ZEPPELIN.—The Rail-Zeppelin, a propellor-driven coach, invented and constructed by Dr. Francis Kruckenburg, has made a trial run on the ordinary railway track between Berlin and Hamburg, over a distance of 161 miles, during which it attained an average speed of 105 miles an hour and a maximum of 143 miles an hour. The coach is 85 ft. long and stream-lined throughout. It is built of steel, aluminium, wood and fabric, and weighs 18 tons. The engine is of 500-h.p., capable of getting up a speed of 80 miles an hour within two minutes of starting. There are two compartments, one for smokers, and a luggage room and vestibule. It has accommodation for 40 passengers. Dr. Kruckenburg claims that the speed of 143 m.p.h. is by no means the maximum of the Rail-Zeppelin's possibilities, but he was obliged to keep within this limit in order to comply with the requirements of the State Railway.

RESTFUL SLEEP.—Investigations at the Mellon Institute, Pittsburgh, by Dr. H. M. Johnson, on movements during sleep, show that the healthy adult during deep sleep makes some gross change of bodily position on an average every 7–8 minutes. Every sleeper has a dozen or more very different poses in which he takes his rest. On any typical night he will make use of all, or nearly all, of this dozen, changing from one to another twenty to sixty times, according to his sensitivity to various kinds of bodily irritation. Among different persons, some have a strong preference for supine positions, others favour prone ones. By means of an ingenious device, photographs were obtained of every change of position assumed by a sleeper during a night, and show an extraordinary range of positions.

RINGED PLOVER AND ITS EGGS.—A series of experiments relating to the eggs of the ringed plover has been carried out by Mr. George Marples in an area where he had more than forty nests under observation. When the eggs were removed a short distance from the nest, the birds found them and dragged them back; but they also dragged and sat on egg-shaped pebbles which had been painted to resemble their own eggs. The disguising of the shape of their own eggs by adding lumps of plasticine did not deceive them, nor did painting the eggs with bright yellow, blue and red. The theory that the ringed plover keeps its eggs in the positions of the cardinal points of the compass was tested, with the result that after the deliberate derangement of the clutches in 121 cases, it was found that 80 were rearranged exactly north and south, 11 were nearly but not quite restored to the cardinal point position, and 30 clutches remained in disarrangement, north-east and north-west. Tests with various scents placed on the eggs indicated that the birds were deficient in sense of smell.

RUBBER STATUES.—Public statues made of rubber are a practicable possibility of the future, as the result of tests made by the Dunlop technical staff for the memorial tablet to the late J. B. Dunlop, in Belfast. The memorial was made from a solid block of ebonite, or hard rubber, weighing 270 lb., of which 70 lb. were removed by the sculptor in chippings and shavings. The block was built up from layers of unvulcanised ebonite under a roller weighing 5 cwt., and trimmed to fit a special steel mould, where it was placed under a pressure of 250 tons and "cooked" for more than 110 hours. The portrait of Dunlop was pointed off from a full-sized clay model, and the lettering was done by a burr with six microscopic cutting edges, such as is used by dentists in preparing teeth for filling. For cutting and carving the block was perfect throughout. It did not vary in density or colour, and it was capable of being freely cut without cracking, giving a good sharp finish.

SAFETY CABLE IN MINES.—A cable has been invented by Dr. A. G. Allsop, at the Safety in Mines Research Board laboratory in Sheffield, which, it is claimed, may enable miners to discard the small hand lamps and work at the coal face under the glare of flood lighting, and result in the abolition of nystagmus—miners' eye disease. Dr. Allsop's cable differs from the ordinary electric cable in that a screen of fine wires forms a sort of cage round the main cable, and if any one of these wires breaks, by being run over by a tub or otherwise injured, the current through the main cable is automatically switched off. Only a small current runs through the screen wires, and if these are damaged the current is not enough to cause a spark capable of igniting fire damp.

SKYSCRAPER TO SWAY IN THE WIND.—The highest skyscraper in the world is the Empire State Building in New York, which was formally inaugurated on May 1, 1931, by President Hoover, in Washington, pressing an electric key. The structure has been erected on a site previously occupied by the Waldorf Astoria Hotel. The office building proper has eighty-six stories and is 1,048 ft. high to the base of the mooring mast for dirigibles, and 1,248 ft. high to the top of the mast. It will have a working population of 25,000 persons when fully occupied. There are more than 10,000,000 bricks in the building, and 57,000 tons of steel, enough to build a double-track railway from New York to Montreal. There are also 6,400 windows and 58 lifts, which journey through seven miles of shafts. A lift takes 50 seconds to make a non-stop trip to the eightieth floor. The steel cage of which the skyscraper consists is so arranged that when the wind blows it yields slightly, but at the same time it locks together more strongly than ever. It has been calculated that the wind pressure on any one face of the Empire State Building may rise to 4,340,000 pounds, and that the swaying motion of the skyscraper in a strong wind will take four seconds.

SOIL HEATED BY ELECTRICITY.—A successful experiment has been made by engineers

connected with the Southern California Edison Company, in the use of electricity to heat the soil round plants so as to force their growth, and so place the product on the market at an earlier date and at a higher price. Two exactly similar plots of land were taken. One had insulated wires running through it about 4 ft. apart and at a depth of 8 in. The current in the wires was regulated by a thermostat so as to maintain a temperature of about 70° F. Current flowed on an average two hours out of every five. The other plot was prepared in the same way, but was not electrically heated. Cucumber seeds were planted in both plots, in rows about 4 ft. apart. It was found that more than one half of the crop in the wired portion had matured and been marketed before the first cucumber had reached maturity in the unheated plot. The net revenue obtained from the electrically heated plot was about £20 greater than from the other.

STARLIGHT TO START MACHINERY.—Rays of light from Arcturus, which left that star during the Chicago World Fair of 1893, are to be captured, converted, amplified, and used to start machinery in the Hall of Science at the opening of the World Fair in Chicago on June 1, 1933. It is hoped to accomplish this feat by collecting the light rays in a 40 in. telescope and passing them through a photometer connected with an electrometer, which in turn will be connected with the switches controlling the machinery.

TALKING BEACON.—Messrs. Charles A. Stevenson and David Alan Stevenson, engineers to the Northern Lighthouse Board, have been awarded the Thomas Gray Memorial Trust Prize of £100 for their invention of the "talking beacon." This "talking beacon" which is installed at Cumbrae Lighthouse on the coast of Ayr, consists of a combination of fog-signal and wireless transmitter, and enables a ship fitted with even the simplest form of wireless receiver to ascertain her distance from the lighthouse up to about five miles in thick weather. The fog-signal consists of three blasts, followed by a short silence, and then two further blasts. At the same time, on a wireless receiver, a listener hears—(*a*) the name of the "beacon" in speech (Cumbrae); (*b*) the three blasts of the fog-signal; (*c*) counting in speech in cables and sea miles up to five miles; and (*d*) the two blasts of the fog-signal. This is followed by a silent interval lasting 27 secs., and is then repeated. Immediately before each mile is spoken a bell is sounded. The distance which the observer hears in his receiver coinciding with the end of the third blast heard through the air gives him the distance of his ship from the lighthouse. The spoken words in the signal emanate from a gramophone record, which revolves on a turn-table, which in turn is engaged and disengaged by means of a clutch with another turn-table kept constantly revolving by air turbine or motor.

TELEGRAMS BY TYPEWRITER.—The General Post Office is setting up the first teleprinter exchange, by which a person sitting in his own office may send telegrams privately, or get into communication with other subscribers and carry on written conversations with them. When subscribers wish to get into touch with each other they will type out an exchange number which will then be automatically switched on. Fifty words a minute is a low estimate of the speed which may be obtained by a proficient operator on the teleprinter. There will be ample opportunity to attain a high rate of speed, since subscribers will become their own telegraphists, the speed of the instrument being limited only by the operator's abilities. Among the advantages of the system are that a typed record is kept of all messages at the sending and receiving ends; there is great speed of communication, secrecy, and the possibility of sending messages even if there is no attendant at the instrument of the called subscriber.

TELEVISION PROGRESS.—The prophecy that "television will soon be in every home" seems likely to be fulfilled in the United States and Great Britain in the next few years. In the United States a transmitting station of enormous power, which will be used in connection with the National Broadcasting Company of America, is being erected, and it is expected that in 1932 television will be installed in thousands of American houses. The first television wedding, that of Mr. Frank Borie du Vall, an engineer, and Miss Grace Lilian Jones, took place in New York. It was conducted in a skyscraper studio, and hundreds of television enthusiasts "looked in," and thousands of wireless-set owners listened in. Mr. J. L. Baird's plans to televise the Derby race—for the first time in history—proved a great success. Seven televisors were equipped and connected up with the Baird Studios. *Punctually at 2.45 the first actual scenes came* filtering through; these clarified after the race had started, and within a few minutes Cameronian, Orpen and Sandwich were to be seen quite distinctly passing the winning post. The surging crowds, and the faces of the owners and their friends as they came forward to lead in the victors, were clearly seen. Mr. Baird has since announced that by improving the optical system and by adopting a more efficient method of "scanning" it has been possible to double the width of the pictures and show scenes with as many as eight full-length figures. This opens up the opportunity of increasing the entertainment value of the programmes.

TEN MILES HIGH.—On May 27, 1931, Prof. A. Piccard, of the University of Brussels, accompanied by Herr Kipfer, ascended at 4 a.m. from Augsburg, Bavaria, in an airtight aluminium sphere, about 2 metres in diameter, raised by a balloon which was stated when fully inflated to have the capacity of half a million cubic feet. Anticyclonic conditions prevailed at the time, and the balloon, after remaining in the air for 18 hours, fell at a spot about 160 kilometres to the south. Prof. Piccard succeeded in reaching a height of about 15½ kilometres, probably penetrating into the stratosphere by some 4 kilometres, and beating all previous records of a manned balloon or aeroplane. On the descent trouble occurred with the gas valve, and after long delay the balloon landed safely on the Gross Gürgl glacier in the Austrian Tyrol. The air in the cabin was renewed by two oxygen cylinders, each capable of maintaining a good atmosphere for eight hours. The aeronauts suffered considerable discomforts, for the temperature inside the sphere was most unpleasantly high while the external air was 55° C. below freezing point, due to intense solar radiation in the rarefied

atmosphere. Prof. Piccard found that at a height of 48,000 ft. the conductivity of the air was only half as strong as at the height of 27,000 ft. previously reached by balloonists. A second observation was that the cosmic rays could not proceed from any ordinary type of radio-activity. He was of the opinion that they seemed to have their origin not in massive bodies, but in attenuated bodies which possessed not more than 100 grammes per square centimetre of density at their surface. He could not preceed from any ordinary type of claimed that his ascent had proved that the aeroplane of the future would seek to fly in the higher altitudes, because the atmosphere there enabled a speed to be attained three times greater than that which was possible in the lower strata. The aeroplane industry could confidently build with this object in view, because these upper altitudes presented no difficulty from the physiological point of view provided that aeroplanes were fitted with air-tight cabins.

TREE RINGS AND SUNSPOT CYCLE.—Dr. A. E. Douglas, whose work on the correlation between the growth-rings in trees and the sunspot cycle has given a probable sunspot curve for many centuries, has carried the study of the rings in certain districts back to 700 B.C. By examining the timbers in some ancient Indian buildings he has been able to give the dates when the trees were cut, and thus to date the buildings. Dr. Antevs, of the University of Stockholm, has found correlation between the structure of clay layers in ancient lake-beds and the sunspot cycle. Both the tree-rings and the clay layers are supposed to depend directly on the rainfall.

TRENCHES IN THE NORTH SEA BED.—In recent surveys of the North Sea a trench 130 fathoms deep has been discovered about 100 miles east of Montrose. The Devil's Pit, as it is called, is the deepest of a group of depressions found in a floor which was supposed to be an undulating plain at 38 to 50 fathoms. Another group of depressions, with a greatest depth of 87 fathoms, occurs farther south, about 65 miles east of Berwick. Professor J. W. Gregory does not accept the suggestion that the trenches have any connection with the earthquake in eastern Scotland and southern Norway on January 24, 1927. He believes that the features are not new, but were formerly missed by soundings having been too far apart. He argues that the trenches are remains of the pre-glacial valley of the Rhine, and date from the days when the Rhine and its British tributaries discharged to the North Sea about a hundred miles east of Kinnaird Head. The existence of these pre-glacial trenches adds to the improbability of a Scandinavian ice-sheet having reached the British coast, since it would have filled the trenches with moraine matter. In this case floating ice must have been responsible for the transport of Scandinavian boulders to eastern England.

TWO-MILLIONTH TELEPHONE.—The King has accepted the 2,000,000th telephone for use in Buckingham Palace. The instrument is one of the latest hand-microphones, finished in old gold. It carries a decorative plate surmounted by a crown, and bearing the inscription :—"This instrument, installed for his Majesty, King George V., is the 2,000,000th telephone connected with the Post Office system.—June 1931."

When Sir William Thomson (Lord Kelvin) introduced the telephone into this country by exhibiting Professor Graham Bell's instrument to a meeting of the British Association, at Glasgow, in 1876, few people could have foreseen the enormous development which has taken place in 56 years. In those days, the world marvelled at the possibility of two persons conversing over a few yards of wire. To-day, with London as the telephonic centre of the world, subscribers talk every day to the most distant parts of the globe as easily as if they were speaking to friends a few streets away.

TRAIN WITH RUBBER TYRES.—A railway motor-driven coach, fitted with pneumatic tyres and capable of a normal speed of 60 miles an hour, was demonstrated on July 22 on the Palaiseau-Chartres branch line. It may transform the working of branch railway services if all that is claimed for it is substantiated. The train consisted of a 24-h.p., 24-seater coach, having pneumatic tyres fitted on its flanged wheels. The tyres were of special shape, stronger and thicker than the type used in motor-cars, in order to bear the greater weight of the railway coach, and wider and flatter than lorry tyres. The coach reached a speed of 50 miles an hour in 650 yards, and was brought to a standstill within 100 yards, while the demonstrators claim that, by use of the new type, it will be possible to dispense with signalmen, level-crossing keepers and guards. Each coach is manned with a driver only, and similar coaches can be despatched at 100-yard intervals without danger of collision.

WIRELESS TYPEWRITER.—A demonstration of a wireless typewriter, invented by Mr. Glen Watson, and known as the "Watsongraph," has been given in Detroit. The instrument enables an operator sitting at a typewriter to type out a message which is automatically and simultaneously conveyed by short-wave wireless to another typewriter at any distance. The receiving typewriter automatically types out the message as sent. A transmitter for ordinary commercial use can be made, to weigh only about 20 lb. The speed of transmission is limited only by the skill of the operator, since the typewriter can record 1,200 letters a minute. Any receiving typewriter, synchronized with the transmitter, could be tuned in wherever the receiver might be, and the message could be typed simultaneously on several receivers. If secrecy is desired, it can be arranged that only the transmitter and the required receiver are synchronized. The owner would thus be independent of all public means of communication. The typewriter could be carried on police patrol cars and used for sending messages to headquarters in absolute secrecy without code. It would also revolutionize newspaper work, since, among other things, it would enable correspondents to evade a censorship.

WORLD'S FASTEST TRAIN.—The "Cheltenham Flyer," the Great Western express, drawn by the Launceston Castle locomotive, established a world record on Sept. 14, 1931, by running from Swindon to Paddington, a distance of 77¼ miles, in 59 min. 30 sec., an average of 78 miles an hour. On Sept. 15 the train made the run between Swindon and Paddington in 58 min., at an average speed of 80 miles an hour.

NEW books continue to be published at the rate of about forty a day, and several new publishers have started business during the year. This would seem to imply that current literature is in a healthy state. On the other hand, booksellers have not escaped the prevailing "pinch," and are exploiting various contrivances to stimulate the buying (rather than the borrowing) of books. Impoverished Germany, it is to be noted, with a population only half as large again as that of Great Britain, manages to assimilate twice our output. Some readers, dazed by the volume of new works, delegate selection to book societies and clubs; many, probably, would hear with complacency that Mr. Snowden had extended the Entertainment Tax to new books, and hope that a reduced birth-rate of these would give renewed vitality to neglected older masterpieces.

Lord Crawford wrote last April in *The Nineteenth Century*: "If critics, for a change, would tell us what is bad; if they would occasionally recommend a book which was not produced the day before yesterday, better still if they would enjoin a close time—one month, two months, three months! how justly would they earn our praise."

If the year has not produced any book of outstanding celebrity, the output of good literature, particularly in the realms of Biography, Philosophy and Science, shows no falling-off. Novels—appearing at the rate of 10 a day—still tend to grow longer, but the spate of sex-psychology seems somewhat to have spent its strength; studies in terror and brutality and the gruesome to some extent taking its place. Crime and detective stories hold their vogue, but their writers are realising that intricacies of plot need not be spoilt by crudities of style, or perfunctory love-interests. Whilst the War naturally continues to figure in most contemporary fiction, War books, as such, decline in number.

At the Annual Meeting of the *Associated Booksellers* at Harrogate last May, Mr. Geoffrey Faber, in an interesting address, prophesied that the serious and difficult time through which we are passing will lead to an increase in the demand for more serious literature, "not cynical, not destructive, but rather reconstructive. People," he said, "begin to get tired of drifting, of not knowing where they are going, they begin to want to read books which will not only ask questions but try to answer them. I am sure," he added, "that the next ten years will see a very marked increase in the sale of such books. I think there will be a big swing back towards religion, perhaps even philosophy and poetry, a reaching out for some firm ground to stand on, a realisation that it's not enough just to have a good time, and that the twentieth century hasn't yet done much to give life a meaning. And I think this reaction is going to be helped by sheer boredom with too much easy mechanical amusement. Cars, cinemas, wireless—how exciting and absorbing these things are for a time, and, after a time, how easy it becomes to have too much of them." Sir Nigel Playfair has also just recently been predicting a Puritan revival. The pendulum swings back; but, like the great Foucault one in the Science Museum, it never returns precisely to the same starting place as before. And that, after all, is progress.

The *Irish Censorship*, it may here be noted, has banned (up to June, 1931) 89 books issued by London publishers, including works by Havelock Ellis, Rosita Forbes, Gerhardi, Maxim Gorki, Hergesheimer, Aldous Huxley, Sinclair Lewis, Somerset Maugham, T. F. Powys, Eric Remarque, Marie Stopes, John van Druten and Marcel Prevost.

Amongst literary events of the year under review may be mentioned the celebration of the centenary of Christina Rossetti, and the tercentenaries of John Donne and Dryden; the influentially signed appeal on behalf of Sir William Watson; the unveiling of memorials to Pierre Loti in France, and Rupert Brooke in Scyros; the interesting exhibitions at Messrs. Bumpus's of fine bindings, of Byron-Murray documents, &c.; the achievement of "Science as a best-seller" in the sale of 80,000 copies of Jeans's "Mysterious Universe"; and the publication of the first volume of the new *British Museum Catalogue*, for which the subscription price is £400. Notable features of the year have included the Mundanus (Gollancz) experiment of new three shilling novels—(similar dollar issues are proving successful in America); the popularity of "Omnibus" collections; the increased length of the stories by leading novelists; and the large number of translations from German and other foreign works of fiction.

Literary Luncheons, at which popular authors may be seen and heard in postprandial discourse, have proved very attractive; and booksellers, in their efforts to improve the "lay out" of their premises, are realising that the best book society is to be found in a well arranged bookshop, with intelligent but discreet attendance, and room to browse about.

Mr. Alden, at the Booksellers' Conference last spring, recalled with emphasis the reference to book-selling in the Report of the Departmental Committee on the English educational system. "In every town," said this report, "the bookseller's shop should become what in University cities and in one or two other favoured spots it is already, a centre of literary and artistic interest and enlightenment, a place where the best books, new and old, can be expected at leisure."

Whilst the weekly book talks of the *B.B.C.* have been generally welcomed, the criticism of books has, not unnaturally, been itself the subject of a good deal of recent criticism. As regards quantity, it was stated that the whole space devoted by the London press to reviews only provides for about thirty lines each to one-fifth of the new books published; whilst, as to quality, the selections of the book clubs and societies, and the reviewing of fiction by well known novelists have been called in question with some severity.

"If our critics became young (wrote the editor of *The Bookman*, courageously) and our novelists old, we might be rescued from the present state wherein criticism is a laughing-stock and fiction a disgrace."

The boosting of second-rate books is likely to prove a boomerang both for their authors and booksellers. Masterpieces do not happen twice a week.

Unlike the product of the graphic arts, the appeal of literature is not instantaneous. To judge them, books have got to be read; *solvuntur ambulando*, and a terribly pedestrian jog-trot it may prove. Hence the necessity, and the immense importance, of guidance, of criticism and reviews. The complaint re-echoed from

various quarters during this past year is that criticism has become, as regards popular literature, not indeed corrupt, but so indiscriminately amiable and so exaggerated in eulogy as to be a snare and delusion. The public, perplexed and incensed at this manufacture of fictitious masterpieces, turns to the book clubs to guide its choice; and in accepting their selections is doubtless protected from many experiments in trash. But it must be obvious, without enquiring into their constitution, that these societies are business and not merely philanthropic adventures, and that their commercial success must largely depend on the very large discounts obtainable on orders, before publication, of fifteen or twenty thousand copies—allowances said to amount to sixty per cent. and even more of the published price. Such business is perfectly legitimate, but its implications must be frankly recognised; the sudden (and perhaps short-lived) exaltation of a new author may not conduce to his ultimate reputation; the concentration of emphasis upon a single book may prove unduly hard on others of almost equal merit; and in so far as these clubs tend to damage the bookseller's legitimate business their influence can only be deplored.

Awards of some of the Literary Prizes during the past year are appended: *Priz Goncourt*—"Malaisie," by H. Fauconnier; *James Tait Black Memorial*—"Miss Mole,"* by Miss E. H. Young, and "Bengal Lancer," by Major Yeats-Brown; *Nobel Prize*—to Sinclair Lewis; *German Youth Prize*—"Joseph and Peter," by Anton Gabele; *Northcliffe Prize*—"Regain," by Jean Giono; *Hawthornden Prize*—"The End of the World," by Geoffrey Dennis; *London Pen Club*—"Tobit Transplanted," by Stella Benson; *Femina Vie Heureuse*—"High Wind in Jamaica," by Richard Davies.

The following are notable amongst book sale prices: Blake's "Songs of Innocence" (1789-94), £1,600; Samuel Pepys, Letters, £1,600; Shakespeare First Folio (1623), catalogued at £28,000; Holograph MS. of Byron's "Don Juan," Cantos X-XII, £6,000; "Pickwick," prime copy in parts, £2,600; Block Book, "Passio Christi," £3,300.

Twenty-three of the York Minster Caxtons were, very injudiciously, sold to America for £20,000.

Speaking generally, however, there has been a decided slump in great sale prices since the peak records of the Kern Sale in 1929; and the drastic marking down of the catalogued prices for many first editions of modern authors during the past year should also be noted by collectors who indulge in this very speculative whim.

The list of deaths amongst literary men and women during the year includes the names of Arnold Bennett, Sir Hall Caine, Dr. H. R. Hall, Katharine Tynan (Mrs. Hinkson), Ronald Macfie, Oliver Madox Hueffer, Dr. C. H. Turner, Lord Birkenhead, and Lady Newton.

In appending a classified list of selections from the books of the year it should be noted that the period covered is from October, 1930, to September, 1931; that translations and students' manuals are not, as a rule, included; and that where only a very small percentage of the year's output can be listed many good and useful books must obviously be left unnoticed.

* "Miss Mole," and "Three Daughters" by Jane Dashwood were also recommended to the Paris Committee for their final selection.

ART.

"Thirty Years of British Art, by Sir Joseph Duveen; "An Introduction to the Language of Drawing and Painting," Vol. II, by Arthur Pope; "Persian Art," edited by Sir E. Denison Ross (the Winter Exhibition at Burlington House led to several publications on this subject); "The Philosophy of Art," by C. J. Ducasse.

BIOGRAPHY.

"Chapters of Autobiography," by the 1st Earl of Balfour (an interesting fragment, political rather than personal); "The Ladies of Llangollen," edited by Mrs. G. H. Bell; "Henry Irving," by Gordon Craig; "St. Loe Strachey," by Amy Strachey; "John Wilmot Earl of Rochester," by J. Prinz; "I'm Alone," by Captain Jack Randell; "Verney Letters of the 18th Century," edited by Lady Verney; "Wolsey," by Hilaire Belloc; "The Diaries of John Bright," edited by R. A. J. Walling; "Pepys, His Life and Character," by John Drinkwater; "Lord D'Abernon's Diary" (3rd and concluding volume); "Comments and Criticisms," by Sir John Simon; "Whistler," by James Laver; "The Rise of General Bonaparte," by Spenser Wilkinson; "Al Capone," by F. D. Pasley (the amazing story of the bootleggers and racketeers); "Men and Memoirs," by W. Rothenstein (an artist and his friends); "The Private Papers of James Boswell" (from Malahide Castle, in the collection of Colonel Isham, prepared by Geoffrey Scott and F. R. Pottle, Vols. VII-IX); "Marshal Foch's Memoirs," translated by Colonel Bentley Mott; "Life and Letters of Edmund Gosse," edited by Evan Charteris; "An Oxford Portrait Gallery," by Mrs. Janet Courtney; "According to the Flesh," by Fleta Campbell (a biography of Mrs. Eddy); "World Without End," by Helen Thomas; "Bulwer: a Panorama," by Michael Sadleir; "Portraits in Miniature," by Lytton Strachey; "Son of Woman: the Story of D. H. Lawrence," by J. Middleton Murry; "Swift," by Carl van Doren; "Savage Messiah," by H. S. Ede; "Sir Philip Sidney," by Mona Wilson; "The Diary of a Country Parson, 1797-1802," the last volume of James Woodforde; "The Odyssey of an Out of Work," by T. Horsley; "Millicent Garrett Fawcett," by Ray Strachey; "Florence Nightingale," by I. B. O'Malley; "After Ten Years," by Constance Malleson (Colette O'Neil); "In My End is My Beginning," by Maurice Baring (Mary Queen of Scot's story as told by her four Maries); "Life of Robert Marquis of Salisbury," by Lady Gwendolen Cecil (Vol. III); "Marshal Lyautey," by André Maurois; "Henry Kingsley: Towards a Vindication," by S. M. Ellis (a timely apologia); "Charlton" (Autobiography of an Air Commodore); "Ellen Terry and Bernard Shaw: a Correspondence" (delightful love letters); "Time Was," by W. Graham Robertson; "A Bachelor's London," by Frederic Whyte; "Guilty but Insane: a Broadmoor Autobiography," by Warmark; "Nelson," by Clennell Wilkinson; "Lord Kilbracken's Reminiscences"; "Mock Turtle: Memoirs of a Victorian"; "Friends and Adventures," by T. (of *Punch*); "Autobiography of Lincoln Steffens"; "My Eighty Years," by R. Blatchford; "The Duke," by Philip Guedalla; "Everyman Remembers," by Ernest Rhys.

ESSAYS AND BELLES LETTRES.

"The Resurrection of Rome," by G. K. Chesterton; "Essays and Observations," by Lord

Hewart; "The Victorian Tragedy," by E. Wingfield-Stratford; "On Being Ill," by Mrs. Woolf; "It's a Fine World," by Robert Lynd; "Vulgarity in Literature," by Aldous Huxley; "England's Crisis," by André Siegfried (a friendly and penetrating indictment); "A Treasury of English Aphorisms," by Logan Pearsall Smith; "Out of Soundings," by H. M. Tomlinson; "Conversations with a Cat and Others," by Hilaire Belloc; "A Consideration of Thackeray," by George Saintsbury (a valuable re-view by our veteran critic); "Essays of a Catholic," by Hilaire Belloc; "Music at Night," by Aldous Huxley; "Visibility Good," by E. V. Lucas; "Countries of the Mind," by J. Middleton Murry.

FICTION.

"On Forsyte Change," by John Galsworthy, who is reported to have another family Saga in preparation; "The Fool of the Family," by Margaret Kennedy; "Grand Hotel," by Vicki Baum; "Cakes and Ale," by Somerset Maugham; "Imperial Palace," by Arnold Bennett, his last story; "The Man who Died," by D. H. Lawrence, completed just before his death; "But not for Love," by B. K. Seymour; "Mackerel Sky," by Helen Ashton; "Philippa," by Anne D. Sedgwick; "The Diary of a Provincial Lady," by E. M. Delafield; "Certain People," short stories by Edith Wharton; "Bitter Tea," by Grace Z. Stone; "The Deepening Stream," by Dorothy Canfield; "A Woman on her Way," by J. Van Druten; "Flamenco," by Lady Eleanor Smith; "The Winding Lane," by Sir Percy Gibbs; "Hunger and Love," by Lionel Britton; "Tobit Transplanted," by Stella Benson; "Richer Dust," by Storm Jameson, completing the Hansyke trilogy; "Susan Spray," by Sheila Kaye Smith; "Juan in America," by Eric Linklater; "Father," by the author of "Elizabeth and her German Garden"; "The Loving Spirit," a promising first novel by Daphne du Maurier; "The Career of Julian Stanley Williams," by Adrian Alington; a fine achievement; "Red Like Crimson," by Jane Paradine; "The Phœnix-Kind," by Peter Quennell; "Broom Stages," by Clemence Dane; "Star Dust," by D. L. Murray; "All Passion Spent," by V. Sackville-West; "The Grasshoppers Come," by David Garnett; "Challenge to Clarissa," by E. M. Delafield; "Four Handsome Negresses," by R. H. Baptist; "The Storm Riders," by Frank Dilnot; "Judith Paris," by Hugh Walpole (Rogue Herries' daughter); "Early Closing," by Miss D. Wynne Willson, an excellent first novel of school life; "S.S. *San Pedro*. A Tale of the Sea," by James Cozzens; "Return I dare not," by Margaret Kennedy; "Mad Puppetstown," by M. Farrell; "Month of May," by Jane Dashwood; "Surging Tide," by F. H. Dorset; "And Now Good-bye," by James Hilton; "The Blanket of the Dark," by John Buchan; "Aphrodite in Aulis," by George Moore.

CRIME STORIES.

"Plain Murder," by C. S. Forester; "Green Lane," by Alec Brown; "Murder at Fenwold," by C. Bush; "Murder of Judge Macfarlane," by Mary Plum; "The Second Shot," by Anthony Berkeley; "Murder at the Pageant," by V. L. Whitechurch; "The Box Hill Murder," by J. S. Fletcher; "The Bill Street Murder," by Sydney Fowler; "Persons Unknown," by Hallewell Sutcliffe; "Who Goes Home," by A. P. Nicholson; "The Hanging Woman," by John Rhode; "The Sands of Windee," by A. W. Upfield; "The Yellow Viper," by S. Fairway; Mr. H. D. Thompson has produced in "Masters of Mystery" a comprehensive guide to the best "Thrillers."

HISTORY.

"Liaison 1914," by Brig.-Gen. Spears; "Turning Points of History," by the late Lord Birkenhead; "Loyalties. Mesopotamia 1914–17," by Sir Arnold Wilson; "The Jameson Raid," by Hugh M. Hole; "England in the Nineteenth Century," by A. P. Fremantle (the second volume, 1806–10); "Survey of International Affairs, 1929," by A. J. Toynbee; "An Economic History of Australia," by Edward Shann; "Official History of the Great War" (Egypt and Palestine, Vol. II); "By Guess and by God," by William Guy Carr (Submarine War Adventure); "The Suffragette Movement," By Sylvia Pankhurst; "A History of Europe 1815–1923," by Sir John Marriott; "Mesopotamia 1917–20," by Sir Arnold Wilson; "Official History of the War," Naval operations, Vol. 5, by Sir H. Newbolt; "King, Queen, Jack," by Milton Waldman; "At G.H.Q.," by Brig.-Gen. John Charteris; "The Endless Adventure," Vol. 2, by F. S. Oliver; "Advance from Mons," by Bloem, *from the German side*; "Missing," by Bruce Blackwood.

MISCELLANEOUS.

"Thy Servant a Dog," edited by Rudyard Kipling; "Flying," by Claude Grahame-White; "Archie and Mehitabel," by Don Marquis; "Some Bookhunting Adventures," by R. S. Garnett diverting tales and humorous character studies by a bibliophile; "The Anatomy of Bibliomania," by Holbrooke Jackson; "Seventy Fathoms Deep," by Scott, record of the work of the *Artiglio*.

POETRY AND DRAMA.

"The Poems and Verses of John Keats," edited by J. Middleton Murry; "The Winding Stair," by W. B. Yeats; "Poems of Edmund Blunden"; "The Signature of Pain and other Poems," by Alan Porter; "The Torch Bearers, Vol. III. The Last Voyage," by Alfred Noyes; "The Apple Cart," by Bernard Shaw, with a very Shavian preface; "Last Poems," by John Freeman; "Ploughed Earth," by C. C. Abbott; "New Poems," by A. E. (G. W. Russell); "Verses," by Elizabeth Daryush; "Poems of Wilfred Owen," edited by Edmund Blunden; "Post Mortem," by Noel Coward; a war inquest; "The Cicadas," by Aldous Huxley; "Poems 1926–30," by Robert Graves; "A Collection of Poems (written between the ages of 14 and 17)," by Joan Easdale; "Shorter Poems," by Robert Bridges; "The Heart's Unreason," by Edward Davison; "T. S. Eliot. A Study," by T. McGreevy; Mr. Williamson says Eliot must "now be reckoned with as a force instead of being defended as a fad."

POLITICS AND ECONOMICS.

"A Searchlight on America," by J. Truslove Adams; "Dawn in India," by Sir Francis Younghusband; "The New Survey of London Life and Labour, Vol. I. Forty Years of Change"; "Account Rendered 1900–1930," by Sir Ernest Benn; "A Treatise on Money," by J. M. Keynes; "Democracy on Trial," by Lord Eustace Percy; "Hitler," by Wyndham Lewis; "South Africa,"

by Jan Hofmeyer, dealing with the Colour problem; "The Terror in Europe," by H. H. Tiltman; "India Insistent," by Sir Harcourt Butler.

SCIENCE AND PHILOSOPHY.

"Man and his Universe," by J. Langdon Davies; "The Biological Basis of Human Nature," by H. S. Jennings; "The Philosophy of the Good Life," by Dr. Gore; "Social Control of the Mentally Deficient," by Dr. Stanly Davies; "The Conquest of Happiness," by Bertrand Russell; "Instinct and Intuition," by G. B. Diblee; "The Mysterious Universe," by Sir James Jeans; "The Faith of a Moralist," by Professor Taylor; "Climate," by W. G. Kendren; "The Science of Life," by H. G. Wells, Julian Huxley and G. P. Wells; "New Discoveries Relating to the Antiquity of Man," by Sir Arthur Keith; "The Stars in their Courses," by Sir James Jeans; Everybody's Business," by Hartley Withers; economies of to-day; "The Scientific Outlook," by Bertrand Russell; "Grades of Significance," by G. N. M. Tyrell (Psychic Research); "Mind and Matter," by G. F. Stout; "The Philosophical Basis of Biology," by J. S. Haldane.

The Centenary Meeting in London, at the end of September, of the British Association for the advancement of Science, has stimulated interest in the works of our leading Scientists of which the principal booksellers arranged special displays.

SPORT, TRAVEL, TOPOGRAPHY.

"Fly Fishing," by Viscount Grey (enlarged edition); "A Year on the Great Barrier Reef," by Dr. C. Yonge; "The Kanchenjunga Adventure," by F. S. Smythe; "Survey of London," Vol. XIII (Westminster and Whitehall); "The Andree Diaries," translation by E. Adams Ray; "Africa View," by Prof. Julian Huxley; "Green Hell," by Julian Duguid; "Impacts," by Douglas Goldring; Oxfordshire," by Earl of Mayo, S. D. Adshead and P. Abercrombie; "London Memories," by St. John Adcock; "Jungles Preferred," by Janet Miller; "Jungle Ways," by W. B. Seabrook.

THEOLOGICAL.

"Science and Religion," a symposium by various churchmen and scientists; "The Prospects of Humanism," by Lawrence Hyde; "The Nature of Belief," by M. C. D'Arcy; "The Foundations of Bible History," by John Garstang.

In the year ending last March, the *British and Foreign Bible Society* distributed 11,888,226 copies of the Scriptures, in 17,000 packages weighing 490 tons, at a cost of over £400,000.

THE NOBEL PRIZES.

THE Nobel Prizes are awarded from the income of a fund bequeathed to trustees by the Swedish scientist Alfred Nobel, the inventor of dynamite, who died December 10, 1896, leaving a fortune of about £1,750,000. *The first awards were distributed on the fifth anniversary of Nobel's death*, Dec. 10, 1901 (for awards before those recorded below *see* former issues of WHITAKER). The awarding authorities are the Swedish Academy of Science—(*a*) Physics, (*b*) Chemistry; the Stockholm Faculty of Medicine—(*c*) Medicine or Physiology; the Swedish Academy of Literature—(*d*) Literature; and a committee of five persons elected by the Norwegian Storthing—(*e*) Peace. The fund is managed by a Board of Directors elected by fifteen deputies appointed by the authorities above named. The Swedish Government appoints a President of the Board of Directors. Particulars concerning conditions, &c., can be obtained from Nobelstiftelsens Styrelse, Sturegatan 14, Stockholm, Sweden.

LIST OF AWARDS (Value, 1931, *Kroner* 173,206).

Year	(*a*) Physics.	(*b*) Chemistry.	(*c*) Medicine or Physiology.	(*d*) Literature.	(*e*) Peace.
1920	Ch. E. Guillaume	W. Nernst	A. Krogh	Knut Hamsun	Léon Bourgeois.
1921	Albert Einstein	F. Soddy	*No award*	Anatole France	K. H. Branting Chr. L. Lange
1922	Niels Bohr	F. W. Aston	A. V. Hill O. Meyerhof	J. Benavente	F. Nansen.
1923	R. A. Millikan	F. Pregl	F. G. Banting J. R. Macleod	W. B. Yeates	*No award*
1924	K.M.G Siegbahn	*No award*	W. Einthoven	W. Reymont	*No award.*
1925	J. Franck G. Hertz	R. Zsigmondy	*No award*	G. B. Shaw	A. Chamberlain. G. Dawes.
1926	Jean Perrin	The Svedberg	J. Fibiger	Grazia Deledda	A. Briand. G. Stresemann.
1927	A. H. Compton C. T. R. Wilson	H. Wieland	J. Wagner-Jauregg	Henri Bergson	Ferdinand Buisson. Ludwig Quidde.
1928	O. W. Richardson	A. Windaus	C. J. H. Nicolle	Sigrid Undset	*No award.*
1929	Duc de Broglie	A. Harden Prof. von Euler	Sir F. G. Hopkins Dr. Eijkman	Thomas Mann	F. B. Kellogg.
1930	Sir C. V. Raman	Prof. H. Fischer	...	Sinclair Lewis	Archbishop N. Soderblom.
1931	Postponed	Prof. Bosch	...	Erik Axel Karlfeldt.	...

THE Exhibition of Persian Art, which was opened at Burlington House on January 7, was an experiment of which many doubted the wisdom. Of its purely artistic interest, of its attraction to those capable of appreciating the work of the great designers and craftsmen of the East there was no question. The only doubt was whether it would appeal to the public at large, and any fears on this score were dispersed during the first week of the exhibition. The attendance was extraordinary, and was maintained until the last day of the season, during which 259,000 visitors paid for admission. This number, though it did not approach the attendance of the phenomenal Italian Exhibition of 1930, easily excelled those of the Flemish and Dutch Exhibitions of 1928 and 1929, both of which were regarded as successful. The Persian Exhibition was the only one of a remarkable series in which pictures were not the predominant features. There were Persian paintings of beauty, but they were outshone by the magnificence of the carpets, to which were given most of the wall space in six or seven of the galleries. Ancient pottery and goldsmith's work were also well represented.

For the Summer Exhibition of the Royal Academy, which succeeded the Persian Exhibition at Burlington House, 10,902 works were submitted by outsiders to the judgment of the Selecting Committee, by which 8,403 were rejected, 2,497 were made doubtful, and only two accepted outright. The Selecting Committee was composed of the President (Sir William Llewellyn), Mr. Augustus John, Mr. Lee, Mr. Kelly, Sir W. Goscombe John, Sir G. G. Scott, Mr. Munnings, Mr. Russell, Mr. Dodd, Mr. Turner, Sir E. Cooper, and Mr. Rushbury. The Committee of Arrangement for oil paintings consisted of Mr. Lee, Mr. Kelly, Mr. Munnings, Mr. Russell and Mr. Dodd. The arrangement of the watercolours, drawings in black and white, and miniatures, was undertaken by Mr. Dodd and Mr. Rushbury; the architecture by Sir G. G. Scott, and the sculpture by Sir W. Goscombe John.

The principal works sold at the exhibition were: "A Road above the Valley" (£125), by Sir H. Hughes Stanton; "Seen in the Mirror" (£250), and "Girl Combing her Hair" (£120), by Mr. Harold Knight; "East Anglia" (£525), and "Early Spring in the Wye Valley" (£525), by Mr. Bertram Priestman; "Cupid's Mirror" (£150), by Mr. W. G. de Glehn; "The Hostess of the White Horse" (£350), by Mr. L. Campbell Taylor; "The Darlings" (£200), by Mr. John Wheatley; "Cows in the Rickyard" (£420), by Mr. James Bateman; "Amiens" (£100), by Mr. Terrick Williams; "Nancledra: Old Cornish Village" (£160), and "Spring Evening: the Deveron, Rothiemay, Aberdeenshire" (£350), by Mr. S. J. Lamorna Birch; "Artemis and Chione" (£600), "The Dancer Consuelito Carmona" (£250), and "Ladies and Gipsies" (£350), by Mr. Russell Flint; "Delphiniums by the Lake" (£250), by Mr. Melton Fisher; "The Convex Mirror" (£100), by Mr. John Collier; "The Landlord of the Chequers" (£75), by Mr. J. Kynnersley Kirby; "The Ancient Borough of Penryn" (£105), and "Live Stock" (£105), by Mr. Stanhope A. Forbes; "Composition in Pink and Green" (£200), and "Jane Posing" (£200), by Cathleen Mann; "On the Moors" (£1,000), and "The Paddock, Epsom" (£500), by Mr. Alfred J. Munnings; "Autumn by the River" (£200), by Mr. Reginald G. Brundrit; "A Blonde Woman" (£175), by Dod Procter; "The Footstep" (£175), by Mr. T. C. Gotch; "Chateau Gaillard" (£157 10s.), by Mr. Alfred Hayward; "Loch Grogach" (£126), by Mr. Osmund Pittman; "Through the Goblin Wood" (£150), by Mr. Noel L. Nisbet; "The Maiden" (£236 5s.), by Dame Laura Knight; "A Victorian Richmond Hill" (£105), by Mr. William T. Wood; and "Artemis—statuette, carved wood" (£100), by Alec Miller. Pictures marked sold, but unpriced, included "Soft the sunlight in Derby Dale," by Sir David Murray; "The Estuary—gathering clouds," by Mr. Arnesby Brown; "Jane XXXI," by Mr. Gerald Kelly; and "In my Garden," by Joseph Farquharson.

Only one work from the exhibition was bought for the Chantrey collection, "The Birth of Venus—three-quarter figure, Portland stone" (£1,000), by Mr. William McMillan. From other sources were acquired "Spring Days" (£800), by Mr. Henry Tonks; "The Green Dress" (£525), and "Old Battersea Bridge" (£150), both by Walter Greaves; and a watercolour, "St. Paul's" (£25), by Mr. Henry Rushbury.

Several exhibitions of great interest were held in aid of various charities the principal of which was organised by Sir Philip Sassoon, and illustrated the period of "The Four Georges." It included by chance, the first and last portraits painted by Gainsborough; and many other fine works by that master, and by Reynolds, Raeburn, Romney, Lawrence, Hoppner, Cotes, and Canaletto. This exhibition was in aid of the Royal Northern Hospital; and another, almost as important, held by Messrs. Knoedler in Old Bond Street, was for the benefit of the Cheyne Hospital for Children. This was composed of English Eighteenth Century portraits of Children, among which were Lawrence's famous "Master Lambton"; Romney's group "The Leveson-Gower Children"; and one of the finest achievements of Gainsborough, "The Cottage Girl with Dog and Pitcher."

Messrs. Agnew made a new departure at their annual exhibition of watercolours by showing the work of Turner and Girtin in the same room with that of some of the more advanced members of the modern school. At the Leicester Galleries the most important exhibition was of work by Rodin, to the catalogue of which Mr. Bernard Shaw contributed an amusing introductory note. Other exhibitions of sculptor's work at the same gallery were those of Mr. Epstein and Mr. Henry Moore; and of paintings and drawings by Camille Pissarro, Steinlen, and Mr. Richard Sickert. Paintings and water-colours by the late Mrs. Evelyn Cheston were shown in the gallery of the Royal Society of Painters in Water Colours, Pall Mall East; and pictures by the late H. H. Lathangue, R.A., at the rooms of the Fine Art Society in New Bond Street, where a fine collection of etchings and engravings by Durer, Rembrandt and other Old Masters was on view in July and August. Drawings of Spanish scenery by Mr. Muirhead Bone, of sporting prints in colours, and of paintings by Old Masters, were the subjects of three exhibitions at Messrs. Colnaghi's; and work by Mr. Michael Rothenstein at the Warren Gallery, Maddox Street. Examples of Indian art formed the Summer Exhibition at the Burlington Fine Art Club. At Messrs. Knoedler's, Mr. J. Davidson showed a number of busts of contemporary men of letters, and at the Goupil Gallery collections were on view of works by Sir William Rothenstein and the late Walter Greaves. At Messrs. Tooth's

in New Bond Street was shown a landscape by Gainsborough, painted for the Prince of Wales in 1784, which had been lost to sight for seventy years.

In the auction room the year was a dull one, and there were no dispersions of collections of works of art of the first rank. At Christie's, the pictures sold included a portrait by Sir Joshua Reynolds of the Hon. John Tufton, £1,995; two by Raeburn, £1,575 and £1,260; and three by Romney, of Lord Aucram, £1,732; of Lady Wilhelmina Emilia Kerr, £4,620; and of Richard Meyler when a child, £6,825. At Sotheby's one of the most important items sold was the famous Italian renaissance pendant known as "The Canning Jewel," and attributed to Benvenuto Cellini, and the property of the Earl of Harewood. There was only one bid for the pendant, of £10,000, at which the hammer fell. At the interesting sale of the Pepys collection, of portraits silver, and relics of all kinds which had belonged to the famous diarist, his portrait by Sir Godfrey Kneller, a half length, realised £1,750. At the dispersal of the late Arthur Severn's collection, which included many relics and former possessions of Ruskin, Turner's watercolour sketching boy, and the china palette last used by him, were among the lots disposed of. The palette was given to Ruskin by Mrs. Booth, in whose house at Chelsea Turner died.

Very few new pictures were placed on view at the National Gallery. The principal were "Judith and Holofernes," by Giovanni Liss, presented by Mr. J. W. Dollar; a still-life study by the Dutch artist, J. J. Treck, "Pewter, China and Glass"; and a "Portrait of a Lady," by Terburg, bequeathed by Sir Otto Beit. The chief acquisition at the Victoria and Albert Museum was the Howard Grace Cup, long in the possession of the Howard family and sold in May for £11,000 by the Duke of Norfolk. It was purchased by Lord Wakefield, who presented it to the Museum. At the National Gallery, Millbank, the year was marked by an excellent exhibition, held in the summer, of the earlier paintings in oil by Turner.

THE YEAR'S MUSIC.

OPERA.

Although the long-established Carl Rosa Company did not find it expedient to give the customary London midsummer season, both Covent Garden and the Lyceum Theatre, where Russian opera was performed, drew full houses. The "Rosa" was missed, for its prices suit those whose purses do not equal their enthusiasm, while the performances have long yielded "value for money." Incidentally, the company is a national musical asset.

Covent Garden commenced its season with the usual German works, and, if no representation actually rose to the heights, the *ensemble* frequently afforded satisfaction to captious listeners. Easily-pleased and ignorant music-critics often found everything perfect:—those who occasionally ventured to instruct the singers (by pointing out supposed limitations) cut an equally poor figure. Some considered the scenery inadequate, though it satisfied their betters; others belittled the orchestra—and without cause. Meanwhile, the German season (a lengthy one) always filled the house; applause was unstinted; the manager and his satellites beamed. So what else matters?

The Italian programme included the production of Romani's "Fedra" and the revival of Verdi's "La Forza del Destino," an opera which had its first performance in St. Petersburg sixty-nine long years ago. The musical structure of the Verdi work resembles that of "Un Ballo in Maschera," and, if the plot is of the old-time, uninteresting variety, the music contains plenty of (what singers term) "fat," the baritone air being a notable instance. Ponselle, as the ill-starred heroine, enhanced her reputation; Franci, as Carlo, often thrilled one with the power and fine quality of his voice; Pertile, who did not sing in the best Italian style, forced most upper notes, and with the usual lamentable result. It must, however, be admitted that in the effective duet, "Solenne in quest' ora," he refrained from bellowing each A natural. Italy has acclaimed Pertile as "Caruso's legitimate successor"; his musical compatriots also have rashly dubbed him "a second Tamagno." He is neither.

"Fedra" cannot possibly become a success. Despite occasional snatches of melody, the opera makes little appeal; indeed, one is relieved to find that Romani has confined his enterprise to a couple of short acts. The *rôle* of Fedra is unsuited to Ponselle's art, though irrepressible representatives of the American colony in London, foolishly anticipating something different, caused an enormous floral wreath to be handed across the footlights at the close of the initial performance. Formichi, as Teseo, was quite wasted on so insignificant a part; Cortis, as Ippolito, was ludicrously stiff in his acting, though he sang more or less acceptably. It would be illuminating to know why the management should have ridden for a fall?

The outstanding feature of the "Gianni Schicchi" performances was the excellent singing and acting of Badini, who, in *buffo* parts, certainly has no superior—perhaps no equal. Heddle Nash, as Rinnuccio, displayed a voice of pleasant quality, but with the usual (and fatal) suggestion of British throatiness; he would do well to grow out of it, and quickly. "Rigoletto," now eighty years old, "La Bohème," "Tosca," "La Traviata," and other things which please where novelties fail (and serve them right) were included in the *répertoire*. Each was adequately cast.

The dignity of Covent Garden has been sadly imperilled by a collection of inferior caricatures, representing men and women mostly of very little account. These unsightly pictures are permitted to disfigure the walls of the principal staircase. An eyesore.

Chaliapin, at the Lyceum, quickly outlived the bad impression which he made at Covent Garden a year or so ago, when, as Mephistopheles in "Faust," this daring Russian took liberties with both the music and the character. His tone, as in the past, again was alive with emotional colouring; the manner in which he entered into the skin of a *rôle* might well have been envied by all singers; he—legitimately—focussed upon himself the attention of everyone in the house. Amongst the works given were "Prince Igor," "Boris Godounov," "Sadko," which failed to please everybody, "Roussalka," and the last act of Massenet's disappointing "Don Quichotte"—with Chaliapin as the

demented knight. Various ballets were included in the scheme, the worst of them being "Petruska," a very poor thing.

Opera has been heard elsewhere. Martin Shaw's "The Thorn of Avalon," in which the composer wisely refrains from imitating other musicians, was produced at the Crystal Palace. Purcell's "Dido and Æneas" had the attention of the Trinity College Operatic Class at the New Scala: the Royal Academy of Music pupils tried conclusions with "Suor Angelica" and scenes from "Roméo et Juliette," and with the usual results. Other academical institutions also have thought it advisable to exploit the lyric drama. So very bold of them.

INSTRUMENTALISTS.

Renata Borgatti is amongst the several pianists who, new to London, impressed themselves on the *cognoscenti*. The artist's rare musical insight, to which she joins perfect technique, made her interpretations of Vivaldi, Scriabin, Prokofiev and Schumann memorable. Tovey, who has long been identified with musical life in London, afforded less satisfaction; the strange trick which he played with triplets was more original than correct. At one of his recitals the pianist was heard in Beethoven's Variations on Righini's "Vieni Amore," a composition which takes up nearly half an hour of the listener's time. Reducing the length of a classic may be a heinous offence; but, with all respect to Beethoven and to a musician of Tovey's standing, one can have too much of a good thing, especially on a warm June afternoon. For the programme also included the Variations in C minor, the six Bagatelles and the E flat, F major and C minor Sonatas. The many variations, in fact, blunted the appetite of all except Beethoven's most devoted admirers. Schnabel easily filled the Queen's Hall, and if more could have been made of the Schumann Concerto, the pianist's efforts did not lack applause—which so often is bestowed in wrong directions. Mozart's (little known) C major Concerto met with the same fate, though Schnabel's treatment of the Rondo gave pleasure. In justice to so eminent a pianist, it must be pointed out that he may have been handicapped by the instrument allotted to his use. There are pianos—*and* pianos.

The violinists were headed by Kreisler, who, amongst other things, played Lalo's somewhat hackneyed and unequal "Symphonie Espagnole," and with much of his old form. Heifetz, in the rather unnecessary arrangement of Debussy's "L'Après-Midi d'un Faune," Bruch's "Scottish Fantasia," the ever-welcome Bach "Aria" and Ravel's "Tzigane," displayed his accustomed technical mastery. Fachiri and d'Aranyi joined forces in a recital for two violins. Dushkin gave so fine a performance of Tartini's difficult "Trillo del Diavolo," that a young reporter, with Harmsworth leanings, drew a flattering comparison between the violinist in question and Paganini, writing as though Paganini, who died ninety-one years ago, and Dushkin were contemporaries. A little knowledge is particularly dangerous where music is concerned.

Notable, too, was the appearance of Viola Mitchell, a newcomer from America, her tone being powerful and distinctly appealing. Lisa Simpson, a Royal Academy of Music pupil, made an excellent impression; her future, so far as really admirable playing is concerned, seems assured. Many other violinists also were heard, several of whom, if extremely venturesome, lacked that complete equipment which is so necessary to success. While pleasing easily-satisfied and, therefore, ignorant listeners, they should have remembered the "chiel amang ye takin' notes," that bugbear of many a performer. Truly an inconvenient presence; even an unnecessary one.

Organ recitals abounded, the most recondite suburbs having been favoured. In some cases, however, organists failed to make effective use of the stops; nor were the compositions which they played always of interest. The year's music also has included the successful appearance of various 'cellists, while Segovia's guitar recital, which held a special interest for those who understand this instrument, drew many sympathetic amateurs to Wigmore Hall. No double bass players figured as soloists; consequently, none can tell if a second Bottesini has arisen.

SINGERS.

Vocal recitals have been even more numerous than in former years, amongst the most notable being Sara Fischer's concert. For this particularly well-versed artist has everything that a singer can desire, added to which she brought with her an enviable reputation from the Paris Opéra Comique. Emmi Leisner, though inclined to make unnecessary use of the *portamento*, accomplished much in Brahms and Schubert. Roland Hayes's voice apparently has lost its former beauty of tone; still, he knows how to construct an interpretation, a point which is greatly in his favour. 'Olive Rubens is greatly to be commended for disintering "When I am Laid in Earth"; Bernard Friedman successfully tried conclusions with Schubert's "Prometheus"; Gwenydd Gatrell, in "Care Selve" and "L'Amero," exhibited a pure tone; Jan Glennie proved himself to be a singer of distinction. Lissie de Roseu's happy thought in reviving Monteverde's "Lasciatemi morire" gratified her audience; Ritter-Ciampi sang "Ah! Lo so" as Mozart should be sung, though she occasionally phrased oddly; Elizabeth Schumann's breath-control, on the other hand, was a model. Eleanor Toye's choice lighted upon the lutenist songs of Attey, Campion and others.

Amongst the younger artists special attention must be drawn to Lesley Dudley, who, as may be expected of a Herbert Oliver pupil, is a singer of very considerable merit. A well-placed voice and musical feeling are noticeable in her equipment.

SUNDRY MATTERS.

"Hiawatha" and "The Dream of Gerontius," from which there is no escaping, were given in London and in the provinces; Vaughan Williams' "Sea Symphony" and other compositions by this industrious worker have been performed in towns both near and far. Brahms' "Requiem" had the attention of the St. Paul's School Choir, and with gratifying results; Cheltenham kept up its reputation with suitable programmes; Eton and Wellington did likewise. The London Promenade Concerts achieved their usual orchestral success; Hull, Bournemouth, Manchester and so forth catered for the provincials.

Francis Toye, Goossens, Holst and McEwen have faced criticism with the fruit of their learning and musicianship.

THE LONDON STAGE.—Definite steps to meet the ever-growing competition of the films were taken by the theatre during 1931. Several of the more enterprising managers evolved new methods of production and lighting, the most important innovation being the development of the revolving stage, enabling speedy changes of scene and big sets. In one successful play, *Late Night Final*, which came from America, four distinct scenes were built up and shown at the same time, a novelty which went some way towards rivalling the rapid transformation on the film. The most ambitious use of these new methods was made at the Coliseum, which, abandoning variety, scored a great success with a German musical play, *White Horse Inn*. For once, Mr. Noel Coward did not occupy the leading position among dramatists, although his *Cavalcade*, a remarkable series of pictures of the chief events of the past thirty-two years, with but little dramatic value, but a notable patriotic appeal, promised to fill Drury Lane for many months. Chief honours fell to Mr. John Van Druten, with three arresting plays—*After All*, *London Wall* and *There's Always Juliet*—in each of which he displayed a real sense of the theatre and a gift for natural dialogue. *The Barretts of Wimpole Street*, by Mr. Rudolf Besier, ran throughout the year, and *The Improper Duchess*, by Mr. James B. Fagan, produced in January, looked like achieving an anniversary. Mr. Edward Knoblock had a dual success, as adapter of Vicki Baum's novel *Grand Hotel*, and in a similar capacity with the author, Mr. J. B. Priestley, of *The Good Companions*. A new woman dramatist was "C. L. Anthony," whose *Autumn Crocus* captured the public fancy, while Mr. Ashley Duke's *Elizabeth of England* and *The Midshipmaid* by Ian Hay and Stephen King-Hall were two other notable successes of the year.

The following is a list of productions between Nov. 1, 1930, and Oct. 31, 1931:—

ADELPHI, 411 Strand, W.C. 2.—(1930) *Dec.* 3. *Ever Green*, Mr. C. B. Cochran's musical show, by Benn W. Levy, music by Richard Rodgers (Messrs. Sonnie Hale, Leon Morton and Albert Burdon and Mesdames Jessie Matthews, Jean Cadell and Joyce Barbour). (1931) *Sept.* 3. *Grand Hotel*, adapted by Edward Knoblock from Vicki Baum (Messrs. Lyn Harding, Ernest Milton, Hugh Williams and Ivor Barnard and Mesdames Ursula Jeans and Elena Miramova).

ALDWYCH, Aldwych, W.C. 2.—(1930) *Nov.* 24. *Marry the Girl*, by George Arthurs and Arthur Miller (Messrs. Ralph Lynn, Tom Walls and J. Robertson Hare and Mesdames Mary Brough and Winifred Shotter). (1931) *May* 25. *Turkey Time*, by Ben Travers (Messrs. Ralph Lynn, Tom Walls and J. Robertson Hare and Mesdames Winifred Shotter, Mary Brough and Ethel Coleridge).

ALHAMBRA, 23 Charing Cross Road, W.C. 2.—(1931) *June* 8. *The Desert Song*, musical play, revived (Messrs. Alec Fraser, John E. Coyle and Dennis Hoey and Mesdames Sylvia Welling and Elsa Palmer). *Aug.* 17. *Waltzes from Vienna*, operetta with Strauss music (Messrs. Dennis Noble, Robert Holliday and Davy Burnaby and Miss Marie Burke.

AMBASSADORS, West Street, Cambridge Circus, W.C. 2.—(1930) *Dec.* 11. *To See Ourselves*, by E. M. Delafield (Messrs. Nicholas Hannen and Maurice Evans and Mesdames Marda Vanne and Helen Spencer). (1931) *May* 11. *The Hairy Ape*, by Eugene O'Neill (Messrs. Paul Robeson and Lawrence Hanray and Mesdames Norah Balfour and F. Marriott-Watson). *June* 6. *A Knight Passed By*, by Jan Fabricius, English version by W. A. Darlington (Messrs. Nicholas Hannen and David Horne and Mesdames Peggy Ashcroft and Joan White). *June* 22. *Noé*, by André Obey (La Compagnie des Quinze from the Théâtre du Vieux-Colombier, Paris). *July* 9. *Mrs. Fischer's War*, adapted by Joan Temple and Henrietta Leslie from the latter's novel (Messrs. Tristau Rawson, Louis Hayward and Neville Brook and Mesdames Joan Temple and Gladys Tudor). *Oct.* 6. *The Queen's Husband*, by Robert E. Sherwood (Messrs. Barry Jones Maurice Colbourne and Reginald Bach and Mesdames Grace Lane and Barbara Wilcox).

APOLLO, Shaftesbury Avenue, W. 1.—(1930) *Dec.* 22. *The Private Secretary*, revived (Messrs. Charles Walenn, Barrie Livesey and Fewlass Llewellyn). (1931) *Jan.* 29. *Bed Rock*, by Eden Phillpotts, H. F. Maltby and Macdonald Hastings (Messrs. Ivan Samson, B. N. Lewin and Stanley Drewitt and Mesdames Zillah Bateman and Rosalinde Fuller). *April* 7. *The New Gossoon*, by George Shiels (Messrs. Barry Fitzgerald, Sydney Morgan and J. A. O'Rourke and Mesdames Sara Allgood and Moya Nugent). *Aug.* 5. *Queer Fish*, by Will Scott (Messrs. D. A. Clarke-Smith, H. Arthur Hardy and Denys Blakelock and Miss Margaret Scudamore). *Oct.* 12. *There's Always Juliet*, by John Van Druten (Messrs. Herbert Marshall and Cyril Raymond and Mesdames Edna Best and May Whitty).

CAMBRIDGE, Cambridge Circus, W.C. 2.—(1931) *Feb.* 5. *Kong*, by Harold Kingsley (Messrs. Oscar Asche, Lyn Harding, Godfrey Tearle and Geoffrey Davis and Mesdames Ursula Jeans and Dorothy Black). *March* 20. New season of Nikita Balieff's *Chauve-Souris*. *June* 2. *The Sign of the Seven Dials*, an "omnibus entertainment" (Messrs. Seymour Hicks, Billy Leonard and Ronald Frankau and Mesdames Betty Stockfield, Renee Gadd and Elizabeth Pollock). *Sept.* 30. *Elizabeth of England*, by Ferdinand Bruckner, adapted from the German by Ashley Dukes (Messrs. Matheson Lang, Leslie Perrins, A. Bromley-Davenport and Frank Vosper and Mesdames Phyllis Neilson-Terry and Margaretta Scott.

Frederick Lamport (Messrs. Chic York, Terry Kendall and Eric Roland and Mesdames Rose King and Pat Kendall).

WESTMINSTER, Palace Street, Buckingham Gate, S.W. 1.—(1931) *Oct.* 7. *The Anatomist*, by James Bridie (Messrs. Henry Ainley, J. A. O'Rourke and Harry Hutchinson and Mesdames Betty Hardy, Gillian Scaife and Flora Robson).

WHITEHALL, Whitehall, S.W. 1.—(1931) *Feb.* 16. *Good Losers*, by Michael Arlen and Walter Hackett (Messrs. Ian Hunter, Francis Lister and Eric Maturin and Mesdames Marion Lorne and Cathleen Nesbitt). *July* 28. *Take a Chance*, by Walter Hackett (Messrs. Ian Hunter, Hugh Wakefield and Francis Lister and Mesdames Marion Lorne and Ruth Taylor).

WYNDHAM'S, Charing Cross Road, W.C. 2.—(1930) *Nov.* 20. *The Mouthpiece*, by Edgar Wallace (Messrs. W. Cronin-Wilson, Emlyn Williams, James Raglan and John Turnbull and Mesdames Margaret Bannerman and Mabel Terry-Lewis). *Dec.* 16. *Smoky Cell*, by Edgar Wallace (Messrs. Bernard Nedell, Harold Huth, Ben Welden and Roy Emerton). (1931) *April* 7. *Charles the Third*, by Curt Götz, adapted by Edgar Wallace (Messrs. Ronald Squire and Henry Vibart and Mesdames Peggy Ashcroft and Mabel Terry-Lewis). *April* 22. *Jack O'Lantern*, by George Goodchild and James Dawson (Messrs. Edmund Willard, Paul Neville, Ivan Samson and James C. Aubrey and Miss Zillah Bateman). *May* 15. *The Old Man*, by Edgar Wallace (Messrs. Alfred Drayton and Jack Melford and Mesdames Frances Doble and Maisie Gay). *Aug.* 18. *The Case of the Frightened Lady*, by Edgar Wallace (Messrs. Emlyn Williams, W. Cronin-Wilson and Gordon Harker and Miss Cathleen Nesbitt).

THE REPERTORY PLAYERS produced at the Strand on *Nov.* 9, 1930, *A Murder has been Arranged*, by Emlyn Williams (Messrs. Henry Kendall and Whitmore Humphreys and Mesdames Margaretta Scott and Amy Veness); at the Piccadilly on *Dec.* 14, *The Merchant and Venus*, by Laurence Selwood (Messrs. Ernest Jay and Ballard Berkeley and Mesdames Pamela Carme, Ruth Taylor and Kathleen Harrison); at the Phœnix on *Jan.* 11, 1931, *John Brown's Body*, by Patrick Hamilton (Messrs. Ernest Milton, Richard Gray and Edward Chapman and Miss Minnie Rayner); at the Phœnix on *Feb.* 22, *Something Strange*, by Frank Vosper (Messrs. Henry Oscar and Arthur Macrae and Mesdames Fabia Drake and Una O'Connor); at the Phœnix on *March* 29, *The Arch-Duchess*, by G. P. Robinson (Messrs. Robert Douglas and Cecil Parker and Mesdames Mabel Sealby and Renée Gadd); at the New on *June* 7, *In a Garden*, by Philip Barry (Messrs. Anthony Ireland and Ballard Berkeley and Mesdames Fabia Drake and Edith Sharpe); at the Savoy on *Sept.* 27, *Just Another Day*, by C. Stafford Dickens (Messrs. Henry Hewitt, Edward Chapman, Robert Holmes and Richard Goolden and Mesdames Mollie Rankin and Agnes Lauchlan).

THE STAGE SOCIETY produced at the Prince of Wales on *Dec.* 14, 1930, *The Borrowed Life*, by Gladys Parrish (Messrs. Alan Napier, Glen Byam Shaw and Alfred Harris and Mesdames Miriam Lewes and Clare Harris); at the Prince of Wales's on *Feb.* 15, 1931, *Three Flats*, by Malcolm Muggeridge (Messrs. Barry K. Barnes and Andrew Leigh and Mesdames Susan Richmond, Dorice Fordred and Margaret Yarde); at the Prince of Wales's on *March* 23, *Widowers' Houses*, Bernard Shaw's play, revived (Messrs. Barry K. Barnes and Cedric Hardwicke and Mesdames Marjorie Mars and Phyllis Shand).

THE FILMS.

FOLLOWING is a list of some of the principal films shown publicly in London from Nov. 1, 1930, to Oct. 31, 1931:—

ACADEMY, 165 Oxford Street, W.C. 1.—(1931) *March* 30. *Le Roi des Resquilleurs* (M. Mormorton). *April* 20. *Jean de la Lune*. *June* 8. *Earth*, Russian. *June* 15. *Crainquebille*. *June* 29. *The Passion of Joan of Arc*. *July* 6. *The Marriage of Figaro*, German.

ALHAMBRA, 23 Charing Cross Road, W.C. 2.—(1930) *Nov.* 10. *Dawn Patrol* (Richard Barthelmess). *Nov.* 18. *The Mystery of Life*. *Dec.* 11. *Under the Roofs of Paris*, in French. *Dec.* 29. *Just Imagine*. (1931) *Jan.* 12. *The Return of Dr. Fu Manchu*. *Jan.* 26. *Honey* (Nancy Carroll). *Feb.* 2. *The Dancers* (Lois Moran). *March* 9. *To Oblige a Lady*, British (Maisie Gay). *March* 23. *Kissing Cup's Race* (Madeleine Carroll).

CAPITOL, Haymarket, S.W. 1.—(1930) *Nov.* 17. *Her Man* (Helen Twelvetrees). *Nov.* 24. *Captain Cluve, Bart.* (Joan Bennett). *Dec.* 15. *A Devil with Women* (Victor McLaglen). *Dec.* 29. *Oh! For a Man* (Reginald Denny and Jeanette Macdonald). (1931) *Jan.* 5. *Sin Takes a Holiday* (Constance Bennett). *Jan.* 26. *Life of the Party* (Winnie Lightner). *Feb.* 16. *Plunder*, British (Ralph Lynn, Tom Walls and Mary Brough). *March* 2. *Her Child*. *March* 16. *Dracula* (Bela Lugosi). *April* 6. *Third Time Lucky* (Bobby Howes). *April* 20. *No Greater Love* (Raquel Torres). *April* 27. *Charlie Chan Carries On* (Warner Oland). *June* 1. *Resurrection* (John Boles and Lupe Velez). *June* 8. *Ten Cents a Dance*. *June* 15. *Alibi* (Austin Trevor). *July* 6. *Always Good-bye* (Elissa Landi). *July* 20. *Subway Express* (Jack Holt). *July* 27. *Annabelle's Affairs* (Jeanette Macdonald). *Aug.* 9. *Flood*. *Sept.* 14. *Up for the Cup*, British (Sydney Howard). *Sept.* 28. *The Ghost Train* (Jack Hulbert). *Oct.* 19. *The Calendar*, British (Herbert Marshall and Edna Best).

CARLTON, Haymarket, S.W. 1.—(1930) *Nov.* 24. *Animal Crackers* (The Four Marx Brothers). (1931) *Jan.* 12. *How He Lied to Her Husband*, version of Bernard Shaw's play (Edmund Gwenn, Robert Harris and Vera Lennox), and *Monte Carlo* (Jack Buchanan and Jeanette Macdonald). *March* 5. *Playboy of Paris* (Maurice Chevalier). *March* 26. *Morocco* (Gary Cooper, Adolph Menjou and Marlene Dietrich). *May* 11. *The Right to Love* (Ruth Chatterton). *May* 18. *Skippy* (Jackie Cooper and Mitzi Green). *June* 2. *Tarnished Lady* (Clive Brook and Tallulah Bankhead). *June* 22. *Dishonoured* (Marlene Dietrich and Victor McLaglen). *July* 27. *The Smiling Lieutenant* (Maurice Chevalier and Claudette Colbert). *Sept.* 28. *Monkey Business* (The Marx Brothers). *Oct.* 28. *My Sin* (Tallulah Bankhead).

DOMINION, Tottenham Court Road, W. 1.—(1930) *Nov.* 17. *Swing High* (Helen Twelvetrees).

(1931) *Feb.* 27. *City Lights*, written, directed and produced by Charles Chaplin (Charlie Chaplin and Virginia Cherrill). *June* 19. *Indiscreet* (Gloria Swanson). *July* 20. *The Lady Refuses* (Betty Compson). *Aug.* 9. *My Wife's Family* (Gene Gerrard). *Oct.* 19. *The Unholy Garden* (Ronald Colman).

EMPIRE, Leicester Square. W.C. 1.—(1930) *Nov.* 10. *Our Blushing Brides* (Joan Crawford). *Nov.* 28. *Compromising Daphne*, British (Charles Hickman and Jean Colin). *Dec.* 12. *War Nurse* (Robert Montgomery and Anita Page). *Dec.* 29. *Billy the Kid* (Wallace Beery). (1931) *Jan.* 2. *Let Us Be Gay* (Norma Shearer and Marie Dressler). *Jan.* 16. *Jenny Lind* (Reginald Denny and Grace Moore). *Jan.* 26. *Paid* (Joan Crawford). *Jan.* 30. *Madame Satan* (Kay Johnson). *Feb.* 6. *Min and Bill* (Wallace Beery and Marie Dressler). *Feb.* 22. *The Bachelor Father* (C. Aubrey Smith and Marion Davies). *March* 2. *Passion Flower* (Kay Francis and Kay Johnson). *March* 13. *Trader Horn*, nature film (Harry Carey). *April* 17. *New Moon* (Lawrence Tibbett, Adolphe Menjou and Grace Moore). *April* 27. *Reducing* (Marie Dressler and Polly Moran). *May* 10. *Inspiration* (Greta Garbo). *May* 18. *Romeo in Pyjamas* (Buster Keaton). *May* 25. *The Outsider*, British (Harold Huth and Joan Barry). *May* 29. *Dance Fools, Dance* (Joan Crawford). *June* 15. *Strangers May Kiss* (Norma Shearer). *July* 6. *Daybreak* (Ramon Novarro). *July* 13. *Jailbirds* (Laurel and Hardy). *July* 20. *Never the Twain Shall Meet*. *July* 27. *Shipmates* (Robert Montgomery). *Aug.* 2. *The Dancing Partner* (William Haines). *Aug.* 9. *Laughing Sinners* (Joan Crawford). *Aug.* 30. *The Secret 6* (Wallace Beery). *Sept.* 14. *Son of India* (Ramon Novarro). *Sept.* 28. *The Man in Possession* (Robert Montgomery). *Oct.* 2. *A Free Soul* (Norma Shearer). *Oct.* 19. *The White Man* (Warner Baxter and Lupe Velez). *Oct.* 26. *This Modern Age* (Joan Crawford).

LEICESTER SQUARE, Leicester Square. W.C. 1.—(1930) *Dec.* 19. *Viennese Nights* (Alexander Gray and Vivienne Segal). (1931) *Jan.* 12. *Kismet* (Otis Skinner). *March* 1. *The Sleeping Cardinal*, founded on Sherlock Holmes' stories (Arthur Wontner). *March* 6. *Cimarron* (Richard Dix). *April* 6. *Millie* (Helen Twelvetrees). *April* 20. *Beau Ideal*. *May* 25. *Behind Office Doors* (Robert Ames and Mary Astor). *June* 15. *Cracked Nuts* (Wheeler and Wolsey). *July* 27. *A Woman of Experience* (Helen Twelvetrees). *Aug.* 23. *Sally in Our Alley* (Gracie Fields). *Oct.* 12. *Rebound* (Ina Claire).

LONDON PAVILION, Piccadilly Circus, W. 1.—(1931) *Feb.* 16. *Abraham Lincoln*. *April* 20. *Dreyfus*, British (Cedric Hardwicke, Charles Carson, George Merritt and Beatrix Thomson). *May* 20. *Avalanche* (Herr Rist and Frauleiu Riefenstahl). *June* 8. *Glamour*, British (Seymour Hicks). *June* 15. *Let's Love and Laugh* (Gene Gerrard). *July* 30. *The Flying Fool*, British (Henry Kendall and Benita Hume). *Aug.* 30. *Love Lies* (Stanley Lupino). *Oct.* 5. *Hobson's Choice* (James Harcourt). *Oct.* 19. *Bought* (Constance Bennett).

MARBLE ARCH PAVILION, Marble Arch, W. 1.—(1930) *Nov.* 24. *Moby Dick* (John Barrymore and Joan Bennett). *Dec.* 1. *Birds of Prey*, British (Robert Loraine and Aubrey Smith). *Dec.* 29. *Canaries Sometimes Sing* (Tom Walls and Yvonne Arnaud). (1931) *Jan.* 12. *The Chinese Bungalow* (Matheson Lang). *Jan.* 26. *Lightnin'* (Will Rogers). *Feb.* 16. *The W Plan* (Brian Aherne and Madeleine Carroll). *March* 23. *The Speckled Band* (Lyn Harding and Angela Baddeley). *April* 6. *Cain* (Thomy Bourdelle). *April* 20. *Song of the Alps* (Luis Trenker and Marie Glory). *June* 15. *The Lyons Mail* (Sir John Martin-Harvey and Norah Baring). *June* 29. *Srengali* (John Barrymore and Marian Marsh). *Aug.* 9. *The Millionaire* (George Arliss). *Oct.* 19. *The Mad Genius* (John Barrymore).

NEW GALLERY, 123 Regent Street, W. 1.—(1930) *Nov.* 24. *A Warm Corner* (Leslie Henson, Heather Thatcher and Connie Ediss). *Dec.* 26. *The Big Trail* (John Wayne and Marguerite Churchill). (1931) *Jan.* 12. *What a Widow* (Gloria Swanson). *Jan.* 16. *The Love Habit*, British (Seymour Hicks and Margot Grahame). *Jan.* 24. *Africa Speaks*. *Feb.* 23. *City of Song*, British (Jan Kiepura and Betty Stockfield). *March* 9. *Du Barry, Woman of Passion* (Norma Talmadge). *March* 23. *Charley's Aunt* (Charles Ruggles). *April* 6. *Tons of Money*, British (Ralph Lynn and Yvonne Arnaud). *April* 27. *More Than a Kiss* (Jeannette Macdonald). *May* 10. *The Ringer* (Franklin Dyall and Gordon Harker). *May* 17. *The Millionaire* (George Arliss and Noah Beery). *July* 6. *The Prodigal* (Lawrence Tibbett). *July* 20. 77 *Park Lane*, British (Dennis Neilson-Terry). *Aug.* 9. *Seed* (John Boles). *Aug.* 23. *Black Coffee* (Austin Trevor). *Aug.* 30. *The Man They Couldn't Arrest* (Hugh Wakefield). *Sept.* 14. *Transatlantic* (Edmund Lowe and Lois Moran). *Oct.* 5. *Hindle Wakes* (Norman McKinnel and Sybil Thorndike). *Oct.* 19. *The Happy Ending*, British (Benita Hume and Ann Grey). *Oct.* 26. *Alexander Hamilton* (George Arliss).

PALACE, Cambridge Circus, W.C. 2.—(1931) *March* 27. *Tell England*, Anthony Asquith's version of Ernest Raymond's novel. *May* 3. *Fra Diavolo*, French (Tino Pattiera). *May* 15. *The Birth of a Nation*, revived.

PHŒNIX, Charing Cross Road, W.C. 2.—(1931) *April* 22. *Le Million*, in French (M. René Lefebore).

PLAZA, Piccadilly Circus, W. 1.—(1930) *Dec.* 5. *The Spoilers* (Gary Cooper and Betty Compson). *Dec.* 26. *Manslaughter* (Claudette Colbert). (1931) *Jan.* 9. *Grumpy*, from the play (Cyril Maude and Phillips Holmes). *Jan.* 26. *Love Among the Millionaires* (Clara Bow). *Feb.* 2. *Queen High*. *Feb.* 16. *Derelict* (George Bancroft). *March* 9. *Her Wedding Night* (Clara Bow). *March* 13. *Feet First* (Harold Lloyd). *April* 9. *Tom Sawyer* (Jackie Coogan). *April* 27. *Scandal Street* (George Bancroft). *May* 8. *The Royal Family of Broadway* (Ina Clare). *May* 15. *The Chance of a Night Time*, British (Ralph Lynn and Winifred Shotter). *June* 8. *Rango*, a jungle picture. *June* 22. *Tilly of Bloomsbury* (Sydney Howard and Phyllis Konstam). *June* 29. *Unfaithful*, by John Van Druten (Ruth Chatterton and Paul Cavanagh). *July* 20. *Man of the World* (William Powell). *July* 27. *These Charming People*, from Michael Arlen's story (Cyril Maude, Godfrey Tearle and Norah Swinburne). *Aug.* 9. *City Streets* (Gary Cooper). *Sept.* 21. *Tabu*. *Sept.* 28. *The Magnificent Lie* (Ruth Chatterton). *Oct.* 5. *Murder by the Clock* (Lilyan Tashman). *Oct.* 12. *Silence* (Clive Brook). *Oct.* 26. *Fighting Caravans* (Lily Damita).

POLYTECHNIC, Regent Street, W. 1.—(1930) *Nov.* 10. *Dassan*, penguin picture in African setting, by Cherry Kearton. (1931) *Feb.* 16, *The Silent Enemy*.

REGAL, Marble Arch, W. 1.—(1930) *Nov.* 14. *The Temporary Widow* (Felix Aylmer and Frederick Lloyd). *Dec.* 1. *The Man from Chicago*, British (Bernard Nedell). *Dec.* 8. *Almost a Honeymoon*, British (Clifford Mollison and Dodo Watts). *Dec.* 29. *The Middle Watch.* (1931) *Jan.* 12. *Cape Forlorn* (Ian Hunter and Fay Compton). *Jan.* 26. *The Woman Between* (Owen Nares and Adrienne Allen). *Feb.* 12. *Saint Joan—The Maid* (Simone Genevois). *Feb.* 23. *The Love Habit*, British (Seymour Hicks and Margot Grahame). *March* 9. *The Man Who Came Back* (Charles Farrell and Janet Gaynor). *March* 16. *Outward Bound*. *March* 28. *Poliphar's Wife*, British (Laurence Olivier and Nora Swinburne). *April* 4. *The Bat Whispers* (Chester Morris). *April* 20. *The Criminal Code* (Walter Huston). *May* 3. *The Skin Game*, from John Galsworthy's play, British (Edmund Gwenn and Phyllis Konstam). *May* 22. *Kiki* (Mary Pickford). *June* 8. *A Yankee at King Arthur's Court* (Will Rogers). *June* 22. *East Lynne* (Ann Harding and Clive Brook). *July* 6. *Father's Son*. *July* 13. *Body and Soul* (Elissa Landi and Charles Farrell). *Aug.* 2. *The Man at Six*, British (Charles Farrell). *Sept.* 14 *The Maltese Falcon* (Bebe Daniels). *Oct.* 5. *Reaching for the Moon* (Douglas Fairbanks).

STOLL PICTURE HOUSE, Kingsway, W.C. 2.—(1930) *Dec.* 15. *So This is London?* (Will Rogers and Irene Rich). *Dec.* 29. *Song O' My Heart* (John McCormack). (1931) *March* 2. *On Approval* (Tom Walls and Yvonne Arnaud).

TIVOLI, Strand, W.C. 2.—(1930) *Dec.* 26. *One Heavenly Night* (John Boles and Evelyn Laye). (1931) *Feb.* 16. *The Devil to Pay*, by Frederick Lonsdale (Ronald Colman, Frederick Kerr and Loretta Young). *April* 13. *The Sport of Kings*, British (Leslie Henson, Gordon Harker and Hugh Wakefield). *May* 2. *The Front Page* (Adolphe Menjou). *June* 1. *Ben-Hur* (Ramon Navarro). *June* 15. *Dirigible* (Jack Holt and Fay Wray). *Aug.* 3. *Daddy Long-legs* (Janet Gaynor). *Sept.* 14. *Bad Girl* (James Dunn and Sally Eilers). *Oct.* 12. *Merely Mary Ann* (Janet Gaynor and Charles Farrell).

STATISTICS OF PASSENGERS PER DAY AT LONDON TERMINI (1930).

In a year when change and uncertainty were experienced in many departments of national life the progress of British broadcasting provided a reassuring record of development and achievement. The British Broadcasting Corporation, which took the place of the old British Broadcasting Company, came into being on January 1, 1927, and at the close of 1931 it had thus completed the first five years of its existence. Its fifth year fully maintained the standard and variety of the broadcast programmes, and a detailed survey of the year's work would touch life at almost every conceivable point.

The popularity of broadcasting was demonstrated once more by the increase in the number of wireless licences. In 1928, the year's increase was 233,218; in 1929, 328,344; in 1930, 455,174; and the first eight months of 1931 saw an increase of 432,192, thus making it certain that the full figures for the year would show a record increase. The actual number of licences in force on August 31, 1931, was 3,844,102, including 25,488 free licences for the blind.

The financial position of the Corporation was reviewed during the year by the May Committee on National Expenditure, which suggested a drastic revision of the scale on which licence receipts are shared by the B.B.C., the Treasury and the Post Office. The Committee's proposals, which might have seriously impaired the quality of the programmes, were not adopted by the Government, but the B.B.C. made its own contribution to the general national retrenchment inaugurated in the autumn. It agreed to forgo, out of its allotted proportion of licence revenue, a sum of £50,000 for the period up to March 31, 1932, and a sum of £150,000 for the following financial year. On the assumption of a continued increase in the number of licences, £4,000,000 of wireless licence receipts will be given to public funds during the year 1932-1973, while £1,250,000 will be actually devoted to broadcasting purposes.

GENERAL DEVELOPMENTS.

One of the year's developments which aroused considerable interest in London was the completion of Broadcasting House, the new B.B.C. headquarters in Portland Place. With nine floors and three basements, and twenty studios encased in a sound-proof central tower, Broadcasting House is a far more comprehensive building than the old headquarters at Savoy Hill, which were ingeniously adapted from a block of flats, a Turkish bath and a department store. Architecturally the new building has been compared to a battleship, and its curving structure presents a slightly bizarre but thoroughly modern appearance. The transference of the B.B.C. to its new headquarters began in September.

As regards the actual programmes broadcast, a much more important development was the opening of the new high-power transmitting station near Slaithwaite, Yorkshire, known as the North Regional Station. This was part of the B.B.C. regional scheme, which is designed to enable as many listeners as possible to obtain a service of alternative programmes. Instead of receiving one programme only from a local low-power relay station, the North of England listener can now choose between two wave-lengths which are used by the new station at Slaithwaite. One of them (479·2 metres) sends out the North Regional programme, which contains a fair proportion of material of local interest, under the general direction of the B.B.C.'s Manchester station; and the other (301·5 metres) relays the National Programme from Daventry. This dual service began in July, and constructional work on similar lines is in progress at Westerglen, near Falkirk, which will eventually provide an alternative programme service for as large an area of Scotland as it is possible to cover. The introduction of the new Slaithwaite transmitter caused a reshuffle of the wave-lengths used in the provinces, the Midland Regional transmitter being given 398·9 metres and the Glasgow transmitter 376·4 metres.

There is not much to report about the technical development of broadcasting itself. Television is still in its experimental stage, and those who are following its development have had the advantage of receiving frequent experimental transmissions by the Baird process. These transmissions have been generally given from the Baird studios, but on August 19 a television programme of song and dance was transmitted for the first time from a B.B.C. studio. The date may have an historical value in the future.

Another useful invention which has made its debut during the year is the Blattnerphone, an instrument which records sound on a magnetic steel tape and can reproduce it either immediately or at any later time. An important broadcast item can thus be preserved for future use. The first occasion on which the Blattnerphone was publicly operated by the B.B.C. was in the second general news bulletin on Derby Day, when the running commentary on the Derby was reproduced exactly as broadcast at the time of the race.

HEARING THE WORLD.

However good and admirable the B.B.C. programmes may be, it is inevitable that the widest popular appeal is generally made by what are known as "outside broadcasts." This phrase covers the broadcasting of actual events, speeches and ceremonies, and the delivery of running commentaries on those events which cannot be broadcast; and it is through the medium of "outside broadcasts" that the listener is enabled to hear the world while sitting by his own fireside.

A prominent place among such items must be given to speeches by members of the Royal Family and leading figures of British national life. An opportunity of hearing His Majesty the King was provided in 1931 by the opening of the Ilford Hospital extension, and the Prince of Wales, whose speeches were broadcast from several dinners and ceremonies, was also heard from Buenos Aires in March, when his speech at the opening of the British Empire Exhibition was most successfully relayed across the Atlantic. A few weeks later, when he was to address a crowded Manchester meeting on the lessons of his South American tour, His Royal Highness himself requested that his speech should be broadcast; and although his request was received only a short time before the meeting a transmission was at once arranged in the North Regional programme.

Speeches by the Duke of Gloucester, Mr. Ramsay MacDonald, Mr. Stanley Baldwin and Mr. Lloyd George were relayed from various ceremonies during 1931, and a notable (if rather recondite) broadcast was that of General Smuts's presidential address to the British Association. The addresses of Lord Rutherford, Senatore

Marconi and others were broadcast from the Faraday Commemorative Meeting in the Queen's Hall in September.

Two ceremonies which the B.B.C. relayed from abroad deserve special mention in this connection. One was the opening of the Vatican broadcasting station on February 12, when listeners in Great Britain and all over the world heard the voice of His Holiness the Pope; and the other was the funeral service for Maréchal Joffre at Notre Dame, followed by M. Barthou's funeral oration at the Invalides.

Listeners were also able to hear the Trooping the Colour ceremony on June 6, as well as the Aldershot and Southern Command Tattoos; while events on which running commentaries were relayed from the scene of action included the opening of the new Shieldhall dock at Glasgow by the King and Queen, the launching of *H.M.S. Leander*, the Schneider Trophy race, the Royal Air Force Display at Hendon, the Grand National, the Derby and the St. Leger, the Kentucky Derby (an American commentary), the Boat Race, the Wimbledon lawn-tennis championships, the T.T. motor and motor-cycle races, the fly-weight boxing championship of Great Britain, and a large number of Rugby and Association football matches, including the F.A. Cup Final. Unfortunately there is a good deal of doubt about the future of Association football broadcasts, for the Association football authorities have adopted the theory that running commentaries are harmful to gate receipts. During the summer they decided to place a ban on all commentaries, with the exception of the Cup Final, and this part of the broadcasting service is therefore in abeyance.

Relays from theatres and opera houses provide another method of extending the broadcasting service outside the studio. Operatic relays in 1931 were too numerous to be mentioned in detail, for in addition to many broadcasts from Covent Garden during the international season and the season of opera in English, there were also a large number of operatic relays from provincial theatres during the tour of the Covent Garden Opera Company. Great interest was taken in the relays of "The Barber of Seville" and "The Secret Marriage" from the Salzburg Festival, and of "Tristan and Isolde" from Wagner's Festspielhaus in Bayreuth. This was the first occasion on which a Bayreuth performance had been broadcast, and it was well received in England. It was also broadcast throughout Europe and in the United States.

Although the regional programmes included a number of relays from local theatres and music-halls, there were very few theatre relays (apart from opera) in the National Programme during 1931. Excerpts from the Royal Command Performance at the Palladium, from "Little Tommy Tucker" at Daly's Theatre, and from "Folly to be Wise" at the Piccadilly Theatre were successfully relayed, and it is to be hoped that more theatrical relays will be given in the future.

SPEECHES AND TALKS.

Apart from those which were relayed from outside ceremonies, the talks and speeches in the 1931 broadcasting programmes fell as usual into two main classes—the isolated speeches, many of which were arranged at short notice, and the formal talks arranged in groups or series, given either by a single lecturer or by a number of different speakers. Among the isolated speeches the most important were those by Mr. Ramsay MacDonald and Mr. Philip Snowden, in connexion with the political and financial developments of the late summer and autumn. Mr. MacDonald's speech on August 25, in which he explained to the listening world his reasons for accepting the leadership of the National Government, was one of the most arresting speeches that have ever been made before a British microphone, and Mr. Philip Snowden's explanation of the British suspension of the Gold Standard was also of the first importance. Other notable addresses were those by Mr. Snowden on his two Budgets and by party leaders during the General Election campaign.

Among other isolated talks of the year should be mentioned those by Mr. J. H. Whitley on the report of the Royal Commission on Labour in India; Sir Josiah Stamp on "A Thousand Million Saving Certificates" (in which he stressed the importance of saving, and attacked an opposite theory broadcast by Mr. J. M. Keynes a few weeks earlier); Mr. Bernard Shaw on Joan of Arc; Mr. Gordon Craig on the theatre; Sir Malcolm Campbell on his speed-record achievement at Daytona Beach; Mr. J. A. Mollison on his record flight from Australia to England; Sir Ian Hamilton and Mr. Compton Mackenzie on Gallipoli; Mr. W. S. Paley, President of the Columbia Broadcasting Company, on the present position of American broadcasting; Sir Oliver Lodge on "A Hundred Years of Science"; Sir Landon Ronald on Melba; and Senatore Marchese G. Marconi on "The Beginnings of Wireless." Oddly enough, this was the first occasion on which Marconi had spoken into a B.B.C. microphone.

The ordinary programme of talks covered a commendably wide field, ranging from the National Lectures, in which Sir Walter Morley Fletcher gave a fascinating address on "Biology and Statecraft," and Sir William Bragg discussed the achievements and influence of Faraday, to the frivolous series of "Idle Thoughts," in which Mr. Denis Mackail, Lord Ponsonby, Lady Diana Cooper and others discoursed amiably on anything that came into their heads. Of the various series which dealt with matters of national or international importance there were two which attracted particular attention—that on "The Problem of Unemployment," which concluded with statments of the Liberal, Labour and Conservative attitudes by Mr. B. Seebohm Rowntree, Mr. Herbert Morrison, and Mr. Stanley Baldwin, and that on "Russia in the Melting Pot," in which the speakers included Mr. H. R. Knickerbocker, Sir Bernard Pares, and Mr. H. G. Wells. Another political series was that on "The Effects of Tariffs on Unemployment," in which Mr. Lloyd George, Mr. William Graham, and Mr. Neville Chamberlain took part, and in the autumn Mr. H. G. Wells initiated an interesting symposium on "What I would do with the World."

Subjects of topical importance were "Numbering the People," in which the Registrar-General and others gave a useful introduction to the taking of the Census, and "The Treasures of Persia," which coincided with the Persian Art Exhibition at Burlington House. The literary talks included Mr. J. C. Squire's brilliant series on "The Enjoyment of Literature," Mr. T. S. Eliot's study of Dryden, Mr. Bonamy Dobree's appreciation of Defoe, and Sir Henry Newbolt's

"The Progress of English Prose"; and among the other subjects discussed were India, British Mandates, Science in the Making, Chemistry in Industry, the Health of the Worker, Marriage Past and Present, World Finance, and the Progress of English Music. In a series of talks and dialogues called "The World and Ourselves," listeners were given the opportunity of learning something about life in Finland, Sweden, Bulgaria, the Netherlands, Spain, and Czechoslovakia; and the Sunday series included Mr. E. F. Carritt's "What is Beauty?" and Dr. C. H. Dodd's "History of the Bible."

The concluding months of the year saw the inauguration of a new scheme of talks programme in which the talks were designed to illustrate different aspects of one main subject—"The Changing World." The early speakers in this ambitious scheme, which was intended to cover the whole of the winter, were Professor Arnold Plant "How Wealth has Increased," Mr. Harold Nicolson "The New Spirit in Literature," Professor H. Levy "What is Science?" Mr. Leonard Woolf "Can Democracy Survive?" and Professor J. Dover Wilson "Learning to Live."

Although for six days of the week the majority of the broadcast talks attained a high level of seriousness there was some relaxation on Saturday nights. The earlier Saturdays of the year provided instalments of a serial detective story, which proved to be rather poor entertainment, in spite of the efforts of Mr. E. C. Bentley, Mrs. Agatha Christie and others. A series of dialogues on "The Ideal Holiday" was more entertaining, and a great success was achieved by the talks on "Escape," in which escaped prisoners of war, both British and German, explained how they had outwitted their captors.

Poetry, which has perhaps been unduly neglected in the broadcast programmes, was represented by a series called "Mosaic," in which music and verse-reading were ingeniously blended; and in an Irish programme on September 8 Mr. W. B. Yeats gave a recital of some of his own poems.

The regular talks of the year included criticism of music (Mr. Ernest Newman), drama (Mr. James Agate), general literature (Mr. Desmond MacCarthy and Miss V. Sackville-West), fiction (Mr. Michael Sadleir, Mr. A. Duff Cooper and Miss Clemence Dane), and the cinema (Mr. Francis Birrell). In the earlier part of the year Mr. Harold Nicolson gave a weekly talk on topical events, and Mr. Vernon Bartlett continued his invaluable weekly expositions of international affairs.

MUSIC.

It is unnecessary to refer in detail to the broadcast concerts, for the most important of these were given in public at the Queen's Hall, and they belong to the year's music rather than the year's broadcasting. The B.B.C. Symphony Orchestra is now acknowledged to be one of the finest orchestras in Europe, and the regular broadcasts of Symphony and Promenade Concerts provided listeners with a large number of magnificent performances, in which many new works received their first performance in England. In the earlier part of the year the conductors who were engaged for the Symphony Concerts were also responsible for Sunday evening studio concerts, but this system was abandoned for the 1931-1932 series. The B.B.C. also gave concerts in connexion with the International Festival of Contemporary Music, which was held in England in 1931, and Arnold Schönberg and Manuel Falla were among the conductors of its own interesting series of Concerts of Contemporary Music. The works which received their first English performance in studio concerts included Frederic d'Erlanger's Requiem Mass, which was performed by the B.B.C. orchestra (conducted by Adrian Boult), a section of the National Chorus, and Miriam Licette, Astra Desmond, Frank Titterton, and Keith Falkner as soloists.

In addition to the important Sunday evening concerts, which were conducted by Stravinsky, Dohanyi, Ansermet and others, the innumerable studio concerts covered a wide range of classical, modern and light music, with the apparent aim of enabling listeners to hear as much as possible of the best music of the past and the present. Although the Symphony Orchestra is divisible into various combinations for the presentation of different kinds of music, the orchestral resources of the B.B.C. were extended during the year by the formation of the B.B.C. Theatre Orchestra, which devotes itself to lighter musical requirements; and more lowbrow tastes were still served by the Wireless Military Band and Jack Payne's B.B.C. Dance Orchestra.

Among the distinguished singers and musicians who gave studio recitals during the year may be mentioned Ponishnoff, John Coates, Maggie Teyte, Herbert Heyner and Paul Robeson, and although most of the year's opera was relayed from outside there was an excellent studio performance of "Kitesh," conducted by Albert Coates. Listeners were also able to hear relays of concerts by the Hallé Orchestra, the Liverpool Philharmonic Society, the City of Birmingham Orchestra and the Hastings Municipal Orchestra, and frequent concerts were given by the now defunct National Orchestra of Wales. The Bach Cantatas, which caused endless discussion of the "Do we have too much Bach?" problem, were continued on Sundays.

DRAMA.

The dramatic side of broadcasting has not yet been fully developed, and at present there is a wide divergence between the aims of broadcast music and those of broadcast drama. Whereas the musical programmes of the B.B.C. are designed to include a large proportion of the best music of the past as well as modern novelties, the dramatic programmes have too many novelties or second-rate offerings and make little appeal to the student of English drama. Apart from a good version of "The Tempest" (with John Gielgud and Angela Baddeley) and a deplorable condensation of "King John" (which even Robert Farquharson and Irene Vanbrugh could not render tolerable), very few plays by notable English dramatists were given in the National Programme in 1931. Among the few were Marlowe's "Edward II," Galsworthy's "The Forest," C. K. Munro's "The Rumour," Clemence Dane's "Will Shakespeare" (with Laura Cowie and John Gielgud), Lord Dunsany's "If" (with Henry Ainley) and Clifford Bax's "Midsummer Madness"; and other stage-plays which were broadcast included Martinez Sierra's "The Romantic Young Lady" (with George Grossmith), Bruno Frank's "Twelve Thousand," E. M. Delafield's "To See Ourselves" and Ian Hay's "Tilly of Bloomsbury." No doubt there are grave difficulties in the adaptation of ordinary plays for broadcasting, but surely some doughtier effort could be made to acquaint listeners with

the best and present masterpieces of English drama.

The dramatic novelties of the year included a number of plays specially written for broadcasting, such as Compton Mackenzie's "The Lost Cause," L. Du Garde Peach's "The Path of Glory" and "The *Mary Celeste*," Felix Mendelssohn's "Assault on Professor Weltmann" and Holt Marvell's "Across The Moon," and a larger number of adapted novels and short stories. The most successful of these were Michael Talbot's adaptation of Leonard Merrick's "Little Flower of the Wood" and Cecil Lewis's version of Joseph Conrad's "The Rescue" (with Robert Loraine). R. L. Stevenson and Lloyd Osbourne's "The Wrecker," Somerset Maugham's "Mackintosh," A. E. W. Mason's "The House of the Arrow," G. K. Chesterton's "The Napoleon of Notting Hill" and "Sapper's" "Raymond Blair—Drunkard," were also adapted for microphone purposes, and scenes from "Handley Cross" were broadcast under the title of "The Conquering Hero."

In addition to the drama in the National Programme the Regional Stations also presented plays in their own programmes. The most notable were Lennox Robinson's "The Far-off Hills" and J. M. Synge's "Riders to the Sea" (Belfast), Githa Sowerby's "Rutherford and Son," James R. Gregson's "Young Imeson" and Stanley Houghton's "The Younger Generation" (North Regional), Miles Malleson's "A Man of Ideas" (Midland Regional), and J. O. Francis's "The Beaten Track" (West Regional).

LIGHT ENTERTAINMENT.

The large quantity of vaudeville programmes which were broadcast during the year enabled listeners to hear many popular stage performers, some of whom adopted entirely new styles for broadcasting purposes. Two of the most interesting recruits were the "negro" back-chat comedians, Alexander and Mose, who were later revealed as the English actors, James Carew and Billy Bennett; and Jeanne de Casalis created a new microphone personality in the ramblings of a hypothetical Mrs. Feather. A series of duologues between Jack and Claude Hulbert were another prominent vaudeville feature, and among other contributors to the many programmes may be mentioned Cicely Courtneidge, Leslie Henson, Nellie Wallace, Bert Coote, the Houston Sisters, Clifford Mollison, Anita Elson, Ella Retford, Ronald Frankau, Ernest Thesiger, Isobel Elsom, Norah Blaney, Harry Tate, Chick Farr, Arthur Prince, Wish Wynne and Melville Gideon, as well as such established broadcasters as Clapham and Dwyer, Mr. Flotsam and Mr. Jetsam, Tommy Handley, Mabel Constanduros and Michael Hogan, Gillie Potter, Ann Penn, Stainless Stephen, Elizabeth Pollock, Paul England, Pat Paterson and Enid Trevor. Performances by Sir Harry Lauder, Richard Tauber, Jeanette Macdonald and Nikita Balieff's Chauve-Souris were also given during the year, though they did not actually figure in the vaudeville programmes.

While the average vaudeville programme had much in common with the work of the modern music-hall there were some pleasant experiments in the presentation of more sophisticated programmes, which were more akin to the original Continental cabaret than to any form of entertainment known in England. These programmes, which included such items as Lady Gregory's "The Gaol Gate," a poetical guessing-game conducted by Lady Tree, Elsa Lanchester's burlesqu renderings of old songs, a musical setting some of "The Bab Ballads" and a reading some of his own verses by Captain Harry Grahan were obviously designed to make quite a differer appeal from that of the ordinary B.B.C. vaud ville; and the experiment is one which shoul certainly be continued.

Musical comedy and revue also figured in th B.B.C. programmes. The most important the musical comedy productions was Gordo McConnel's adaptation of the Continental music comedy "Evelyn," which was presented unde the title of "Rich Girl, Poor Girl," with Phyll Neilson-Terry in the principal rôle. It was th first time that this production had been heard i England, and although it turned out to be quit a modest affair it showed a commendable ente prise on the part of the B.B.C. Other musica comedies broadcast were "The Cousin fro Nowhere," "The Gypsy Princess," and C. Deni Freeman's "The King can do no Wrong."

There was a plentiful supply of revues, rangin from the brilliant "Pursuit of Pleasure" to Phili Ridgeway's depressing "Ridgeway Parades. "The Pursuit of Pleasure," for which Lauc Sieveking and Harold Scott were jointly respor sible, was a delightful reconstruction of th various forms of popular entertainment of th 18th, 19th and 20th centuries, and was certainl one of the best pieces of broadcast entertainmen during 1931. In the latter half of the year Archi De Bear made a welcome appearance as a pro ducer of microphone revues, and his "Listener Inn" (which he wrote in conjunction with Reg nald Arkell) and "Crikey" (in which Robert Hal Mimi Crawford, Enid Stamp-Taylor, Anona Win and others recalled some successful items fro his own theatrical productions) showed that gifted producer of stage revues can be a usefu asset to broadcasting. Among other revue were Gordon McConnel's amusing "More Air Nothings" and "A Piccadilly Dally," C. Deni Freeman's "From Montmartre to Montparnasse and "A Seat in Hyde Park," Graham Squier "B.B.C.—B.C.," Ernest Longstaffe's "River Side Lights," John Watt's delightful "Stop Press and rather tiresome "Au Lapin Qui Saute, McConnel and Watt's "Theatrescope," and L Du Garde Peach's "Our Town."

The agreeably fantastic productions of E. J King-Bull, such as "Precession," "The Deca dence of Terpsichore" and "Yes and Back Again, defy classification, as being not exactly dram and not exactly revue; but they made a distinc appeal to more sophisticated listeners.

EDUCATION AND RELIGION.

The furtherance of adult education by mean of cultural and educational talks is one of th acknowledged objects of the B.B.C., and i recent years a great impetus has been given t this work by the formation of discussion groups which meet to hear the talks and discuss th subjects. In the autumn and winter of 1930 1931 more than a thousand of these groups wer formed, and two important conferences wer organised in this connection in 1931. The first which was held in London in January, was national conference of group-leaders and studen listeners; and the second, which took place a Oxford in June, was a summer school for the training of wireless group-leaders. Each of them was under the auspices of the Central Council for Broadcast Adult Education. The question was

also discussed at an international conference in Vienna in August, when Sir John Reith, the Director-General of the B.B.C., was present.

A great deal of work was also done with regard to broadcasts to schools. The Central Council for School Broadcasting, which is under the chairmanship of Mr. H. A. L. Fisher, and is composed of representative teachers and others engaged in educational work, entered its third year of office in 1931, and it continued its task of arranging broadcast lessons which could be used by schools to supplement the ordinary class teaching. The subjects for 1931 comprised world history, nature study, biology and hygiene, music, English, French, German, geography, rural science and speech training; and among the speakers were Mr. A. Lloyd James, Sir Walford Davies, M. E. M. Stephan, Miss Rhoda Power, Mr. Frank Roscoe, Mr. Harold Nicolson, Mr. Gerald Heard, Mr. S. P. B. Mais, Mr. Eric Parker and Professor Winifred Cullis.

The attitude of the Church of England towards broadcasting was discussed at the Convocation of Canterbury in January, when the Joint Committee on the Religious Value of Broadcast Services placed on record its "grateful appreciation of the debt which was owed to the British Broadcasting Corporation for its determination that religion should be given its due and proper place in its programme as a whole." In addition to the morning studio service and the Sunday evening services, which were relayed from places of worship all over the country (the various denominations being represented in turn), a series of short Thursday evening services was begun in October. These services, which were initiated as being appropriate to the national emergency, were taken from St. Michael's, Chester Square, London.

During the year an important change was made in the membership of the B.B.C.'s Religious Advisory Committee, with the result that three leading Nonconformist bodies are now directly represented on the Committee. Members of the Regional Advisory Committee were also incorporated in the central body, which has thus been provided with greater variety of membership and brought into closer touch with the provinces.

MISCELLANEOUS.

The deaths of Sir William Bull, Sir Laming Worthington-Evans and Mr. Vernon Hartshorn during 1931 robbed the B.B.C. of three men who were closely connected with the early struggles of British Broadcasting. Sir William Bull was Vice-Chairman of the old British Broadcasting Company, whose functions were taken over by the present Corporation in 1926; Sir Laming Worthington-Evans, while holding office as Postmaster-General, was largely responsible for the efficient development of the licensing system; and Mr. Vernon Hartshorn, who was Postmaster-General in 1923-1924, first authorised the broadcasting of controversial political speeches.

Although the conduct of the B.B.C. does not often engage the attention of Parliament, an important debate on the Corporation's policy took place in the House of Lords in March, when the Earl of Radnor, who raised the subject, suggested that the B.B.C. programmes seemed to indicate a tendency to try to educate the people of Great Britain towards Socialism, and even towards Communism. He was answered by Lord Gainford, Vice-Chairman of the B.B.C., and Lord Crawford, Lord Astor and Lord Ponsonby also defended the Corporation against the charge of political bias. Lord Radnor eventually withdrew his motion, with the admission that the general opinion appeared to be that the B.B.C. could not be better.

Sir John Reith, the Director-General of the B.B.C., paid a visit to the United States in 1931, in the course of which he gave an address in New York to the National Advisory Council on Radio in Education.

At the general assembly of the International Broadcasting Union, held at Lausanne in June, Vice-Admiral C. D. Carpendale, the Controller of the B.B.C., was re-elected President for 1931-1932.

A newspaper ballot which was held in 1931 gave vaudeville, dance music, and news as the three most popular items in the B.B.C. programmes.

A survey of European wireless licences at the end of 1930 showed that Great Britain occupied third place, with regard to the relation of the number of its receiving sets to the total population. Denmark was first and Sweden second.

In the latter months of the year a rearrangement of programme timing was accompanied by an extension of the time devoted to bulletins for farmers.

A programme item called "Crisis in Spain" was the first British attempt to give a broadcast impression of a recent political event. Though the innovation was not entirely successful, its further developments should prove interesting.

Mr. A. J. Alan's infrequent appearances before the microphone enhanced his reputation as the supreme broadcast story-teller.

THE text of the Abnormal Importations (Customs Duties) Bill was issued on November 17, 1931. The measure was backed by Mr. Runciman (Chancellor of the Exchequer), Major Elliott (Financial Secretary to the Treasury), Major Hore-Belisha (Parliamentary Secretary, Board of Trade), and Sir Thomas Inskip (Solicitor-General). It consists of seven clauses as follows:—

I.—(1) If the Board of Trade are satisfied that articles of any class or description comprised in Class III. of the Import and Export List issued under the authority of the Treasury and the Commissioners of Customs and Excise for the year 1931 are being imported into the United Kingdom in abnormal quantities, it shall be lawful for the Board, with the concurrence of the Treasury, by Order to apply this Act to articles of that class or description.

(2) An Order made under this section shall be laid before the Commons House of Parliament so soon as may be after it is made, and shall cease to have effect on the expiration of a period of 28 days from the date upon which it was made unless at some time before the expiration of that period it has been approved by a resolution passed by that House:—

Provided that in reckoning any such period of 28 days, as aforesaid, no account shall be taken of any time during which Parliament is dissolved or prorogued or during which the Commons House is adjourned for more than four days.

(3) An Order so made may be varied or revoked by a subsequent Order made in the like manner and subject to the like provisions.

II.—(1) Subject to the provisions of this Act, there shall, on the importation into the United Kingdom of articles of any class or description to which, by virtue of an Order made under the last preceding section, this Act for the time being applies, be charged thereon such duties of Customs as may be specified in the Order not exceeding 100 per cent. of the value of the articles.

(2) No articles which are Empire products within the meaning of that expression as used in sub-section (1) of section 8 of the Finance Act, 1919, shall be chargeable with duty under this Act.

(3) Any duty chargeable under this Act on any article shall be charged in addition to any other duties of Customs chargeable on that article.

III.—(1) The value of any imported articles for the purposes of this Act shall be taken to be the price which an importer would give for the articles if the articles were delivered to him, freight and insurance paid, in bond at the port of importation, and duty shall be paid on that value as fixed by the Commissioners of Customs and Excise.

(2) The Commissioners of Customs and Excise may make regulations for the purpose of giving effect to the provisions of this section and in particular for requiring any person concerned with the importation of articles into the United Kingdom to furnish to the Commissioners in such form as they may require such information as is in their opinion necessary for a proper valuation of the articles, and to produce any books of account or other documents of whatever nature relating to the purchase, importation, or re-sale of the articles by that person.

(3) If any person contravenes or fails to comply with any regulations made under this section he shall in respect of each offence be liable to a customs penalty of £50.

IV.—If—

(*a*) any dispute arises whether any articles imported into the United Kingdom are articles specified in an Order made under this Act; or

(*b*) in ascertaining the proper rate of duty chargeable on any articles under this Act, any dispute arises as to the value of the articles;

the question shall be referred to the arbitration of a referee appointed by the Lord Chancellor, who shall not be an official of any Government department, and the decision of the referee with respect to the matter in dispute shall be final and conclusive, and sections thirty and thirty-one of the Customs Consolidation Act, 1876, shall apply as if the dispute were such a dispute as is referred to in the said section thirty, with the substitution of the application for a reference to a referee under this section for the action or suit mentioned in those sections.

V.—Subject to compliance with such conditions as to the security for the re-exportation of the articles as the Commissioners of Customs and Excise may impose, this Act shall not apply to articles imported for exportation after transit through the United Kingdom or by way of trans-shipment.

VI.—Anything authorised under this Act to be done by the Board of Trade may be done by the President of the Board, or, in his absence, by a Secretary of State.

VII.—(1) This Act may be cited as the Abnormal Importations (Customs Duties) Act, 1931.

(2) In this Act the expression "the United Kingdom" does not include the Isle of Man.

(3) This Act shall continue in force for a period of six months and no longer.

L'ACADÉMIE FRANÇAISE.

THE FRENCH ACADEMY is composed of 40 members, elected for life, and is the highest of the five Academies constituting *l'Institut de France* (*Secretary of the Institute*, M. Robert Rey nier). The Academy was founded by Cardinal Richelieu in 1635 and re-organized in 1816. The special object of the Academy is the composition of a Historical Dictionary of the French Language, and its members, "The Forty Immortals," are as follows:—

Elected.	Name.	Born.	Elected.	Name.	Born.
1894	Paul Bourget	1852	1922	Pierre de Nolhac	1859
1897	Gabriel Hanotaux	1853	1922	Georges Goyau	1869
1898	Henri Emile Lavedan	1859	1923	Henri Brémond	1865
1903	René Bazin	1853	1923	Edouard Estaunié	1862
1907	Maurice Donnay	1859	1923	Henri Robert	1863
1909	Raymond Poincaré	1860	1924	Camille Jullian	1869
1909	Eugène Brieux	1858	1924	Georges Lecomte	1867
1909	René Doumic	1860	1924	Emile Picard	1856
1909	*Marcel Prévost*	1862	1924	*Albert Besnard*	1849
1911	Henri de Regnier	1864	1925	A. de Caumont (Duc de la Force)	1878
1913	Maréchal Lyautey	1854	1925	Louis Bertrand	1866
1914	Pierre de la Gorce	1846	1925	Paul Valéry	1871
1914	Henri Bergson	1859	1927	Abel Hermant	1862
1918	Maréchal Joffre	1852	1927	Emile Male	1871
1918	Louis Barthou	1862	1927	Louis Madelin	1859
1918	*Alfred Baudrillart*	1859	1928	Maurice Paléologue	1856
1918	Jules Cambon	1845	1929	Maréchal Pétain	1863
1919	Henri Bordeaux	1870	1930	Charles de Gottic	1874
1920	Joseph Bédier	1864	1930	André Chaumeix	1867
1920	Louis Chevrillon	1864	1931	Général Weygand	

The four other Academies are:—

ACADÉMIE DES INSCRIPTIONS ET BELLES-LETTRES, founded 1663, 40 *members*.

ACADÉMIE DES SCIENCES, founded 1666, divided into 11 sections, each of which comprises 6 members.

ACADÉMIE DES BEAUX-ARTS, 5 sections, comprising 40 members, as follows—painting, 14 members; sculpture, 8; architecture, 8; engraving, 4; *musical composition*, 6.

ACADÉMIE DES SCIENCES MORALES ET POLITIQUES (*for the study of questions of social and political economy*), founded in 1832, 40 members, 5 sections.

All the Academies, with the exception of the Académie Française, elect a certain number of honorary members and of national foreign correspondents.
