(*b*) Pricing out estimates :—½ per cent.

(*c*) Measuring and making up account of variations upon contracts including pricing :—2½ per cent. upon the amount of the gross additions, and 1½ per cent. upon the amount of the gross omissions.

(*d*) Preparing approximate estimates :—½ per cent. upon the estimated cost.

(*e*) Surveying work in progress, taking particulars, and reporting for Interim Certificates :—½ per cent. upon the amount of the valuation.

(*f*) Taking particulars on site and writing specifications for works of alterations or repair, including supervision if required :—7½ per cent. on the amount expended or alternatively a charge based upon the time involved.

Schedule Contracts.

(*a*) Preparing, pricing and agreeing a schedule of prices :—½ per cent. upon the cost of the work.

(*b*) Measuring, bringing to account and valuing work done :—2½ per cent. upon the gross amount of the account.

II.—ENGINEERING WORK.

Lump Sum and Schedule Contracts.

Percentage charges half those for architectural work but the same scale in respect of charges based upon time.

III.—LITIGATION AND ARBITRATION.

For qualifying to give evidence, settling proofs, conferences with solicitors and counsel, attendance in courts or before arbitrators or other tribunals, and for other services in connexion, the charge is based upon the time involved, with a minimum of 5 guineas per day.

The above charges are exclusive of the cost of printing, lithography, and fair copies of accounts, and in all cases travelling and other out-of-pocket expenses are payable in addition to the fees.

CONSULTING ENGINEERS.

On *Constructional Work* the payment is usually a commission upon the estimated or actual cost of works covered by the Engineers' Specifications and (or) Drawings, or alternatively an agreed fee. The total commission is normally 5 per cent. unless such cost be less than £10,000, when remuneration is at a higher rate or by an agreed fee. Additional fees (usually 3 per cent. increase) are payable for Reinforced Concrete work.

For *Quantities and Accounts* (the services which in architectural work would not be covered by the Architect's fee but would be Quantity Surveyor's work) the usual charge is 1½ to 2½ per cent. or an agreed fee.

A copy of Professional Rules and Practice and Scale of Fees may be obtained (price 1*s.*) from the Hon. Sec. of the Association, 11, Victoria Street, Westminster, S.W. 1.

AUCTIONEERS, SURVEYORS AND ESTATE AGENTS.

1. Sales by Auction.

Freehold, Leasehold, and Copyhold Properties, including the preparation of particulars, and advising as to reserves :—On the first £300, 5 per cent. ; on the next £4,700, 2½ per cent. ; on the residue, 1½ per cent.

In addition to the above charges :—On amounts paid by the purchaser for *Chattels, Fixtures, Fittings, Trade Stocks*, and other *Movable Effects, Timber*, and *Tenant-right* under the conditions of sale, in addition to the purchase-money of the property :—5 per cent. on £500, and 2½ per cent. on residue, to include inventory and valuation.

Where the division of an Estate into a number of lots involves substantial additional work, increased remuneration as arranged between the Vendor and Auctioneer.

Sale before Auction.

After issue of advertisements, the same scale as by auction.

Non-Sale.

In the event of non-sale at the auction, a fee, the amount of which is a matter of arrangement, is payable.

Sale after Auction.

In the event of the property being sold within three months after the auction, the charges for non-sale would merge into the ordinary commission then payable.

Furniture, Trade Stocks, and Chattels, on the Vendor's Premises.—5 per cent. on the amount realised, exclusive of preparation of catalogues.

Plant and Machinery.—5 per cent. on the amount realised, exclusive of preparation of catalogues.

Live and Dead Farming Stock (except Horses, Pedigree Live-Stock, and Milk-Recorded Cattle).—2½ per cent. on live stock, and 5 per cent. on dead stock, on the amount realised.

Horses, Pedigree Live Stock and Milk-Recorded Cattle.—5 per cent. on the amount realised.

On Lots referred to in the last four paragraphs, reserved or bought in by or on behalf of the vendor.—One half the commission on sale, calculated on the amount of reserve or buying-in price.

2. Private Treaty Sales.

Freehold and Copyhold Estates and Houses, and Ground Leases.—On the first £300, 5 per cent. ; on the next £4,700, 2½ per cent. ; on the residue, 1½ per cent. ; and a commission, in addition, on the amount paid for *Chattels, Fixtures, Fittings, Furniture, Trade Stocks*, and other *Movable Effects, Timber, and Tenant-right*, of 5 per cent. up to £500, and 2½ per cent. on the residue, to include inventory and valuation

NOTE.—*In Sales by Auction and Private Treaty Sales.*—Where two Agents are co-operating at the request of the owner, the commission shall be at the rate of a scale and a quarter.

3. Purchases.

Freehold and Copyhold Estates and Houses, and Ground Leases.—One-half of the scale for sale by private treaty, calculated upon the amount of the purchase-money, but including inspection, advising as to value, and negotiating or bidding. If no purchase is effected, the usual scale for valuation should be charged : one guinea per cent. on first £1,000 ; half a guinea on next £9,000 ; and a quarter of a guinea per cent. beyond on the value of the property. Minimum fee, £5 5*s.*

4. Lettings.

Business Premises, Unfurnished Houses, Flats, &c., or on Disposing of all Leases (other than Ground Leases) by assignment or otherwise.—If the annual value be £100 or less 5 per cent. on one year's rent, where the term is for one year or less, and 7½ per cent. on one year's rent where the term is for more than one year. If the annual value be over £100 the above scale shall apply to the first £100 and on the excess rental over that amount, where the term is for three years or less, 5 per cent. on one year's rent ; where the term is for more than three years, 7½ per cent. on one year's rent ; in the case of *leases requiring the lessee to repair the demised premises* the commission is 10 per cent. on one year's rent, whatever the term. Upon the premium or consideration (in all cases), 5 per cent. up to £1,000, and 2½ per cent. on the residue ; and the commission on any sum obtained for fixtures, furniture, effects of any kind, of 5 per cent. up to £

and 2½ per cent. on the residue. In the case of a progressive rent the commission is based on the average rent receivable. When a property, which an agent has been instructed to 'et or sell, is let by him with an option to purchase, and the tenant afterwards exercises his option, the commission for selling, less the commission already paid on the letting, will then become payable.

For negotiating the Renting of Unfurnished Houses or Flats, excluding Survey or Valuation.—Half the commission payable for a letting.

On Letting Furnished Houses or Flats in Town or Country, or Shootings, including Collection of Rent.—5 per cent. on the first year's rental, and 2½ per cent. for the remainder of the term.

For negotiating the Renting of Furnished Houses or Flats, excluding Survey or Valuation.—Half the commission payable for a letting.

For Making or Checking Inventories of Furniture and Effects.—A minimum fee of two guineas per day, exclusive of expenses.

On Letting Land on Building Lease.—(*a*) On Ground Rents up to £50, one year's ground rent; (*b*) on Grount Rents exceeding £50 and not exceeding £100, as in (*a*) on first £50, plus 75 per cent. on the residue; (*c*) on Ground Rents exceeding £100 and not exceeding £1,000, as in (*b*) on first £100, plus 50 per cent. on the residue; (*d*) on Ground Rents exceeding £1,000, as in (*c*) on first £1,000, plus 25 per cent. on the residue, together with 5 per cent. on the first £1,000 of the premium and 2½ per cent. on the residue.

On Assigning Building Agreements at a Premium.—One-half of the scale for Letting Land on Building Lease, together with 5 per cent. on the first £1,000 of the premium and 2½ per cent. on the residue.

5. Collections or Receiverships.

10 per cent. upon gross rental of weekly property; 5 per cent. upon gross rental of other property or tithes; 7½ per cent. upon the gross rental for the management and collection of rents on agricultural estates; 2½ to 5 per cent. on ground rents, according to the amount of the rents and the number of collections.

6. Laying Out or Development of Estates.

For Road Construction, 5 per cent. upon the outlay, exclusive of expenses.

7. Valuations.

1. *Valuation of Freehold, Copyhold, or Leasehold Properties.*—A guinea per cent. on the first £1,000; half a guinea per cent. on the next £9,000; and a quarter of a guinea per cent. beyond on the value of the property, subject to a minimum fee of five guineas.

2. *Of Property taken under Compulsory Powers.*—(*a*) For qualifying to give evidence the charge is on Ryde's Scale; (*b*) to the valuer preparing the case (including negotiation for a settlement, where required) one-third additional to Ryde's Scale. The fee is exclusive of five guineas per day for attendances. Plans and disbursements extra.

3. *Valuing for Annual Rental.*—(*a*) *Agricultural Property*—7½ guineas per cent. up to £250, 5 guineas per cent. on the next £250, and 2½ guineas per cent. beyond. (*b*) *Business and Residential Property*—5 guineas per cent. up to £300, and 2½ guineas per cent. beyond. Minimum fee 5 guineas.

4. *Valuation of Furniture, Fixtures, Trade Stocks, and Effects.*—5 guineas per cent. up to £500, and 2½ guineas per cent. on the residue.

5. *Valuation of Plant, Machinery, and Trade Stocks.*—2½ guineas per cent. on first £500, 1½ guineas per cent. on the next £4,500; on the next £5,000, 1 guinea per cent.; over £10,000, by arrangement. Valuation to include inventory. Minimum fee, 5 guineas.

6. *Valuation of Live and Dead Farming Stock.*—5 guineas per cent. on first £100, and 2½ guineas per cent. on the residue. *Valuation of Tenant-Right.*—5 guineas per cent. on first £100, 2½ guineas per cent. on next £900 and 1½ guineas per cent on residue. *For Settling Dilapidations.*—5 guineas per cent. on the amount of the settlement.

7. *Valuation of Hotel and Public House Fixtures, Fittings, and Contents.*—5 guineas per cent. on the amount of the valuation as settled.

8. *Valuation for Probate and Estate Duty Purposes.*—(*a*) *Freehold, Copyhold, and Leasehold Property.*—One guinea per cent. on the first £1,000, half a guinea per cent. on the next £4,000, and one quarter-guinea per cent. on the remainder. *Minimum fee, £5 5s*; (*b*) *Of Furniture and Effects.*—5 guineas per cent. on the first £100, and 2½ guineas per cent. on the next £400, and 1½ guineas per cent. of the remainder of the amount of valuation, to include inventory. Minimum fee, £5 5s.

9. *Valuations for Rating purposes and Assessment Appeals.*—This scale applies to single Properties which have to be valued for Ratepayers, Rating Authorities, Assessment Committees or County Valuation Committees, but does not apply to the preparation of new Valuation Lists or the assessment of Special Properties or all Licensed Premises in a Rating Area. Where the net annual value does not exceed £1,000, 2 guineas per cent., plus 5 guineas; not exceeding £5,000, 2 guineas per cent., with minimum fee of 25 guineas; not exceeding £10,000, 2 guineas on first £5,000 and 1½ guineas on residue; not exceeding £20,000, 2 guineas on first £5,000, 1½ guineas on next £5,000, and 1½ guineas on residue; exceeding £20,000, 2 guineas on first £5,000, 1½ guineas on next £5,000, 1¼ guineas on next £10,000, and 1 guinea on the residue.

In addition to the foregoing, for attending before *Assessment Committees*, 5 guineas per day; and before *Quarter Sessions*, 10 guineas per day, together with travelling expenses.

10. *Preparing Specification of Dilapidations, and settling the amount if required.*—5 guineas per cent. on the amount. Minimum fee, £5 5s

11. *Marking, Valuation and Sale of Timber and Underwood.*—5 guineas per cent. on amount realised. When valuing only, 5 guineas per cent. on first £500, and 2½ guineas per cent. on the residue.

Where one Valuer acts between both parties the minimum charge shall be scale and a half, divisible between both parties.

SHIPBROKERS' CHARGES.

A scale of Minimum Agency Charges became operative for Members of the Institute of Chartered Shipbrokers (*Office*, 24 St. Mary Axe, London, E.C. 3) from Aug. 1, 1927. Copies may be obtained from the Secretary.

INTERCHANGE.

Interchange of *personnel* and co-operation, especially for training purposes, continues between the Royal Navy and Dominion Navies. An interesting example of this was shown in the arrangement made between the Admiralty and the Australian Naval Board for Rear-Admiral G. F. Hyde, C.V.O., C.B.E., Royal Australian Navy, to command the Third Battle Squadron for a year from May, 1930.

GERMANY'S "POCKET BATTLESHIPS."

Germany is building 5 "Pocket Battleships" of 10,000 tons displacement, heavily armoured, 50,000 h.p., with 6 11-in. guns (670 lb. projectile), 8 6-in. guns, and 4 3·5-in. guns, with 6 torpedo tubes. "A" (*Ersatz* Preussen) was laid down at Kiel early in 1930, and "B" was voted by the Reichstag in May. The designed speed of these ships is 26 knots, with a cruising area of 10,000 sea miles (at 20 knots).

FLEETS OF THE MARITIME POWERS (March, 1931).

NOTE.—As a result of the *London Naval Conference* (Jan. 21–April 15, 1930) the British Empire, the United States and Japan undertook to proceed at once with the reduction of their capital ships, and all five Powers agreed to waive (during the years 1931–1936 inclusive) the right to replace obsolescent ships granted by the Washington Treaty.

THE MILITIA.

In 1907 the "Old Constitutional Force" known as the "Militia" was transformed into the "Special Reserve," but the following Militia units were retained:—The Bermuda Militia Artillery, the Channel Islands Militia, and the Malta Militia. In 1921 the terms "Special Reserve (and Extra Reserve) Battalions" were abolished, and "Militia" restored, but no appointments are at present made to the force.

Militia in the War.—At the outbreak of the Great War all units were embodied, the majority being included in Defence Schemes. One or two units served abroad, but, generally speaking, the units were employed as training and reinforcing centres for the Armies in the field.

THE TERRITORIAL ARMY.

In 1907 the "Yeomanry" and the "Volunteers" were transferred into the Territorial Force, which included English, Welsh, and Scottish Cavalry; Royal Horse, Royal Field, and Royal Garrison Artillery; Royal Engineers; Infantry; Royal Army Service Corps and Royal Army Medical Corps. In 1921 the title was changed to "Territorial Army."

Territorials in the War.—The strength of the Territorial Force in July, 1914, was about 265,000. During the Great War 310 new units were formed, and there passed through the ranks of the force about 50,000 officers and 1,000,000 other ranks. The Territorial Force suffered total battle casualties of 27,000 officers and nearly 600,000 other ranks, of which some 6,600 officers and 106,000 other ranks were killed. Among the war honours gained by officers and men of the Territorial Force were 70 Victoria Crosses.

OFFICIAL END OF THE WAR.

The *Official Termination of the War*, when Treaties of Peace had been ratified by the respective Governments, was Aug. 31, 1921. The Ottoman Empire was excluded from the Order in Council, and War with Turkey was declared at an end on August 6, 1924.

THE CHURCH ASSEMBLY (or "National Assembly of the Church of England") was established in 1920, "to deliberate on all matters concerning the Church of England and to make provision in respect thereof." The Assembly consists of three Houses, composed of Bishops, Clergy, and Laity respectively. The first two Houses consist of the Convocations of Canterbury and York, of which the respective Upper Houses form the *House of Bishops*, and the respective Lower Houses the *House of Clergy*; the *House of Laity* comprises representatives of the Laity of the Provinces of Canterbury and York, elected every five years by the Lay members of the Diocesan Conferences, who consist mainly of representatives elected, either directly or indirectly, by members of the Church of England on a roll prepared in each parish.

The *Church Assembly* is free to discuss any proposal concerning the Church of England, and to make provision in respect of such matters, but where this includes Parliamentary sanction for any alteration contemplated, this authority is to be sought in the manner prescribed by the *Church of England Assembly* (*Powers*) *Act*, 1919, often referred to as the "Enabling Act." It is specially provided that any innovation touching doctrinal formulæ, or the services or ceremonies of the Church, or the administration of the Sacraments or sacred rites thereof, must be debated and voted upon by each of the three Houses sitting separately, and must then be either accepted or rejected by the Assembly in the terms in which it is finally proposed by the House of Bishops. It is further laid down that the Assembly or any of the three Houses may debate and formulate its judgment by resolution upon any matter concerning the Church, or otherwise of religious or public interest, but the Assembly may not issue any statement purporting to define the doctrine of the Church on any question of theology. None of the powers belonging to the Convocations of Canterbury and York is to be diminished or derogated by the Assembly, which is also prohibited from exercising any power or performing any function distinctively belonging to the Bishops by right of their episcopal office.

Parochial affairs are managed by Parochial Church Meetings of parishioners who are members of the Church of England and by Church Councils elected by such meetings.

General Statistics.—The number of baptisms in 1929 was 427,258, the Easter communicants in the various English Dioceses numbered 2,443,887. The total gross income of 12,824 incumbents was £6,469,705, including £199,807 contributed as Easter offerings. The stipends of the assistant clergy were £1,021,135. The amount of voluntary parochial contributions in the 43 dioceses of England was £6,958,881, and the total from all sources £9,873,165.

* The Board also incurred a Capital Expenditure of £380,034 in connection with the rebuilding of Training Colleges, which was defrayed out of debentures issued and special contributions.

DIOCESES OF THE CHURCH OF ENGLAND.

*The sums appended to the various offices are the full incomes derivable from the estates and revenues of the Church. The Deans and Chapters of certain Dioceses (marked * in the following pages) preferred several years ago to retain in lieu of fixed annual money payments, estates estimated at that time to produce the same annual income.*

St. Patrick's National Cathedral, Dublin.

Dean and Ordinary, Very Rev. Hugh Jackson Lawlor, D.D., Litt.D.

General Synod,

Consisting of House of Bishops (13) and House of Representatives (viz., 208 clerical and 416 lay).

Honorary Secretaries, Ven. C. K. Irwin, B.D.; Very Rev. H. B. Kennedy, B.D.; J. A. Maconchy and Major E. H. C. Wellesley.

Secretary to the Representative Church Body (incorporated 1870), A. F. Maude, 52 St. Stephen's Green E., Dublin; *Asst. Sec.* Rev. J. H. Yates, B.D.
Chief Accountant—George B. Butler.

By the Act of Union, 1800, the Church of Ireland was united with the Church of England, the Sovereign, as one of its members, being supreme governor on earth. By the Act of 1869 this union was severed, and on Jan. 1, 1871, the Church of Ireland resumed her independent position. The Act of 1869 not only disestablished the Irish Church, but also took away her endowments, nothing being left but the right to the life services of the annuitant Bishops and Clergy (the annuities provided were commuted for a capital sum), the right to claim churches in use for divine service, the right to buy the See and Glebe Houses (with garden and curtilage), and £500,000 in lieu of private endowments.

The supreme governing body of the Church of Ireland is the General Synod, which meets annually.

Subject to the General Synod are 20 *Diocesan Synods*, which are assisted by smaller elected bodies called Diocesan Councils.

The Bishop of the Diocese is chosen by the clerical and lay members of the *Diocesan Synod*. The Primate is chosen by the House of Bishops from amongst their own number.

The incumbent of the Parish is appointed by a *Board of Nomination*, consisting of 7 persons, viz.:—The Bishop, 3 diocesan nominators (2 clerical and 1 lay) appointed by the Diocesan Synod, and 3 parochial nominators (lay) appointed by the registered vestrymen of the parish.

The financial trustees of the Church are the Representative Body, composed of the Archbishops and Bishops, 13 clergymen and 26 laymen, chosen by the Diocesan Synods, with 13 co-opted members (clerical or lay). This body holds the property of the Church, and administers its funds, subject to the General Synod.

The first property it held was the capital sum £7,581,075, representing the life annuities of the Bishops and Clergy paid over as commutation money by the Church Commissioners, and also £500,000 compensation for private endowments. The commutation capital on Dec. 31, 1930, was only £22,479, charged with annuities to 9 annuitants. The funds, however, in the custody of the Representative Body amounted in all to £10,737,234, made up of *Commutation* £22,479 *Private Endowments* £342,470, *Parochial Sustentation* £7,091,587, *Episcopal Sustentation* £572,087, *General Synod Funds* £705,157, and *Miscellaneous purposes* £2,003,454.

Since 1869 members of the Church have paid in to the Representative Body a total sum of £10,727,328. The interest of the Diocesan and Parochial Sustentation and other Funds is approximately £361,597. The total amount of *assessment* for stipend paid by parishes, 1930, was £107,769, and the total amount paid for *stipends* under Diocesan Schemes was £340,954.

THE CHURCH OF SCOTLAND.

THE CHURCH OF SCOTLAND is Presbyterian in constitution, and is governed by Kirk Sessions, Presbyteries, Synods, and the General Assembly, which consists of both clerical and lay representatives from each of the Presbyteries. It is presided over by a Moderator (chosen annually by the Assembly), to whom His Majesty the King has granted precedence in Scotland, during his term of office, next after the Lord Chancellor of Great Britain. The Sovereign is represented by a Lord High Commissioner (appointed each year by the Crown), who receives the sum of £2,000 towards his expenses. The country, for Church purposes, was, prior to the union of the Church of Scotland with the United Free Church of Scotland which was effected at a joint meeting of the General Assemblies of both Churches held on October 2, 1929, in the presence of H.R.H. the Duke of York as Lord High Commissioner, divided into 16 Synods and 84 Presbyteries, and there were about 1,800 ministers and licentiates engaged in ministerial and other work. The number of communicants on the roll (Dec. 31, 1928) was 759,797. The sum of £809,865 3*s.* 3*d.* was (apart from Seat Rents levied by Church Authority and amounting to £73,371 6*s.* 7*d.*), but including legacies, amounting to £45,230 6*s.* 9*d.*, raised in 1928 for church and missionary purposes. Within the last 80 years considerably over 500 chapels, at a cost for stipends and supplementary endowments of over £2,450,000, have been endowed and erected into parishes *quoad sacra*. The parish churches numbered 1,470. There were *in addition 245 churches and mission stations*, in all of which worship is regularly conducted. The figures applicable to the Church of Scotland as now re-united after 86 years of separation are only partly available:—

Congregations, 2,842; total membership, 1,284,449: Sunday Schools, 3,967, with 362,570 scholars and 45,877 teachers. In 20 Foreign Mission fields there are 575 European Mission Agents (and in addition 215 missionaries' wives, many of whom are doing mission work in the various fields) and 6,167 native pastors, evangelists and teachers, including in both cases those of the Women's Foreign Mission. The income of the Church was £2,391,720.

Until 1560 the Church of Scotland was Roman Catholic, but in that year the Scots Parliament abolished the jurisdiction of the Pope, proscribed the Mass, and ratified a Confession of Faith drawn up by John Knox and other divines. In it all essential articles of the ancient creeds of the Church were adhered to. Ceremonies were declared to be temporary in their nature, and should be altered when they began to foster superstition. Presbytery was settled in 1590. The restoration of the rights of the Bishops, civil and ecclesiastical, was, however, sanctioned by the General Assembly of 1610, and three Scottish Bishops were in that year consecrated in London. Further innovations by King James VI. alarmed the people, and the attempt of Charles I. to impose on the Church a Book of Canons and a Liturgy was met by the *National Covenant* and the restoration of Presbyterian forms, which culminated in the *Westminster Confession of Faith* in 1646. At the Restoration the Church again became Episcopal, but in 1690 the Scottish Parliament re-established Presbyterianism. By the Treaty of Union between England and Scotland (ratified by the English Parliament 6 Anne c. ii.) the Church of Scotland was secured in its Presbyterian form of government, and the very first official act of a sovereign of the British Empire on his *accession* is to take an oath to maintain inviolably this settlement. In 1921 Parliament passed the *Church of Scotland Act*, 1921, to declare the lawfulness of certain Articles declaratory of the constitution of the Church of Scotland. These Articles were framed with a view to facilitating union among Presbyterian Churches in Scotland. A committee, appointed by the Secretary for Scotland (under the Presidency of the late Viscount Haldane), enquired into the question of endowments, following upon which the Church of Scotland (Property and Endowments Bill) was introduced and was passed into law (15 and 16 Geo. V. c. 33) in 1925. The primary *purpose of this legislative measure was to* transfer to and vest in the Church of Scotland General Trustees, incorporated under the Church of Scotland (General Trustees) Order Confirmation Act 1921, the whole properties and endowments belonging to the Church as it then existed for behoof the latter. Further legislation is in progress for the unification of holding of Properties and Investments of the re-united Church of Scotland.

OTHER PRESBYTERIAN CHURCHES.

(1) *The Presbyterian Church in Ireland.*—The largest of the Presbyterian churches in Ireland consists of 34 presbyteries, 579 ministers, 545 congregations, with 108,986 communicants, 94,536 families, 7,868 Sabbath-school teachers, and 96,836 scholars. During the 12 months ended Dec. 31, 1930, this branch contributed by congregational effort £363,497 for religious, charitable, and missionary purposes. The total income for the period for all purposes was £480,952.—*Moderator*, Rt. Rev. J. Gilbert Paton, M.C., M.A., D.D. *General Sec.*, Rev. W. A. Watson, MA., B.D., Church House, Belfast.

(2) *The Presbyterian Church of England* has 14 presbyteries, 352 congregations, 6 preaching stations, and 84,598 members. It has a Theological College (Westminster College, Cambridge), and supports 68 missionaries abroad, including 34 women. In 1928 the amount raised for all purposes was £390,313.—*Moderator*, Rev. Principal John Oman, M.A., D.D., D.Phil. *Gen. Sec.*, Rev. Thomas Mackay, M.A. *Church Offices:* 15 Russell Square, W.C. 1. *Publications Office:* 21 Warwick Lane, Paternoster Row, E.C. 4.

UNDER the general designation of METHODISTS are included all those religious bodies which owe their existence, directly or indirectly, to the efforts of the Revds. John and Charles Wesley. The most numerous and influential of them are—

WESLEYAN METHODISTS.

1. *Wesleyan Methodists*, the original body founded in 1739 by these two brothers. The first *Conference*, consisting of six clergymen and four laymen, was held in 1744. Since then the growth of Methodism has been great, its present adherents being given as 32,000,000. The latest statistics of Methodism throughout the world (1931) are: Ministers, 60,217; local preachers, 82,542; members and probationers, 10,028,547; Sunday schools, 92,608; officers and teachers, 961,337; scholars, 9,949,543; churches and other preaching places, 108,828. The conference is now composed in its Representative Session of 300 ministers and 300 laymen, with a ministerial president and secretary at its head, elected year by year. The Wesleyans are governed primarily by the Conference, secondarily by the Synods, which are semi-annual meetings of the ministers and selected laymen in each district, over which a chairman is appointed by the Conference, and thirdly by quarterly meetings of the ministers and lay officers of each circuit. The authority of both these last meetings is subordinate to the Conference, which has the supreme legislative and judicial power in Methodism.—*Pres. Designate* (1932), Rev. Dr. H. Maldwyn Hughes, Principal of Wesley College, Cambridge: *Sec. of the Conf.*, Rev. Robert Bond, 107 Palace Road, Tulse Hill, London, S.W. 2.

THE PRIMITIVE METHODISTS.

2. *The Primitive Methodists, who sprang up in* Staffordshire, in 1810, under the leadership of Hugh Bourne and William Clowes. Owing to the excesses attending certain outdoor services called "camp meetings," the Wesleyan Conference prohibited the continuance of the practice. Bourne and Clowes refused to comply with this decision, and were in consequence expelled. They and their sympathisers banded together in a new body, with enlarged powers for the laity. Next to the Wesleyans they are the most numerous and the most democratic of all the denominations which have arisen out of the Methodist movement.—*President* (1931-32), Rev. E. McLellan, 22 Roe Lane, Southport, Lancs. *Gen. Sec. of the Church*, Rev. Jacob Walton, 78 Harrow View, Harrow, Middlesex.

THE UNITED METHODIST CHURCH.

3. *The United Methodist Church* was formed by the Union in 1907 of three denominations of Methodists which hitherto had been separate from and independent of each other. These were:—

The Methodist New Connexion, which owed its origin in 1797 to the Rev. Alexander Kilham, one of the early itinerating Wesleyan preachers. He demanded that the members of the societies, and not the Conference, should be constituted the source of all power in Methodism; and that the Conference should consist of lay as well as ministerial members, all of whom should be elected by the members of the various societies as their delegates. He was expelled by the Conference, and at once founded a new community.

The Bible Christians, founded in 1815 by Wm. O'Bryan, a Wesleyan lay preacher in Cornwall. They existed mainly in the West of England.

The United Methodist Free Churches, which was itself an amalgamation of three different secessions—the Protestant Methodists, formed in 1828; the Wesleyan Methodist Association, which sprang out of a controversy in 1834, concerning the need for a trained ministry; and the Wesleyan Reform Association, founded in 1849, during a great agitation. A strong opposition to the leading Wesleyan officials was organised, which found expression in Conference debates, but more strongly in anonymous and bitter pamphlets, which were widely circulated. On suspicion of being the authors and circulators of these pamphlets three ministers were expelled. They found so many sympathisers that over 100,000 members seceded to found a new denomination.

The act of union of these three denominations into one took place in London on September 17, 1907, when the first united Conference was held.—*President* (1931-32), Rev. John Ford Reed, Shebbear College, Beaworthy, Devon; *President Designate* (1932-33), Rev. Wm. C. Jackson, B.A., 45 Northumberland Street, Higher Broughton, Manchester. *Sec. of Conference*, G. P. Bunt, "Rostornel," Alexandra Road, St. Austell, Cornwall; *Connexional Sec.*, Rev. Henry Smith, 13 Abbey Road, Brighton.

INDEPENDENT METHODISTS.

4. *Independent Methodists.*—This body is Congregational in its organisation, with an unpaid Ministry. Its first Conference was held in 1805.

WESLEYAN REFORM UNION.

5. This Union is Methodist in doctrine, Congregational in government, with, if any church desires it, a paid ministry. It is the remnant of the original Reformers expelled from Wesleyan Methodism in 1849. The adherents are mainly in the Midland counties.—*President* (1931), J. T. Waterhouse, 26 Burnett Avenue, Bradford, Yorks.; *Gen. Sec. and Connexional Editor*, Rev. G. A. Metcalfe, Wesleyan Reform Book Room, 25 Change Alley, Sheffield.

RE-UNION.

A scheme for the re-union of the Wesleyan Methodists, the Primitive Methodists and the United Methodist Churches has been approved by all three Conferences. It is anticipated that the first United Conference will meet in 1933.

An Enabling Bill has been passed by both Houses of Parliament and has received the Royal Assent. The final vote on Union (that is, the final vote prior to that of the Uniting Conference) was taken by the three Conferences in 1931, the majority of 75 per cent. being requisite in each case. This vote will take effect in 1932. The Uniting Conference will then meet in 1932 subsequently to the meeting of the several Conferences. The first United Conference to meet in 1933.

THE CALVINISTIC METHODIST (PRESBYTERIAN) CHURCH OF WALES.

The CALVINISTIC METHODIST OR PRESBYTERIAN CHURCH OF WALES is the only Church of purely Welsh origin, and embraces a very large section of the Welsh-speaking population. Its form of government being Presbyterian, it is in federation with the Presbyterian Church of England, the United Free Church of Scotland, and the Presbyterian Church of Ireland. It is also a constituent of the Pan-Presbyterian Council or Alliance. It has foreign missions in Assam, India, and in Brittany. Churches and preaching stations in Assam, 1,438; church members, 88,380; adherents (including communicants), 92,964.

In 1930 the body numbered—churches, 1,492; chapels and other buildings for Sunday-school branches, 1,707; ministers and preachers, 1,152; elders, 7,514; communicants, 185,827; on probation, 849; Sunday-school teachers and officers, 22,409; teachers and scholars, 167,703; adherents (including communicants), 294,547. Contributions in aid of the Ministry in 1930, £202,735. For various religious purposes (including the ministry), £437,126.

One of the features of the Welsh churches is the Sunday-school, which is attended by adults as well as children; the vernacular is the language used generally in these schools. The English branch of the Church has 378 chapels and preaching stations, with 34,849 communicants. All the rest are Welsh.

Moderator (*South Wales*) *Synod*, Rev. Stephen George, M.A., Llandrindod; (*North Wales*) Rev. D. D. Williams, M.A., Liverpool.
Moderator of General Assembly, Rev. William Thomas, Maesteg, Bridgend, Glam.
Chief Secretary, Rev. R. Cunllo Davies, M.A., Bryn Elwydd, Machynlleth, North Wales.

THE INDEPENDENTS AND THE BAPTISTS.

The INDEPENDENTS, or CONGREGATIONALISTS, are the most ancient community of Dissenters. In 1831 the majority of their churches were formed into the Congregational Union of England and Wales, incorporated in 1902, and in 1920 nine districts were formed, each under a Moderator. There are 51 county and other Associations in the British Isles, with 4,768 churches and preaching stations; the number of ministers in the British Isles is 2,900. *Chairman of the Congregational Union of England and Wales*, 1931–32, Rev. H. C. Carter, M.A. *Secretary*, Rev. Sidney M. Berry, D.D. *Office and Publication Department*, 22, Memorial Hall, Farringdon St., E. C. 4.

The *Countess of Huntingdon's Connexion*, with 37 chapels and mission stations, is governed by nine trustees assisted by an annual conference of ministers and delegates. *Secretary*, E. Dolby Shelton. *Offices*, 41, Holborn Hall, Gray's Inn Road, W.C. 1.

The BAPTISTS are similar to the Congregationalists in all respects but one—viz., the Baptism by immersion of believers only. Like the Congregationalists, they are for the most part grouped in associations of churches, and the majority of these belong to the Baptist Union, which was formed in 1813. In the British Isles there were, in 1930, 4,243 chapels and 2,051 pastors. The members numbered 406,342, Sunday-school teachers 59,539, and Sunday scholars 483,430. *President of the Baptist Union*, 1931–32, Rev. Carey Bonner. *Secretary*, Rev. M. E. Aubrey. *Office*, 4, Southampton Row, London, W.C. 1.

The *Baptist World Alliance* (founded in 1905) is a Federation of National Conventions and Unions in more than 60 countries. Communicant membership about 11,500,000. *General Sec.*, Rev. J. H. Rushbrooke, D.D. *Office*, 4 Southampton Row, W.C. 1

The *Strict and Particular Baptists* have about 600 places of worship in England and Wales, and 20,000 members, with Foreign mission fields.

Minor Religious Denominations.

The General Assembly of **Unitarian and Free Christian Churches**, has about 330 ministers, 345 chapels and other places of worship. *Gen. Sec.*, Rev. Mortimer Rowe, B.A., Essex Hall, Essex Street, W.C.2. The **Brethren** number about 80,000, of whom five-eighths belong to the "Open" body. The **Society of Friends (Quakers)** consists of 19,117 members in Great Britain, and has 396 places of worship with 25 places of worship in Ireland and 2,144 members. *Central Offices* (*Great Britain*), Friends House, Euston Rd., N.W. 1, (*Ireland*), 6 Eustace Street, Dublin. The **Churches of Christ** have 14,277 members and 186 churches in the British Isles, with 159 Sunday Schools, 1,719 teachers, and 16,811 scholars. The **Church of Christ, Scientist**, has in the British Isles 225 branches of The *First Church of Christ, Scientist*, in Boston, Mass., U.S.A. (*Offices*, Donington House, Norfolk St., Strand, W.C. 2). The **Moravian Church** (*Offices*, 32 Fetter Lane, E.C.) has in the U.K. 41 congregations and preaching stations, with 3,336 communicants. The **Catholic Apostolic Church** has above 80 churches, including a fine Gothic building in Gordon Square, W.C.; the New Church (**Swedenborgian**), 75 societies, with about 6,700 registered members; the Latter-Day Saints (**Mormons**) have 82 churches. The **Free Church of England** (otherwise called The Reformed Episcopal Church) combines two churches, the Free Church founded in 1844 and the Reformed Church founded (in New York) in 1873. *Presiding Bishop*, Rt. Rev. F. Vaughan, D.D., Emmanuel Rectory, Morecambe. *Gen. Sec.*, Rev. A. V. Bland, D.D., Rydal Mount, Morecambe. **The Old Roman Catholic Church**: *Archbishop in Gt. Britain*, Most Rev. Bernard Mary Williams, Madam's Wood, Painswick, Stroud, Glos. The **Seventh Day Adventists** (*Hdqrs.*, Stanborough Park, Watford, Herts) have 64 organized churches, 35 companies, and 4,588 members in the British Isles. The **Greeks** (*Exarch of Western and Northern Europe*, Metropolitan of Thyateira, Archbishop Germanos, 20, Newton Rd., Bayswater, W. 2) have St. Sophia's Cathedral (Moscow Road, W. 2) and churches in Manchester, Liverpool, and Cardiff. The **Armenians** have a church in London (S. Sarkis, Iverna Gardens) and in Manchester (St. Trinity, Upper Brook Street); the **French, Dutch, Swedes, and Swiss** in London, Norwich, Hull, and Canterbury; and there is a mosque for **Moslems** in Melrose Road, Southfields.

The Jews. — Among the inhabitants of the United Kingdom are about 300,000 **Jews**, mainly in London and other large towns, who possess 300 synagogues, with about 200 ministers and readers. *Chief Rabbi*, Very Rev. Dr. J. H. Hertz. Chief Rabbi's Office, 4, St. James's Place, Aldgate, E.C.3. Their number in the British Empire totals 550,000, and throughout the world is computed at 15,000,000.

IN *England* and *Wales* there are 4 Archiepiscopal and 14 Episcopal Sees; in *Scotland* 2 Archiepiscopal and 4 Episcopal Sees; in *Ireland* 4 Archiepiscopal and 24 Episcopal Sees. In the *British Empire* there are 40 Archiepiscopal and 125 Episcopal Sees, with 59 Vicariates and 30 Prefectures.

The *Catholic Directory* of 1931 estimates the Catholic population of England and Wales (1930) at 2,206,244, Scotland (1929) 606,650, Ireland (Census figures, 1911) 3,242,670. The figures for India (1928) are 2,856,237, Ceylon (1921) 385,507, Canada (1921) 3,383,663, Australian Commonwealth (1921) 1,172,661, New Zealand (1929) 175,714, and Union of South Africa 165,630, the total for the British Empire being 16,328,159; and the Catholic population of the world is estimated at 334,664,791.

ST. PAUL'S CATHEDRAL, City of London, E.C. 4. (1675–1710) cost £747,660. The cross on the dome is 365 ft. above the ground level, the inner cupola 218 ft. above the floor. "Great Paul," in S.W. tower, weighs 17 tons. Organ by Father Smith (enlarged by Willis) in case carved by Grinling Gibbons (who also carved the choir stalls). Nave and transepts free; Fees to the following parts (on week-days only): Library, whispering gallery, and stone gallery, 6*d*.; golden gallery, 1*s*.; crypt, 6*d*.; ball, 1*s*.; total, 3*s*. Service on Sundays at 8, *10.30, *3.15, and *7. Weekdays at 8, *10, 1.15, *4. (*Services are choral). To the S. are remains of the Chapter House and Cloisters of "Old St. Paul's," destroyed by the Fire of London in 1666.

WESTMINSTER ABBEY, S.W. 1 (built A.D. 1050–1760). — Open on week-days at 8 a.m. Admission to Royal Chapels by fee of 6*d*., except on Mondays (open free); wax effigies, 6*d*. Norman undercroft, 3*d*. Transepts open on Sundays for service only, and Nave only between services. Holy Communion at 8; Morning Prayer and Holy Communion at 10.15. Evening Prayer at 3. Sermon at 6.30. Daily—Holy Communion at 8 a.m.; School Service at 9.30; choral services at 10 and 3. Chapel of Henry VII., Chapter House, and Cloisters; King Edward the Confessor's shrine, A.D. 1269, tombs of kings (Edward I., Edward III., Henry V., Mary, Queen of Scots, Queen Elizabeth), and many other monuments and objects of interest, especially the grave of "An Unknown Warrior" at the W. end of Nave (1920), and Poets' Corner. The Coronation Chair encloses the "Stone of Scone," brought from Scotland by Edward I. in 1297. The Chapel of the Pyx is open on Tuesday and Saturday.

SOUTHWARK CATHEDRAL, south side of the Thames, near London Bridge, S.E. 1.—Mainly 13th century. Known as St. Mary Overie previous to 1540. Open 7.30 a.m. to 6 p.m., free. Sunday services, 7.30, 8, and 11 a.m. (choral) and 6.30 p.m. (choral). Week-days: 7.30, 8, and 5 p.m. (choral). The tomb of John Gower (1330–1408) is between the Bunyan and Chaucer memorial windows, in the N. aisle; Shakespeare effigy backed by view of Southwark and Globe Theatre in S. aisle; the altar screen (erected 1520) has been restored; the tomb of Bishop Andrewes (died 1625) is near screen. The Early English Lady Chapel (behind the choir), restored 1930, is the scene of the Consistory Courts of the reign of Mary (Gardiner and Bonner); and is still used for this purpose.

ALL HALLOWS, Barking-by-the-Tower, E.C. 3. —15th century church, containing a very fine series of brass effigies; Jacobean pulpit with Sussex ironwork and font cover ascribed to Grinling Gibbons; crypt of earlier church.

ALL SAINTS, Margaret Street, W. 1.—Built by Butterfield in 1859. Anglo-Catholic and noted for its music.

BOW CHURCH (ST. MARY-LE-BOW), Cheapside, E.C. 2.—Rebuilt by Wren with beautiful steeple (222 ft.). 11th century crypt and church open daily (except M.) 10 a.m. to 5 p.m. Since 17th century anyone born within sound of the bells of Bow Church has been designated a "Cockney." The 11th century church was built on stone arches or "bows."

CHRIST CHURCH, GREYFRIARS, E.C. 1.—Rebuilt by Wren. The organ (repaired 1921) is by Renatus Harris, and the marble font is attributed to Grinling Gibbons. Until removal to Horsham (1902) the boys of Christ's Hospital (Blue Coat School), the site of which is now occupied by the G.P.O., attended services at Christ Church and the galleries contain seats with raised benches for the "Grecians." Blue Coat School boys still attend annually on St. Matthew's Day (Sept. 21). "Spital Sermon" is preached at Christ Church at Easter.

GUARDS' CHAPEL, Wellington Barracks (Birdcage Walk, St. James's Pk., S.W. 1).—Chapel redecorated in 1878. Open to visitors on week days, 10 to 1 and 2 to 4 (Mondays and Saturdays, 10 to 12). Parade service on Sundays at 11 a.m. (tickets of admission can be obtained on application to the Chaplain, R.M. Chapel, Wellington Barracks);

Holy Communion, 8 a.m.; Evening service at 6.30 p.m. (no tickets required for these services).

HOLY TRINITY, Minories, Aldgate, E. 1.—(Dismantled and now a Sunday school). Contains a mural monument with the arms of the Earls of Dartmouth and of a member of that family (Legge) in which the arms of George Washington are quartered with those of the Legges.

MARYLEBONE CHAPEL, High Street, Marylebone, W. 1.—The former Parish Church of the village of Marylebone (now replaced by St. Marylebone Church), was rebuilt in early 18th century. In the churchyard lie Allan Ramsay (poet), Hoyle (whist), Ferguson (astronomer), Charles Wesley (hymn writer) and his son Samuel Wesley (musician).

ST. ALBAN, Brooke Street, Holborn, E.C. 1.—A brick building by Butterfield (1858). Anglo-Catholic and noted for its music; organ by Willis. *Vicar*, Rev. R.S. Eves. Services on Sundays: Holy Eucharist at 7 and 8; choral at 9.30; solemn, with sermon at 11; matins, 10.30; baptisms, and churchings at 2.15; children's service and catechising, 3; evensong at 6.30; frequent mission services. Open daily, 6.45 a.m. to 9 p.m.

ST. ANDREW BY THE WARDROBE, Queen Victoria Street, E.C. 4 (near the site of the King's Wardrobe). Rebuilt by Wren.

ST ANDREW UNDERSHAFT, St. Mary Axe, Leadenhall Street, E.C. 3.—An early 16th century church, contains a monument of Stow, the London antiquary, and a memorial of Holbein. The organ is by Renatus Harris, the rival of Father Smith.

ST. ANNE'S, Wardour Street, Soho, W. 1.—Built in 17th century and noted for its music. Monument of William Hazlitt in the churchyard.

ST. BARTHOLOMEW'S Priory Church, Smithfield, E.C. 1, the oldest parish church in London (A.D.1123).—*Rector*, Rev. Canon E. S. Savage, M.A. Fine old Norman building, with tomb of the first prior, Rahere. N. transept restored and reopened in June, 1893. Crypt, Lady Chapel and Cloisters opened 1905–1928. Open daily (Sundays for service only, 9; 11.0; 6.30).

ST. BENET, Paul's Wharf, Upper Thames Street, E.C. 4.—Rebuilt by Wren, 1683; Inigo Jones, 1573–1652, and his father and mother, were buried in former church. St. Benet is the Metropolitan Welch Church.

ST. BRIDE'S CHURCH, Fleet Street, E.C. 4.—Rebuilt by Wren, with beautiful spire (226 ft.). Samuel Richardson, the novelist, is buried in the nave. In the old church Lovelace, Sackville and Wynkyn de Worde were buried, and Samuel Pepys was baptized.

ST. CLEMENT DANES, Strand W.C. 2.—Rebuilt by Wren on site of earlier church assigned to the Danish settlers. The traditional burial place of Harold Harefoot (King Harold I., *see* p. 102) son of Canute. The organ is by Father Smith; the bells are those celebrated in the familiar nursery rhyme "Oranges and Lemons," and the air is among those played on the chimes (since 1920). Owing to the historical association of this church with the kingdom of Denmark, Danish ceremonies are now and then performed there. Dr. Johnson's pew in gallery and monument outside E. end.

ST. CLEMENT'S, Clement's Lane, Lombard Street, E.C. 3.—Rebuilt by Wren, contains handsome carvings on pulpit and font, and some chained books.

ST. DUNSTAN'S IN THE EAST, Idol Lane, Lower Thames Street. E.C. 3.—Rebuilt by Wren with fine tower and spire; rest of church rebuilt, 1817–1821; contains many monuments.

ST. EDMUND, KING AND MARTYR, Lombard Street, E.C. 3.—Rebuilt by Wren, with altar at north end; organ by Renatus Harris. Restored and re-opened 1919, after damage by Air Raid, July 7, 1917.

ST. ETHELBURGA'S, Bishopsgate, E.C. 2. (14th and 15th century) with two "Hudson" windows. —On April 19, 1607, Henry Hudson (the navigator who gave his name to Hudson's Bay and to the Hudson River), his son John, and his ten sailors took communion in St. Ethelburga's, "purposing to goe to sea foure days after."

ST. GEORGE'S, Hanover Square, W. 1 (18th century; famous for fashionable marriages).—"George Eliot," Mr. Asquith, and Theodore Roosevelt were among those married here.

ST. GEORGE'S, Southwark, S.E.—(Rebuilt 1736) contains the tombs of Bishop Bonner (1497–1569) and Edward Cocker (1631–1675), the author of Cocker's "Arithmetik." (The expression "according to Cocker" refers to this book.)

ST. GILES'S, Cripplegate, E.C. 2 (14th century). —Contains the graves of John Milton, John Foxe, and Sir Martin Frobisher, the Elizabethan seaman, who attempted to discover a north-west passage to Cathay, and commanded the *Primrose* as vice-admiral to Drake in his expedition to the West Indies.

ST. HELEN'S, Bishopsgate, E.C. 2.—The "Westminster Abbey of the City" from its numerous monuments; building dates from 13th century. Contains a Shakespeare memorial window presented by Mr. William Prentice, an American. In St. Helen's Place the foundations of an earlier church were uncovered during rebuilding operations in 1222.

ST. JAMES'S GARLICKHITHE, Garlick Hill, E.C. 4, has four stained glass windows, one of which was seriously damaged by a bomb by a German air raider on June 13, 1917. It is proposed that the window should not be completely replaced, and that year by year on the anniversary of the outrage the congregation should assemble for a service of thanksgiving for merciful preservation from sudden and violent death. The "Bomb" Sermon will be a modern counterpart of the "Lion" Sermon (*see* St. Katherine Cree, *below*).

ST. JAMES'S, Piccadilly, W. 1.—Built by Wren, with font and wood carvings by Grinling Gibbons. Lord Chesterfield and Lord Chatham were baptized in St. James's.

ST. JOHN'S, St. John's Square, Clerkenwell, E.C. 1.—Built in early 18th century, includes part of the ancient priory of St. John (12th century crypt).

ST. KATHERINE CREE, Leadenhall Street, E.C. 3. Rebuilt in early 17th century and ascribed to Inigo Jones. Contains a catherine wheel E. window, an organ by Father Smith, Archbishop Laud's prayer book and bible, and a monument of Sir Nicholas Throgmorton. The "Lion" sermon is preached here annually before the Lord Mayor and Corporation of London to commemorate the escape of a Lord Mayor (Sir John Gayer) from a lion in Algeria (Oct. 16, 1630).

ST. MAGNUS THE MARTYR, Lower Thames Street, E.C. 3.—Rebuilt by Wren, with steeple (185 feet) and lantern of great beauty, contains the tomb of Miles Coverdale (1488–1568), translator of the Bible, who was rector of St. Magnus (1564–1566) and Bishop of Exeter (1551–1557).

ST. MARGARET, Lothbury, E.C. 2.—Rebuilt by

Wren, contains Grinling Gibbons carvings (font, chancel screen, and pulpit).

ST. MARGARET'S, Westminster, S.W. 1.—Founded 11th or 12th century; buildings date from 15th century, with frequent "restorations." The parish church of the Dominions beyond the Seas.

ST. MARGARET PATTENS, Rood Lane, Eastcheap, E.C. 3.—Rebuilt by Wren, with a leaden spire, contains two canopied pews and other curious survivals and relics.

ST. MARTIN'S IN THE FIELDS, Trafalgar Square, S.W. 1.—Built by James Gibbs (1721-6) in place of earlier church on same site. In register of burials are the names of Nell Gwynne (1687), Farquhar the dramatist (1707), and Roubiliac the sculptor (1672). A bust of James Gibbs by Rysbrack is in the church.

ST. MARY, Aldermanbury, E.C. 2.—Rebuilt by Wren, contains the tomb of Judge Jeffreys and a marble monument to Lieutenant John Smith, "drowned off Staten Island in 1782." John Heminge and Henry Condell (Shakespeare's editors) were buried in the older church.

ST. MARY WOOLNOTH (above the City and South London Tube Station), King William Street and Lombard Street, E.C. 3.—Built by Hawksmoor early 18th century, organ by Father Smith, contains a memorial to Sir Wm. Phipps, Governor of Massachusetts, who died in London in 1695.

ST. MICHAEL PATERNOSTER ROYAL, College Hill, Upper Thames Street, E.C. 4.—Rebuilt after the Fire by Strong (a pupil of Wren's), the former church contained the tomb of "Dick Whittington" and a Grinling Gibbons altarpiece.

ST. OLAVE, Hart Street, Mark Lane, E.C. 3.—A 15th century church, which survived the Fire of London, contains the tombs of Samuel Pepys and his wife, and a monument of John Watts, "President of the Council of New York"; also a memorial (formerly in All Hallows Staining) to Monkhouse Davison and Abram Newman, the exporters of the chests of tea which were thrown into Boston Harbour, Dec. 16, 1773. On Trinity Monday the Master and Brethren of Trinity House (*q.v.*) attend service here.

ST. PAUL'S, Covent Garden, W.C. 2.—Built by Inigo Jones. The tombstones round the exterior of the church record the burial places of Samuel Butler (Hudibras), Sir Peter Lely (Painter), Wycherley (Dramatist), Grinling Gibbons (Wood Carver), Dr. Arne ("Rule, Britannia"), and Macklin (Actor); Ellen Terry memorial.

ST. PETER'S, Cornhill, E.C. 3.—Rebuilt by Wren, contains a carved choir screen also ascribed to him. The organ is by Father Smith.

ST. SEPULCHRE, Holborn, E.C. 1.—Part of this church escaped the Fire (*see* footnote, col. 2). The organ is by Renatus Harris, in a case attributed to Grinling Gibbons. Memorials in the church to Roger Ascham (Queen Elizabeth's tutor) and Capt. John Smith, "sometime Governour of Virginia and Admirall of New England," who would have been put to death but for the intercession of Pocahontas. (Princess Pocahontas is buried in Gravesend, *see* p. 411).

ST. STEPHEN'S, Coleman Street, E.C. 2.—The Rev. John Davenport, who, with other refugees, landed at Boston in 1637, and founded the colony of New Haven, Connecticut, in the following year, was vicar of this church from 1624 to 1633. The colony was composed in part of former residents of this parish. The tablet in the church to Davenport's memory was erected by one of his American descendants.

ST. STEPHEN'S, Walbrook, E.C. 4.—Rebuilt by Wren (and considered, with Bow Church, *q.v.*, and St. Bride's, *q.v.*, one of his greatest successes), contains the tomb of Sir John Vanbrugh (architect and dramatist), and a painting by Benjamin West.

SAVOY CHAPEL, Savoy Street, Strand, W.C. 2 (re-built about 1505, on site of 13th century Savoy Palace, restored after disastrous fire in 1864).—Graves of Gavin Douglas and George Wither, and memorials of D'Oyly Carte, Laurence Irving. Sunday services at 11.15 and 6.

ST. SWITHIN'S CHURCH, St. Swithin's Lane, E.C. 4 (rebuilt by Wren after the Fire of London, but since modernised).—Contains embedded in its external (S.) wall *London Stone*, the milliarium from which in Roman times the miles (*millia passuum*) were measured. This stone is mentioned in King Henry VI., Pt. II.

THE TEMPLE CHURCH, south side of Fleet Street, E.C. 4.—The largest of the five remaining round churches in England, the other four being the Churches of the Holy Sepulchre at Cambridge, Northampton, Little Maplestead (Essex), and Ludlow. The Norman church, restored 1840-1845, is open to the public on week-days, 10.30 a.m. to 4 p.m., Saturdays excepted. Organ by Father Smith. Church service (famous music) on Sunday at 11 a.m. and 3 p.m. Service is discontinued in Aug. and Sept. *Master of the Temple*, Rev. Cecil Spencer Carpenter, B.D.

WREN'S CHURCHES.—Many of the *Churches in the City of London were destroyed by the Fire of London (Sept. 2-6, 1666). Fifty of these were rebuilt by Wren during the rebuilding of St. Paul's Cathedral, and many of them contain wood carvings attributed to Grinling Gibbons. The total cost of the fifty churches was £263,786 10*s.* 4½*d.*, the most expensive being St. Mary-le-Bow, £15,460 6*s.* 8¾*d.* (£7,388 8*s.* 7¾*d.* for "Bow Tower"), and the cheapest, St. Vedast-Foster (£1,853 15*s.* 6*d.*).

Church of Scotland.

SCOTTISH NATIONAL CHURCH, Crown Court, Russell Street, Covent Garden, W.C. 2. Sundays 11.15 and 6.30. *Minister*, Rev. J. Moffett, B.A., 2, Taviton Street, W.C. 1.

ST. COLUMBA'S, Pont Street, Belgrave Square, S.W. 1. Sundays 11 and 6.30. *Ministers*, Rev. Archibald Fleming, D.D., and Rev. Ian R. Gillan.

Congregational.

BRIXTON INDEPENDENT CHURCH, 364 Brixton Road, S.W. 9.—Sundays, 11 and 6.45.

CITY TEMPLE, Holborn Viaduct, E.C. 4.—Sundays, 11 and 7.—Rev. F. W. Norwood, D.D.

CHRIST CHURCH, Westminster Bridge Road, S.E. 1.—Opened on July 4, 1876, the centenary of American Independence. The Lincoln Tower and Spire, 200 feet high, shows the Stars and Stripes wrought into the stone, and the British lion and the American eagle at the angles of the tower. The cost of the tower was largely defrayed by Americans, in gratitude for Dr. Newman Hall's sympathy with the Union during the American Civil War. Sunday services, 11 and 7.

* The City Churches now standing which survived the Fire of London are:—All Hallows, Barking-by-the-Tower; St. Andrew Undershaft; St. Bartholomew the Great; St. Ethelburga, Bishopsgate; St. Giles, Cripplegate; St. Helen, Bishopsgate; St. Katherine Cree; and St. Olave, Hart Street. Of St. Sepulchre, Holborn, only the south porch and the tower remain; of All Hallows, Staining, only the tower; St. Andrew, Holborn, escaped the Fire, but it was in a ruinous condition at the time and was reconstructed by Wren, the old tower being refaced with Portland stone in 1704.

FELLOWSHIP GUILD SERVICES, instituted by Miss Maude Royden, C.H., D.D., and Dr. Percy Dearmer at Kensington Town Hall in March, 1920, and removed in June, 1921, to Guildhouse, Eccleston Square, S.W. 1. Sundays, Music and address, 3.30, and service and sermon, 6.30.

HARECOURT CONGREGATIONAL CHURCH, St. Paul's Road, Canonbury, N. 1.—Founded about 1648 at Pancras, Soper Lane, from there to Red-cross Street, and to Hare Court, Aldersgate, in 1691, and removed in 1857 to Canonbury. John Bunyan died in the House of a Deacon of Hare-court. *Minister*, Rev. Robert Anderson. Sundays, 11 and 6.30; Wednesdays, 8.0 p.m.

THE KING'S WEIGH HOUSE, Duke Street, Grosvenor Square, W. 1.—Rev. W. E. Orchard, D.D. Sundays, H.C., 9 and 10; 11 a.m. and 7 p.m. Thurs. 7.30 p.m.

Educational Statistics.

I.—Elementary.

Statutes require parents in *England and Wales* to cause their children to receive efficient elementary instruction or to attend school from 5 to 14 years of age; in *Scotland*, to provide efficient education up to 15 years; in *Ireland*, to cause their children to attend school from 6 to 14 years.

In *England and Wales* (1929) there were 20,791 public elementary schools with accommodation for 7,109,381 pupils, and average attendance of 4,915,336; in addition, there were 127 special schools for blind and deaf children, with accommodation for 9,284, and 463 for defective and epileptic children, with accommodation for 40,303. There were (1929) 33,698 certificated college-trained men teachers and 64,068 women, 5,542 certificated not college-trained men teachers and 20,053 women, and 2,048 uncertificated men and 29,941 uncertificated women.

In *Scotland* (1929) there were 2,915 primary schools with accommodation for 861,585, and average attendance of 584,473. There were (1929) 3,916 certificated men teachers and 15,128 women teachers, and 34 provisionally certificated women.

Elementary school education includes teaching in practical matters—needlework, drawing, gardening, handicrafts, cookery, &c.—and the sections upon health, medical attendance, physical training, evening play centres, home study, future employment, &c., show that the schools are valuable agencies in child-welfare generally.

II.—Education beyond Elementary.

Secondary.

The aims, methods, and instructions are in marked contrast to the comparative simplicity of those in Elementary Education. In all the four countries it is now felt that although technical instruction was the first branch to be promoted by statute, undifferentiated 4-year secondary (intermediate) courses should be gone through before pupils proceed to specialisation for industrial, commercial, &c., employments.

In *England and Wales* (1929) the number of Secondary schools recognised for grant was 1,341, with 10,249 full-time men and 10,265 full-time women teachers. The Authorities aim at securing graduate teachers as far as possible. The full-time pupils numbered 48,279 boys and 46,271 girls under 12; 140,844 boys and 119,395 girls between 12 and 16; 19,815 boys and 15,581 girls over 16—a total of 209,938 boys and 184,247 girls. Of these about one-fourth come up from elementary schools with "free places," others with scholarships. Nine-tenths of these schools receive State grants, and nearly one-third are controlled by Local Authorities. Fees are charged to most of the pupils. Of these "efficient" schools about 40 per cent. receive boarders (about 27,000) in varying proportions and drawn in many cases from distant areas. Most of them are endowed or under trusts, and their trust incomes and property form a considerable asset in secondary school finance. The system in *Wales* is much the same as in England, though the schools are under earlier statutory provisions, and are called "Intermediate" in many cases. In Wales there is a Central Welsh Board.

In *Scotland* there are Preparatory and Secondary Departments under the same Commissioners and Local Authorities as the Elementary schools. In 1929 there were 207 Preparatory Departments with 76,091 children on the Register and average attendances of 66,347, and 252 Secondary Departments with 75,231 children on the Register and average attendances of 73,152. The Authorities aim at securing honours graduates as far as possible, and all teachers are certificated.

Technical.

Technical Education in England and Wales is provided in Evening and similar schools and in Day Technical Classes and Technical Institution Courses (mostly controlled by Local Authorities). State grants are paid on the number of students, of whom about one-half are under 17 years of age. The average attendance of a student is about 50 hours per annum. There are also Teachers' Courses, Tutorial Classes, and also Schools of Art, Branch Schools of Art, and Art Classes. In Scotland Technical Education is provided in like manner.

Training.

Training is provided by the State for Elementary School Teachers, of whom 50 per cent. have been trained in Colleges having nearly 13,000 places. Slight progress has been made lately towards providing for the Training of Teachers for Secondary Schools, a small annual State grant being made for the purpose; in *Scotland* all candidates for employment as teachers must undertake a course of training of at least one year in teaching.

Universities.

Many of these institutions now receive annual State grants, mainly in the form of "block" grants paid by the Treasury on the advice of the University Grants Committee. Substantial grants are also received from local Education Authorities in England and Wales. State grants to Irish Institutions were transferred from the Treasury to the Irish Governments as from April, 1922.

In 1930-31 the Professors and Undergraduates were approximately as under:—

Universities.	Professors, &c.	Undergraduates.
England (11)	3,900	34,960

COMMERCIAL EDUCATION.

Commercial Students are well served by a number of independent schools or colleges in which class or private tuition is given or coaching undertaken by correspondence. Schools of Commerce can be found in practically every town; Book-keeping, Office Routine, Shorthand, Languages, are the usual subjects. Nearly every Education Authority has its system of Evening Institutes (Session—September to Easter and sometimes July) in which tuition may be obtained in most Commercial and Technical subjects. Classes are either free or subject to nominal charges.

The *London County Council* has Junior and Senior Evening Institutes to serve every district in the Metropolis. A child joining direct from an elementary day school and attending regularly can obtain all evening training free from cost. A postcard addressed to the L.C.C. making a request for details will be promptly answered.

In addition to the Secondary Schools in London, at which various stages of commercial training are included in the general subjects, the L.C.C. has a series of voluntary and free Day Continuation Schools at which commercial and trade subjects are taught to children over 14 years. The L.C.C. has also several Central Schools at which free training is given to children 12-17 years in general education with either a commercial or industrial bias.

BOY SCOUTS. (Incorporated.)

FOUNDED in 1908, as a result of an experimental camp held by the Chief Scout the previous summer at Brownsea Island, Dorsetshire, the movement was organised by Lord Baden-Powell, G.C.M.G., G.C.V.O., K.C.B., Chief Scout, to develop good citizenship among boys by forming their character—training them in habits of observation, obedience and self-reliance ; inculcating loyalty and thoughtfulness for others ; teaching them services useful to the public and handicrafts useful to themselves, and promoting their physical development and hygiene.

The Movement (whose membership exceeds 2,310,000) has taken root in all parts of the British Empire, and nearly every other country has adopted it.—*Imperial Headquarters*, 25 Buckingham Palace Road, London, S.W. 1.

THE GIRL GUIDES ASSOCIATION.

A movement founded by Lord Baden-Powell, G.C.M.G., G.C.V.O., K.C.B., Chief Scout, on the lines of the Boy Scouts and incorporated by Charter in 1915, while in the year 1923 H.M. the King granted the Movement a Royal Charter. Its aim is to develop good citizenship amongst girls by forming their character, training them in habits of observation, obedience, and self-reliance ; inculcating loyalty and thoughtfulness for others, and teaching them services useful to the public and handicrafts useful to themselves. It also seeks to promote their physical development, making them capable of keeping good homes and of bringing up good children. Its desire is to co-operate with educational and other bodies working to this end. The membership of the Movement now numbers over 947,000 all over the world, that of the British Isles alone being over 561,000 *Imperial Headquarters*, 17-19 Buckingham Palace Road, London, S.W. 1.

Headmasters' Conference Schools.

THE HEADMASTERS' CONFERENCE (*Secy.*, W. A. Bulkeley-Evans, C.B.E., LL.D., 5 Paper Buildings, Temple, E.C. 4.).—The Headmasters' Conference was founded in 1869 and incorporated in 1909. The object of the Conference is the discussion of educational questions which affect such schools as are in close connexion with the Universities of Oxford and Cambridge. In considering what Schools shall be included in the List, or removed from it, the Committee will have regard to the Governing Scheme or other instrument under which the School is administered, and if the School is maintained or aided by a Local Education Authority (*a*) how the Governing Body is constituted, (*b*) to what extent by right or in practice the Governing Body acts independently of the Local Education Authority in directing general policy or administering disposable funds, to the numbers in the School and, in the case of Schools in Great Britain and Ireland, the number of resident Undergraduates of Oxford and Cambridge educated at the School. The Committee may also take into account the proportion of boys in the School, who, having passed the School Certificate or other equivalent Examination, are continuing their studies beyond that stage. The annual meetings are, as a rule, held in December, alternately (*a*) at some school represented on the Conference, (*b*) at London or some University town.

NOTES:—(*a*) "Annual Fees" represent the average amount payable annually, *exclusive* of fees for optional subjects.

(*b*) "Headmaster." In certain Schools other titles prevail, *e.g.*, Beaumont, "Rector"; Belfast Academical, "Principal"; Dulwich, "Master"; Edinburgh Academy, "Rector"; Glenalmond, "Warden"; Haileybury, "Master"; King William's, I. of Man, "Principal"; Liverpool College, "Principal"; Magdalen Coll. Sch., "Master"; Manchester Gr., "High Master"; Marlborough, "Master"; Radley, "Warden"; St. Columba, Dublin, "Warden"; St. Edward's, Oxford, "Warden"; St. Paul's, "High Master"; Stonyhurst, "Rector"; Victoria College, Jersey, "Principal"; Wellington, "Master"

THE BOYS' BRIGADE. (Incorporated.)

The senior boys' organisation; founded in 1883 by the late Sir William A. Smith. The object of the Brigade is attained by a combination of discipline and religious training. Every Company is connected with a Church or other Christian body. The total strength is 100,000 officers and boys, with 50,000 juniors in The Life Boys.—Abbey House, Westminster, S.W. 1.

CHURCH LADS' BRIGADE.

An organisation especially valuable for helping a parish to keep the elder lads to their religious duties; was founded in 1891, and combines a military method with moral and religious instruction. It is estimated that 1,000,000 lads have had the advantage of the Brigade's training, and to-day there are over one thousand Companies throughout the Empire, with upwards of 60,000 lads.—*Headquarters*, Aldwych House, Catherine Street, W.C.2. *Chaplain-General and Secretary*, Very Rev. Edgar Rogers, O.B.E., M.A., F.S.A.

THE BROTHERHOOD.

THE BROTHERHOOD MOVEMENT, "to lead men and women into the Kingdom of God, to unite in Brotherhood of mutual help, to win the masses of the people for Jesus Christ, and to encourage the study of social service," may be said to have been founded in 1875 as the outcome of the *Pleasant Sunday Afternoon* movement initiated by John Blackham of West Bromwich. The movement is non-political and unsectarian, and connected with it are other societies—Sisterhoods, P.S.A., Bible Classes, &c. *President*, W. H. Bolton; *General Secretary*, Rev. J. W. Tuffley; *Headquarters*, 37 Norfolk Street, Strand, W.C. 2.

Secondary Schools.—I. Boys.

A Secondary School, as defined by the Board of Education, is a school for pupils who intend to remain for at least four years, and up to at least the age of 16. It must provide a progressive course of general education of a kind and amount suited to an age-range at least from 12 to 17.

THE INCORPORATED ASSOCIATION OF HEAD MASTERS, 29 Gordon Square, W.C. 1. *President*, L. W. Taylor, M.A. *Joint Hon. Secs.*, W. Jenkyn Thomas, M.A.; F. R. Hurlstone-Jones, M.A.; *Hon. Treasurer*, W. W. Vaughan, M.V.O.; M.A.; *Asst. Sec.*, H. Marshall.—The qualification for membership is the holding of the head mastership of a Public Secondary school for boys in England or Wales administered under a definite form of public or corporate control by a governing body which has powers both to control the school finances and to appoint and dismiss the head master.

THE SCHOOLMASTERS' ASSOCIATION, IRELAND (*Secy.*, Rev. C. B. Armstrong, M.A., St. Columba's College, Rathfarnham) is similar to the I.A.H.M.

ASSOC. OF ASSISTANT MASTERS IN SECONDARY SCHOOLS, 29 Gordon Sq., W.C. 1. *Sec.*, G. D. Dunkerley, B.Sc.

"*See* H.M.C." refers to preceding list of Headmasters' Conference Schools.

THE ASHBURTON SHIELD, BISLEY.

THE Ashburton Challenge Shield Competition was instituted in 1861 for teams of 8 from the Public Schools (teams of 11 from 1861–1876; teams of 8 since 1877). In 1861 and 1862 the Hay M.L. rifle was used; in 1863 the long Enfield M.L.; 1864-70 the Navy 5 groove M.L.; 1871–1884 Snider; 1885–1896 Martini-Henry; since 1897 the ·303 Magazine. The present regulations are 7 shots at 200 and 500 yards; one team of 8 pupils from each of such schools as have a contingent of the Junior Division of the Officers' Training Corps. The Highest Possible score is 560.

KING EDWARD VII's HOSPITAL FOR OFFICERS, SISTER AGNES, 17 Grosvenor Crescent, S.W. 1.

KING EDWARD'S HOSPITAL FUND FOR LONDON, 7 Walbrook, E.C. 4.—Was inaugurated in 1897 to secure more efficient support for the hospitals of London and so to commemorate the 60th anniversary of the accession of Queen Victoria. The Fund not only collects money for the voluntary hospitals, but helps to promote efficiency by means of its annual grants, every individual claim being carefully considered on its merits. Efforts are also made by various forms of propaganda to arouse and maintain a wider interest in the work of the hospitals generally. Total receipts, 1928, £378,635; expenses, £14,091; grants to hospitals and convalescent homes, £290,202 (including £30,750 for extensions, &c., from Wells legacies); funds in hand (including gifts to capital), £3,638,586.—*Pres.*, H.R.H. ADELPHI, Strand, W.C. 2.—Adelphi Terrace and district commemorate the four architect brothers (*adelphoi* = brothers), James, John, Robert and William ADAM, who laid out the district (formerly Durham House) at the close of the 18th century. James, John, Robert, and William Streets (the last named is now Durham Street) commemorate the brothers, who were the founders of the Adam style of architecture and internal decoration. In the neighbourhood of the Adelphi was York House, built by the Duke of Buckingham in 1625 (the Water Gate of which still stands in Embankment Gardens, *q.v.*), the commemorative streets being *Charles* Street, *Villiers* Street, *Duke* Street, *Of* Lane, *Buckingham* Street (Of Lane is now "York Place").

AUSTRALIA HOUSE, Strand, W.C. 2.—A handsome and imposing building, erected 1911–4 by the Commonwealth of Australia as the offices of the High Commissioner for the Commonwealth. The Agents-General for NEW SOUTH WALES, VICTORIA, SOUTH AUSTRALIA, and TASMANIA are accommodated in Australia House. QUEENSLAND and WESTERN AUSTRALIA have separate offices in the Strand.

BANK OF ENGLAND, Threadneedle Street, E.C. 2. (Not open to sightseers).—The Bank of England was founded in 1694, and, although a joint stock bank, has always been closely connected with the Government. The present building (now being enlarged) was erected from the designs of Sampson (1734) and Sir John Soane (1788). A "Bank Guard" is furnished every evening by the Battalion of Foot Guards on duty.

BETHLEM ROYAL HOSPITAL.—The site in Lambeth, formerly occupied by this institution, will be laid out as a public park under the supervision of the L.C.C., through the generosity of Lord Rothermere.

BELGRAVIA.—A fashionable district of London west of Buckingham Palace and south of Hyde Park, extends from Grosvenor Place on the east to Sloane Street on the west, and includes Belgrave, Chester, Lowndes, and Eaton Squares and Cadogan Place.

BRIDGES.—The bridges over the Thames (from East to West) are the *Tower Bridge* (opened in 1894), with its bascules, affording a fine view of the Pool and of the metropolis; *London Bridge* (opened after rebuilding in 1831, and until 1750 the only bridge over the Thames in London), with the Monument (*q.v.*) and Fishmongers' Hall; *Southwark Bridge* (opened in 1819, and rebuilt by the Corporation of London, 1921); *St. Paul's Bridge* (proposed to be built by the Corporation of London); *Blackfriars Bridge* (opened in 1869 and widened by the Corporation of London in 1908); width, 105ft.; *Waterloo Bridge* (Rennie), width, 42ft. 6ins. (opened in 1817) commanding a fine view of western London (to be reconstructed or rebuilt by L.C.C.); *Hungerford Bridge* (for pedestrians only); *Westminster Bridge* (built in 1750 and then presenting a view that inspired Wordsworth's sonnet; rebuilt and reopened in 1862; width, 84ft.) with Thornycroft's *Boudicca* at the north-western end; this bridge leads from Westminster Abbey and the Houses of Parliament to the County Hall (*q.v.*) and St. Thomas's Hospital; *Lambeth Bridge* (opened in 1862) leading to Lambeth Palace (now open for foot-passengers only); *Vauxhall Bridge* (rebuilt in 1906) leading to Kennington Oval; *Victoria Bridge* (1858); *Chelsea*, leading from Chelsea Hospital to Battersea Park, and *Albert Bridge* (1873); *Battersea Bridge* (opened in 1891); *Wandsworth Bridge* (opened in 1873); *Putney Bridge* (opened in 1886) where the Oxford and Cambridge Boat Race is started for Mortlake; *Hammersmith Bridge* (rebuilt 1887); *Barnes Bridge* (for pedestrians only); and *King Edward VII. Bridge, Kew* (rebuilt in 1902), leading to the Royal Botanic Gardens, Kew.— The County Councils of Middlesex and Surrey are building three new 70 ft. bridges over the Thames, at a total cost of £1,107,000 (*a*) Richmond to Twickenham (£345,000), (*b*) Chiswick to Mortlake (£255,000), (*c*) Hampton Court, in place of existing bridge (£180,000); the connecting roads will cost £307,000.

BUCKINGHAM PALACE, St. James's Park, S.W. 1. (Not open to the public).—Was purchased by King George III. in 1762 from the Duke of Buckingham, and was altered by Nash for King George IV. The London home of the Sovereign since Queen Victoria's accession in 1837. Refronted in stone (part of the Queen Victoria Memorial) by Sir Aston Webb in 1913.

BURLINGTON HOUSE, Piccadilly, W. 1.—Occupied by Royal Academy of Arts (for annual exhibitions, *see* "Picture Galleries"); British Academy; Royal, Antiquarian, Astronomical, Linnean, Chemical and Geological Societies.

CANADIAN BUILDING, Trafalgar Square, S.W. 1.—A conspicuous building on the Western side of the Square, in which are the Offices of the High Commissioner of the Dominion and Officials dealing with Trade, Emigration, &c. Designed by Sir Robert Smirke in 1820, it was renovated and embellished when vacated by the Union Club. Certain interior features of the original building are preserved, and the spacious, richly furnished room now occupied by the High Commissioner is much admired. Surrounded by Offices of Canadian Agents-General, Steamship, Railway and other Dominion Companies, the Canadian Building is one of London's new landmarks. It was opened by Their Majesties the King and Queen in June, 1925.

CANONBURY TOWER, Canonbury, N. 1.—A social club for tenants of the Marquess of Northampton's estates in the vicinity (in the remains of the 16th century house of the Priors of St. Bartholomew). Contains the "Spencer" and "Compton" oak-panelled rooms. Other relics of Canonbury House can be seen in the vicinity.

Admission free to Library (containing Plan of London in 1570; Deed of Sale with Shakespeare's signature; first, second and fourth folios of Shakespeare's plays, &c.), and Newspaper Room, 10 a.m. to 6 p.m. *Librarian*, J. L. Douthwaite.

GUY'S HOSPITAL, St. Thomas's Street, S.E. 1.—Founded by Thomas Guy (a bookseller), in 1721: the main entrance and quadrangle (with statue of founder) are early 18th century. 650 beds.

HOLBORN VIADUCT, E.C. 1, was constructed in 1867–1869 by order of the Corporation of the City of London from the designs of William Haywood, to carry the roadway over the valley of the Fleet river (the "Hole-bourne"). The Holborn Valley Viaduct is 1,400 ft. long, and is mainly of iron construction. The cost (£1,571,000) was borne by the City of London, the loan raised for the purposes of the improvement being secured on the Coal and Corn dues; these dues were abolished in 1889 and 1902, and the loan is otherwise discharged.

HONOURABLE ARTILLERY COMPANY'S HEADQUARTERS, City Road, E.C. 1.—The H.A.C. (*Sec.*, Maj. G. G. Walker, D.S.O., M.C.) received

its charter of incorporation from Henry VIII. in 1537, and has occupied its present ground since 1641. Four of its members—Duncan, Keayne, Sedgwick, and Spencer—who emigrated in the seventeenth century, founded in 1638 the Ancient and Honorable Artillery Company of Boston, U.S.A. American soldiers and sailors may view the armoury, *on request.*

HORSE GUARDS, Whitehall, S.W. 1.—Archway and offices built about 1750. The headquarters of the Commander-in-Chief until 1904. The mounting of the guard (1st or 2nd Life Guards, or Royal Horse Guards) at 11 a.m. (10 a.m. on Sundays) and the dismounting at 4 p.m. are picturesque ceremonies. Only those on the Lord Chamberlain's list may drive *through the gates and archway into* Horse Guards' Parade. *Horse Guards' Parade*, where the Colour is "trooped" on the King's Birthday, has been enlarged to 300,000 sq. ft. (Trafalgar Square is 168,850 sq. ft.; Parliament Square, 136,900 sq. ft.; Leicester Square, 100,000 sq. ft.).

HOUSES OF PARLIAMENT, Westminster, S.W. 1. —The "Palace of Westminster" was rebuilt in 1840–1850 from the designs of Sir Charles Barry and Augustus Pugin, *at a cost of £2,198,000.* —Open to visitors on Saturdays, and on Easter and Whit Mondays and Tuesdays, if neither House be sitting. Admission at the Norman Porch, House of Lords, on the above-mentioned days, from 10 a.m. to 3.30 p.m. Admission to the Strangers' Gallery of the House of Commons, during session, by member's order, or order *obtained on personal application at the Admission* Order Office *in St. Stephen's Hall. The* Victoria Tower (House of Lords) is 336 ft. high, and when Parliament is sitting the Union Jack flies by day from its flagstaff. The Clock Tower of the House of Commons is 320 ft. high and contains "Big Ben" (13½ tons), named after Sir Benjamin Hall, First Commissioner of Works when it was hung in 1856. A light is displayed from this tower when Parliament is sitting.

INNS OF COURT. — The *Inner* and *Middle Temple*, S. of Fleet Street, E.C. 4, and N. of Victoria Embankment, to which the gardens extend, occupy (since early 14th century) the site of the buildings of the Order of Knights Templars, the *Temple Church* (*q.v.*) surviving. Middle Temple Hall is Elizabethan, and in Middle Temple Gardens Shakespeare (Henry VI, Pt. I) places the incident which led to the "Wars of the Roses" (1455–1485). *Lincoln's Inn*, from Chancery Lane to Lincoln's Inn Fields, W.C. 2, occupies the site of the palace of a former Bishop of Chichester and of a Black Friars monastery. It was founded early in the 14th century. The new Hall is modern, the Library is 15th century, and the old Hall early 16th century, the Chapel (Inigo Jones) early 17th century. *Lincoln's Inn Fields* (7 acres); the Square contains many fine old houses with handsome interiors. *Gray's Inn*, Gray's Inn Road, W.C. 1, was founded in late 14th century. The Hall is 16th century (the "Comedy of Errors" was performed there in 1594); the Gardens were laid out (according to tradition) by Lord Chancellor Bacon (died 1626). No other "Inns" are active, but *Staple Inn* is worth visiting as a relic of Elizabethan London; it has a picturesque gabled front on Holborn (opposite Gray's Inn Road), and the Hall, with hammer beam roof, is intact; in rear of the hall is a picturesque Dutch garden, restored by the present owners of Staple Inn (the Prudential Assurance Company). *Clement's Inn* (near St. Clement Dane's Church); *Clifford's Inn*, Fleet Street and *Thavies Inn*, Holborn Circus. *Serjeants' Inn*, Fleet Street, and another (now demolished) of the same name in Chancery Lane, were composed of Serjeants-at-Law, the last of whom died in 1899.

KENSINGTON PALACE, W. 8.—Enlarged by Christopher Wren for King William III. (1691), and continued as a royal residence until 1760. The birthplace of Queen Victoria in 1819. Open on Saturdays and Sundays, 2 to 6; winter 2 to 4. *Kensington Gardens* (*q.v.*) adjoin.

KING'S COLLEGE HOSPITAL, Denmark Hill, S.E. 5.

LAMBETH PALACE, S.E. 1.—The official residence of the Archbishop of Canterbury, on south bank of Thames; the oldest part is 13th century, the house itself is early 19th century. For leave to visit the historical portions, applications should be made by letter to the Archbishop's Secretary.

LAW COURTS, Strand, W.C. 2. — The Royal Courts of Justice were erected from the designs of G. E. Street (completed by Sir A. Blomfield and A. E. Street) in 1874–1882 at a cost of £1,000,000 (the site cost £1,500,000 in addition). Until they were occupied by the Supreme Court of Judicature (established in 1873 by the fusion of High Court, Chancery, Queen's Bench, Common Pleas, Exchequer, Probate, Divorce, and Admiralty) the Courts met in Westminster Hall (*q.v.*). The Central Hall is 238 ft. long.

LITTLE BRITAIN, Smithfield, E.C. 1.—Benjamin Franklin lived in Little Britain on his first coming to London. It was then a centre of the bookselling and printing trade, and Franklin is reputed to have set type in the works which extended into the Lady Chapel of St. Bartholomew's Church (*q.v.*).

LIVERY COMPANIES' HALLS.—The Principal Companies (*see* p. 607) have magnificent halls, but admission to view them has generally to be arranged beforehand.

LONDON HOSPITAL, Whitechapel High Street and Road, E. 1.—Founded 1759. Hospital contains 930 beds.

LONDON MONUMENT (commonly called "The Monument"), Pudding Lane, Eastcheap, E.C. 3. —Built from designs of Wren, 1671–1677, to commemorate the *Great Fire of London*, which broke out in Pudding Lane, Sept. 2, 1666. The fluted Doric column is 202 feet high (the flames of fire 42 feet in addition), and is based on a square plinth, with fine carvings on W. face. Splendid views of London from gallery at top of column. Admission 3*d.*, 9 to 6 (Oct.–April to 4).

LORD'S CRICKET GROUND, St. John's Wood Road, N.W. 8.—The headquarters (since 1814) of the Marylebone Cricket Club, the premier cricket club in England and the governing body of cricket. Oxford and Cambridge, and Eton and Harrow matches in July. Lord's is also the Middlesex County Cricket Club headquarters, and the scene of some of the principal matches of the season. Admission to ordinary matches 1*s.*, to special matches 2*s.* or 3*s.* (including tax). The public can obtain reserved seats on payment. Tennis Court in building behind members' pavilion, where interesting games are played.

MANSION HOUSE, City, E.C. 4.—(Reconstructed 1930–31). The official residence of the Lord Mayor; the Egyptian Hall and Ballroom are the chief attractions. Admission by order from the Lord Mayor's Secretary.

MARKETS. — The London markets (administered by the Corporation of the City of

London) provide foodstuffs for 8,500,000 to 9,000,000 people. The dead meat market at Smithfield is the largest in the world, the supplies marketed amounting to nearly 500,000 tons annually. *Central Meat, Fish, Fruit, Vegetable, and Poultry Markets*, Smithfield; *Leadenhall Market* (Meat and Poultry); *Billingsgate* (Fish), Thames Street; *Spitalfields*, E. 1 (Vegetables, Fruit, &c.), enlarged 1928, and opened by H.M. the Queen; *London Fruit Exchange*, Brushfield Street (built by Corporation of London 1928-9) faces Spitalfields Market; *Metropolitan Cattle Market* (Mon. and Th.; General or Pedlars' Market, Tu. and Fri.) *and Abattoirs*, Caledonian Road, N.1. Other markets are—*Covent Garden*, W.C. 2 (established under a charter of Charles II. in 1661) and *Borough Market*, S.E. 1, for Vegetables, Fruit, Flowers, &c.

MARLBOROUGH HOUSE, Pall Mall, S.W. 1. (Not open to the public).—Built by Wren for the great Duke of Marlborough about 1710, and purchased as a London residence for the Prince of Wales in 1863. To become the London house of the Prince of Wales.

MAYFAIR.—A fashionable district of London, north of Buckingham Palace and east of Hyde Park, extends from Oxford Street (N.) to Piccadilly (S.), and from Bond Street (E.) to Park Lane (W.), includes Curzon Street and Grosvenor and Berkeley Squares. The most fashionable shopping centres of London are included in Mayfair in Old and New *Bond Street* and *Oxford Street*. *Regent Street* almost adjoins Mayfair.

The *River Thames* has a total length of 210 miles from its source in Gloucestershire to the "Nore" Lightship in the estuary. The *tidal portion* below Teddington Lock (69 miles) forms the *Port of London*, through which over one-third of the overseas trade of the United Kingdom flows. The value of the overseas trade of the Port was £603,743,000 in 1930. The Port is served by the following Docks:—*St. Katherine's Dock*, E. 1. (23½ acres), handling Shells, Tea, Canned Goods, Hides, Perfumes, &c.; *London Dock*, Wapping, E. 1 (100 acres), Ivory, Spices, Rubber, Wine, Wool, Marble and general Continental and coastwise traffic; *Surrey Commercial Docks*, Rotherhithe, S.E. 16 (376 acres), Timber, Grain and Canadian Produce; *West India Docks*, E. 14 (242 acres), Rum, Sugar, Grain, Hardwood and Fruit; *Millwall Docks*, Poplar, E. 14 (231 acres), the principal centre of the grain trade of London; *East India Docks*, Poplar, E. 14 (67½ acres), South African and West Indian traffic (Special Banana Berth); *Royal Victoria and Albert Docks*, E. 16 (916½ acres), Frozen and Chilled Meat, Grain and Tobacco; *King George V. Dock*, North Woolwich, E. 16, opened in 1921 (186 acres), provides accommodation for the largest vessels afloat. *Tilbury Docks* (675 acres), about 26 miles below London Bridge, are used principally by vessels plying on the Australian, Indian and other Eastern routes; the *Tilbury Cargo Jetty* is available for vessels to discharge or load part-cargoes; *Tilbury Passenger Landing Stage* provides accommodation for liners at all states of the tide and has direct rail connection with London, the Midlands and the North.

POST OFFICE.—The "General Post Office" is in King Edward Street, E.C. 1, a handsomely fronted, ferro-concrete building (Tanner), with marble inlaid hall, opened in 1910. The public Hall is open for usual postal business from 6.45 a.m. to 9 p.m. (Sat. 8 p.m.). In the neighbourhood are G.P.O. North and G.P.O. West (the Central Telegraph Office).

PRINCE HENRY'S ROOM, 17, Fleet Street, E.C. 4 (bought by the L.C.C. in 1900, and open free 10 to 4 or 5) is in a timbered 17th century house, and contains a Jacobean plaster ceiling and Jacobean

and Georgian panelling. (Available for lettings —Apply Architect, County Hall S.E.1.)

ROMAN LONDON.—Traces of the Roman occupation of London from the 1st century to the 5th century A.D. may still be seen *in situ*. There are remains of Roman baths at No. 5 Strand Lane, Strand, W.C. 2, and at the Coal Exchange, Lower Thames Street, E.C. 3. Portions of the Roman Wall which encircled London are still visible, including a bastion below the pavement of the yard of the General Post Office (fronting Giltspur Street). Other pieces of the wall may be seen in the disused churchyard of St. Alphage, London Wall, E.C. 2; in the churchyard of All Hallows on the Wall, London Wall, E.C. 2; in Roman Wall House, Jewry Street and Crutched Friars, Aldgate, E.C.3; below Leadenhall Market; and near the S.E. corner of the White Tower of the Tower of London; a small portion of Roman brickwork was uncovered in March, 1922, on a site adjoining St. Peter's, Cornhill, E.C.3. Many relics of Roman London may be seen in the Guildhall, British and London Museums (*q.v.*).

ROYAL EXCHANGE, Cornhill, E.C. 3, founded by Sir Thomas Gresham, 1566, opened by Queen Elizabeth 1571, rebuilt 1667–9 and 1842–2844).—Admission free. Statues of Queen Elizabeth, Charles II., Queen Victoria, Sir Thomas Gresham, Wellington (Chantrey), riding without stirrups, Peabody, and others; frescoes in the ambulatory by Leighton, Abbey, Brangwyn, Wyllie, and others. The chimes of the Royal Exchange (re-cast 1921) play English, Scottish and Irish melodies at 9 a.m., 12 noon, and 3 and 6 p.m. The building is now occupied entirely by the Royal Exchange Assurance, which has had its head office there since 1720.

ROYAL GEOGRAPHICAL SOCIETY, Kensington Gore, S.W. 7.—Map Room open to public, *free*.

ROYAL MINT, Tower Hill, E.C. 3 (building erected 1810), where gold, silver, and bronze are coined. Admission by order only, application for which should be made to the Deputy Master of the Mint, about 4 weeks in advance of intended visit. Hours of admission, 10 to 3 Mon. to Fri., except Bank Holidays, &c., when the Mint is closed.

ST. BARTHOLOMEW'S HOSPITAL, Smithfield, E.C. 1.—Founded A.D. 1123 by Rahere (*see* St. Bartholomew's Priory, p. 314). Present buildings mainly 18th and 19th centuries; main entrance 1702. The Great Hall contains a series of portraits including Henry VIII., Harvey, Abernethy, Pott, Radcliffe, &c. Hospital for 760 beds. The Church of St. Bartholomew the Less (rebuilt 1823) is within the hospital precincts; Inigo Jones was baptised in former church.

ST. GEORGE'S HOSPITAL, Hyde Park Corner, W. 1.—Founded in 1733. Hospital for 340 beds. *Present buildings date from 1829.*

ST. JAMES'S PALACE, in Pall Mall, S.W. 1.—(Not open to the public). Built by Henry VIII. (according to tradition, from designs by Holbein); the Gatehouse and Presence Chamber remain, and part of the Chapel Royal. A royal residence from 1698 to 1837. *Royal Levées* held here during the season. Representatives of Foreign Powers are still accredited "to the Court of St. James's," and (by the King's permission) the Conference of the Allies was held there in February, 1921.

ST. JOHN'S GATE, Clerkenwell, E.C.1.—Now the Chancery of the Order of St. John of Jerusalem, and formerly the gate of the Priory of that Order, of which the gate house (early 16th century) and choir of Church (crypt 12th century) alone survive. The gatehouse may be inspected by written permission of the Secretary of the Chancery.

ST. THOMAS'S HOSPITAL, Albert Embankment, S.E. 1.—Founded 1213. Present buildings (7 red brick houses) by Currey, 1868–71. 1,000 beds.

SMITHFIELD, E.C. 1.—Sir William Wallace was executed there (1305) in the reign of Edward I., and Wat Tyler was "despatched" by Lord Mayor* Walworth (1381) in the reign of Richard II. Anne Askew, a Protestant martyr (1546), was burned there in the reign of Henry VIII.; and under Mary I. (1553–1558) many suffered there for the Protestant faith. (A memorial is affixed to the W. wall of St. Bartholomew's Hospital.) The last to suffer for religion at Smithfield was Bartholomew Leggatt, Unitarian (1612), in the reign of James I. At the corner of Cock Lane (W. side of West Smithfield) is a small gilt figure commemorating the spot where the Fire of London was finally checked by the demolition of houses, Sept. 6, 1666. Smithfield Market occupies the W. side of West Smithfield.

SOMERSET HOUSE, Strand, W.C. 2, and Victoria Embankment, W.C. 2. — The beautiful river façade (600 feet long) was built at the close of the 18th century from the designs of Sir W. Chambers; the remainder of the building is early 19th century. Somerset House was the property of Lord Protector Somerset, at whose attainder in 1552 the palace passed to the Crown, and it was a royal residence until about the close of the 17th century. The building is now occupied by the *Board of Inland Revenue* and by the *Principal Probate Registry* and the office of the Registrar-General of *Births, Marriages and Deaths*. In the Probate Registry (Central Hall) are the wills (*inter alia*) of Shakespeare, Milton, Newton, Van Dyck, Pitt, Dr. Johnson, Nelson, Wellington and Burke.

STOCK EXCHANGE, E.C. 2. (Strangers not admitted).—Known in the City as the "House," was founded in 1773 and now consists of about 4,000 members. A dealer ("jobber") does business only with other members; a "broker" is the intermediary with the public. Speculators for a rise in prices are "bulls"; those for a fall are "bears." *Chairman of the Committee for General Purposes*, Sir Archibald Henry Campbell; *Deputy Chairman*, H. F. Chamen; *Secretary, General Purposes Committee*, A. L. F. Green; *Secretary, Trustees and Managers*, R. M. Brydone; *Office*, New Court, Throgmorton St, E.C. 2.

THAMES EMBANKMENTS.—The Victoria Embankment, on the N. side (from Westminster to Blackfriars), was constructed by Bazalgette for the Metropolitan Board of Works, 1860–1870 (the seats, of which the supports of some are a kneeling camel, laden with spicery, and of others a winged sphinx, were presented by the Grocers' Company, and by Rt. Hon. W. H. Smith, M.P., in 1874); the Westminster to Vauxhall section, on the S. (Surrey) side, 1860–1869; the Chelsea Embankment, 1871–1874. The total cost exceeded £2,000,000. Sir Joseph William Bazalgette (1819–1891) also constructed the London main drainage system, 1858–1865, at a cost of £4,600,000. A medallion has been placed on a pier of the Victoria Embankment to com-

memorate the engineer of the Thames waterside improvements ("Flumini vincula posuit"). The County Hall of the L.C.C. includes an embankment on the Surrey side.

THAMES TUNNELS.—The *Rotherhithe Tunnel* (foot passengers and vehicles), constructed by the L.C.C. and opened in 1908, connects Commercial Road East, with Lower Road, Rotherhithe; the total length is 1 mile 440 yards, of *which 510 yards are under the river. The cost* of the tunnel and its approaches was £1,560,041. The *Blackwall Tunnel* (foot passengers and vehicles) was constructed by the L.C.C. and opened in 1897, connects East India Dock Road, Poplar, with Blackwall Lane, East Greenwich. The total length of the tunnel is nearly 1¼ miles, of which 407 yds. are under the river. The cost of the tunnel with its approaches was about £1,406,000. *Greenwich Tunnel* (foot passengers only) constructed by the L.C.C. and opened in 1902, connects the Isle of Dogs, Poplar, with Greenwich. The length of the subway is 406 yards, and the cost was about £180,000. The *Woolwich Tunnel* (foot passengers only), constructed by the L.C.C. and opened in 1912, connects North and South Woolwich below the passenger and vehicular ferry from North Woolwich Station, E. 16, to High Street, Woolwich, S.E. 18. The length of the subway is about 500 yards, and its cost was £85,862. The *Thames Tunnel* (1300 feet) was opened in 1843 to connect Wapping (N.) with Rotherhithe (S.). In 1865 it was closed to the public, and purchased by the East London Railway Company. The *Tower Subway* for foot passengers was opened in 1870, and has long been closed.

TOWER HILL, E.C. 1 and E.C. 3, was formerly the place of execution for condemned prisoners from the Tower, the site of the scaffold being marked in the gardens of Trinity Square.

TOWER OF LONDON, E.C. 3 (built by William the Conqueror, A.D. 1066–1087).—Admission to Jewel House, on all week days, 6*d.*; White Tower and Armouries, including Vaults, 6*d.*; to Bloody Tower, on all week days, 6*d.* Free on Saturdays (except Jewel House and Bloody Tower) by tickets issued at the office at gateway. Open from 1 May to 30 Sept., 10 a.m. to 6 p.m.; 1 Oct. to 30 April, 10 a.m. to 5 p.m. Not open on Good Friday, Christmas Day, or Sunday. *Constable*, Field-Marshal Lord Methuen, G.C.B., G.C.M.G., G.C.V.O.; *Lieutenant*, Lt.-Gen. Sir W. Edmund Ironside, K.C.B., C.M.G., D.S.O.; *Major and Resident Governor*, Lt.-Col. Dan Burges, V.C., D.S.O.; *Keeper of the Jewel House*, Major-Gen. Sir George J. Younghusband, K.C.M.G., K.C.I.E., C.B.; *Curator of the Armouries*, Charles ffoulkes, F.S.A. The Yeoman Warders retain their picturesque Tudor uniforms. During the Great War the use of the Tower as a prison was revived. Sir William Wallace, King David II. and King James I. of Scotland, the "Little Princes" (*Edward V. and his brother*), *Anne Boleyn*, Katherine Howard, Lady Jane Grey, Queen Elizabeth, Sir Walter Raleigh, William Penn, Cranmer, Ridley and Latimer and many others were imprisoned in the Tower.

TRAFALGAR SQUARE, S.W. 1.—This space was laid out in the second quarter of the 19th century. In the Square are the *Nelson Monument* 142 feet high, with Landseer's lions round the base, and statues of *Havelock*, *Napier*, and *Gordon*. The plinth of the Nelson Monument was badly damaged by fire during the (unofficial) celebrations of Armistice Day (Nov. 11-12, 1918). In the façade of the N. Wall of Trafalgar Square are metal standard measures.

WESTMINSTER HALL, S.W. 1 (built by William Rufus, A.D. 1087–1100 and altered by Richard II., 1377–1399), adjacent to and incorporated in the Houses of Parliament.—Westminster Hall is part of the Palace of Westminster and survived the fire, which destroyed the remainder of the Palace (Oct. 16, 1834). The Hall is 290 feet long, 68 feet wide, and 90 feet high. The hammer beam roof of carved oak, dating from 1399, is one of the principal attractions. King Charles I. was tried in the Hall. For admission, see regulations as to Houses of Parliament.

WHITEHALL, opposite Horse Guards, S.W. 1.—Erected by Inigo Jones as a banqueting-house for the projected Whitehall Palace. King Charles I. was beheaded here.

ENVIRONS OF LONDON.

BARNET AND HADLEY GREEN.—Scene of Battle, A.D. 1471 Hadley Woods.

BROOKLANDS, Weybridge.—Motor and motor-cycle races.

BURNHAM BEECHES and FLEET WOOD, Bucks.—Magnificent sylvan scenery (425 acres), purchased by the Corporation of London for the benefit of the public in 1879; Fleet Wood (65 acres) presented in 1921. During summer omnibus runs daily, Sundays included, from Slough Station, G.W.R., passing within 250 yards of "Gray's Elegy" Church, *see* "Stoke Poges."

BUSHY PARK (1,100 acres).—Adjoining Hampton Court, contains many fine trees and avenue of horse-chestnuts enclosed in a fourfold avenue of limes, planted by King William III. "Chestnut Sunday" (when the trees are in full bloom with their "candles") is usually about 1st to 15th May. A herd of tame deer is maintained.

CHEQUERS, a country residence for Prime Ministers (from Jan. 1, 1921), was presented to the Nation (with an endowment to maintain the estate, &c.) by Lord and Lady Lee of Fareham, as the official country residence for the Prime Minister of the day, and the gift was approved by Parliament in the *Chequers Estate Act*, 1917. In 1921 the Chequers Estate of 700 acres was added to the gift by Lord Lee. Chequers is a Tudor mansion in the Chilterns, about 3 miles from Princes Risborough, Bucks, and contains a collection of Cromwellian portraits and relics.

CHILTERN HUNDREDS (Stoke, Burnham and Desborough, in Buckinghamshire).—No duly elected member of the Commons can resign his seat; he must apply for some office of profit under the Crown, and so vacate his seat under the Act of Settlement, 1707 (6 Anne, c. 7), and the usual practice is to apply for the Stewardship of the *Chiltern Hundreds*, or of the Manor of Poynings, or Northstead, or the Escheatorship of Munster, whereupon the seat is declared vacant (under the Place Act of 1742, which expressly permitted acceptance of such offices to serve as an excuse for resignation) and a new writ is issued by the Speaker.

CUFFLEY, Herts.—Memorial to Capt. W. L. Robinson, V.C., on spot above which the first German Zeppelin (L 21) was destroyed.

DOWNE HOUSE, Downe, Farnborough Kent.—Where Charles Darwin thought and worked for 40 years and died in 1882. Open free daily (except Good Friday and Christmas Day) 10 to 6, April to Sept., and 11 to 4 Oct. to March.

DULWICH, S.E. 21 (5 miles from London) contains *Dulwich College* (founded by Edward Alleyn in 1619), *Dulwich Picture Gallery*, built by Sir John Soane to house the collection bequeathed by the artist, Sir Francis Bourgeois (open free daily, 10 to 5, or 6, and on Sunday afternoons during the Summer), the *Horniman Museum* (*see* p. 224), and *Dulwich Park* (72 acres). In *Dulwich Village* the rural characteristics of the pre-suburban period are preserved.

ELTHAM, Kent (10 miles from London by Southern Ry.). Remains of 13th–15th century Eltham Palace, the birthplace of John of Eltham (1316), son of Edward II. The hall, built by Edward IV., contains fine hammer-beam roof of chestnut. In the churchyard of St. John the Baptist is the tomb of Thomas Doggett, the comedian and founder of the Thames Watermen's championship.

ENFIELD, Middlesex (10 miles from London by L.N.E. Ry.). Parish Church contains well-preserved brasses and monuments.

ENFIELD LOCK, Middlesex. Royal Small Arms Factory may be visited by appointment (intending visitors must be British subjects and should apply beforehand by letter).

EPPING FOREST (5,659 acres, originally purchased by the Corporation of London for £250,000 and thrown open to the public in 1882; the present forest is 12 miles long by 1 to 2 miles wide, about one-tenth of its original area; in 1929 the deer in the forest averaged 126). LOUGHTON, BUCKHURST HILL, CHINGFORD, HIGH BEECH, on L. & N.E. Railway. Beautiful forest scenery.

ETON COLLEGE.—22 miles from London. The most famous of English schools, founded by Henry VI. in 1440, the scholars numbering 1,114 in Sept. 1928. Buildings date from 1523.

FOUNDLING HOSPITAL SCHOOLS, Redhill, Surrey.—Founded in 1739 by Capt. Coram, of the Merchant Marine, for exposed and deserted young illegitimate children. Coram also bequeathed funds for the benefit of King's Chapel, Boston, Mass. *Offices*, 40 Brunswick Sq., W.C. 1.

GRAVESEND, a borough and river port, 22 miles from London (Southern Ry.). A favourite resort

for Londoners. St. George's Church (1727) contains a pulpit of Virginian wood, erected in 1904, and a stained glass window (the gift of ladies of Virginia) in memory of Princess Pocahontas, who was buried in the former church in 1617. Gravesend was formerly considered to be the entrance to London (Tilbury fort and docks are on the opposite bank).

GREENWICH, S.E. 10.—A south-eastern metropolitan borough (*see* p. 603) with a frontage of 4½ miles on the Thames. *Greenwich Hospital* (since 1873, the Royal Naval College) was built by Charles II., from designs by Inigo Jones, and by Queen Anne and William III., from designs by Wren, on the site of an ancient royal palace, and of the more recent *Placentia*, an enlarged edition of the palace, constructed by Humphrey, Duke of Gloucester (1391–1447), son of Henry IV. Henry VIII., Queen Mary I. and Queen Elizabeth were born in the Royal Palace (which reverted to the Crown in 1447) and King Edward VI. died there. The Painted Hall of Greenwich Hospital (Thornhill), Nelson Relics, &c., open on weekdays (except Friday) from 10 (and on Sundays from 2) till 4 or 6, according to time of year. In the principal quadrangle is a marble statue of George II., by Rysbraeck. *Naval Museum*, interesting Collection of Models, &c., open daily, except Friday and Sunday, from 10 till 4 or 6; admission 6*d.* per person (except Sundays and Bank Holidays)—*bona fide* parties of 20 or more, 3*d.* per person. *Chapel* open daily except Sundays and Fridays, and after 4 p.m. on Saturdays. *Greenwich Park* (188 acres) was enclosed by Humphrey, Duke of Gloucester, and laid out by Charles II., from the designs of Le Notre. On a hill in Greenwich Park is *Greenwich Observatory* (founded 1675), the zero meridian of longitude and of "Greenwich Time." Admission to the Observatory only by permission of the Astronomer Royal. The parish church of Greenwich (*St. Alfege*) was rebuilt by Hawksmoor (Wren's pupil) in 1718, and contains a pulpit and other carvings attributed to Grinling Gibbons. General Wolfe (Heights of Abraham) and Tallis ("the father of Church Music") are buried in the church. Henry VIII. was christened in the former church. The Ministerial *Whitebait Dinner*, held for many years at the "Ship" Hotel, was last held in 1894.

HAMPTON COURT.—Sixteenth century Palace built by Cardinal Wolsey, and added to by Sir Christopher Wren for William and Mary, 15 miles from London. Fine view of river. Beautiful gardens with maze and prolific grape vine (planted in 1768). Old Royal Apartments and collection of pictures. Tennis Court, built by King Henry VIII. in 1530. The State Apartments are open every week-day from 10 a.m., and on Sundays from 2 p.m. Hours of closing, May to Sept. 6 p.m.; March, April and Oct. 5 p.m.; Nov., Dec., Jan. and Feb. 4 p.m. Admission, Mon., Tues., Wed., Thur. and Fri., 1*s.*; Sat., 6*d.* (children half price). Admission to the Tudor Kitchen, Wine Cellars and the Great Hall, 3*d.* (inclusive charge), no half-price. Sun. and Bank Holidays, free. Tickets obtainable at the King's Staircase. *Bushy Park* adjoins the Lion Gates of Hampton Court Palace.

HARROW-ON-THE-HILL.—10 *miles* by Metropolitan and other railways. Large public school [illegible] scholars in Sept. 1928), founded by John [illegible]on in 1571. The "Fourth Form Room" dates [illegible]om 1608.

JORDANS AND CHALFONT ST. GILES, near Beaconsfield, Bucks, contain the Old *Quaker Meeting House* (1688) at Jordans, in the burial ground of which lies William Penn (Pennsylvania); a barn in the farm ground is believed to have been built out of the timbers of the *Mayflower* by the 17th century owner of Jordans (Gardener). At Chalfont St. Giles is the cottage where Milton lived during the Great Plague (1665–1666).

KINGSTON-UPON-THAMES, Surrey (about 12 miles from London), is the ancient place of coronation of the Kings of Saxon England. The Coronation Stone (hence the name "King's Stone") is preserved within railings in the market place.

RICHMOND, Surrey, contains the red brick gateway of *Richmond Palace* (Henry VII., 1485–1509) and buildings of the Jacobean, Queen Anne, and early Georgian periods, including *White Lodge* in Richmond Park, the home of Queen Mary's mother (the Prince of Wales was born there June 23, 1894). The *Star and Garter* Home for Disabled Soldiers, Sailors, and Airmen (the Women's Memorial of the Great War) was opened by Queen Mary in 1924. *Richmond Park* (2,250 acres) contains herds of fallow and red deer. From the *Terrace Gardens*, Richmond Hill, can be obtained a wonderful view of the Valley of the Thames.

RUNNIMEDE.—A meadow of about 100 acres, on S. bank of Thames (part of the Crown Lands), between Windsor and Staines. From June 15–23, 1215, the hostile Barons encamped on this meadow during negotiations with King John, who rode over each day from Windsor. The 48 "Articles of the Barons" were accepted by the King on June 15, and were subsequently embodied in a charter, since known as *Magna Carta*, of which several copies were sealed on June 19. About half a mile N.E. of the meadow is *Magna Carta Island* (claimed as the actual site of the sealing) presented to the Nation in 1930 by Lady Fairhaven and her sons.

RYE HOUSE, at Hoddesdon, *on the River Lee.* Scene of the celebrated plot. Old castle and dungeons, pictures, oak fireplaces, chests and panels; Queen Elizabeth's bed; the Great Bed of Ware (mentioned in "Twelfth Night").

ST. ALBANS.—A city in Hertfordshire, on the river Ver, 22 miles N.W. of London. The abbey church, built partly of materials from the old Roman city of Verulamium by Paul of Caen, was consecrated in 1115. Parts still remain of the Norman structure. The city was the scene of the overthrow of Henry VI. in 1455, and of the Earl of Warwick in 1461. On a printing press set up in the abbey the first English translation of the Bible was printed. Ruins of ancient City of Verulam; St. Michael's Church, with tomb of Lord Bacon.

STOKE POGES (2 miles from Slough station on G.W. Ry.) contains the 14th century Church with the Churchyard of Gray's "Elegy" and "Ode on a Distant Prospect of Eton College." The poet was buried in the church in 1771. There is an eccentric "Bicycle" Window (1643) in an external cloister.

WALTHAM ABBEY (or WALTHAM HOLY CROSS), 13 miles from London (L.N.E. Ry.).—The Abbey ruins, Harold's Bridge (11th century), the Nave of the former cruciform Abbey Church (the oldest Norman building in England (consecrated May 3, 1060) and the traditional burial place of King Harold II., 1066) and a Lady Chapel of Edward II., with crypt below. At Waltham Cross, 1 mile from the Abbey, is one of the

crosses (partly restored) erected by Edward I. to mark a resting place of the corpse of Queen Eleanor on its way to Westminster Abbey. (Ten crosses were erected, but only those at Geddington, Northampton and Waltham remain; "Charing" Cross originally stood on the spot now occupied by the statue of Charles I. at Whitehall.)

WINDSOR CASTLE (begun by William the Conqueror, A.D. 1066–1087).—22 miles from London, by Great Western and Southern Railways. When the Court is not in residence, the *State Apartments* of Windsor Castle are generally open to the public, during His Majesty's pleasure, on every week-day except Friday. The charges for admission are: Adults, 1*s.*; children, 6*d.* On Bank Holidays half the usual fees are charged; by the King's command, the proceeds to go to local charities. An authorised guide book can be obtained at the office, price 6*d.* The hours of admission to the State Apartments are from 1 April to 30 June, and 1 to 31 Oct. between 11 and 4; 1 July to 30 Sept., 11 to 5; and from 1 Nov. to 31 March, between 11 and 3. The *Queen's Dolls' House* is open on the same days and hours as the State Apartments, admission 6*d.* each person. The *Albert Memorial Chapel* is open on the same days and at the same hours as the State Apartments; the Round Tower or Keep is open from 1 April–30 Sept. the same days and hours as the State Apartments. The royal stables and riding school may be viewed daily between the hours of 1 and 3. *St. George's Chapel* may be viewed on week-days (Fridays excepted), between 11 a.m. and 4 p.m.

WOOLWICH.—9 miles from London; (Southern Railway), Dockyard and Arsenal Station for Barracks, Rotunda, &c. *Old Dockyard; Extensive Barracks for Royal Artillery, Royal Army Service Corps, &c.* Common for military evolutions. For *Rotunda Museum, see* p. 226.

METROPOLITAN SPORT.

AQUATICS.—The *Oxford and Cambridge Boat Race*, rowed almost continuously since 1856 (first race 1829) takes place about last Saturday in March. The course is 4¼ miles from Putney to Mortlake. *Henley Regatta* occupies four days towards the close of the London season. *Doggett's Coat and Badge* for Thames watermen on Aug. 1, from London Bridge to Chelsea. The *Wingfield Sculls*, amateur championship of the Thames, in July.

ATHLETICS.—The Amateur Championships are generally held on the first Saturday in July at Stamford Bridge Grounds, Fulham Road, the headquarters of the London Athletic Club, under the auspices of the *Amateur Athletic Association* (*A.A.A.*), 10, John Street, Adelphi, W.C. 2. The *Women's Amateur Athletic Association* (*Sec.*, Mrs. L. Goold, Polytechnic, Regent Street, W. 1) is affiliated to the *A.A.A.* The *Oxford and Cambridge Sports* are held at Stamford Bridge, Fulham Road, usually on the Friday before the Boat Race. *Bowling* is managed by the English Bowling Association, C. E. Woodruffe, *General Sec.*, 9–10, Pancras Lane, Queen Street, E.C. 4. Amateur *Boxing* is managed by the Amateur Boxing Association, 4, Aldgate High Street, E. 1, and Professional Boxing by the National Sporting Club, 43, King Street, Covent Garden, W.C. 2. *Cricket* is governed by the M.C.C. at Lord's (*see* p. 416). The grounds of Surrey County Cricket Club at Kennington Oval and of Essex County at Leyton are also easily accessible. The *Croquet* Association offices (*Sec.*, Charles Crawley) are at 4, Southampton Row, W.C. 1. Rugby *Football* in the Metropolitan area is played by amateurs only, the International home matches taking place at Twickenham. The Oxford and Cambridge match is also played at Twickenham. The principal Metropolitan Clubs are Blackheath ("The Club," Rectory Field), the Harlequins (Twickenham), Richmond (Athletic Ground), London Scottish and Rosslyn Park (Old Deer Park, Richmond). *Sec. of the Rugby Union*, Commdr. S. F. Coopper, R.N. *Offices*, Twickenham. Association Football is principally professional, the leading Metropolitan clubs being Arsenal (Highbury, N.), Chelsea (Stamford Bridge), Clapton Orient (Millfields Road, Homerton, E. 9), Fulham (Craven Cottage, S.W. 6), Millwall (New Cross, S.E. 14), Queen's Park Rangers (Shepherd's Bush, W.), Tottenham Hotspur (Tottenham, N.), and West Ham United (Upton Park, E.). *F.A. Office*, 22, Lancaster Gate, W.2. The governing body for Amateur *Gymnastics* is the Amateur Gymnastic Association of Great Britain and Ireland (*Hon. Sec.*, C. J. West, Grassmead, Lingfield, Surrey). *Lawn Tennis* Championships are decided at Wimbledon early in July (or late in June). The controlling body is the *Lawn Tennis Association*, 22, Essex Street, W.C. 2. *Polo* is played at Hurlingham Club (Fulham, S.W. 6), and at Ranelagh Club (Barnes, S.W. 13). *Tennis* is played at Queen's Club, Prince's Club, and Lord's, and there is a Tennis Court at Hampton Court Palace (built by King Henry VIII. in 1530).

RACE MEETINGS (for Racing Calendar, 1932, *see* Index).—Flat Racing is under the rules of *The Jockey Club* (Hdqrs., Newmarket), *Steeplechasing* under the rules of *The National Hunt Committee*. The *Derby* is run at Epsom (14 miles from London). *Ascot Week* at Ascot Heath, near Windsor, about a fortnight after the Derby. The principal flat races are on *Newmarket Heath*; meetings near London are Sandown Park (Esher), Kempton Park (Sunbury), Hurst Park (W. Molesey), Gatwick (Southern Ry.), Lingfield (E. Grinstead); *Goodwood Races*, which mark the close of the London Season, are held in the Duke of Richmond's Park, near Chichester, Sussex in July. The *Grand Military Steeplechase* is at Sandown Park. The *Grand National Steeplechase* (the principal race of the steeplechasing season) is held at Aintree, near Liverpool, about the last Friday in March. The *Waterloo Cup* (*Coursing*) is won at Altcar, near Liverpool. *Greyhound Racing*, with a mechanical hare, is held several evenings weekly at Wembley, The White City, Harringay, Wimbledon, Clapton and West Ham. All the London greyhound tracks, with the excepton of Clapton, are now supplemented by a dirt track for motor cycle racing, and speedway meetings are held on some evenings when there is no greyhound racing. There are also speedways at Lea Bridge, Clapton, and High Beech, near Woodford. The *Calcutta Sweep* (on the race for the Derby) is promoted annually by the Royal Calcutta Turf Club. The Sweep is not open to the public and no "tickets" as such, are issued. It is confined to Members of the Club who are allotted Numbers in the drawing, each Number being of the value of Rs 10 (Ten Rupees). The Sweep is drawn in Calcutta, India, usually on the Saturday preceding the race. No drawing list is issued, but members who have drawn horses are informed individually.

GENERAL REGULATIONS.

GENERAL REGULATIONS.—The fares by Taximeter Motor Cabs are based upon a combination of time and distance. When the cab is kept waiting, delayed by traffic, or caused to travel at the rate of less than six miles an hour, then the charge is by time. When travelling at a speed of six or more miles an hour, then the charge is by distance. Fares for horse-drawn cabs are according to distance or time, at the option of the hirer, *expressed at the commencement of the hiring*; if not otherwise expressed, the fare to be paid according to distance; but driver can refuse to be hired by time between 8 p.m. and 6 a.m.

DRIVER, if hired by distance, is not compelled to drive more than six miles, nor more than one hour if hired by time; further, if hired by time, the driver may be required to drive at any rate not exceeding four miles an hour; if required to drive more than four miles within the hour he may demand, in addition to the fare regulated by time, for every mile or any part exceeding four miles, the fare regulated by distance.

AGREEMENT to pay more than legal fare is not binding. If the driver agree beforehand to take any sum less than the proper fare, the penalty for demanding more than the sum agreed upon is 40*s.*

The driver of every cab shall have with him, and when required produce, the Authorized Book of Distances, and every driver of any cab shall, if so required, deliver to the hirer a printed ticket, showing cab number, name and address of Proprietor, &c.

Driver may demand a reasonable sum as a deposit from persons hiring and requiring him to wait at any place, over and above the fare to which the driver is entitled for driving thither. Penalty 40*s.*, if driver, having received such deposit, refuse to wait, or go away before the expiration of the time for which the deposit shall be a sufficient compensation; or if the driver shall refuse to account for such deposit.

The London Cab Act, 1896, enacts that if any person hires a cab, knowing, or having reason to believe, he cannot pay the fare; or, fraudulently endeavours to avoid payment of a fare; or, having failed, or refused, to pay a fare, refuses, or gives a false address, is liable, in addition to the fare, to a penalty of 40*s.*

The fares legally demandable by a stage carriage are those painted in a conspicuous manner on the inside of every such carriage, and they are recoverable in a summary way before a Justice of the Peace, in the same way as fares for a hackney carriage.

All property left in any cab shall be deposited by the driver (and in the case of a stage carriage, by the conductor, or driver if no conductor) at any Police Station within twenty-four hours, if not sooner claimed by the owner; such property to be returned to the person who shall prove to the satisfaction of the Commissioner of Police that the same belonged to him, on payment of all expenses incurred, and of such sum to the driver as the Secretary of State has by order prescribed. Property found in a stage carriage by a passenger must be given up to the conductor under a penalty of £10.

All inquiries, &c., relating to public carriages should be addressed to the Public Carriage Office, 109, Lambeth Road, S.E. 1; but inquiries as to property left in a cab or stage carriage should be made at the Lost Property Office (*see* p. 414).

HACKNEY CARRIAGE STATISTICS.

During 1930 there were licensed public carriages: — Hansoms, 6; clarences — animal 63,

mechanical 8,167; omnibuses—animal 1, mechanical 5,953; *char-a-bancs*, 1,762; *tramway cars*—mechanical 2,711; total, 18,663. Drivers and conductors:—Cab drivers—animal 87, mechanical 10,927; stage drivers—animal 1, mechanical 17,391; composite licences (stage driver and conductor)—animal 1; mechanical 4,059; conductors, 19,745; total, 52,211.

HACKNEY AND STAGE CARRIAGE DRIVERS before obtaining a licence are required to pass an examination as to their ability to drive, and hackney carriage drivers, in addition, have to pass an examination as to their knowledge of town. It extends to a knowledge of the principal squares, clubs, hospitals, hotels, theatres, streets, and public buildings in London. During 1930, 540 applicants for cab drivers' licenses passed the examination as to knowledge of London and its environs. 18,365 separate examinations were held.

LOST PROPERTY.

Of lost property, 175,318 articles were deposited, of which 67,530 were claimed by the owners. The number of awards paid to drivers, &c., was 56,178.

Enquiries as to property left in a London omnibus, tram-car, or cab should be made at the **Lost Property Office**, 109, Lambeth Road, S.E. 1. Office hours, 10 to 4 (Saturdays, 10 to 1). The office is not open on Sundays, *Good Friday*, *Christmas Day* and Bank Holidays. For property left in a motor coach, enquiry should be made at the office of the coach company concerned.

LIGHTING-UP TIME.

By the Road Transport Lighting Act, 1927 (17 and 18 Geo. 5, ch. 37) "every vehicle on any road shall during the hours of darkness carry—

(*a*) two lamps, each showing to the front a white light visible from a reasonable distance;

(*b*) one lamp showing to the rear a red light visible from a reasonable distance;

and every such lamp shall, while the vehicle is on any road during such hours as aforesaid, be kept properly trimmed, lighted and in efficient condition, and shall be attached to the vehicle in such position and manner as the Minister (of Transport) may by regulations prescribe.

It shall be the duty of any person who causes or permits a vehicle to be on any road during the hours of darkness to provide the vehicle with lamps in accordance with the requirements of this Act and of any regulations made thereunder." (Sec. 1 (1).)

(Regulations have been made and are contained in S.R. & O. No. 723 of 1929.)

Whole or partial exemption may be given to vehicles used for naval, military or air force purposes (Sec. 1 (3) (*b*)); vehicles carrying inflammable or explosive goods of a nature specified in the regulations; vehicles when standing on places *specially set aside for the purpose*; vehicles drawn or propelled by hand, save as provided (Sec. 1 (2)).

The Minister may by regulation require or permit, on conditions, distinctive lamps to be carried displaying coloured lights on vehicles used as Hackney Carriages or public service vehicles or vehicles used for naval, military, or *air force*, or *police* purposes, or as ambulances.

The "hours of darkness" are defined thus:—

(*a*) As respects the period of summer time, the time between one hour after sunset and one hour before sunrise.

(*b*) As respects the remainder of the year the time between half an hour after sunset and half an hour before sunrise.

Bicycles (pedal and mechanical solo), pedal tricycles, and invalid carriages, require a single white light to the front.

Pedal bicycles and tricycles need not show a red light to the rear if they have attached an unobscured and efficient red reflector.

Pedal bicycles and tricycles and solo motor cycles need not carry a lamp if being wheeled by a person on foot as near as possible to the near or left-hand edge of the carriage way.

Horse Vehicles.—A separate lamp showing a red light to the rear shall not be required to be carried if the lamps showing a light to the front also show a red light to the rear visible from a reasonable distance and no part of the vehicle or load extends more than 6 feet behind such lamps.

Any vehicle carrying a load overhanging laterally more than 12 inches from the centre of the nearest side lamp must have either an additional lamp on the sides where the load overhangs or the position of the one lamp must be such that no part of the load projects outwards more than 12 inches beyond a vertical line drawn through the centre of the substituted or additional lamp.

On any vehicle carrying a load more than 6 feet behind any lamp showing a red light to the rear carried in accordance with the Act, an additional or substituted lamp shall be carried so that such load shall not project more than 6 feet beyond such additional or substituted lamp.

Certain vehicles engaged in agriculture are exempt from carrying lamps.

There are special provisions as to vehicles towing and being towed. A lamp showing a red light need not be carried by the drawing vehicle; no lamp showing a light to the front need be carried on any vehicle being drawn; a lamp showing a red light need not be carried on any vehicle being drawn except the rearmost vehicle. Provided—if the distance between any such vehicles exceeds 5 feet, each vehicle shall be required to carry the same lamps as if it were not a drawing vehicle or a vehicle being drawn, and if a drawn vehicle carries a load that projects laterally more than 12 inches beyond the outermost of the lamps showing a white light to the front, an additional lamp shall be carried on the projecting load so that no part projects more than 12 inches beyond a vertical line through the centre of such lamp.

Public Service Vehicles must, in compliance with the requirements of The Public Service Vehicles (Conditions of Fitness) and (Equipment and Use) Provisional Regulations, 1931, be adequately lighted inside, and, in the case of double-decked vehicles fitted with a permanent top, also lighted outside at all times during the hours of darkness when carrying passengers.

Regnal Years.—The years of a king's reign are the regnal years, and each begins on the anniversary of his accession: *e.g.*, Regnal year 21 of the present King began on May 6, 1930; regnal year 22 begins on May 6, 1931. The system is used for *dating Acts of Parliament*. The Summer Time Act of 1925, for example, is quoted as 15 and 16 Geo. V. ch. 64, because it became law in the session which extended over part of these two regnal years. The regnal years of Edward VII. began on January 22, so that Acts passed in that reign are, in general, quoted with only one year number, but year 10 of this series ended on May 6, 1910, and Acts of the Parliamentary Session 1910 are headed 10 Edw. VII. and 1 Geo. V.

The Service is established for the conveyance to hospital of persons suffering from accident or sudden illness in the streets or public places, or from accident in private houses. It is not, in ordinary circumstances, intended for the removal of persons suffering from illness in private houses. Urgent parturition cases are removed to hospitals on the application of a duly qualified medical practitioner or a certified midwife, provided that either a certified midwife or doctor accompanies the case. Calls for ambulances are made by means of the telephone, the operator being asked for "Ambulance." When communication is established the location of the accident should be given.

LIFE ASSURANCE.

THE list on the following two pages contains the names of all the more important British Life offices, and of nine Colonial companies (marked C), all of which transact business in this country.

CLASS OF BUSINESS.—The second column shows whether the company is conducted on the Mutual system whereby the whole of the divisible profit is allotted to participating policy-holders (M), or whether the company has proprietors by whom part (usually a very small proportion) of such profit is received (P). Life offices transacting other insurance business are marked O in this column. In such cases the Life funds are kept separately, and are not liable for the claims of other departments. The Share Capital is usually liable for the claims of all branches. Those having an Industrial branch are indicated by letter I.

FIGURES.—These are taken from the latest annual accounts available at date of going to press, and in the majority of cases refer to annual reports for the financial year ended 31 December, 1930.

LIFE FUNDS.—The amounts of these funds, though interesting, are not in themselves a sufficient indication of the financial stability of a company, which cannot be judged unless liabilities are actuarially compared with assets.

PREMIUM INCOME.—The annual premium income is in all cases stated after deduction of the amount paid to other companies for reassuring parts of the risks.

EXPENSES.—The expenses of a Life office include, in all cases where paid, commission to agents. The amount of expenses is less important in itself than in relation to premium income, consequently the percentage of the premium income absorbed in expenses is shown. The average percentage of British offices is about 12½%, of which about 5% is expended on commission and 7½% on other expenses. This ratio taken by itself is frequently misleading, because, if the proportion of new business is large, the percentage of the total premiums absorbed in expenses may legitimately be higher than where the new business is small. Moreover, where rates of premium are below the average any comparisons of percentage should be considered, with due regard to this feature, a gain to the policyholder through reduced premium being equivalent to an immediate cash bonus.

INTEREST.—The rate of interest earned is important for comparison with the rate assumed in valuing liabilities, since the greater the margin between these rates the greater is the surplus available from this source for bonus. The rate of interest given is without deduction of Income Tax except where marked (N)—net.

VALUATIONS.—The last columns of the table are derived from the valuation returns made by the companies to the Board of Trade. A valuation indicates liability under existing policies, after making allowance for the amounts to be paid and received. It is assumed that deaths will occur in accordance with a mortality table, and that interest will be earned at a certain rate. Various mortality tables are employed, those most usual being known as the H^m and O^m, and the corresponding Tables $H^m(5)$ and $O^m(5)$ which exclude mortality in the first five years of assurance. If a company assumes that it will earn a high rate of interest in the future, the net liability will appear less than if it assumes a low rate, while the liability on account of mortality appears greater by some tables than by others. The position of an office is most satisfactory when a stringent basis of valuation is adopted, because the margin between the calculated and experienced liability is larger and the surplus available for bonuses is greater. The O^m and $O^m(5)$ tables in conjunction are more stringent than the O^m table alone, the H^m is more stringent than the American, and with every table the lower the rate of interest assumed the more stringent is the valuation.

FIRE INSURANCE RATES.

MOST large fire offices belong to the tariff association, charging identical rates of premium. There are, however, a number of non-tariff offices which claim to assess individual risks independently on merits. Tariff rates of premium per £100 insured against fire for the more common classes of risk are as follows:—

Private Dwelling Houses, built of brick or stone and tiled or slated and in no hazardous proximity, 1s. 6d.

Household goods therein, usually 2s.

A number of companies issue "comprehensive" policies embracing in one contract all risks incidental to private houses and contents.

Shops and Warehouses, similarly built and circumstanced, in which no hazardous goods are deposited nor hazardous trades carried on, from 2s.

Stock and Utensils in trade, fixtures, and household furniture in such shops and warehouses, from 2s.

Most fire insurance companies transact accident and miscellaneous business, and if a strong company be selected with a reputation for liberal dealing it will probably be found to the advantage of a householder that he should effect with it all such policies as he may require, in place of dividing them amongst several companies. The "comprehensive" policies previously referred to, combine in one contract protection against damage by fire to the contents of a house, or from burglary, housebreaking, larceny, theft, &c., and insurance against domestic servants' employers' liability, damage from storm or tempest, third party risks, and other hazards. This can usually be arranged for an annual premium of 5s. per £100 of the full value of the contents of the house. Fire insurance of the house itself is not included, however, in this estimate, but can be included under the same policy, if desired. The advantage of a policy of this description is that it obviates the inconvenience of payments of small amounts in insurance premiums at different dates, and that in one comprehensive form it supplies protection at a moderate cost for all a householder's ordinary insurance requirements.

INCOME TAX ALLOWANCES.

Where an allowance is due in respect of premiums paid for Life Assurance or for contracts for Deferred Annuities, the allowance is deducted from the amount of tax on the "Taxable Income" (*i.e.*, that part of the income on which the tax is actually charged—the first £175 of the taxable income being charged at half the standard rate of tax; the remainder at the standard rate of tax). The allowance is made on the premiums paid, and is calculated at the following rates:—one-half the standard rate in the £ on the amount of the premium paid on policies taken out since June 22, 1916 (limited to premiums not exceeding one-sixth of total income, and to a rate of premium not greater than 7 per cent. of the sum assured); and on policies taken out before June 22, 1916, a deduction of tax at one-half the standard rate in the £ is allowed on the premiums paid by a claimant whose income does not exceed £1,000, three-quarters from £1,000 to £2,000, and at the standard rate where his income exceeds £2,000.

BONUSES.

The following table gives examples of Bonus declared on Whole Life and Endowment Assurances for £100. In each case the rate given is in respect of a policy effected at age 30 next birthday, and the Endowment Bonus is based on a Policy maturing at age 60.

ANNUAL PREMIUMS FOR WHOLE LIFE ASSURANCE.

Life assurance may be effected either with or without participation in profits. If without participation, both sum assured and premium remain unchanged. If with participation, a higher premium is charged, and bonuses can either be payable with the sum assured, applied to reduce the premium, or surrendered for cash. An alternative plan is available in some offices whereby future bonuses are anticipated and used to reduce premiums from the outset. This is called the "Discounted Bonus" or "Cost Price" system. If the bonuses actually declared exceed those anticipated, the difference is credited to the policyholder; if, however, the anticipated bonuses exceed those declared, the balance has to be liquidated by the policyholder or remains as a debt. Policies should only be effected on this system in companies which can point to good and consistent bonus records, and whose valuation reserves are particularly strong.

The ages applicable to the life and endowment assurance (but not the annuity) rates as hereafter given are "next birthday" unless otherwise stated.

The next table shows the annual premiums payable throughout life for a policy of £100 payable at death, with profits. It is not sufficient to judge a life office by premium rates only. An office charging a high premium may give higher bonuses than one charging a low premium, and therefore bonus results and prospects as well as premiums have to be considered. Some offices only allow bonuses to be taken in reduction of premium, and on this plan the rates are usually high to commence with, but are greatly reduced after a few years. Some reserve bonuses for the older classes of policyholders, and in these cases lower premiums than the average are usually charged. Most offices grant interim bonuses between valuation periods, and it is important to ascertain if this is the case before an assurance is effected, and how such interim bonuses compare with valuation bonuses, especially in cases of endowment assurance.

† Offices thus marked have a plan for accepting Assurances without medical examination, but in the majority of cases there is a limit to the amount that can be assured under this arrangement.

* Abstainers and General—General section.

African Life—These rates are for the first 20 years and are then reduced and carry a guaranteed Bonus.

Eagle, Star & British Dominions—Lower rates are quoted for "Sceptre Abstainers' Section."

London Life—Allowance is made for quarter-years in ages at entry.

Natl. Mut. of Aust.—Rates are for age nearest birthday.

Prudential—A reduction in the rate is made for Assurances of £1,000 or over, up to £5,000, and a further reduction for over £5,000. Sun Life—Reductions granted to total abstainers.

University Life—Total Bonuses guaranteed to amount to at least 30 per cent. per annum for first 10 years and 35 per cent. per annum thereafter.

Endowment Assurances.

Endowment Assurances are very popular, and are extremely attractive to persons who desire to combine a provision for their dependants, in event of premature death, with the investment of savings for the realisation of a fund for their own personal enjoyment in later life. For the investment of small annual sums there is no medium promising more satisfactory results than an Endowment assurance, participating in profits in a good bonus-paying life office. The selection of such an office is all-important, as so much depends upon profit-earning capacity—*see* first page of Life Assurance section.

ANNUAL PREMIUMS FOR ENDOWMENT ASSURANCE OF £100. WITH PROFITS.

Under endowment assurances the sum assured is paid after a given number of years, or on the attainment of a fixed age. Should the life assured, however, die during the endowment period, the sum assured is paid at death together with any Bonuses attaching under a "with profit" Policy.

The following table shows the annual premiums, for various ages at entry, charged by the offices named, to secure £100 with profits at the end of 15, 20 and 25 years, or at death, if previous.

Notes for page 465.—
* Australian Mutual Co-operative, London Life and Mutual and Citizens' Rates are for quarterly payments.
† Caledonian—Increased rates for purchase money of £1,000 or over.
‡ London Life Rates are for exact age stated, but are apportioned for actual age at time of purchase.

THIS Table shows amount of Annuity granted for every £100 paid. The age is calculated from the last birthday, but many offices quote intermediate rates for every half or quarter year. By some a proportionate amount is payable *to day of death*. Some Companies pay whole or part of stamp duty. [For Notes see page 464.]

The Annuity is calculated as payable half-yearly. In some cases the quarterly rate is the same; in others it is a little less. Some offices grant special terms in case of impaired lives.

ADVICE REGARDING LIFE ASSURANCE.

Apart from the immediate protection thereby given, a life or endowment assurance policy, if effected in a first-class bonus-paying company, provides exceptional opportunity for the remunerative investment of savings. Policyholders can claim relief from Income Tax in respect of life assurance premiums not exceeding in amount one-sixth of their income, where the death risk is involved.

The selection of the office best suited to requirements and likely to produce the best results should be carefully made, but the study of any tables or suggestions is not sufficient to enable persons without technical knowledge to gauge the respective merits of the various companies. There are many good offices, and in the most select class some are better adapted than others for particular purposes, and large sums may be saved or earned by intending proposers through obtaining reliable advice before a proposal is made.

Medical examinations are sometimes dispensed with in the case of new proposals, but policies in these instances are sometimes subject to certain restrictive conditions of a temporary character.

In view of the fact that life assurance premiums are governed by age, it is advisable to produce a birth certificate or other satisfactory evidence of this, when effecting a Policy. It is not always asked for then but is required by the offices before the policy monies are paid.

INQUIRIES.—On receipt of an inquiry containing particulars of requirements (accompanied by 5*s.*) addressed to "The Insurance Editor, 12, Warwick-lane, E.C. 4," advice will be given as to the system and policies best adapted to the special requirements. Inquiries should state the age at and date of next birthday. The following are suggested as the policies most likely to be required:—

(*a*) *Whole Life*—With and without profits.
(*b*) ,, ,, —With limited number of payments.
(*c*) ,, ,, —Reduced premium for first 5 years.
(*d*) *Endowment*—With and without profits.
(*e*) ,, —Reduced premium for first 5 years.
(*f*) *Children's Insurances*—Educational, &c.
(*g*) "*Non-Medical*" Insurances.

HOW TO ASSIGN A LIFE POLICY.

When a Policy is assigned by way of Mortgage, it is better to employ a solicitor; but when the Assignment is absolute, i.e., when a Policy is sold out and out, his services may be dispensed with.

The Assignment may be in the following form, and the document must be stamped by the Inland Revenue Stamp Office:—

I, (name)....., of (address)....., in the County of ....., (occupation)....., in consideration of the sum of (pounds)..... paid to me by (name)....., of (address) ....., in the County of ....., (occupation)..... ....., the receipt of which I herewith acknowledge, do hereby, as beneficial owner, assign unto the said ....., his Executors, Administrators and Assigns, all that Policy of Assurance on my life for £..... effected with the (name of Company)..... numbered ....., and dated ....., and all monies assured by or to become payable thereunder. *And I hereby certify that the transaction hereby effected does not form part of a larger transaction, or of a series of transactions, in respect of which the amount or value, or the aggregate amount or value, of the consideration exceeds five hundred pounds.* In witness whereof I have hereunto set my hand and seal this ..... day of ....., 19....

Signed, sealed and delivered by the above-named, in the presence of—
Name.....
Address.....
....

Notice of the Assignment should be sent, in duplicate, to the Head Office of the Company immediately on execution. The Company is entitled to charge a fee of five shillings for registration, and will retain one copy and the other will be returned with acceptance of service endorsed thereon.

Building Societies.

Building Societies are for the most part associations incorporated with limited liability under the Building Societies Acts. The exceptions are a few societies established prior to 1857, which have chosen to remain unincorporated. The object of building societies is to assist their members in acquiring dwelling houses, business premises, or other freehold or leasehold property, for occupation or investment. Members' subscriptions are accumulated in a fund which may be augmented by deposits and loans, and advances are made from the fund to assist members in the purchase of properties. Security for advances is given by a mortgage upon the property purchased. Many, if not most, of the earlier societies were *terminating*. In these societies the share subscriptions were accumulated until there was sufficient capital to make an advance to a member upon mortgage, and the right to an advance, or as it was called an "appropriation," was conferred upon the fortunate member as a result of a ballot among the members who had not already received advances, or by sale to the member bidding the highest premium for the privilege of the appropriation. By later legislation, however, balloting for advances was prohibited for new societies. The Acts define a *terminating* society as one in which the rules provide for the termination of the society at a fixed date, or when a result specified in its rules is attained. Usually the rules provide that a society shall terminate when all the members have received advances. *Terminating* societies are rapidly being replaced by the *permanent* societies, some of which have become very wealthy and important financial institutions.

All building societies are required to register their rules and file their accounts with the Registrar of Friendly Societies, who is also Registrar of Building Societies.

The following is a summary of particulars extracted from the Registrar's Report :—

The "Remedy" is the amount of variation from standard permitted in fineness and in weight of coins when first issued from the Mint.

Standard Gold contains twenty-two twenty-fourths (carats) of fine gold and two twenty-fourths of alloy; fineness, 916·66, or 22 carats; 240 troy ounces of standard gold are coined into 934 sovereigns and one half-sovereign; one troy ounce is, therefore, worth £3 17s. 10½d., and one ounce of pure gold, on the same basis, £4 4s. 11½d. During 1931 the average market price of gold fluctuated about the mean value up to September 19. Since the suspension of the gold standard on September 21 the price has been fixed in relation to the $, sterling exchange being 106/11 on October 17. *Bar Gold.*—The "bar," as purchased in the bullion market, is 200 oz. troy (except for the Far East, which requires 10 oz. bars).

Standard Silver formerly consisted of thirty-seven-fortieths of fine silver and three-fortieths of alloy; fineness, 925. Silver for coinage, by an Amending Act (10 Geo. V. ch. 3), consists of one-half silver, one-half alloy; or in millesimal fineness, 500; 12 troy ounces of 500 fineness are coined into 66 shillings.† [Another Standard, called the "New Sterling" or Britannia, of the fineness 11 oz. 10 dwt. (958·33), is practically obsolete. It is occasionally used, however, for high-class plate.]

The Average Yearly Price of Silver per standard Troy Ounce in the London Market during the last twelve years was as follows:—1919, 57$\frac{1}{16}$d.; 1920, 61$\frac{5}{16}$d.; 1921, 36$\frac{7}{16}$d.; 1922, 34$\frac{7}{16}$d.; 1923, 31$\frac{13}{16}$d.; 1924, 34d.; 1925, 32$\frac{1}{16}$d.; 1926, 28$\frac{11}{16}$d.; 1927, 26$\frac{1}{16}$d.; 1928, 26¾d.; 1929, 24$\frac{7}{16}$d; 1930, 17¾d. On Oct. 17, 1931, the price of silver was 17$\frac{5}{16}$d. per oz.

In the United States the price of silver is quoted in cents per troy ounce *fine*. In order to convert an English quotation into cents per ounce fine, first express the pence as a whole number and decimal fraction and then multiply by 2·192; to express a United States price on the English system, multiply the cents by 0·4562.

‡**Bronze** is an alloy of copper 95 parts, tin 4 parts, and zinc 1 part, or of copper 95½ parts, tin 3 parts and zinc 1½ parts.

Tokens.—No person is allowed to coin any token to pass for, or as representing, bronze or other money, under a penalty of £20.

Melting of Coins.—The melting of British gold and silver coin is prohibited.

Light Gold.—Any person to whom it is tendered should break, cut, or deface any gold coin below the least current weight; but under the provisions of the Coinage Act, 1891, and an Order in Council of 16 March, 1892, light gold coin which has not been illegally dealt with is received by the Bank of England on behalf of the Mint at its full nominal value.

Bank of England Notes are issued for sums of 10s., £1, £5, £10, £20, £50; also for £100, £500, and £1,000.

Treasury Notes of the value of £1 and 10s. were replaced by Bank of England notes as from November 22, 1928.

Bank Post Bills can be obtained at the Bank of England for amounts of £10 and over at seven days' sight. They are issued for the full sum named thereon, without allowance for discount. No charge is made for bills so drawn: they may be obtained at the Chief Office of the Bank of England in London, or at any of the branches.

Legal Tender of Money.—Bank of England Notes of £1 and 10s. are legal tender in Great Britain and Northern Ireland for the payment of any amount, those of the higher denominations are legal tender in England and Wales only. Change cannot be demanded except from the Bank of England. Gold, if of or above the least current weight, is legal tender to any amount. Silver is legal tender for sums up to £2, and bronze up to 12d.

British Coinage Statistics.—During 1929 the number of coins struck at the Royal Mint was 193,215,538, of which 164,936,670 were Imperial, 20,049,468 Colonial, and 8,229,400 Foreign.

BRITISH DOMINIONS.

Imperial Sterling Coins are the *sole legal metallic currency* in:—

NEW ZEALAND. FALKLAND ISLANDS.
FIJI. GIBRALTAR. ST. HELENA.
WEST INDIES. *See also* JAMAICA, *below.*

Special Coins are current in addition to the Imperial series in:—

AUSTRALIAN COMMONWEALTH. — Special florins, shillings, sixpences, and threepences in silver, and pence and halfpence in bronze, of the same weights and composition as Imperial coins* of these denominations, but of special designs, while the silver coins are of 500 fineness.

UNION OF SOUTH AFRICA.—Silver and bronze coins, bearing special designs, and corresponding to Imperial coins in denominations, weights and composition, except that the fineness of the silver is 800.

BRITISH GUIANA.—A special groat or fourpence.

BRITISH WEST AFRICA.—Silver and also "alloy metal," 2s., 1s., 6d., and 3d., One penny, one halfpenny, and one-tenth penny (nickel-bronze).

GUERNSEY.—Eight doubles (= 1 penny), 4, 2, and 1 double.

JAMAICA.—Nickel-bronze pence, halfpence, and farthings.

JERSEY. — Special pence, halfpence, and farthings

MALTA.—One-third of a farthing (bronze).

* Issued on special occasions.

† By law a shilling weighs one sixty-sixth of 120z. Troy; 120z. of *pure* silver would be used in coining 72 shillings of 925 fineness and 132 of 500 fineness.

‡ The legal weight of a penny is one-third, of the halfpenny one-fifth, and of the farthing one-tenth of an ounce avoirdupois; the halfpenny is one *inch* in diameter.

HALL MARKS ON PLATE.*

Assay Office Marks.—Official marks stamped on gold and silver plate at Assay Offices :—

Assay Office ...	*Distinguishing Mark.*
London (Goldsmiths' Hall)	Leopard's Head (uncrowned from 1300 to 1478-9, when it became crowned until 1821, since when it has been uncrowned). From 1697-1720 this mark was *not* used in London.
Birmingham...	Anchor.
Chester	City Arms (3 Garbs and a Sword).
Sheffield	Crown.
Edinburgh.....	Castle.
Glasgow	Tree, Fish & Bell.
Dublin	Harp crowned.

The Assay Offices at Bristol, Exeter, Newcastle-upon-Tyne, Norwich and York have long been closed.

Makers' Mark (instituted in 1363).—This is impressed by the maker, and consists of initial letter (or letters) indicating the Surname (or Christian and Surname) of the maker.

Date Mark (instituted in 1478-9).—The year in which the article is marked at the Assay Office is indicated by a letter on a shield, the *type of letter* and the *shape of the shield* being changed in cycles of 20, 25 or 26 years. In 20-year cycles (London, invariably, Chester, alternately with 25, and Sheffield, alternately with 25), the letters J, V, W, X, Y, Z are omitted; in 25-year cycles (Birmingham, Edinburgh and Dublin, and alternately at Chester and Sheffield) the letter "*j*" is omitted from the alphabet; at Glasgow all the letters are employed in a 26-year cycle.

The Sovereign's Mark. — The "lion passant," for silver articles only, was  first used in 1544, and has been is use ever since (except during the *Higher Standard* period, 1697-1720). From 1544-9 it was crowned; since then, uncrowned.

The Sovereign's Head.—The portrait of the reigning Sovereign was impressed on all plate chargeable to duty assayed from 1784—1889-90. The duty on plate was removed in 1890, and the Sovereign's head does not appear on plate assayed before 1784 or after 1890.

The Crown.—On *gold* articles only, in lieu of the "lion passant" on silver.

Britannia.—A full-length figure of Britannia was impressed on silver plate of a special standard of fineness (11 oz. 10 dwt. of fine metal to each 10 dwt. of alloy) during a short period only, 1697-1720; since that date the Britannia quality has been manufactured in small quantities, bearing the figure of Britannia, with the lion's head erased and the date mark.

Sterling Silver.—Articles of silver plate marked at an assay office are guaranteed to be of the requisite standard of purity and to contain 11 oz. 2 dwt. of fine metal to each 18 dwt. of alloy.

Sterling Gold.—Articles of gold plate marked at an assay office are guaranteed to contain such amount of pure gold as is marked thereon by the assaying office in carats and decimals thereof. The *relative* values of the various standards is shown below :—

	£	s.	d.		£	s.	d.
Pure gold, 24 c.	4	4	11½	3rd Stand., 15 c.	2	13	1
Standard, 22 c.	3	17	10½	4th ditto, 12 c.	2	2	5¼
2nd ditto, 18 c.	3	3	8½	5th ditto, 9 c.	1	11	10½

* For the greater part of the material for this article readers of the ALMANACK are indebted to the late Mr. Wilfrid Cripps (author of "Old English Plate") by whose courtesy also many of the illustrations were provided.

	Roman letter, small...	1896–7 ,,	1915–6
	Old English, small ...	1916–7 ,,	1935–6

The Collector will find but little difficulty in distinguishing a letter of one cycle from that of another, presuming his knowledge to be insufficient to judge by the style and period of the article itself, *e.g.*:

An article marked with the letter F 1721-2 can be distinguished from letter F 1801-2 by the difference in the shape of the respective shields; as also those containing the crowned leopard's head and the lion passant; the absence of the sovereign's head in the former as against its presence in the latter case; the different form of the leopard's head (which was "crowned" until 1823); and lastly, the irregularity of the stamp in the first case as compared with the uniformity of the latter stamp. These again can be distinguished from F 1881-2 as before, by the different shield of the date letter only (the shields of the remaining marks being the same as those of 1801-2); the absence of crown on leopard's head, and the presence of the Queen's *vice* the King's head.

Imported Plate.

Any gold or silver plate or article manufactured out of the United Kingdom and brought to be assayed, stamped or marked at a British or an Irish Assay Office must be marked in the manner prescribed by the Order in Council of May 11, 1906, under which the mark for each Assay Office is ordained to be:—*London*, the sign of the Constellation Leo; *Birmingham*, Equilateral Triangle; *Chester*, Acorn and two leaves; *Sheffield*, the sign of the Constellation Libra; *Edinburgh*, St. Andrew's Cross; *Glasgow*, double block letter F inverted; *Dublin*, Bouget. The annual date letter is to be added by the Assay Office, as for plate, etc., of home manufacture.

The Periods of English Architecture.

	Date.		*Style.*
I.	Before B.C. 55		Ancient British
II.	B.C. 55 to A.D. 420		Roman Period.
III.	A.D. 449 to Norman Conquest (1066)		Anglo-Saxon.
IV.	1066–1189 (*i.e.* to end 12th cent.)		Norman.
V.	1189–1307 (*i.e.* 13th cent.)		Early English (Lancet, or Geometrical).
VI.	1307—1377 (*i.e.* 14th cent.)		Decorated (or Curvilinear).
VII.	1377–1485 (*i.e.* 15th cent.)		Perpendicular (or Rectilinear).
VIII.	1485–1558 (*i.e.* first half 16th cent.)		Tudor.
IX.	A.D. 1558–1625.	Early Renaissance	Elizabethan (A.D. 1558–1603). Jacobean (A.D. 1603–1625).
X.	A.D. 1625–1830.	Late Renaissance	Stuart (A.D. 1625–1702). Queen Anne and Georgian (A.D. 1702–1830).
Modern Architecture (The Age of Revivals)	19th cent. to present time		William IV. (A.D. 1830–1837). Victoria (A.D. 1837–1901). Edward VII. (A.D. 1901–1910). George V. (A.D. 1910–).

This Comparative Table shows the approximate period of each style. It must, however, be remembered that the transition from one style to the next was slow and gradual, and can often hardly be traced, so minute are the differences. It is only for convenience in alluding to the different stages of evolution that the division is made, for it must not be forgotten that the Architecture of England is one continuous development.

Note.—The first portion (I–VIII) of this table is based upon that given on p. 347, Parts IX and X on p. 777, and "Modern" on p. 852, of "A History of Architecture on the Comparative Method" (9th ed.), by Sir Banister Fletcher, P.R.I.B.A., F.S.A. (Batsford.)

MARKS ON PORCELAIN.

POTTERY or porcelain usually bear distinctive marks either painted on or stamped into the bottom of the article. These marks may indicate the factory, the potter, or the decorator, and in the case of Chinese or Japanese ware the dynasty at the date of manufacture. In the factory at Sèvres the practice of marking the date by letters was also followed, and this has led to the forging of many bogus pieces. The factories in Europe generally indicate the place of origin only. Special knowledge is therefore required of the collector, and the learned amateur notes not only the mark, but the material, the colouring, and the decoration of the article, and frequently has to compare it with one that is unquestionably genuine. The following hints will, in the absence of the more learned dissertation of Mr. Chaffers, serve as a guide to the ordinary possessor or purchaser.

In the manufacture of porcelain, two main varieties of paste are used, termed respectively hard and soft; or, as the French have it, pâte dure et pâte tendre. The hard paste contains more alumina and less silica than the soft. When baked, it is translucent, hard, and sonorous on being struck; it has a white, milky colour, and can sustain, without injury, sudden alternations of high and low temperature. Its essential constituent is pure white kaolin, a variety of clay which is exceedingly scarce in England and other parts of Europe, but of comparatively common occurrence in many districts of China and Japan. The soft variety has an unctuous, cream-like enamel, and is soapy to the touch; it is lighter than the other kind, and less hard (a knife will scratch it), and does not require so great a heat for solidification.

The manufacture of hard, and what is often considered the only true, porcelain, was invented by the Chinese about 180 B.C., and attained its greatest perfection at the beginning of the 11th century. The secrets of the art were, in 1211, carried over to Japan, whose inhabitants soon became formidable rivals to the older makers. Specimens of this eastern ware had, from a very early date, occasionally found their way into Europe, but no regular importation took place until the middle of the 16th century, when a small settlement was formed on the Japanese coast by some enterprising traders from Portugal. It was from them that the ware first received the name it now bears, its translucence probably reminding them of the cowrie-shell which, from a supposed resemblance to the shape of a young pig, had been termed, in their language, porcellana.

In 1641 the Japanese authorities, having viewed with strong disapproval the many conversions to Christianity effected by the Portuguese missionaries, expelled the settlers from the island, and gave to the Dutch, who could always be trusted to refrain from proselytizing, the exclusive privilege of trading with them. Although the commercial industry of the Hollanders supplied England and the Continent with comparatively large quantities of the Oriental porcelain ware, the finer specimens were eagerly sought after, and, by Queen Anne's time, all classes seem to have become infected by a collecting mania. The high prices they fetched naturally led to many attempts at imitation, which, owing to the difficulty in finding a suitable clay, all resulted in more or less marked failure, nothing but the inferior pâte tendre being produced.

The first successful experiment was made, with the kaolin from Aue in the Erzgebirge, by J. F. Böttcher, who had accidentally gained a knowledge of its valuable properties. In consequence of the discovery, Augustus, Elector of Saxony, was induced to set up a porcelain factory near Dresden, with Böttcher as director, and, in 1715, the latter succeeded in producing an almost perfect imitation of the hard, white porcelain of the East. The most elaborate precautions were taken to prevent the secret of its manufacture getting abroad, but a very few years later, a heavy bribe extracted it from one of the workmen, and a rival factory was established at Vienna. The works at Berlin, Baden, and other towns in Germany all owed their origin in the same way to the dishonesty of different employés. The decorations of the earlier German productions were merely imitations, in blue and white, of the Chinese and Japanese; but towards the middle of the 18th century elaborate miniature paintings of flowers, insects, and copies of well-known pictures became fashionable. The best statuettes and groups were made between 1731 and 1756; the finest of these are in plain glazed white, though many are gaily decorated, and the dress richly ornamented with fine lace.

Of the factories in England, it is doubtful which has best claim to be termed the oldest; both the Chelsea and the Bow works were established before 1750, and those of Derby and Worcester very shortly after that date. Though at first confining themselves to imitations of the simple Oriental models, the English makers soon attained great perfection in the German and French styles, and, after the discovery of the Cornwall kaolin in 1755, their best productions ranked, in every respect, very little lower than the masterpieces of Dresden and Sèvres.

In France, a factory for the soft variety had been set up at St. Cloud as early as 1695, and some excellent work was produced there. In 1753, works under royal patronage were set up at Vincennes, and, three years later, removed to Sèvres. The best productions were sent out during the nine years which followed the purchase of the manufactory by Louis XV. in 1760. At the end of this period the discovery of kaolin near Limoges led to a discontinuance of the manufacture of pâte tendre in favour of the more highly valued pâte dure. Sèvres porcelain, made for use, is usually painted with flowers or figure-subjects on a plain white ground. The purely decorative pieces have panels with pictures on a white ground surrounded by frames of gold scroll-work; the main body of the piece is covered with one deep or brilliant colour.

The following are the chief marks used in the more important European manufactories. The description of the appearance of the various porcelains may be found useful in the detection of forgeries, spurious pieces being unfortunately almost as abundant as genuine specimens:—

GERMANY (Hard Paste).

DRESDEN.—The porcelain has a cold white almost bluish, tint. The marks are always in blue.

1709–1712.—The initials of Augustus Rex.

1712–1720.—The wand of Æsculapius.

1721, with intervals to present time.—The crossed swords.

1731–1733. The same, with a dot between the handles.

1796–1814 (Marcolini period). The same, with a star between the handles.

Scratches across the mark show there is some defect in the piece.

Sometimes the handles meet, and cause a slight variation in the appearance of the mark.

K.P.M. was painted in italics on pieces intended for royal use.

VIENNA.—The porcelain has, generally, a greyish tint. The usual mark is a shield, in blue.

BERLIN. The porcelain closely resembles that of Dresden. In 1761 the manufactory was made a royal establishment. The marks are generally in blue, though a brown sceptre is occasionally found.

1751–1761.—A capital W, with two of the strokes crossing.

1761 onwards.—A sceptre. Occasionally there are two sceptres, crossed to imitate the Dresden mark. At the present day the porcelain is stamped with the Prussian eagle, encircled by the words KOENIGL. PORZELLAN MANUFACTUR.

ENGLAND (Soft Paste till 1755).

CHELSEA.—The porcelain is of a pure white colour, with a tint almost equal to that of the hard kind. The mark is an anchor, in gold for the best, in red for the second quality.

BOW.—The porcelain is of a fine milky white. In 1750 the works received the name of New Canton; and in 1775 were transferred to Derby. The marks are very various, and often not distinguishable from those of Chelsea. We give two varieties, which generally occur in blue.

DERBY.—The porcelain is very transparent, and of a good white colour. In 1769, the proprietor of the factory, W. Duesbury, purchased the kilns and moulds of the Chelsea works. The marks are in pink, violet, or gold. The earliest mark was an italic *D*.

After 1769, the same, crossed with an anchor (DERBY-CHELSEA).

After 1775, the date of the first royal order, a crown with crossed daggers, or a *D*, or an anchor (CROWN-DERBY).

WORCESTER.—The porcelain is not of a very good colour, but is tolerably transparent.

The earliest mark was a W or a crescent, in blue. Crossed arrows, and imitations of Chinese and Dresden marks are also found.

FRANCE—(Soft Paste till 1770).

VINCENNES and SÈVRES.—The porcelain is remarkable for its creamy softness of colour. The Sèvres period dates from 1756, when the factory was removed thither from Vincennes.

1745–1753.—Two italic *L's* crossed.
1753–1756.—The same, with a letter in the centre. The letters A-Z denote the years 1753–77. The Sèvres period begins with D.

1778–1795.—The period of double letters AA-RR.
1795–1800.—R F., the initials of République Française.

From 1800 to the present time, the mark has varied with each change of sovereign or government, and is, generally, self-explaining.

The Weights and Measures Act of 1878, superseding all previous laws, enacts the legal measures for Great Britain, basing them upon the Standard Yard and the Standard Pound, *in the custody of the Standards Department of* the Board of Trade.

The YARD and the POUND are the only two independent standards for weights and measures. The GALLON, the capacity standard, wet or dry, is based upon the Pound. The Act of 1878 defines the Gallon as the volume of ten standard pounds of distilled water weighed in air against brass weights, both water and air at the temperature of 62° Fahrenheit, with the barometer at 30 inches.

Apothecaries' Weight.

Measures of Weight.

20 grains =1 scruple (℈1) (= 1·296 *Grammes*).
3 scruples =1 drachm (℥1) (= 3·888 *Grammes*).
8 drachms=1 ounce (= 31·1035 *Grammes*).

Measures of Capacity.

60 minims (*min.*) = 1 fluid drachm (= 3·552 *Millilitres*).
8 fluid drachms = 1 fluid ounce (= 2·84123 *Centilitres*).
20 fluid ounces = 1 pint (= 0·568 *Litre*).
8 pints = 1 GALLON (= 4·545963l *Litres*).

The Apothecaries' grain is the Avoirdupois grain, and the Apothecaries' ounce is the Troy ounce, of 480 grains. The Apothecaries' *drachm* is not the same as the Avoirdupois *dram*, and is spelt differently. A fluid ounce of distilled water at a temperature of 62° Fahrenheit is equal in weight to the Avoirdupois ounce (437·5 grains). A fluid *drachm* (54·6875 grains) is equal in weight to TWO Avoirdupois *drams*.

Approximate Equivalents:—
1 "table-spoon" = ½ fluid oz.; 1 "dessert-spoon" = ¼ fluid oz.; 1 "tea-spoon" = ⅛ fluid oz.

Avoirdupois Weight.

7000 grains (*gr.*) =1 pound (*lb.*).
16 drams (*dr.*) = 1 ounce (*oz.*) (= 28·350 *Grammes*).
16 ounces = 1 POUND (= 0·45359243 *Kilogram*).
14 pounds = 1 stone* (= 6·350 *Kilograms*).
28 pounds = 1 quarter (of a *cwt.*) (= 12·70 *Kilograms*).
100 pounds = 1 cental (=45·359243 *Kilograms*).
4 quarters (112 lb.) = 1 hundredweight (*cwt.*) (= 50·8022 *Kilograms*).
20 hundredweight (2,240 lb.) = 1 ton (= 1·0160 *Tonnes* or 1016·0 *Kilograms*).

Troy Weight.

24 grains = 1 pennyweight (*dwt.*) (= 1·5552 *Grammes*).
20 dwt. = 1 ounce (= 31·1035 *Grammes*).

For gold and silver the ounce, divided decimally, and *not* into grains, is the sole unit of weight. The Troy ounce is the same as the Apothecaries' ounce, = 480 Avoirdupois grains (31·1035 *Grammes*) in weight. There is *no* Troy POUND.

Jewellers' Weight.

The metric carat of 200 *millegrammes* is the legal standard of weight for precious stones and pearls.

* The *Smithfield stone* (for dead meat) is 8 lb. only.

Measures of Capacity.

4 gills = 1 pint (= 0·568 *Litre*).
2 pints = 1 quart (= 1·136 *Litres*).
4 quarts = 1 GALLON (= 4·545963l *Litres*).
2 gallons = 1 peck (= 9·0919 *Litres*).
8 gallons = 1 bushel (= 36·37 *Dekalitres*).
8 bushels = 1 quarter (= 2·909 *Hectolitres*).
A chaldron is 36 bushels = 4½ quarters.

Measures of Length.

12 inches (*in.*) = 1 foot (*ft.*) (= 0·30480 *Metre*).
3 feet = 1 yard (*yd.*) (= 0·914399 *Metre*).
6 feet = 1 fathom (= 1·8288 *Metres*).
5½ yards = 1 pole (= 5·0292 *Metres*).
22 yards = 1 chain = 100 links(=20·1168 *Metres*).
10 chains = 1 furlong (= 201·168 *Metres*).
8 furlongs = 1 mile = 1,760 yards (= 1·6093 *Kilometres*).
3 miles = 1 league (obsolete).

A *Cricket Pitch* is 22 yards (one chain) between the stumps.

A *Lawn Tennis Court* is 78 × 36 feet (double) and 78 × 27 feet (single).

A *Croquet Lawn* is 105 × 84 feet (full size) or a smaller multiple of 5 × 4 feet.

A *Badminton Court* is 44×20 *ft.*, with net 30 ins. deep and 5 ft high at centre.

A *Polo Ground* is 300 × 160 yds.

A *Football Ground* (*Association*) is 120 × 80 yds. (full size); (*Rugby*) 110 × 75 yds. (full size).

Birmingham Gauge.

The equivalent of an inch is 15/0 B.G. The numbers proceed by units down to 1/0 B.G., which = 0·3964 inch, and from 1 B.G. (·3532 inch) by units to 52 B.G. (·00095 inch).

Square or Surface Measure.

144 sq. inches = 1 sq. foot (= 9·2903 *Sq. Decimetres*).
9 sq. feet = 1 sq. yard (= 0·836126 *Sq. Metre*).
30¼ sq. yards = 1 perch, or rod, or pole (= 25·293 *Sq. Metres*).
40 perches = 1 rood (= 10·117 *Acres*).
4 roods = 1 acre (= 0·40468 *Hectare*).
10 square chains = 1 acre. [*metres*).
640 acres = 1 square mile (= 2·58995 *Sq. Kilo-*

Dimensions of an Acre.—The Anglo-Saxon acre's-length is the furlong, and the acre's-breadth the chain, an acre being 4,840 sq. yards, or 220 × 22 yards. The length of a side of a *square* acre is 69·57 yards; an area 110 × 22 yards (or 220 × 11 yards) would be *half an acre*; an area 55 × 22 yards (or 110 × 11 yards) would be *one quarter of an acre*, and so on.

Cubic Measure.

1,728 cubic inches = 1 cubic foot (= 0·028317 *Cubic metre*).
27 cubic feet = 1 cubic yard (= 0·764553 *Cubic metre*).

Angular or Circular Measure.

60 seconds (″) = 1 minute (′).
60 minutes = 1 degree (°).
30 degrees = 1 sign.
90 degrees = 1 right angle or quadrant.
12 *signs* (4 *quadrants*) = 1 *circumference*.
Diameter of circle × 3·1416 = circumference.
Diameter squared × ·7854 = area of circle.
Diameter squared × 3·1416 = surface of sphere
Diameter cubed × ·5236 = solidity of sphere.
One degree of circumference × 57·3 = radius.
Diameter of cylinder × 3·1416; product by length or height, gives the surface.
Diameter squared × ·7854; product by length or height, gives solid content.

Note.—A circle of 7 yards diameter has, in practice, a circumference of 22 yards = 1 chain.

Miscellaneous Weights and Measures.

Apples (Bushel) = 37 to 43 lb. (average 40 lb.).
Ballast (Pig) = 56 lb.
Beef (Barrel) = 200 lb.
Biscuits (Bag) = 102 lb.

Tobacco (Hogshead) = 12 to 18 cwt
Turpentine (Barrel) = 224 to 280 lb.
Wood (Cord) = 128 cubic feet.
Wool (Sack) = 364 lb.

Wheat, Corn, and Flour.

Under the *Corn Sales Act* of 1921 the Corn Returns Act of 1882 is amended, and provision is made for the sale of cereals by weight in terms of the hundredweight of 112 imperial standard pounds.

100 lb. wheat produces 70 lb. flour.
100 lb. flour produces 130 lb. bread.
A quartern loaf = 4 lb.
A last of grain = 80 bushels.

NOTE.—A *Quarter* is a heaped measure of 8 *bushels*. A quarter of English wheat is reckoned as 504 lb. weight. On the Winnipeg Grain Market the standard *bushel* of oats is reckoned at 34 lb.; in U.S.A. at 32 lb.

Hay and Straw.

Truss of Straw, 36 lb. Truss of Old Hay, 56 lb.
Truss of New Hay (to September 1st), 60 lb.
Load of hay or straw = 36 trusses.
Ton of hay = 36 trusses.
An acre of grass should yield 1 to 2 tons of hay.

Sizes of Barrels and Bottles.

	Gals.
Firkin or Quarter Barrel.....	9 = 9 × 1
Kilderkin, Rundlet, or ½ Barrel	18 = 9 × 2
Barrel	36 = 9 × 4
Hogshead (1½ barrels)	54 = 9 × 6
Puncheon (2 barrels).....	72 = 9 × 8
Butt of Ale (3 barrels).....	108 = 9 × 12

An *Anker* = 10 gallons; a *Tierce* = 42 gallons; a *Pipe* of Port or Masdew = 115 gals.; Teneriffe = 100 gals.; Marsala = 93 gals.; Madeira and Cape = 92 gals.; Sherry and Tent = 108 gals.; *Butt* of Lisbon and Bucellas = 117 gals.; *Aum* of Hock and Rhenish = 30 gals.; *Hogshead* of Brandy, 60 gals.; Claret, 46; Port, 57; Sherry, 54; Madeira, 46 gallons; *Puncheon* of Brandy or Rum = 120 gals.

Bottles.—The customary glass bottle of wine or spirits should contain one-sixth of a gallon = 26⅔ fluid ounces.

In the drug trade two large bottles are used:—

Corbyn...	=40 fluid oz.	(quart).
Winchester quart	=80 ,,	(½ gallon).

Water.

The British Ton is the weight of a cubic British Metre of pure water at the temperature of melting ice, very nearly. At present, the following relations hold good:—

Cubic inch	=	252·458 grains.
Gallon (277·274 cub. in.)	=	10 lb. (distilled).
Cubic foot	=	62·321 lb.
35·943 cubic ft. (224 gals.)	=	1 ton.

Water for Ships: Tun, 210 gals., Butt 110, Puncheon 72, Barrel 36, Kilderkin 18 gals.

Cisterns: A cistern 4 feet by 2½ and 3 deep will hold brimful 186·963 gallons, weighing 16 cwt. 2 qrs. 21·6 lb. in addition to its own weight.

Railway Gauges.

In Great Britain = 4 ft. 8½ in.
,, Ireland = 5 ft. 3 in.
,, U.S.A. = 4 ft. 8½ in.
The 4 ft. 8½ in. gauge is also used in Canada, France, Germany, Netherlands, Belgium, Denmark, Austria, Hungary, Italy, Switzerland, Sweden and European Turkey.
,, Australia:—
N.S.W. = 3 ft. 6 in. and 4 ft. 8½ in.
Victoria and South Australia = 5 ft. 3 in.
Queensland and Western Australia = 3 ft. 6 in.
,, New Zealand = 3 ft. 6 in.
,, India = 2 ft. 6 in.; 3 ft. 3⅜ in. and 5 ft. 6 in.
,, South Africa = 3 ft. 6 in.
,, Egypt = 4 ft. 8½ and 3 ft. 6 in.
,, Ceylon = 5 ft. 6 in
,, Japan = 3 ft. 6 in.
,, Russia = 5 ft. 0 in.
,, Spain and Portugal = 5 ft. 6 in.
,, Asia Minor = 4 ft. 8½ in. and 3 ft. 5½ in.

A single track of 4 ft. 8½ in. gauge requires 12 ft. of roadway; a double track requires 23 ft. of roadway.

Electrical Measures.

It is customary to express electrical measurements in terms of the centimetre, the gramme, and the second (C.G.S. units), and the value of

the units has been fixed by international agreement. The principal units are as follow:—

As a unit of resistance, the international *Ohm*, which is based upon the ohm equal to 10^9 units of resistance of the C.G.S. system of electro-magnetic units, and is represented by the resistance offered to an unvarying electric current by a column of mercury at the temperature of melting ice, 14·4521 grammes in mass, of a constant cross-sectional area, and of a length of 106·3 centimetres.

As a unit of current, the international *Ampère*, which is one-tenth of the unit of current of the C.G.S. system of electro-magnetic units and which is represented sufficiently well for practical use by the unvarying current which, when passed through a solution of nitrate of silver in water, in accordance with a certain specification, deposits silver at the rate of 0·001118 of a gramme per second.

As a unit of electro-motive force, the international *Volt*, which is the E.M.F. that, steadily applied to a conductor whose resistance is one international ohm, will produce a current of one international ampère, and which is represented sufficiently well for practical use by $\frac{1000}{1434}$ of the E.M.F. between the poles or electrodes of the voltaic cell known as Clark's cell at a temperature of 15° C., and prepared in the manner described in a certain specification.

As a unit of quantity, the international *Coulomb*, which is the quantity of electricity transferred by a current of one international ampère in one second.

As a unit of capacity, the international *Farad*, which is the capacity of a conductor charged to a potential of one international volt by one international coulomb of electricity. The unit generally used in practice is one-millionth part of this, or the microfarad.

As the unit of work, the *Joule*, which is 10^7 units of work in the C.G.S. system, and which is represented sufficiently well for practical use by the energy expended in one second by an international ampère in an international ohm. In practice the watt-hour is usually employed. It represents the work done by such a current in an hour, and equals 3,600 joules.

As the unit of power, the *Watt*, which is 10^7 units of power in the C.G.S. system, and which is represented sufficiently well for practical use by the work done at the rate of one joule per second. 746 watts = 1 horse-power, and the value of a Board of Trade unit (B.O.T.U.) is 1,000 watt-hours, or 3,600,000 joules, or 1⅓ horse-power hours.

As the unit of induction, the *Henry*, which is the induction in the circuit when the E.M.F. induced in this circuit is one international volt, while the inducing current varies at the rate of one international ampère per second.

A Rod of Brickwork 16½ feet × 16½ feet × 1½ brick thick = 306 cubic feet, or 11⅓ cubic yards, and contains about 4,500 bricks with about 75 cubic feet of mortar. The rod being 5 British metres, a rod of brickwork is 25 square metres 1½ bricks thick = very nearly 10 cubic metres.

Ordinary bricks weigh about 7 lb. each; a load of 500 weighs about 1 ton 11 cwt. 1 qr.

A *Piece* of *machine* printed *Wall Paper* is 11½ yd. long and 21 in. wide; of *hand* printed 12 yd. long × 21 in. wide. French wall papers are usually 9 yd. × 18 in.

Timber and Wood.

100 superficial feet = 1 square of flooring.
50 cubic feet of planks = 1 load.
42 do. timber = 1 *shipping ton.*
108 do. do. = 1 stack.
128 do. do. = 1 cord.

A standard hundred of deals contains 120 pieces. The Petrograd standard consists of 165 cubic feet, or 120 pieces 1½ in. × 11 in. × 12 ft., or 120 pieces 3 in. × 11 in. × 6 ft.

A Batten is not more than 7 inches wide; a Deal not more than 9 inches; Planks are 2 to 4 inches thick, and 10 inches and up in width.

Fish.

In Scotland, and at certain places in England and Wales at which the Cran Measures Act, 1908, has been put into operation, fresh herrings must be sold by the *Cran*, containing 37½

imperial gallons, or *Quarter Cran* of 9⅜ imperial gallons. In the Isle of Man and in Ireland herrings are sold by the *Maze*, which contains 5 long hundreds of 126 each. On the East Coast of England, at places where the above-mentioned Act is not in force, they are sold by the *Last*, which contains 13,200 fish. They are counted by the *Warp*, which is 4 fish. 33 Warps = 1 Long Hundred, 132; 10 Hundred = 1 Thousand, 1,320; 10 Thousand = 1 Last, 13,200. Cured herrings are sold in barrels, the capacity of which, in Scotland, must always be 26⅔ imperial gallons, or in half-barrels of 13⅓ gallons. Herring barrels or half-barrels must be of corresponding capacity in England and Wales if they are presented for the Government Brand at any place at which the Herring Fishery (Branding) Act, 1913, is in force.

A *Quintal* of fish (Newfoundland, &c.) is 112 lb.; a barrel of anchovies = 30 lb.: a "box of fish" is about 90 lb.; a Newfoundland "box of fish" contains 100 lb., 112 lb., or 128 lb., to suit the requirements of the different markets.

Geographical Measures.

The *North and South Poles* are two points at the opposite extremities of that diameter of the earth round which it revolves. The *Equator* is a great circle, equally distant from the North and South Poles. For geographical purposes, the surface of the earth is divided by circles, called the circles of Latitude and Longitude. The circles of *Latitude* are small circles parallel to the Equator. The circles of *Longitude* are great circles perpendicular to the Equator, and passing through the North and South Poles. These circles are divided into Degrees, Minutes, and Seconds. Degrees of Latitude are numbered from the Equator to the North and South Poles. Degrees of Longitude are numbered from the primary circle of Longitude, or Meridian, which passes through the astronomical observatory of Greenwich (England). The *Date* or *Calendar Line* is shown on p. 78.

A *Geographical Mile* is the length of one minute of Latitude. If the earth was a sphere, every minute of Latitude would be of the same length; but, as it is a spheroid, the length of a minute increases from 6,046 feet at the Equator to 6,108 feet at the Poles. The mean length of the geographical mile is 6,076·8 feet. The *Nautical Mile* is (strictly speaking) the length of a minute of the meridian, and is thus identical with the geographical mile. In practice, however, it is taken as the *Admiralty Knot* of 6,080 feet, divided into 10 cables, which are assumed to be 100 fathoms, or 600 feet.

The Polar diameter of the Earth is 7,899 English miles. The mean equatorial diameter is 7,926 miles. The circumference at the Equator is 24,902 miles.

Measures of Heat.

The comparisons in col. 2 are of Thermometers constructed by Fahrenheit, Celsius and Réaumur. *Gabriel Daniel Fahrenheit*, F.R.S. (1686–1736), was born at Danzig, and lived a great part of his life in England and the Netherlands. He was elected a Fellow of the Royal Society in 1724. *Anders Celsius* (1710–1744), inventor of the Centigrade Thermometer, was born at Upsala, Sweden, and was for many years Professor of Astronomy at the University of Upsala. *René Antoine Ferchault de Réaumur* (1683–1757), was born at La Rochelle, France, and became known as "The Pliny of the XVIIIth Century" on account of his work as a Natural Historian.

CONVERSION.

$F = C + R + 32$

$F = \frac{9C}{5} + 32$ $\quad C = \frac{5(F-32)}{9}$

$F = \frac{9R}{4} + 32$ $\quad R = \frac{4(F-32)}{9}$

Let F = Fahr. C = Cent. R = Réaum.

NOTE.—The *normal* temperature of the *human body* is 98·4° F., or 37° (36·9°) C., or 29·5° R.; *Freezing* point = 32° F. = 0° C. = 0° R.; *Boiling* point = 212° F. = 100° C. = 80° R. "*Absolute Temperature*" is Temperature reckoned from "*Absolute Zero*," which is at 273° C. below 0° C., 459·4° below 0° F., and 218·4° below 0° R. and is denoted by the letter "K."

Nautical Measures.

6 feet = 1 fathom.
100 fathoms = 1 cable length.
10 cables = 1 nautical mile.
60 nautical miles = 1 degree.

The assumed length of the cable is 600 feet (=182·87 *metres*), but it is strictly 606·97 feet (= 185 *metres*). The conventional Nautical Mile (the *Knot* in speed measurements) is 10 cables, assumed at 6,080 feet (strictly 6,069·7 feet), but the Nautical Mile is strictly the length of a minute of the meridian and differs according to latitude.

Ship Measurement.

The Ton-measurement of cargo was originally the space occupied by 4 hogsheads (= a Tun) of wine = 50 cubic feet. It is now 40 cubic feet, which is approximately the bulk of 4 quarters, or a short ton, of wheat.

The *Ton-register*, the unit of capacity of a ship, was originally the space occupied by a Last of 10 Quarters of wheat = 100 cubic feet. This cubic space is the Ton-register used by all maritime nations, 100 English cubic feet.

Gross tonnage is the sum in cubic feet of all the various enclosed spaces of a vessel, divided by 100.

Net tonnage is the gross tonnage *less* certain deductions on account of crew spaces, engine room, water ballast, and other spaces not used for passengers or cargo.

Dead-weight tonnage, or carrying capacity, is the number of tons (of 2,240 lb.) of cargo that a vessel is capable of carrying when charged to the load water line (*q.v.*).

Displacement tonnage is the number of tons of sea water displaced by a vessel when charged to the load water line (*q.v.*), *i.e.*, it is the *weight* of vessel and contents in tons.

Load-water-line is the line that would be made round the shell of a vessel when loaded as deep as the minimum freeboard regulations permit.

Draught is the distance in feet from the lowest part of the bottom of a vessel to the actual water line at which the vessel is floating. Thus the load-water-line marks the greatest, or loaded, draught of a vessel. A vessel without any cargo in her hold or passengers or their luggage aboard is said to be "light ship," or "light," or "in ballast."

Free Board is the distance from the main or upper deck to the load-water-line of a vessel. As a general rule the minimum free board provides an amount of reserve buoyancy that will keep a vessel afloat with two compartments holed.

***Bells and Watches on Board Ship.**

Bells.—Time is kept by means of a bell, which is struck every half hour. Anyone who, in an effort to terminate his watch prematurely, strikes the bell early, is accused of "warming the bell," an expression which has grown to include the doing of anything before the appointed time.

Watches.—For purposes of discipline, and to divide the work fairly, the crew is mustered in two divisions: the *Starboard* (right side, looking forward) and the *Port* (left). The day commences at noon, and is thus divided :—

Watch.	*Bells* (in ½ hours).
Afternoon.....	noon to 4 p.m., 1 to 8.
First Dog.....	4 p.m. to 6 p.m., 1, 2, 3, 4.
*Last or †Second Dog	6 p.m. to 8 p.m., 1, 2, 3, 8.
First	8 p.m to midnight, 1 to 8.
Middle	midnight to 4 a.m., 1 to 8.
Morning	4 a.m. to 8 a.m., 1 to 8.
Forenoon.....	8 a.m. to noon, 1 to 8.

*Last =Royal Navy; †Second in Mercantile Marine.

This makes seven Watches, enabling the crew to keep them alternately, as the Watch which is on duty in the forenoon one day has the afternoon next day, and the men who have only four hours' rest one night have eight hours the next. This is the reason for having *Dog Watches*, which are made by dividing the hours between 4 p.m. and 8 p.m. into *two* Watches.

For TIME AT SEA *see* p. 78.

Speed of Ships.

The *Knot* is a measure of speed of ships. The following table shows the equivalents of 1 to 42 knots in land (statute) miles per hour :—

Knots.	Miles.	Knots.	Miles.	Knots.	Miles.
1	1·1515	15	17·2727	29	33·3939

Measures of Energy, &c.

In Physics the unit of force is the *dyne*, the amount that, acting for one second on one gramme mass, gives it a velocity of one centimetre per second. The British unit is the *poundal*, which in one second gives one pound a velocity of one foot per second. One *poundal* = 13,825·5 *dynes*. In Meteorology the unit of atmospheric pressure is the *Bar*, equal to the pressure of 1,000,000 dynes (1 megadyne) per sq. centimetre. The Meteorological *Bar* is thus 1,000,000 Chemical *Bars*.

Horse power is energy exerted at the rate of 550 foot-pounds per second; an alternative unit is the *kilowatt* (102 kilogram-meters per second)= 737·59 foot pounds per second.

Thermal Unit.—The British Thermal Unit (B.Th.U.) is the amount of heat required to raise one pound of water one degree Fahrenheit. The *Gas Therm* = 100,000 B.Th.U. If V = cu. ft. consumed, H=declared heat value of the Company's gas (in B.Th.U. per cu. ft.), P = cost of therm in pence, B=total bill in pence—then $B = V \times H \times P \div 100{,}000$, whence equivalent cost (in pence) per 1,000 cu. ft. $= B \times 1{,}000 \div V = H \times P \div 100$.

Yarn Measures.

Cotton and Spun Silk Count.—
Thread = 1½ yards.
Lea or Skein, *skn.* = 120 yards.
Hank, *hk.* = 7 Skeins, or Leas = 840 yards.
Spindle, *spdl.* = 18 Hanks.
Counts = the number of Hanks in 1 lb.
Bundle Hanks, either of 5 lb. or 10 lb.

Reels of cotton vary from 30 to 1,760 yards; they must be marked correctly.

Bundles of Cotton are chiefly made up for export.

Worsted Count.—Wrap, 80 yards; Hank = 560 yards = 7 Wraps; Counts or Numbers are the number of hanks in a lb.

Linen Count.—The Hank or Lea is 300 yards, and the number of these in 1 lb. is the count of the yarn. A Spindle is 48 hanks; a Bundle is 200 hanks.

West of England Count.—The Hank is 320 yards, and the number of hanks in 1 lb. is the count of the yarn.

Paper and Book Measure.

Writing Paper.

24 sheets = 1 quire.
20 quires = 1 ream.

NOTE.—Books are usually bound up in sheets of 16 or 32 pages. Octavo books are generally printed 64 pages at a time (32 pages on each side of a sheet of quad); a crown octavo book of 320 pages will therefore require 5 sheets of quad crown, and a ream will provide 100 books, the odd 16 sheets being reckoned as waste. Newspapers (and books circulating in large numbers) are printed on rotary presses, for which the paper is supplied on reels (and not in cut reams). "Whitaker" is printed on a rotary press, 192 pages at a time, the paper being served to the press from a reel, and 6 sheets of 32 pages are delivered, printed and folded, at the opposite end of the press.

Sizes of Type.

The type chiefly used in "Whitaker" is named *Nonpareil* (6 point). The column contains 75 lines, and is 12 Pica ems wide; on an average every column contains about 3,000 letters, or 600 words.

All Founders cast their type to one uniform height ("type high"), which is ⅞ inch. Individual letters vary in *breadth*, but the "body" of each character is of uniform *depth* throughout the alphabet in each fount. The unit of *breadth* is the Pica M (*Em*) 6 of which, side by side, occupy one inch of space. The unit of *depth* is the Point (72 Points = 1 inch), so that 6 lines of 12 Point occupy 1 inch in depth. The names and sizes of the various founts are:—

Brilliant (3½ point). A column the size of this in "Whitaker," if set in Brilliant would contain 124 lines, and about 7,500 letters.

METRIC WEIGHTS AND MEASURES.

See also "Double Conversion Tables for Weights and Measures."

In addition to the Imperial standard weights and measures, the use of the French or Metric system of weights and measures was made permissive in Great Britain in 1897.

In the Metric system, the standard of length is the METRE, the standard of weight is the KILOGRAM, and the standard of capacity is the LITRE. Accurate copies of the Metre, Kilogram, and Litre are kept in the custody of the Standards Office of the Board of Trade.

1.—MEASURES OF LENGTH.

10 millimetres (*mm.*) = 1 centimetre (*cm.*) = 0·39370113 inch.
10 centimetres = 1 decimetre (*dm.*) = 3·9370113 inches.
10 decimetres = 1 METRE (*m*) = 1·0936143 yards.
10 metres = 1 dekametre (*dam.*) = 10·936143 yards.
10 dekametres = 1 hectometre (*hm.*) = 109·36143 yards.
10 hectometres = 1 kilometre (*km.*) = 0·62137 mile.

A kilometre is approximately *five eighths* of a mile, so that 8 kilometres may be regarded as pedestrians as 5 miles.

2.—MEASURES OF WEIGHT.

10 milligrams (*mg.*) = 1 centigram (*cg.*) = 0·15432 grains.
10 centigrams = 1 decigram (*dg.*) = 1·5432 ,,
10 decigrams = 1 gramme (*grm.*) = 15·4323 ,,
10 grammes = 1 dekagram (*dag.*) = 5·6438 drams.
10 dekagrams = 1 hectogram (*hg.*) = 3·5274 oz.
10 hectograms = 1 KILOGRAM (*kg.*) = 2·2046223 lb.
10 kilograms = 1 myriagram = 22·046223 lb.
10 myriagrams = 1 quintal (*q.*) = 1·9684 cwt.
10 quintals = 1 tonne (*t.*) = 0·9842 ton.

3.—MEASURES OF CAPACITY.

10 millilitres (*mil.*) = 1 centilitre (*cl.*) = 0·0704 gill.
10 centilitres = 1 decilitre (*dl.*) = 0·17598 pint.
10 decilitres = 1 LITRE (*lit.*) = 1·7598 pints.
10 litres = 1 dekalitre (*dal.*) = 2·1997 gals.
10 dekalitres = 1 hectolitre (*hl.*) = 2·7497 bushels.

1 cubic cm. (water) = 1 gram; 1,000 cubic cm. (water) or 1 litre = 1 kilogram; 1 cubic metre (1,000 litres, 1,000 kilograms) = 1 metric ton.

4.—MEASURES OF LAND.

100 sq. metres = 1 are (*a.*) = 0·0988 rood.
100 ares = 1 hectare (*ha.*) = 2·4711 acres.
100 hectares = 1 sq. kilometre = 0·38611 sq. mile.

NOTES.

1 hectolitre = 2·75 bushels.
1 *hectolitre per hectare* = 1·11 bushels per acre.
1 quintal = 3·67 bushels.
1 quintal per hectare = 1·49 bushels per acre.
1 franc a hectolitre = 3·6*d.* a bushel (par).
1 ,, a quintal = 4·3*d.* a cental (par). = 21·3*d.* a quarter (par).
7 francs ,, (duty) = 12*s.* 6*d.* a quarter (par).

THE UNITED STATES.

The weights and measures of the U.S.A. are the same as those of Great Britain, with the following exceptions:—

Weight.—In the short ton of 2,000 lb., the Cental of 100 lb. takes the place of the Cwt. in the long ton. There are TWO tons, therefore, the long ton of 2,240 lb., the short ton of 2,000 lb.

Capacity.—For grain, the old bushel of 2,150·42 *cubic inches*; its *gallon* = 268·8 cubic inches. This is commonly called the Winchester bushel, though really of the slightly different London standard.

For liquids, the old wine-gallon of 231 cubic inches, five-sixths of the British gallon and = 58,317·8 grains of water. It is divided into 8 pints = 7,289·7 grains of water = 16·6 Imperial ounces. In medicine the pint is divided into 16 fluid ounces = 455·6 grains of water, and the ounce into 8 fluid drachms of 60 minims.

BRITISH DOMINIONS.

Australia and New Zealand.—*Same as* British.

Canada.—*Same as* British but with *short* ton of 2,000 lb., as in U.S.A.

Newfoundland.—*Same as* British.

Channel Islands.

The weights and measures in use in the Channel Islands are those of Great Britain, the *cental* of 100 lb, being used as well as the *cwt.* of 112 lb. The *Old Island Measures* are as follows:

	Jersey.	Guernsey.
Vergée (Normandy rood)	= 0·44 acre	0·4 acre.
Bushel	= 8·9 gallons	5·8 gallons.
Pound	= 7,561 grains	7,623 grains.
Cwt. (104 lb.)	= 112·3 lb.	(100 lb.) = 108·9 lb.

British India.

Ungul = 0·75 inch.
Guz, usually 33 inches; also the yard.
Koss = 2,000 yards.
Bigha (Bengal) ..... usually = 0·625 acre.
Cawny (Madras) ..... ,, = 1·33 ,,
Tola (rupee-weight) = 180 grains.
Chittak = 2·0571 oz.
Seer, 16 chittak, or 80 tolas = 2·0571 lb.
Maund, 40 seers = 82·284 lb.
,, (Bombay) = 27·864 lb.
,, (Madras) = 24·68 lb.
Seer (Liquid) = 1·760 pints.
Candy ,, = 500 lb.
Visham = 3 lb.; Dangali = 3 pints.
Parah = 15 gallons.
Catty (Singapore) = 1⅓ lb.
Pikul ,, ... 100 catties = 133 lb.

Irish Free State.—*Same as* British.

Malta.

The Metric System.
Old Maltese Measures.

Piede = 11·1166 inches.
Canna = 2·2283 yards.
Libbra = 12 oncia = 4886 Troy gr.
Rotolo = 1·745 lb.

Sudan.—*See* Egypt.

South Africa.

The *Metric System* is compulsory in the case of chemists, and is permissible (along with British weights and measures) in other cases. In addition, the following old Dutch measures are still used:—*Liquid Measure:* Leaguer=about 128 imperial gallons; half aum = 15½ imperial gallons; anker = 7½ imperial gallons. *Capacity*: Muid = 3 bushels. The general surface measure is *Morgen*, equal to 2·116540*2* acres; 1,000 Cape lineal feet are equal to 1,033 British feet. The short ton of 2,000 lb. is used.

FOREIGN WEIGHTS AND MEASURES.

The *Metric System* has been adopted by the whole of Europe (except *Great Britain*) and is *permissive* in all countries.

China.

Tael weight = 1·33 oz. Ch'ih = 1·175 feet.
Catty ,, = 1·33 lb. Chang = 11·75 feet.
Picul ,, = 133·33 lb. Li ..... = 2,115 feet.
Ts'un ..... = 1·41 inches.

Egypt.

The *Metric System* of *Weights and Measures* and the foot and pound and their multiples, are legal in Egypt. The foot and pound are rarely used and the Metric System is little known except in the large towns.

The Weights and Measures in common use, with their British equivalents, are as follows :—

Length—

Dira Baladi (used for piece goods) = 29·83 inches
Dira Mamari, or Pic (used by architects) ..... = 29·53 inches
Qasaba (used for agricultural land) = 11·65 feet

Area—

1 Qirat = 209·3 sq. yards ; 1 Feddân (= 24 qirats) = 1·038 acres.

Capacity—

1 Kéla = 0·454 bushel ; 1 Ardeb (= 12 kélas) = 5·444 bushels.

Weight—

1 Rotl = 0·99 lb. ; 1 Oke = 2·75 lb. ; 1 Qantar (= 100 rotls) = 99·05 lb.

A *Qantar* of unginned cotton = 315 lb., of ginned cotton = 100 lb. ; an *Ardeb* of wheat = 150 *kilogrammes*, of barley = 120 *kilogrammes*, of beans = 155 *kilogrammes*, of maize = 140 *kilogrammes*, of whole lentils = 157 *kilogrammes*, of split lentils = 132 *kilogrammes*.

Germany.

The Metric System.

Old Prussian Land Measure.

Morgen (3050 sq. yds. or 0·63 English acre) is still in general use.

Greece.

1 ocque = 2·84 lb. 1 livre = 1·1 lb.
1 quintal = 132·2 lb. 1 drachma = 0·11 oz.

Japan and Formosa.

The Metric System from July 1, 1924.

Old Japanese Measures.

Shaku (10 Sun)	=	11·931 inches.
Ken (6 Shaku)	=	1·9884 yards.
Ri	=	2·4403 miles.
Square ri	=	5·9553 sq. miles.
Cho	=	5·423 chains.
Square cho	=	2·4507 acres.
Tsubo	=	3·9538 sq. yards.
Liquid koku	=	39·7033 gallons.
Dry koku	=	4·9629 bushels.
Koku of capacity	=	0·1 ton.
Liquid sho	=	1·5881 quarts.
Dry sho	=	0·1985 pecks.
Kin (160 Momme)	=	1·3228 lb.
Kwan (1000 Mommo)	=	8·2673 lb.

Russia.

The Metric System from Jan. 1, 1927.

Old Russian Measures.

Standard of length the Sajen, equal to seven British feet ; standard of weight the Funt = 0·90282 lb.

Length.

16 vershok	=	1 arshin.
3 arshin	=	1 sajen.
500 sajen	=	1 verst.
1 verst	=	1166·66 yards (0·66288 mile).

Surface.

1 sq. vershok	=	3·0625 sq. inches.
1 sq. arshin	=	5·4444 sq. feet
1 sq. sajen	=	5·4444 sq. yards.
1 sq. verst	=	0·4394 sq. miles.

Weight.

1 zolotnik	=	65·8306 grains.
3 zolotnik	=	1 loth.
32 loth	=	1 funt.
40 funt	=	1 pood (36·1128 lb.).
10 poods	=	1 berkovatz.

Capacity.

1 tcharka = 0·2164 pint.
1 shtoff (10 tcharkas) = 1·0822 quarts.
1 vedro (10 shtoffs) = 2·705 British gallons.
1 chetvert (8 chetveriks) = 5·771 British bushels.

Siam.

Niu	=	0·83 inch.
Ru'p	=	10 inches.
Sen	=	44·4 yards.
Röeneng	=	2·525 miles.
Tael	=	936·25 Tr. gr.
Chang	=	2·675 lb.

Turkey.

Oke	= 400 drams	= 2·8264 lb.
Batman	= 6 okes	= 16·958 lb.
Cantar	= 44 okes	= 124·3616 lb.
Cheki	= 195 okes	= 551·148 lb.
Kileh		= 0·9120 bushel.
Muscal (Ess. of Rose)		1·5 drams = 74·171 grains.
Arshin (cloth)		= 26·96 inches.
Endaze		= 25·555 inches.
Arshin (land)		= 29·830 inches.
Deunum		= 1098·765 sq. yards.
Djerib (hectare)		= 2·47 acres.

OLD MEASURES.

Old British and Irish Measures.

Hand (horses) ..... = 4 inches.

The following are obsolete :—

Cubit	=	18 inches.
English Ell	=	45 inches.
Scottish Ell	=	37·2 inches.
Scottish mile	=	1,984 yards.
Irish mile	=	2,240 yards.

Note : The mile in Northern Ireland and in the Irish Free State is 1,760 yards, as in Great Britain.

Scottish acre	=	6,150·4 sq. yards.
Cunningham acre	=	6,250 sq. yards.
Irish acre	=	7,840 sq. yards.
Cheshire acre	=	10,240 sq. yards.
Hide	=	120 acres (average).
Yard of land	=	¼ of a hide.

Old French Measures.

Toise of 6 feet ; Foot = 12·789 in.
Aune (ell) of 4 Roman feet = 46·77 in.
League, 3,000 toises = 3·6 miles.
Perch, 22 feet or 6 aunes = 23 44 feet.
Arpent, 100 sq. perches = 1·26 acres.
Pound = 7,554 grains. Setier = 34·317 gallons ; Boisseau ($\frac{1}{12}$) = 2·86 gallons. Pinte = 1·76 pints.

Old Hebrew Measures.

Talmud Cubit = 21·914 in. ; Egyptian Cubit = 18·24 in.
Cubit of Ezekiel = 25·26 in. ; Reed = 151·6 in.
Kikkar (Alexandrian talent) = 50 minas of 60 shekels.

EXAMPLE 1.—What is the present value of a Lease having 37 years to run of the net annual value of £100, interest being reckoned at 4 per cent.? ANSWER:—19·14 years' purchase, or £1,914.

EXAMPLE 2.—A man, aged 54, in the receipt of a pension or annuity of £100 a year net, wishes to commute that for a present payment, interest being reckoned at 5 per cent. How much will he receive? ANSWER: Looking in the Table of Expectation of Life (*q.v.*), it will be seen that the expectation for age 54 is about 17 years; and from the above table an annuity certain for 17 years interest at 5 per cent., is worth 11·27 years purchase. The present payment required would therefore be £1,127 *approximately*.

Note to Example 2.—This method is only approximate. The values of annuities which depend on lives of a given present age, when properly calculated according to a given mortality table and a given rate of interest, are always somewhat less than those given by the method used in this example.

REPAYMENT OF PUBLIC LOANS.

SUMS needed annually for the liquidation of a debt (principal and interest) of £100, at the stated percentage, in 5 to 80 years. If the loan be for £1,000, each annual instalment must be multiplied by 10, and so on. Thus, a Municipal Loan of £1,000,000 at 5 per cent., repayable in 80 years, would cost the ratepayers £51,031 5*s.* annually for that period, and would then be extinguished.

REDEMPTION OF CAPITAL

BY ANNUAL PAYMENTS.

THE following are the rates charged by certain first-class Insurance Companies for "Redemption Policies," to secure the payment of £100 in return for so many annual premiums, *e.g.*, an Insurance Company will undertake to pay £100 on Midsummer Day, 1951, in return for the payment of £2 5*s.* 2*d.* on Midsummer Day, 1923, and each year afterwards until 1950, or 28 payments in all; for £1,000 the annual premium would be £22 11*s.* 8*d.*, and so on. This table is of particular interest to purchasers of *Leasehold* property, as it enables such purchasers to see, at a glance, the amount to be paid out of the income from the property for a redemption policy to provide the sum originally expended (with a margin for dilapidations, if necessary), by the time the leasehold interest has expired.

THE RULE OF THE ROAD.

The Rule of the Road is a paradox quite,
For in driving your carriage along,
If you bear to the left you are sure to go right,
If you bear to the right you go wrong.

But in walking the streets 'tis a different case,
To the right it is right you should steer,
On the left should be left enough of clear space
For the people who wish to walk there.

THE WALKER'S MAXIMS.

(From *The Times*, April 9, 1930).

Two rules the walker must obey
If he would reach his home to-day—
On Roadway always keep the Right
On Footpath just the op-po-site.

G. BUCKSTON BROWNE.

THE RULE OF THE ROAD AT SEA.

1. *Two steamships meeting.*

When both side-lights you see ahead,
Port your helm, and show your RED.

2. *Two steamships passing.*

GREEN to GREEN, or RED to RED,
Perfect safety—Go a-head!

3. *Two steamships crossing.*

If to your starboard RED appear,
It is your duty to keep clear;
To act as judgment says is proper:—
To Port—or Starboard—Back, or Stop her.

But when upon your port is seen
A Steamer's starboard light of GREEN,
There's not so much for you to do,
For GREEN to Port keeps clear of you.

Both in safety and in doubt,
Always keep a good look-out;
In danger, with no room to turn,
Ease her—stop her—go astern.

The 1921 Census in Scotland showed longevity both of males and females less than England and Wales at all ages, ranging from 2·54 years and 3·23 years at birth to fractions of a year at later ages, but while at every age women's longevity exceeds that of men in Scotland the excess is much less marked than in England.

In Ireland up to 1911, when the last Census was taken of the whole country as one, the longevity of males up to 25 and over 85 years was less than in England, but between ages 25 and 85 was greater than in England. Of females the Irish longevity was consistently less than that of England, except for the ages 55 to 75, when they exceeded the English averages. The Census taken in Northern Ireland in 1926, after 15 years interval, and five years later than the English Census, showed remarkable improvements over that of 1911 as regards longevity, and again high figures for males of 55 and over were repeated, though less prominently, England having improved in the decade of years 1911–1921.

OXFORD AND CAMBRIDGE.

Principal Events and Winners.

The first Cricket Match between Oxford and Cambridge was on June 4, 1827, on Lord's Ground; the result was "unfinished." Annual contests started in 1838.

In Rowing, Oxford and Cambridge met in 1829 at Henley (Hambledon Lock to Henley Bridge, 2½ miles), and Oxford won easily in 14 min. 30 sec. The next match was in 1836 from Westminster to Putney, and Cambridge won in 26 min.; but for several years Henley Regatta was used for the match. The first regularly annual race on the tideway was in 1856.

The Athletic Sports were instituted in 1854, and the first meeting was on Christ Church Cricket Ground. Since 1863, London has always been the ground.

CLOSE TIMES FOR GAME.

IN each case the dates are inclusive :--

Black Game—Dec. 11 to Aug. 19 (Aug. 31 in Somerset, Devon, and New Forest).

**Grouse*—Dec. 11 (Dec. 10, Scotland) to Aug. 11.

**Partridge*—Feb. 2 to Aug. 31.

**Pheasant*—Feb. 2 to Sept. 30.

**Ptarmigan*—(Scotland only) Dec. 11 to Aug. 11.

It is also unlawful (in *England and Wales*) to kill the game marked * on a Sunday or Christmas Day.

In *England and Wales*, hares, rabbits, woodcock, snipe, quail, landrail, and heath or moor game (and the eggs of swan, wild duck, teal, and widgeon) are protected under the Game Laws, though no close-time is fixed for them by those laws. In *Scotland* the same remarks apply to deer and hares, to the first four birds, and to wild duck. The close-time for all these birds is, under the Wild Birds Protection Acts, 18 to 1908, from March 2 to July 31 both inclusi Otherwise this close-time applies to all w birds throughout Great Britain.

HUNTING AND GROUND GAME.

There is no statutory close-time for hunting or rabbit-shooting, nor for de hares; but by an Act passed in 1892 th of hares or leverets in Great Britain i hibited from March 1 to July 31 inclusive a penalty of a pound. The first Mo November is the recognised date for the of the *fox-hunting* season, which contin the following April. *Otter-hunting* la mid-April to mid-September. The p *deer-hunting* or *stalking* varies from abo 12 to October 12 for stags, and from No to the end of March for hinds.

SEASONABLE AND UNSEASONABLE FISH.

THE following table shows the periods when the different kinds of edible fish mostly in use are "in season" and "out of season."

The letter *p* signifies that the fish are then in their prime or most plentiful; the letter *x* signifies that the fish may be obtained, but are not at their best; the letter *c* signifies that it is "close-time" as fixed by statute.

(*a*) This is for sea crayfish (or crawfish). River crayfish can be obtained in the summer and autumn. It is illegal to take fresh-water crayfish from March to June.

(*b*) Foreign oysters can be sold in the close season, and are to be had almost all through the year, even though they have been laid down in English beds for temporary storage.

(*d*) In the close season, salmon from the Netherlands, and also from certain British rivers where net fishing is permitted later in the year than usual, are largely sold.

(*e*) For the first six months the bulk of our London supply of shrimps comes from the Netherlands, but Dutch shrimps are far inferior to the English, which are plentiful from July to Dec.

PROGRESS IN MOTORLESS FLIGHT.

It generally takes two or three years for any new sport to settle down into some semblance of properly supervised orderliness. There is a spate of enthusiasm at the outset, which may continue as a flood, or degenerate into a mere trickle according to the success with which the new sport overcomes its initial difficulties, and survives its various ordeals. This has been the case with gliding, which, although not a new sport, has recently received a new lease of life, particularly in 1930 when, following various demonstrations by German experts, it again attracted attention in Great Britain. "Booms" are often to be mistrusted, and sometimes the mere fact that hundreds of thousands of people find a new common enthusiasm is sufficient eventually to kill it, but it can be said quite safely that the gliding movement has now become firmly established in Great Britain. Although during the past twelve months the angle of approach has been considerably changed there is little doubt that the enthusiasm has by no means waned, and in some respects considerably increased. This is particularly so with regard to the outlook of the average Gliding Club. When the spectacular feats of Herr Kronfeld and other German pilots first began to create a desire for emulation amongst young air-minded people in this country, many thousands of young enthusiasts suddenly discovered that they wanted to glide, and they flocked to join the numerous gliding clubs which came rapidly into existence. When they had succeeded in keeping a primary type glider in the air for a fraction of a second they were very pleased with themselves, but too large a proportion of them failed to follow up their success and to qualify for the certificates which can be obtained when advanced training has been completed. It is on this latter aspect of gliding instruction that the clubs have now been concentrating attention. This is all to the good, for it is obvious that in order to keep pace with gliding developments in other countries, particularly on the competitive side, Britain must have an ample supply of fully qualified glider pilots. It must be explained that the popularly accepted term 'gliding" does not give a complete idea of the possibilities of motorless flight. Its really advanced form, and undoubtedly its most important aspect, is what is known as sailplaning. There are three outstanding classes of motorless aircraft: (1) The Primary Glider; (2) The Secondary; and (3) the Sailplane. The two former types are mostly used for instructional purposes, whilst the third type is used for cross-country work, by pilots who have obtained their "C" certificate. Three certificates, "A," "B" and "C," are obtainable after tests have been successfully passed under regulations laid down by the Royal Aero Club, and during the past year a greatly increased number of these certificates have been obtained by gliding pupils in Great Britain. There has been a particularly notable increase in the number of "C" class pilots, whereas at the end of last year they represented a very small number. Gliding Clubs, too, have now settled down [illegible] and many new ones have come [illegible] The movement in Great Britain late Sir Sefton Brancker, who was a staunch friend to British gliding, and did much to help the movement. The past year has been one of much experimental effort, and good progress has been made in this direction. The technical side of gliding has received more attention from the Gliding Clubs, many of which now possess a valuable nucleus of members who have acquired valuable knowledge. Glider design has naturally progressed, and some of the new types are a great improvement in performance on those which preceded them. Notable directions in which useful advances have been made are in connection with towed flight and power launching, in connection with both of which much valuable new data has been discovered. Mr. Lowe-Wylde, one of the pioneers of towed flight in England, has been particularly active in experimental work. Many clubs are now training pupils in towed flight, in which a suitable motor car is used to launch the glider into the air, and to keep it aloft. The driver of the car plays a very important part in these operations, and must be specially skilled in the work. Pupils are taught by easy stages, the instructor using a car with dual control, so that he can easily correct any mistake made by either the driver of the car or the pupil in the glider. Power launching is covered by special regulations issued by the British Gliding Association, and has been experimented with in a number of clubs. An interesting gliding event during the year was the crossing of the Channel by Mr. Lissant Beardmore, and Herr Kronfeld, both of whom, however, were towed by aeroplanes to a sufficient altitude before being released. The International Commission for the Study of Motorless Flight held a meeting in England towards the end of the year, and the delegates from several countries subsequently saw the first International Gliding competitions take place on the downs near Brighton. These competitions attracted many thousands of spectators. Foreign competitors were present, and some of the English competitors flew gliders of foreign design. The Distance Flight for the de Haviland Cup was won by Mr. G. M. Buxton, of the London Gliding Club, on a "Professor" glider, with a flight of 500 yards. Mr. Buxton was also successful in the cross-country flight for the Wakefield Trophy, with a distance of three miles. Soon after this event started a heavy fog descended on the countryside and Mr. Buxton and two other competitors were lost in it for some time. They all succeeded in landing safely and thus proved the safety of gliding even under such unfavourable weather conditions. A large number of other interesting events, designed to test the skill of the many pilots who had entered, also took place, including spot-landing competitions, figure of eight contests, rig and fly contests, and a club aggregate event. The wind was too light on both days for a really successful meeting. A number of new sailplanes were demonstrated at this meeting and showed considerable advance in design. Unfortunately the meteorological conditions did not allow of their performance being fully appreciated, but there is little doubt that by the time the next international contests take place some excellent British sailplanes will be available. The clubs are now taking up sailplaning

motorless flight have not yet been fully probed. Future progress lies with the enthusiastic experimenters rather than with those who are simply attracted by the fascination of the sport itself, and the numbers of the former are now sufficiently large to ensure that experiments on the right lines will go on. Many suggestions have been made which would divert motorless flight from its orthodox course of development. The glider, it is thought by some, might become "the motor-cycle of the air" if fitted with a light engine, but it would then cease to be a glider. Others see in the "Rocket plane" experiments in Germany motive possibilities of a novel kind which might be applied to the glider. The pioneer-experts, however, are seemingly satisfied with the lines on which they are now working. Some critics make much of the point that gliding has no commercial application, but it would seem to be early to argue too rigidly on this aspect of it. At the same time it is equally premature to paint an extravagant picture of the glider being used for purposes which are now fulfilled by other media of passenger transport. At the moment gliding is a sport with a well-developed technical bias and as such it is not surprising that it makes so strong an appeal. There is no other sport quite like it. Its thrills have no pronounced element of danger, the percentage of accidents being very low. This fact is as much a tribute to the common-sense lines on which the movement is organised as a proof of the absence of serious risk. The growing international interest in gliding was emphasised by the fact that representatives of ten nations attended the British meeting of the International Commission. The aim of the Commission was lucidly explained by Lord Amulree, the Secretary of State for Air in the then Government, when he said that its object was to secure international co-operation in scientific, technical, aeronautical and administrative questions concerning motorless flight, and the exchange of ideas for mutual benefit which would result should help to solve the large number of hitherto unsolved problems. Gliding, considers Lord Amulree, has a very definite contribution to make to the general progress of aviation and to certain branches of technical research, and should do a great deal to popularise flying. One point which cannot be too strongly emphasised in favour of a continued interest in gliding is its value in the training of air pilots. It has been proved that a course of motorless flying reduces the time needed to enable a pilot efficiently to control power-driven aircraft. There is no reason why gliding should not provide "flying for the million." Pupils of ordinary intelligence quickly make progress, and once they gain confidence are generally keen to take their "A" certificate. The great need in this country at the moment is the provision of some gliding schools on the lines of the famous German school at the Wasserkuppe, at which, by-the-way, many British pilots have been trained. The training resources of most ordinary Gliding Clubs are obviously limited, and the provision of even one central school of this kind would no doubt be welcomed by gliding enthusiasts in Great Britain. So far, gliding has not made a very pronounced feminine appeal. But there are a number of certificated women pilots in Britain. Most of the clubs, however, have not neglected the social side, which, by-the-way, has a distinct publicity value, and many of them have ladies' committees to take charge of this aspect of their activities. The two-seater glider has made its appearance, and it is not unimportant to mention as an indication of the progress which has been made that at least one glider of this type has provided hundreds of towed "joy" flights for the general public at gliding demonstrations. A glider "flying-boat" has also been successfully landed by a speed-boat. A notable flight in 1931 was that from Hamworth to Chatham and back on thermal currents by Herr Kronfeld. The 12th annual competitions at the Wasserkuppe attracted much attention, and the performances of many young German pilots were proof of striking progress in the science of motorless flight.

The British Empire.

AREA AND POPULATION.

Continental Distribution.	English Square Miles.	Estimated Population.
In Europe	121,512	48,000,000
In Asia	1,824,550	333,000,000
In Africa	4,652,000	50,000,000
In North America	3,893,020	9,000,000
In Central America	8,600	5,000
In the West Indies	12,300	1,730,000
In South America	97,800	314,000
In Oceania	3,300,000	8,000,000
Total	13,909,782	450,094,000

GEOGRAPHICAL DISTRIBUTION.—The British Empire occupies over one-quarter of the known surface of the globe, and its population exceeds one-quarter of the estimated number of the human race. The total area is distributed almost equally over the Northern and Southern Hemispheres, but more than two-thirds lie in the Eastern and less than one-third in the Western Hemisphere.

ETHNOLOGY.—The estimated white population of the Dominions in 1911 was 60,000,000, mainly British and Irish, but partly French, Dutch, and Spanish. The remaining 370,000,000 include 315,000,000 of the native races of India and Ceylon, 40,000,000 black races, 6,000,000 Arabs, 6,000,000 Malays, 1,000,000 Chinese, and 1,000,000 Polynesians, with various other elements, including 100,000 "Red Indians" in Canada.

RELIGIONS.—Of the total population over 210,000,000 are Hindus, 100,000,000 Muhammadans, 80,000,000 Christians (67,000,000 Protestants, 13,000,000 Catholics), 12,000,000 Buddhists, 12,000,000 Animists, 4,000,000 Sikhs, Jains and Parsees, 750,000 Jews, and the remainder Polytheists and Idol worshippers.

CONSTITUTION AND GOVERNMENT.—There is no fundamental law upon which the Constitution of the British Empire rests, but there are three main principles underlying its administration, viz., self-government, self-support, and self-defence. The first of these principles has been applied for many years, and is fully developed in the case of Canada, Newfoundland, Australia, New Zealand, the Union of South Africa, and the Irish Free State. The second principle is equally developed, almost every unit being financially self-supporting, and few requiring aid from the central Government. The third principle is of modern growth, and may be said to be the outcome of the *Imperial Conference*.

THE IMPERIAL CONFERENCE.—The origin of the Imperial Conference may be traced to the presence in London (in 1887) of the Prime Ministers of the various Dominions, at the celebrations of the Jubilee of Queen Victoria. Similar gatherings took place in London in 1897, 1902, 1907 and 1911, and in 1907 the title of "Colonial" Conference was changed to Imperial Conference. At the earlier meetings the Colonial Secretary presided, but with the change of title additional importance was given to the assembly by the assumption of the Presidency by the Prime Minister of Great Britain. In 1917 and 1918 the Conference, which was held concurrently with the sessions of the Imperial War Cabinet, was called the Imperial War Conference, and was held under the Chairmanship of the Secretary of State for the Colonies. In 1921, the *Premiers' Conference*, under the Presidency of the Prime Minister of Great Britain, discussed all matters of general interest to the Empire as a whole. The constitution of the Conference, which again met in 1923, 1926 and 1930, is as follows:—The Prime Ministers and other Ministers of the United Kingdom, Canada, Commonwealth of Australia, New Zealand, Union of South Africa, the Irish Free State, and Newfoundland, the Secretary of State for India and other representatives of India. The Secretariat of the Conference is provided by the Governments represented.

SELF-GOVERNMENT.—(1) *Great Britain.*—The Constitution recognises certain great principles, including the fair administration of justice, the prohibition of taxation without the consent of the people, and a limited monarchy, the power of the monarch being, in effect, wielded by a Ministry supported by a majority of the House of Commons, the members of which House are elected on a wide franchise, exercised by electors of both sexes. The component parts of the British Government are the King; the Legislature (House of Lords and House of Commons); the Executive, appointed by the Sovereign and responsible to Parliament; and the Judicature.

(2) *The Indian Empire.*—India is governed by the King as Emperor, acting on the advice of the Secretary of State for India, who is assisted by a Council whose members are appointed by the Secretary of State. The latter is responsible to, and represents the authority of, Parliament. Subject to the Secretary of State's direction, the supreme executive authority in India is the Governor-General and his Executive Council, with a legislature of two houses, the Council of State of 60 members (of whom not more than 20 are government officials), and the Legislative Assembly of 144 members (26 official and the remainder elected).

(3) *Imperial Dominions.*—All British Dominions are subject (except as regards taxation) to the legislation of the British Parliament, but no Act of Parliament affects a Dominion unless that Dominion is specially mentioned. If the legislature of a Dominion enacts a law which is repugnant to an Imperial law affecting the Dominion, it is to the extent to which it is

repugnant absolutely void. Dominion legislatures may be controlled by the refusal of the Governor's assent to any measure passed; by reservation of a measure for the consideration of the Crown, and refusal of the Crown's assent; by a suspensory clause and the refusal of the Royal assent. Subject to such control the parliament of a self-governing Dominion exercises within its borders all the ordinary powers of a sovereign assembly. The Imperial Dominions may be divided into four classes, according to the way in which they are governed:—

(*a*) *Those having Dominion Status.* Where "Dominion Status" is enjoyed the executive is entrusted to political chiefs who are responsible, not merely or mainly to the Crown, but to the elected legislature of the Dominion. The Dominions thus governed are Canada, Newfoundland, Australia, New Zealand, the Union of South Africa, the Irish Free State and Northern Ireland. Malta, Southern Rhodesia and Northern Rhodesia have "responsible government," but certain powers are reserved.

(*b*) *Where there is government by legislative assembly wholly or partly elected, and an executive council nominated by the Crown or the Governor representing the Crown.* In this class may be placed the Bahamas, Barbados, Bermuda, British Guiana, Jamaica, Leeward Islands, and Mauritius.

(*c*) *Where there is government by a Governor acting with an executive and a legislative council, the councils being nominated by the Crown or a Governor representing the Crown.* Dominions so governed include Ceylon, Falkland Islands, Fiji, Gambia, Gibraltar, Nigeria, St. Vincent, Sierra Leone, Straits Settlements, Tanganyika, Trinidad.

(*d*) *Wherein both legislative and executive powers are vested in the Governor alone.* In this class are Labuan and St. Helena, where power is also reserved to the Crown to legislate by Order in Council. In South Africa, Bechuanaland, Basutoland, and Zululand are governed in substantially the same way, but no power is reserved to the Crown.

(*e*) *Protectorates.* The protectorates are countries which, as regards their foreign relations, are under the exclusive control of the Crown. The protectorates of the British Empire include Kenya, Nyasaland, Somaliland, Swaziland, Uganda.

(*f*) *Spheres of Influence.* A sphere of influence may be described as an area wherein other Powers undertake not to attempt to acquire influence or territory by treaty or annexation; such British spheres exist in the Persian Gulf and in Arabia. In addition to the Spheres of Influence are

(*g*) *Mandatory Spheres*, where the responsibility for securing good government and a reasonable development of natural resources is confided to an already established government by mandate from the League of Nations. Such British spheres are parts of the former German Colonies in West Africa, and the former Turkish governments of Palestine and Mesopotamia.

SELF-SUPPORT.—With but few exceptions the British Dominions are self-supporting, revenue being raised locally to meet the expenditure. Occasional grants are made by the Central Government to meet exceptional expenditure, or in aid of administration in the earlier stages of development. Certain capital expenses are also undertaken from time to time by the Central Authority, *e.g.*, the Nigerian purchase, the Uganda Railway, &c. No taxes are imposed on the subjects of a Dominion or Colony by the Central Government, as such subjects are not directly represented in the British House of Commons; this principle, "No taxation without representation," was the mainspring of the revolt in the North American Colonies at the close of the eighteenth century. Since that disastrous attempt to impose taxes without the consent of the taxpayers, the principle, which had for many years been accepted in Great Britain, has become an accepted maxim of British Overseas administration.

SELF-DEFENCE.—The Dominions, generally, provide for the defence of their immediate area, but the general strategical defence of the Empire is undertaken by the Central Government. Questions affecting general strategical defence are considered and determined by the *Imperial Defence Committee*, which co-ordinates the work of the sea, land and air forces. In the Great War of 1914-1918 the Dominions provided Armies or Contingents, which fought in every area and bore a full share of the sacrifices by which victory was achieved. The land and air forces of the Dominions are maintained at the expense of the Dominions concerned. The amounts provided for *Naval Defence* in the estimates of the under-mentioned parts of the Empire for the year 1930-31 are as follows:—Great Britain £51,739,000; Canada $3,600,000; Australia £1,778,633; New Zealand £675,480 (including £125,000 as a contribution towards the Naval Base at Singapore, and £100,000 interest and sinking fund on account of H.M.S. *New Zealand*); Union of South Africa £78,560. The proportion of expenditure on Naval Defence to the total Import and Export trade of these parts of the Empire is as follows: Great Britain 3·04 per cent.; Canada 0·15 per cent.; Australia 1·06 per cent.; New Zealand 0·77 per cent.; Union of South Africa 0·043 per cent. Per caput of population the expenditure is, Great Britain £1 2*s.* 7*d.*; Canada 36 cents; Australia 5*s.* 6*d.*; New Zealand 9*s.* 1*d.*; Union of South Africa (European population only) 10¾*d.* As regards Colonies not possessing responsible governments, contributions to Imperial Defence are paid to the War Office.

THE LEGISLATURE.—The Parliament of Great Britain is the supreme legislative authority of the Empire. This Parliament has, with the consent of the King-Emperor, delegated its legislative authority to other parliaments constituted by itself, while retaining a general supervision of Imperial affairs. The Secretaries of State for the Dominions and Colonies are Cabinet Ministers, their active participation in the government of the nations of the Empire decreasing with the measure of self-government accorded to each. Parliament also exercises a control over Indian affairs through a Secretary of State.

THE JUDICATURE.—The Supreme Judicial Authority of the Empire is the Judicial Committee of the Privy Council, before which appeals may be brought (in the form of a petition to the Crown) from Consular Courts and Courts of Vice-Admiralty, and from the Courts of India and every British Dominion. The Committee (*see* p. 246) consists of such members of the Privy Council as have held or are holding high judicial office, provision being made for the inclusion of representatives of India and the self-governing Dominions. India and the Dominions have each a

judicial system, with judges appointed by the Crown. The Supreme Judicial Authority for Great Britain and Northern Ireland is the House of Lords.

EDUCATION.—Educational systems, on a more or less uniform plan, are developed throughout the Empire under the control of the respective governments. Universities (*see* pp. 318–28) and University Colleges have been established and degrees are conferred. Under the will of Cecil Rhodes scholarships were founded at Oxford, his old University, for students from the British Dominions and Colonies, the United States of America, and the German Empire. *Rhodes Scholarships* are awarded in each of the United States, in each State or Province of Canada, Australia and South Africa (where there are also scholarships for Rhodesia and for certain towns and schools in Cape Colony), in New Zealand, Newfoundland, Jamaica, Bermuda and Malta. They are of the annual value of £400, and are tenable at any College in Oxford. The normal number of Rhodes scholars in residence together is about 196, of whom 100 come from the British Empire and 96 from America. *Secretary to the Rhodes Trustees*, The Marquess of Lothian, C.H., 17, Waterloo Place, London, S.W.1. *Oxford Secretary*, Prof. C. K. Allen, M.A., Rhodes House, Oxford.

Statistics issued by the Universities Bureau of the British Empire show that the *total* number of students from overseas attending Universities and Colleges in the United Kingdom at the beginning of the 1929–30 session was 5,486, of whom 995 are from Africa, 1,071 from America, 2,282 from Asia, 794 from Europe, and 344 from the Pacific. The principal figures are: India, Burma, and Ceylon, 1,846; United States, 621; South Africa and Rhodesia, 531; Egypt, 366; Australia, 223; Canada and Newfoundland, 233; Germany, 163; China, 143; West Indies, 140; New Zealand, 118; Russia, 64; France, 63; Japan, 61; Netherlands, 46; Poland, 44; Switzerland, 43; Siam, 42; Norway, 32; Hungary, 31; Spain, 30.

The *Davison Scholarships*, established in 1923, have been withdrawn.

Under *The Commonwealth Fund* (The Fuller Building, 41 East 57th Street, New York, U.S.A.), established in 1918 by Mrs. Stephen V. Harkness, there are available for candidates of British descent 40 Fellowships, of an annual value of approximately £600 each, tenable for two years at certain American Universities. They may be awarded as follows:

1. Thirty Fellowships open to men and women, unmarried, under thirty years of age, domiciled in England, Scotland, Wales or Ireland, and graduates of recognised universities therein;

2. Ten Fellowships for (*a*) candidates from the British Dominions, graduates of a University of a British Dominion or Colony, men or women, unmarried, under thirty years of age, who have studied, but not necessarily graduated, at a British University and (*b*) candidates who hold an appointment under the British Government, or the Government of a British Dominion, Colony, Protectorate, or Mandated Territory, or the Government of India. They may be single or married, but must not be more than thirty-five years of age on September 1 of the year of award. At least five of these ten Fellowships are open to candidates from the Government Service.

FINANCE.—Complete financial autonomy is enjoyed, in fact, by all British Dominions, and customs tariffs are in most cases the principal source of revenue. The tariffs are generally lower for merchandise of British origin than for importations from foreign countries. There is no Imperial Debt, but certain obligations of Crown Colonies and Protectorates are met in the early stages of their development by the central Government, and occasional grants in aid of revenue are also made at need. Advances so made and still outstanding are shown under the heading "National Debt" (*see* Index).

Stocks authorised under the Colonial Stock Act 1900 are Trustee Securities, and the price at which some of them may be obtained is shown on p. 455.

PRODUCTION.—Canada, India, Australia, and Great Britain are the principal wheat-producing units, and Mesopotamia (with irrigation) has great potentialities. Barley, oats, rice and maize, and tea, coffee and rubber are largely cultivated, while more than half the world's output of cocoa was produced in British Dominions. Cane sugar is produced in India (for local consumption), West Indies, Australia, New Zealand, Natal, and Mauritius, and beet sugar in Canada and elsewhere. Fruit is grown in most of the Dominions and figures largely in the sales of the London Fruit Exchange (Spitalfields). Meat is produced in large quantities in New Zealand, Australia and South Africa. Australia and New Zealand are the greatest wool-producing countries of the world, and the output of coal in Great Britain exceeds that of every country except the U.S.A.; coal is also abundant in Australia, Canada, India and South Africa. Cotton is extensively grown in India, West Africa, East Africa, Sudan, West Indies, and in the tropical parts of Australia; chemical and mechanical wood pulp for paper-making is extensively produced in Canada and Newfoundland. Iron ore is found in many of the Dominions, and pig iron is largely produced; tin is produced mainly within the Commonwealth (particularly in the Malay peninsula), while 70 per cent. of the world's supply of gold is drawn from South and South-West Africa, Australia, New Zealand and Canada; it is produced also in Borneo, British East Africa, British Guiana, Ceylon, India, Malay States, Sarawak, Sudan, and West Africa. Precious stones are found in various parts of the Commonwealth, South Africa producing the principal supply of diamonds, and India of rubies and emeralds. Petroleum is produced in India, Trinidad and Canada, and there are vast resources available at Mosul (Mesopotamia) and in the neighbourhood of the Persian Gulf.

Nationality of Passengers.—In 1930 British Subjects numbering 220,966 emigrated from the United Kingdom to countries out of Europe and British Subjects numbering 197,426 entered the U.K. from countries out of Europe. In 1930 Aliens numbering 92,943 arrived from non-European countries and 107,026 Aliens left the U.K. for countries out of Europe. The *total* number of Aliens *landed* from all countries was 457,414 (1929) and 454,752 (1930) and the *total* number of Aliens *embarked* for all destinations was 449,645 (1929) and 449,628 (1930). *Leave to land* was refused to 2,100 Aliens (1929) and to 2,235 (1930).

CENSUS POPULATION OF THE BRITISH ISLANDS.

Previous to 1801 there existed no official return of the population of either England or Scotland; nor was it till 1813 that statesmen had anything more than surmise to guide them respecting Ireland, and the census then taken of that country was far from correct. The estimate formed of the English population at various periods, calculated from the numbers of baptisms, burials, and marriages, was in the years—

1570.....4,160,221	1670.....5,773,646
1600.....4,811,718	1700.....6,045,008
1630.....5,600,517	1750.....6,517,035

The first general *Census* of Great Britain and Ireland was taken in 1801, and since the time named there has been a fresh numbering every ten years, with the following results:

1801.....16,345,646	1871.....31,629,299
1811.....18,509,116	1881.....35,026,108

*** The population of Great Britain and Ireland a month before the outbreak of the Great War was officially estimated at 46,089,249. The number of persons to the square mile was in 1921: England and Wales, 649; Scotland, 164; Ireland (1911), 135·6.

CENTRAL GOVERNMENT.

THE BRITISH CONSTITUTION.—The British Constitution is mainly unwritten and customary, but its development is marked by certain outstanding and fundamental laws, of which the principal are *Magna Carta* (1215), which secured annual parliaments and the equal administration of justice; the *Habeas Corpus Act* (1679), securing the liberty of the person; the *Act of Settlement* (1701), providing for the Protestant succession to the throne; the *Act of Union with Scotland* (1707), the *Act of Union with Ireland* (1800), the *Parliament Act* (1911), which enabled the Commons to pass certain Acts without the concurrence of the other chamber; the *Government of Ireland Act* (1920), and the *Irish Free State (Agreement) Act*, 1922.

The constituent parts of the British Constitution may be thus briefly described:

1. *The Sovereign.*—The throne is hereditary in the British house of Windsor with mixed succession, the sons of the Sovereign and their descendants having precedence of daughters, but daughters and their descendants preference over lateral lines. The Monarchy is constitutional and limited. The King has a right to veto Bills passed by both Houses of Parliament, but in practice his veto is almost obsolete. "The King can do no wrong" is a maxim of the Constitution, and consequently no action for civil wrong will lie against the Crown. A petition of right will, however, enable an injured subject to obtain redress, while, if in the administration of an Act of Parliament a Government department exceeds its rights, a declaration of right may be obtained in an action against the Attorney-General.

2. *The Legislature.*—Parliament consists of two Houses, the Lords and the Commons.

(*a*) *The House of Lords* consists of peers. A peer may hold his seat by (1) hereditary right, (2) creation by the King, (3) official position or election. English bishops (24), Irish peers (28) elected for life, and Scottish peers (16) elected for duration of Parliament, also sit in the House of Lords.

The powers of the House of Lords were much restricted by the Parliament Act, 1911. Thus, if a Money Bill is not passed unamended by the House of Lords within a month of its being sent up, it becomes law upon the Royal assent being signified. A Public Bill other than a Money Bill will become law without the consent of the Lords if it is passed by the Commons, and sent up to the Lords, in three successive sessions, provided two years elapse between the date of the second reading in the Commons in the first session and the date when it is passed by that body in the third session. Passing a Bill with amendments by the House of Lords is equivalent to rejection, unless the Commons approve the amendments. Any Bill by which the maximum duration of Parliament is increased is excepted from this Act. Members of the House of Lords are unpaid.

(*b*) *The House of Commons.*—This body consists of 615 members, elected by the registered male and female electors in county, borough, and university constituencies. Practically all persons over 21 years of age are qualified to vote at elections. The maximum duration of Parliament is five years. Members of the House of Commons receive annual salaries of £400 and travelling facilities over the railways to and from their constituencies.

3. *The Executive.*—The Crown (the King in Council) "makes peace and war, issues charters, increases the peerage, is the fountain of honour, of office, and of justice." The *Cabinet*, under the presidency of the Prime Minister, consists of Ministers, drawn from the ranks of the party in power and appointed by the Sovereign on the advice of the Prime Minister; Ministers receive salaries of varying amounts (*see* page 169). The Cabinet has no corporate existence. Ministers are severally responsible to Parliament for their actions, and the Cabinet as a whole is responsible to Parliament for its joint and several administration. Ministers hold their office during the Sovereign's pleasure; they may be dismissed at any moment.

4. *The Judicature.*—(*a*) *England and Wales.*—The laws in England and Wales are administered by judges appointed by the Crown, who hold office for life, and cannot be removed save on petition presented by both Houses of Parliament. Two Courts of Appeal hear appeals from the High Court, the ultimate Court of Appeal from all the courts in Great Britain being the House of Lords. Civil cases arising in London and Middlesex are tried at the High Court in London, but civil cases arising in the country are tried on circuit by judges of the King's Bench at the Assizes. The Chancery division has exclusive jurisdiction to try certain classes of actions. To the County Courts is relegated the duty of trying actions where the sum in dispute does not exceed a certain amount. The County Courts, too, have jurisdiction to try cases arising under certain special Acts of Parliament, *e.g.*, the Workmen's Compensation Act. Bankruptcy cases arising in London are heard in the London Bankruptcy Court; those arising out of London are dealt with in the County Courts.

With regard to criminal law it is a general principle that, except for certain minor offences, every person charged is entitled to be tried by a jury. Courts of criminal jurisdiction in England are: (1) The judges of the High Court sitting at Assizes for the trial of cases out of London; and at the Central Criminal Court ("The Old Bailey," *see* p. 248) for the trial of cases arising in and around London. (2) Courts of Quarter Sessions, holden for every county, and formed of justices of the peace, presided over by a chairman. The recorders of certain cities and boroughs have a jurisdiction similar to that of courts of Quarter Sessions. (3) Courts of Petty Sessions, consisting of at least two justices of the peace or a stipendiary magistrate. (4) *The Court of Criminal Appeal* has power to hear appeals against convictions and sentences.

(*b*) *Scotland.*—Scots civil law is administered by the Court of Session, which is a court of law and equity. The High Court of Justiciary is the supreme criminal court in Scotland. It consists of all the judges, and as a rule it is confined to the trial of serious cases. The Sheriff of the county (*see* p. 254) exercises functions which correspond to those of the English County Court Judges and the Chairmen of Quarter Sessions. Burgh magistrates and justices of the peace have jurisdiction in petty cases.

(*c*) *Northern Ireland.*—The higher courts in Northern Ireland are very similar to the English courts, but the County Court Judges are also the Chairmen of Quarter Sessions.

RELIGIONS AND LANGUAGES.

Religions and Languages.—The inhabitants of Great Britain and Ireland are almost entirely Christians, the exceptions being about 300,000 Jews and a small number of non-Christian immigrants. In England the Church of England (with an Episcopal form of Government), and in Scotland the Church of Scotland (with a Presbyterian form of Government), are the "Established Religions." The Church was disestablished in Ireland in 1869, and in Wales in 1920. There has been no religious census since 1851, but many of the religious bodies publish estimates of membership, and estimated figures for 1929 will be found on p. 296. The language of the people is English, with a large proportion of Welsh-speaking people in Wales, many of whom are bi-lingual. Attempts are being made to revive the Gaelic language in the Irish Free State. Gaelic is still spoken in the Highlands and Islands of Scotland, there being 7,069 persons speaking Gaelic only (Ross and Cromarty 3,435, Inverness 3,123, Argyll 335, other counties 176), and 137,149 speaking Gaelic and English at the Census of 1931.

LOCAL GOVERNMENT.

Local Government is carried out under the central control of the Ministry of Health (which superseded the various Local Government Boards in 1919). The subjects which local bodies administer are, *inter alia*, education; the poor law; public health; police: the control of the sale of intoxicating liquors; the provision of lunatic asylums. The ruling principle has been to entrust special interests to those specially interested. In England and Wales there are elective Councils for each Administrative County (under Chairmen), for each City and Borough (under Lord Mayors or Mayors), and for Urban and Rural Districts (under Chairmen), every parish being thus included. Scotland has elective County Councils under a Convener, Burgh Councils under a Lord Provost or Provost, or Parish Councils with Chairmen.

POLICE.

The strength of the Police force was 58,080 in England and Wales (1930), 6,613 in Scotland (1929), and 2,877 in Northern Ireland (1929). The Police of England and Wales are administered by the Home Office, those of Scotland by the Scottish Office. The LONDON POLICE consists of the City Police and of the Metropolitan Police. The *City Police* district comprises an area of 675 statute acres, and contains two courts of justice, those of the Guildhall and Mansion House, where the Lord Mayor and the Aldermen are the magistrates (*see* p. 251). Although the area is comparatively small, the rateable value is enormous. The night population is 10,896, but the day (or working) population is 436,721. The Force under the Commissioner comprises 1 Assistant Commissioner, 3 Superintendents, 7 Chief Inspectors, 25 Inspectors, 17 Sub-Inspectors, 125 Sergeants, and 983 Constables; also 18 Constables on private service duty. The *City of London Police Reserve* (*Headquarters*, Bunhill Row, E.C. 1) numbered 3,266 all ranks in Oct. 1931.

The *Metropolitan Police* district embraces an area of 447,626 statute acres, with a population of about eight millions. There are within this area fourteen Police Courts (*see* p. 252). The Force on Sept. 5, 1931, consisted of 33 Superintendents, 688 Inspectors, 2,963 Sergeants, and 17,012 Constables, making a total of 20,696, with 247 horses. The strength of the Metropolitan Special Constabulary Reserve and its Auxiliary Force on Sept. 5, 1931, was 21,545. The gross expenditure of the Metropolitan Police and Metropolitan Police Courts for the year 1930-31 was £8,479,958. On March 31, 1931, there were 13,820 Police pensioners, and 1,340 pensioned widows and 459 children.

* Budget Estimate, (*a*) April 27, 1931; (*b*) September 10, 1931.

THE ORIGINAL BUDGET, 1931–1932.

The Budget for 1931–1932 was introduced on April 27, 1931, by the Chancellor of the Exchequer (Mr. Snowden). The financial year 1930–1931 ended with a realised *deficit* of £23,275,971 (in place of the estimated *surplus* of £2,236,000 in Mr. Snowden's Budget of April 14, 1930), revenue falling short by £13,550,000, while expenditure exceeded the estimate by £532,000, and £11,432,000 was added to the Sinking Fund. *Customs and Excise* yielded £1,309,000 *less* than the Budget figure, and *Inland Revenue* £6,023,000 *less*. Mr. Snowden estimated the necessary *Expenditure* for 1931–1932 at £803,366,000 and the *Revenue* at £765,634,000. To meet the deficiency of £37,366,000 the Chancellor of the Exchequer transferred £20,000,000 from the dollar exchange reserve, anticipated a gain of £10,000,000 by a change in the Income Tax instalment system, and imposed an extra duty on petrol to produce £7,500,000, showing a prospective surplus of £134,000 for contingencies.

Changes in Taxation (Original Budget).

The following Changes in Taxation were proposed in the Budget :—

INCOME TAX.—Income Tax (Schedules B, D and E) at present payable in two equal instalments on January 1 and July 1 to be payable as to three-quarters on January 1.

PETROL AND MOTOR CYCLES.—*Petrol*—The duty on petrol raised from 4*d.* to 6*d.* a gallon (to yield £8,300,000 in a full year). *Light Motor Cycles*—Annual tax of 15*s.* in lieu of the present 30*s.* on light motor cycles, to encourage the manufacture of a new type of light machine.

LAND VALUES.—The Finance Bill to provide for a tax of 1*d* in £ on capital land value ; tax to be levied for 1933-34 and subsequent years.

EXCHANGE ACCOUNT.—£20,000,000 taken from the dollar exchange reserve during the War and amounting to £33,000,000.

THE REVISED BUDGET.

On Sept. 10, 1931, amended Budget proposals for 1931-32 and for 1932-33 were introduced in the House of Commons by Mr. Snowden, Chancellor of the Exchequer in the National Ministry. The Chancellor was faced with *deficits* of £74,479,000 for the financial year 1931-32 and £170,000,000 for 1932-33. To meet these deficits the following proposals were made :—

MONETARY GOLD.

In a written Parliamentary reply (May 5, 1930) the Financial Secretary to the Treasury (Mr. Pethick Lawrence) stated that the monetary gold supply of the world at the end of 1929 was estimated, in a Memorandum appended to the first Interim Report of the Gold Delegation of the League of Nations, at $11,179,000,000, equivalent to £2,297,000,000. This includes an amount "in circulation," in the sense of being outside the reserves of central banks and Treasuries, estimated at $756,000,000 (£155,000,000), but this is very conjectural.

The gold held in the countries named in the question at the end of 1929 and at the latest available date was (in £ millions):—

INCOME TAX.	In the £
The tax is chargeable under five Schedules, A, B, C, D, and E, and the standard rate for the year 1931-32 is	0 5 0

Schedule A: Lands, Tenements, &c.

Owner must allow deduction from next payment of rent when tax paid by tenant.

Relief in respect of the cost of repairs is given under Sch. A to the extent of ⅓ part of the assessment in the case of lands, and in the case of houses, where the amount of the assessment—

Does not exceed, £40 ..... ¼
Exceeds £40, but not £100... ½
Exceeds £100..... £20 plus ⅓ of amount in excess of £100

Allowance to Owners of Land and Houses, for average cost of maintenance, repairs, insurance and management in excess of above relief may be claimed. Five years' average taken.

A Clergyman or Minister using part of his house mainly for his duties may obtain an allowance not exceeding the tax on one-eighth of the rent, or annual value.

Schedule B: In respect of the Occupation of lands used for the purposes of husbandry only, or mainly for those purposes, on an amount equal to the Annual Value; *or*, by special request, if made before 5th June (5th August in Scotland) in the *current income-tax year, on profits* of husbandry, as in case of Trades, under Schedule D. In the case of all other lands on an amount equal to one-third of the annual value.

Schedule C: Dividends or Annuities from public revenue (Government Stocks, &c.) .....

Schedule D: Trades, Professions, Remittances from Abroad, Interest, &c.

Schedule E: Salaries, pensions, and other emoluments of Officers of Army, Navy, Civil Service, Ecclesiastical Bodies, Corporations, Public Companies, &c.....

LIFE INSURANCE.—Allowance of duty may be claimed on the amount of premiums paid for insurance of self or wife in approved *Companies legally carrying on business in the* United Kingdom, if not exceeding one-sixth of the net personal income; but the amount allowable in respect of any premium for securing a capital sum on death not to exceed 7 per cent. of the actual sum assured, nor in respect of any premium for securing any other benefits, more than £100 in all.

RESIDENTS ABROAD.—No exemption or other relief is given to persons not residing in the United Kingdom. *Exceptions:* British subjects, present or former servants of the Crown, widows whose late husbands were in the service of the Crown, missionaries, servants of native States under British protection, residents in the Channel Islands or the Isle of Man, and persons, previously resident in the United Kingdom, residing abroad for the sake of *their health or the health of a member of* their family.

DOMINION INCOME TAX.—Relief is granted under certain conditions in the case of a taxpayer who has paid, or is liable to pay, United Kingdom Income Tax on any part of his income, and who proves that he has paid *Dominion Income Tax for the same year in* respect of the same part of his income.

SCHOLARSHIPS.—Income from a scholarship held by a person receiving full-time instruction at a university, college, school, or other educational establishment is exempted from Income Tax (including Super-Tax).

STANDARD RATES OF INCOME TAX.—The Income Tax year is from April 6 to the following April 5. The following were the standard rates for the years mentioned:—

	£	*s.*	*d.*
1907-8 and 1908-9 ...	0	1	0

1925-26 to 1929-30 ...	0	4	0
1930-31 ...	0	4	6

SUR TAX.—The Sur Tax replaced the *Super Tax*, which was levied up to and including the Super Tax Year 1928-9 (payable January 1, 1929),

based on the statutory income of the year 1927-8). The Sur Tax is in effect a deferred instalment of Income Tax payable on January 1 after the end of the Income Tax year. Thus the first payment of Sur Tax was due January 1, 1930, and was the deferred instalment of Income Tax for the year 1928-9.

Sur Tax for the year 1930-31 (payable January 1, 1932), is at the following rates *plus* 10% *of each rate* on persons whose total incomes exceed £2,000:—

For every £ of the remainder of the excess	0	7	6

Notes on Income Tax.

Under the Finance Act of 1920 a radical alteration was made in the method of granting relief in the Income Tax in favour of earned income as compared with investment income, and in the method of graduating the burden of the tax according to the size of a taxpayer's income and his family responsibilities. The previously existing exemptions, abatements, and reliefs were replaced by the various reliefs set out below. In introducing the new system, the Act employed two terms not previously used in connection with the Income Tax, *viz.*, "assessable income" and "taxable income."

"*Assessable Income*" means, in the case of "earned" income, the amount of such income as computed for Income Tax purposes, after deducting the amount of the "earned" income allowance mentioned below, and in the case of other income, the actual amount of such income as computed for Income Tax purposes.

"*Taxable Income*" means that part of the "assessable income" upon which Income Tax is actually charged, that is, the "assessable income" less the various deductions referred to below.

Deduction in arriving at Assessable Income. Earned Income Allowance.—The differentiation in favour of "earned" income is made by deducting one-fifth of the "earned" income in order to arrive at the assessable income. The deduction is given irrespective of the amount of the total income, but must not exceed £300 for any one individual. The "assessable income" of a taxpayer is, therefore, his total income, as computed for Income Tax purposes, after making the appropriate deduction in respect of any "earned" income.

An allowance is made of one-fifth of the total income (from whatever source) of persons of the age of 65 years and upwards whose total income does not exceed £500. This allowance is granted, in the case of a married couple, where *either* the husband or his wife, living with him, has attained the age of 65 years at the commencement of the year of assessment, but the *joint total income* must in such a case fall within the prescribed limits. Provision is also made for marginal relief, in order to avoid the hardship which would be involved when the total income falls just over the prescribed limit of £500.

Total Exemption.—Exemption from tax may be claimed where the total assessable income does not exceed £100, or, in the case of an individual whose wife is living with him, £150. Where the income is wholly earned, these limits are equivalent to £125 and £187 10s. respectively. *See* above.

Deductions from Assessable Income in order to arrive at Taxable Income.—Where the taxpayer is not totally exempt, the following deductions may be claimed from the total assessable income in order to arrive at the "taxable income." *The deductions may be claimed irrespective of the amount of the taxpayer's total income.*

Personal allowance may be claimed of £100, or, in the case of an individual whose wife is living with him, £150.

Wife's Earned Income.—When a taxpayer's total income includes any earned income of his wife, the personal allowance of £150 is increased by a sum equal to four-fifths of the amount of such earned income, subject to a maximum additional allowance of £45.

Deduction for a Widower's (or Widow's) Housekeeper taking Charge of Children.—A deduction of £50 may be claimed, under certain conditions, by a widower who has living with him a female relative for the purpose of having the charge and care of any child or adopted child of his in respect of whom the deduction for children (*see* below) is given or in the capacity of a housekeeper or by a widow who has a female relative resident with her for the like purpose. If the widower or widow proves that he or she has no such female relative who is able or willing to take such charge, the same deduction may be claimed in respect of some other female person employed for that purpose.

Deduction in respect of Widowed Mother, &c., taking Charge of Children.—A deduction of £50 may be claimed, under certain conditions, by an *Unmarried Person* who has living with him and maintains at his own expense either his mother (being a widow or living apart from her husband) or some other female relative, for the purpose of having the charge and care of any brother or sister of his in respect of whom the deduction for children or adopted children (*see* below) is given.

Deduction for Children.—A deduction may be claimed in respect of each child, step-child, or adopted child under the age of 16 years, or who, if over that age, is receiving full-time instruction at any university, college, school, or other educational establishment. The deduction allowable is £50 in respect of one child, and £40 in respect of each additional child for whom the relief is due. No deduction is, however, allowed in respect of any child or adopted child who is entitled in his or her own right to an income which, after excluding any income to which the child is entitled as the holder of a scholarship, bursary, or other similar educational endowment, exceeds £50 a year.

Deduction in respect of Dependent Relatives.—A deduction of £25 may be claimed in respect of (*a*) any person whom the taxpayer maintains at his own expense, and who is a relative of his or of his wife, and incapacitated by old age or infirmity from maintaining himself or herself, or (*b*) his or his wife's widowed mother, whether incapacitated or not, or (*c*) a daughter who is resident with the taxpayer, and upon whose services he is compelled to depend, by reason of old age or infirmity. The deduction under (*a*) or (*b*) is conditional, however, upon the income of the dependent relative not exceeding £50 a year. The deduction applies in the case of a female taxpayer, with the substitution of "husband" for "wife" above.

Rates of Tax chargeable on the "Taxable Income."—The following provisions as to the rates of tax chargeable on the taxable income (*i.e.*, that part of the income on which tax is actually charged) apply, *whatever the total amount of the income.* For the year ending Apr. 5, 1932, the first £175 of the taxable income is chargeable at 2*s.* 6*d.* in the £. The remainder of the taxable income is chargeable at the standard rate of tax, *i.e.*, at 5*s.* in the £.

Relief in respect of Life Assurance Premiums.—Where allowance is due in respect of premiums paid for Life Assurance or for contracts for Deferred Annuities, the allowance is deducted from the amount of tax arrived at under the preceding paragraph, and calculated at following rates:—one-half the standard rate in the £ on the amount of the premium paid on policies taken out since June 22, 1916, irrespective of the claimant's total income; and on policies taken out before June 22, 1916, a deduction of tax at one-half the standard rate in the £ is allowed on the premiums paid by a claimant whose income does not exceed £1,000, of three-fourths of the standard rate in the £ where his income exceeds £1,000 and does not exceed £2,000, and at the standard rate in the £ where his income exceeds £2,000.

INVENTORY DUTY, *see* ESTATE DUTY.

LAND VALUE TAX.—In respect of all land in Great Britain there will be charged in respect of the financial year ending March 31, 1934, and each subsequent year a tax at the rate of one penny for each pound of the land value of every land unit. The Finance Act 1931 imposes on the Commissioners of Inland Revenue the duty of ascertaining the land value of every such land unit and indicates the method by which the valuation is to be made. For the purpose of the charge to the tax the land value is to be reduced either (*a*) by an amount equal to four times the annual value for income tax purposes or (*b*) by an amount equal to seven-eighths of the land value of the unit—whichever is the less.

Where any land unit comprises agricultural land a "cultivation" value is also to be ascertained and the amount by which the tax is reduced is either the amount of the cultivation value or the amount calculated as above which would be allowable if no cultivation value was shown, whichever is the greater.

Certain exemptions are granted in respect of land owned by the Crown, National Trust, railways, &c., and also, under certain conditions, land used as playing fields.

If the aggregate amount of tax payable in respect of all the land units owned by one person does not exceed ten shillings he is entitled to relief from the tax.

LAND TAX.—The quota payable by each Parish, as fixed in the year 1798 (less the amount redeemed), is raised by an equal pound rate, the rate of Assessment not to exceed 1*s.* in the £. Where the income of the owner of the land (when not a body of persons, corporate or incorporate) does not exceed £160 he is exempt from payment of land tax, and if the owner's income does not exceed £400 one-half of the tax is remitted, but he must claim this relief before payment of the tax.

*LEASES:—Lease or tack of any dwelling-house or part thereof for any definite term not exceed-

ing a year at a rent not exceeding £40 per annum, 1d.; for any definite term less than a year of any furnished dwelling-house or apartments where the rent for such term exceeds £25 5s.; of any lands, tenements, &c., at a yearly rent:—

Lease of any kind not specially charged 1 0 0

Agreement for lease not exceeding 35 years, same as actual lease.

* Section 15 of the Revenue Act, 1911, provides that in cases where the consideration or any part of the consideration consists of any money, stock, or security (other than rent), the amount or value of which does not exceed £500, and the instrument contains a certificate that the transaction does not form part of a larger transaction or of a series of transactions in respect of which the consideration other than rent exceeds £500, duty shall be charged at half the rates set out under the heading "Conveyance or Transfer on sale of any property," &c.

The Section, however, does not apply in any case where part of the consideration for any lease or tack consists of rent, and that rent exceeds £20 a year.

LEGACY AND SUCCESSION DUTIES:—*Also see "Estate Duty."*

If the deceased died on or after the 1st June, 1881, every pecuniary Legacy or Residue, or share of Residue, although not of the amount or value of £20, is chargeable.—Except in the cases of small estates, *see* note to Estate Duty.

No succession duty is payable where the principal value of all the successions on the same death does not amount to £100.

Rates of duties payable on legacies, annuities, and residues, and of Succession Duties where deceased died before 1st July, 1888, or where Estate Duty, Finance Act, 1894, is payable.

To Husband or Wife or Children of the Deceased, or their Descendants, or to the Father or Mother or other Lineal Ancestor of the Deceased (*see* above) £1 per cent

Exceptions.—Estates not exceeding £15,000.—Legacies and successions of less than £1,000 (£2,000 in the case of widow or child under the age of 21 of deceased), whatever may be value of whole estate.

To Brothers and Sisters of the Deceased, or their Descendants ..... £3 per cent.

GAME AND GUN LICENCES.

GAME AND GUN LICENCES.—A licence is required by every person who hunts, shoots, or takes game, except persons (in Great Britain) taking woodcock and snipe with nets or springes; proprietors, or tenants, on enclosed land, killing rabbits; persons hunting deer, or hares, with hounds; owners or occupiers, or their servants, killing deer on their own enclosed land; beaters and others, not holding guns, attending holders of game licences. Occupiers of enclosed land, or owners, having the right to kill game, may themselves kill hares, or authorise others to do so, without a licence, but such authority must be limited to one person at a time in any one parish, and must be registered with the clerk of the Justices of the Petty Sessional Division in which the land is situate. Even when the quarry is not what is legally known as "game," a "gun" licence is necessary. A game licence, however, covers a gun licence. Sailors, soldiers, airmen, territorial soldiers, or constables, *on duty or at practice*, need not take out a gun licence, nor need occupiers of land scaring birds or killing vermin on such land, or persons so acting under the orders of occupiers holding a licence. Unless, however, the occupier is himself licensed, he cannot authorise any unlicensed person to carry a gun. "Scaring" birds is not to be regarded as including killing of any birds, and "vermin" does not include rabbits. The rates of duty are as follows:—

	£	s.	d.
GAME LICENCES, if taken out after 31st July and before 1st Nov., to expire on 31st July following	3	0	0
After 31st July, to expire following 31st October	2	0	0
After 31st Oct., *to expire* 31st July	2	0	0
Licence for a continuous period of *fourteen days*	1	0	0
Gamekeeper's (Great Britain), to expire 31st July	2	0	0
Game-Dealer's Licence, to expire 1st July, annually	2	0	0
DEPUTATION or Appointment of a Gamekeeper	0	10	0
GUN LICENCES (gun, air gun or pistol)	0	10	0

A *Firearm Certificate* (5/- for the first, 2/6 subsequently—renewable every 3 years) is also necessary (with certain exceptions) for any person in possession of a firearm.

A person under 14 may not purchase or have in his possession any firearm other than a *smooth-bore* shot gun or air gun or air rifle.

STATE EXPENDITURE, 1930-31, 1931-32.

The expenditure of the various departments of the State is met from two main sources, (1) supply grants, (2) receipts appropriated in aid. Together these form the *gross* expenditure for the year, the *net* expenditure being the amount raised by taxation for the particular purpose. The Estimated Expenditure given below accounts only for the *net* expenditure, after taking credit for receipts appropriated in aid of expenditure.

THE CIVIL ESTIMATES.

The Debt to U.S.A.

The Debt Funding Commission fixed the total repayable at $4,604,128,085, of which $4,128,085 was to be repaid at once in cash and the balance funded at 3 per cent. for 10 years and 3½ per cent. thereafter, until redeemed by the operation of an accumulative sinking fund of ½ per cent. in 62 years. Interest is payable on June 15 and Dec. 15 in each year at the rate of 3½ per cent.

for the first 10 years, and 4 per cent. thereafter, to include the sinking fund. A "Table of Total Indebtedness of Foreign Governments to the U.S. Treasury, July 1, 1930" (p. 776 of Complete Edition) shows a "Funded Indebtedness" from Great Britain of $4,398,000,000 at that date, a decrease during the twelve months since July 1, 1929, of $28,000,000.

OTHER CAPITAL LIABILITIES.

These sums are not included in the capital on which interest is arranged for in the permanent charge. They consist of various loans contracted for Telegraph and Telephone extension, for the purchase of land for Government offices. &c. On March 31, 1931, these liabilities stood at £169,591,036, an increase of £42,418,947 upon the total for the previous year.

There are also sundry Contingent or Nominal Liabilities which the State is not likely to be called upon to any material extent to discharge. These liabilities consist of Unclaimed Dividends and unclaimed amounts due to suitors or to creditors of bankrupt estates.

Loans Guaranteed by British Government.—The Nominal Net Liability of the State in respect of loans guaranteed by the British Government was stated on March 31, 1931, to be as follows:—Turkish Loan, £1,497,504; Egyptian Loan, £3,994,400; Greek Loan, £2,615,600; Mauritius Loan, £27,149; Transvaal Loan, £15,229,698; Sudan Loan, £11,456,400; Welsh Church Loan, £2,017,191; Local Loans, £424,955,322; Irish Land Purchase Stock, £137,340,768; Ulster Savings Certificates, £1,443,867; 24½ per cent. of the Austrian Guaranteed Loan, secured on the gross receipts of Austrian Customs and Tobacco monopoly; Palestine Loan £4,449,626; and Tanganyika Loan £2,070,000.

Unrepaid Advances.—Against these Guaranteed Loans may be set the amounts remaining unpaid on March 31, 1931, on account of Advances made by Great Britain to various Governments, viz:—Crete, £40,000; Kenya and Uganda, £5,502,592; Uganda, £767,171; Nyasaland, £922,906; Persia, £245,000; Nauru and Ocean Islands, £717,296; Tanganyika, £3,031,709; Somaliland, £178,000; Northern Rhodesia, £103,000; Transjordan, £16,740; Swaziland, £75,500; Dominica, £16,000; Nigeria, £865,568; British Guiana, £50,000.

The Sinking Fund.

Reductions in the Debt by means of a sinking fund were first made in 1875 by Sir Stafford Northcote, who set up the *New Sinking Fund*, consisting of the balance of the Annual Charge after providing for interest and cost of management. That term was afterwards applied to the fund set up by Mr. Baldwin in 1923; but has again been transferred to the 1928 Fund. The *Old Sinking Fund*, was the application of the surplus revenue of any year for the redemption of debt when so determined by Parliament. Debt reduction is also made by means of *Terminable Annuities*, the capital value of which is deducted from the Debt upon the expiration of the term for which the annuities are payable, and by means of the following Funds:—

1. *Victory Bonds Sinking Fund*, by means of which Victory Bonds drawn for repayment on Sept. 1 of each year are discharged, £3,923,681.

2. *Funding Loan Sinking Fund*, £3,341,997 applied in cancellation of Debt in 1930–31.

3. *Conversion Loan Sinking Fund*, £15,692,131 applied in purchase and cancellation of £19,764,781 in 1930–31.

4. *4 per cent. Consols Sinking Fund*, under which £10,043,391 was applied in cancellation of £11,213,819 in 1930–31.

5. *Other Sinking Funds. Issues from the Consolidated Fund*, £14,766,985 applied in Debt reduction in 1930–31.

6. *Depreciation Fund*, under the Finance Act of 1917, by which sums are issued by the Exchequer and are applicable to the purchase for cancellation of 5 per cent. War Loan 1929–47 at a price below 95, and of 4 per cent. War Loan 1929–42 at a price below par. (£156,751,000 of 5% Stock and £21,929,500 of 4% Stock had been so purchased up to March 31, 1930; no purchases could be made in 1930–31.)

7. *Payments for Death Duties*, under Section 3 of the War Loan Act, 1919, amounting at March 31, 1931, to £13,021,557 cash and £117,302,511 securities.

National Debt Redemption Fund.

Very slowly the National Fund, established for the purpose of eventually redeeming the National Debt, grows from the voluntary gifts and interest on invested funds. The audited balance sheet, as at December 31, 1930, of the Fund (of which Messrs. Baring Brothers and Company, Ltd., 8, Bishopsgate, E.C. 2, are the Trustees) shows the following net additions during the year:—Donations £205 7*s.* 7*d.*, profit on investments realised £3,660 0*s.* 5*d.*, and income £41,838 8*s.* 11*d.* The amount of the Fund on the 31st December, 1930, was £620,465 5*s.* 6*d.* Under the provisions of Clause 30 of the Finance Act, 1928, the Fund is exempt from Income Tax. The Fund was constituted on November 10, 1927, with a gift of £499,878 4*s.* 11*d.*, and forty-seven persons added £12,705 8*s.* 11*d.* in the following year. There is also a further sum of £5,000 that will pass to the Fund at the conclusion of certain life interests. This National Fund has no connexion with the Government—it is a purely voluntary movement to lighten the debt burden of posterity, but not that of the present generation unless there is an undreamed-of accession of funds. It was the expressed hope of the original donor that his contribution should serve as the nucleus of a very large fund.

Estimated Assets.

Against the External Debt of £1,066,662,363 owing on March 31, 1931, may be set the amounts owing to Great Britain by certain of the British Dominions, and by various Countries in Europe. The amount owed to Great Britain far exceeds the External Debt, and the total Assets have a nominal value of £2,403,619,893.

The amounts remaining unpaid, and the estimated value of Investments made by the British Government in various Loans and Undertakings, were shown below (as on March 31, 1931, prior to the announcement of the *Hoover Plan*):—

THE HOOVER PLAN.

Payments due to Great Britain.

As from July 1, 1931, President Hoover suggested to all creditor nations a *moratorium* of 12 months in War Debt payments (capital and interest). On July 14, 1931, the Chancellor of the Exchequer (Mr. Snowden) circulated a written reply to a question asked in the House of Commons :—

I am circulating with the Official Report a detailed statement of the inter-Governmental payments due to his Majesty's Government in the year July 1, 1931, to June 30, 1932. It is not possible at this stage to give a statement of the debts which will actually be suspended, as this will depend on the acceptance of President Hoover's proposal by the other Governments concerned and the arrangements finally made to give effect to that proposal.

Inter-Governmental Debts due to the United Kingdom in the year July 1, 1931, to June 30, 1932 :—

Germany (Reparation)	£14,442,000

	£42,790,000

Payments due from Great Britain.

In proposing the revised Budget (Sept. 10, 1931) Mr. Snowden stated that the *Hoover Plan* reduced the Debt interest paid to the United States by £13,500,000 for this year and also the provision required for redemption of the Debt to the United States by £5,750,000.

* Not including £1,628,000 previously postponed in respect of the principal of the Australian Debt.

† South Africa has expressed the wish to make this payment as usual.

WIDOWS' AND ORPHANS' AND OLD AGE (Contributory) PENSIONS.

Under the *Widows', Orphans' and Old Age Contributory Pensions Act*, 1929, which came into force on January 2, 1930, pensions are provided for all widows over age 55 of men of the insurable class who died or attained age 70 before January 4, 1926, when the Widows' Orphan' and Old Age Contributory Pensions Act, 1925, came into force. The date of commencement of these pensions was July 1, 1930, in the case of those widows who were over 60 years of age on that date, and January 1, 1931, in the case of those then between the ages of 55 and 60. A further provision extended the time during which the "Pre-Act" widows' pensions awarded under the 1925 Act remain payable, while provision was also made to allow pensioners to continue to draw their pensions and insured persons to preserve their rights to pensions by becoming voluntary contributors after migration to the dominions. The remaining provisions of the new Act were mainly directed to amending the provisions of the 1925 Act in order to do away with certain restrictions affecting the award or payment of pensions.

The following table shows the number of persons who came under the Acts on October 1, 1931:—

GREAT WAR PENSIONS.

FRESH applications for compensation in respect of disablement claimed to be due to service in the Great War can no longer be entertained, since the period of seven years from the date on which the claimant's active service terminated, or the date fixed (August 31, 1921) as the end of the Great War, whichever is the earlier, has now expired in all cases.

While this is the statutory position, it has been made known by announcement in the House of Commons and elsewhere that exceptional cases, in which clear evidence is produced that an ex-service officer or man is suffering substantial incapacity caused by his war service in respect of which for good reason no claim was made within time, will be investigated with a view to the grant of appropriate compensation.

DISABLEMENT PENSION.

The disablement pension is at the outset generally a temporary award based on a Medical Board's assessment of disablement arising out of injury or disease attributable to or aggravated by war service. Such temporary award usually runs for a period of 12 months, and is from time to time reviewed until the case is ripe for consideration for a final award under the War Pensions Act, 1921 and the Regulations made thereunder. Under that authority a system of final awards has been brought into operation, the effect of which is to stabilise pensions, gradually to eliminate recurring medical examinations, and to bring about finality as to the amount of pension to be awarded. A man, on receiving notification that a final award has been made to him, has a right of appeal, subject to certain conditions, to an independent Assessment Appeal Tribunal, whose decision is final and binding on both the Ministry of Pensions and the appellant.

At March 31, 1931, out of some 485,000 pensions in payment to disabled officers and men, about 425,000 were final awards.

Disablement, for the purpose of pension, is assessed on a percentage scale. Total disablement is reckoned at 100 per cent., and the lowest degree entitling to pension is 20 per cent. Where the disablement is assessed at less than 100 per cent. the disablement pension and any allowances attached thereto are proportionately reduced. For instance, a private 50 per cent. disabled would receive 50 per cent. of the full rate of pension and 50 per cent. of the full rate of allowances for wife and children (if eligible).

Disablement assessed at less than 20 per cent. is compensated by a gratuity or a final weekly allowance paid over a definite number of weeks.

The Great War Pensions expenditure during the year ended March 31, 1931, amounted to about £51,875,000, and for the current year ending March 31, 1932, is estimated to amount to about £50,061,000. This will bring the aggregate expenditure of the Ministry of Pensions since 1917, and of the Service Departments from 1914 to 1917, together, to £1,016,000,000.

RATES OF PENSION.

The following are some of the principal rates of weekly pension for a private soldier 100 per cent. disabled, and of pensions or allowances for dependants of a private soldier :—

Private—40*s.*; wife's allowance 10*s.*: children's allowances—7*s.* 6*d.* for first child and 6*s.* for each other child; (if there is no wife, 10*s.* for the first, 7*s.* 6*d.* for the second, and 6*s.* for each other child).

Widow—over 40 or with children 26*s.* 8*d.*; under 40 and without children 20*s.*; allowances for children 10*s.*, 7*s.* 6*d.*, 6*s.*

Parents—need-pensions not exceeding 20*s.* Provision is also made for other dependants.

A totally disabled man who is certified to require constant attendance may receive an additional allowance not exceeding 20*s.* a week.

Treatment.

The Ministry of Pensions provide courses of treatment for disabilities accepted as attributable to or still aggravated by service, and if in consequence of and during a course of treatment a man is unable to provide for his own support and that of his family, treatment allowances may be granted in lieu of pension and allowances.

In the course of its fourteen years of work the Ministry of Pensions has spent on medical treatment and its accessories about £59,900,000, and another £36,320,000 in special allowances to the patients and their families, during the treatment, in addition to their ordinary pensions.

The Unemployment Insurance Act of 1920, which had the effect of increasing the number of state insured workpeople from about 4,000,000 to 12,000,000, imposed a statutory condition that a claimant for benefit should have paid in all not less than 12 contributions, and subsequent legislation raised the qualification to 30 contributions in the 2 years preceding the date of claim. This condition (known as the "first statutory condition") however, has in fact, at no time been operative, as a long succession of Acts have been introduced to postpone from time to time the date of its enforcement, and since the Act of 1927 only 8 contributions in the previous 2 years or 30 contributions at any time have been required in respect of "transitional" benefit, i.e., benefit paid when the main statutory condition has not been complied with.

When the Act of 1920 came into operation the Unemployment Fund had a credit balance of over £22,000,000, but after only 8 months had elapsed the reserve was exhausted and recourse to borrowing commenced. The cost of "transitional" (or "uncovenanted" benefit as it was known earlier) has left the Fund with a heavy and increasing deficiency, and Act after Act has been passed to raise the limit of the amount which might be advanced by the Treasury to meet the deficiency. The Act of March, 1930, was passed largely in the hope that by lifting the burden of "transitional" benefit from the Fund to the Exchequer, the Fund would in future be able to meet the ordinary benefits for an increasing number of claimants, but the increase in the number of unemployed continued at an unprecedented rate throughout the whole of the year 1930, until by Christmas, out of 12,400,000 workpeople insured against unemployment in Great Britain and Northern Ireland, there were 2,725,000 on the registers of employment exchanges (of whom about two-thirds were wholly unemployed and the remainder temporarily stopped or only in casual work). At that date about 1 person out of every 5 insured was unemployed, or double the corresponding ratio at the end of 1929. An analysis undertaken for the Royal Commission on Unemployment Insurance showed that of the total number of claimants for "transitional" benefit on January 31, 1931, nearly half of the men and more than half of the women had paid no contributions

* No benefits in respect of dependants were payable until November, 1921, when the Unemployed Workers' Dependants Act came into force providing for a weekly benefit of 5s. for an adult and 1s. for a child dependant.

† Young persons, aged 18 and under 21, who receive additional benefit for a dependant, receive the full adult rates, as well as the dependant's allowance.

‡ These represent only the principal changes made in rates of contribution and benefit.

in the preceding 12 months, and nearly three-quarters of both men and women had paid less than 8 contributions during the period. During the year 1930, the total contribution income to the Fund amounted to £45,248,000, while expenditure (including "transitional" benefit £16,725,000) amounted in all to nearly twice the contribution income. At the end of 1930 the Fund was in deficiency to the extent of £59,990,000, and it was still necessary to borrow heavily in 1931 for which purpose Acts were passed in March and July raising the borrowing limit to £90,000,000 and £115,000,000 respectively.

Apart from the changes in rates of contribution and benefit the National Economy Orders of October, 1931, embodied the following important changes in administration of the benefit:—Ordinary benefit is limited to 26 weeks in a benefit year (a reversion to the practice in force before the 1927 Act which removed this limit), after which the claimant, until qualified by further employment, would be entitled to "transitional" pay in respect of which all claimants were to be required to satisfy a needs test before a public assistance authority.

NOTE.—When the yield of wheat per acre differed from the average for the 30 years 1892-1921 by less than one-tenth of a bushel, the year has been noted as "Average." When the difference was between 0·1 and 0·5 bushel, the year has been noted as "*Slightly above* (or *below*) Average"; when between 0·5 and 1·5 bushels, as "Decidedly above Average" or "Deficient"; when between 1·5 and 2·5 bushels, as "Good" or "Bad"; when between 2·5 and 3·5 bushels, as "Very good" or "Very bad"; and when above 3·5 bushels, as "Extremely good" or "Extremely bad." * From April 1, 1923, the figures of Imports *includes* imports (if any) into Great Britain and Northern Ireland from the Irish Free State, but *exclude* the direct foreign trade of the Irish Free State.

Fisheries.

The quantities and values of the sea fish of British taking landed in Great Britain and Ireland in 1930 (exclusive of river salmon) are shown in the following table. The total catch was 36,000 tons more than in 1929, 27,000 tons more than in 1920 (previously the largest since the outbreak of the War) but 98,000 tons less than the record catch of 1913. Representing the 1913 catch by 100, the catches during 1925-30 were respectively 82, 81, 86, 85, 89, and 92. The total value in 1930 was £866,000 less than in the previous year.

In 1921 there was a stoppage of production for 88 days, ending in a settlement on June 28, 1921. In 1926 there was a stoppage of production from May 1 until Nov. 30.

Home Consumption of Coal.

In a normal year about 200,000,000 tons of coal are available for home consumption. Railway locomotives require about 14,000,000 tons; gas works 17,000,000 tons; coke production 17,000,000 tons, of which about half (with 1,500,000 tons of coal) is consumed by blast furnaces; colliery engines require about 17,000,000 tons, and coal miners receive about 6,000,000 tons; electrical generating stations require about 7,000,000 tons, and coasting ships require over 1,000,000 tons; in addition, about 40,000,000 tons are used for domestic heating and cooking, and over 70,000,000 tons for manufactures. In the six months (Jan.-June), 1931, steamers and motor vessels used 7,055,000 tons of coal and 100,752,000 gallons of oil fuel.

Iron Ore.

The production and importation of iron ore are as shown below. Values are not shown, as that of iron ore produced in Great Britain is taken at the place of production, while the value of imported ore is enhanced by transport and handling to the port of entry. The value of the iron ore produced in Great Britain in 1929 is stated at £3,650,000; that of the imported ore at £6,320,000.

Production of Pig Iron and Crude Steel.

The quantity of pig iron and steel ingots and castings made is shown below. In 1905 the quantity of coal used in the United Kingdom in the manufacture of pig iron was 19,255,555 tons; in 1927 the quantity was 1,100,000 tons of coal and 8,400,000 tons of coke. In 1905 there were 345 blast furnaces at work, and in 1929 they numbered 162.

Bankruptcy Statistics.

England and Wales (1929).

The number of debtors adjudicated bankrupt was 3,929, with liabilities £8,889,386, and assets £2,637,163; of compositions 29, with liabilities £115,098, and assets £22,016; of administration

orders for deceased debtors' estates 44, with liabilities £118,355, and assets £27,350. In addition, there were 1,971 assignments, compositions, &c., under deeds of arrangement, with liabilities £5,263,476, and assets £2,495,617.

Scotland (1929).

The number of sequestrations in Scotland was 216, with liabilities £790,681, and assets £99,137.

Northern Ireland (1929).

The bankruptcies numbered 37, with liabilities £38,976, and assets £8,551; deeds of arrangement 53, with liabilities £39,477, and assets £45,151; arrangements under the control of the Court 45, with liabilities £89,951, and assets £25,775.

Industrial and Provident Societies.

It is not generally known that associations for carrying on any industry, business or trade may be registered under the Industrial and Provident Societies Acts, and when so registered enjoy, among other advantages, the privileges of limited liability. In his report the Registrar of Friendly Societies who administers these Acts says:—

"A society, established to carry on any industry, business or trade may be registered under the Industrial and Provident Societies Acts, and obtain the privileges of incorporation with limited liability, provided that it restricts the interest which any member may have or claim in its shares to £200, and if it carries on the business of banking, that its share capital is not withdrawable."

At the end of 1929, 5,853 societies were registered; they had a total membership of 7,270,836; and their balance sheets showed total assets (omitting inter-society investments) valued at £221,868,000. The societies registered at the end of 1929 were classified by the Registrar as follows:—

Class of Society.	Number of Societies.	Share Capital.	Balance of Undistributed Surplus and Reserves.

As stated above most of the societies registered under the Industrial and Provident Societies Acts are co-operative. Additional and later figures for these will be found in the *Complete Edition* under the head of "Co-operation." (*See* Index.)

Savings Banks.

Post Office Savings Banks.—On Dec. 31, 1930, there were approximately 10,000,000 active deposit accounts in the *Post Office Savings Banks*, with the sum of £290,235,317 due to depositors. On Dec. 31, 1930, Government Stock to the amount of £188,472,183 stood to the credit of holders in the books of the Post Office Savings Banks. Any sum from one shilling to £500 may be deposited, and interest is allowed at 2½ per centum per annum. There is no limit to the amount which may stand to a depositor's credit, but not more than £500 may be deposited in the course of one year.

Trustee Savings Banks.—On Nov. 20, 1930, there were 2,345,379 active accounts in the Trustee Savings Banks. The total assets of the Banks amounted to £178,672,619, which included £133,196,735 due to depositors in the Ordinary and Special Investment Departments, £39,321,750 Stocks and Bonds held for depositors and £6,154,134 representing the accumulated surplus of the individual Trustee Savings Banks throughout the country. Information about these Banks and their offices, numbering 494 (principal and subordinate) in November, 1930, can be obtained from the *Trustee Savings Banks Association*, 10 Gray's Inn Square, W.C.1. EXTERNAL TRADE (GREAT BRITAIN AND NORTHERN IRELAND).

IN statistics of Trade, the term GENERAL TRADE refers to the whole volume of Imports (including such as are temporarily detained and afterwards exported), and to the whole volume of Exports. The term SPECIAL TRADE includes only *Imports for consumption* in the country receiving them, and *Exports of home produce or manufacture*. Imports are taken at their C.I.F. value (which includes the *Cost* of the merchandise and the charges for *Insurance* and *Freight*), whereas Exports are taken at their F.O.B. (*free on* board) value, which includes only the *Cost* of the merchandise delivered to the exporting ship. Exports have an added value by the time they reach their destination, having become loaded *en route* with Insurance and Freight. They leave the country of origin with an F.O.B. value and arrive with an acquired C.I.F. value.

Postal Traffic.

Average Daily Receipts, 1927-1930.

The following table (*Board of Trade Journal*) gives the average receipts of the Post Office in Great Britain from postal traffic, per working day, for each month from January, 1926. Telegraph and Telephone receipts, Savings Bank, and Money and Postal Order business are excluded. The value of postage stamps used for receipt stamp and other revenue duties is included. The figures are an approximately correct index of the movement from month to month of the amount of postal traffic handled, expressed in terms of postage, and may be regarded as a reflection of the state of the country's trade.

COMMUNICATIONS.

Roads.

The total mileage of public roads in Great Britain is approximately 177,000 miles, of which 152,000 are in *England and Wales* and 25,000 in *Scotland*. The cost of maintenance and improvement in 1914–15 was £18,800,000, and in 1928–29 £57,342,643. The roads of Great Britain have been classified by the Ministry of Transport, and out of the total mileage of 177,000, 26,400 (approximately) have been included in Class I, and 15,900 (approximately) miles in Class II.

The maintenance and repairs of public roads is within the jurisdiction of the "highway authorities." Under the Local Government Act, 1929, county councils in England and Wales as from the appointed day (April 1, 1930), became the highway authorities for all roads in rural districts and all classified roads (*i.e.* Class I and Class II Roads) outside the county and metropolitan boroughs, together with the main roads, for which the county councils were already the highway authorities prior to the appointed day. These roads are known as "county roads" and are now a county charge, although district councils in many cases continue to carry out the actual work of maintenance and improvement. The borough and urban councils are the highway authorities for roads other than county roads which lie within their areas. In Scotland under the Local Government (Scotland) Act, 1929, the county councils are the highway authorities in respect of all roads outside the boroughs, and in respect of all classified roads in boroughs with a population of less than 20,000 except the borough of Arbroath. All boroughs remain highway authorities in respect of their unclassified roads. The Act provides that the functions of the County Council in regard to highways may be partially exercised by Committees or by the Town Councils of small boroughs in accordance with an administrative scheme submitted by the County Council to and approved by the Secretary of State for Scotland. The motor licence duties (referred to below) are paid into a *Road Fund* which is administered by the Minister of Transport. Grants are made from the Road Fund to highway authorities towards the cost of maintenance and improvement of roads and bridges. During the year 1930-31 the grants from the Road Fund amounted to £27,372,123. The bulk of this money was directed to assisting highway authorities in the maintenance and improvement of classified roads and bridges. Under the Local Government Act, 1929, the grants hitherto made out of the Road Fund towards the maintenance of classified roads in London and the county boroughs and of unclassified roads in counties have been discontinued as from April 1, 1930, and a sum corresponding to these amounts, together with an additional contribution, is paid out of the Road Fund towards the block grants to local authorities for which the Act provides.

The total gross receipts from the taxation of road vehicles between December 1, 1929, and November 30, 1930, amounted to £27,040,384. The approximate number of motor vehicles licensed during this period was 2,260,500, while licences in respect of private and hackney horse-drawn carriages numbered 53,015. The average receipt in respect of a whole year licence was £13 18*s.* 6*d.* for cars taxed on horse-power, £2 15*s.* 6*d.* for motor bicycles, £26 5*s.* 6*d.* for internal combustion and steam-driven goods vehicles, £20 16*s.* 0*d.* for electric goods vehicles and £47 11*s.* 0*d.* for motor hackneys.

London and Paris.

In 1930 there were 1,415 deaths from street accidents in London, an increase of 32 on the total for 1929. In 1930 there were 303 deaths from street accidents in Paris.

Railways.

The length of road (first track) of the railways owned, leased or worked by the Companies formed under Part I. of the Railways Act, 1921, at Dec. 31, 1930, was as under :—

Southern	miles	2,194

Railways in 1930.

The gross receipts during 1930 from railway working amounted to £184,836,382, compared with £195,409,523 in 1929, a decrease of £10,573,141. The principal figures were :—

	Receipts for 1930.	Decrease on 1929.
	£	£
Ordinary passengers—		
third class	46,437,913	2,581,434
Merchandise	46,829,972	3,631,342
Minerals	15,280,435	1,573,804
Coal, coke, and patent fuel	35,592,316	1,950,526

Expenditure on railway working decreased from £151,311,466 in 1929 to £147,595,684 in 1930, a saving of £3,715,782. The operating ratio rose to 79·85 per cent. in 1930, compared with 77·43 per cent. in 1929.

The total net receipts of the railway and ancillary businesses in 1930 were £38,044,598, compared with £45,071,208 in 1929, a decrease of £7,026,610. The decrease occurred mainly in net receipts from railway working, which fell from £44,098,057 in 1929 to £37,240,698 in 1930. The net revenue for the year 1930 amounted to £42,007,256, which compares with £49,321,739 in 1929. The amount appropriated for the payment of interest and dividends in 1930 was £43,749,671, compared with £48,355,050 in 1929. These figures represent 3·68 per cent. and 4·13 per cent. respectively upon the total capital receipts.

The total number of ordinary and workmen's journeys was 1,217,285,700, a decrease of 18,926,832, or 1·53 per cent., compared with 1929. The total number of season tickets (equated to an annual basis) was 779,031, a decrease of 1,871. The total number of passenger journeys, including season ticket holders on the basis of 600 journeys per annual ticket, was thus 1,684,704,300, a decrease of 20,049,432, or 1·18 per cent., compared with 1929. Receipts from passengers decreased by £3,225,370, or 4·67 per cent., the higher ratio of decrease being attributable to the extended use of cheap fares.

The total tonnage of goods and minerals (excluding companies' free-hauled traffic) conveyed on all railways was 304,361,107 tons, compared with 329,578,743 tons in 1929, made up as follows :—

Description.	1930.	Decrease.
	Tons.	Tons.
Merchandise	53,225,830	4,349,414
Minerals and Merchandise	57,846,551	7,026,839
Coal, coke, and patent fuel	193,288,726	13,841,383
Total	304,361,107	25,217,636

The total number of live stock conveyed was 16,116,580, compared with 17,700,802 in 1929.

The passenger and goods road vehicles operated by the four amalgamated railway companies showed substantial increases in traffic in 1930 compared with 1929.

Canals.

There are 3,825 miles of canals and canalised rivers in Great Britain (England and Wales, 3,641 miles ; Scotland, 184 miles), no additions to the mileage having been made for several years. In 1930 the inland waterways carried tonnage (so far as returns are available) as under :—

	Mileage of Canals.	Tonnage carried.
Independent	1,234	11,419,861
Railway owned	1,048	1,693,905
Thames	126	22,897
Caledonian and Crinan	70	99,121
Total	2,478	13,235,784

A Royal Commission on Transport reported in 1930 that, in spite of their limitations, canals and inland navigations form a useful component of the national scheme of transport, and that properly rationalised and developed they can be made to render much useful service to the community in the future. The *Manchester Ship Canal*, opened in 1894, has a total length of 36 miles, and connects Manchester with the Mersey port of Liverpool ; in 1929 the tonnage carried through the canal was 6,588,559 tons, and in 1930 the tonnage of toll-paying traffic was 6,290,625 tons, and the tolls, dues, &c., £1,395,567.

Tramways.

The total mileage of tramways and light railways open in Great Britain on Dec. 31, 1929, was 2,323. The total receipts in 1929 were £26,769,000, the working expenses £21,156,000, and the net receipts £5,613,000, the total paid-up capital being £107,394,000 (*gross*) and £56,026,000 (*net*). 4,613,527,000 passengers were carried.

Under the *London Passenger Transport Bill* promoted in 1931 by the Minister of Transport (Rt. Hon. Herbert Morrison) it was proposed to transfer the tramway systems in the London metropolitan area to a *London Passenger Transport Board* which would have been given control of all passenger transport undertakings and interests in the London Traffic Area. The Bill was held over at the Dissolution of Parliament.

Posts, Telegraphs and Telephones.

The carriage and custody of the mails has been maintained by the State "from time immemorial." The telegraphs were transferred to the State on Jan. 28, 1870 ; the telephone service became exclusively owned and operated by the Government (with one or two minor exceptions) on the transfer of the National Telephone Company's undertaking to the Post Office on Jan. 1, 1912. The submarine telegraph cables connecting the British Isles with the various Dominions and most Foreign Countries except the Continent of Europe are maintained and operated by private companies. The submarine telephone cables from the British Isles to the Continent are either owned entirely by the State or jointly with the Foreign Administration in whose territory the other end of the cable terminates.

GENERAL REGULATIONS.

UNPAID PACKETS (*letters*, *newspapers*, *postcards*) are charged *double postage* on delivery; UNDERPAID PACKETS, *double the deficiency*.

REDIRECTION.—(1) By agent of addressee: *Letters*, *post cards*, *printed papers*, *and newspapers* may be reposted free not later than the day after delivery (not counting Sundays and public holidays), and must not have been opened or tampered with. *Parcels* may be redirected free of charge, within the same time limits, if the original and the corrected addresses are both within the same Town Delivery Area (the whole London Postal District being for this purpose one Town Delivery Area); otherwise they are charged at the ordinary prepaid rate. *Registered packets*, which must be taken to a Post Office, are re-*registered* free only up to day after delivery: (2) By the Post Office (not undertaken during temporary absence, unless house be left empty, or from clubs, hotels, &c.). Requests for re-direction of *letters*, &c., must be on printed forms, obtainable from the postmaster or postman, and signed by the persons to whom the letters are to be addressed. Re-direction is free for 12 months; thereafter costs 1*s*. for each surname for second, 1*s*. third, and 5*s*. each subsequent year. Separate forms must be filled in for *parcels*, and for the (postal) forwarding of *telegrams*.

REGISTRATION.—All kinds of postal packets intended for registration must be marked "Registered" in bottom left-hand corner, and *must be handed to an officer of the Post Office, and a receipt taken*. Parcels (or the string with which they are tied) and letters, must be fastened with wax or other adhesive. Fee 3*d*. exclusive of postage. Advice of delivery, a further 3*d*. The latest time for registering is usually half an hour before the latest time for posting ordinary packets; at Head Offices, if open, this may be done later for 6*d*. late fee. Unregistered packets containing coin or jewellery, or found open and containing stamps, uncrossed bearer cheques, uncrossed postal orders without payee's name, &c., 10*s*. or more in value, or any marked "registered" and found in a letter-box, undergo compulsory registration (3*d*.), carrying no compensation.

COMPENSATION for loss or damage is granted, though not as a legal right even if fee is paid and packing adequate.—The fees for *compensation inclusive of registration* are:—Fee 3*d*., compensation up to £5; 4*d*., £20; and 1*d*. for each additional £20 up to the maximum 1*s*. 11*d*. for £400. *Compensation* up to £2 is given on (*a*) *unregistered parcels* (for loss, only of certificate of posting is obtained at the time of posting), (*b*) *unregistered packets* conveyed by Express Delivery Service No. (1). Compensation in respect of *money* of any kind (*coin*, *notes*, *orders*, *cheques*, *stamps*, *&c.*) is only given if particulars (for identification) are kept and the money is sent by Registered *Letter* Post in one of the special envelopes sold officially (*see* next page); the maximum compensation for *coin* is £5. Compensation for *jewellery*, *watches*, *&c.*, is only given on *registered* packets; for *glass*, *crockery*, *greases*, *colour-powders*, *fish*, *meat*, *fruit*, *and vegetables* only when sent as *parcels*. Compensation is not given for *damage* to (1) eggs, soft fruit, liquids and semi-liquids or exceptionally fragile articles, in any case; (2) fragile articles by registered *letter* post, unless conspicuously marked "*Fragile, with care*."

CERTIFICATE OF POSTING unregistered parcels, free; other unregistered postal packets, ½*d*.

EXPRESS DELIVERY SERVICE BY SPECIAL MESSENGER.—There are five services of which (4) and (5) alone are available on Sundays:—(1) All the way, from most offices which deliver telegrams. Inclusive charge, *which must be prepaid*, in stamps, 6*d*. per mile, or part of a mile, with 1*d*. on each *separate* packet after the first, up to ten, the maximum; also a special charge of 3*d*. on each packet over 1 lb. in weight. Packets must be handed over the counter with "Express" clearly marked in left-hand top corner. Live animals, liquids, and money may be delivered by this service, and persons may be conducted. The messenger may take back an inland telegram *gratis*. (2) After transmission by post, at sender's request: (*a*) from the ordinary delivery office, if open for telegraph business (maximum charge in London 6*d*.); or *if so marked*, (*b*) "Express Delivery from Head Office" in large provincial towns, and (*c*) in London "from Head District Office" or "from G.P.O." Packets must be marked "Express," and letters bear a broad vertical line back and front. Charges as for (1) (without weight fee) in addition to postage. (3) Before ordinary deliveries, at addressee's request (6*d*. per mile for one packet, and 1*d*. for every ten or less additional packets). (4) *see* p. 590. (5) Of a message telephoned to an express delivery office (30 words for each express fee, besides telephone charges).—Waiting fees: 10 minutes free; each additional 15 minutes or part thereof, 2*d*.—For Sundays and Holidays, *see* pp. 590-1, and next paragraph.

RAILWAY LETTERS.—An unregistered letter up to 2 oz., taken to a Parcel or Booking Office of most railways while station is open, week days *or Sundays*, is sent off by next train or steamer to a station or port on any of these railways. Fee within Gt. Britain, or thence to Jersey, Guernsey, Douglas (I.M.), or chief Irish ports, 3*d*., to other Irish places 4*d*. Unless marked "to be

called for," it is posted in the nearest letter-box at station of address, but *(except on Sundays and in I.F.S.)* can be delivered Express (from usual office, or first Express office it reaches) under Service 2a, or (by wiring for messenger to meet it at station) under Service 1.

DISPOSAL OF UNDELIVERED POSTAL PACKETS.—*Inland packets chargeable with a postage of 1½d. or more*, undelivered, are returned to sender without charge, if his address is found either outside or inside. Packets without sender's address or any enclosure of importance are destroyed, except parcels which, if not applied for, are generally disposed of after 3 months, or if perishable are dealt with as requisite. *Packets chargeable with postage not exceeding 1d.* are redelivered to sender only on payment of a second postage, and if name, address and request for return appear on outside; those without such request are disposed of. *British packets undelivered abroad* are returned to sender here on payment of charges due; printed papers only if return is requested. Magazine Post packets are charged with return postage. For *parcels see* p. 585.

POSTE RESTANTE (solely for the accommodation of strangers and travellers and for three months only).—Any postal packet may be addressed as a rule to any Post Office except Town Sub-Offices. It should have the words "Poste Restante" or "to be called for" in the address. If addressed to initials, fictitious names, or Christian name only, it is treated as undelivered. Applicants must furnish sufficient particulars to ensure delivery to the proper owner. Redirection from a Poste Restante is not undertaken for more than 14 days unless longer (up to 3 months) is applied for. Letters, parcels, &c., from abroad, or letters at a seaport for an expected ship, are kept 2 months; others, 2 weeks; after which they are treated as undelivered *(see* above), unless bearing a request for return at end of the interval, or some specified *shorter* period.

Letter Post (see p. 582).

Among prohibitions are offensive or dangerous things, certain kinds of advertisement, eggs, fish, game, meat, fruit, vegetables, and (to I.F.S., I. of Man, Channel Is.) dutiable articles.

Post Cards.

Postage *(see* p. 582). The left-hand half of the address side may be used for correspondence [the same holds for abroad]. Plain cards (minimum size 4 × 2¾ in.), not thinner than official cards, may also be used both inland and abroad (maximum size 5⅞ × 4⅛).

Printed Papers Post (see p. 582).

For printed or written matter not in the nature of a letter, and not exceeding 2 lb.

By this post may be sent books and other works of a literary character, with or without written dedications, and any other *written* or *printed* matter not being *in the nature of a letter* or, e.g., personal news, drawings, paintings, photographic prints, engravings, maps, &c., together with their binding (provided that the materials are those ordinarily used for the purpose and are not brittle or very fragile), and with anything necessary for safe transmission. Commercial printed forms, legal documents, printers' copy and proofs, examination papers, answers and corrections, the writing on which refers solely to the subject matter of the document, Christmas and picture cards with date, names and addresses of sender and addressee, and with conventional formulas not exceeding 5 words or initials, are also admitted. (For full conditions see the official Guide.) Printed papers being subject to examination in the post, the cover, if any, must be capable of easy removal and replacement for purposes of examination, *i.e.*, without breaking, tearing, ungumming, or cutting.

Newspaper Post (see p. 582).

For newspapers "registered at the G.P.O."

The cover, if any, must be open at both ends and easily removable, and copies should be folded so that title is readily inspected. No writing or additional printing is permitted, other than the words "with compliments," name and address of sender, request for return if undelivered, and a reference to a page. Newspapers not registered at G.P.O., or supplements apart from their ordinary publications, may be charged at printed paper, letter, or (with 1d. fine) parcel rate.

Parcel Post.

For bulky and heavy matter *(see* p. 582). The parcel should be marked "Parcel Post." and handed across the counter or given to a rural postman; and the postage must be prepaid by stamps, affixed by the sender (if underpaid, deficiency plus 1d. fine is collected from addressee). Parcels are neither accepted nor delivered on Sundays. The name and address of sender should be inside or (not too prominent) on the outside of every parcel.

A rural postman must accept any inland packets he can conveniently carry, but if on foot or cycle not more, without notice, than 11 lb. from one person.

Parcels to or from Irish Free State, Channel Is. or I. of Man are liable to customs duty; except in last case, the sender must declare contents when posting, and addressee must pay fees as for Parcels from Abroad (p. 585) if any duty be payable. Addressees in I.F.S. pay 6d. anyhow, on dutiable parcels 3s. or more, unless sender arranges (fee 6d.) to pay duty.

Cash on Delivery Service (not to or from I.F.S.).

A sum (Trade Charge) up to £40 can, under certain conditions, be collected from addressee and remitted to sender of a parcel or registered letter posted at a Money Order Office, or a parcel consigned by railway. Fees (extra to usual postal or rail charges): For Trade Charge up to 10s., 4d.; up to £1, 6d.; £2, 8d.; £5, 10d.; and for each further £5 or less, 2d.; by rail, 3d. more.

Literature for the Blind.

Papers, periodicals and books, if printed in special type and subject to certain conditions of posting, marked outside "Blind Literature," with name and address of sender; 2 lb., ½d.; 5 lb., 1d.; 6½ lb. (maximum), 1½d. Maximum size, 2 × 1 × 1 ft., or if a roll 30 × 4 in.

STAMPS, ENVELOPES, POST CARDS, &c.

POSTAGE STAMPS (used also for receipts, telegrams, and certain Inland Revenue duties up to 2s. 6d.—*for list of latter see* Index) are sold of the respective values of ½d., 1d., 1½d., 2d., 2½d., 3d., 4d., 5d., 6d., 9d., 10d., 1s., 2s. 6d., 5s., and 10s. Books of 6 1d., and 6 ½d. stamps, together with (*a*) 18 1½d. stamps, 3s., or (*b*) 10 1½d. stamps, 2s. Rolls of 480 or 960 ½d., 1d., 1½d. and 2d. stamps are also sold, joined lengthwise or sideways. Stamps may be purchased at most offices between 9 a.m. and 7 p.m., and at any office open for telegraph business. Rural postmen carry ½d., 1d., and 1½d. stamps and registered letter envelopes.

REGISTERED LETTER ENVELOPES for foreign and inland letters, with a 4½d. embossed stamp (for registration and postage), are of four sizes: **F**, 5¼ in. × 3¾ in., 5d. each; **G**, 6⅛ in. × 3¾ in., **H**, 8 in. × 5 in., or **H2**, 9 in. × 4 in., 5½d. each; **K**, 11½ in. × 6 in., 6½d. each.

LETTER CARDS with 1½d. stamp: one, 2d.; 2, 3¼d.; 5, 9d.

POST CARDS with impressed 1d. stamp: *Inland* Single: thin—one, 1¼d.; 2, 2¼d.; 5, 5½d.; 11, 1s.; stout—one, 1¼d.; 5, 6d.; 10, 1s.; reply—one, 2¼d.; 4, 8¾d.; 11, 2s.; *Foreign* (1½d. stamp): Single—one, 1¾d., 2, 3¼d., 5, 8d.; reply—one, 3¼d.; 5, 1s. 4d.; 10, 2s. 8d.

EMBOSSED ENVELOPES (*a*) with 1½d. stamp; "A" (4¾ × 3⅛ in.)—1, 1¾d.; 3, 5d.; 5, 8½d.; 11, 1s. 6d.; "Commercial" (5⅛ in. × 3½ in.)—1, 1¾d.; 2, 3¼d.; 5, 8d.; (*b*) with ½d. stamp, ungummed "Commercial" size ("N"): 1, ¾d.; 2, 1¼d.; 5, 3d.

NEWSPAPER WRAPPERS with ½d. stamp: 1, ¾d.; 2, 1¼d.; 3, 1¾d.; 7, 4d.; with 1d. stamp: 1, 1¼d.; 2, 2¼d.; 5, 5½d.; 8, 8¾d.; 11, 1s

Embossed or impressed postage stamps of the present reign, cut out of envelopes, post-cards, letter-cards, newspaper-wrappers, or telegram forms, may be used as adhesive stamps in payment of postage or telegrams respectively, provided they are not imperfect, mutilated, or defaced in any way.

LONDON POSTAL ARRANGEMENTS

London is divided for postal (not telegraphic) delivery purposes into 10 Districts, and these into 118 numbered Sub-districts. To avoid delay in delivery, correct initials and number should appear in addresses. The "Head District" of each District is (Sub-district) 1 (but of Paddington District is W. 2), and address of its Head Office ("District Office") appears on p. 232.

IMPERIAL AND FOREIGN POST.

N.B.—For times of despatch *see* above.

Letters.

The letter rate *from* Great Britain to British Dominions and Mandates generally (except Iraq and Transjordan), to countries outside the Postal Union† (exc. Government of Lattakia), to Egypt, Tangier, French India, and Dubai, to the United States and Territories (incl. Hawaii but not Panama zone or island Dependencies), as well as to H.M. Forces in China, and H.M. Ships outside Home Waters (address c/o G.P.O., London, E.C. 1), is 1½*d.* the first ounce and 1*d.* for each succeeding ounce or fraction. The charge to *all other destinations* is 2½*d.* the first ounce and 1½*d.* per ounce afterwards. Limits of size: to *Foreign* Countries in the Postal Union,† except Egypt, 1½ × 1½ × 1½ ft.; elsewhere, 2 × 1½ × 1½ ft.; but if in form of a roll, limits in all cases 30 in. × 4 in. in diameter. Max. weight 4 lb.

Post Cards.

Postage 1½*d.* single, 3*d.* reply. (*See also* p. 582.)

Reply Post-Cards must have the heading "Carte Postale avec réponse payée," on first half, and on the second half (valid only to country of origin) "Carte Postale-réponse."

Reply Coupons.

For the purpose of prepaying replies to letters, the larger offices sell coupons exchangeable abroad for stamps representing a minimum foreign or imperial letter-postage. Price: valid within the Postal Union, 4*d.*; valid within British Empire only, 2½*d.*

Books, Newspapers, Samples, &c.

(*a*) PRINTED PAPERS: Newspapers, Books, Catalogues, Photographs, Engravings, Music, and other wholly printed matter, ½*d.* per 2 oz. For *Literature for the Blind*, in other respects considered as a Printed Paper, rates abroad are: ½*d.* for each 2 lb. up to 8 lb., 11 lb. (max.), 2½*d.*

(*b*) MAGAZINE POST (for magazines, newspapers and trade journals duly registered for such post or for Newspaper Post within the United Kingdom). These packets, which cannot be registered,

* Except Saturday night-Sunday morning.

† Friendly Is. (Tonga), Muscat, Pitcairn I., Government of Lattakia (Syria), are not in the Postal Union.

s Hour for late-fee posting Sun. nt.—Mon. mrn. (p. 590).

must be sent to CANADA *by direct packet*, and thence (or direct) to NEWFOUNDLAND, be packed without a cover, or with cover open at both ends, and otherwise comply with conditions for Inland Newspaper Post (*see* p. 583). Rate : 2-6 oz., 1*d.* ; 1½ lb., 1½*d.* ; and ½*d.* per ½ lb. up to 5 lb., 5*d.*

(*c*) COMMERCIAL PAPERS : Legal and mercantile documents, MSS., invoices, &c., partly written, ½*d.* per 2 oz. ; minimum charge of 2½*d.*

(*d*) SAMPLES, Patterns (*bonâ fide*), and Scientific Specimens, one key, fresh-cut flowers, &c., ½*d.* per 2 oz. ; minimum charge, 1*d.*

(*e*) SMALL PACKETS, for small articles of merchandise to many countries : 1½*d.* per 2 oz., minimum 6*d.*

Except that a single printed volume may weigh up to 6½ lb., the limits are : (i) to the British Empire, Tangiers, and Foreign countries not in the Postal Union (see note † p. 584) : Size, (*a*), (*b*) and (*c*) 24 × 18 × 18 in., (*d*) 24 × 12 × 12 in. ; weight, 5 lb. (ii) Egypt and Sudan : (*a*) and (*c*), 18×18×18 in. ; weight, 4 lb., (*d*) 24×12×12 in. ; weight, 5 lb. (iii) Elsewhere : Size, (*a*) and (*c*) 18×18×18 in., (*d*) 18×8×4 in. ; weight, (*a*) and (*c*) 4 lb., (*d*) 1 lb. (*iv*) (*e*) to all places, 18×8×4 in., 2 lb. If in the form of a roll, the limits of size for (*d*) are 18 × 6 in. diameter in case (iii), for (*a*) and (*c*) 30 × 4 in., (*e*) 18 × 6 in. everywhere. Wholly unpaid packets are *stopped*. Regulations as to packing, writing, &c., are much similar to those for inland packets. Small Packets must be easily examinable.

Parcels from abroad.

These are subject to British Customs examination, and duties (with 6*d.* fee, or 1*s.* if they exceed 10*s.*) must be paid before delivery.

Parcels sent abroad.

Enquiries should always be made at a P.O., or the P.O. Guide consulted, before packing. Parcels can be (and if containing coin, jewellery, &c., *must* be) *insured* for many countries, but not registered. They are subject to *Customs*, and contents and value must be declared on special forms ; undervaluation or other inaccuracy may lead to confiscation and heavy fines (especially U.S.A.). (Rebate of Customs is given to British goods in parts of the Empire.) The Customs charges of Dominions and certain countries (not U.S.A.) can be prepaid by sender, on depositing generally one-fifth to one-half of declared value, otherwise they are collected from addressee. *Packing must be substantial*, and sometimes special kinds of packing are insisted upon. Certain articles are *prohibited* ; among them letters nearly everywhere.

Delivery in many countries is only to certain towns, post offices, stations, or customs houses, whence addressee, who is notified of the arrival, must arrange conveyance. A delivery fee is sometimes collected from addressee (5 cents in U.S.A.). In Belgium, France, and Spain parcels are mostly delivered by the railway companies. From most countries abroad, an *undeliverable parcel is returned without notice at sender's expense, unless, when posting,* he instructed *either its abandonment* or its delivery to some other address or person in the country. Warehousing fees and (rarely) the foreign customs duty are sometimes payable, the return postage always.

Limits :—22 lb. ; parcels over 11 lb. are only accepted at and for important post offices, for certain countries (*e, f*, in table below), cannot be delivered Express, and generally may not contain coin, jewellery, &c. Maximum length generally 3½ ft., length and girth combined 6 ft. ; but to *Portuguese Timor* : length 2 ft., length and girth 4 ft. ; also to *China* (other than about 1100 chief P.O.), but a parcel 8 in. across may be 29 in. long, except to Sinkiang Province, where limits are 1 × 1 × 1 ft.

Imperial and Foreign Parcel Rates.
(With Route, Minimum Duration, and Frequency of Mails.)

Parcels for H.M. Ships addressed "in Foreign Waters, c/o G.P.O., London" :—(i) in Atlantic Fleet (when this appears in address) may be prepaid at inland rate, but are then liable to delay ; (ii) in other cases, must be prepaid at following rates : *b* 1/3, *c* 2/6, *d* 3 3, *e* 6/–.

General Regulations: Postage Abroad.

DUTIABLE ARTICLES, except to some countries, must be sent as Parcels, Insured Boxes, or Small Packets.

REGISTRATION (except for parcels and magazine post) is in force to almost all countries; valuable articles may not be sent in unregistered letters. Fee, 3*d.* Compensation on registered packets up to £2 is paid for entire avoidable loss while in the custody of a country in the Postal Union (*see* note † *p.* 584), if claimed within a year.

INSURANCE (including, except for parcels, REGISTRATION) may be effected on packets to many countries at the following rates:—5*d.* for £12; and 2*d.* for every additional £12 up to 5*s.* 11*d.* for £400. COMPENSATION up to 20*s.* (32*s.* if over 11 lb.) may be given on *uninsured* parcels to or from Newfoundland, India and the smaller colonies, Egypt, with many larger foreign countries, except U.S.A., if certificate of posting is produced. Packets containing no articles but valuable papers (banknotes, etc.) or valuable documents (plans, etc.) can be insured as *letters*; other valuable articles should be sent as insured parcels, or as "insured boxes."

INSURED BOX POST.—Jewellery and similar articles (*not* letters, valuable paper, or commercial papers except an open invoice) may be sent in strong boxes by letter mails to some British dominions (*e.g.*, India and New Zealand), Europe (except Norway, Spain and Near East), Argentine, Brazil, China, Egypt (not Sudan), many French colonies, and a few other countries. Postage 2*d.* per 2 oz. (minimum 10*d.*); maximum weight 2 lb.; size 12×8×4 in. Customs declarations must be filled in.

CASH ON DELIVERY (Parcels).—A reciprocal service exists between Great Britain and various parts of the Empire and certain Foreign Countries. Fees for collection: 4½*d.* for Trade Charge (amount to be collected) not exceeding £1, with 2½*d.* extra for each additional £1 of Trade Charge up to the maximum, which is usually £40 (fee 8*s.* 6*d.*), but in some countries less (*e.g.*, 1,000 francs). Addressee has generally also to pay on delivery, besides Customs, if any, a further fee (4*d.* in U.K.) not prepayable. If Trade Charge cannot be collected, the rules for undeliverable parcels apply.

INTERNATIONAL EXPRESS SERVICE.—Delivery by special messenger of correspondence (locally including parcels up to 11 lb.) to or from certain countries or certain towns in the same. 6*d.* is paid by the sender, the rest by addressee.

MONEY ORDERS.

ADVICE OF PAYMENT: 2*d.* inland (and to I.F.S.), 3*d.* for foreign and colonial orders (to certain countries). Payment may be stopped (fee 4*d.*); or deferred up to 10 days in case of Ordinary Inland Money Orders.

Inland (and I.F.S.) Ordinary Money Orders.

The poundage charged is, for sums not exceeding £3, 4*d.*; £10, 6*d.*; £20, 8*d.*; £30, 10*d.*; £40 (maximum), 1*s.* No order may contain a fractional part of 1*d.* The rules and regulations are on the forms issued. No poundage is charged for M.O. in payment of many Revenues (including Income Tax) if authorising document is produced.

Inland Telegraph Money Orders.

Money may be transmitted by Telegraph Money Order from any Money Order office which also despatches telegrams, and may be made payable at any Money Order office which also delivers telegrams, and at some other offices.

Poundage at the same rate as for Ordinary Inland Money Orders, *plus* supplementary fee of 2*d.*, and cost of official Telegram of Advice. If the order is to be delivered at payee's address, porterage must be prepaid unless it be in I.F.S.

Ordinary Money Orders Abroad.

These, which are payable in nearly all countries, should be taken out 1 or 2 days before despatch of mail. Poundage, £1, 6*d.*; £2, 1*s.*; £3, 1*s.* 6*d.*, and thereafter 3*d.* per £1 or part thereof. Limits of amount, £20, £30 or £40. Limit of validity, 6–12 months.

Telegraph Money Orders Abroad.

Only to certain countries, *e.g.*, to Canada, India and U.S.A., and to certain towns only in others, *e.g.*, Australia, New Zealand, South Africa, Egypt and Palestine. Poundage as for Ordinary Money Orders abroad, *plus* cost of official Telegram of Advice (at deferred rate if desired, in most British Possessions), *plus* supplementary fee of 6*d.* for Newfoundland and foreign countries (Cuba 4*s.* 8*d.*), 1*s.* for British Empire, Egypt and Mandates (Canada 6*d.* if telegram is full-rate).

POSTAL ORDERS.

British Postal Orders are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on weekdays. They are also issued and paid in most British Possessions, Mandates, and Postal Agencies (not Australia). They are *paid* (but not *issued*) in I.F.S. and at 55 Canadian offices. They are issued, with a counterfoil, for every multiple of 6*d.* up to 20*s.*, and for 21*s.* Poundage: 6*d.* to 2*s.* 6*d.*, 1*d.*; 3*s* to 15*s.*, 1½*d.*; 15*s.* 6*d.* upward, 2*d.* The name of payee must be inserted. They must be presented for payment within 3 months from last day of the month of issue, or a fresh poundage will be charged. Adhesive, unperforated British Postage Stamps may (except for Canada) be affixed to the face of an order in spaces provided (2 or 3), to increase its value by 1, 2, 3, 4 or 5 pence.

TELEGRAMS.

Inland.

Telegrams may be handed in at a telegraph office, or, if prepaid and enclosed in envelope marked "Telegram," posted (without stamp) or handed to a rural postman. Rate, 12 words or less 1*s.* (to, from or in *Irish Free State* 1*s.* 6*d.*), each further word 1*d.*. The address is charged for. Original or redirected telegrams, or replies, sent on *Sundays* and (exc. Scotland) *Good Friday, or Christmas Day* are charged 6*d.* extra (prepayable). Replies may be prepaid up to 48 words; the voucher issued to addressee may be used, or its value refunded to sender, within 12 months. Receipt for charges 1*d.* Certified copy 6*d.*, sometimes more. The charge includes delivery within 3 miles (1 in Irish F.S.) of the nearest telegraph delivery office, or, if this be a head office, within the town postal limits—beyond that limit the charge is 6*d.* per mile, calculated from the free delivery limit, to be paid by sender (in I.F.S. by addressee). Usual hours 9 a.m. to 7 p.m.; larger offices 8 a.m. to 7, 7.30 or 8 p.m. (*see* below and p. 590). For Sunday and Holidays, see above, below, and pp. 591–2.

ABBREVIATED ADDRESSES, registered for £2 per annum, appear *gratis* in Sell's Directory (8 & 9 Johnson's Court, Fleet Street, London, E.C. 4).

DELIVERY IS BY TELEPHONE (*a*) if address is telephonic (exchange, number and town or county if needed count as 2 words only); (*b*) if "Telephone" (not charged for) precedes full telegraphic address, where exchange and number are unknown to sender; (*c*) if convenient to the Post Office, unless (i) subscriber has otherwise directed, or (ii) "Private" (charged one word) precedes telegraphic address.

LATE FEES.—A telegram may often be got through from an office which is open to one closed for telegraphic business by payment of the following fees: 1s. for telegraphist, 1s. for messenger, and 6d. an hour for telegraphist if he has to await reply. Postmasters may also accept telegrams after the usual hours on payment of 1s. for the postmaster, 1s. for the telegraphist, and 1s. for a messenger if it be necessary to call the telegraphist.

COUNTING, &c.—Plain language, *i.e.*, Latin, Esperanto or any modern European language, is charged by the number of words; all other words or unintelligible combinations of letters are charged one word *per* 5 *letters* in text, one word each in address. *The following count one word*:—(1) All names of towns and villages in U.K. (*not of branch or sub-offices or* districts in towns, unless in addition to street name); (2) all names of railway and coastguard stations (not in towns) with public telegraph; (3) words *ordinarily* written as one or with hyphen, including "couldn't," etc.; (4) *Names* with prefix "St.," "De," "De la," "O'," "Mac," but not hyphened surnames; (5) each five *figures* (th, &c., in ordinals count as two figures); (6) each initial, *except* London Postal Districts (p. 584)—A.M.—P.M.—H.M.S. (in address of *inland* telegram), which are one word each group; (7) signs of punctuation, and the symbols a/c, b/l, s/s, c/o (% counts as one word or as three figures); (8) names of telegraph offices abroad mentioned in the International List of Telegraph Offices.

NIGHT TELEGRAPH LETTERS with full ordinary address, in plain language, for delivery (on week days) by first morning post, may be sent before midnight between offices marked *t* below with Fleet Street and House of Commons T.O. in London) with addition of Inverness (before 10 p.m.) and Londonderry (9 p.m.), at 1s. (I.F.S. 1s. 6d.) for 35 words or less, and 1d. per 3 words beyond 36. Sundays, 6d. extra. Reply prepaid for 1s. to 4s. (I.F.S. 1s. 6d. to 4s. 6d.) extra.

Abroad.

In the following list the names of countries or places are followed by the ordinary or FULL RATE per word (minimum charge, 1s. 3*d*.) from any part of the United Kingdom, whether transmitted by cable or by radio-telegraphy (wireless). OTHER RATES are indicated by signs *referred to in footnotes*. *Certified copy*: *5d. per* 50 words or less (minimum 1s. 3*d*.).

Rules for counting of words are more or less as for inland (*see* above); *in address*, name of terminal office coming under class (8) counts as one word. In Plain-language telegrams (which must be in English characters) and in names and addresses outside the text, 15 letters, in Code (category A) 10 or (category B) 5, in Cipher 5 characters, is the maximum number counting as one word. *Prepaid Replies* (minimum 1s. 3*d*.) are allowed from most places. The indication for this "RP," counting as one word, must be paid for ("RPD" if Urgent *q.v.*).

URGENT TELEGRAMS or replies, at three times Full Rates, are allowed to or from all places or regions in the list *except* those followed by the sign *nu*, and *except* by Empiradio and some other routes. Minimum charge. 3s. 9d.; the word "Urgent" must be paid for.

REDUCED RATES for telegrams (not radio-telegrams, except (*C*) below); each class is liable to be deferred in favour of higher-rate traffic. (*A*) *Deferred Telegrams*, in plain English or Welsh (indication LCO), French (LCF), or sometimes language of country of destination (LCD), cost (usually) *half* the Full Rate. This service applies to all regions, places, or rates in the list *except* (i) Europe, (ii) those marked thus §. When the deferred rate is other than half the full rate it is given next after the sign *d*. (*B*) *Letter Telegrams* in English or French (occasionally other tongues):—*Night Letter Telegrams* (NLT) are for delivery next morning, in some cases not before 11 a.m. *Week-end Letter Telegrams* (WLT) normally delivered on Monday mornings, must reach Central Telegraph Office, London, by Saturday night; *Daily Letter Telegrams* (DLT) are for delivery after 48 hours from acceptance; *Post Letter Telegrams* (PLT), prepaid by stamps and posted under cover marked "Urgent" to Supt. on Duty, Central Radio Office, C.T.O., London, E.C. 1, or telephoned (but not from Call Offices) are wired to Montreal and posted thence. The "indication" (shown above) must be paid for (one word) according to the kind of letter telegram sent. The signs *wlt*, *nlt*, *dlt*, *plt* in the list below show the countries to which the respective services extend, *dltp*, *wltp* indicating *where delivery outside chief towns* is effected by post only. Following the sign is the cost of 25 words (25 words if there is an *x* at end of the sign) or less, and then the cost of each further word, if not proportional. (*C*) *Code* (*category B*) *Telegrams* (and radio-telegrams), benefit by reductions off full rate; to countries in Europe and those marked E in list below, 25% to others, 33⅓%. Minimum charge: as for 4 words, or at least 15*d*.

telegraphic offices, are closed. Many stations send railway letters (p. 582), and telegrams at train times. There is a collection and night despatch in most towns.

EXPRESS DELIVERY (Service 4) is available *only*: (1) Sundays, to or from London and a few Provincial Head Offices; (2) Good Friday, *in* London *from* these. The offices marked *x* on p. 588, together with the following in London, complete the list: G.P.O., Charing Cross, W. and S.W. District Offices, and (Branch Offices), Camberwell Green, Clapham Common, Hammersmith Broadway, Holloway, Stratford, and Swiss Cottage. Letters, &c. (not parcels) are accepted up to time of posting for preceding night mails—those for Belfast earlier, in S. & E. England. Fee 1s., besides postage and usual express fees (calculated in London as from G.P.O. —6*d.* to 5*s.* 6*d.*).

EXPRESS DELIVERY by messenger of a telephoned message (Service 5, p. 582) is on Sundays restricted to the London Postal District; but a letter reaching "Central Telegraph Office, London, E.C. 1," early on Sunday morning will be telephoned to a telephone subscriber in the London Telephone Area if the envelope be marked conspicuously "For Sunday telephone delivery," with a broad perpendicular line back and front, usual postage being prepaid on the envelope, and 3*d.* per 30 words or less by stamps affixed to the enclosed message.

CHRISTMAS DAY and GOOD FRIDAY.—*In London:* One morning delivery of letters, parcels, &c., on Christmas Day; none on Good Friday (except Express Service 4 (above)). Offices usually open as on Sundays, in some cases for shorter hours. *Outside London:* In Scotland business is as on week-days. In England and N. Ireland there is one delivery of letters and parcels; no acceptance of parcels. Offices open as Sundays.

BANK HOLIDAYS.—*London:* One morning delivery of letters and parcels. Collection of letters, evening (from Head District and Branch Offices only) and late (*general*); *parcels are accepted, in the morning, but are* not despatched. Head District Offices (p. 232) open for most business (but not Ordinary Money Order, Savings, Licence, Pensions). *Outside London:* In *Scotland*, business is generally as usual. In *England and Ireland* only one letter and parcel delivery, and generally one despatch (early in rural districts). Smaller offices are closed; the more important open in morning, some also in evening, for parcels, express, &c., and (morning only) postal orders. Telegraph offices nearly all open 9 to 10.30 a.m. and generally at the same hours, if any, as on Sunday evenings.

PUBLIC HOLIDAYS in *Scotland*: Telegraph mostly as usual, other business as English Bank Holidays. One delivery only on Local Holidays. On New Year's Day one delivery of letters and parcels, no parcel, M.O., P.O., &c., business; hours as on Sundays.

Wireless Telegraphy.

Post Office as Licensing Authority.—By the Wireless Telegraphy Acts, 1904-26, it was made illegal to install or work wireless telegraphy in the United Kingdom or on board British ships in territorial waters except with the Postmaster General's licence. By the Wireless Telegraphy Order 1908, the provisions of the Wireless Telegraphy Act 1904 apply to British Ships whilst on the high seas. The Merchant Shipping (Wireless Telegraphy) Act, 1919, made it compulsory for all British sea-going ships over 1,600 tons to carry wireless apparatus. The Post Office conducts the inspection of such apparatus under the Acts, and also the examination of Wireless Operators for the Postmaster General's Certificate.

Ship and Shore Service.—The ship and shore stations of the Marconi Company and Lloyds, 10 in number, were bought by the Postmaster General in 1909. The service has since been reorganised and now comprises 13 stations, viz: —Cullercoats, Fishguard, Humber, Land's End, Malin Head, Niton, North Foreland, Portishead, Portpatrick, Rugby, Seaforth, Valentia and Wick. Portishead Radio affords (*a*) world-wide communication with ships equipped with short-wave sending and receiving apparatus, and (*b*) communication up to a range of about 2,000 miles with ships equipped with long continuous wave-sending and receiving apparatus. Rugby Radio can transmit radiotelegrams to ships equipped with long-wave receiving apparatus. The range is world-wide, but ships are not in a position to reply to this station. A public telephone service between certain Transatlantic Liners and telephone subscribers in Great Britain and certain Continental countries is also afforded through Rugby Radio.

Anglo-Continental Wireless Services. — Post Office wireless services have been instituted side by side with the cable services to the following Continental countries:—Italy, Poland, Estonia, Hungary, Czechoslovakia, the Free State of Danzig, Rumania, Latvia, Finland and Russia. The services with Italy, Hungary, Rumania, Estonia, and Danzig are carried on *viâ* the Leafield Station (near Oxford). The latter station is also used for the transmission of news and commercial intelligence intended for simultaneous reception in several European countries. A medium-power transmitter at the Rugby Station is also used for the services to Czechoslovakia and Poland.

Super-power Transmitter at the Rugby Station. —This transmitter uses power of 1,000 kilowatts and is capable of communication with any part of the globe. It is used for the broadcasting of British Official news messages, Meteorological Office, reports and Greenwich Time Signals, and for transmitting radio telegrams and news messages to ships at sea.

Beam and Omni-Directional Wireless Stations. —The privately-owned wireless stations in this country at present carrying on commercial services with other countries are owned and operated by Imperial and International Communications Limited. They consist of the Marconi Short Wave Wireless Beam stations at Bodmin, Bridgwater, Grimsby, Skegness, Dorchester and Somerton, the high-powered omni-directional station at Carnarvon, and the medium-power omni-directional stations at Ongar and Brentwood in Essex. The Bodmin and Bridgwater and the Grimsby and Skegness Beam stations consist of two groups of two units each, one unit of each group being a transmitting station and the other unit a receiving station. The Bodmin transmitting station and Bridgwater receiving station carry out direct high-speed wireless communication with Canada and South Africa. The Grimsby transmitting station and Skegness receiving station carry out similar communication with Australia and India. The Dorchester Beam transmitting station consists of seven Marconi short-wave Beam transmitters, and is the largest beam wireless station in the world. The Somerton station is the receiving station of this short-wave Beam group, and has eight receivers employed on the same services.

All these wireless stations are operated and controlled directly from Electra House, London, the central radio office of Imperial and International Communications Limited.

* Radiotelegrams.

The *Address* of a radiotelegram should contain name of addressee, of ship, and of coast-station to be used. Private messages for *H.M. Navy* may not be sent through Portishead or Rugby radio, and must have in the address "Warship" followed by the name of the vessel, or "Submarine" (which with identifying letters and figures counts in address as one word). Next must come (*a*) if ship be *abroad*, the name of the coast station (if this is not known, sender should enquire of the

secretary, Admiralty, London by reply-paid telegram or letter, stating when it is proposed to send the message]; if it be *at sea* in the Mediterranean, the only coast station allowed is Rinella Radio (Malta) (*c* -2), if on the China station, Seletar Radio–Str. Settlements) and Stonecutters Radio (Hong-Kong) (*c* -2), if on the East Indies Station then Radio (*c* -6) or Matara Radio (Ceylon) (*c* -2), if off South African Coast, Jacobo Radio (Durban), Slangkop Radio (Capetown), or Walvis Bay Radio (*c* -6), if off the East Coast of North America: when north of 30° N., Louisburg Radio, *inclusive charge* 1*s.* 2*d. a word*; when between 10° N. and 30° N., Kingston (Jamaica) Radio (*c* -3), or S. Lucia (West Indies) Radio (*c* -4). (*b*) If the ship be *in home waters*, the message must be sent through the Admiralty station, "Cleethorpes Radio" *t* + *c* = 3*d*. In the case of the *Mercantile Marine*, "Steamship" should precede the name if confusion with some telegraph office is otherwise possible; if name of nearest coast station is uncertain the message may yet be got through by other means (*see* Note), while if the name of the ship is not known, sufficient particulars of the voyage (names of ports, &c.) may be substituted, at sender's risk, under services *A* 1, *B* 1, and *B* 2 only. *Prepayment of Replies* is admissible. *Counting of words*, etc., is subject to the rules for ordinary Telegrams Abroad; the name of ship with call-sign counts as one word, also (if written in standard form) name of coast station.

The *Cost of Transmission (per word)* from any telegraph office is the sum of three rates: rate for cable or other message to the coast or land-station (denoted by *t*); station charge (*c*); and ship charge (*s*). The normal ship charges (*s*) are as follows:—(i) H.M.Navy, *nil*; (ii) ships of most nationalities, including British, 4*d*.; (iii) Spanish and Swedish ships, 3*d*; (iv) Finnish ships and Lettonian ships, 1½*d*. These are reduced in certain cases (*see C* below). The other charges and services may be classified as follows:—

A. Short-range (250-300 miles), to all ships with wireless telegraph:—1. *Through Post-Office coast stations*: *t*+*c* 7*d*. 2. *Through coast-stations abroad*: (*t*)=rate for *full-rate* telegram to the country in which coast station is situated (*see* list under heading Telegrams Abroad, p. 591, *c*) which varies from 0 to 9*d*., is given in the same list, after the name of a country or place with a coast station, preceded by the sign *c*

B. Long-range Communication with ships suitably equipped (mostly listed in P.O. Guide), when beyond reach of short-range stations: 1 *Viâ* "*Portisheadradio*" Phone: Highbridge 53) *t* + *c* = 7*d*.: (*a*) Long-wave both-way service (range 2,000 miles), with about 350 ships including most large liners in N. Atlantic or Mediterranean), (*b*) Short-wave both-way service (range world-wide) with about 300 ships. 2. *Viâ* "*Rugbyradio*" (range world-wide) *t* + *c* = 1*s*. 2*d*. to many ships (3,600 in P.O. Guide) carrying long-wave receiving apparatus; ships cannot reply direct to this station. Messages are sent at 12.48 a.m. (G.M.T.) (not exc. Sun.) 2.48 p.m. 3. Ships which cannot be reached by coast stations in this Country can sometimes be reached by coast stations abroad, the exact station depending upon the position of the ship which can generally be ascertained from the shipowners. A full list of coast stations abroad is given in the P.O. Guide.

C. Reduced rates for cross-Channel and short-voyage Ships: 1. *Through the appropriate P.O. coast-station*‡ (*see* Note), the inclusive (*t* + *c* + *s*) rate per word is: Group A 3½*d*; Group B 5½*d*. 2. *Through foreign coast-stations* to the same two groups of vessels respectively: (a) rate as calculated as for *A* 2, but *s* is reduced to 1*d*. [Exceptions are (i) To the 7 Dover-Ostend Packets, through Antwerp or Ostend, *c* + *s* = 3*d*.; (ii) To 25 regular cross-Channel boats, through Boulogne, Cherbourg or Havre, *c* + *s* = 2½*d*.] (*b*) rate calculated as for *A* 2, but *s* is reduced to 1½*d*.

Note.—"*Open address*."—1, *P.O. stations*: The word "Wireless" may be substituted for the name of a particular station in services *A* 1 and *B* 1, but not *B*2. If so substituted for the proper coast station in service *C* 1, the inclusive charge per word becomes: Group A boats, 7*d*.; Group B, 8½*d*; 2. *Coast-stations abroad*: Messages intended to pass through ordinary-distance coast stations in Newfoundland or *east* coast of Canada *may* have "Montreal" in place of the name of any particular station; similarly those for coast stations on east coast of Madr or either coast of U.S.A. may bear "New-York." In both cases (*c*) + (*s*) = 1*s*. Again, messages intended to pass through stations on coasts of the Union of S. Africa *may* have "Slangkopradio" instead of the name of any particular coast station. Inclusive charge (which covers transmission to South Africa, as well as the coast and ship station charges) is 2*s*. 1*d*. a word irrespective of whether the message is routed *viâ* "Empiradio" or *viâ* "Eastern."

‡ The P.O. coast stations are:—Cullercoats, Fishguard, Humber, Land's End, Malin Head, Niton, North Foreland, Portpatrick, Seaforth, Valentia, Wick.

The Air Port of London (Croydon Aerodrome, Waddon—Tel., Croydon, 2720), extended under the Air Ministry's improvement scheme, was opened on May 2, 1928. The cost of the station was about £260,000, and the buildings include hangars, offices and a hotel with 50 bedrooms. Airway traffic is controlled from a tower by a Civil Aviation Traffic Officer. Some of the biplanes in the services operating from Croydon carry 40 passengers and about 1,200 lb. of luggage, and are fitted with refreshment buffets. Air expresses are subjected to a complete routine inspection before being granted their daily airworthy certificates by inspectors licensed by the Aeronautical Inspection Department of the Air Ministry.

AIR MAILS.

AIR MAIL SERVICES. Details of services, time saved, and fees payable are embodied in the official Air Mail Leaflet which can be obtained free of charge through any Post Office.

At the Imperial Conference of Oct., 1926, the Secretary for Air, Sir Samuel Hoare, laid down two broad propositions:—

(1) That the Empire is in urgent need of better communications.

(2) That their improvement will require a sustained and united effort.

By aeroplane or airship London could be brought within a fortnight of the farthest cities and territories of the Empire. Journeys could be reduced to the following periods:—

	Days.
Canada	2½
India	5
Cape Town	6
Australia	11
New Zealand	13

In April, 1929, a stage of development in the air journey between London and India was marked by the introduction of large passenger aeroplanes for the London—Paris—Marseilles section, transhipping into air boats for the passage over the Mediterranean, and so from Cairo—Baghdad—Basra to Karachi. During winter months the route is overland as far as Athens.

SHIPBUILDING, 1930-31.

THE total of new tonnage to which classes have been assigned by *Lloyd's Register* during the twelve months ended June 30, 1931, amounts to 557 vessels, of 1,758,610 tons gross, while the corresponding figures for the year ended June 30, 1930, were 637 vessels, of 1,807,816 tons gross. Plans for 240 vessels, of 564,280 tons, were passed by the Society in the course of the year. These figures are very much smaller than those for the previous twelve months (601 vessels, of 2,081,610 tons) and are the lowest recorded since 1922. Of this projected tonnage, 40·21 per cent. (226,900 tons) was intended to be built in Great Britain and Ireland, and 59·79 per cent. (337,380 tons) in other countries. The countries *in which* the greater part of the new tonnage classed by *Lloyd's Register*, during the year, has been constructed are shown in the following statement:—

Country.	No. of Vessels.	Tons Gross.
Great Britain and Ireland	353	1,033,562

The LARGEST VESSELS UNDER CONSTRUCTION and to class with *Lloyd's Register*, at June, 1931, were the new *Cunarder*, of 73,000 tons, at Clydebank, Scotland; *Rex*, 50,000 tons, at Genoa, Italy; *Conte di Savoia*, 46,000 tons, at Trieste, Italy. All are being fitted with quadruple screw geared turbine machinery.

The British Fishing Fleet.—On Dec. 31, 1927, the fishing boats belonging to the United Kingdom, Isle of Man and Channel Islands numbered 14,555 (273,762 net tons) of which 6,283 were sailing vessels (26,412 net tons) and 8,272 steam and motor vessels (247,350 net tons).

The estimated number of men and boys employed in sea fishing in 1929 was 60,034, of whom 53,357 were regular fishermen and 6,677 persons occasionally employed in sea fishing.

Wrecks (World).—The total losses of the World's Mercantile Marine in 1930 are stated to be 392 vessels with a gross tonnage of 425,413 as against 499 vessels (604,703 gross tons) in 1929; these losses (1930) include 246 steamers (339,405 gross tons), 14 motor vessels (38,199 gross tons), 37 auxiliary vessels (7,886 gross tons) and 95 sailing vessels (39,923 gross tons).

(*British*).—In 1929, 38 sailing vessels (2,460 gross tons) and 109 steam and motor vessels (113,623 gross tons), a total of 147 vessels (116,083 gross tons), were totally lost at sea. In 1929 the following lives were lost through wrecks at sea—from sailing vessels, crew 4, passenger *nil*; from steam and motor vessels, crew 127, passengers *nil*—a total of 131. The years with the heaviest losses of life at sea were 1912 and 1914. In 1912 the total of 2,335 included 673 of the crew and 825 passengers on *S.S. Titanic*; in 1914 the total of 1,778 included 171 of the crew and 840 passengers on *S.S. Empress of Ireland*.

THE KINGDOM OF ENGLAND.

Position and Extent.—The Kingdom of England occupies the southern portion of the island of Great Britain and lies between 55° 46′ and 49° 57′ 30″ N. latitude (from the mouth of the Tweed to the Lizard), and between 1° 46′ E. and 5° 43′ W. (from Lowestoft to Land's End). England is bounded on the north by the summit of the Cheviot Hills, which form a natural boundary with the Kingdom of Scotland; on the south by the English Channel; on the east by the Straits of Dover (Pas de Calais) and the North Sea; and on the west by the Atlantic Ocean (which washes the Cornish coast), Wales and the Irish Sea. Total area, 50,851 square miles. Population (1931) 37,354,917.

Relief.—There is a natural orographic division into the hilly districts of the north, west and south-west, and the undulating downs and low-lying plains of the east and south-east. In the extreme north the *Cheviot Hills* run from east to west, culminating in the Cheviot, 2,676 feet above mean sea level. Divided from the Cheviots by the Tyne Gap is the *Pennine Chain*, running N. by W. to S. by E., with their highest point in Cross Fell, 2,930 feet above mean sea level. West of the Pennines are the *Cumbrian Mountains*, which contain in *Scafell Pike* (3,210 feet) the highest land in England, and east of the Pennines are the *Yorkshire Moors*, their highest point being Urra Moor (1,489 feet). South of the Pennines are the *Peak of Derbyshire* (2,088 feet) and *Dartmoor* (High Willhays, 2,039 feet). In the western county of Shropshire are the isolated Wrekin (1,335 feet), Long Mynd (1,674 feet), and Brown Clee (1,805 feet); in Herefordshire the Black Mountain (2,310 feet) in Worcestershire the Malvern Hills (1,395 feet), in Monmouthshire the Sugar Loaf (1,955 feet) and Coity (1,905 feet), and the Cotswold Hills of Gloucestershire contain Cleeve Cloud (1,134 feet).

Hydrography.—The *Thames* is the longest and most important river of England, with a total length of 210 miles from its source in the Cotswold Hills to its outflow into the North Sea, and is navigable by ocean-going steamers to London Bridge. The Thames is tidal to Teddington (60 miles from its mouth); the Wilts and Berks canal enters at Abingdon, and the Kennet and Avon canal at Reading. The principal tributaries are the Cherwell, Lee, Kennet, Wey, Mole and Medway. The Thames forms county boundaries almost throughout its course, and on its banks are situated the capital of the British Empire; Windsor Castle, the home of the Sovereign; Eton College, the first of the public schools; and Oxford, the oldest university in the kingdom. The *Severn* is the longest river in Great Britain, rising in the north-eastern slopes of Plinlimmon (Wales) and entering England in Shropshire, with a total length of 220 miles from its source to its outflow into the Bristol Channel, where it receives on the left the Bristol Avon, and on the right the Wye, its other tributaries being the Vyrnwy, Tern, Stour, Teme and Upper (or Warwickshire) Avon. The Severn is tidal below Gloucester, and a high bore or tidal wave sometimes reverses the flow as high as Tewkesbury (13½ miles above Gloucester). The scenery of the greater part of the river is very picturesque and beautiful, and the Severn is a noted salmon river, some of its tributaries being famous for trout. Navigation is assisted by the Gloucester and Berkeley Ship Canal (16¾ miles), which admits vessels of 350 tons to Gloucester, other canals connecting with the Thames, Trent, Dee and Mersey. The *Severn Tunnel*, which carries the Great Western Railway under the river, 14 miles below the Sharpness Bridge, was begun in 1873 and completed in 1886 (at a cost of £2,000,000) after many difficulties from flooding, &c. The tunnel is 4 miles 624 yards in length (of which 2¼ miles are under the river). Of the remaining English rivers those flowing into the North Sea are the Tyne, Wear, Tees, Ouse and Trent from the Pennine Range, the Great Ouse (160 miles) from the Central Plain, and the Orwell and Stour from the hills of East Anglia. Flowing into the English Channel are the Sussex Ouse from the Weald, the Itchen from the Wiltshire and Hampshire Hills, and the Axe, Teign, Dart, Tamar and Exe from the Devonian Hills; and flowing into the Irish Sea are the Mersey, Ribble and Eden from the western slopes of the Pennines and the Derwent from the Cumbrian Mountains. The *English Lakes* are noteworthy rather from their picturesque scenery and poetic associations than from their size. These lie mainly in Cumberland, but partly in Westmorland and Lancashire, the largest being Windermere (10 miles long), Ullswater and Derwentwater.

Islands.—The *Scilly Islands* (Cornwall), 25 miles from Land's End, consist of about 40 islands, with a total area of about 4,000 acres, only St. Mary's, Tresco, St. Martin's, St. Agnes and Bryher being inhabited, population (1931), 1,732. The capital is Hugh Town, in St. Mary's. The climate is unusually mild, and vegetation luxuriant, semi-tropical plants flourishing in the open. The *Isle of Wight* is separated from Hampshire by the Solent. The total area is 147 sq. miles, population (1931), 88,400. The climate is mild and healthy, and many watering places have grown up during the last century. Capital, Newport, at the head of the estuary of the Medina, Cowes (at the mouth) being the chief port; other centres are Ryde, Sandown, Shanklin, Ventnor, Freshwater, Yarmouth, Totland Bay, Seaview and Bembridge. *Lundy Island*, 11 miles N.W. of Hartland Point, Devon, is about 2½ miles long, and 1 mile broad, with a total area of about 1,050 acres (mainly picturesque), and a population of about 50: it contains the seat of the proprietor of the island and two lighthouses.

Climate.—The south-westerly winds from the Atlantic Ocean penetrate to the heart of the country, affecting the temperature of the greater part of the kingdom, and only the coastal regions of the east have a modified continental climate. The mean annual temperature is about 50° Fahrenheit, varying from 52° in the Scilly Islands to 48° at the mouth of the Tweed, and generally the west of England is mild and wet in winter and cool and less wet in summer, while the east is cool and dry in winter and spring and hot and less dry in summer and autumn, the wettest region being the Lake district of Cumberland and the driest in the Thames estuary and the Lincolnshire Wash. The climate of England is influenced by the much-indented coastline of the west and by the flow of warm water in the *Gulf Stream Drift*, which strikes the S.W. projection and proceeds N. and E. along the west and south coasts.

EARLY INHABITANTS.

Prehistoric Man.—A skeleton found at *Galley Hill*, near Northfleet, Kent (in 1895), has been ascribed to a man of Central Asian race of the Early Stone Age, and stone implements of the remote Eolithic, Palæolithic and Neolithic periods are abundantly found throughout England. The Neolithic period is held to have merged into the Bronze Age about 2000 to 1500 B.C., and a date between these years has been given to *Stonehenge* (presented by Sir C. H. E. Chubb to the Nation in 1908, and now preserved as a national monument). Stonehenge (10 miles N. of Salisbury, Wiltshire) consists of two circles of menhirs (the largest monolith being 22½ feet in height), only 16 remaining in position in the outer circle, while two of the five triple sets are still in position in the inner circle. The use for which the temple or monument was erected is the subject of many conjectures.

The Celtic Invasion.—In the latter part of the Bronze Age the *Goidels*, a people of Celtic race, and in the Iron Age another Celtic race of *Brythons*, invaded the country and brought with them Celtic civilization and dialects, place names in England bearing witness to the spread of the invasion over the whole kingdom.

The Roman Conquest.—Julius Cæsar raided Britain in 55 B.C. and 54 B.C., and in 43 A.D. the conquest of the country was undertaken by the Roman Emperor Claudius, who sent Aulus Plautius with a well-equipped army of 40,000 men, and himself visited Colchester (Camulodunum) and *Londinium*. The British leader from 48–51 A.D. was *Caractacus* (strictly Caratācus), who was finally captured and sent to Rome. By 70 A.D. the conquest of South Britain was completed, a great revolt under *Boadicea* (strictly Boudicca), Queen of the Icēni (Norfolk), being crushed in 61 A.D. In 122 A.D. the Emperor Hadrian visited Britain and built a continuous rampart, known as *Hadrian's Wall*, from Wallsend to Bowness (Tyne to Solway), remains of which are still traceable. The Romans administered Britain as a Province under a Governor, with a well defined system of local government, each Roman municipality ruling itself and the surrounding territory. Colchester, Lincoln, York, Gloucester and St. Albans stand on the sites of five Roman municipalities, while London was the centre of the road system and the seat of the financial officials of the Province of Britain. A well preserved Roman town of about 100 acres was first uncovered in the 18th century at *Silchester* (Calleva Atrebatum), 10 miles south of Reading, and since 1890 the whole site has been investigated. Four main groups of roads radiated from London, and a fifth (the Fosse) ran obliquely from Ermine Street (at Lincoln), through Leicester, Cirencester and Bath to Exeter. Of the four groups radiating from London one ran S.E. to Canterbury and the coast of Kent, a second to Silchester and thence to parts of Western Britain and South Wales, a third (now known as *Watling Street*) ran through Verulamium (St. Albans) to Chester, with various branches, and the fourth reached Colchester, Lincoln, York and the eastern counties. *Christianity* reached the Roman Province of Britain from Gaul in the 3rd century (or possibly earlier), the Bishops of Londinium, Eboracum (York), and Lindum (Lincoln) attending the Council of Arles in 314. The Roman garrison of Britain was much harassed in the 4th century by Saxon pirates, who invaded the eastern counties from the Wash to Spithead, while about 350 A.D. incursions in the north of Irish (Scoti) and Picts became most formidable, and towards the end of the century many troops were removed from Britain for service in other parts of the Roman Empire. Early in the 5th century Gaul was taken from the Romans by Teutonic invaders, and Britain was cut off from Rome; officials were no longer sent to the island, the garrison was left to defend itself, and appears to have been driven inland by the Northern and Saxon invaders, and to have been conquered and absorbed by the Celtic inhabitants, whose language and customs re-emerged.

Anglo-Saxons and Normans. — The Celtic Britons appear to have called in the Saxons to resist the raids of the Picts and Scots, and eventually the *English* (Angles, Saxons and Jutes) drove the Britons into the mountain fastnesses of the West (Strathclyde, Wales and Cornwall), the name of *Welch* (old English *Waelisc* = Foreign) being given to the islanders by the invaders from the continent. The area thus conquered was divided into several kingdoms, of which the chief were Northumbria (Bernicia and Deira), Mercia (Middle Angles), and Wessex. The heathen Angli (whose gods Ti, Woden, Thunor and Frigg are commemorated in "Tuesday, Wednesday, Thursday and Friday") were converted to Christianity by a mission under Augustine (dispatched by Pope Gregory in 597), which established Archbishoprics at Canterbury and York, and the whole of England appears to have been converted by the end of the 7th century. In the 8th century Offa, King of Mercia, is stated to have built a wall and rampart, afterwards known as *Offa's Dike*, from the mouth of the Dee to that of the Wye, as a protection against the Welsh. The greatest of the English kingdoms was *Wessex*, with its capital at Winchester, and the greatest of the Wessex kings was *Alfred the Great* (871–901), who resisted the incursions of the Northmen (Danes) and fixed a limit to their advance by the Treaty of Wedmore (878). In the 10th century the Kings of Wessex recovered the whole of England from the Danes, but subsequent rulers were unable to resist the invaders, and England paid tribute (*Danegelt*) for many years, and was ruled by Danish Kings from 1016 to 1042, when Edward the Confessor was recalled from exile. In 1066 Harold (brother-in-law of Edward and son of Earl Godwin of Wessex) was chosen King of England, but after defeating a Northumbrian revolt under his brother Tostig (aided by an invading army of Harold Hadraada of Norway) at Stamford Bridge in Yorkshire (Sept. 25), he was himself defeated at the *Battle of Hastings* (or Sautlache) on Oct. 14, 1066, and the Norman Conquest secured the throne of England for Duke William of Normandy. Since the *Norman Conquest* all attempts to invade England have been defeated.

ENGLISH COUNTIES.

For Administrative purposes England is divided into 49 *Administrative Counties* (under the Local Government Act of 1888). The boundaries of these Administrative Counties differ in many cases from those of the older Geographical Counties, while the areas of the 72 *County Boroughs* created under the Act of 1888 are excluded from the County Areas, and the population of the Boroughs is separately enumerated. The area, population and chief officers of the Administrative Counties are shown overleaf.

LONDON, the capital of England and of the British Empire, and the greatest city in the world, is situated on both banks of the River Thames, 50 miles from its outflow into the North Sea.

The City of London represents London within its ancient boundaries. The City is the financial and business centre of London, and includes the head offices of the principal banks, insurance companies, and mercantile houses, in addition to buildings ranging from the historic interest of the Roman Wall, the Norman Tower and the 15th century Guildhall, to the massive splendour of St. Paul's, and the architectural beauty of Wren's spires (Bow Church, St. Bride's, St. Dunstan's in the East, &c.).

The City of Westminster, which is bounded by the City of London on the east, by Chelsea and Kensington on the west, by Paddington, St. Marylebone and Holborn on the north, and by the Thames and Chelsea on the south, was formed into a borough by the London Government Act of 1899, and was created a city by Royal Charter of Oct. 19, 1900, the Council consisting of a Mayor, 10 Aldermen and 60 Councillors. Extending from the eastern end of the Strand to Kensington Gardens, and from Oxford-street to the Thames, it includes within its boundaries a large number of the finest buildings in London. The Abbey and the Roman Catholic Cathedral, the Houses of Parliament and the Law Courts, Buckingham Palace and St. James's, and the principal Government offices, Clubs and Theatres are situated in Westminster, which also includes the fashionable residential districts of Mayfair and Belgravia. Westminster is the richest of the London areas.

Metropolitan Boroughs.—Under the London Government Act of 1899 the administrative functions of the various vestries in the Metropolitan districts surrounding the City of London were transferred to 28 Metropolitan Boroughs, of which one became afterwards the City of Westminster. The area covered by these boroughs extends northwards to include Stoke Newington, southwards to Wandsworth and Lewisham, eastwards to Woolwich, and westwards to Hammersmith.

London County Council.—For County purposes the affairs of London are administered by the London County Council, which was created by the Local Government Act of 1888.

Miscellaneous Authorities.—For Police purposes the administration is invested in the City Corporation as to *the City Police* and in the Home Office as to the *Metropolitan Police*. The authority for the supply of water is the *Metropolitan Water Board*; while the River Thames is administered as to its tidal portion by the *Port of London Authority* and above Teddington by the *Thames Conservancy*, the lighthouse and pilotage authority being *Trinity House*. The bridges are maintained in the City of London by the *Bridge House Estates* Committee of the Corporation of the City, and in the remaining area by the London County Council. The *London and Home Counties Joint Electricity Authority* (5 Millbank, Westminster, S.W. 1) provides (or secures the provision of) electricity throughout an area of 1,797 sq. miles. Locomotion is provided by the London County Council as the Tramway authority, and by private enterprise as to underground or other railways, &c.

THE CORPORATION OF THE CITY OF LONDON.

LONDON was famed for its vast conflux of traders and its abundant commerce even in the first century of the Christian era. From the Romans, it is said, it received municipal institutions which have endured in their main features to the present day. In Saxon times it was, in reality, a small independent State, and its burgesses maintained their independence even after the Battle of Hastings. William the Norman only gained possession of their city by means of a treaty with them, and about eight years after he granted a charter, which is still preserved. It is addressed to William the Bishop, Godfrey the Portreeve, and all the Burgesses, and promises that they shall be "law worthy" (*i.e.*, possessed of privileges) as they were in the days of Edward the Confessor. The Portreeve, however, received the Norman title of Bailiff, which, in 1191, was changed to Mayor; the first holder under the new name being Henry Fitzalwyn, who filled the office for 24 years. On his death a new charter was granted by King John in 1214, which directed the Mayor to be chosen annually, which has ever since been done; though in early times the same individual often held the office more than once. A familiar instance is that of "Whittington, thrice Lord Mayor of London" (in reality four times A.D. 1397, 1398, 1406, 1419); and many modern cases have occurred. The title of *Lord Mayor* was not in general use in the outer world until about 1545. The Lord Mayor is elected at Michaelmas; he is sworn into office on November 8, and on the following day presented to the Lord Chief Justice at the Royal Courts of Justice, to take the final declaration of office—the pageant being popularly known as the *Lord Mayor's Show.*

Aldermen were first appointed by a charter of Henry III. in 1242, and were elected annually between 1377 and 1394, when a charter of Richard II. directed them to be chosen for life. The *Common Council*, elected annually on St. Thomas's Day (Dec. 21), was, at an early date, substituted for a popular assembly called the Folkmote. At first only two representatives were sent from each ward, but the number has since been greatly increased, some wards having as many as 16 members, and none less than four. *Sheriffs* (as well as aldermen) were Saxon officers who usually had charge of a large district. The time of their appointment for London is uncertain, but they appear in ancient records as early as A.D. 1130. At first they were only the officers of the Crown, and were named by the Barons of the Exchequer; but King John gave them, in the first year of his reign, permission to choose their own Sheriffs. The citizens, however, lost this privilege, as far as the election of Sheriff of Middlesex is concerned, by the Local Government Act, 1888; but they continue, as heretofore, to choose the Sheriffs of the City of London. They are appointed on Midsummer Day, and enter on office at Michaelmas.

Officers.—The Recorder was first appointed in 1298. The Chamberlain is an ancient officer. There were at one time two Chamberlains—the King's Chamberlain and the Chamberlain of the Guildhall. The former appears to have fallen into abeyance *circ.* 1319. The first contemporary record of the Office of City Chamberlain is 1276. The Town Clerk and Common Serjeant are mentioned as officers in the charter of Edward II., A.D. 1319; but the offices can be traced to a much earlier date than this.

The Right Honourable the Lord Mayor 1931–1932.

* The above is abstracted from the 298th "City's Cash Account" of the series extant—A.D. 1633 to 1930-31. (The Accounts earlier than A.D. 1633 were believed to have been destroyed in the Fire of London; but two years' Accounts, *temp.* Queen Elizabeth, have been discovered among the Corporation Archives, as exceptions to that belief.) The Volumes are in full detail, signed by the Auditors, and in perfect preservation. The above extract is from the 147th Annual Printed Account of the Corporation, A.D. 1784 to 1930-31. The Accounts are prepared and stated as directed by Resolutions of the Court of Common Council of the 5th June, 1903, the 14th December, 1905, and 25th January, 1917, upon Reports of the Coal and Corn and Finance Committee, and they are printed in conformity with the 87th Standing Order of the Court of Common Council. The Accounts are made up to the end of March and are issued in the form prescribed by those Orders, and show the Income and Expenditure applicable to the year on the various Funds.

THE CITY GUILDS (LIVERY COMPANIES).

IN the majority of cases the designation of the Company gives a clue to the trade which gave rise to the guild, the Broderers (Embroiderers), Cordwainers (cobblers), Fletchers (arrow makers), Loriners (bridle, bit, and spur makers), Poulters (poulterers), Scriveners (legal writers), Upholders (upholsterers), and Vintners (wine sellers) retaining the ancient name of the trade. The order of precedence is given in parentheses after the name of each Company.

9,716 Liverymen of the Guilds are entitled to vote at elections in *Common Hall* (*see* p. 604). The actual net number is, however, smaller, as many belong to more than one Guild; and only those who have residential or other qualification in the City have the *Parliamentary* vote in that district.

There are 77 Guilds in existence. The Liveries of the Loriners' (390), Stationers (376), and Merchant Taylors (335), are the most numerous, the Fletchers' (22), the smallest.

THE LONDON FIRE BRIGADE. *Headquarters:* 94 Southwark Bridge Road, S.E. 1.

PREVIOUS to the formation of the Metropolitan Fire Brigade in 1866 the churchwardens and overseers of every parish had been compelled, under an Act passed in 1774, to maintain an engine for putting out all fires occurring within their own boundaries; and from about 1830 the leading fire insurance companies had jointly organised and worked a fire-engine establishment of their own. On January 1, 1866, under the Metropolitan Fire Brigade Act, 1865, the Metropolitan Board of Works took over these responsibilities. On January 1, 1867, the Board also took over from the Royal Society for the Protection of Life from Fire (founded 1844) the service of the saving of Life from fire. By the passing of the Local Government Act, 1888, the London County Council assumed control of the Fire Brigade. In 1904 the title of the Brigade was altered from "Metropolitan Fire Brigade" to "London Fire Brigade."

On Dec. 31, 1930, the complement of the Brigade consisted of:—1 chief officer; 2 divisional officers; 3 assistant divisional officers; and 1,923 officers, firemen, and pilots; a technical and clerical staff of 189. There were 61 land fire-stations, 3 river stations and 1 river repairing depot. The appliances included 87 motor fire engines, 74 motor escape vans, 6 petrol-electric motor ladders, 3 petrol motor ladders (in addition to tenders, &c.), 3 hose carts and 110 fire escapes, 1 long fire ladder, 64 miles of hose, 1 steam and 3 motor fire floats, 55 smoke helmets, 399 hook ladders and 293 hook bolts. There were 1,689 street fire-alarm posts, 97 telephone lines from station to station and 368 telephone lines to public and other buildings. The number of calls to which the Brigade responded during the year ended Dec. 31, 1930, totalled 8,308, and the fires numbered 4,619, of which 35 were classed as "serious."

THE London County Council was constituted under the Local Government Act of 1888. London is an *administrative* county, covering an area of 117 square miles.

The City of London is an electoral division of the county. The County of the City of London is a county for *non-administrative* purposes, such as quarter sessions, justices, &c.; and the Metropolis outside the City is a county for *non-administrative* purposes, by name the County of London, in which the justices continue their judicial duties.

The Council comprises a chairman, 20 aldermen, and 124 councillors, together 145, or, if the chairman be also an elected member or alderman, 144. The term of office for aldermen is 6 years, and ten retire every 3 years. The councillors are elected for 3 years. The councillors are elected directly by the ratepayers, and the councillors elect the aldermen. The positions of aldermen and councillors are the same, except as to the term of office.

The method by which the Council discharges the multitudinous duties entrusted to it is a generous delegation of powers to committees under well defined rules, subject to the reservation to the Council itself of all questions of principle, and to periodical reports of action taken. In addition to members of the Council co-opted members are included on the following committees: Central Public Health, Education, Housing, Mental Hospitals, Midwives Act and Public Assistance.

Under the Local Government Act, 1929, the Council, as from April 1, 1930, became responsible for the administration of all forms of poor relief in London, including the services previously maintained by the late Metropolitan Asylums Board. As required by the Act the Council prepared an administrative scheme for discharging the functions transferred, and the transferred services were merged as far as possible in the Council's existing organisation and allocated to the committees of the Council to which they were appropriate.

The *Finance Committee* have important statutory powers. No costs, debt or liability exceeding £50 may be incurred by the Council except upon a resolution passed on an estimate submitted by the Finance Committee. The Council is the principal money-raising body for all the local authorities in the county, and has a net debt, according to the latest returns, of £80,989,000 (of which £42,708,000 represents debt incurred for revenue-producing undertakings), and an annual expenditure of about forty millions.

The *Central Public Health Committee*, among other duties affecting public health, are responsible for the treatment of tuberculosis, the diagnosis and treatment of venereal disease, the maintenance of 75 hospitals, with accommodation for over 42,000 patients, and the Council's ambulance service.

The *Education Committee* comprise thirty-eight members of the Council and twelve co-opted members, of whom not less than five are required to be women. The Education service involves an annual expenditure of about £13,000,000. The Council maintains 1,172 elementary schools with over 618,000 pupils, and 273 secondary and technical schools, evening institutes and training colleges, with nearly 200,000 students. In addition it gives grants-in-aid to 113 secondary and technical schools and training colleges.

The *Housing Committee* perform the duties cast upon the Council by the various Housing Acts, including the clearance of insanitary areas and the building of working-class dwellings. The total capital expenditure incurred up to March 31, 1931, in respect of all schemes was £36,618,000, and very large works are still in progress. About 45,000 houses and tenements have been completed since the war.

The *Improvements Committee* deal with questions relating to the carrying out of street improvements and construction of bridges, tunnels and ferries. Among other works now being carried out are the reconstruction of Lambeth and Chelsea bridges and the widening of Putney bridge.

The *Mental Hospitals Committee* administer the duties falling on the Council under the Lunacy Acts and the Mental Deficiency Act, 1913, and also the mental hospitals transferred from the Metropolitan Asylums Board. The Council has mental hospitals and other institutions for the care of mental defectives, with accommodation for over 31,000 patients.

The *Metropolitan Main Drainage* system covers about 159 square miles, including certain districts outside the county, and comprises about 400 miles of main, storm-relief, intercepting and outfall sewers, eleven pumping stations, two sewage precipitation stations, and five sludge vessels. The total capital outlay on main drainage is over £16,000,000, and further expenditure is in progress for a scheme to relieve certain districts from flooding after heavy falls of rain, and for the installation of plant at the northern outfall for the treatment of sewage by the activated sludge process.

The *Public Assistance Committee* administer the duties in connection with poor relief, other than hospital treatment, including the maintenance of institutions, receiving homes and training centres, for over 11,000 inmates.

The Council is the *Tramway Authority* for London. The system (including about 9 miles belonging to the Leyton Urban District Council but worked by the London County Council) extends over 166 street miles, all of which are electric lines (123 miles on the underground conduit system and 43 miles on the overhead system). The whole of this great system is worked by the Council, and through-running with various systems outside the County of London is now maintained, to the great advantage and convenience of the travelling public. The total capital outlay on tramways amounted, on March 31, 1931, to £18,352,000, and the net debt outstanding to £8,383,000. The results of working for the year 1930–31 were: gross receipts £4,363,566, surplus on working £763,899, surplus for year, after payment of interest on capital outlay and providing for repayment of debt, £31,637, which was carried forward.

Amongst the *Other Powers and Duties* of the Council may be mentioned the following:—Sanctioning of loans required by the councils of the metropolitan boroughs; maintenance of fire brigade; acquisition and maintenance of parks and open spaces; the sanctioning of local sewers; town planning; controlling the building line, and the naming of streets and numbering of houses; supervising buildings and district surveyors; dangerous structures; cattle diseases; controlling storage of explosive substances and petroleum; infant life protection; gas, gas-meter and electricity-meter testing; testing weights and measures; licensing of slaughter-houses and of cow-houses; supervision of common lodging-houses; the granting of music and dancing licences; historic buildings and monuments; inspection of factories and certain other buildings to secure means of escape from fire; administration of the Shops Act, the Children Act, and the Midwives Acts; licensing and inspection of employment agencies; registration of massage establishments; licensing of premises under the Cinematograph Act; registration of motor cars; collection of duties on motor cars, dog and establishment and certain other local taxation licences; registration of War charities; and welfare of blind persons.

The *Expenditure* of the Council, including loans to other local authorities, is met by two chief sources of supply—capital money raised by the issue of Stock, Bonds or bills, or by the use of the Sinking Fund of the Council's debt, and current income raised in a county rate or by the revenue of undertakings. Certain contributions, including education grants, are also received from the Imperial Exchequer. All borrowings by the Council are subject to the provision of a sinking fund, under Treasury approval, sufficient to repay all expenditure generally within a period of 60 years (in a few cases the limit is 80 years). The total Stock outstanding at September 30, 1931, was £98,204,521. These figures are exclusive of the issues of Bonds, the amount outstanding at September 30, 1931, being £6,091,775 Local Bonds for Housing.

The *Rating* for the year 1931–32, as shown by the statement below (which relates to rate accounts only), amounted to 6*s.* 5*d.* in the pound over the whole county, including the City, and a further rate over the county outside the City of 2½*d.* in the pound, together 6*s.* 7½*d.* The total rate for 1930–31 was 7*s.* 2½*d.* The *Assessable Value* of the County of London on April 6, 1931, was £59,406,139—a 1*d.* rate over the whole county producing £247,526.

THE PRINCIPAL ENGLISH CITIES.

BIRMINGHAM.

BIRMINGHAM (Warwickshire), the second City in England, situated in the heart of industrial England, is the chief centre of the hardware trade of the world. It is practically equidistant from the other important trade centres in the country, being 111 miles from London, 85 miles from Manchester and 91 miles from Bristol. The *municipal area* is 51,427 acres (about 71 square miles), with a population at the census of 1931 of 1,002,413.

It is estimated that over 1,200 distinct trades are carried on in the city, the chief industries being the manufacture of ammunition and small arms, chocolate, chemicals, cycles and their component parts, magnetos, railway rolling-stock, glass, motor-cars and motor-cycles, motor tyres; tools, electrical apparatus, wireless sets and components, jewellery and brass working.

Gas, water and electricity are supplied by the Corporation, who also own the transport undertaking, markets and Municipal Bank.

The principal buildings are the Town Hall, built in 1832–1850 on the lines of the Temple of Jupiter Stator at Rome, with a large hall; the Council House and Corporation Art Gallery and Museum (1878); the University (Aston Webb, 1909); the Central Library; the 13th century Church of St. Martin (rebuilt 1873); the Cathedral (formerly St. Philip's Church, built by Archer, a pupil of Wren's), the Roman Catholic Cathedral of St. Chad (Pugin), and the Wesleyan Central Hall. A memorial bust of Abraham Lincoln was unveiled in 1921. Birmingham was incorporated as a borough in 1838, and was created a city in 1889; it is governed by a Lord Mayor and City Council of 30 Aldermen and 91 Councillors. The city returns 12 members to Parliament. The generally accepted derivation of "Birmingham" is the *ham* or dwelling-place of the *ing* of the family of *Berm*, presumed to have been a Saxon. Between the 11th and 16th centuries, the de Berminghams were Lords of the Manor.

Principal City Officers.

The Lord Mayor (1931-1932), J. B. Burman.
Recorder, J. G. Hurst, K.C. (1931).
Stipendiary Magistrate, The Rt. Hon. Lord Ilkeston (1910).
Town Clerk, F. H. C. Wiltshire (1918).
Clerk of the Peace, Joseph James (1905).

LIVERPOOL.

LIVERPOOL (Lancashire), on the right bank of the river Mersey, 3 miles from the Atlantic and 194 miles N.W. of London, is one of the greatest trading centres of the world and the principal port in the United Kingdom for the Atlantic trade. The municipal area is 24,102 acres (which includes 2,883 acres in the bed of the river Mersey) (about 33 square miles, excluding the bed of the river), with a population at the census of 1921 of 803,118. The net tonnage of British and Foreign ships engaged in ocean trade arriving in the port during 1924 was 13,185,360, and of those departing 12,572,997; these figures exclude 2,317,626 tons for arrivals and 3,063,983 for departures in the coasting trade, while the value of the sea-borne trade of the port was stated at £582,580,575 for 1924. The docks, on both sides of the river, have a linear quayage of about 37 miles, and the Gladstone dock will accommodate the largest vessels afloat. The dock authority is the Mersey Docks and Harbour Board. The chief import is cotton, those next in importance being grain, provisions, sugar, fruit, oil, timber and tobacco.

The principal buildings are the Cathedral, erected from the designs of Sir Gilbert Scott and consecrated in 1924; when completed this will be the largest ecclesiastical building in England; St. George's Hall, erected 1838–1854, from the designs of Harvey Lonsdale Elmes, at a cost of £300,000, and regarded as the finest modern example of classical architecture; the *Town Hall, erected 1754 from the designs of* Wood; the Walker Fine Art Gallery; the University; the Royal Infirmary; the Municipal Offices; and the Custom House. A Roman Catholic Cathedral, designed to be the largest in the world, will be built on Brownlow Hill.

Liverpool was incorporated as a borough early in the 13th century and was created a city in 1880. The Corporation consists of a Lord Mayor and a City Council which comprises 38 Aldermen and 113 Councillors. The City returns 11 members to Parliament. The name is believed to be derived from Norse words meaning the "Pool of the Slopes."

Principal City Officers.

The Lord Mayor (1931–1932), J. C. Cross.
Recorder, Edward G. Hemmerde, K.C. (1909).
Police Magistrate, Stuart Deacon (1910).
President, Court of Passage, Sir Wm. F. Kyffin Taylor, K.B.E., K.C.
Town Clerk, Walter Moon, £3,300 (1922).
Clerk of the Peace, R. D. Cripps.

MANCHESTER.

MANCHESTER (Lancashire), the centre of the world's cotton trade, is 189 miles N.W. of London. The municipal area is 22,257 acres (about 34 square miles), the population at the census of 1931 being 766,333. In April, 1931, the area and population were increased by the addition of the Wythenshawe area.

Manchester is the distributing centre of the cotton spinning and weaving of Lancashire for the whole world, and of butter and foodstuffs for the most densely populated part of England. It also contains large engineering and machinery works and factories of hats, clothing, india-rubber goods, chemicals, &c. The city is connected with the sea by the *Manchester Ship Canal (opened in 1894), which has a total length* of 35½ miles, a depth of 28 to 30 feet, and a minimum width at the bottom of 120 feet. The net tonnage of ships engaged in the Foreign Trade was 3,677,681 for arrivals and 3,098,698 for departures in 1929, the value of the sea-borne trade of the port being £99,886,967 in 1929. The net tonnage of arrivals in the Coasting Trade was 552,463, and of departures 1,071,756 net tons in 1929. In 1929 the weight of sea-borne merchandise which passed over the Waterway amounted to 6,344,005 tons, as compared with 6,021,316 tons in 1928.

The principal buildings are the Town Hall, erected in 1877 from the designs of Alfred Waterhouse, R.A.; the Royal Exchange, built in 1869, enlarged at cost of £800,000 and reopened by the King, 1921; the Free Trade Hall, erected from the designs of Walters, in 1856, on the site of the "Peterloo Massacres" (Aug. 16, 1819) in St. Peter's Fields; the Art Gallery; the Whitworth Institute; the 17th century Chetham Library; the Rylands

Library (1899), which includes the Althorp collection; the University (Owens College); and the 15th century Cathedral (formerly the parish church). Manchester is one of the principal centres of political, literary and scientific advancement, and the Hallé Concerts have placed the city in the forefront of musical development. The *Manchester Guardian* newspaper exercises a widespread influence throughout the English-speaking world.

The town received a charter of incorporation in 1838 and was created a city in 1853. The City Council will consist (from April 1, 1931), of 36 Aldermen and 108 Councillors. Manchester returns 10 members to Parliament. The Latin name of the city was *Mancunium*.

Principal City Officers.

The Lord Mayor (1931-1932), E. Green.
Recorder, Sir Walter Greaves-Lord, K.C., M.P. (1925).
Stipendiary Magistrate, J. Wellesley Orr (1927).
Town Clerk, F. E. Warbreck Howell (1929).
Clerk of the Peace, E. M. Redhead.

SHEFFIELD.

SHEFFIELD (Yorkshire, West Riding), the chief centre of the heavy steel and cutlery trade, is situated in the extreme south of Yorkshire, 159 miles N.N.W. of London, at the junction of the Sheaf, Porter, Rivelin and Loxley with the river Don. The city has an area of 34,163 acres (about 53 square miles), with a population at the census of 1931 of 511,742. The principal industries are the manufacture of heavy steel (armour plates, rails, tyres, axles, engine castings, &c.), cutlery, and instruments, in addition to engines and general machinery, tanning, confectionery, bicycles, iron and brass founding, silver refining, brush making, and many other industries. Sheffield plate (silver rolled on other metals) made during the years 1742–1840, when electroplating superseded the process, is greatly prized by collectors.

The principal buildings are the 14th century Parish Church (St. Peter's), the Town Hall (1897), the Cutlers' Hall (1832), Corn Exchange, Market Hall, Museum, Mappin Art Gallery, Ruskin Museum and the University.

The Saxon town of *Escafeld* was created a county borough in 1888 and a city in 1893, the Chief Magistrate becoming a Lord Mayor in 1897. The Corporation includes 24 Aldermen and 72 Councillors. Sheffield returns 7 members to Parliament.

Principal City Officers.

The Lord Mayor (1931–1932), T. H. Watkins.
Recorder, Walter Hedley, K.C. (1931).
Master Cutler (1931–1932), J. Ward.
Town Clerk, E. B. Gibson (1931).
Clerk of the Peace, G. E. Smith.

LEEDS.

LEEDS (Yorkshire, West Riding) is favourably situated in the coal and iron districts of England, 185 miles N.N.W. of London, and is the centre of the woollen industry and the wholesale clothing trade. The city has also the largest share of the leather trade of the United Kingdom, in addition to large rope works, printing works, and factories of thread, glass and earthenware, with metal casting, machinery and machine tools, steam engines, railway wagons, and other engineering works. Leeds is connected with the Mersey in the west by the Leeds and Liverpool Canal, with the Humber in the east by the Aire and Calder Navigation, and is an important railway centre.

The municipal area is 38,106 acres (nearly 60 square miles), the population at the census of 1931 being 482,789.

The principal buildings are the Town Hall (1858), the Royal Exchange (1872), the Philosophical Hall, the Municipal Buildings and Art Gallery, the University and the Leeds Institute of Science, Art and Literature (1865). The Parish Church (St. Peter's) was rebuilt in 1840; the 17th century St. John's Church has a fine interior with a famous Renaissance screen; the 17th century Mill Hill Chapel was rebuilt in 1849. Kirkstall Abbey (about 3 miles from the centre of the city), founded by Henry de Laci in 1152, is one of the most complete examples of Cistercian houses now remaining. *Temple Newsam*, birthplace of Lord Darnley, was acquired by the Corporation in 1922. The present mansion, a stately edifice in red brick, was built by Sir Arthur Ingram in 1620. Adel Church, about 3½ miles from the centre of the city, is a fine Norman structure.

Leeds was first incorporated by Charles I. in 1626, made a county borough in 1889, and was created a city in 1893. The Lord Mayor presides over a corporation of 26 Aldermen and 78 Councillors. The city returns 6 members to Parliament. The earliest forms of the name are *Loidis* or *Ledes*, the origin of which is obscure.

Principal City Officers.

The Lord Mayor (1931–1932), F. B. Simpson.
Recorder, E. A. Mitchell-Innes, C.B.E., K.C. (1928).
Stipendiary Magistrate, Horace Marshall (1910).
Clerk of the Peace, Sir Arthur Copson Peake (1896).
Town Clerk, Thomas Thornton (1924).

BRISTOL.

BRISTOL is situated partly in Gloucestershire and partly in Somerset and is a City and County in itself, and is 119 miles W. of London. The present municipal area is 19,615 acres with a population, at the census of 1931, of 396,918. Bristol is noted for its maritime history.

The principal industries are shipbuilding, rope making, chocolate, sugar and tobacco factories, motor and general engineering, clothing, printing, paper bag and cardboard making, glass and earthenware, soap, leather and chemical works, breweries, and copper, lead and iron works. The docks comprised within the Port are the City Docks, 6 miles from the entrance to the river Avon; the Royal Edward and Avonmouth Docks, at the mouth of the river; and the Portishead Docks, to the westward of the river entrance. The net tonnage of ships (engaged in the Foreign Trade) entered in 1930 was 2,661,949 tons, and of those cleared 1,190,407 tons, the value of the seaborne trade being stated at £35,016,628 for 1929; the net tonnage of arrivals in the Coasting Trade was 806,158, and of the departures 2,155,545 net tons in 1930. The principal imports are grain, flour and meal, fruit, provisions, frozen meat, sugar, metals, ores, oilseeds, paper, petroleum and petroleum spirit, timber, tobacco and general merchandise, and the chief exports are galvanised iron, tin-plates, machinery, manufactured oils, chemicals, strontia, hardware, and unmanufactured clay.

The chief buildings, in addition to the 14th century Cathedral (rebuilt by Street 1868–1888), the 14th century Church of St. Mary, Redcliffe (described by Queen Elizabeth as "the fairest, goodliest and most famous parish church in England"), and the 15th century Temple Church, are Canynges' House, the Merchant Venturers'

Almshouses, St. Peter's Hospital, the Council House, Guildhall, Exchange (erected from the designs of John Wood in 1743), Colston Hall, the University and Clifton College. The *Clifton Suspension Bridge*, with a span of 702 feet over the Avon, was projected by I. K. Brunel (the designer of the *Great Eastern*) in 1836, but was not completed until 1860.

Bristol was a Royal Borough before the Norman Conquest, and in 1899 its Chief Magistrate (Sir Herbert Ashman) became a Lord Mayor. The Corporation includes 23 Aldermen and 69 Councillors. The city returns 5 members to Parliament. The earliest forms of the name are *Brigstowe* and *Bristow*.

Principal City Officers.

The Lord Mayor (1931-1932), John Hampden Inskip.
High Steward, His Grace the Duke of Beaufort, T.D.
Recorder, Herbert Du Parcq, K.C. (1929).
Town Clerk, Josiah Green.

KINGSTON UPON HULL

HULL (officially "Kingston upon Hull") is situated in the East Riding of Yorkshire, at the junction of the Hull with the Humber, 22 miles from the North Sea and 181 miles N. of London. The municipal area is 13,392 acres, with a population of 313,666 at the census of 1931.

Hull is the third port in the United Kingdom and the chief port of North-Eastern England. Ten docks cover a water area of 210 acres and are equipped with every modern appliance for the rapid handling of cargoes. Hull has the reputation of being the cheapest port in the U.K. Net registered tonnage of ships using the port in 1930, 7,073,914. Value of imports (grain, oilseed, provisions, wood, fruit, wool, etc.) £74,996,352 in 1929; exports (cotton, woollen goods, coal, machinery, cattle food, etc.) £34,277,855. Hull is the largest centre of the seed-crushing and oil-extracting industry in the world, the premier fishing port of the U.K. and an important centre of the flour-milling industry; other manufactures are acetates, canisters, cement, colours and chemicals, mill machinery, oil cakes and meals, paint, paper, polishes, power alcohol, radiators, rope, shipbuilding, soap, starch, surgical dressings, tanning, tar products, varnish, vegetable oils, wood milling, etc.

The chief buildings, in addition to the Docks, are the Parish Church (Holy Trinity), 272 feet in length (the longest parish church in England), the Guildhall (1915), Exchange (1866), Chamber of Commerce, Corn Exchange, Market Hall, City Hall, Custom House Dock Offices, Royal Institution (1854), Wilberforce's House, Trinity House (1753), and the Ferens Art Gallery. A Municipal Art Gallery has been established under the gift of the late Mr. T. R. Ferens. A municipal aerodrome was opened in 1929.

The name of *Wyke-upon-Hull* was changed to Kingston-upon-Hull by Edward I. in the 13th century. The town was incorporated in 1576 and made a county borough in 1888. The Corporation consists of a Lord Mayor, 16 Aldermen and 48 Councillors. Hull returns 4 members to Parliament.

Principal City Officers.

The Lord Mayor (1931-1932), R. W. Wheeldon.
Recorder, Charles Frederick Lowenthal, K.C. (1928).
Town Clerk, J. R. Howard Roberts (1931).

BRADFORD.

BRADFORD (Yorkshire, West Riding), 192 miles N.N.W. of London and 8 miles W. of Leeds, in the coal and iron district, is the centre of the woollen and worsted trade. The city is connected with the Mersey in the west and with the Humber in the east by canals, and is an important railway centre. The municipal area is 24,341 acres (about 38 square miles), with a population at the 1931 census of 298,041.

The principal textile industries are worsteds, woollens, silks and cottons, and there are also important engineering and iron works, and quarries of freestone.

The chief public buildings, in addition to the 15th century Cathedral (formerly the Parish Church), are the Town Hall (1873), Exchange (1867), Cartwright Memorial Hall (1904), commemorating the inventor of the power loom, the Windsor (Baths and Public Halls, 1905), Grammar School, Technical College (1882), and the Mechanics' Institute (1832).

The Saxon township was created a parliamentary borough in 1832, a county borough in 1888, and a city in 1907. The Corporation consists of a Lord Mayor, 22 Aldermen and 66 Councillors. Bradford returns 4 members to Parliament.

Principal City Officers.

The Lord Mayor (1931-1932), George Walker.
Recorder, Frank Beverley (1926).
Stipendiary Magistrate, Beaumont Morice (1914).
Town Clerk, N. L. Fleming (1920).

NEWCASTLE UPON TYNE.

NEWCASTLE UPON TYNE (Northumberland), on the north bank of the Tyne estuary, 8 miles from the North Sea and 272 miles N. of London, has an area of 8,452 acres (13 square miles) and a population of 283,145 at the Census of 1931.

The city is conveniently placed on the estuary, in the neighbourhood of the Northumberland and Durham coalfields. The exports of the Port of Newcastle upon Tyne (River Tyne) include coal, chemicals, oil fuel (as cargo and bunkers), pig iron, iron and steel manufactures and machinery; the chief imports being wheat and grain, fruits, iron, iron ore and steel, sulphur ore, petroleum, timber and wood, and potatoes. The net tonnage of ships engaged in the Foreign Trade was 7,533,588 for arrivals and 8,884,172 for departures in 1929, the value of ocean-borne trade being £41,749,121 in 1929; the net tonnage of arrivals in the Coasting Trade was 3,996,146 and of departures 2,652,214 net tons in 1929. The chief industries are shipbuilding, metal works and machinery, chemicals, glass, brick, tile and earthenware, and rope making.

The principal buildings include the (11th century) "New" Castle, of which the walls, keep and chapel are well preserved, the Cathedral (St. Nicholas), St. Andrew's Church (12th century), St. John's (14th century), St. George Jesmond, the Roman Catholic Cathedral of Hexham and Newcastle, Holy Trinity War Memorial, Guildhall (1658), Moot Hall (1810), Exchange (1860), Central Public Library and Laing Art Gallery, Wood Memorial Hall (1870) and the Custom House. The city is connected with the south bank of the Tyne by six bridges, viz.:—high level (Stephenson) for road and rail, swing bridge (road), Redheugh (road), Scotswood suspension (road), King Edward VII. (rail), Tyne (road).

The pre-Norman borough of *Monkchester* was re-named Newcastle in the 11th century when the castle was erected as a defence against the Scots. In 1400 it was made a county borough, and in 1859 was incorporated. The City Corporation now includes a Lord Mayor (1906), 19 Aldermen and 57 Councillors. Newcastle-upon-Tyne returns 4 members to Parliament.

Principal City Officers.

The Lord Mayor (1931–1932), J. G. Nixon.
Recorder, Walter Hedley, K.C. (1929).
Town Clerk and Clerk of the Peace, Arthur Maule Oliver, O.B.E. (1907).

NOTTINGHAM.

NOTTINGHAM (Nottinghamshire), the principal manufacturing centre of hosiery and lace, stands on the left bank of the Trent, where the tributary stream Leen enters the river, 125 miles N.N.W. of London. The municipal area is 10,935 acres (17 square miles), and includes an open market-place of 5½ acres in the centre of the city, recently laid out as an ornamental garden, etc. The population of the Census of 1931 was 268,801.

The city is connected with the North Sea and the Atlantic by the river Trent and canals and is an important railway centre. The principal industries are cotton, silk and merino hosiery, lace, bleaching, dyeing and spinning, tanning, engineering and cycle works, brewing, the manufacture of tobacco, chemicals, furniture, typewriters, and colour printing.

The chief buildings are the 11th century Nottingham Castle (restored in 1878, and now the City Museum and Gallery of Art), Wollaton Hall (1580–88) recently purchased by the Corporation, St. Mary's, St. Peter's, and St. Nicholas's Churches, the Roman Catholic Cathedral (Pugin, 1842–4), the Council House, opened by the Prince of Wales in 1929, the Guildhall and Court House (1887), Shire Hall, Albert Hall. Exchange, University College, Hospital and Eye Infirmary. New University College, opened July 10, 1928.

Snotengaham or *Notingeham*, "the home of the sons of Snod" (the Wise), is the Anglo-Saxon name for the Celtic *Tuigogobauc*, "Cave Homes." The city possesses a Charter of Henry II., and was created a city in 1897. The Corporation comprises a Lord Mayor, 16 Aldermen and 48 Councillors. The city returns 4 members to Parliament.

Principal City Officers.

Lord Mayor (1931–1932), William Green.
Recorder, Henry Holmes Joy, K.C. (1928).
Town Clerk (1912) *and Clerk of the Peace* (1921), William John Board, O.B.E.

STRATFORD-ON-AVON.

Shakespeare's Birthplace (April 23, 1564), at Stratford on-Avon, has been for over 200 years the goal of pilgrims. It was bought for £3,100 in 1847 and given to the nation. (Restored in 1857.) Managed by 26 Trustees (16 *ex-officio*). Holds library of rare editions, pictures, and relics. In the garden are many trees and plants named by the poet.

Clopton Bridge, built of stone, on 19 arches, about 1490 by Sir Hugh Clopton, Stratford native, and Lord Mayor of London.

Guild Chapel and Guildhall.—Built A.D. 1296. In the old hall young Shakespeare could witness strolling companies performing (mentioned in Records). In chapel were discovered beneath whitewash, 1804, mural allegorical paintings, done by mediæval priests, further discoveries being made in 1929.

Hall's Croft.—Unaltered old-timbered residence of Susanna, poet's daughter, wife of Dr. John Hall, churchwarden and poet's executor.

Harvard House.—Built 1596 by Alderman Thomas Rogers, whose descendant (John Harvard) founded Harvard University, U.S.A.

Hathaway Cottage.—At Shottery, one mile from Stratford, is the little thatched farmstead, the undisturbed birthplace of Anne Shakespeare, poet's wife, who bore him three children, Susanna, Hamnet, and Judith. Contains curious Tudor and Jacobean furniture. National property, controlled by Birthplace Trustees.

King Edward VI. School.—Founded by Thomas Jollyffe, priest, in Henry VI. reign; incorporated by Edward VI. Here Shakespeare acquired his "small Latin and less Greek," and matchless English.

The Shakespeare Memorial.—Mainly due to munificence of C. E. Flower (1830–92) and his wife. Group comprises *Library*, with 10,000 volumes of Shakespeare editions and ana, including rare Wm. Jaggard collection. *Gallery* of pictures (including unique "Droeshout" portrait). *Museum* of antiques and relics (including Irving collection). *Tower*, affording views of 50 miles. *Gardens*, and *Statuary* (Lord Ronald Gower's gift). *Theatre*, burnt down in 1926, has been rebuilt by international subscription. Special spring and summer performances, with floral procession to tomb, commence on the birthday, April 23, each year.

New Place.—Site of the poet's retirement. Shakespeare bought this estate in 1597; retired to it about 1610; died there April 23, 1616. House was rebuilt about 1700, and demolished by Francis Gastrell, the iconoclast, 1759.

The Cage.—For 36 years the home of Judith, poet's younger daughter, who married Thomas Quiney, vintner.

Town Hall.—Erected 1633; rebuilt 1768. Contains details of the unbroken sequence of Bailiffs and Mayors since A.D. 1292 (including the poet's father, John Shakespeare). Exhibits: Gainsborough portrait of Garrick; four Corporation Maces, gilt silver of 15–16th Century, and ancient Corporate Sword.

Trinity Church.—Dates from A.D. 692. Of cathedral-like proportions. Shelters remains of poet and family.

Wilmcote.—The house of Shakespeare's mother, Mary Arden, was purchased in 1930, with 60 acres of land at *Welcombe*, part of 107 acres bought by Shakespeare in 1602; now open to the public.

THE PRINCIPALITY OF WALES.

PHYSICAL GEOGRAPHY.

Position and Extent.—The Principality of Wales occupies the extreme west of the central southern portion of the island of Great Britain, with a total area of 7,467 sq. miles. It is bounded on the N. by the Irish Sea, on the S. by the Bristol Channel, on the E. by the English counties of Cheshire, Salop, Hereford and Monmouth, and on the W. by St. George's Channel. The greatest length from N. to S. (Point of Air to Barry Island) is 136 miles, and the greatest breadth from W. to E. (St. David's Head to the English border) is 92 miles. Separated from the mainland by the Menai Straits is the Welsh island-county of *Anglesey* or Môn (276 sq. miles), communication with which is facilitated by the Menai Suspension Bridge (1,000 ft. long), built by Telford in 1826, and by the tubular railway bridge (1,100 ft. long) of the L. & N.W. Railway, built by Stephenson in 1850. Holyhead harbour, on Holy Isle (N.W. of Anglesey), provides accommodation for a fast steam packet service to Kingstown and Dublin (70 miles).

Population.—The population at the *Census* of 1931 was 2,593,014 (inclusive of Monmouthshire).

Relief.—Wales is generally mountainous, the chief systems being those of North Wales (Snowdon 3,571 ft., Carnedd Llywelyn 3,484 ft., Carnedd Dafydd 3,426 ft.); Berwyn (Aran-fawddy 2,970 ft.); Powys (Plinlimmon 2,462 ft., Drygan Fawr 2,115 ft., Radnor 2,163 ft.); and the Black Mountain, Brecknock Beacons and Black Forest ranges (Carmarthen Van 2,632 ft., Brecon Beacon 2,862 ft., Pen-y-gaver fawr 2,660 ft.).

Hydrography.—The principal river of those rising in Wales is the *Severn* (*see* England), which flows from the slopes of Plinlimmon to the English border, dividing Montgomeryshire on its way. The *Wye* (130 miles) also rises in the slopes of Plinlimmon, and flows between Radnor and Brecon on its course to England. The *Usk* (56 miles) flows into the Bristol Channel, through Monmouthshire. The *Dee* (70 miles) rises in Bala lake and flows through the Vale of Llangollen, where an aqueduct (built by Telford in 1805) carries the Pontcysyllte branch of the Shropshire Union Canal across the valley. The estuary of the Dee is the navigable portion, 14 miles in length and about 5 miles in breadth, and the tide rushes in with dangerous speed over the "Sands of Dee." The *Towy* (68 miles), *Teifi* (50 miles), *Taff* (40 miles), *Dovey* (30 miles), *Tâf* (25 miles), and *Conway* (24 miles), the last named broad and navigable, are wholly Welsh rivers.

The largest natural lake in Wales is *Bala* (Llyn Tegid) in Merionethshire, 4 miles long and about 1 mile wide; *Lake Vyrnwy* is an artificial reservoir, about the size of Bala, and forms the water supply of Liverpool, while Birmingham is supplied from a chain of reservoirs in the Elan and Claerwen valleys.

EARLY HISTORY.

Celts and Romans.—The earliest inhabitants of whom there is any record appear to have been subdued or exterminated by the *Goidels* (a people of Celtic race) in the Bronze Age, and a further invasion of Celtic *Brythons* followed in the ensuing Iron Age. The *Roman* conquest of South Britain and Wales was for some time successfully opposed by *Caradog* (Caratācus), King of the Silures, a tribe inhabiting the present counties of Glamorgan, Brecon, Radnor and Monmouth. In A.D. 78 the conquest of Wales was completed under Julius Frontinus, and communications were opened up by the construction of military roads from Chester to Carleon-on-Usk and Caerwent, and from Chester to Conway (and thence to Carmarthen and Neath). *Christianity* was introduced (during the Roman occupation) in the 4th century, and the faith thus established was preserved (after the withdrawal of the Roman garrison) by native effort, and was carried to the northernmost corners of the British Isles by missionaries to the Hebrides and to the Orkneys and Shetlands.

The Anglo-Saxon Attacks.—The Anglo-Saxon invaders of South Britain drove the Celtic Goidels and Brythons into the mountain fastnesses of Wales, and into Strathclyde (Cumberland and S.W. Scotland) and Cornwall, giving them the name of *Waelisc*, or Welsh (=Foreign). The West Saxons' victory of Deorham (577) isolated the Waelisc of Wales from those of Cornwall, while the battle of Chester (613) similarly cut off communication with the Waelisc of Strathclyde. In the 8th century the boundaries of the Welsh were further restricted by the annexations of Offa, King of Mercia, and counter-attacks were largely prevented by the construction of an artificial boundary from the Dee to the Wye (Offa's Dike). In the 9th century *Rhodri Mawr* united the country against further incursions of the Saxons by land and against the raids of Norse and Danish pirates by sea, but at his death his three provinces of *Gwynedd* (N.), *Powys* (Mid.) and *Dehenbarth* (S.) were divided among his three sons—Anarawd, Mervyn and Cadell—the son of the last-named being Howel Dda, who codified the laws of the country, while Lewelyn ap Seissyllt (husband of the heiress of Gwynedd) again united the provinces and reigned as Prince from 1015-1022.

The Norman Conquest.—After the Norman conquest of England William I. created Palatine counties along the Welsh frontier, and Robert FitzHamon, the Norman Earl of Gloucester, raided South Wales and erected fortresses from the Wye to Milford Haven. Henry I. introduced Flemish settlers into South Wales, but after his death the Welsh rose under the leadership of *Griffith ap Rhys* and routed the Norman-Flemish forces at the fords of the Teifi (Cardigan) in 1136. From the early years of the 13th century the house Gwynedd, in the north, gained an ascendency over the whole of Wales, and Llewelyn ap Iorwerth was in constant strife with England for recognition as an independent sovereign; but Llewelyn, the son of Iorwerth, was killed in 1282 during hostilities between the Welsh and English, and his brother David was captured and executed by the English in 1283. On Feb. 7, 1301, Edward of Carnarvon, son of Edward I., was created *Prince of Wales*, a title thenceforward borne by the heir apparent to the throne of England.

The Welsh are a distinct nationality, with a language and literature of their own, and the national bardic festival (Eisteddfod), instituted by Prince Rhys ap Griffith in 1176, is annually maintained. These *Eisteddfodau* (sessions) form part of the *Gorsedd* (assembly), which is believed to date from the time of Prydian, a ruling prince in an age many centuries before the Christian era.

CARDIFF.

CARDIFF (Glamorgan), at the mouth of the rivers Taff (Caer Taff), Rummey and Ely, the port of the South Wales coal fields, has a municipal area of 13,628 acres, and a population (1931) of 223,648. The principal industries include ship repairing, rope making, steel, copper, lead and zinc works, iron and steel foundries, patent fuel works, engine wagon works, flour mills, chemical factories, paper mills, breweries, jam, vinegar and ice factories, tin plate and paint works. The *chief imports are grain, timber*, pitwood, ore, fruit, butter, cheese, frozen and chilled meat, live cattle, canned goods, sugar, potatoes. The exports include coal, coke, patent fuel, iron and steel manufactures, tin plates, &c.

The principal buildings are Cardiff Castle, built in the 11th century, the National Museum of Wales, Public Library, the University College of South Wales and Monmouthshire, the Registry of the University of Wales, Technical College, City Hall and Law Courts, and Glamorgan County Hall. The city returns 3 members to Parliament.

The *Lord Mayor* (1931-32), C. W. Melhuish.
Stipendiary Magistrate, W. Hugh Jones, K.C.
Recorder, Roland E. L. Vaughan-Williams, K.C.
Town Clerk & Clk. of Peace, Cecil G. Brown, LL.B.

SWANSEA

SWANSEA (Glamorgan), at the mouth of the River Tawe, is the chief centre of the copper, tinplate and spelter industry of the United Kingdom, and contains the largest tube works in the country. The trade of the port also includes coal (the largest anthracite port), patent fuel, ores, and the import and export of oil (National Oil Refineries). There is also a large ship-repairing industry. The trade is principally with France, Italy and Belgium. The municipal area is 24,193 acres, with a population at the census of 1931 of 164,825. Included in the borough is the health resort of Mumbles.

The principal buildings are the Norman castle (re-built in 1330), the Royal Institution of South Wales, founded in 1835 (containing Museum and Library), the University College at Singleton, and the 17th century Grammar School, founded by Hugh Gore. Swansea was chartered by King John, and incorporated as a borough by Henry III. The borough returns 2 members to Parliament.

Mayor (1931-32), J. B. Owen.
Recorder, E. W. Milner-Jones.
Town Clerk, H. L. Lang-Coath.

THE KINGDOM OF SCOTLAND.

Position and Extent.—The Kingdom of Scotland occupies the northern portion of the main island of Great Britain and includes the Inner and Outer Hebrides, and the Orkney, Shetland, and many other islands. The Kingdom lies between 60° 51′ 30″ and 54° 38′ N. latitude and between 1° 45′ 32″ and 6° 14′ W. longitude, its southern neighbour being the Kingdom of England, with the Atlantic Ocean on the N. and W., and the North Sea on the E. The greatest length* of the mainland (Cape Wrath to the Mull of Galloway) is 274 miles, and the greatest breadth (Buchan Ness to Applecross) is 154 miles. The total area of the Kingdom is 31,510 square miles (land and water). The population (at the census of 1931) was 4,842,554, a decrease of 39,943 since the census of 1921.

Relief.—There are three natural orographic divisions of Scotland. The *Southern Uplands* have their highest points in Merrick (2,764 feet), Rinns of Kells (2,668 feet), and Cairnsmuir of Carsphairn (2,612 feet), in Kirkcudbright; Hartfell (2,651 feet) in Dumfries; and Whitecoomb (2,695 feet), in Peebles. The *Central Lowlands* include the valleys of the Tay, Forth and Clyde, and the cities of Edinburgh, the capital of the Kingdom, and Glasgow, its principal seaport. The heather-clad *Northern Highlands* extend almost from the extreme north of the mainland to the central lowlands, and are divided into a northern and southern system by the *Great Glen*; they contain, in the central Grampian Hills, *Ben Nevis* (4,406 feet), the highest point in the British Isles, and Ben Muich Dhui (4,296 feet). The *Cheviot Hills* form a natural boundary between Scotland and England, their highest point being Cheviot Hill (2,676 feet).

Hydrography.—The principal river of Scotland is the *Clyde* (106 miles), one of the most important rivers in the world, with the greatest commercial estuary in Scotland. The Clyde is formed by the junction of Daer and Portrail water, and flows through the city and port of Glasgow to the Firth of Clyde. During its course it passes over the picturesque *Falls of Clyde*, the largest falls in the British Isles, Bonnington Linn (30 feet), Corra Linn (84 feet), Dundaff Linn (10 feet), and Stonebyres Linn (80 feet), above and below Lanark. The *Tweed* (96 miles) has important woollen industries ("Tweeds") in its valley. The *Tay*, noted for its salmon, and the longest river in Scotland (117 miles), flows into the North Sea, with Dundee (the centre of the jute industry) on the estuary, which is spanned by the *Tay Bridge* (2 miles 73 yards), opened in 1887 to replace that destroyed by a gale (Dec. 28, 1879). The *Dee* (90 miles), a noted salmon river, flows through scenery of unequalled beauty to the North Sea at Aberdeen. The *Spey* (110 miles), the swiftest flowing river in the British Isles, and also noted for its salmon and its scenery, flows into the Moray Firth. The *Forth* (66 miles), navigable to Stirling, is spanned by the *Forth Bridge*, constructed 1882–9 at a cost of £3,000,000, with a length of 5,330 feet (with approaches 8,295 feet).

The *lochs* are the principal hydrographic feature of the Kingdom, both on the mainland and in many of the Islands. The largest in the Kingdom and in Great Britain is *Loch Lomond* (24 miles long), with Lochs Awe, Tay, Rannoch and Ericht in the Grampian valleys; *Loch Ness* (24 miles long and 800 feet deep), with Lochs Oich and Lochy, in the Great Glen; and Lochs Shin (20 miles) and Maree in the northern Highlands.

Orkney.—About 6 miles N. of the Caithness coast, separated from the mainland by the *Pentland Firth*, is the island county of Orkney, a group of 90 islands and islets ("holms" and "skerries"), of which one-third are inhabited. The total area of the group is 375½ square miles, with a population (1911) of 25,896. Kirkwall, in *Pomona* (or mainland), the largest island of the group, is the capital of the county. Many of the Orkney (and Shetland) Islands contain *brochs* (Pictish towers) and other Pictish and Scandinavian remains. *Scapa Flow*, between Pomona and Hoy, was the war station of the Grand Fleet from 1914–9 and the scene of the *scuttling of the surrendered German High Seas* Fleet (June 21, 1919).

Shetland.—About 50 miles N. of Orkney (with the detached Fair Isle at 25 miles N.) is the island county of Shetland, a group of about 100 islands and islets, of which 29 are inhabited. The total area of the group is 551 square miles, with a population (1911) of 27,911. Lerwick, in *Mainland* (the largest and principal island), is the capital of the county. *Fair Isle*, the southernmost of the group, is famous for hand-knitted hosiery, and *Unst* for the finest of the Shetland woollen work, for which the county is famous. *Muckle Flugga*, about 1 mile N. of Unst, is the most northerly of the group and of the British Isles (60° 51′ 30″ N. lat.).

*Western Islands.**—Off the W. coast, at varying distances, and extending from Sutherland to Argyll, are over 500 islands and islets, of which 102 are inhabited. The total area of these Western Islands is 2,812 square miles, with a population of close on 80,000, but owing to the mountainous surface of the land only about 300 square miles are under cultivation. The *Inner Hebrides* include the island of *Skye* (643 square miles—capital, Portree, famous as the refuge of Prince Charlie after his defeat at Culloden, Invernessshire, in 1746), which contains the *Cuillins* (Sgurr-na-Banachdich, 3,243 feet), *Red Hills* (Ben Caillich, 2,403 feet), and many other picturesque mountains; *Mull* (367 square miles), containing *Ben More* (3,185 feet), *Ben Buy* (2,354 feet), and *Ben Creach* (2,289 feet); *Jura*

* *Land's End to John o' Groats.*—The customary measurement of the Island of Great Britain is from the site of John o' Groat's house, near Duncansby Head, Caithness (at the N.E. extremity of the island) to Land's End, Cornwall (at the S.W. extremity), a total distance of 597 miles in a straight line and (approximately) 900 by road. But the site of the house of John de Groot (with its 8 doors and octagonal table, to solve the question of precedence between John and his 7 brothers) is about 4 miles S.W. of Duncansby Head, while Dunnet Head (also in Caithness) extends farther N. than Duncansby. John de Groot is believed to have obtained permission to settle in Caithness (from the Netherlands) in the reign of James IV. (1488–1513).

* *The Hebrides.*—Until the closing years of the 13th century "The Hebrides" included other Scottish islands in the Firth of Clyde, the peninsula of Kintyre (Argyllshire), the Isle of Man, and the (Irish) Isle of Rathlin. The origin of the name is stated to be the Greek *Eboudai*, latinized as *Hebudes* by Pliny, and corrupted to its present form. The Norwegian name *Sudreyjar* (Southern Islands) was latinized as *Sodorenses*, a name that survives in the Anglican bishopric of "Sodor and Man."

(160 square miles), with a chain of hills culminating in the *Paps of Jura*, Beinn-an-Oir (2,571 feet), and Beinn Chaolais (2,407 feet); *Islay* (235 square miles), and many smaller islands. The *Outer Hebrides*, separated from the mainland by the *Minch*, include *Lewis-with-Harris* (770 square miles), celebrated for its homespun "Tweeds," *North Uist*, *South Uist*, *Barra* and other islands. Thirteen miles W. of *Stornoway* (the largest town of Lewis and of the Hebrides) are the "Druidical" remains of *Callernish*, a well-preserved series of monolithic circles, cruciform in general arrangement, but generally regarded as a heathen monument of the remote Stone Age.

Climate.—The climate of Scotland is influenced by the much indented coast line and (like that of South Britain) by the *Gulf Stream Drift*, which emerges from the Gulf of Mexico as a strong current about 30 miles in width, with a speed of about 4 miles per hour; the stream gradually loses its velocity and becomes shallower and cooler, until at about 35° N. lat. (off Cape Hatteras) it ceases to be a distinct stream and its surface waters are carried across the Atlantic by the prevailing westerly winds. The climate is more bracing and less treacherous than that of England, the average duration of sunshine on the east coast being greater than on the east coast of England, while the south-western section is no wetter or more relaxing than the corresponding section of England. The mean winter temperature is in the neighbourhood of 35°, and that of summer about 58° Fahrenheit.

The offices of the *Scottish Travel Association* are at 37, George Street, Edinburgh.

EARLY HISTORY.

Prehistoric Man.—North Britain appears to have been invaded in Palaeolithic times by a succession of races, who died out or were exterminated by other immigrants. The earliest race of which there is any record is that since known as the *Picts*, believed to be of non-Aryan origin, and stated to have been named *Picti* by the Romans on account of the tribal habit of painting the body. The Picts seem to have inhabited the whole of North Britain and to have spread over the north of Ireland. *Picts' Houses* are most frequent in the northern counties of Caithness and Sutherland and in the Orkney Islands, and it is generally believed that the Picts were driven northwards by later Celtic immigrants. Celtic *Goidels* and *Brythons* arrived from Belgic Gaul during the latter part of the Bronze Age and in the early Iron Age, and except in the extreme north of the mainland and in the islands the civilization and speech of the people were definitely Celtic at the time of the Roman Invasion of Britain.

The Roman Invasion.—In A.D. 80 Julius Agricola extended the Roman conquests in Britain by advancing into *Caledonia* as far as the "Grampian" Hills, but after a victory at *Mons Graupius* (since corrupted to "Grampius") he was recalled, and no further advance was made for about 60 years, when the Roman frontier was carried to the isthmus between the Forth and Clyde and marked by the *Wall of Pius*, towards which ran military roads from the Cheviots. The Roman occupation of Southern Caledonia was not so effective as that of South Britain, and before the close of the second century the northern limit of Roman Britain had receded to *Hadrian's Wall*, from the Tyne to Solway Firth, where it was maintained until about A.D. 450.

The Scots.—During the later years of the Roman occupation the garrison was continually harassed by Pictish tribes north of the Wall, aided by Scots (the Gaelic tribe then dominant in Ireland), and when the garrison was withdrawn these *Picts* and *Scots* were the principal enemies of the Celtic Brythons, who are believed to have called in the Saxons to protect them from the invasions of their neighbours. A relic of the struggle between Pict and Brython is still to be seen in the *Catrail*, or Picts' Work Dyke, of Roxburgh (from Torwoodle, near Galashiels, to Peel Fell in the Cheviots). *Christianity* was introduced into Southern Caledonia about 380 by missionaries from Romanized Britain, who penetrated to the northern districts and islands. After the withdrawal (or absorption) of the Roman garrison of Britain there were many years of tribal warfare between the Picts and Scots, the Brythonic Waelisc (Welch) of Strathclyde (South-west Scotland and Cumberland), and the Anglo-Saxons of the Lothians. The Waelisc were isolated from their kinsmen in Wales by the victory of the West Saxons at Chester (613), and towards the close of the 9th century the Scots under *Kenneth Macalpine* became the dominant power in Caledonia. In the reign of Malcolm I. (943–954) the Brythons or Waelisc (Welch) of Strathclyde were brought into subjection, the lowland kingdom of the English (Lothian) being conquered by Malcolm II. (1005–1034). From the close of the 11th century until the middle of the 16th there were constant wars between Scotland and England, the outstanding figures in the struggle being *William Wallace*, who defeated the English at Stirling Bridge (1297), and *Robert Bruce*, who won the victory of Bannockburn (1314). James IV. and many of his nobles fell at the disastrous battle of *Flodden* (1513), and in 1603 James VI., the Stuart King of Scotland and the heir to the Tudor line of England (his mother, Mary "Queen of Scots," was the great-granddaughter of Henry VII.), succeeded Queen Elizabeth on the throne, his successors reigning as Sovereigns of Great Britain. After the abdication (by flight) of James VII. and II., the crown devolved upon *William III.* (grandson of *Charles I.*), and *Mary* (daughter of James VII. and II.) and, their issue failing, upon Anne (second daughter of James VII. and II.). Anne's children died young, and the throne devolved upon George I. (great-grandson of James VI. and I.). In 1689 Graham of Claverhouse "roused the Highlands" on behalf of James VII. and II., but died after a military success at Killiecrankie. In 1715, armed risings led to the indecisive battle of Sherriffmuir, but the movement died down until 1745, when the "Young Pretender" defeated the Royalist troops under Sir John Cope at Preston Pans and advanced to Derby in England (1746). From Derby, the adherents of "James VIII. and III." (the title claimed for his father by the Young Pretender), fell back on the defensive, and the *Jacobite* movement was finally crushed by the Royalist troops under the Duke of Cumberland at *Culloden* (April 16, 1746).

The Hebrides did not become part of the Kingdom of Scotland until 1266, when they were ceded to Alexander III. by Magnus of Norway. Orkney and Shetland fell to the Scottish Crown as a pledge for the unpaid dowry of Margaret of Denmark, wife of James III., in 1468, the Danish suzerainty being formally relinquished in 1590.

EDINBURGH.

EDINBURGH, the Capital of the Kingdom, has a municipal area of 32,402 acres, and a population (Census of 1931) of 438,998 (over the enlarged area). The boundaries were extended in 1920 so as to include the Burgh of Leith and part of the suburban district of the County of Midlothian. The city is built on a group of hills and contains in Princes Street the most beautiful thoroughfare in the world. The principal buildings are St. Giles's Church (restored 1879-83), and St. Mary's (Scottish Episcopal) Cathedral (Sir Gilbert Scott), the Castle (which contains, in St. Margaret's Chapel, the oldest building in Scotland), Parliament House (the present seat of the judicature, containing the Advocates' and Signet Libraries), the University, the General Register House (Robert Adam), Royal Scottish Academy, National Portrait Gallery, and Holyrood Palace (containing parts of the royal palace of James IV. and V.). The city is governed by a town council of 71 members, and sends 6 members to Parliament (including the member for Leith).

Rt. Hon. Lord Provost (1929-32), Sir T. B. Whitson.
Town Clerk, Sir Andrew Grierson, LL.D., S.S.C., J.P.
City Chamberlain, John D. Imrie, M.A., B.COM.

GLASGOW.

GLASGOW, a Royal Burgh, City and County of a City, and the principal commercial centre in Scotland, has a municipal area of 30,046 acres, and an estimated population of 1,088,417. The city occupies the north and south banks of the Clyde, one of the chief commercial estuaries of the world, and its trade was valued at £81,695,332 in 1929, the total net tonnage of the ships entering (1930-31) being 6,916,724 tons; of those cleared 6,842,469 tons. The principal industries are iron and steel works, shipbuilding, chemicals, leather, woollens, muslin-weaving, distilling, tobacco, cotton-mills and furniture. The chief buildings are the Early English Cathedral, built early in the 13th century, and incorporating part of an earlier structure, the University (Sir Gilbert Scott), the City Chambers, the Royal Infirmary and the Western and Victoria Infirmaries, the Art Galleries and the Mitchell Library. The City is governed by a town council of 113 members, and sends 15 members to Parliament.

Rt. Hon. Lord Provost (1929-32), Sir Thomas Kelly.
Town Clerk, David Stenhouse, J.P.
City Chamberlain, A. C. McMillan, C.A.

* The Cities of Edinburgh, Glasgow, Dundee, and Aberdeen are each a County of a City, and the Lord Provost of each is entitled, by virtue of his office, to be appointed Lord Lieutenant.

DUNDEE.

DUNDEE, a City, Parliamentary, Municipal and Royal Burgh, on the left bank of the River Tay, 42 miles N. of Edinburgh, has a municipal area of 6,678 acres, and a population (Census 1931) of 175,583 (an increase of 7,268 since 1921). The principal buildings are University College (St. Andrews University), the Technical Institute, High School, Albert Institute and the Caird Hall Buildings. One of the finest Public Baths is in Dundee. The harbour affords dock accommodation of nearly 38 acres. The principal industries are jute manufacture in all its branches, and various forms of linen weaving, the making of preserves, shipbuilding, engineering, dyeing, and brewing. The City is governed by a town council of 34 members and sends 2 members to Parliament.

The Lord Provost (1930–32), G. A. Johnston.
Town Clerk, W. H. Blyth Martin.

ABERDEEN.

ABERDEEN, a City and a Royal, Municipal and Parliamentary Burgh, 130 miles N.E. of Edinburgh, received its charter as a Royal Burgh from William the Lion in 1179. The municipal area is 6,748 acres, with a population (Census 1931) of 167,259 (an increase of 8,290 since 1921). The tonnage of the ships entered in 1930 was 965,035 tons (and fishing vessels 1,344,565 tons). The chief industries are granite quarrying and working, white fish, salmon and herring fisheries, engineering, chemicals, brewing, distilling, shipbuilding, paper-making, and woollen, jute and linen manufacture. The principal buildings are the East and West Churches of St. Nicholas, Municipal Offices, Marischal College, King's College, Roman Catholic pro-Cathedral, Public Library, H.M. Theatre, Art Gallery and Museum, and the Cathedral of St. Machar (14th century). The City is governed by a Town Council of 37 Members, and sends 2 Members to Parliament.

The Lord Provost (1930–32), James R. Rust.
Town Clerk, George S. Fraser.

* Town with privileges of a Royal Burgh.

Position and Extent.—Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St. George's Channel. The land area of the island is 32,531 sq. miles and its geographical position between 51° 26′ and 55° 21′ N. latitude and from 5° 25′ to 10° 30′ W. longitude. The greatest length of the island, from N.E. to S.W. (Torr Head to Mizen Head), is 302 miles, and the greatest breadth, from E. to W. (Dundrum Bay to Armagh Head), is 174 miles. On the N. coast of *Achill Island* (Co. Mayo) are the highest cliffs in the British Islands, 2,000 feet sheer above the sea. Ireland is occupied for the greater part of its area by the *Central Plain*, with an elevation of 50 to 350 ft. above mean sea level, with isolated mountain ranges near the coast line. The principal mountains, with their highest points, are the *Sperrin Mountains* (Sawel 2,240 ft.) of County Tyrone in the North; the *Mountains of Mourne* (Slieve Donard 2,796 ft.) of County Down, and the *Wicklow Mountains* (Lugnaquilla 3,039 ft.) in the North-East; the *Derryveagh Mountains* (Errigal 2,466 ft.) of County Donegal in the North-West; the *Connemara Mountains* (Twelve Pins 2,695 ft.) of County Galway in the West; *Macgillicuddy's Reeks* (Carrantuohill 3,414 ft., the highest point in Ireland) in the South-West; and the *Galtee Mountains* (3,018 ft.) of County Tipperary, and the *Knockmealdown* (2,609 ft.) and *Comeragh Mountains* (2,470 ft.) of County Waterford, in the South. The principal river of Ireland (and the longest in the British Isles) is the *Shannon* (240 miles), rising in County Cavan and draining the central plain. The Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the western Atlantic seaboard. The *Slaney* flows into Wexford Harbour, the *Liffey* to Dublin Bay, the *Boyne* to Drogheda, the *Lee* to Cork Harbour, the *Blackwater* to Youghal Bay, and the *Suir*, *Nore*, and *Barrow* to Waterford Harbour. As in Scotland, the principal hydrographic feature is the *Loughs*, of which Lough *Neagh* (150 sq. miles) in the north-east is the largest in Ireland and the British Isles, others being the Shannon Chain of *Allen*, *Boderg*, *Forbes*, *Ree* and *Derg*, and the Erne Chain of *Gowna*, *Oughter*, *Lower Erne*, and *Erne*, in the central plain; *Melvin*, *Gill*, *Gara* and *Conn* in the north; and *Corrib* and *Mask* (joined by a hidden channel) in the south. In County Kerry, to the east of Macgillicuddy's Reeks, are the famous *Lakes of Killarney*. The climate of Ireland is more equable than that of Great Britain, and the rainfall is more evenly distributed. The variation in mean temperature is only about 3° Fahrenheit, the summer extremes being 59° in the N. and 62° in the S.

Primitive Man.—Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island, while the use of bronze implements appears to have become known about the middle of the 17th century B.C. In the later Bronze Age a Celtic race of *Goidels* appear to have invaded the island, and in the early Iron Age *Brythons* from South Britain are believed to have effected settlements in the south-east, while *Picts* from North Britain established similar settlements in the north. Towards the close of the Roman occupation of Britain, the dominant tribe in the island was that of the *Scoti*, who afterwards established themselves in Scotland.

Legendary History. — According to Irish legends, the island was settled by a Milesian race, who came from Scythia by way of Spain, and established the *Kingdom of Tara*, about 500 B.C. The supremacy of the *Ardri* (high king) of Tara was acknowledged by eight lesser kingdoms (Munster, Connaught, Ailech, Oriel, Ulidia, Meath, Leinster and Ossory) ruled by descendants of the eight sons of Miled. The basalt columns on the coast of Antrim, eight miles from Portrush, known as the *Giant's Causeway*, are connected with the legendary history of Ireland as the remnants of a bridge built in the time of Finn M'Coul (Fingal) to connect Antrim with Scotland (Staffa).

Christianity.—Christianity did not become general until the advent of St. Patrick. *St. Patrick* was born in Britain about 389, and was taken to Ireland as a slave about sixteen years later, escaping to Gaul at the age of 22. In 432 he was consecrated Bishop at Auxerre and landed in Wicklow to establish and organise the Christian religion throughout the island.

Later History.—The Roman conquest of Britain was not extended to Ireland, and little is known of the history of the country until the invasions of *Northmen* (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished as Findgaill (White Strangers) and the Danes as Dubgaill (Black Strangers), names which survive in "Fingall," "MacDougall" and "MacDowell," while the name of the island itself is held to be derived from the Scandinavian *Ira-land* (land of the Irish), the names of the Provinces being survivals of Norse dialect forms (Ulaids-tir, Laigins-tir, Mumans-tir and Kunnak-tir). The outstanding events in the encounters with the Northmen are the *Battle of Tara* (980), at which the Hy Neill king Maelsechlainn II. defeated the Scandinavians of Dublin and the Hebrides under their king Amlaib Cuarán; and the *Battle of Clontarf* (1014) by which the Scandinavian power was completely broken. After Clontarf the supreme power was disputed by the O'Brians of Munster, the O'Neills of Ulster, and the O'Connors of Connaught, with varying fortunes. In 1152 Dermod MacMurrough (Diarmait MacMurchada), the deposed king of Leinster, sought assistance in his struggle with Ruaidhri O'Connor (the high king of Ireland), and visited Henry II., the Norman king of England. Henry authorized him to obtain armed support in England for the recovery of his kingdom, and Dermod enlisted the services of Richard de Clare, the Norman Earl of Pembroke, afterwards known as *Strongbow*, who landed at Waterford (Aug. 23, 1170) with 200 knights and 1,000 other troops for the reconquest of Leinster, where he eventually settled, after marriage with Dermod's daughter. In 1172 (Oct. 18) Henry II. himself landed in Ireland, with a force larger than Strongbow's, and obtained homage from the Irish kings, but Anglo-Norman rule underwent many fluctuations in the succeeding centuries, being confined in the early 15th century within the English "Pale" of 600 square miles. In the reign of Henry VII. English rule was greatly extended, and the administration of Irish affairs was anglicised by *Robert Poyning*, Lord Deputy of Ireland, who summoned the *Parliament of Drogheda* (Dec. 1494), at which were enacted the Statutes of Drogheda, afterwards known as *Poyning's Law*, making the legislature of Ireland subordinate to and dependent on that of England. A later parliament conferred on Henry VIII. the title of King of Ireland.

CONSTITUTION AND GOVERNMENT.

UNDER the Goverment of Ireland Act, 1920, as amended by the Irish Free State (Consequential Provisions) Act, 1922, and the Northern Ireland (Miscellaneous Provisions) Act, 1928, a separate Parliament and Executive Government were established for Northern Ireland, which comprises the six parliamentary counties of Antrim, Armagh, Down, Fermanagh, Londonderry and Tyrone, and the Boroughs of Belfast and Londonderry. The Constitution of Northern Ireland is Federal in type, certain legislative and fiscal powers being reserved to the Imperial Parliament.

The Northern Irish *Parliament* consists of a House of Commons of 52 elected members (who receive an allowance of £200 per annum) and a Senate of 2 *ex-officio* Senators and 24 Senators elected by the members of the House of Commons on the proportional representation system. Northern Ireland continues under the Act of 1920 to return 13 members to the Imperial House of Commons.

The *Executive* power is vested in the Governor on behalf of His Majesty the King; he holds office for 6 years, and is advised by 7 Ministers responsible to Parliament. [The Cabinet Salaries and the allowances of the Members of Parliament here have voluntarily abated by 15 per cent. for years 1931/32.]

Saorstat Eireann—The Irish Free State.

THE GOVERNOR GENERAL.

His Excellency James McNeill, *born* March 27, 1869, *appointed Governor General* Dec. 15, 1927 ..... £10,000

CONSTITUTION AND GOVERNMENT.

UNDER the *Irish Free State (Agreement) Act*, 1922, the Irish Free State (*Saorstat Eireann*) is a coequal member of the Community of Nations forming the British Commonwealth of Nations. The Constitution, as issued by the Crown, June 16, 1922, contains five Sections, of which Section I. is declaratory of Fundamental Rights. (1) The coequality of the Irish Free State. (2) Power of government derived from the people, in accordance with the Constitution. (3) Irish domicile for seven years, or Irish parentage on either side, conferring Irish nationality, and men and women having equal rights as citizens. (4) Irish the national language, English being recognised as an official language. (5) No titles or honours may be conferred on any citizen, except with the approval or advice of the Executive Council. (6) Liberty of the person inviolable. (7) Dwelling of each citizen inviolable. (8) Freedom of conscience and profession and practice of religion, and no law establishing or prohibiting religion may be passed. (9) Free speech and right of lawful assembly. (10) Free education for all citizens. (11) Natural resources of the State inalienable.

Section II. provides for a legislature (*Oireachtas*) of the King and two houses, the Chamber of Deputies (*Dail Eireann*) and the Senate (*Seanad Eireann*), the former elected by secret ballot and by direct vote of all citizens above the age of 21 years who comply with the existing electoral laws and consisting of not less than one member for each 30,000 of the population and not more than one member for each 20,000 of the population. The latter, consisting of 56 Senators and of 2 Senators from each University, elected by all citizens above the age of 30 years who comply with the existing electoral laws. Every citizen who has reached the age of 21 years is eligible for the Chamber of Deputies; the Senate is composed of citizens who have reached the age of 35 years and have done honour to the nation by reason of useful public service, or who are specially qualified as representing important aspects of the nation's life. Parliament shall hold at least one session each year. Provision is made for the "Initiative" of proposals for laws or constitutional amendments on a petition of 50,000 voters on the register; and for the submission of any bill passed by both houses to a "Referendum" for the decision of the people. In this Section also Article 45 declares that the Parliament (*Oireachtas*) has the exclusive right to regulate the raising and maintaining of such armed forces as are mentioned in the scheduled Treaty in the territory of the Irish Free State, and every such force shall be subject to the control of the Parliament. Save in the case of national invasion, the Irish Free State shall not be committed to active participation in any war without the assent of the Parliament.

Section III. vests the Executive Authority in the King and provides for its exercise as in the Dominion of Canada, by the representative of the Crown. The Executive Council (*Aireacht*) is responsible to the Chamber, and consists of not more than twelve Ministers (*Airi*) appointed by the representative of the Crown, of whom four ministers shall be members of the Chamber, and a number not exceeding eight chosen from all citizens eligible for election to the Chamber, who shall not be members of Parliament during their term of office, and who, if at the time of their appointment they are members of Parliament, shall by virtue of such appointment vacate their seats; provided that the Chamber may from time to time, on the motion of the President of the Executive Council, determine that a particular Minister or Ministers, not exceeding three, may be members of Parliament, in addition to the four members of the Chamber above mentioned.

Section IV. establishes a Judiciary, consisting of Courts of First Instance, and a Court of Final Appeal to be called the Supreme Court (*Cuirt Oachtarach*). The Courts of First instance include a High Court (*Ard Chuirt*), invested with full original jurisdiction in and power to determine all matters and questions whether of law or fact, civil or criminal, and also Courts of local and limited jurisdiction with a right of appeal as determined by law. The decision of the Supreme Court shall in all cases be final and conclusive, and shall not be reviewed or capable of being reviewed by any other Court, Tribunal or Authority whatsoever. Provided that nothing in the Constitution shall impair the right of any person to petition his Majesty for special leave to appeal from the Supreme Court to his Majesty in Council or the right of his Majesty to grant such leave.

Section V. contains certain Transitory Provisions to meet the special circumstances incidental to the establishment of the Legislature, &c.

THE UNION JACK CLUB,

Waterloo Road, S.E. 1. Tel.: Hop. 3511.

Patron-in-Chief: His Majesty the King.

Patroness-in-Chief: Her Majesty the Queen.

Patrons: H.R.H. The Prince of Wales, K.G.; H.R.H. The Duke of Connaught, K.G.

President: Sir Walter R. Lawrence, Bt., G.C.I.E., G.C.V.O., C.B.

Vice-President: Colonel Sir Henry Streatfeild, G.C.V.O., C.B., C.M.G.

Hon. Treasurer: Sir George J. Marjoribanks, K.C.V.O.

Comptroller of Club: Brig.-General Sir Frederick Gascoigne, K.C.V.O., C.M.G., D.S.O.

This is one of our great National Institutions, where Sailors, Soldiers and Airmen can go when on leave or passing through London; a place where they may obtain at moderate charges good meals and comfortable bedrooms and where they find the usual amenities of a club, including Library and Writing Room, Billiard Room, Baths, Barber's Shop, and also a Club Shop in which articles of everyday use and almost everything that Service men require may be purchased. The Club is open throughout the day and night.

The Union Jack Club was erected by public subscription as a National Memorial to those who had fallen in the South African War, and other campaigns, and was opened on July 1st, 1907, by His late Majesty King Edward VII. Membership is open to those below the rank of Officer who are serving on the Active List of the Regular Forces, honorary membership being extended to the Colonial Permanent Forces and to the Navies, Armies and Air Forces of Foreign Powers visiting England. A limited number of ex-Service Warrant Officers, Petty Officers, N.C. officers and men may also be elected members of the Club.

The Club is managed by a Council and a General Committee, which includes representatives of the members.

A considerable extension of the Club with funds raised in all parts of the Empire to commemorate the services of our gallant fighting forces in the Great War of 1914–18 and to provide increased accommodation was completed in 1923.

Since 1926 the Council has been enabled, through the anonymous gift of one of its members, still further to enlarge the premises, bringing the number of beds available to 816, as against the original 208 when the Club opened.

THE UNION JACK HOSTEL,

Exton Street, Waterloo Road, S.E. 1.
Tel.: Hop. 2724. Opened June, 1913.

Patron-in-Chief: His Majesty the King.

Patroness-in-Chief: Her Majesty the Queen.

Patron: H.R.H. the Duke of Connaught, K.G.

President: Brig.-General Sir Frederick Gascoigne, K.C.V.O., C.M.G., D.S.O.

Vice-President: Sir Herbert J. Creedy, K.C.B., K.C.V.O.

Hon. Treasurer: Sir George J. Marjoribanks, K.C.V.O.

Secretary: J. R. Hayward, M.B.E.

Warden: Miss B. R. Morris.

The Hostel provides lodging and accommodation for the wives and children (with or without their husbands and fathers) of members and ex-members of the Naval and Military Forces of the Crown, below the rank of Officer. It is managed by a Council, and though run closely in connexion with the Union Jack Club, the organisation and finances of the two institutions are quite separate from one another.

LONDON: PRINTED BY WILLIAM CLOWES AND SONS, LIMITED, DUKE STREET, STAMFORD STREET, S.E.1.

THE INDIAN EMPIRE extends over a territory larger than the Continent of Europe without Russia. Legally, "British India" means all territories governed by the King-Emperor through the Governor-General of India, or through any governor or other officer subordinate to the Governor-General of India; while "India" means British India, together with any territories of any prince or chief under the suzerainty of His Majesty, exercised through the Governor-General of India or through any governor or other officer subordinate to the Governor-General of India (Act 52–3 Vict., c. 63, s. 18). There are tracts of tribal territory on the N.W. and N.E. frontiers under the political influence, though not yet under the administrative rule, of the Indian Government.

Boundaries.—The political boundary of India marches with Persia and Afghanistan from the Gulf of Oman to Povalo Schveikovski on the Taghdumbash Pamir. From this point the frontier—in many parts not yet clearly defined—touches the Chinese Empire and Nepal, till the limits of French Indo-China are reached on the Upper Mekong. The Indian frontier, on leaving the Mekong, marches with Siam till it reaches the sea at Victoria Point, half-way down the Malay peninsula. Beyond the sea the Indian Empire includes the *Andaman and Nicobar Islands, the Laccadive and Minicoy Islands, Aden* and Perim, besides protectorates over Socotra, Bahrein, and various chiefships along the coast from Aden to the Persian Gulf. Continental India, including Baluchistan, reaches from 8° to 37° N. latitude, and from 61° to 101° E. longitude. Delhi, the new capital, lies in 77° E. long.

Area and Population.—The total area of India proper is about 1,805,000 square miles, with a population of nearly 353 millions (about three-fourths of the population of the British Empire). The British Provinces, as distinguished from the Indian States, comprise 61 per cent. of the area, and nearly 77 per cent. of the population. The details of the 1931 Census (revised totals) are as follows:—

* Districts and Administered Territories.

Physical Features.—Excluding Burma, which forms no part of the Indian peninsula, we may broadly divide the country into three sections, viz., the Himalayan region, the northern river-plains, and the southern table-land.

The Himalayas.—The Himalayas (which lie partly beyond the frontier), with their southern offshoots, form the natural northern boundary of India. The Himalayan range runs for 1,500 miles from N.W. to S.E., with a varying breadth of 150 to 200 miles, and attains a general height of 20,000 feet above the plain, culminating in the loftiest peaks yet measured on the globe—Mount Everest, 29,141 feet, Kunchinjunga, 28,146 feet, and Dhaulagiri, 26,826 feet, near the centre of the range; and Mount Godwin Austen, 28,250 feet, near its junction with the Hindu Kush. The line of perpetual snow is at about 16,000 feet. The Himalayas collect and store up water for the plains below. The slopes afford a representation of the tropical zone (especially on the southern slopes to the E.), the temperate zone (particularly to the S.W. of the range), and the arctic zone as the upward journey is taken from the plains. In the Himalayas are several sanatoria, including Murree, Simla, Mussoorie, Naini Tal, and Darjiling. Himalayan vegetation includes such varied species as the tree-fern, ilex, pine, oak, fir, deodar (cedar), rhododendron, barley, oats, millet, and many domestic vegetables. The fauna are as varied as the flora, and include the bison, musk-deer, yak, wild sheep and goat, bear, elephant, monkey, and tiger, with eagles, partridges, and pheasants. Between the Himalayas and the plains to the S.E. is the great fever-haunted Tarai or Duar jungle, densely forest-covered and full of big game.

The Great Plain.—The northern river-plains, lying at the foot of the Himalayas, comprise the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra, and their tributaries. At no great distance from one another, four rivers take their rise in the Himalayas. The sources of two are on the north side—the Indus, which flows westward for 1,800 miles, and the Tsan-po or Brahmaputra, which flows eastward for nearly 1,500 miles. The other two, on the southern slope, are the Sutlej, which, after flowing W. and S.W. for 900 miles and collecting various other streams, joins the Indus, and the Ganges, which, during a journey S.E. and E. of about 1,550 miles, drains almost all the Bengal plain. The Brahmaputra, after flowing along the northern side as far as the eastern extremity of the Himalayas, turns sharply to the S., then to the W., and finally joins the Ganges, 75 miles from where their combined streams enter the Bay of Bengal. Thus the Himalayas supply India with the water gathered on both slopes. The Indus and Ganges, with their tributaries, are the source of an extensive system of irrigation by canals. The richest, most populous, and most historically famous part of India lies in the basins of these great rivers. Formerly the Ganges was the only great highway of Bengal; it is still the fertiliser and the water-carrier. But a close network of railways is increasingly used for transport. The richness of the Indo-Gangetic plain, with its ample rainfall, enables it to support a dense population, almost wholly agricultural. The density of the population rises in some districts to 900 per square mile. On the other hand, in Baluchistan there are only 6 persons to the square mile. The population has increased most in the densest areas, and pressure on the soil is severe in parts of Bihar and the United Provinces. In Northern India there are two harvests, *rabi* (spring) crops being reaped in March and April, *kharif* (autumn) crops in October to December. In the north we find wheat, pulse, maize, millet, barley, and tea; while in the south, indigo, cotton, sugar-cane, jute, oilseeds, tobacco, opium, and spices are produced. Among the fauna are monkeys, panthers, tigers, leopards, hyenas, jackals, squirrels, elephants, deer, crocodiles, and snakes. Salt, mica, and coal are the chief minerals. The Ganges delta yields rice, bamboos, and a large variety of palms. The Aravalli range, the primeval chain of India, divides Rajputana from the Central India States. To the N.W. of the peninsula lies the mountainous, barren, and thinly populated region of Baluchistan.

The Deccan.—Just as the Himalayas on the N. and the Hindu Kush and Suleiman Mountains on the N.W. form natural barriers of defence for Hindustan, so do the Vindhya Mountains, running almost due E. from the head of the Gulf of Cambay, north of the Nerbudda River, form a firm southern boundary to the river-plains of Northern India. Southern India, or the Deccan, is a plateau of triangular shape and very old geological formation, bounded on two sides by the Malabar and Coromandel coasts, which converge at Cape Comorin, and on the third by the Vindhyas. The Eastern and Western Ghauts all but complete this environing triangle of mountain ranges. In the extreme N.W., south of the Vindhyas, and parallel to them, but north of the Western Ghauts, we find the Nerbudda and the Tapti flowing westwards, their basins being sharply defined by the Satpura Mountains, which lie midway between them. As the Western Ghauts lie close to the coast, and afford no exit for rivers, there are no streams on the Malabar coast south of the Tapti; all the rivers flow eastwards, through defiles in the Eastern Ghauts, into the Bay of Bengal. The four chief rivers are the Mahanuddy, in the extreme N.E. (520 m.), the Godavery (900 m.), the Kistna (800 m.), and the Cauvery (472 m.), at intervals further to the south. The physical

geography of Southern India has shaped its history: the S.W. coast, shut in by mountains, is very primitive and moves slowly; the S.E., open and easy of access by sea and towards the interior, has made great progress. The mountain slopes of this region, especially those of the Western Ghauts, which rise to 8,000 feet in the Nilgiris, are still covered with the splendid vegetation of primeval forests. Teak, ebony, satinwood, sandalwood, palm, and bamboo abound. The jungles in the E. are very deadly. The tiger, bison, leopard, deer, and various smaller game afford sport. Snakes are found everywhere. In the valleys and on the higher plains many valuable crops are raised, chiefly rice, millet, cotton, oilseeds, coffee, tea, indigo, tobacco, and chinchona. The black cotton soil is very fertile. There is irrigation by dams, wells, tanks, and canals. The southern tableland has furnished considerable supplies of minerals. At present the minerals principally worked are coal, manganese ore, mica, monazite, and gold.

Burma.—Beyond the Bay of Bengal is the large province of Burma, watered by the Irrawaddy and its tributaries and by the Salween. The delta region is flat; further inland are hills and rolling downs, while the north is mountainous. Rice is the chief staple. Millet, cotton, sesamum, and tobacco are also grown. The forests, particularly of teak, make a considerable contribution to the exports. Petroleum is produced on a considerable scale, and jade, wolfram, and rubies are mined. The fauna include monkeys, jackals, tigers, elephants, bison, and deer.

Climate.—About half of India is within the tropics, but the greatest extremes of heat and cold are in the N.W. In the Himalayas the climate is moist and cold. In Northern India it is dry, and the winters are rather cold. In tropical Southern India the climate is more equable. Calcutta, Bombay, and Madras all have an equable climate, owing to proximity to the sea. India depends for its fertility upon the monsoon rains. The S.W. monsoon brings moisture from the ocean south of the Equator, and reaches the west coast early in June and the northern provinces late in June. The mountains arrest these currents and precipitate rainfall, which averages 60 inches in the sub-Himalayan region, 39 inches in the Indo-Gangetic plain, and 30 inches in the Deccan, but is small in Sind and Rajputana. Madras benefits by the N.E. monsoon in the autumn.

Population.—The sixth general census of India was taken on the 26th February, 1931. The returns (revised totals) gave a population of 352,986,876, as compared with 318,942,480 in 1921 (for details *see* p. 641), an increase in the ten years of 10·6 per cent. The census total of 1931 is divisible into 271,749,312 (or nearly 77 per cent.) for British India, and 81,237,564 (or over 23 per cent.) for Indian States. India is not over-populated, for two-thirds of the people live on one-quarter of the area. In Burma, Assam, and elsewhere a much larger population might subsist. There were in 1931 37 towns with a population of over 100,000. Urban areas of over 5,000 people comprise only about 10 per cent. of the total population.

Caste.—Owing to the operation of the caste system India is broken up into a large number of mutually exclusive aggregates, the members of which are forbidden by an inexorable social law to marry outside the group to which they themselves belong. A caste may be defined as a collection of families, or groups of families, bearing a common name, which usually denotes or is associated with a specific occupation. The boundary of a caste may be said to be fixed by the rule restricting intermarriage, but its social status depends on the occupation of its members and their habits in respect of diet. The chief castes are:—Sheikh (33,388,000), Brahman (14,255,000), Chamar (11,225,000), Ahir (9,032,000), Rajput (8,773,000), Burmese (7,827,000), Jat (7,375,000), Maratha (6,566,000).

Religions.—The population by religions in 1921 includes 216,734,586 Hindus (68 per cent. of the total), 68,735,233 Muhammadans (21 per cent.), 11,571,268 Buddhists (3·6 per cent.), nearly all in Burma, leaving nearly 7 per cent. for all other religions, including 4,754,064 Christians (seven-twelfths of whom are in Madras, Travancore, and Cochin), 3,238,803 Sikhs, 1,178,596 Jains (a decline), 101,778 Parsis, and 9,774,611 described as Primitive or Animists, who believe in magic and strive to propitiate impersonal forces. The Muhammadans, who are increasing faster than the Hindus, are influenced by the caste system and other Hindu characteristics. The number of Indian Christians has increased nearly threefold since 1872.

Occupations.—Over 72 per cent. of the population was in 1921 dependent on agricultural and pastoral pursuits. Industrial occupations support 33,000,000 persons, of whom nearly one-fourth are dependent on textile industries. The most important of these are industries connected with cotton, which employ nearly 6,500,000 persons, the majority of whom depend on hand-weaving. The public services comprise over 4,825,000 persons.

Sex.—Marriage is almost universal owing to religious obligations. The movement against infant marriage and enforced widowhood is gaining ground. There were in 1921 over 26,834,000 widows in India. The males outnumbered the females in 1921 in the proportion of 1,000 to 945, and 1,000 to 943 in 1931.

Languages.—India has 222 vernacular languages, of extraordinary variety. The languages spoken by 316,056,000 persons in 1921 are grouped in seven families. The principal languages are Western Hindi (spoken by 96,714,000 persons), Bengali (49,295,000), Telugu (23,601,000), Marathi (18,798,000), Tamil (18,780,000), Punjabi (16,231,000), Rajasthani (12,681,000), after which come Oriya, Kanarese, Gujarati, Burmese, and Malayalam. Hindustani, a dialect of Hindi, has become the literary language of Hindustan, and is the *lingua franca* of India. English is understood by many.

A Brief Sketch of Indian History.

ALEXANDER'S invasion of India (326 B.C.) is the first landmark of Indian history. A dim outline of earlier events can be traced from the evidences of race and language, from the traditions contained in ancient Indian literature, from accounts by later Greek and Chinese writers, and from coins and inscriptions. The oldest Indian books are supposed to date from about 1500 B.C.; they are written in Sanskrit, a language akin to Persian and to the principal European languages. The writers of these books were Aryans, a race which, as their traditions indicate, came into India from north of the Hindu Kush. They found in India, and conquered, a population of yellow-skinned type in the Himalayan districts, and a short, dark-skinned race, of low civilisation, in the rest of India. Of both these types there are still survivals. The religion and metaphysics of the Aryans are to be found in the *Vedas* and *Upanishads;* their epics, the *Mahabhárata* and *Rámáyana,* extol their mythical heroes; while in the *Code of Manu* we find a picture of Indian society, rather as the priestly caste of *the day wished it to exist, than as it actually* existed. The ascendancy of the Brahman priesthood over the soldier class of Kshetriyas is represented as fully established. The system of caste, originating in the attitude of the *Aryas* (kinsmen) to the dark and servile aborigines, generally prevails, and the people are organised in village communities. In the sixth century B.C. a new religion arose, called Buddhism. Its founder was Gautáma, a prince of the Kshetriya caste, who took the name of Buddha, the "awakened," and died about 487 B.C. His supposed remains were discovered near Peshawar in 1909. His tenets are contained in the *Tripitaka,* the Buddhist gospel. Buddhism was, in India itself, mainly a social reform, a revolt against the pride of caste and the exclusiveness of the Brahman priesthood. It prevailed widely from 250 B.C. to 350 A.D., but was never quite general, and existed

side by side with Brahmanism, which it never succeeded in ousting. At length it lost ground, less through persecution than through a change in popular feeling; and before the twelfth century it had become practically extinct in India itself, though it still flourishes not only in Siam, China, and Japan, but also in Nepal, Burma, and Ceylon. Its decline in India was accompanied by a revival of Brahmanism, much modified.

According to Herodotus the twentieth satrapy of Persia at one time included part of the north-west of India. Alexander (326 B.C.) did not penetrate beyond the tributaries of the Indus, though he sailed down the river. At his death his Indian possessions fell to Seleucus, whose ambassador, Megasthenes (306 B.C.), has left an account of the country under the rule of Chandragupta, the Greek Sandracottus. Megasthenes describes the democratic village communities of the Punjab, speaks of the people as brave and truthful and adverse to litigation, and notes the absence of slavery. Asoka (272–231 B.C.), the grandson of Chandragupta, whose edicts on stone pillars throw light upon this period, was a convert to Buddhism, which became the State religion. Our last contributors to a knowledge of India before the period of continuous authentic history are the Buddhist pilgrims from China who visited the country between 399 and 695 A.D.

The influence of the Greek conquest was swept away by the Scythians, who poured in many waves, between about 165 B.C. and 320 A.D., over Northern India. Their inroads left a lasting influence on the character of the population, and profoundly modified the religious beliefs and domestic institutions of the Hindus. The sixth century was a period of confusion. The emperor Harsha (606–648), after many years of fighting, made himself master of Northern India, and ended his reign in piety and peace. From about 650 to 950 anarchy prevailed.

The Arab conquest of Persia, towards the middle of the seventh century, brought the successors of Muhammad to the Indus, and in N.W. India they made some temporary acquisitions; but three centuries were to pass before the foundations of a durable Muhammadan empire were laid. It was in 999 that Mahmud of Ghazni (in Afghanistan) began a long series of incursions into India, no fewer than fifteen expeditions taking place between 999 and 1027, one of which carried him beyond the Jumna, while another ended in the capture of Somnath, in Kathiawar. The succeeding dynasties of Afghan kings held power in India for 500 years; but their advance was gradual, for it was not till 1206 that Delhi was taken and the greater part of Hindustan annexed by Kutb-ud-din, whose memory is perpetuated by the Kutb Minar, near Delhi. The first Muhammadan invasion of the Deccan took place in 1294.

THE MOGUL EMPIRE.—The Muhammadan Mongols, or Moguls, after overrunning Central and Western Asia, arrived in 1219, under Genghis Khan, on the frontiers of India, but did not cross the Indus. During the reign of the last monarch of the Taghlak line, the famous Tamerlane (or Timur) burst into India at the head of a mighty host, captured and sacked Delhi in 1398, and laid waste a great part of Hindustan. A period of weak dynasties followed; frequent invasions from without, and general misrule and anarchy within, paved the way for larger conquests by the Mogul Emperors. In 1526 *Babar*, a direct descendant of Timur, overthrew the last of the Afghan kings at Panipat, and founded the MOGUL EMPIRE, which at his death extended from the Oxus river in Central Asia to the borders of the Gangetic delta. His son, *Humayun* (1530–56), lost the whole of the territory conquered by Babar, but recovered a portion of it (including Delhi) shortly before his death. His victor was Sher Shah Sur, who reigned from 1540–1545. *Akbar the Great*, Humayun's son (1556–1605), spent a long reign in firmly establishing the empire; at his death his dominions extended over Kabul, Kandahar, and all India north of the Nerbudda. Moreover, of the Muhammadan kingdoms of the Deccan, Ahmednagar, Berar and Bidar were absorbed, and Bijapur and Golconda forced to pay tribute. Akbar followed up his conquests by important financial reforms. He was tolerant in religion, and just to all classes of his subjects. Among the great men of his time were the Hindu, Todar Mall, his able finance minister; Abul Fazl, the historian of his reign; and Faiz, the poet. *Jahangir* (1605–27) received in 1616 Sir Thomas Roe, the ambassador of James I. Under *Shah Jahan* (1627–1658) the Mogul Empire reached the zenith of its glory. Many stately buildings, including the Taj Mahal at Agra, testify to his magnificence and taste. The close of Shah Jahan's reign was embittered by the rivalries of his four sons. *Aurangzeb* (1658–1707) defeated and killed his brothers and kept his father a prisoner till death (1666). Aurangzeb had great ability and courage, but religious intolerance, distrust and dissimulation characterised his chequered career. His reign, in some respects splendid, ended in failure. He brought the Mogul Empire to its greatest extent by conquering and incorporating all India as far south as Tanjore. But from this time the decline of the empire began. Four sons disputed the right of succession, and *Bahadur Shah* (1707–12) secured the crown. After four short-lived emperors *Muhammad Shāh* (1719–48), grandson of Bahadur, came to the throne. His viceroys became rebellious, and so contributed to the success of the Mahrattas, who subdued the Deccan. About 1724 part of the Deccan became practically independent under Nizam-ul-Mulk (ancestor of the present Nizam). In 1738, to avenge an alleged insult, Nadir Shah of Persia invaded India, captured Delhi, gave orders for a general slaughter of the inhabitants, and carried off enormous plunder. All the country west of the Indus was lost to the empire. On the death of Muhammad, the phantom rulers, *Ahmad Shah* (1748–1754) and *Alamgir II.* (1754–1759), occupied the throne, and were succeeded by *Shah Alam* (1759–1806), who came to terms with the British.

THE MAHRATTAS.—As the Moguls declined, the power of the Mahrattas increased. They were Hindus, and their country was in the Western Ghats, to the east of Bombay. The founder of their power was *Sivaji* (1627–1680), a chieftain of the family of Bhonsla, who became famous by his raids in the Deccan, and aimed at founding a Hindu kingdom. *Balaji Vishwanath* (1712–1720) Peishwa, or Prime Minister, succeeded in making that office of paramount importance and hereditary in his family, Sivaji's descendants thenceforth holding a merely nominal position. Under the Peishwas, aided by Scindia, Holkar, and the Gaekwar, who formed independent States about this time, the Mahrattas rapidly extended their territory and influence, conquering Gujarat,

Malwa, Berar, and Orissa. Although they were severely defeated at Panipat in 1761 by Ahmad Shah, the Afghan invader, they remained for some time the first power in India, and were the most dangerous opponents of the English. Too often their rule degenerated into a system of organised plunder. With the Pindaris, a horde of freebooters who followed in their train, they became a scourge to the country. It was not until both Pindaris and Mahrattas were finally overthrown in 1818 that India enjoyed the blessings of internal peace. The Mahratta empire, containing within itself the seeds of disintegration, was fated to bend before the superior sway of Europeans, who had gradually extended their power in India.

THE SIKHS.—The Punjab lay beyond the reach of the Mahrattas. There the decay of the Mogul empire gave the opportunity, not to a nation, but to a religious sect, united by military discipline, to establish territorial dominion. The founder of the Sikh religion was *Nanak Shah*, a Hindu reformer, born near Lahore in 1469. He preached the one God, purity of life, and abolition of caste. He had ten successors, named *gurus* or apostles, ending with *Govind Singh* (1708). The sect, though cruelly persecuted, survived, and gradually adopted a political organisation. It became a power under *Ranjit Singh* (1780–1839), who, revolting against the Afghan Amir, by whom he had been appointed Governor of Lahore, founded the kingdom of the Punjab. The powerful army he had organised brought on the collision with the British, and after two wars the Sikh kingdom was annexed, and became the province of the Punjab (1849).

EUROPEAN ADVENTURE.—From time immemorial the lucrative trade of Europe with India and the farther East has enormously enriched in turn each nation that has held it. In the 15th century it was mainly possessed by the Venetians on the European side, and by the Arabs on the Eastern side. The chief trading centres of the Arabs were Calicut, Ormuz, Aden, and Malacca. Seeing the large profits to be derived from this trade, the rising nations of Europe in the 15th century sought to obtain a share. Hence the ardour of the navigators who set out to discover an ocean route to India. The sea route round the Cape of Good Hope was discovered by Vasco da Gama, who anchored before Calicut in May, 1498. From that time until they lost their naval supremacy, a century later, the *Portuguese* enjoyed practically a monopoly of Indian trade. The first Portuguese viceroy, Francis of Almeida (1505–1509), established numerous factories and fortresses; while his successor, Alfonso de Albuquerque, captured Goa (1510), and extended the Portuguese dominion, notably on the Malabar coast. This dominion for 60 years from 1542 was tantamount to an entire regulation of the Asiatic coast trade with Europe from the Persian Gulf to Japan. It was stained by great cruelty. Up to the union of the crowns of Spain and Portugal in 1580 under Philip II., the Portuguese brought Indian products to Lisbon, whence the Dutch carried them to other parts of Europe. But when Philip II., on account of the Dutch revolt, shut Lisbon against them, the *Dutch* were driven to trade directly with the East. In 1602, by amalgamating existing trading companies, they formed "The Dutch East India Company," and the principal Portuguese settlements in the East were gradually captured. By 1661 the Portuguese held only those remnants of their Indian possessions which they still hold. The Dutch, who had some small trading factories, were in turn forced by the British to relax their hold on India. *French* and *Danish* East India Companies were established in 1601 and 1616 respectively. The latter achieved little, but, as will be seen directly, the French had a brief but brilliant period of influence in the middle of the 18th century.

ENGLISH DOMINION.—At the close of the 16th century the English became eager to share in the profits of Indian commerce. After some smaller ventures, the London East India Company was incorporated by Queen Elizabeth by royal charter on 31st December, 1600. There were 217 subscribers of the capital of £68,373, and the official title was "The Governor and Company of Merchants of London trading to the East Indies." A second charter in 1609 made the Company's privileges perpetual. The Portuguese resisted the new competitors, who nevertheless obtained a permanent footing at Surat after several stubborn engagements off Swally in 1612. In 1615 the British ambassador, Sir Thomas Roe, supported by the Emperor Jahangir, greatly improved the position of the Company. In 1639 the English acquired a strip of land on the east coast, built a factory there, fortified it, and named it Fort St. George; in 1653 this settlement of Madras became a Presidency. In Charles I.'s reign rival enterprises led to confusion and piratical excesses, but in 1657 co-operation and discipline were secured by the charter granted by Cromwell to a single company comprising the whole body of merchants. The charter was renewed by Charles II., in whose reign the Company enjoyed great prosperity. When, in 1662, Charles II. married Katharine of Braganza, a part of her dowry from Portugal was the Island of Bombay; in 1668 he transferred all his rights over it to the Company for an annual payment of £10. In 1687 Bombay replaced Surat as the seat of the western Presidency. Although in 1633 the Company had obtained certain treaty rights in Bengal from the Mogul, and in 1651 a factory had been established at Hooghly, yet in that part of India they held no territory as in Bombay and Madras. In 1688 the Muhammadan rulers forced them to abandon their settlement, but being invited to return, they laid, in 1690, amid swamp and jungle, the foundations of the Presidency of Fort William, which was destined to develop into the city of Calcutta. In 1693 a new charter was granted to the company. In 1698 a charter was granted to a rival company called "The English East India Company," to distinguish it from the old "London Company." After a brief period of conflict and trade losses, the rival companies came to terms in 1702; and in 1708 they were amalgamated under the title of "The United Company of Merchants of England trading to the East Indies."

When Great Britain engaged in war with France in 1744, the rival Companies of England and France came into collision, with the result that Madras was captured in 1746. Had Dupleix been well supported from home, he might have founded a French empire in India. The first reverses of the English were retrieved by Clive, whose gallant defence of Arcot (1751) was followed up by a series of brilliant movements, culminating in the utter defeat of the

French army by Coote at Wandiwash in 1760, and in the capture of Pondicherry in 1761, which completed the ruin of the French Company. Since then the territory retained by the French in India has been insignificant; and in it they are forbidden by treaty to hold any considerable military force. The tragedy of the Black Hole of Calcutta (1756) summoned Clive from Madras, and his victory at Plassey over the Nawab of Bengal in 1757 made British influence predominant.

Clive was appointed first Governor of Bengal in 1758. In 1760 he returned home, and in 1763 the English were again embroiled in Bengal, but completely defeated their opponents at Buxar (1764). In 1765 Clive (now Lord Clive) returned to Bengal as Governor, and before he left finally in 1767 he succeeded in reforming the services, in which great abuses existed. Owing to Clive's efforts, the Company in 1765 received from the Emperor at Delhi the *diwani* or fiscal administration of Bengal, Bihar and Orissa, with the Northern Circars (Madras), and 25,000,000 people came under their government. Thus were laid the foundations of England's territorial dominion in India.

After an interval of misrule *Warren Hastings* (1772-85) was appointed Governor of Bengal, and in 1774 Governor-General, on the creation of that office under the Regulating Act of 1773. He vigorously reformed the revenue system and judicial procedure. Hastings was the first great administrative organiser of the British possessions. He greatly increased the power and territory of the Company, notwithstanding the opposition of his Council. Mysore in 1760 had been seized by Hyder Ali, a Mussulman adventurer, and a powerful and inveterate enemy of the English. By repelling Hyder Ali's memorable invasion of the Carnatic (1780), and defeating the triple alliance of the Nizam, the Mahrattas, and Hyder Ali, Hastings probably saved British India. On his return to England he was impeached on a number of charges, but acquitted.

The first administration of *Lord Cornwallis* (1786-93) was marked by a thorough reform of the Company's Civil Service, by the introduction of a permanent settlement of the land revenue, by a reform of the judicial system, and by the third Mysore War, in which he defeated Tippoo, the son and successor of Hyder Ali. The rule of *Sir John Shore* (1793-98) was uneventful.

The administration of the *Marquess Wellesley* (1798-1805) was distinguished by many important events. Tippoo, as hostile to the English as Hyder, was in 1798 in secret correspondence with the French, who were then dominant in the military councils of the Nizam and of Scindia, were established in Mauritius, and under Napoleon, then engaged in his Egyptian campaign, were aiming at a great Eastern Empire. *Lord Wellesley saw the necessity of crushing* this dangerous Power, and the Fourth Mysore War ended in the capture of Seringapatam (1799), the death of Tippoo, and the conquest and restoration of Mysore to a representative of the family of Hindu Rajas whom Hyder Ali had dethroned. The Treaty of Bassein (1802) broke up the Mahratta confederacy, but led to the Second and Third Mahratta Wars, which curtailed the power of Scindia and Holkar, and increased the strength and extent of the Company's dominions. Lastly, Lord Wellesley developed, if he did not initiate, a system of subsidiary alliances with Native States, which aimed at making the British the one paramount Power, while giving greater security than the balance of power attempted by his predecessors. Wellesley doubled the territories of the Company, and transformed a mercantile body into a political power with a preponderating influence throughout India. During the brief second administration of *Lord Cornwallis* (1805), and that of *Sir G. Barlow* (1805-7), Wellesley's policy of subsidiary alliances was reversed.

Lord Minto (1807-13) established peaceful relations with the Punjab, Afghanistan, and Persia, through the mediation of Metcalfe, Elphinstone, and Malcolm respectively. On the renewal of the Company's charter in 1813 the monopoly of Indian trade was abolished.

Under the *Marquess of Hastings* (1814-23) a severe struggle with Nepaul ended with the Treaty of Sagouli (1816), which still regulates India's relations with that State. The annexation in 1818 of the territory of the Mahratta Peishwa enlarged Bombay Presidency to its present dimensions. Lord Hastings in the same year crushed the marauding Pindaris of Central India, who had devastated the country in all directions. Reviving Lord Wellesley's policy of alliances, he settled on their existing basis the relations of the Supreme Power with the feudatory States of Rajputana and Central India. He encouraged education. *Lord Amherst* (1823-8) succeeded Lord Hastings. Encroachments on British districts by the King of Ava and his insolent refusal of all redress led to the first Burmese War, which cost 20,000 lives and nearly £14,000,000, but gave to India the provinces of Aracan and Tenasserim, and, practically, Assam.

While *Lord William Bentinck* was Governor-General (1828-35), steam communication with India was introduced, suttee (or widow-burning) was abolished, educated natives were admitted more freely into the service of the Company, and various reforms were passed affecting education, the liberty of the Press, finance, and justice. The new charter of the East India Company in 1833 abolished the remaining monopoly of Chinese trade, introduced reforms in the constitution of the Indian Government, made the North-West Provinces a separate administration, and abolished the restrictions on the residence of British subjects in India. The resolution of *Lord Auckland* (1835-42) to support Shah Shuja against Dost Muhammad brought on the first Afghan War (1839-42), and the serious disaster attendant on the fatal retreat from Cabul. The administration of *Lord Ellenborough* (1842-44) saw the conquest of Sind by Sir Charles Napier and its annexation (1843). *Lord Hardinge* (1844-48) conducted in person the first Sikh War, and fought a series of severely contested battles, ending with Sobraon (1846).

Lord Dalhousie's administration (1848-56) was fruitful in events. The Second Sikh War resulted, after severe fighting, in the submission of the Sikhs and the annexation of the Punjab (1849). The second Burmese War (1852), deprived the King of Burma of Pegu. Lord Dalhousie promoted the introduction of railways and the telegraph. He established cheap postage, promoted steam navigation with England *viâ* the Red Sea, and opened the Ganges Canal. His annexation policy was much criticised at home. It proceeded on the principle that British being preferable to native rule, gross misrule or a break in the natural succession justified, in the interest of the subject populations, the transfer

of a native State to the British Government. In 1849 this "doctrine of lapse" was applied to Satara, and in 1853 Jhansi similarly became British territory; while on the death of the last of the Mahratta Princes of Nagpur, his territory was annexed, and became the Central Provinces in 1853. In 1856, after repeated warnings to the tyrannical ruler of Oudh, that kingdom was also annexed, without bloodshed or fighting.

Earl Canning (1857-62), who succeeded Lord Dalhouise, left England pledged to pursue a policy of peace, but he was destined to face the greatest crisis that has threatened British rule in India. A mutiny of sepoys broke out on the 10th May, 1857, at Meerut, and spread through the whole Bengal Army. Delhi was for some months in the possession of the rebels, and many chiefs joined the revolt. The siege of Delhi, the massacre at Cawnpore, the relief of Lucknow, and the Central India campaign stand out among the stirring events of that momentous time. Although the control of Indian affairs was vested in the Cabinet through the Board of Control, the great mutiny was laid to the charge of the East India Company, whose eventful annals were brought to a close by the transfer of the entire administration of India to the Crown.

INDIA UNDER THE CROWN.—The "Act for the Better Government of India" established the authority of the Crown; and a Proclamation to the Princes, Chiefs, and People of India, dated the 1st Nov., 1858, announced the resolution of Her Majesty to assume the government of the territories in India "heretofore administered in trust by the Honourable East India Company." Legislative Councils were established. *Lord Canning* was succeeded in 1862 by *Lord Elgin*, who, however, died in Nov., 1863.

Sir John (*Lord*) *Lawrence* (1861-69) reformed the finances, which had been seriously burdened by the heavy military expenditure necessitated by the Mutiny. His administration was marked by the Bhutan War (1864) and by the terrible Orissa Famine of 1866. He encouraged irrigation.

Lord Mayo (1869-72) effected many administrative reforms, instituted State railways, promoted the construction of roads and canals, and inaugurated the system of provincial finance, which has since been extended.

During the tenure of office of *Lord Northbrook* (1872-76) the late King Edward VII., then Prince of Wales, visited India. The Viceroy devoted attention to finance and to famine relief. In 1875 the reigning Gaekwar of Baroda was deposed for misrule and disloyalty.

Lord Lytton's administration (1876-80) was made eventful by a terrible famine in Southern India and by the Second Afghan War. In 1877 the Queen assumed the title of EMPRESS OF INDIA.

The peaceful term of the *Marquess of Ripon* (1880-84) was marked by the extension of local self-government, and by fiscal, judicial, educational, and other reforms.

His successor was the *Marquess of Dufferin* (1884-88). In 1885-6 occurred the Third Burmese War, by which Upper Burma with the Shan States was annexed. The N.W. frontier of Afghanistan was delimited, the frontier of India strengthened, and the army increased. The first Indian National Congress met in 1885.

The *Marquess of Lansdowne* (1888-94) continued his predecessor's policy of strengthening the army and consolidating British influence on the frontier. The Indo-Afghan boundary was defined, and a serious outbreak in Manipur was suppressed. He took the first step in currency reform by closing the Indian mints to the free coinage of silver. He reconstituted the Legislative Councils in 1892 by introducing a more popular element, and conferring a limited right of interpellation and criticism in financial matters.

The viceroyalty of *Lord Elgin* (1894-99) was full of events. In 1895 an outbreak in Chitral made necessary a large military expedition to relieve the garrison. Plague broke out in 1896, and has raged more or less severely ever since. In 1896-7 an area of 307,000 sq. ms., with a population of 70 millions, was visited by a grievous famine. In 1897 the border tribes from Chitral to Baluchistan rose against the British garrisons. In the Tirah campaign that followed over 40,000 troops were employed. Several boundaries were settled under Lord Elgin, notably those with Russia on the Pamirs and with France on the Mekong. The frontiers of Afghanistan, Persia, and China were also defined. The general Customs tariff, abolished in 1882, was reimposed in 1894.

Lord Curzon (1859-1904 and 1904-5) succeeded Lord Elgin. In 1899 the pound sterling was made legal tender in India concurrently with the rupee, at the exchange of Rs. 15 to £1. In 1899-1900 occurred one of the worst famines on record, the tracts affected covering 475,000 sq. ms. with a population of 60 millions. Lord Curzon's term of office was a period of reform and reconstruction. He appointed Commissions of Inquiry on irrigation, railways, universities, agricultural banks, excise, and police, all of which suggested important reforms. He instituted agricultural banks and departments, and initiated legislation to free the cultivators from the money-lenders. The famine codes were amended. A new province, under the direct control of the Governor-General in Council, was created, called the North-West Frontier Province (1901). The Aden and the Perso-Afghan boundaries were delimited. An Imperial Cadet Corps of native princes and nobles was inaugurated. Educational policy was reviewed and reforms introduced. A much-needed reform of the police was undertaken. Lord Curzon also secured a perpetual lease of Berar from the Nizam. In 1904 a mission with a military escort proceeded to Tibet, and secured a favourable treaty. During Lord Curzon's absence in England for a few months in 1904 *Lord Ampthill* occupied the post of Viceroy. *Lord Curzon* was reappointed in Dec., 1904. In 1905 the treaty with Afghanistan was renewed. The Viceroy reduced the dimensions of Bengal, and constituted a new province, called Eastern Bengal and Assam, by combining parts of Bengal with Assam. He carried out great reforms in the Army in conjunction with Lord Kitchener (appointed Commander-in-Chief in 1902), but, differing from certain proposals made by the latter, and finding that he lacked the support of the Home Government, he resigned (Aug., 1905).

Lord Minto succeeded in Nov., 1905. The Prince of Wales (now H.M. King George) made a tour in India during the winter of 1905-6. For some years after 1905 there was agitation among Bengalis owing to the partition of Bengal, and a Seditious Meetings Act was passed in Nov., 1907. In his Budget speech in 1907 the Secretary of State, Viscount Morley, foreshadowed important reforms in Indian administration, designed to associate the people more closely with the Government. He

nominated two Indian members to his own Council, and an Indian member to the Governor-General's Council. He appointed Commissions to inquire into railways, into the possibilities of financial and administrative decentralisation, and into the conditions of factory labour, and action was taken on their reports. In 1908 the unrest in Bengal assumed an anarchical character. To mark the fiftieth anniversary of the transfer of India to the Crown a royal proclamation was issued in Nov., 1908, promising extended self-government. Owing to the continued unrest in 1909 and 1910, a Press Act, to control printing presses, was passed.

Lord Hardinge succeeded in Nov., 1910. The Indian Legislative Council in June, 1911, prohibited indentured emigration from India to Natal after 1 July, 1912, and a new Seditious Meetings Act was passed. A great Durbar was held at Delhi on 12 December, 1911, by H.M. King George, to announce his Coronation. On this occasion the King-Emperor also made announcements of new and far-reaching steps in Indian policy, viz., the transfer of the seat of Government from Calcutta to Delhi, and the creation of a Governorship for the presidency of Bengal, of a Lieut.-Governorship for Bihar, Chota-Nagpur, and Orissa, and of a Chief Commissionership for Assam. Delhi was chosen as the capital on geographical, historical, and political grounds. The provincial changes involved a partial rescission of the partition of Bengal and the abolition of the province of Eastern Bengal and Assam, created in 1905. Bengal as reconstituted is a compact Bengali-speaking province, placed under a Governor in Council. A new province, Bihar and Orissa, was formed, including Chota-Nagpur and the Sambalpur district. Assam again became a separate province, under a Chief Commissioner. The reconstituted provinces came into existence on 1 April, 1912. In pursuance of recommendations by the Decentralisation Commission, enhanced powers in respect of appointments and expenditure were granted to local governments having a quasi-permanent provincial settlement. Moreover, greater permanency was arranged for in financial settlements with the provinces, the control of the Government of India being relaxed. In Dec., 1912, the Viceroy took formal possession of the new headquarters at Delhi. The State entry was marred by an attempt on the life of the Viceroy. The outbreak of *The Great War* in August, 1914, was the signal for an outburst of loyalty and devotion to the King-Emperor on the part of the princes and peoples of India. Practically all the ruling chiefs placed their military forces and the resources of their states at the disposal of the Government.

Following on the outbreak of war serious disturbances were started in the Punjab and elsewhere by emigrants returning from Canada and the United States imbued with revolutionary ideas. Order was restored as a result of measures taken under the Defence of India Act, which was passed in March, 1915. Lord Hardinge's term of office as Viceroy was extended from November, 1915, to March, 1916. The Viceroy announced in March, 1916, that it had been decided eventually to abolish the system of indentured emigration from India. Lord Hardinge put forward proposals for post-war constitutional reforms.

Lord Chelmsford succeeded in April, 1916. The year 1917 was marked by certain symptoms of unrest and the development of an agitation for constitutional changes towards self-government, or, in its extreme form, "Home Rule for India."

The Public Services Commission, appointed during Lord Hardinge's administration, reported.
