PATERNOSTER ROW

NOTE.—"WHITAKER" for 1932 is published in two editions:—
640 pages, in Orange *Paper* Cover - - - 3*s. net.*
960 pages, in Red and Green *Cloth* Cover - 6*s. net.*
960 pages (Presentation Bindings).

PREFACE TO THE 64TH ANNUAL VOLUME.
(1932.)

The formation of the National Government and the subsequent General Election have brought about many changes in the sixty-fourth annual issue of "WHITAKER," published early in December in order that it may be available for transmission overseas before the end of the year. The Cabinet as finally reconstructed and the new House of Commons are included, together with articles on the Financial Crisis and Government by Party, with a tabular record of Administrations from Pitt to MacDonald. Statistical Tables are also provided to show the source of the World's Food and other Products, and the quantities and places of origin of Great Britain's Food Imports.

The preliminary results of the Census of England, Wales and Monmouth and of Scotland are duly recorded, with similar figures for the Indian Empire, the Union of South Africa, and for Dominions where the taking of the Census was not postponed on economical grounds. Final figures for last year's Census of the United States are also provided, but the results of the enumeration in Canada are not yet available.

Questions of the Day are again treated in separate articles ranging in alphabetical sequence from "Allotments for Unemployed" to "The Weir Report." These are followed by Annual Summaries of The Year's Weather, Storms, Floods, Science and Invention, Literature, Art, Music, Drama, The Films, and Broadcasting.

In order that the varied contents may be available for instant reference, the Index has again been enlarged and now consists of 140 columns, containing upwards of 20,000 references.

Many suggestions made by correspondents have been adopted, but in some cases action was delayed by pressure due to the political situation, and the consequent change or addition had perforce to be postponed. The Editor-in-Chief is deeply grateful to his collaborators for their valuable assistance during the past year and hopes the result of their co-operation will encourage them to continue the work of preserving and increasing the usefulness of a book which has become so familiar to all who read or speak the language in which it is printed.

Correspondents are earnestly requested to note the *first* day of October as the *last* day for suggestions to reach the Office, at the address given below.

The Leading Business Man's Newspaper of the North and East Midlands . . . . .

The Nottingham Guardian

circulates in every part of a busy area, containing a

Population of over 2,500,000

engaged in the LACE, HOSIERY, BOOT and SHOE, ENGINEERING, CHEMICAL, TOBACCO, MOTOR CYCLE, COAL MINING, IRON and AGRICULTURAL INDUSTRIES, in the five counties of Nottinghamshire, Derbyshire, Leicestershire, Lincolnshire and Rutland.

The Nottingham Guardian

maintains an active, efficient, and thoroughly up-to-date

TRADE INTELLIGENCE BUREAU

the value and practical utility of which to manufacturers and business men, at home and overseas, is proved by the thousands of inquiries that are dealt with every year.

Inquirers may obtain from the Secretary of the Bureau *"Nottingham Guardian," Nottingham:*

Particulars of trade marks and branded goods.

Introductions to manufacturers & buyers in every trade.

The Bureau works reciprocally with all the leading Trade, Government, and Commercial organisations in all parts of the world.

ITS SERVICES ARE ENTIRELY FREE.

London Office: 67 Fleet Street, E.C.4.

Don't worry about the weather

wear THE BURBERRY and be dry and comfortable whatever happens.

THE BURBERRY provides perfect protection in every kind of weather; supplies everything you ask of a Weatherproof or of an Overcoat.

It keeps one dry when it rains and warm when it's cold. It's a staunch shield against bitter winds, yet (and this is very important), airylight and naturally ventilating, the coolest and most comfortable top-coat for warm days.

wear

THE

BURBERRY

and be

dry & comfortable whatever happens

THE BURBERRY BOOK

tells many things you ought to know about The Burberry– the world's best Weatherproof and one of the world's best Overcoats. A copy, with patterns of cloths and prices, post free on mention of "Whitaker's Almanack."

THE COCKTAIL HABIT

"IT is a point of fact (and facts the hardest possible—are the only things the present generation can be expected to take seriously) that Alcohol and its disabilities are no longer exclusively the province of men. In the days when "drink," to use that vulgar but convenient term, meant heavy wines, brandy, whisky, and the coarser spirits, there was very little temptation for women to indulge in it. But things are very different now. Europe has become "cocktailised," and there is, unfortunately, no form of Alcohol more dangerous and at the same time more adapted to the feminine palate.

A cocktail is a strong pick-me-up; it has approximately the effect of a glass of champagne; and it is drink which can be taken at almost any hour. Can anything more tempting, more seductive, and, though she probably does not realise it, more intensely demoralising to the woman of to-day, with her arduous and multifarious duties, be imagined?

THE COCKTAIL HABIT IS THE EASIEST IN THE WORLD TO SLIP INTO.

You are tired after a long day—a couple of cocktails help you to shine at dinner, may also make a dull lunch bearable; they also . . . but why enumerate? Taken at regular intervals like medicine (and that is the way they are consumed by a multitude of men and women), they perform their extraordinary task of "getting you through the day." In time you come to rely upon them . . . but, of course, you tell yourself, it is only during the season, or while you are so busy; you can always give them up. You try to do so—and you cannot. You try again. You are miserable, low, depressed, as you yourself admit, "not fit to speak to," and in ninety-nine cases out of a hundred you again give in. It is inevitable, for the alcoholic habit is scarcely ever broken unaided. Circumstances are too much against it. But if, when you first realised your addiction to this—or any other—form of stimulant, you consulted the Turvey Treatment Association, all your worry, depression, the worst of all human ills, and general unhappiness would be cured—and cured quickly. Instead of struggling vainly and unsuccessfully, you would be able to regard your temporary bondage as an evil dream from which you have awoken. The Turvey Treatment necessitates neither nursing homes, doctors, nor injections—nothing which could conceivably interfere with the ordinary course of life.

The following inquiry form may be filled in and forwarded (or a letter written), on receipt of which full particulars and advice will be forwarded under plain cover.

.....TEAR OFF AND POST.....

Confidential.

To the MEDICAL SUPT. BRITISH T.T. ASSOCIATION.
HANOVER HOUSE,
14 HANOVER SQUARE, LONDON, W.1
(Entrance, Harewood Place.)
Telephone: Mayfair 3406 (2 lines).
Telegrams: Turvert, Wesdo, London.

Please forward me by return, under plain cover, full particulars and advice as referred to in WHITAKER'S ALMANACK.

Name.....

Address.....

PERSONAL CONSULTATION.

When a personal interview is desired, this voucher may be detached and presented at the Consulting Rooms of the Turvey Treatment Association, 14, Hanover Square, London, W. 1. (Entrance, Harewood Place.)

Name or Initials .....

ROYAL SOCIETY MEDALS, 1931.

The King has approved of the following awards by the President and Council of the Royal Society:—

A *Royal Medal* to Sir Richard Glazebrook, K.C.B., F.R.S., for his distinguished work in experimental physics.

A *Royal Medal* to Professor W. H. Lang, F.R.S., for his work on the anatomy and morphology of the fern-like fossils of the Old Red Sandstone.

The following awards have also been made:—

The *Copley Medal* to Sir Arthur Schuster, F.R.S., for his distinguished researches in optics and terrestrial magnetism.

The *Davy Medal* to Professor A. Lapworth, F.R.S., for his researches in organic chemistry, particularly those in connexion with tautomerism and the mechanism of organic reactions.

The *Sylvester Medal* to Professor E. T. Whittaker, F.R.S., for his original contributions to both pure and applied mathematics.

The *Hughes Medal* to Professor W. L. Bragg for his pioneer work on the elucidation of crystal structure by X-ray analysis.

THE COLLEGE OF ESTATE MANAGEMENT
(Incorporated by Royal Charter)
35, Lincoln's Inn Fields, London, W.C.2.
Complete Courses of Preparation for the Examinations of
CHARTERED SURVEYORS' INSTITUTION.
Students are prepared by whole-day tuition at the College or in Evening Classes, or by Postal Tuition.
THE GOLD MEDAL LAST YEAR WAS WON BY A COLLEGE STUDENT.
Apply, THE REGISTRAR.

Spain	2	3
Belgium	2	3
Sweden	2	1
Rumania	2	2

The total world's production of Rye (1931) may be reckoned as 185 million quarters.

Maize.

Country.	Production (Millions of Quarters of 480lb.).	
	Actual 1930.	Estimated 1931.
U.S.A.	243	315
Argentina (1929-30)	29	(1930-31) 48
Soviet Union	prob. 20	say 20
Brazil	18	...
Rumania	18	27
Yugoslavia	16	15
Italy	13	...
Un. of S. Africa	10	7
Egypt	9	...
Brit. India	9	...
Neth. E. Indies	9	...
Mexico	7	...
Manchuria	7	...
Hungary	6	7
Bulgaria	4	4

The maize crops of Argentina and Brazil, &c. for 1931-32 cannot yet be estimated.

The total world's production of Maize (1931) will probably be about 500 million quarters.

THE WORLD'S GRAIN CROPS,

in Millions of Quarters, 480lb. of Wheat, Rye and Maize; 400lb. of Barley; 320lb. of Oats.

	1926	1927	1928	1929	1930	1931
Wheat	520	525	572	520	569	545
Rye	188	205	196	204	202	185
Together	708	730	768	724	771	730
Maize	485	480	460	473	405	500
Barley	181	185	220	218	209	180

BRITISH BEET SUGAR.

The production of Beet for Sugar in England and Wales from small beginnings around the year 1832 has now grown to an area of 348,000 acres farmed by 40,000 growers, producing in 1930 3,060,000 tons of Beet (washed weight) fetching an average price to the grower of 50s. per ton delivered factory. Eighteen factories thus produce 420,000 tons of sugar and employ 9,900 workmen for over 100 days of the year in addition to about 30,000 workers employed in the fields (part time, about 4 months in the year). The dried pulp residue fetched in 1929-30 about £650,000 and the trading profit to the factories, after paying £673,000 in salaries and wages, was £1,738,000. The subsidy paid by the Government in 1929 amounted to £4,233,776 and for 1930 was estimated at £6,139,000.

Great Britain and Northern Ireland consume per annum a total of 1,850,000 tons of Sugar, or 90lb. per head of population.

NOTE.—To ascertain any day of the week, first look in the table for the year required, and under the months are figures which refer to the corresponding figures at the head of the columns of days below. *For Example:*—To know on what day of the week Aug. 4 fell in the year 1914, in the table of years look for 1914, and in a parallel line, under Aug., is fig. 6, which directs to col. 6, in which it will be seen that Aug. 4 fell on Tuesday.

† 1752 same as 1772 from Jan. 1 to Sept. 2. From Sept. 14 to Dec. 31 same as 1789 (Sept. 3–13 were omitted).

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

January 1. Day breaks 6*h.* 2*m.* Civil twilight ends 16*h.* 52*m.* Night begins 18*h.* 5*m.* The length of the Day from Sunrise to Sunset is 7*h.* 51*m.*

The ending of Civil twilight is here defined as the time when the Sun's centre is 7½° below the horizon. Day breaks and Night begins when it is 18° below.

Jan. 2. Earth at least distance from the Sun. Perihelion, 91,346,000 miles.

Jan. 6, 6*h.* Mercury in conjunction with ☽. ☿ 7° N.

Jan. 7-8. Eclipse of Jupiter IV. See p. 58.

Jan. 8, 9*h.* Mars in conjunction with ☽. ♂ 4° N.

Jan. 8, 13*h.* Saturn in conjunction with ☽. ♄ 5° N.

Jan. 10, 11*h.* Venus in conjunction with ☽. ♀ 2° N.

Jan. 11. Mercury at Greatest elongation. 23° W.

Jan. 11, 9*h.* Mars in conjunction with Saturn. ♂ 0·9° S.

Jan. 15, 5*h.* Uranus in conjunction with ☽. ♅ 2° S.

Jan. 16. Saturn in conjunction.

Jan. 18. Occultation of Alcyone and other stars of the Pleiades Group by the ☽. See p. 59.

Jan. 24, 18*h.* Jupiter in conjunction with ☽. ♃ 2° S.

In this month the Mornings increase 25*m.*, the Afternoons 45*m.*

APPARENT RIGHT ASCENSION AND DECLINATION OF THE PLANETS AT NOON.

Notes on Time Numeration: Tables of the Moon, &c.—According to the practice of recent years, the day as treated in this Almanack is divided into 24 hours, numbered from 0 to 23, the hour following the midnight which begins the day being called 0. This system, formerly known as G.C.T., was adopted for astronomical purposes in 1925 and is now indicated by the initials G.M.T., U.T. (*Universal Time*), or W.Z. (*Weltzeit*), according to choice.

The attempt has been made by astronomers to have this system used in railway time-tables, but the authorities will not agree to this unless the 24-hour system is adopted nationally. A proposal that this should be done was brought before the House of Lords, ineffectually, last year.

On page 3 of each month the position of the Moon, and other details relating thereto, are given for the *midnight which ends the day specified in the first column.* The second column gives the

Time of High Water at the undermentioned Places—

Morning and Evening Stars.

☿ Mercury being at Greatest Western elongation on January 11th is a morning star and will be low down in the south-east at 7 o'clock in the first fortnight of the month.

♀ Venus is an evening star and may be seen soon after sunset not very high in the south-west sky.

♂ Mars in conjunction with the Sun on February 1st is not visible either in the morning or evening sky.

♃ Jupiter is a conspicuous object almost throughout the night. It is moving slowly westward not far from Regulus and rises in the E.N.E. an hour or two after sunset. Magnitude −2·0 to −2·1.

♄ Saturn being in conjunction on the 16th rises and sets nearly with the Sun throughout the month and will not be seen.

time of the rising which happens during that day, and the figures in the two following columns show the time of the southing and of the setting *which next follow that rising*, and these sometimes happen after the midnight which ends the day. In such cases the figures are in heavy type, and it is to be remembered in using this table that these distinctive figures always indicate a time *on the morrow of the day of its line*. A similar system is followed in the Tables of the planets. (See pages 5, 9, 13, &c.) In the ephemerides of the planets on page 3 of each month, italic figures are occasionally used (pages 8, 12, 16, 44) to indicate the change of sign of the declination noted in the heading.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

February 1. Day breaks at 5*h.* 45*m.* Civil twilight ends at 17*h.* 35*m.* Night begins at 18*h.* 44*m.* The length of the Day is 9*h.* 4*m.*

Feb. 1. Mars in conjunction.

Feb. 5, 2*h.* Saturn in conjunction with ☽. ♄ 4° N.

Feb. 5, 7*h.* Mercury in conjunction with ☽. ☿ 3° N.

Feb. 6, 11*h.* Mars in conjunction with ☽. ♂ 2° N.

Feb. 7. Jupiter in Opposition. Distance from Earth 403,700,000 miles.

Feb. 9, 21*h.* Venus in conjunction with ☽. ♀ 1° S.

Feb. 11, 15*h.* Uranus in conjunction with ☽. ♅ 3° S.

Feb. 20, 22*h.* Jupiter in conjunction with ☽. ♃ 3° S.

Feb. 26. Mercury in superior conjunction.

Feb. 26. Neptune in Opposition. Distance from Earth 2,710,670,000 miles.

Feb. 27, 7*h.* Venus in conjunction with Uranus. ♀ 0·8° N.

In this month the Mornings increase 52*m.*; the Afternoons 51*m.*

Constellations near the S. meridian at 22*h.*: Auriga, Taurus, Orion, Gemini, Canis Minor, Monoceros, Canis Major, Argo, Cancer, Hydra.

APPARENT RIGHT ASCENSION AND DECLINATION OF THE PLANETS AT NOON.

Double High-Water.—Among the Tidal-Constants on pages 52 and 53 it will be seen that for Southampton and some other places near the Isle of Wight two times of High Water are indicated, differing by two or three hours. This is the result of observation, but an explanation sometimes advanced that it is the effect of the combination of two tides, one of which passes round the Island, the *other* arriving normally, is believed to be erroneous. In shallow water the main tidal oscillation generates a secondary oscillation of small range and half the period of the main oscillation, and normally in an estuary this tends to accelerate high water and to retard low water. In the neighbourhood of the Isle of Wight the normal relationship of primary and secondary oscillation is disturbed and the four maxima of the secondary tide become prominent at Southampton, and the four minima at Portland, so that at the former place there are double high waters and at the latter there are double low waters.

Time of High Water at the undermentioned Places—

* The days thus indicated throughout the Almanack are those on which High Tides may be expected. Strong northerly winds in the North Sea and a low barometer with heavy rains in the counties drained by the Thames may cause a higher rise of the river, and the low-lying riverside districts to be flooded.

Morning and Evening Stars.

☿ Mercury rises before the Sun in the first part of the month, but will not be seen.

♀ Venus continues to be an evening star setting later night by night, and grows brighter. It will be a prominent object in the south-west sky in the early evening. Magnitude −3·5 to −3·6.

♂ Mars rises almost with the Sun throughout the month and sets before, so that it will not be visible.

♃ Jupiter being in Opposition on the 7th, is above the horizon throughout the night. It will be due east at altitude 20° at about 6 o'clock in the evening in the middle of the month. Magnitude −2·1.

♄ Saturn rises rather more than an hour before the Sun in the S.E. by E. It is scarcely likely to be visible. Magnitude +0·8.

The Tidal Predictions in these pages and the Tidal Constants on pages 52 and 53 have been supplied by the Liverpool Observatory and Tidal Institute. The predictions for Immingham, Greenock and Leith are Crown Copyright, which is reserved, and are published here by permission of the Controller of the Stationery Office and of the Hydrographer of H.M. Navy.

The predictions for London Bridge, Liverpool and Port of Bristol are published by permission of the Port of London Authority, the Liverpool Printing and Stationery Company and the Port of Bristol Authority respectively, who are the owners of the copyrights.

Bissextile.—When Julius Cæsar reformed the Roman Calendar in the year 46 B.C., 365¼ days was adopted as the mean length of the year, that being the value then current in Egypt. Three out of four years were given 365 days, and the fourth, 366 days, the sixth day before the Kalends of March being repeated. The intercalary day came to be called *ante diem bis sextum Kalendas Martias*, or more briefly *bissextum*, whence our word bissextile for leap-year.

Before the introduction of this calendar the Roman year consisted of 355 days, with a month of 23 days intercalated after February 23 when necessary. This intercalation had, however, beer sometimes omitted, and it was found necessary to make the year 46 B.C. consist of 445 day This year is called the Year of Confusion.

Morning and Evening Stars.

☿ Mercury at Greatest Elongation (E) on March 23 is an evening star. It may be seen ten days before that date, for a few minutes shortly before 7 o'clock, but it sets later, and the interval for observation will be longer on the following evenings, when it may be seen low down, a few degrees north of west.

♀ Venus at sunset will be placed in the west-south-west at altitude between 30 and 40 degrees. It will be near the Pleiades at the end of the month. Magnitude −3·6 to −3·8.

♂ Mars continues to rise and set nearly with the Sun, and will not be visible either in the morning or evening.

♃ Jupiter is high in the south-east sky in the twilight and above the horizon until dawn. It is now midway between the Twins and Regulus. Magnitude −2·0.

♄ Saturn rises at dawn, and will be 5 degrees above the horizon in the south-east at 5 o'clock at the end of the month, but is not likely to be conspicuous. Magnitude +0·9.

The Date of Easter.—Easter Day was on March 27, as it is this year, in 1921 and 1910. The next occasion when it will be so, according to our present method of assigning the date, will be in the year 2005.

The Financial Year.—The first day of the financial year for the purpose of public accounts is now April 1, as it has been since the year 1855. The dates for earlier periods have been 1700–1751, September 30; 1752 to 1799 (inclusive), October 11; 1800 to 1854 (inclusive) January 6. The year for assessment of Income-tax has begun on April 6 since the tax was first imposed in 1798.

The Planet Venus.—Venus is now very prominent in the evening sky, and at the end of April does not set until 10 minutes before midnight. This is periodic, and occurs every eighth year, *i.e.* in alternate leap-years. The planet describes her orbit round the Sun in 224·7 days, and 13 of these periods are very nearly the equivalent of 8 solar years. It is also the case that the synodic period of Venus, which is the interval between successive conjunctions with the Sun, superior or inferior, or the interval in which the faster moving interior planet gains a lap on the Earth, is 584 days, and five of these are equal to 8 solar years. Consequently, at intervals of that number of years, greatest eastern elongation occurs at the same time of year, and at spring elongations Venus is at a part of her orbit which is then seen high above the Equator, and these

The planet will be still rise shortly after 1 o'clock, the hour being thus early for reasons that are akin to those given above.

Morning and Evening Stars.

☿ Mercury in the early days of the month will be above the horizon for an hour after sunset. It will be a morning star after the 10th, but in neither case is it likely to be seen.

♀ Venus will not set until 10 minutes before midnight at the end of the month. It moves through the constellation Taurus and adds to the brilliance of the western evening sky. Magnitude −3·8 to −4·1.

♂ Mars is still not visible, for it rises only a few minutes before the Sun and sets much earlier.

♃ Jupiter is due south in the early evening. It reverses its direction of motion and moves slowly in the constellation Cancer towards Leo after the 9th. Magnitude −1·9 to −1·7.

♄ Saturn in Capricornus rises less than 2 hours after midnight at the end of the month, and may be seen at a low altitude in the east-south-east in the early dawn. Magnitude +0·9.

are the reasons for the circumstances mentioned. The high altitude in early evening may be explained otherwise by saying that at this time of year in this latitude the ecliptic is inclined to the horizon at a large angle at sunset; Venus, like all the planets, is somewhat near the ecliptic, and her distance from the Sun, which is on the horizon, measured on the ecliptic is also large, since she is at or near maximum elongation. Circumstances are somewhat similar, though not so extreme, in the third year after these leap-years.

The planet will be at greatest western elongation on September 8 of this year, when it

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

May 1. Day breaks at 2*h*. 3*m*. Civil twilight ends at 20*h*. 13*m*. Night begins 21*h*. 54*m*. The length of the Day is 14*h*. 47*m*.

May 3, 14*h*. Mercury in conjunction with ☽. ☿ 5° S.

May 4, 2*h*. Mars in conjunction with ☽. ♂ 4° S.

May 4, *morn*. Jupiter without Satellites. Invisible at Greenwich. (See *infra*.)

May 8. Mercury at Greatest Elongation. 26° W.

May 9, 17*h*. Venus in conjunction with ☽. ♀ 1° S.

May 12, 22*h*. Jupiter in conjunction with ☽. ♃ 3° S.

May 15. Saturn at a stationary point.

May 18, 20*h*. Mercury in conjunction with Mars. ☿ 2·5° S.

May 22. Venus at Greatest Brilliancy.

May 24, 17*h*. Saturn in conjunction with ☽. ♄ 4° N.

A meteor shower, believed to have relation to Halley's comet, diverging from a point in Aquarius, sometimes appears in the mornings from May 2–6.

In this month the Mornings increase 42*m*.; the Afternoons 43*m*.

Constellations near the S. meridian at 22*h*.: Leo, Leo Minor, Crater, Hydra, Corvus, Virgo, Bootes, Libra.

APPARENT RIGHT ASCENSION AND DECLINATION OF THE PLANETS AT NOON.

Jupiter without Satellites.—It is shown in these pages (see pp. 32, 36 and 58) that each of Jupiter's larger Satellites is eclipsed, occulted by, or is in transit across the planet's disc at regular intervals. These events are sometimes contemporaneous, and Jupiter is therefore seen occasionally as though it had only three, two or even one Satellite, and on rare occasions all four may be hidden in this way simultaneously and Jupiter is said to be without Satellites. The length of the intervals between such occurrences follows no law. In the 200 years 1800 to 2000 there have been, or will be, 36, and it chances that three of them happen in the space of the two years current. Jupiter's four large Satellites were simultaneously invisible, exterior to the planet, for 2¼ hours in the evening of 1931, Feb. 14. This will happen from 3*h*. 24*m*. to 4*h*. 20*m*. in the morning of May 4, and again from 2*h*. 12*m*. to 2*h*. 52*m*. in the morning of November 21 of

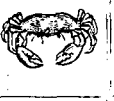
Morning and Evening Stars.

☿ Mercury is a morning star, but rises too near to the time of sunrise to be seen.

♀ Venus is still above the horizon until nearly midnight, and will be due west at altitude 30° about 8 o'clock. It moves into the constellation Gemini and will be in the neighbourhood of the Twins at the end of the month. Magnitude $-4{\cdot}2$ (Greatest Brilliancy).

♂ Mars begins to be a morning star since it rises an hour before the Sun at the end of the month; in the E.N.E.



♃ Jupiter is high in the south-west at sunset, and will be seen when the sky grows dark. It sets nearly in the west-north-west in the hour or two after midnight. Magnitude $-1{\cdot}7$ to $-1{\cdot}5$.

♄ Saturn is now more prominent as a morning star since it rises before midnight at the end of the month. Magnitude $+0{\cdot}8$ to $+0{\cdot}6$.

this year. At the time Jupiter is without Satellites on May 4 the planet will be below the horizon at Greenwich, but the phenomenon may be observed from America and places not so far west. On the second occasion the planet will be about 13° above the horizon at Greenwich at *2h. 12m.* when Satellite IV will be eclipsed, and at that time II will be in transit, and III and I undergoing occultation, reappearing at *2h. 52m.* and *3h. 46m.* respectively. Satellite II will complete its transit at *3h. 33m.*

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

June 1. Civil twilight ends at 21*h.* 8*m.* There is no closed night in this month in the latitude of London. The length of the Day from Sunrise to Sunset on *June* 1 is 16*h.* 14*m.* Its length is nearly 16*h.* 34*m.* from the 19th to the 24th.

June 2, 4*h.* Mars in conjunction with ☽. ♂ 5° S.

June 3, 11*h.* Mercury in conjunction with ☽ ☿ 6° S.

June 6, 22*h.* Venus in conjunction with ☽. ♀ 3° S.

June 7. Venus at a stationary point.

June 9, 10*h.* Jupiter in conjunction with ☽. ♃ 2° S.

June 13. Mercury in Superior conjunction.

June 21, 1*h.* Saturn in conjunction with ☽. ♄ 3° N.

June 21, 15*h.* Sun enters the sign Cancer (Solstice).

June 29. Venus in Inferior conjunction.

In this month the Mornings increase about 7*m.* up to the 17th, and then decrease 4*m.* The Afternoons increase about 14*m.* up to the 25th, and then decrease slightly.

Constellations near the S. meridian at midnight: Corona, Hercules, Ophinchus, Serpens, Scorpius, Lyra, Aquila, Sagittarius.

Photo-Electric Photometry.—Electrical properties that are developed in certain substances under the influence of light have led to methods of measuring luminosity and its variation and have been adapted for several practical uses. The element selenium may be said to be a non-conductor of electricity when in the dark but becomes a conductor along which a current will pass when light falls on it, the strength of the current varying with the intensity of the light. It has also been found that some metallic substances, seven of which are known, potassium being one, shed electrons under the influence of light, and hence become electrically charged, leading to the production of current, the rate of charge being proportional to the light intensity. Devices embodying these principles known as selenium and photo-electric cells are in use for astronomical photometry. Placed in the focus of a telescope objective the light of a star falling on the receiver of a cell of either kind causes a current to flow or a charge to accumulate that can be

Morning and Evening Stars.

☿ Mercury is a morning star at the beginning of the month but will not be seen. It will be an evening star after the 13th, but its visibility is again barely possible.

♀ Venus remains a brilliant object to be seen north of west after sunset in the early days of the month, but becomes fainter rapidly, and sets in the early twilight, in the latter part.

♂ Mars rises 2 hours, more or less, after midnight in the brightening sky in the N.E. by E.

♃ Jupiter now not very far to the west of Regulus is to be seen almost due west in the early evening; but the time for its visibility is short for it sets before midnight. Magnitude −1·5 to −1·4.

♄ Saturn is in the south-east, approximately, at midnight, at altitude 10 to 15 degrees. Magnitude +0·6 to +0·8.

registered, and the impinging light measured with remarkable accuracy. With the photo-electric cell differences of density of deposit on a photographic negative, which is an essential of many astrophysical researches, can be determined with similar precision. Photo-electric cells have other uses besides those of astronomy. They are essentials in the processes of television or picture telegraphy; of talking cinema pictures and in the construction of burglar alarms that depend on the interruption of the impinging ray. A proposal to use the light of Arcturus to start machinery at the Chicago World Fair in 1933 is evidently based on the action of a photo-electric or selenium cell. The current or other effect caused by the starlight may be in the first place feeble, but it may be amplified sufficiently to actuate a relay that would bring stronger currents into action.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

July 1. Civil twilight ends 21*h.* 23*m.* In this month there is no closed night in the latitude of London until after the 21st, when the Sun will be 18° below the horizon at midnight. The length of the Day on July 1 is 16*h.* 29*m.*

July 1, 4*h.* Mars in conjunction with ☽. ♂ 5° S.

July 3, 8*h.* Venus in conjunction with ☽. ♀ 9° S.

July 4. Earth at greatest distance from the Sun. Aphelion. Distance 94,455,000 miles.

July 7, 1*h.* Jupiter in conjunction with ☽. ♃ 2° S.

July 18, 8*h.* Saturn in conjunction with ☽. ♄ 3° N.

July 20. Mercury at Greatest Elongation. 27° E.

July 21. Venus at a Stationary point.

July 23, 3*h.* Mercury *in conjunction* with Jupiter. ☿ 2·4° S.

July 24. Saturn in Opposition. Distance from the Earth 832,160,000 miles.

July 30, 1*h.* Mars in conjunction with ☽. ♂ 5° S.

July 30, 9*h.* Venus in conjunction with ☽. ♀ 11° S.

Meteors of the Perseid stream begin to appear in July.

In this month the Mornings decrease 34*m.*, and the Afternoons 30*m.*

Thermometry.—Temperature and its changes are commonly measured by a thermometer of which the expansion of mercury is the basic principle, but there are electrical thermometers whose action depends on a certain electrical property of metals that is developed under the influence of heat.

The thermo-couple, or thermopile, depends on the fact that a thermo-electric force is produced when a circuit, in which a galvanometer may be included, is formed of two metals, necessarily with two junctions, and one of the junctions of the two metals is at a higher temperature than the other. If, for example, in a circuit of copper wire with a length of iron inserted, one of the junctions is made hotter than the other, the galvanometer will show a current passing in the direction from copper to iron at the hotter junction, the statement being subject to some qualification. A sensitive instrument of this kind is used in astronomy, and with a vacuum thermo-couple made of bismuth and bismuth-tin placed in the focus of the 100-inch

Morning and Evening Stars.

☿ Mercury will be at Greatest Elongation (E) on July 20, and is an evening star throughout the month, but sets not much more than an hour after the Sun at most, and is hardly likely to be seen.

♀ Venus having been in Inferior conjunction on June 29, is not to be seen early in the month, but may be visible before sunrise in the latter half S.E. by E. Magnitude on July 31, −4·2.

♂ Mars, moving eastward, passes about 5 degrees north of Aldebaran on July 6. It will be in the E.N.E. in the morning sky. Magnitude +2·0.

♃ Jupiter will be above the horizon for a short time after sunset and may be seen north of west. Magnitude −1·3.

♄ Saturn being in Opposition on the 24th is above the horizon throughout the short night. Magnitude +0·3.

telescope at Mount Wilson, the heating effect of a star as faint as the thirteenth magnitude can be measured. There is also an Electrical Resistance Thermometer which is effective because the resistance of a pure metal, platinum, for example, to the passage of an electric current increases considerably when its temperature is raised. The surface temperature of celestial bodies is estimated from the position in their spectrum of the lines of greatest intensity or energy. Just as the colour of a heated iron changes with increase of heat, so the distribution of energy, which is analogous to colour, shown by the intensity of the lines in stellar spectra, varies with the temperature.

Jupiter's Satellites. Because the planet is near the Sun, and therefore above the horizon almost wholly in daylight hours, the Satellites are not likely to be visible from the end of July until the beginning of October. See note, p. 36.

Jupiter is in conjunction on August 26.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

August 1. Day breaks at 1*h.* 30*m.* Civil twilight ends at 20*h.* 42*m.* Night begins, 22*h.* 41*m.* The length of the day is 15*h.* 21*m.*

Aug. 3, 18*h.* Jupiter in conjunction with ☽. ♃ 0°9′ S.

Aug. 3, 21*h.* Mercury in conjunction with ☽. ☿ 6° S.

Aug. 5. Venus at Greatest Brilliancy.

Aug. 14, 12*h.* Saturn in conjunction with ☽. ♄ 4° N.

Aug. 17. Mercury at Inferior conjunction.

Aug. 24, *morn.* Occultation by the ☽ of several stars of the Pleiades group. See p. 59.

Aug. 26. Jupiter in conjunction.

Aug. 27, 21*h.* Mars in conjunction with ☽. ♂ 4° S.

Aug. 28, 3*h.* Venus in conjunction with ☽. ♀ 8° S.

Aug. 31. Total Eclipse of the Sun. Invisible at Greenwich. See p. 58.

Aug. 31, 13*h.* Jupiter in conjunction with ☽. ♃ 0°3″ S.

Meteors of the Perseid stream are expected this month, the nights of most abundance being from the 10th to the 12th. Since the Moon is full on the night of the 15th its light may be a hindrance to their visibility.

In this month the Mornings decrease 46*m.*, and the Afternoons 59*m.*

Constellations near the S. meridian at 22*h.* Hercules, Ophinchus, Serpens, Lyra, Cygnus, Aquila, Delphinus, Equuleus, Aquarius, Capricornus, Sagittarius.

An Earthquake in England.—In the early morning of June 7, 1931, an earthquake of some severity was experienced in England. No serious damage was done but the occurrence, made evident by shaking beds and swinging pictures, was sufficient to cause alarm to some, though by the great majority of the population it passed unnoticed. The shocks were felt in all parts of England from Bournemouth to Alnwick, from Cardiff to Hull where the effects seem to have been most severe, and, it is said, as far west as Waterford. The fall of a chimney stack was reported from the neighbourhood of Hull as an effect of the earthquake. Besides these visible effects the earthquake was recorded by the seismographs at Kew, Oxford, West Bromwich, Liverpool,

Morning and Evening Stars.

☿ Mercury, being at Greatest Elongation, West, on Sept. 3, may be visible in the morning in the last few days of the month after 4 o'clock, a few degrees above the horizon, E. by N.

♀ Venus rises unusually early, and is at greatest brilliancy on August 5, so that the planet makes a fine display as a morning star this month. It moves eastward through the constellation Gemini. Magnitude −4·2 to −4·1.

♂ *Mars moves into the constellation Gemini. It* will be in the neighbourhood of, but 5 degrees nigher than, Venus throughout the month. It is much less conspicuous than that planet, being about as bright as Castor.

♃ Jupiter, being in conjunction on the 26th, rises and sets nearly with the Sun during this month.

♄ Saturn is now to be considered an evening star. It will be seen between S.E. and S. at altitude about 10 degrees when the sky becomes dark.

Stonyhurst, Edinburgh, Aberdeen and Durham, and by many on the Continent. From these records it was deduced that the epicentre, or place of origin on the earth's surface (*see* p. 76) was in the North Sea, 50 or 60 miles east of Hull, and that the earthquake happened 25 minutes and some seconds after midnight of June 6.

Notable earthquakes that have occurred in England in comparatively recent years are those in the neighbourhood of Colchester on April 22, 1884, and in Western England on December 17, 1896, and August 15, 1926, the epicentre in both cases being found to be a few miles from Hereford. This district has been the scene of earthquakes on other dates.

These columns show the order of the four large Satellites of Jupiter with respect to the planet as seen in an inverting telescope. The open circle ○ indicates the planet's disc; the black circle ● shows that a Satellite, whose number is wanting, is either in eclipse or is occulted, whilst the sign ↓ shows that it is in transit across the disc.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

September 1. Day breaks at 3*h.* 8*m.* Civil twilight ends at 19*h.* 32*m.* Night begins 20*h.* 52*m.* The length of the Day is 13*h.* 31*m.*

Sept. 3. Mercury at Greatest elongation. 18° W.

Sept. 8. Venus at Greatest elongation. 46° W.

Sept. 10, 16*h.* Saturn in conjunction with ☽. ♄ 4° N.

Sept. 13, 12*h.* Mercury in conjunction with Jupiter. ☿ 0·8 N.

Sept. 14. Partial eclipse of Moon. Visible at Greenwich. See p. 58.

Sept. 23, 6*h.* Sun enters the Sign Libra (Equinox).

Sept. 25, 15*h.* Mars in conjunction with ☽. ♂ 3° S.

Sept. 26, 18*h.* Venus in conjunction with ☽. ♀ 4° S.

Sept. 28, 10*h.* Jupiter in conjunction with ☽. ♃ 0·4 N.

Sept. 29. Mercury in Superior conjunction.

In this month the Mornings decrease 46*m.*; the Afternoons, 1*h.* 6*m.*

Constellations near the S. meridian at 22*h.*: Lyra, Cygnus, Aquila, Delphinus, Aquarius, Capricornus, Equuleus, Pegasus, Pisces.

The Moon's Surface.—With a small telescope there will be seen on the Moon features that have been called seas (perhaps rather unfortunately), mountain ranges, craters, rays and rills. Bright rays and rills are seen best at Full Moon, the other classes at times near the quarter phases, and especially when near the line of demarcation between the illuminated and dark parts of the lunar surface. The most remarkable are the craters, or nearly circular formations, having for their circumference a *ring of mountains which rise abruptly to heights anything between* 1,000 and 20,000 feet above the surrounding country. The number and size of these—many of them being 50 or 60 miles in diameter—make the Moon's surface quite unlike that of the Earth. It has long been suggested that these are the result of volcanic action on the Moon, but if this is so, they must be fossil formations. There is no trace of anything on the Moon that in the least resembles an expanse of water, which would be seen glittering in the sunlight, nor are any striking changes that might be atmospheric seen as on the planets. We appear, in fact, to be looking on a dead world.

Morning and Evening Stars.

☿ Mercury is a morning star and may be seen between 4 and 5 o'clock in the early days of September north of the east point.

♀ Venus continues to be a brilliant object of the morning sky, rising before 2 o'clock. It will be due east at an altitude of 20 degrees about 4 o'clock. Magnitude − 4·0 to − 3·8.

♂ Mars rises shortly after midnight. Venus is moving towards Jupiter, and at the end of the month, in the dawn, the three planets will be in a line stretching upwards over the eastern horizon, with Regulus between Venus and Jupiter. The waning Moon passes along the line between the 25th and 28th. Magnitude + 1·8.

♃ Jupiter is a morning star in the following part of Leo. Magnitude − 1·3.

♄ Saturn, low in the south in the early evening, sets soon after midnight.

The Harvest Moon.—The Full Moon on September 14 is the Harvest Moon this year, and it will be seen that the times of moonrise on September 13, 14, 15 and 16 show differences between consecutive nights of only 10 minutes. This daily retardation is unusually small, as it was at Harvest Moon last year, and at other phases in recent months, which is due to the fact that the longitude of the Ascending node of the Moon's orbit is not far from 360°. In northern latitudes, at the time of moonrise on the days about Full in September, the Moon's orbit is inclined to the horizon, but at a small angle, and the smallness is accentuated when the node is in this position. The Nodes of the Moon's orbit regress on the Ecliptic in about 18½ years.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

October 1. Day breaks at 4*h.* 9*m.* *Civil twilight* ends at 18*h.* 21*m.* Night begins, 19*h.* 30*m.* The length of the Day is 11*h.* 35*m.*

Oct. 3. Saturn at a stationary point.

Oct. 7, 21*h.* Saturn in conjunction with ☽. ♄ 4° N.

Oct. 14. Uranus in Opposition. Distance from the Earth (Oct. 16), 1,760,690,000 miles.

Oct. 20. Venus in conjunction with Jupiter. ♀ 0·1° S. (See note below.)

Oct. 24, 6*h.* Mars in conjunction with ☽. ♂ 0·9° S.

Oct. 26, 6*h.* Jupiter in conjunction with ☽. ♃ 1° N.

Oct. 26, 18*h.* Venus in conjunction with ☽. ♀ 2° N.

Oct. 30, 23*h.* Mercury in conjunction with ☽. ☿ 3° N.

In this month the Mornings decrease 51*m.*, and the Afternoons 1*h.* 3*m.*

The Zodiacal light may be seen before dawn at the beginning and end of this month, the Moon being then absent from the early morning sky.

Constellations near the S. meridian at 22*h.*: Delphinus, Equuleus, Aquarius, Capricornus, Pegasus, Andromeda, Pisces, Piscis Australis, Cetus.

Conjunction of Venus and Jupiter.—These bright planets make a special display in the morning sky this month. Since July, Venus has been moving through the constellations Gemini, Cancer and Leo towards Jupiter, which is moving less rapidly in the same direction, and overtakes it in the morning of October 20. The planets will rise separated by less than 7 minutes of arc, or by rather less than a quarter of the diameter of the Moon, this distance increasing slightly before sunrise. Conjunctions of Venus and Jupiter occur almost yearly, though they may not happen when the planets are in the night sky as is the case this year. The last was on August 6, 1931, the next will be on August 17, 1933. The distance between the objects is comparatively small on this occasion, but at a conjunction on February 6, 1892, that was seen from Australia,

Morning and Evening Stars.

☿ Mercury will not be seen either in the morning or evening this month. It sets only half an hour after the Sun at its end.

♀ Venus continues its eastward progress and moves into Leo, being near Regulus in the morning of the 6th. Its approach to Jupiter, and close conjunction with that planet on the 20th (see p. 40) will be noted. Magnitude −3·8 to −3·6.

♂ Mars rises shortly before midnight during the greater part of the month, and will be seen in the morning sky on the right of Regulus, to which it is equal in brightness. Magnitude +1·3.

♃ Jupiter will be seen between east and south-east in the morning sky. Magnitude −1·3 to −1·4

♄ Saturn may be seen low in the south-west in the early evening. Magnitude +0·7 to +0·8.

their edges were separated by 14 seconds of arc only, and the planets were seen as one until this had increased to about a minute and a half.

The Temperature of the Sun.—The effective temperature of the Sun, or the rate at which heat is emitted per unit area at its surface, is in the neighbourhood of 5,500° C. This is calculated from the Solar Constant, which is a measure of the heat received from the Sun outside the earth's atmosphere found from observation. The Sun's temperature is also evaluated by the method mentioned on p. 29. The results are in approximate but not precise agreement.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

November 1. Day breaks at 5*h.* 1*m.* Civil twilight ends at 17*h.* 19*m.* Night begins 18*h.* 28*m.* The length of the Day is 9*h.* 37*m.*

Nov. 4, 5*h.* Saturn in conjunction with ☽. ♅ 3° N.

Nov. 13–14. Occultation by the ☽ of several stars of the Pleiades group. See p. 59.

Nov. 14. Mercury at Greatest elongation. 22° E.

Nov. 21, *morn.* Jupiter without satellites. Visible at Greenwich. See p. 20, *Note*, and p. 58.

Nov. 21, *morn.* Occultation by the ☽ of Regulus. Mag. 1·4, in daylight. See p. 59.

Nov. 21, 18*h.* Mars in conjunction with ☽. ♂ 1° N.

Nov. 22, 23*h.* Jupiter in conjunction with ☽. ♅ 2° N.

Nov. 25, 18*h.* Venus in conjunction with ☽. ♀ 6° N.

Nov. 28, 22*h.* Mercury in conjunction with ☽. ☿ 4° N.

In this month the Mornings decrease 49*m.*; the Afternoons 39*m.*

Constellations near the S. meridian at 22*h.*: Pegasus, Pisces, Cetus, Andromeda, Aries, Perseus, Taurus.

The Leonid Meteors.—On the night of November 13, 1833, and again on the same date in the year 1866, showers of meteors were seen radiating from a point in the "Sickle" of Leo in numbers that were described as "terrifying." Moderately fine showers were seen from the same radiant in 1832 and 1867. After the display in 1833 it was remembered that a similar shower had appeared in 1799 and examination of historical records resulted in finding many instances of notable meteor showers seen in November separated by intervals of multiples of 33 or 34 years. A few shooting-stars are seen from the same radiant about this date in every year, and the inference is that there is a stream of small bodies moving in parallel paths in a long, oval orbit round the Sun that intersects the orbit of the Earth at the point where the Earth is in November. In the greater part of

Morning and Evening Stars.

☿ Mercury though at greatest elongation, east, on the 14th sets less than an hour after the Sun throughout the month and will not be visible.

♀ Venus is a morning star rising at the times shown. It will be in the south-east about half-past 6 o'clock. Magnitude − 3·5.

♂ Mars is a morning star. It will be a degree and a half north of Regulus in the morning of the 10th. Magnitude + 1·2 to + 0·9.

♃ Jupiter is still in company with Mars and Venus, but their relative positions have much changed. At 5 o'clock towards the end of the month Jupiter is fairly high in the south-east, with Mars 10 degrees higher on its right and Venus considerably lower on its left. Magnitude − 1·4 to − 1·5.

♄ Saturn sets in mid-evening nearly at the south-west point. Magnitude + 0·8.

this orbit the bodies are few, but in one part they are many and stand out like the jewel in a ring, this profuse mass going round the orbit in 33¼ years. A meteoric shower occurs when such an orbit intersects the earth's orbit and the stream and the earth arrive together at the point of intersection, and because a display was seen in consecutive years, 1866 and 1867, it seems that the jewel must be of some length. It was reasonably expected that the Leonid meteors would be seen in some profusion in the years 1899 and 1900, but they failed to appear. Nevertheless, it is thought possible that they may visit us in some number in November of one or more of the years 1932 to 1935. The presence of the almost full Moon in the sky is likely to prevent any spectacle this year.

CONJUNCTIONS, ECLIPSES, AND OTHER CELESTIAL PHENOMENA.

December 1. Day breaks at 5*h.* 42*m.* Civil twilight ends 16*h.* 45*m.* Night begins 17*h.* 57*m.* The length of the Day is 8*h.* 8*m.*

From Dec. 18 to 25 the length of the Day is about 7*h.* 46*m.*

Dec. 1, 17*h.* Saturn in conjunction with ☽. ♄ 3° N.

Dec. 4. Mercury at Inferior conjunction.

Dec. 14. Mercury at a stationary point.

Dec. 19, *morn.* Occultation by the ☽ of ρ Leonis. Mag. 3·8. See p. 59.

Dec. 19, 22*h.* Mars in conjunction with ☽. ♂ 3° N.

Dec. 20, 11*h.* Jupiter in conjunction with ☽. ♃ 3° N.

Dec. 22, 1*h.* Sun enters the Sign Capricornus. (Winter Solstice.)

Dec. 23. Mercury at Greatest elongation. 22° W.

Dec. 25, 13*h.* Venus in conjunction with ☽. ♀ 6° N.

Dec. 26, 0*h.* Mercury in conjunction with ☽. ☿ 7° N.

Dec. 29, 9*h.* Saturn in conjunction with ☽. ♄ 3° N.

In this month the Mornings decrease 23*m.*, the decrease being continuous throughout the month. The Afternoons decrease 4*m.* up to the 13th, and then increase 9*m.*

APPARENT RIGHT ASCENSION AND DECLINATION OF THE PLANETS AT NOON.

The Earth's Rotation.—Ephemerides are computed on the assumption that time moves uniformly, and that the length of a day, whether mean solar or uniform sidereal, is invariable, except for a small recognised secular variation. It is now believed that the rotation of the Earth, upon which the length of the day depends, is not constant. Such a change, although imperceptible from day to day, would lead to a cumulative error in time reckoning, so that the observed time as shown by the clock might differ by many seconds from the time which the compilers of the *tables* of the Sun, Moon and planets expected the clock to show at a given moment of absolute time, the effect of this error being revealed not as an apparent clock error, but as an apparent error in the ephemerides of the Sun, Moon and planets. It was the correlation of these apparent errors that led to the announcement of the variability of the Earth's period of rotation. (From the Nautical Almanac 1932. *Explanation.*)

Morning and Evening Stars.

☿ Mercury rises nearly two hours before the Sun in the last ten days of the month, and may then be seen at 7 o'clock about 5 degrees above the south-east horizon.

♀ Venus will be seen in the south-east before sunrise. Altitude 15° at about half-past six at the beginning of the month, but lower at that hour at the end. Magnitude −3·4.

♂ Mars moving in the constellation Leo approaches Jupiter but does not overtake it. Its brightness increases rapidly. Magnitude +0·9 to +0·3.

♃ Jupiter like Mars rises before midnight, and both are conspicuous objects of the morning sky, moving eastward between Regalus and Spica. Magnitude −1·6 to −1·7.

♄ Saturn is above the south-west horizon for a short time after sunset. Magnitude +0·9.

Large Telescopes.—The Royal Observatory, Edinburgh, possesses a reflecting telescope with mirror 36 inches in diameter that was installed in the year 1930, and there is also a 3-foot reflector at Cambridge. A similar instrument with mirror of the same dimension, the gift of Mr. W. J. Yapp, is being made for the Royal Observatory, Greenwich.

These will be the largest objectives in use in Great Britain. There are some larger on the Continent and in America, the largest of them now being the 100-inch mirror at the Mount Wilson Observatory, California, but a 200-inch mirror is being made for use in that part of the world. A reflecting telescope, 74 inches in diameter, is part of the equipment of an observatory now being established by private munificence near Toronto.

BEING THE FIRST YEAR AFTER BISSEXTILE OR LEAP YEAR, AND 23 AND 24 OF KING GEORGE V.

Calendar Elements and Dates for the Year.

Golden Number	XV	Birth of Queen Mary (1867)	May 26
Epact	3	Union Day, South Africa	,, 31
Solar Cycle (Year of)	10	Birth of King George V. (1865) ...	June 3
Roman Indiction (Year of)	1	*Whit Sunday*	,, 4
Dominical Letter	A	*Trinity Sunday*	,, 11
Julian Period (Year of)	6646	*Corpus Christi*	,, 15
Julian Day, Jan. 1 (begins at noon) ...	2,427,074	Birth of Prince of Wales (1894) ...	,, 23
New Year's Day (Sunday)	Jan. 1	Dominion Day, Canada	July 1
Foundation Day, Australia	,, 26	Independence Day, U.S.A.	,, 4
Quinquagesima Sunday	Feb. 12	Jewish New Year (5694)	Sept. 21
Ash Wednesday	March 1	Armistice Day (1918)	Nov. 11
Good Friday	April 14	Sundays after Trinity	24

Jan. 3. Earth in Perihelion. Distance from Sun's centre 91,346,000 miles.

Mercury may be seen as a morning star in the early days of this month. Venus is also a morning star. Mars and Jupiter are near neighbours in the midnight sky. Mars will be in Opposition on March 1, Jupiter on March 9. Saturn will be in Opposition this year on August 5.

In 1933 there will be only two eclipses, both Annular eclipses of the Sun and both Invisible at Greenwich. The first will be on Feb. 24, and the path from which annularity can be seen begins its course south of Buenos Ayres, crosses the S. Atlantic and ends at Aden. On the second occasion, August 21, the central line begins near Cairo, and ends in the north of Australia.

RISING, SOUTHING, and SETTING of PLANETS at intervals of Seven Days. (Noon = 12*h*.)

Tidal Constants.

THE TIME OF HIGH WATER *at the undermentioned Ports and Places may be* approximately *found by taking the appropriate Time of High Water at the* Standard Port (*as shown on* pp. 5, 9, *etc.*) *and* **adding thereto** *the quantities annexed. The time thus found will be* Greenwich Time *for British, Irish, French and Belgian Ports, and* Amsterdam Time *for Netherlands Ports. The rise of the tide at Springs and Neaps is given in the last two columns. An* denotes Range of Tide.*

It may happen that the sum "high water at Standard Port" + "tide interval" will exceed 24 hours; in this case, the excess will be the time of high water after midnight following.

Example.—Required times of high water at Aberdeen on *January* 11*th*, 1932:—

(a) *Morning Tide.*

Appropriate time of high water at *Leith*	16*h.* 19*m.*	Aft. *Jan.* 10
Add tide interval	10 53	
Sum	27 12	
Subtract 24*h*	24 0	
Time of high water at *Aberdeen, January* 11*th*	3 12	Morn.

(b) *Afternoon Tide.*

Appropriate time of high water at *Leith*	4*h.* 52*m.*	Morn. *Jan.* 11.
Add tide interval	10 53	
Time of high water at *Aberdeen, January* 11*th*	15 45	Aft.

Tables for Finding the Times of Sunrise and Sunset.

THIS double entry table provides the means for finding, with sufficient accuracy for practical purposes, the times of sunrise and sunset at any place situated between latitude 60° N. and 60° S.

To use the table: In the horizontal line with the Sun's declination in the first column, and under the required latitude in the heading, there will be found figures which added to 12*h.* give the *local apparent time* of sunset. Subtracting these quantities from 12*h.* will give the *local apparent time* of sunrise. To obtain from this the local *mean* time, the equation of time for the day in question which is given on the second page of each month, must be added to or subtracted from these apparent times of sunrise and sunset, as shown in the heading.

To find the corresponding Greenwich mean time, the difference of longitude of the place from Greenwich must be added if the place be West, subtracted if East.

The table is arranged for northern latitudes, but will serve equally well for places south of the Equator, if the declination North in the first column be considered South, and *vice versâ*.

If the figures are required for a declination or latitude falling between two arguments of the table, they may be found by proportion. The effect of refraction is included.

THE TIME OF SUNSET.

The times of sunrise and sunset given in this Almanack (and similarly of moonrise and moonset) are the times when the centre of the Sun's disc is seen on the horizon from sea-level at Greenwich, computed on the assumption that the horizontal refraction is 34½′. It is doubtful whether there is a precise legal definition of sunrise and sunset. The above has generally been adopted as a correct statement, though in some Tables the instant when the upper limb, or edge,

of the Sun is on the visible horizon is given as the time when the Sun rises and sets. The legal question has been more concerned with the distinction between local sunset and Greenwich sunset, rather than with a precise definition. It has been held by a legal tribunal, as would be expected, that the word "sunset" in laws and regulations must be taken to mean the time when the sun sets at the place in question, whether it be stated in local or Greenwich time.

TO FIND THE GREENWICH TIME OF SUNRISE AT CERTAIN PLACES IN THE BRITISH ISLES IN EACH MONTH OF THE YEAR.

The Table gives the number of minutes to be added to or subtracted from the time of sunrise at Greenwich, to find the Greenwich time of sunrise at the place named in the first column, on the first day of each month. The corrections to be applied on other dates and for other places in the neighbourhood of these may be inferred approximately by interpolation.

The sign + means that the time required is later than that at Greenwich. The sign −, that it is earlier.

If these Tables be considered in conjunction with a map it will be seen that the places at which the Sun rises at the *same* moment lie in a slightly curved line across the map, the lines for different moments being approximately parallel. The lines change their inclination to the meridian throughout the year. Similarly for the setting.

The times in the headline and penultimate column are *Apparent*. By applying the Equation of Time, the Mean Time is found to which the figures are appropriate.

Alt.—This is given to tenths of a degree, but there may be small differences between the morning and afternoon hours, and between the like days of the year. The effect of Refraction is not applied. *Azimuth* (Az.) is measured either eastward or westward from the N. Az. 45° is equivalent to N.E. or N.W. Az. 135° to S.E. or S.W. E.S.E. or W.S.W. is 112½°.

The year is divided into periods of thirty days (with exceptions). The figures for days other than those given can be found by interpolation with approximate accuracy.

Latitude 53° is chosen as an average for England. North or south of this the noon altitude is respectively less or greater by the difference of latitude, and for other times *pro rata*.

Solar and Sidereal Time.

TO FORM EQUIVALENT INTERVALS OF SOLAR AND SIDEREAL TIME.

THE length of a Sidereal day is 23*h*. 56*m*. 4·09*s*. of Mean Time. One hour of Sidereal Time is, therefore, equivalent to 59*m*. 50·17*s*. of Mean Time, and one hour of mean solar time is equivalent to 1*h*. 0*m*. 9·86*s*. of Sidereal Time. The multiples and submultiples of the differences from one hour are tabulated below under headings "acceleration" and "retardation"—for the argument (common to both) in the middle columns. If the argument be considered as Mean Time, its equivalent in Sidereal Time is obtained by adding the acceleration. If it is Sidereal Time, its equivalent in Mean Time is found by subtracting the retardation.

Accele ration.	Argu- ment.	Retar- dation.	Accele- ration.	Argu- ment.	Retar- dation.	Accele- ration.	Argu- ment.	Retar- dation.	Argu- ment.	Accelera- tion or Retar- dation.	Argu- ment.	Accelera- tion or Retar- dation.

See p. 77.

Celestial Phenomena for Observation in 1932.

ECLIPSES OF THE SUN AND MOON.

IN the year 1932 there will be two Eclipses of the Sun and two of the Moon. One of the Solar Eclipses is Annular, and visible only from a region near the South Pole. Both the Lunar Eclipses are partial but very nearly total.

I. An *Annular Eclipse of the Sun* on March 7, invisible at Greenwich. The path from which annularity may be seen is a short, wide arc in the Southern Ocean, south-west of New Zealand, the middle point being about Lat. 62° 5′, Long. 135° E. where the phase will last for 5 minutes 19 seconds. A partial eclipse will be seen about sunset in Australia.

II. A *Partial Eclipse of the Moon* on March 22, invisible at Greenwich. The beginning will be visible generally from Eastern Asia, Australia, the Pacific Ocean, North America, except the north-eastern part, and from the extreme western part of South America; the ending will be visible from Asia, except the south-western part, the Pacific Ocean, and from the extreme north-western part of North America.

Moon enters umbra ...Mar. 22*d*, 10*h*. 59*m*. G.M.T.
,, leaves ,, ... ,, 14*h*. 5*m*. ,,
Magnitude of eclipse 0·973 (Moon's diam. =1).

III. A *Total Eclipse of the Sun* about 7 o'clock in the evening of August 31 by Greenwich time. Invisible at Greenwich. The eclipse begins north of Siberia. The track of totality, after crossing near the North Pole, crosses Hudson's Bay, Quebec Province, Vermont, New Hampshire and Maine, and ends in the Atlantic Ocean. It leaves the coast-line a little north-east of Boston. Maine, inland, near its boundary with New Hampshire, where the duration of totality at the central line will be about 100 seconds, a few seconds short of the maximum, appears to be a favourable spot, both as regards position and weather prospects. From Montreal, which is just on the southern limit of the path of totality, a total eclipse will be seen lasting a fraction of a minute at 20*h*. 24*m*. G.M.T.

	G.M.T.	Long.	Lat.
	D. H. M.	° ′	° ′
Central Eclipse begins	31 19 4	in 109 16E.	79 36N.
Central Eclipse at local apparent noon	,, 19 17 ,,	109 10W.	78 36N.
Central Eclipse ends	,, 21 3 ,,	40 59W.	28 27N.

At Montreal the eclipse begins at 19*h*. 14*m*. and ends at 21*h*. 30*m*. G.M.T.

IV. A *Partial Eclipse of the Moon* in the evening of September 14. Visible at Greenwich. The beginning is visible generally from Europe, Africa, the eastern part of the Atlantic Ocean, the Indian Ocean, Asia and Australia; the ending is visible from the same regions excepting Australia and Eastern Asia, and adding the north-eastern part of North America.

Moon enters penumbra .....Sept. 14*d*. 18*h*. 5*m*.
,, ,, umbra ..... ,, 19*h*. 18*m*.
Middle of eclipse ..... ,, 21*h*. 0*m*.
Moon leaves umbra ..... ,, 22*h*. 43*m*.
,, ,, penumbra..... ,, 23*h*. 56*m*.
Magnitude of greatest eclipse, 0·982 (Moon's diam. =1).

The centre of the moon will rise at Greenwich at 18*h*. 10*m*. The point of the disc that first enters the umbra will be about 50° from its lowest point measured along its edge to the left; the point where it leaves about 50° from its lowest point to the right.

The above is a list of stars, chosen within certain limits as to magnitude and phase of the Moon, that will be occulted during the year, with the time of the phase of the occultation mentioned as seen from Greenwich. In general the phase is that which takes place at the dark limb, but the disappearance of Regulus on Nov. 21 and of ρ Leonis on Dec. 19 are both at the bright limb. The Moon is among the Pleiades on the night of January 18, in the early morning of Aug. 24 and on the night of Nov. 13. On the last occasion both phases of the occultations take place at a sensibly bright edge since the Moon is Full in the morning of the day mentioned. The "angle from N. point" shows the place of disappearance or reappearance on the Moon's edge, and is measured from the point nearest the Pole of the heavens (*not* the highest point) towards the east.

JUPITER'S SATELLITE PHENOMENA.—The Table on p. 58 gives the Times of Disappearance (D.) and of Reappearance (R.) of the Satellites of Jupiter at Eclipse that will happen when Jupiter is above the horizon at Greenwich and the Sun below. These phenomena are seen simultaneously from all places where the planet is above the horizon at the time. From opposition to conjunction, i.e. from Feb. 7 to Aug. 26, the eclipses take place on the eastern side of the planet; from conjunction to opposition on the western. In the latter periods, i.e. from Jan. 1 to Feb. 7 and from August to December, satellites I and II disappear by eclipse and reappear from occultation at the eastern edge. The times of such reappearances (Oc. R.) are given, the satellite and the time of its disappearance being in the *preceding* line. From Feb. 7 to Aug. the converse happens, and the times of disappearance by occultation (Oc. D.), and of reappearance after eclipse are given, the satellite being named in the second line. Near the time of opposition this pertains to satellites III and IV as well as to I and II as will be seen by examples on Jan. 31 and Feb. 26. The eclipse of a satellite is always accompanied by its occultation which precedes the eclipse from opposition to conjunction of Jupiter, but follows it from conjunction to opposition. In the morning of Jan. 8 satellite IV will disappear by occultation at *2h. 24m.* and on the night of March 21, III will be occulted at *23h. 36m.*, reappearing at *3h. 15m.* On the evening of April 19 when II and III are simultaneously eclipsed, I will be in transit across the disc from *22h. 16m.* to *0h. 33m.*, so that for a period Jupiter will be seen with only one exterior satellite, whilst in the morning of Nov. 21 there will be none from 2.12 to 2.52 (*see* p. 21).

The position of a star is defined by its Right Ascension and Declination, which are co-ordinates analogous to longitude and latitude on the terrestrial sphere. The lines of reference on the celestial sphere depend on the position of the axis of the Earth and since, for reasons known generally by the word Precession; this position has a continual small movement with respect to the stars, Right Ascension and Declination change annually by an amount that can be computed by formula. Observation of position of the stars shows that they do not conform precisely to this computed precessional change, and the outstanding amount for individual stars known as Proper Motion (*see* page 65), is shown in two columns of the adjoining table. The annual precession and Proper Motion combined, or the amount by which each element of a star's position changes in a year, known as the Variation is also shown. The angular parallax of a star is the angle that the mean radius of the Earth's orbit would, placed squarely, subtend at the star, and is therefore inversely proportional to its distance, and hence is a measure of that same. The parallaxes in the adjoining table are mainly trigonometric (*see* p. 64) and are taken from the General Catalogue of Parallaxes collected by Dr. Frank Schlesinger of Yale. The entry 000 indicates that the star is

especially distant, and for some few stars no value is available. The last column shows the distance from the Sun corresponding to the parallax in parsecs (*see* p. 65).

Sirius and Procyon have faint companions, Castor, ζ Herculis, γ Virginis and α Centauri are binary stars, ε Hydrae is a multiple system, and of these either the place of the centre of gravity or of the mean star is given.

These tables give Mean places. The position on any day of the year differs from this because of Precession, Nutation, Aberration and Proper Motion. The Mean place with these effects added is called the Apparent place, and for the purposes of navigation and surveying it is the Apparent place that is required.

The Stellar System.

THE objects of the sky, Sun, Moon, Planets, Stars, appear to us to be fixed on the interior surface of a hemisphere of which the observer is the centre. Actually the various classes of objects are at very different distances. The Moon, our nearest neighbour, is 240,000 miles from us; a distance which light, travelling at the rate of 186,000 miles a second, traverses in less than a second and a half. Of the bodies of the Universe whose distance is known, the farthest is so remote that its light takes over 100,000,000 years to reach us. The nearest star to the Sun is more than eight thousand times as far from it as is the planet Neptune. It is the purpose of modern astronomy to investigate the method of distribution of these bodies in space, their movements and their sizes. Cosmical Physics attempts to deduce their physical nature, and that of cosmical matter in general from the observations of the astronomer, combined with knowledge gained in the laboratory, with the hope of finally elucidating their past and future history. The total number of stars of magnitude 6·0 and brighter, which is sometimes taken as the limit of naked-eye visibility, is about 4,300, of which 3,000 are visible during the year from latitude 60°, but a more generous estimate, formed by including cases when two faint stars close together are seen as one, sets the whole number at 10,000. By the aid of the photographic plate objects are detected and recorded which no eye can see, even with the best optical aid, and from counts on such plates estimates have been made of the number of stars in the Universe. 2,000,000,000 was once assigned as a limit to their number, but this has been much increased by various estimates. From them 50,000 millions may be taken as the possible total number of stars in the galactic system (*v. infra*), though twice that number has been mentioned as a reasoned estimate. The number in the whole of space is incalculable.

THE STRUCTURE OF THE UNIVERSE.

The stars are divided into groups according to their apparent brightness and down to the 9th or 10th magnitude the number of each magnitude is known, all to this order having been catalogued. For fainter stars the numbers have been derived from counts in sample areas. If the Universe is an aggregation of stars in which the individuals of each degree of intrinsic brightness are distributed uniformly throughout an endless space, it can be shown that the number of stars brighter than the 4th magnitude would be about four times as great as the number brighter than the 3rd; the number brighter than the 5th magnitude greater than the number of those brighter than the 4th in the same ratio, and so on indefinitely. When the numbers of stars of different magnitudes obtained by counts are compared it is found that this star-ratio, as it is called, in the case of the brighter stars, approaches but does not attain the theoretical value 3·98, and that the ratio decreases continually as the stars are fainter, until at the 16th magnitude it is only about two. The explanation of this observed fact is that the universe of stars accessible to vision is limited; either there are few or no stars beyond a somewhat indefinite boundary, or we are prevented from seeing them by absorbing material distributed throughout interstellar space.

It is established from counts and measured distances that around our Sun the stars are fairly uniformly distributed at the rate of about one per 10 cubic parsecs. It is obvious that a uniform distribution of this nature cannot go on indefinitely, for, if it did, the background of the firmament would be bright, since in whatever direction we looked we should, in time, come to a star.

To a casual glance it is clear that the stars are not uniformly distributed over the sky, but have a tendency to congregate near the great belt of cloud-like forms which encircle the heavens, known as the Milky Way or Galaxy. Applying the method of sounding by "star ratios" above outlined, it is found that the stars appear to thin out less rapidly as we go out in the plane of the Milky Way than they do in the direction of the galactic poles. The deduction is apparent; the boundaries of the stellar system are more distant in the plane of the Galaxy than they are at the poles. In other words, the stellar system is an extremely flattened organisation, whose general form is, roughly, that of a double convex lens or of a watch. Looking along the galactic plane we find the stars crowding together, as we should expect, since this is the direction of greatest extension, and the Milky Way is therefore largely a depth effect. But examination of its prominent features, the great star-clouds, the irregularities in its form, and the deep rifts in its structure, shows that its appearance is not wholly due to depth, and that the region is the home of bodies and masses other than uniformly distributed stars. This aggregation is known as the Galactic System; it has been called the Stellar Universe, or the Universe, but the name is scarcely well-chosen because, as will be seen below, there are other aggregations which make this system merely a unit in an immense number of such denizens of space.

Statistical study of the distribution of the brighter stars shows that they form a local system that appears to have the same shape in general as the larger system spoken of, but the fundamental planes are slightly inclined one to the other. It was formerly a general belief that the Milky Way surrounded this congregation of stars as a girdle, whether continuous with it or not was an open question, but a modern view supposes the existence of other local systems similar to this one of which our Sun is a member, all lying more or less in the Galactic plane that may be seen as star clouds in the Milky Way. The greatest condensation of stars as we see them occurs in the bright galactic clouds in Sagittarius, while the opposite portion of the Milky Way is a region of low concentration and brilliancy, from which it is inferred that we are not at the centre of the galactic system, but that this is about 50,000 light years from the Sun and is situated in a star cloud seen in Scorpius and Sagitarius (Shapley).

In and around the Milky Way there are irregular nebulae (*see* p. 65) of which the nebula in Orion is one of the most remarkable that are found to be comparatively near objects, and are to be considered as within the Galaxy. There are masses of dark nebulosity that appear as rifts obscuring the stars behind. But besides these there are nebulae of another type that are not seen about our central Galactic plane, though some, it has been suggested, may be hidden by the dark nebulosity, which are thought to be very distant from our Sun, but viewed with a powerful telescope are resolved into spots of light believed to be stars. Such nebulae were called by William Herschel "Island Universes." They are now more often called extra-galactic

The last columns show the light emitted compared with that by our Sun, considered to be of magnitude −26·57 on the stellar scale. α^1 Centauri is the brighter of two bright stars seen as one by naked eye; they have a faint companion, Proxima. α^1, α^2, Crucis, if considered as one star (Mag. 1·2) would have been in the first of above lists. * Brighter component.

nebulae, and being, to some degree, of the same shape as, and bearing other resemblance to our own galactic system, are believed to be similar systems perhaps in course of making. About two millions of these extra-galactic nebulae are visible in the Mount Wilson 100-inch telescope. They appear to be scattered with a tolerable approach to uniformity through space, their average distance apart being something of the order of 2,000,000 light years. The most distant of them is about 140 million light-years from us.

To sum up modern ideas of the Cosmos we consider our Sun as one of millions, perhaps, that make up our local system. This, with other local systems and other bodies, make up the galactic system, which is merely one among millions of such systems that form the Universe.

Attempts have been made to estimate the dimensions of this Universe of stars. Four thousand light years was a former estimate of the diameter of our local system, but a more recent one is of the order of 20,000. The larger diameter of the galaxy is estimated to be more than 200,000 light years; 140 million light years may be taken as the limit of the Universe, but this is considered by some to be much too large.

STAR SPECTRA.

Most of the bright stars and many of the fainter have been examined with a spectroscope, and have been divided into classes according to their type of spectrum as indicated by the lines which cross them, the spectral types being named by the letters O, B, A, F, G, K, M, N. The stars of the first two classes, O and B, have spectra characteristic of helium and hydrogen. Planetary nebulae, some stars known as Wolf-Rayet, in whose spectrum the chief lines are bright, and the bright stars of Orion generally are in this group. Stars whose spectra range between A and F—it is to be remarked that there is no rigorous line of division between the classes and that there are subclasses and spectra noted as "peculiar"—are white or blue stars, and in their spectra broad absorption lines of hydrogen are conspicuous. In the next groups—F to G, and G to K—lines characteristic of metals appear, fine but numerous, and the stars of this class are yellow. The spectrum of our Sun falls late in the group F to G. The characteristic of the spectra of the remaining classes, M (and N), is the existence of a considerable number of flutings, and the stars are orange and red. Antares, Betelgeuse, and α Herculis are notable stars in sub-classes of this type. (*v.* supra.)

STELLAR EVOLUTION.

The early stellar spectroscopists believed that they were investigating the chemistry of the stars and finding the material of which they are composed. It was thought that the hydrogen shown by the spectrum of Sirius would some day change into calcium, which is a leading characteristic of the solar spectrum, and hence that Sirius is in an earlier stage of development than the Sun. The modern view, based on laboratory experiments, is that the spectrum shows the radiative power or, in other words, the surface-temperature of the star, and that the hydrogen lines in the spectrum of Sirius, for instance, do not indicate an excess of that element, but, rather, that the star is at the temperature (10,000° C.) when those lines are prominent. The Sun is at a temperature of 6,000° C., which is known from the fact that light of wave-length 4800 Angstroms is most abundant in its spectrum. This type of spectrum is characteristic of iron. Formerly the theory of stellar evolution was very simple. It was believed that stars began by being very hot and then cooled down, their spectrum changing in type until they arrived at a condition that gave a spectrum of type M and then disappeared. But about the year 1913 a hypothesis was propounded to the effect that in the beginning all stars are of Class M. That they are then bodies of gas of extraordinarily low density, and of low temperature and surface brightness, which contract, grow continually

hotter, and pass through the successive spectral classes towards B, but only the more massive stars can generate enough heat to reach the white hot state required to produce spectra of that class; the others reach their critical density at spectral Class A, F, G, or even K. After this critical point in their contraction is reached the stars begin to fall off in temperature and in surface brightness and pass through the spectral classes in the reverse order until they have again become red stars of Class M. This is a deduction primarily from the fact that the red stars, or stars of type M, whose distance we know and whose actual total luminosity we can therefore deduce, divide into two classes: one of stars of great luminosity, the other of those of small. There are no known red stars intermediate in this respect. The same is true in less degree of stars of adjacent spectral type.

THE SIZE OF THE STARS.

The surface temperature of a star or rate of emission of energy per unit area is known, by help of a certain law, from the colour of the light that is emitted most profusely as shown by its spectrum, and since the intrinsic luminosity is the total outpouring of energy, it is easy to understand that the area of the surface may be deduced, and hence the diameter of the star. Writing generally, the size of the majority of the stars estimated in this way is of the same order as that of our Sun, though some may be 20 times as large, others smaller in the same ratio. The bright red stars, of which there are not many, are giants having diameters 200 times or more that of our Sun. There are a few stars of peculiar quality known as White Dwarfs that are much smaller, but of an amazing density and weight.

The stars are too remote for even the largest to show an appreciable disc in any telescope as do the planets, and obviously the size of a star is not proportional to its brightness as we see it, for this depends on its distance, and also on temperature or other physical condition. It is possible, as suggested above, to deduce the diameter of a star from its spectrum and apparent brightness if its distance is known, but a more direct way of measuring stellar diameters has lately been found by an instrument known as an "interferometer," with which the angular diameters of several of the largest stars have been measured. Since the distances of these stars are known, the following values of the diameters in miles have been deduced, and it is satisfactory that these agree closely with the values derived from consideration of the surface brightness as above outlined :—

α Herculis	346	million miles
Betelgeuse (average)	216	,, ,,
Aldebaran	34	,, ,,
Arcturus	28	,, ,,

Antares has been measured in this way, and is said to be a very large star, but uncertainty in the knowledge of its parallax does not permit a reliable determination of its linear diameter. From measures of Mira Ceti at maximum it was inferred that this star was then at least as large as Betelgeuse. The measures of Betelgeuse itself have shown some variability.

ABSOLUTE MAGNITUDE.

This phrase which is much in use in the astronomy of the present day, implies the luminosity of a star irrespective of its distance, to which reference has already been made. The precise definition of absolute magnitude is that it is the number that expresses, according to the usual system of stellar magnitude, the brightness of the star as it would be if it were at the distance of 10 parsecs (parallax 0″·1). It is clear that if the distance of a star is known, its absolute magnitude can be computed from its apparent, *or* by reversing the formula, if the absolute and the apparent magnitudes are known, the distance of the star can be determined, the numerical relation between M the absolute and m the apparent magnitude, being $M=m+5+5 \log \pi$, where π is the decimal fraction indicating the parallax of the star.

DISTANCE OF THE STARS.

The distance of the stars from us is so immense that its determination is perhaps the most difficult problem of astronomy, and not until comparatively recent years has it been effected in any quantity and with much certainty. The direct method of determination of a star's parallax, as this quantity is called, consists in measuring the minute difference of direction of the star as seen from different points in the Earth's orbit. This is now usually done by photographing the star and its surroundings at appropriate epochs and measuring the change in relative position. A spectroscopic method of finding parallax through the absolute magnitude has been evolved. It has been found that in the spectra of stars the ratio of the intensity of certain pairs of lines is a function of the absolute magnitude of the star. In stars of great luminosity, for example, a certain Calcium line is very strong, whilst a line due to Iron is weak, but in a star which emits less total light the case is reversed. Examining and applying this principle to the spectra of stars whose distance has been found trigonometrically, a table correlating the above characteristic with absolute magnitude has been formed by which the actual luminosity of a star may be inferred, and hence its distance.

The distances of some stars or groups of stars are found by indirect methods such as the following. If by any means it is possible to know the mean parallactic movement (see *Stellar Motion*) of a group of stars the mean parallax or distance of this group follows from a simple computation. In other words, the space through which our Sun travels, which is about twice the diameter of the Earth's orbit in a year, is taken as the base-line with which to measure the distance of the stars. The parallaxes of some binary stars have been found by a computational method assuming a value for their mass (hypothetical parallax).

For some distant objects a method is adopted depending on a peculiar property of a class of stars known as "Cepheid Variables." These stars show very regular fluctuations, coming to maximum at intervals which range from a few hours to several days, and it has been found that the length of this period has a relation to the mean absolute brightness of the star. Those stars which have the longest period are the brightest, and a definite law has been evolved connecting the two elements. These Cepheid Variables are very common in globular star-clusters—the peculiarity was, in fact, first suggested by a number seen in the lesser Magellanic cloud—and by adopting this law it is clear that the great distances of such objects may be known from a simple observation.

large distances a large unit is employed. One of these is the space that light travels through in one year which in miles is 6 followed by 12 zeros; another unit is the *parsec*, or the distance at which the mean radius of the earth's orbit would subtend an angle of 1″ (parallax of one second). This is 3¼ times the light year and is represented roughly by 2 followed by 13 zeros. The kiloparsec as equivalent for 1,000 parsecs and the megaparsec for a million are both now in use. There is also a unit little used called the *Siriometer*, which is equivalent to a million times the distance of the Earth from the Sun.

Within the sphere of 10 parsecs radius about the Sun as centre, there are rather more than a hundred stars whose distance has been measured. It is probable that more than that number remain to be discovered.

STELLAR MOTION

Many, if not all, of the so-called Fixed Stars are gradually changing their positions relative to one another, the movement of each star being called its Proper Motion. The seven bright stars of the Great Bear would on this account have formed in prehistoric times a configuration rather different from that seen to-day. Consideration of these proper motions has led to the conclusion that they are in part due to actual movement in space of the stars themselves, but in part to the movement of our own Sun, which causes an apparent motion of the star in the opposite direction, this latter being called the star's parallactic motion. In this way, it has been found fairly conclusively that the Sun, and with it the Earth and planets, is moving through space with a speed of 19·5 kilometres per second towards a point on the celestial sphere not far from the bright star Vega, speaking roughly, for there are differences in the determinations of the position of this point. The Proper Motions of Stars of spectral type F and G are found to be much larger on the whole than those of other types, and it is therefore to be supposed that these classes are nearest to us. It has already been mentioned that our Sun is of this spectral type. By an optical principle known as Doppler's, it is possible to find from certain peculiarities of the lines in its spectrum the rate at which a star is approaching or receding from us. The "line of sight" or "radial" velocities of many stars have been found in this way, but the possibility that such spectral peculiarities may be due to causes other than motion is to be remembered.

THE INTERIOR OF A STAR.

Astronomical physicists explore the interior of a star on the assumption that it is a volume of perfect gas whose molecules are in incessant motion, which constitutes its temperature, and whose pressure, density and temperature conform strictly to a certain relation (Boyle's Law), and on the further assumption that it has adjusted itself to mechanical equilibrium such that the heat at any point within supplies just enough pressure to support the weight of the gas above it. They hence deduce the density and temperature at any point within a star, its mass and radiative quality or luminosity. It is believed that annihilation of its matter is the source of a star's energy, and that as a star grows older its mass lessens. A relation between mass and luminosity found to hold in the case of certain stars for which these qualities are known is thought to hold generally, the more massive stars being the brighter, though a small class of stars of very high density known as "White Dwarfs," of which the best known is the companion to Sirius do not conform.

An alternative hypothesis to that of the perfect gas has lately been proposed.

STAR CLUSTERS AND NEBULÆ.

Among the apparently solitary stars there are found groups of stars gathered close together, some of which may be easily separable into individuals, others that can only be separated by the most powerful telescopes, and objects that appear as unresolvable patches of light; the latter are called nebulæ, and were aptly described by Sir William Herschel as "shining fluid." A short list of the more interesting of these various objects is given herewith.

No. in New General Catalogue.	Messier's or Herschel's Number.	R.A. 1920.	Declination 1920.	Constellation.	Appearance.
		h. m.	° ′		
224	M 31	0 38	+40 50	Andromeda ...	Very brilliant oval nebula, visible to naked eye.
598	M 33	1 29	+29 38	Andromeda ...	A large nebula.
869 & 884	H VI. 33, 34	2 15	+56 45	Perseus	Fine double cluster, visible to naked eye.
1952	M 1	5 30	+22 0	Taurus	The well-known "Crab Nebula" of Lord Rosse
1976	M 42	5 31	− 5 27	Orion	Large and splendid nebula, visible to naked eye.
2070	.....	5 39	−69 19	Dorado.....	Great "Looped" nebula—visible to naked eye.
2099	M 37	5 47	+32 30	Auriga	A fine cluster of stars.
2168	M 35	6 4	+24 20	Gemini.....	Magnificent cluster of stars.
2632	M 44	8 35	+20 15	Cancer	Called "Præsepe," or the "Bee Hive"—visible to naked eye.
3372	....	10 42	−59 16	Argo	Great nebula surrounding η Argûs.
5194	M 51	13 26	+47 35	Canes Venatici	Brilliant spiral nebula.
5272	M 3	13 38	+28 45	Canes Venatici	Splendid cluster of stars.
6205	M 13	16 39	+36 35	Hercules.....	Very fine cluster of stars, visible to naked eye.
6494	M 23	17 52	−19 0	Ophiuchus	Fine cluster of stars.
6543	H IV. 37	17 59	+66 35	Draco	Bright planetary nebula.
6720	M 57	18 51	+32 55	Lyra.....	Beautiful ring of bright nebulosity.
6853	M 27	19 56	+22 30	Aquila	Large nebula formed like a "Dumb-Bell" or "Hour-Glass."
7089	M 2	21 29	− 1 10	Aquarius.....	Splendid globular cluster of stars.
7078	M 15	21 26	+11 49	Pegasus	Magnificent cluster of stars.

There are nebulæ called planetary that are small, regular in outline, and show a uniform disc. Analogous to these are some which are dark in the centre called annular or ring nebulæ. Beyond this the spectroscope divides the nebulæ into two great classes. The first spectroscopic observation of a nebula, made by Huggins in 1864, showed a spectrum of one bright line only, which indicated that these bodies, or at least some of them, are constituted of glowing gas. Later investigation showed that the spectra of some nebulæ are continuous. The nebulæ with continuous spectrum are called "white" nebulæ, in distinction to those with bright line spectra, which are "green" or gaseous. Photography has brought the means of studying the number and form of these objects in great detail, and it is found that a large proportion of them are of spiral form. They are the extra-galactic nebulæ already spoken of (*see* p. 62). The gaseous green nebulæ are in a small minority, and are generally diffused and irregular in outline and lie mostly in the Milky Way. The smaller, the so-called planetary and stellar nebulæ, do not markedly avoid it as do the spirals which lie in a zone of the sky, roughly at right angles to the Galaxy. Globular star clusters also lie outside the Milky Way, but irregular clusters are within its limits. There are also masses of Dark nebulæ in space which may be the earliest form of matter. Though it is not possible to measure their distances directly, several lines of argument lead to the conclusion that the spiral nebulæ are very far away. The nebulæ have been much studied recently as to their form and total brightness, and a system of classification has been proposed. The hypothesis is put forward that nebulæ of the same class are approximately of the same size, and hence that their relative distances may be inferred. Distance of the order of 250,000 parsecs has been assigned to M 31 and M 33 (see Table) from observation of the Cepheid variables they comprise (see p. 65), and from this their actual size has been deduced. The diameter of M 31 (the Andromeda) is about 13,000 parsecs.

VARIABLE STARS.

Although the stars generally shine with unchanging brightness, there are some among them which are exceptions to this rule, and of these Algol, the star β of the constellation Perseus, is the best known. In general this star is of about the second magnitude, but at regular intervals of something less than 69 hours it fades away to between third and fourth magnitude, remains so for about 20 minutes, and then regains its light. It is considered certain that this is due to partial eclipse by a dark companion that moves in an orbit round the bright star. The whole eclipse occupies about 9½ hours. The approximate times when this star will be at minimum in the months when it is suitably placed for observation are given in the table on page 67. The position of Algol is given by R.A. 3*h.* 4*m.*, Declination 40° 41′ N.

There are variable stars of types other than those like Algol. The Cepheid variables have an average period of about 7 days, and the rise from minimum to maximum takes only about one-third of the whole period, so that the decrease of light is more gradual than the increase. It has been suggested that this may be due to a pulsation or periodic swelling and contraction of the star. A peculiarity of these stars has been mentioned (*see* page 64). Stars of the β Lyræ type pass from minimum to minimum in about 6½ days, but are not of the same brightness at all minima, the alternate being equal. There are variable stars with periods ranging between 30 and 500 days whose difference of brightness during a light-cycle may be as great as 9 or 10 magnitudes. The spectra of most of these long-period variables show bright emission as well as dark absorption lines, and a periodic outflow of incandescent gases and vapours is suggested as the cause of the light variation. Mira Ceti (R.A. 2*h.* 16*m.*, Declination 3° 18′ S.) is the most famous of these. It will probably be at maximum in April of this year, when it will not be visible. Its magnitude at maximum may be anything between 2 and 5, and at minimum, 9 or 10.

There is a group of 8 or 9 stars of a remarkable type known as the U Geminorum which for most of the time are of uniform or nearly uniform magnitude, but undergo periodic outbursts which generally last a few days. The majority of this group are of 11th or 12th magnitude at maximum, though U Geminorum itself is of the 9th, and the mean range in magnitude is about 4½. The outbursts may be said to happen every 20 or 30 days, but this period is frequently much exceeded. SS Cygni is included in this group, though its variation is very erratic. Also there are a few variable stars whose characteristic is the opposite of that of the class just mentioned; they are ordinarily bright, but sometimes become faint without warning and remain so for a year or more, varying very irregularly until they again attain their normal brightness. The star R. Coronæ Borealis, normally of magnitude 6·0, which gives the name to this class, has been observed since the year 1843, and up to the year 1925 forty well-marked minima had been recorded, ranging between magnitudes 7 and 15 in brightness and from 2 months to 12 years in duration. A variable star with the remarkably short period of rather more than an hour and a half has lately been discovered.

NEW OR TEMPORARY STARS.

The phenomena known as "Novae" or "New" Stars can scarcely be classed as variable stars, for the rise to maximum, so far as is known, occurs only once in their history. Generally the Nova appears in the place of a star of faint magnitude which may have blazed out into conflagration, but on the other hand the juxta-position may be merely fortuitous and the phenomenon may be the sudden visibility of a mass of dark nebulous gas which by some means has become igneous. The great brilliancy, which occurs very suddenly, is short-lived, for there follows a rapid fall, and in a few months the object emits, perhaps, 1 per cent. of its light, whilst in a decade it falls to 10th or 12th magnitude or fainter, and in some cases shows a decided variability. About thirty bright stars of this kind visible since the time of Hipparchus 134 B.C. are on record. A list of 13 that have been seen since 1848 will be found in previous issues of this Almanack, together with an account of the changes in the spectrum that have been generally observed.

No convincing reason for these phenomena has yet been given. The speculation has been put forward recently that novae are explosions of white dwarfs, and another that a faint star collects a covering of gaseous inter-stellar matter.

MINIMA OF ALGOL (β PERSEI) IN 1932.

JANUARY.	FEBRUARY.	MARCH.	APRIL.	JULY.	AUGUST.	SEPTEMBER.	OCTOBER.	NOVEMBER.	DECEMBER
D. H.	D. H.	D. H.	D. H.	D. H.	D. H.	D. H.	D. H.	D. H.	D. H.

30 18	...	30 23	...	...	29 22	30 11	...	29 16	31 5

These are *approximate* times of the middle of minimum phase.

DOUBLE AND BINARY STARS.

The large majority of stars when looked at through a telescope appear as single points of light of different degrees of brightness and perhaps differing slightly in colour. Some, however, are seen to consist of two points, so close together that the duplicity is shown only by telescopic examination and the measurement of the relative position of the components forms a branch of observational astronomy. This duplicity would happen if one star lay in space immediately behind the other; but there are more double stars than would accrue if this were the only reason, and it is evident that the greater number of double stars are formed by components actually near together, which, it is likely, have a gravitational connection. This idea of connection was not held in early days and Sir Wm. Herschel who, in 1779, was the first to begin their systematic observation, was careful to call these pairs Double Stars, not wishing to imply anything more than nearness, though by that date it had already been suggested that two stars seen near together were actually contiguous and formed a physical system. Twenty years later observed changes in the relative position of the components of some double stars led Herschel to adopt this idea, and he used the word Binary as the name for those known to have physical connection. It is clear that limits of distance must be set, and, in general, a separation between the components of less than about 30 seconds of arc defines a double star. As to the lower limit it is found possible with a large telescope to measure distances between two stars as small as a fifth of a second. There are in the sky 15,000 to 20,000 stars between these limits that have been measured and catalogued. The number is given vaguely for it is being added to continually, a certain private observatory in the North of England, for example, contributing a hundred or more to the list annually. ζ Ursae Majoris (Mizar) the middle of the three stars that form the tail of the Great Bear is considered to be the first double star discovered (1650). Its components of 2nd and 4th magnitude are separated by 15 seconds. It has a companion, Alcor, of 5th magnitude 11 minutes distant that can be seen separately by the naked eye, but this does not come within the definition. Castor and γ Virginis are other bright stars that consist of two components of about the same brightness separated by a few seconds. Sirius and Procyon are very bright stars that each have a very faint star as companion, and between these types there are many other and various combinations of magnitude. Observations of Mizar, extending over 150 years, do not show any change in the relative position of the components, but from similar measures of the other stars mentioned, it is deduced that the twin components are moving round one another in elliptic orbits. In the case of γ Virginis the orbit is completed in about 180 years. Other visual binaries have periods that range from 10 to 250 years, but a method (*see* below) other than direct visual observation reveals the existence of binary stars revolving in orbits in periods that may be a few days or only a few hours.

SPECTROSCOPIC BINARIES.

As mentioned on p. 65, it is possible, from certain peculiarities in a star's spectrum, to deduce the speed with which any star is advancing towards, or receding from, the earth. As a result of their motion around one another, the two components of a binary star will, in general, be respectively advancing towards, and receding from, the earth at different rates, and when both components are bright enough for their spectra to be visible, the spectrum of a binary star shows two distinct sets of lines, which oscillate about their mean position in a period equal to the period of the star. There are many stars of this kind with components so close together that they cannot be seen as two visually, but whose orbit may be determined from observations of their spectrum. Such stars are called Spectroscopic Binaries. One recently discovered, known as Plaskett's star, B.D. 6°1309, has a period of 14·41 days, and is the most massive and brightest star (absolute magnitude) whose elements are known.

Colours of Double Stars.—The components of close double stars that differ little in brightness show little or no contrast in colour. The components of Castor are said to be both yellowish-green by one observer, and by another bright white and pale-white. The components of γ Virginis are both pale-yellow to one observer, silvery white and pale yellow to another. The components of o^2 Eridani of magnitude 9·2 and 10·2 are both blue. Following are some examples in the opposite sense. The stars named are all physically connected and have had their orbits computed—the magnitudes of their components are shown by the figures: η Cassiop, 4·0, 7·6, yellow, purple; ε Hydrae, 3·0, 6·0, yellow, blue; 70 Ophiuchi, 4·5, 6·0, yellow, purple; Procyon, 1, 12, yellow, green; 25 Canum Ven, 5·0, 8·5, white, blue; Sirius, 1, 10, white, yellow.

THE Sun is one of the millions of stars that make up the Universe, and, so far as human knowledge goes, in magnitude and constitution, is not unlike the stars of the night sky. It is surrounded by a family of smaller bodies of which our Earth is one, and the Solar system, which is only a minute detail in the structure of the Universe, is the observing station from which we look out in all directions across the great distances which separate us from the other members of the stellar system.

The Solar or Planetary system consists of the Sun, with eight major planets, and minor planets or asteroids, that may be counted by thousands, circulating round it at varying distances in oval-shaped orbits. A moving object discovered in the year 1930 is said to be a ninth major planet (*see* Pluto, p. 71). Six of the major planets have smaller bodies circulating around them, so that each forms a separate system, but all the bodies receive their light and heat from the Sun.

The periodic comets which return to perihelion at regular intervals may be considered to be members of the Solar system, since they move in elongated elliptical orbits of which the Sun is at a focus. It is likely that their light is reflected sunlight, since they become brighter as they approach the Sun, but also that they are partly visible by their own light.

The plane of the Ecliptic in which the Earth moves round the Sun (*see* p. 75) is used as a fundamental plane of reference. The other planets move in planes inclined but little to the plane of the Ecliptic, at varying distances from the Sun, and describe orbits in periodic times which are connected with the distances by a certain relation known as Kepler's 3rd law. The squares of the periodic times vary as the cubes of the semi-major axes. Following are given brief notes on each of the bodies which make up the Solar system, with details of their sizes, distances from their primary, and periodic times in tabular form (pp. 73, 74). The time of rotation about its axis, or the length of the day of the planet, is added when this is known.

THE SUN.

The surface of the Sun, seen in a telescope, presents a mottled appearance formed by a darkish background on which small brilliant patches are scattered, the shape of these being such that they have been called alternatively rice-grains or willow leaves. On this surface, or amid the material forming it, black spots appear sporadically, and around them are brilliant streaks called faculae, which are conspicuous when the spots are near the edge of the Sun. Bright and dark streaks unassociated with spots, generally called flocculi, can be seen in the central parts of the disc with a spectrohelioscope. There are also brilliant clouds of calcium vapour pervading the solar surface that are revealed by a device called a spectroheliograph, by which the whole of the Sun's disc may be photographed by the light of any element, and of that element only. Modern views describe the spots as columnar vortices which have a deep-seated origin far below the photosphere, and assume that a sun-spot is a vast tornado in which electrified particles are rapidly whirled, as is proved by the presence of a magnetic field. The spots vary in size and number, and increase and decrease somewhat uniformly in both respects, passing through a maximum about every eleven years. They increase at a rather more rapid rate than they decrease. From measures of their position on the disc and by help of the elements given on page 2 of each month the latitude and longitude (heliographic) of the spots can be computed. It is seldom that spots appear in latitudes greater than 30° from the solar equator, but about the time of spot minimum or rather earlier small spots appear in even more extreme latitudes, and during the succeeding eleven years the spot regions converge towards the solar equator (*Spörer's Law of Zones*), and at time of maximum the spots are largely in solar latitude 12° to 14° N. and S. The periodicity was first noted by Schwabe, of Dessau, in the year 1843 from a comparatively few years' observations, but records of earlier years and a continuous and complete record made subsequently prove the existence of a period of average length of 11⅛ years from maximum to maximum, though there are large variations from this mean as shown by the table below. The prominences (*v. infra*) also show a fluctuation in their activity in a period of the same length, and the form of the solar corona changes with the Sun-spot cycle in a most marked way. Not only this, but there are some terrestrial occurrences that vary in like phase with these solar, which seems to show convincingly a connection, or at any rate a relation, between Sun and Earth (*see* page 76). The Sun rotates on its axis in about 25⅓ days, which is shown by the movement of the spots across the visible disc, but because the Earth has moved in its orbit in that time the period of rotation with respect to the Earth, the Synodic period, as it is called, is 27¼ days, and a spot may therefore be on the visible disc for 13 or 14 days. These are approximate mean values, for the Sun does not rotate as a whole solid body, and the rate of rotation is not the same in all latitudes. A formula derived from the Greenwich record of spots during the period 1878–1923 gives for the time of sidereal rotation in different latitudes:—

	d.	h.		d.	h.
Equator	25	1	Lat. 15°	25	8
Lat. 5°	25	2	,, 20°	25	14
,, 10°	25	5	,, 30°	26	6

These figures refer to both hemispheres of the Sun. The addition of ⅔ days gives approximately the period of rotation with respect to the Earth.

DATES OF SUN-SPOT MAXIMA AND MINIMA.

Maxima.		Minima.	
1805·2	1870·6	1810·6	1878·9
1816·4	1883·9	1823·3	1889·6
1829·9	1894·1	1833·9	1901·6
1837·2	1906·4	1843·5	1913·1
1848·1	1917·7	1856·0	1923·6
1860·1	1927·5	1867·2	

The maximum of which the date is generally given as 1927·5 was not sharply defined, but was shown by a double peak in the curve of spotted area. There was a general decline in the spotted area in 1931. The spots were mainly small, and on some days there were none.

When the intense light of the Sun is shut off by the interposition of the dark body of the Moon in a total solar eclipse, appendages called prominences that are generally described as reddish coloured, but appeared white from

aeroplanes on the occasion of the eclipse of 1927, June 29, are seen projecting from the Sun's edge. These consist of masses of glowing hydrogen gas arising from the chromosphere, being sometimes of remarkable shape and extending to enormous heights, and are occasionally detached from the body of the Sun. It is possible to observe these at times other than when the Sun is eclipsed. In the lower strata of the Sun's envelope are found the vapours of many metals, known by their characteristic lines shown in the spectroscope. Another appendage of the Sun outside the chromosphere, called the Corona, can only be seen during total eclipses. The lower portion of the corona consists of a pale green light containing hydrogen; the upper is a beautiful mass of silvery white light, in form of feather-like plumes, with dark spaces between, which have been traced from the Sun's edge to a distance as great as twice the Sun's diameter. The corona appears to vary in shape and extension according as the eclipse occurs at the period of maximum or minimum of Sun-spots. At the eclipses of 1929, May 9, and 1930, October 21, it was of intermediate type. Solar eclipses are total only when seen from places on which the shadow of the Moon falls, and an eclipse is seen partial from localities not far from this path of totality, because the change in the observer's position places him out of the cone which envelops both Sun and Moon. There are more solar eclipses than lunar in the proportion of four to three taking the whole earth into account; for any given station the proportion is more than reversed.

MERCURY.

Mercury is the nearest planet to the Sun, and the smallest in the system. Because it moves in an orbit between the Sun and the Earth this planet can never be seen far from the Sun, but is always at a short distance to the West or to the East of that body. In the former case Mercury appears as a morning star and in the latter as an evening star. The extremes of these apparent excursions are known as Greatest Elongations, and their times and the distances, measured by the angle included between the lines which join the Earth to the Sun and the planet respectively, are given in the third page of each month. The great ellipticity of the orbit of Mercury causes the amount of these Elongations to vary considerably, and they may be as small as 16° or as large as 28°. Eastern elongations, when the planet is seen as an evening star, occur at intervals of about 116 days, as do Western, and the best opportunities of seeing the planet are *before* the Eastern elongations in the spring and after Western elongations in the autumn. This year Mercury is likely to be visible as an evening star in March, and in the morning in the early part of September and at the end of December. Mercury shows phases to the Earth like the Moon in her first quarter if the elongation be in the East, and like her last quarter if in the West. (*See* p. 73.)

VENUS.

Venus, which is nearly twice as far from the Sun as Mercury, its distance from the central body being rather more than two-thirds that of the Earth, is almost exactly the same size as our globe. Her apparent movement with respect to the Sun is similar to that of Mercury, except that, being farther from the Sun, and nearer to the Earth than her smaller neighbour, the angles of Elongation exceed those of Mercury, and extend to 47°. Writing generally, it is believed that the planets rotate on axes as does the Earth, but this is not known to be the case for the interior planets Mercury and Venus, because of the difficulty in seeing any markings on their surfaces that may be considered permanent. Attempts to discover the rotation period of Venus have shown that it may be about 23 or 24 hours, or 24 days, or 225 days which is the period in which it completes its orbit round the Sun. With this divergence it can scarcely be said that any period is proved. A scheme, practised in America, of photographing through screens of coloured glass (*see* Mars below) applied to this planet leads to the suggestion of an outer covering of cirrus cloud, and markings seen on the photographs taken in ultra-violet light appear to indicate a period of rotation of 30 days. This planet will be brilliant and conspicuous in the evening sky in the first half of this year, and in the morning in the latter half. Her conjunction with Jupiter on Oct. 20 is to be noted. (*See* p. 40).

MARS.

Mars, the first planet whose orbit is exterior to that of the Earth, is a little larger than Mercury and considerably smaller than Venus and the Earth. Details of his distance, size, and period will be found in the table. Mars is in opposition at intervals of about two years, because it moves at a rate not greatly different from that of the Earth. It will not be in opposition in 1932, the next occasion of this kind being in 1933, March 1. Though the planet will be well situated for northern observers so far as altitude is concerned, it will not be a favourable opposition as to its distance, its diameter being only 14″ as compared with 25″ in 1924 when it was in opposition in August. Mars, like Mercury and Venus, exhibits phases, but in a much less degree than those planets. Its disc departs from exact circular form, or is gibbous, only to the extent of one-eighth of its diameter. The other superior planets are too far away to show very appreciable phase, though traces of it are sometimes to be detected in the disc of Jupiter.

Unlike Mercury and Venus, Mars exhibits many well-defined markings, which enable its rotation period to be well ascertained. There are white spots at the poles of rotation that appear to be snow, or some material that melts, since they dwindle, or even disappear in the Martian summers. The remainder of the surface of the disc is made up of dark bluish-grey areas that were at one time thought to be water but are now regarded as regions covered with vegetation and extensive areas of ruddy or orange hue, largely in the northern hemisphere, that may be of the nature of sand or rock. These markings may be considered permanent, though they suffer small changes apparently due to cloud formation above them. Among these markings are some of such dimensions that they may be properly called "canals," but certain fine, straight markings seen by some observers, but not by others, have received this name, which is certainly unfortunate, as it has been taken to imply that they are of manual construction, but for this there is no sufficient evidence or proof. The possibility of communication with Mars, which in some minds has been strengthened by the advent of wireless telegraphy, is fantastic.

A method of investigating the surfaces of the planets was evolved a few years ago by photographing through "colour filters." The light before it reaches the plate, which is of suitable sensibility, passes through a coloured screen that absorbs the component rays of certain wave-length so that one colour only affects the plate. The moon, the planets and terrestrial landscapes have been photographed in this way, and comparison of the various results has suggested an interpretation. In the case of Mars the telescopic features as described above come out very strongly in red light, but fade away as the colours approach the violet end of the spectrum except that the white polar cap increases in strength, all of which is interpreted as showing that Mars has an atmosphere of considerable depth and obscuring power, sporadically cloud-bearing, and that the white polar spot is an atmospheric phenomenon. The question of an atmosphere on Mars has for long been a matter of discussion, and to this these experiments form a valuable contribution, though they may not supply a final answer. The two satellites of Mars, Phobos and Deimos, were discovered by Asaph Hall in 1877. Their names were adopted by the discoverer on the suggestion of H. G. Madan, the science master at Eton.

MINOR PLANETS.

Between the orbits of Mars and Jupiter there are a large number of small planets, and every year considerable additions are made to the list, a hundred and sixty-two having been found in the year 1930. At present the total is about two thousand, more than a thousand being on the "permanent" list as fully investigated. There may still be thousands awaiting detection. The four largest, found in the early years of the 19th century, are—Ceres, 485 miles; Pallas, 304 miles; Juno, 118 miles; and Vesta, 243 miles in diameter. Some of them are perhaps nothing more than great masses of rock flying round the Sun.

The periodic times of their revolutions vary considerably, and an average may be taken as 1,600 days, or 4½ years. Some of the orbits are very oval, and the inclination of their planes to the Ecliptic has considerably different values. The inclination of Pallas is 35°, whilst that of Juno is only 13°. One of these small bodies, Eros, approaches very near to the Earth at some oppositions, which affords a good opportunity for determining the solar parallax. An opposition of this kind occurred early in the year 1931, when the minimum distance was about 16 million miles.

JUPITER.

The next planet in order from the Sun, Jupiter, is the largest in the system, and has a diameter eleven times that of the Earth. Its density, however, is only ¼th that of the latter. On viewing Jupiter through a telescope it will be seen that the disc is not circular, but its form, an oblate spheroid, is believed to be due to the rapid axial rotation, which causes a flattening at the poles and bulging outwards at the equator. The same effect is produced on all the planets in more or less degree.

Jupiter has four principal satellites about the same size as our moon, or 50 per cent. larger, which were the first celestial objects discovered with the telescope, Galileo having observed them in the year 1610. Simon Marius, however, claimed to be their independent discoverer. It has also five much fainter satellites which are far beyond the powers of small telescopes. One of them was discovered with the 36 inch refractor at the Lick Observatory in 1892. The remaining four, which are extremely faint, were detected by means of photography and may be regarded as among the most difficult to see of celestial objects.

The characteristic surface features of Jupiter are the bright zones separated by dark belts to both of which the names Equatorial, Tropical and Temperate apply in analogy with the zones on the Earth. Examined by telescope these are found to be full of detail and markings which, though they may be atmospheric, are largely permanent but undergo changes. Of these the best known is the Great Red Spot and its surroundings situated on the southern edge of the south Equatorial Belt. There are records of an observation of a spot by Hooke in 1664 which may have been an early appearance of this; the Rev. W. R. Dawes figured it in the form of an ellipse resting on the south equatorial belt of Jupiter on Nov. 27, 1857, and in 1878 it came under general observation. A curious bay or hollow in the above-named belt was noted by Schwabe in 1831, and is still seen. The mean rotation period of this object and of the red spot near it has been found to be $9h.\ 55m.\ 37s.$

The rate of rotation of the planet is found by taking transits of spots or, in other words, by noting the exact times when markings are on the central meridian, and differences in the times given by different markings is a matter of interest. During the apparition of 1929–30 a long group of dark spots appeared at the south edge of Jupiter's North Temperate Belt, which gave the remarkably small rotation period $9h.\ 49¼m.$, which is less than that of the fast-moving Equator (*see* below). This is the third occasion on which rapidly-moving dark spots have been detected in that latitude of the planet, the others having been in 1880 ($9h.\ 48m.$, Denning) and in 1891 ($9h.\ 49m.$, Barnard, Hough). On the other hand, an observer in the early part of 1931 found a dark hump on the S. edge of the S. Equatorial Belt with the abnormally long period of $9h.\ 59m.$ Apart from such unusual cases the surface of Jupiter, like the Sun, does not rotate as a whole, but individual zones of latitude appear to move at different rates. Two systems are in use for defining the positions of markings on Jupiter. In System I., which pertains to the rapidly moving Equatorial Zone of the planet, the period of rotation is taken as $9h.\ 50m.\ 30{\cdot}0s.$ System II. applies to the Temperate Zones, and in this the time of rotation is $9h.\ 55m.\ 40{\cdot}63s.$

SATURN.

The sixth major planet in order from the Sun is unique in appearance because of its encircling ring-system, which renders it magnificent as a spectacle and an interesting object for telescopic observation. The system consists of two bright rings and an inner dusky ring through which the body of the planet can be seen. A marking on the outer ring known as Encke's division is sometimes seen, but it is doubtful whether this is a real separation. The rings appear to be flat annular discs of extreme thinness, in the same plane which is inclined 28° to the plane of the Ecliptic, and it is shown that neither of them can be a coherent mass or in one piece either solid or liquid, as in that case it would be difficult to account for their stability. They probably

consist of an immense number of minute bodies revolving like satellites round the body of the planet. Belts like those on Jupiter, but of not so pronounced a character, are seen on Saturn. Photographs of this planet, taken by ultra-violet light show a wide dark belt near the equator which may or may not be an extension of the dusky ring. Saturn shows a bulging at equator, the ratio of the polar to the equatorial diameter being as 13½ to 15, an eccentricity of the ring with respect to the Ball has been suspected.

Saturn has ten satellites, situated outside the rings; some of the former are visible in telescopes of low power. Titan, the largest, is about one and a half times the size of our moon, whilst Iapetus is nearly the same size as our satellite.

Titan was discovered by Huyghens in 1655, Tethys, Dione, Rhea and Iapetus (*see* table p. 73) by J. D. Cassini towards the end of the 17th century. Sir Wm. Herschel discovered Mimas and Enceladus in 1789, and Hyperion was observed for the first time, almost simultaneously by Bond and Lassell, in September 1848. The most distant, Phœbe, which was first seen in 1898 (photographically by W. H. Pickering), moves in its orbit in retrograde direction like the two exterior satellites of Jupiter, VIII. and IX. Themis, which is called the tenth satellite, though it appears not to be the farthest from Saturn, has been observed once only since its discovery in 1900, and its reality is doubtful.

URANUS.

This planet, discovered by William Herschel at Bath in 1781, is only just visible to the naked eye. It will be in the evening sky in the early months of 1932 and at the end of the year, being in opposition on October 14. In a telescop, Uranus is distinguished from the stars around by its disc, which is obvious though less than 4″ in diameter, and by the quality of its light, which is less piercing than that of the stars. The two outer and brighter of its four satellites were discovered by Wm. Herschel in 1787; the two inner by Lassell in 1851. Their names, Ariel and Umbriel, were taken from Pope's "Rape of the Lock." A hundred years ago it was thought to have six satellites, neighbouring stars having been mistaken for attendants. All four move in a plane which is inclined 82° to the plane of the ecliptic and in that plane they move retrograde, or in the opposite sense to the revolution of the planets round the Sun. If, however, the plane of their movement is regarded as inclined 98° to the plane of the ecliptic, their revolution may be considered direct. It is generally supposed that the plane in which the satellites move is that of the planet's Equator. A period of rotation has been determined both by spectroscopic observation and from variations of light of the planet, the value, 10¾ hours, being sensibly the same in the two cases.

NEPTUNE.

This planet is a telescopic object of about the 8th magnitude that was discovered in September 1846, as the result of mathematical deduction from irregularities shown by the observed positions of Uranus. Its single satellite, which was discovered by Lassell in October of the same year, moves in a plane inclined 35° to the plane of the Ecliptic in a retrograde direction like the satellites of Uranus. A period of axial rotation of the planet of 7¾ hours has been inferred from variability of its light, and another of twice that length from spectroscopic observations, which is adopted. Triton has been suggested as the name of Neptune's satellite, but is not generally used.

PLUTO.

The late Percival Lowell, from a study of the outstanding errors of the orbit of Uranus, predicted the path and mass of a planet that moves in an orbit outside that of Neptune, and in the early months of 1930 a series of plates taken and examined at the Lowell Observatory showed a moving object not far from the position it should have had to accord with Lowell's prediction, but fainter than the object Lowell hoped to find. The first orbit computed was a very eccentric ellipse with period of 3,000 years, and the idea came to many that the object was a comet. The photographic plates of many observatories were scanned in the hope of finding images in former years, and these were found (Uccle, 1927; Mount Wilson, 1919; Yerkes, 1921 and 1927; Königstuhl, 1914). These images have sufficed to prove that Pluto's orbit is not much more eccentric than that of Mercury. The outstanding difficulty is to make estimates of its mass and size on which we may rely. The observed errors of Neptune's orbit are said to give definite evidence of Pluto's attraction, and that its mass is comparable with that of the Earth, but on this point there is not universal agreement. It is doubtful whether a measurable disc can be seen, but from its magnitude and distance it is estimated to be at least as large as Mars, and perhaps as large as the Earth. It shows no cometary appearance in the telescope. The period is 248 years. The distance from the Sun at aphelion is nearly 50 astronomical units and at perihelion 29·6 such units, so that it is just within the orbit of Neptune. The body moves in a plane inclined 17° to the ecliptic. The orbit is said to be so similar to that predicted by Lowell that the resemblance cannot be due to accident.

Assuming it to be a major planet, the name Pluto has been accepted by the Trustees of the Lowell Observatory. This was proposed by Miss Venetia Burney, of Oxford, aged 11, a great-niece of Mr. Madan, already mentioned (*see* Mars).

THE MOON.

Neither Mercury nor Venus, so far as is known, has a satellite: the one satellite of the Earth is the Moon, which is quite familiar to us. The mean distance of the Moon from the Earth is about 239,000 miles—near enough for us to get a more complete knowledge of its surface conditions than we can of any other member of the Solar system. Only one side of the Moon is seen from the earth, but every region of the Moon is presented to the Sun in turn, and neglecting hypotheses as to the possible existence of a lunar atmosphere and its effects, it seems likely that there are rather remarkable changes of temperature: in the lunar day of half a month it must be heated to an extreme degree, and in the other half subjected to cold equal to that of interstellar space. Her diameter is rather more than 2,160 miles. Her rate of motion through the firmament is 13° 10′ 35″ per day, which implies that she travels over a space slightly exceeding her own diameter in one hour. The average time from a New Moon to the next is *29d. 12h. 44m. 3s.*, but individual cases may range 6 hours and more on either side of this

(see also p. 74). When seen through a telescope the surface of the Moon presents many objects of great beauty and interest. A small instrument will show the chief "seas," plains, mountain ranges, ring-plains, and crater-pits. The question as to the origin of these formations, whether they may have been caused by volcanic action, or, on the other hand, by the impact of meteors, forms an interesting subject for discussion. (*See* p. 36.) The material of which the Moon is composed is probably the same as that of the Earth.

When the Earth passes between the Sun and Moon, the Earth's shadow sweeps across the Moon and causes a lunar eclipse, which may be either total or partial as in the case of solar eclipses, but there is the difference that the phase of a lunar eclipse is seen the same from all places where the Moon is above the horizon at the time. Solar eclipses can take place only at New Moon, and lunar eclipses only at Full Moon. (*See* p. 69.)

The Full Moon which occurs near the Autumnal Equinox rises at nearly the same time, about sunset, on several consecutive evenings. Because in earlier times it was thought that this was specially ordained to facilitate the ingathering of the crops the phenomenon was called the Harvest Moon. The Full Moon which follows is called the Hunter's Moon.

A FEW OF THE CHIEF LUNAR FORMATIONS.

Wedge-shaped Valley of the Alps.—Near the central line of disc, towards the north, a cleft 83 miles long and 3½-5¾ miles broad.

Apennines.—An extensive mountain range somewhat similar to terrestrial features. Visible to naked eye when projecting into the dark part of the disc. Length, 460 miles; highest summit (Huyghens) reaches 18,000 feet.

Aristarchus.—A lunar crater in N.E. quadrant. The brightest object on the Moon. This crater is visible as a luminous spot when all the surrounding region is involved in shadow.

Mare Crisium.—A dark grey oval plain visible to naked eye near W.N.W. limb of Moon. Extends 280 miles N. to S. and 354 miles E. to W. Well seen five days after new or a few days after full.

Mare Serenitatis.—Lies S. of the Moon's centre, and extends over 428 miles. A nearly circular dark plain. Contains a crater, Linne, formerly suspected of change. This *mare* is visible to naked eye.

Clavius.—One of the finest craters on the Moon, and about 142 miles in diameter. Situated on S. limb.

Tycho.—Towards S. limb. Has been called "the metropolitan crater of the Moon." A fine crater 54 miles in diameter and 16,600 feet deep. Central hill nearly a mile high. Tycho is the centre of a remarkable system of bright rays radiating from it, and they are very conspicuous at the time of full moon. In its region (S. limb) the Moon's surface is so studded with craters that it resembles an immense honeycomb.

COMETS.

Comets that revolve in elliptical orbits round the Sun as focus, and return to view at periodic intervals, may be considered members of the solar system. The periods that have been confirmed by returns range from 3⅓ to nearly 80 years, whilst a few other computed orbits show periods as large as a million years. Other comets move in parabolic courses and apparently do not repeat their visits to the Sun.

Those that revolve in periods from 3⅓ to 9 years are specially numerous. Their paths extend outward to the region of Jupiter's orbit, and from this circumstance they are termed Jovian comets.

Encke's comet, which returns unfailingly every 3⅓ years, and was due at perihelion on June 3, 1931, was observed on June 14 and subsequently. The periodic comet Neujmin, with period 17½ years, whose return was expected, was observed in September, some months after perihelion passage. Two unexpected comets were discovered during 1931 (up to Oct. 1), neither of which appears to be periodic. One was unusually bright, being observed telescopically in the morning twilight, but did not make a spectacle for general view.

An unusually large number of periodic comets are computed to return to perihelion in 1932. The list is subjoined with, in each case, the month of perihelion passage. These are to be considered as approximate only, for several of the orbits are in course of re-calculation, and more precise information will be found in the publications of the British Astronomical Association—Schorr (Jan.); Grigg-Skellerup (May); Neujmin

When the above numbers are less than 0·500 the planet is *horned*, when greater than 0·500 it is *gibbous* until unity is reached, when it is full.

1927 I (June); Wolf's 2nd periodic (July); Borrelly (Aug.); Kopff (Aug.); Brooks (2) (Oct.); Tempel 1866 I (Nov.); Faye (Dec.).

There are other families of comets, none so numerous as the Jovian, named respectively from the planets Saturn, Uranus and Neptune, for a reason similar to that given above. Neujmin's comet that returned in 1931 belongs to the Saturnian family, while the comet of the November meteors (Tempel) belongs to the Uranian.

METEORS.

Another class of objects belonging to the Solar system are the meteoric streams, which give rise to occasional showers of meteors, falling stars, or fireballs, and are all the same class of object, the distinction being only one of size. They are visible in varying number on every night of the year, and are sometimes so abundant as to form striking phenomena. There is some reason for the supposition that meteor swarms are the remains of disrupted comets, and that Tempel's comet, that will return to perihelion perhaps at the end of 1932, is the parent of the Leonid meteors. A considerable display occurred on October 9, 1926, and a smaller one on Oct. 9, 1927, from a radiant at 262° + 55° in Draco, which appear to have been derived from Giacobini's comet of 1900, that passed its perihelion on December 11, 1926, and has a period of about 6½ years. Its next return will therefore be in 1933, and meteors of the stream may be seen this year as they appear to be distributed over a considerable arc of the orbit. Fireballs form a very important branch of meteoric astronomy. These objects make their appearance at all times of the year, and are usually seen casually by persons not looking for meteors or acquainted with the requirements of observation in regard to the phenomena, with the result they are often imperfectly described, which makes computation of their real paths not practicable. At 5 o'clock in the afternoon of January 17, 1931, in semi-daylight, a very brilliant fireball was seen mainly from the west of England but also from places as far east as Aldershot, which was found from the observations, of which there were many, to have begun its luminous flight at a point 85 miles above Pontypool and to have ended it 21 miles above a point in the Atlantic Ocean 46 miles west of Trevose Head, Cornwall, having traversed 168 miles at the rate of 21 miles a second. If it was not already vaporised it would have fallen into the ocean 62 miles west of St. Just.

THE AURORA BOREALIS.

This phenomenon may be considered more terrestrial than celestial. It sometimes happens that an unusual luminosity is seen in the northern sky in the form of streamers, arches, and condensations. This is regarded as showing the outer limit of our atmosphere, and its height has been

determined by means of simultaneous photographs taken from two or more stations 20 to 60 miles apart. It is found that very few auroræ are below 50 miles high, and above that level the number increases rapidly, the most frequent height being at about 63 and 66 miles. Above 66 miles the number gradually diminishes, but some have been measured as high as 400 miles. It is suggested that the aurora is due to electrical discharge caused by charged particles shot into the earth's atmosphere from the Sun. An auroral display generally happens about the time of the occurrence of a terrestial magnetic storm (*see* p. 76). There is some evidence of a tendency for a display to be repeated after an interval of 27 days, which is the period of rotation of the Sun with respect to the earth, and they are more frequent at times of sun-spot maximum. A prominent line in the green in the spectrum of the aurora has given rise to much study and has lately been shown by laboratory experiment to be due to a mixture of oxygen and helium bombarded by high-speed electrified particles, but as this line has been found to be present in the light from the night-sky in non-polar regions when no aurora is visible it may be that this line is not directly connected with the phenomenon.

THE ZODIACAL LIGHT.

This is an appearance whose cause is not completely understood, to be seen only from places distant from towns and cities where the air is free from smoke and the darkness of the sky is not affected by the glare from artificial lights. At such places in northern latitudes it shows, when the moon is absent, as a cone of faint light stretching up slantingly from the Sun before sunrise in the autumn months and after sunset in Spring. From high elevations in the tropics it may be seen throughout the year. A distinction is sometimes made between this and the Zodiacal Band which is an even fainter phenomenon and a prolongation of the Zodiacal Light. This is said to extend entirely across the sky, forming a complete ring, and there is at the point exactly opposite to the Sun a patch, a few degrees in diameter, of slightly brighter luminosity called the "Gegenschein" or "counter glow." The Zodiacal Light has been said to be a mere atmospheric effect, but this is inconsistent with some of the chief features of its appearance. It may be the manifestation of a widely scattered appendage of the Sun or sunlight reflected from a vast concourse of meteoric systems.

Duration of Light and Darkness.—The second column of the first page of Calendar for every month contains a small diagram showing the amount of Darkness, or the period of moonlight and sunlight during the twelve hours from 18*h.* to 6*h.* These small diagrams have four divisions, each representing three hours, and a division is left unblacked if the moon or the sun is above the horizon for at least half of the period it represents. The diagrams for the greater part of the year

THE shape of our Earth is that of an oblate spheroid, or a solid of revolution whose meridian sections are ellipses not differing much from circles, whilst the sections at right angles to these are circles. The length of the Polar axis, according to a recently accepted determination (Hayford) is 7,900·0 miles and the diameter of the Equatorial circle 7,926·7 miles. The suggestion has been made that the Equator is not an exact circle, but the supposed deviation from circularity was small, and the fact has not been proved. The mean density of the Earth is 5·5 times that of water. The Earth moves round the Sun in a plane which passes through the Sun's centre, or, to write with more precision, the centre of gravity of the Earth and Moon moves in this plane, and both revolve round the centre of gravity but not precisely in the plane. The plane is called the plane of the Ecliptic. The Earth's Equator is inclined to this plane at an angle of 23½°, and it is this tilt which causes the seasons. At some time of the year the Sun is high above the Equator in mid-latitudes both north and south, and not only does the high altitude make the days longer, but the Sun's rays fall more directly on the Earth's surface and make it hotter. The periods of Summer and Winter are opposed in the two hemispheres, the time of Summer in the Northern coinciding with Winter in the Southern, and *vice versâ*. Since the axis of the Earth is inclined always in the same direction, the line of intersection of the Equator with the Ecliptic moves parallel to itself as the Earth travels round the Sun (approximately). The instants when this line passes through the Sun are called the Equinoxes. The Sun and Earth are surrounded on all sides by the stars, and because the Earth moves round the Sun, the latter changes its position with respect to the stars during the year, and different sets of stars are seen in the sky at midnight in Summer and Winter. The average velocity of the Earth in its orbit is 18½ miles a second, and it moves more slowly in July than in January. It makes a complete rotation on its axis in about 23 hours 56 minutes of mean time, which is the sidereal day. Because of the movement of the Earth in its orbit the length of the solar day is more than this by about four minutes (*see* pp. 57, 77). It has been shown almost conclusively in recent years that the axis of rotation is not a fixed line in the Earth, but that its extremity, or the North Pole of the Earth, moves in a curve, roughly spiral, about the pole of figure as centre at a distance of a few feet from it.

THE TIDES.

The Tides of the Ocean are rightly attributed to the attractive influence of the Moon on the Oceans, modified by a similar influence of the Sun, which is less in amount because of the much greater distance of the attracting body. If the Earth were a globe uniformly covered with water it would be possible to account for the observed phenomena and predict them by simple mathematical consideration of these attractive influences, but these are very greatly modified by the land formations of our globe, and the prediction of the tides for any port depends mainly on the results of observation. A series of observed times and heights of the tide having been compiled and analysed, the analysis will show that the complete tidal movement can be represented by the combination of a series of periodic terms, and if these terms are each carried forward to some future date their recombination will give the predicted tide. Taking the mean sea-level as datum, writing generally, at any place high water occurs twice in every 24 hours, the interval between successive happenings being 12 hrs. 25 mins. High water is at its highest (springs) at or near New and Full Moon, whilst low water falls an equal amount below at those times. At or near the time of the first and last quarters of the Moon (neaps) the high water rises only about half as much above the mean level as it does at springs, and the low water falls about half as little below it. These phenomena do not usually coincide exactly with the times of these phases of the Moon, but occur later, the interval being known as the *age* of the tide—thus, at London Bridge, the highest or spring tide occurs 2½ days after New or Full Moon, and the neap tide is similarly delayed. The difference of height of spring and neap tides is the most apparent of the periodic differences which make up the whole tidal variation. Besides this there are differences due to the varying distance of the Moon from the Earth, and when the Moon is at or near perigee at New or Full the tide is specially high. There is a slight difference in the heights of the spring tide at New and Full Moon, and also in the height of the neap tide at the respective quarters, but these and other small periodicities are not appreciably noticeable at some ports. The mean level of the sea remains practically constant, but small changes have been detected which may be assigned to various causes.

TERRESTRIAL MAGNETISM.

The best known manifestation of this phenomenon is its effect on the needle of a mariner's compass, which, except for the variations to be immediately described, points continually northward. The north point indicated by a compass needle is not, except in particular cases, the north point shown by astronomical observations; in other words, the needle does not point to the North Pole of the axis of rotation of the Earth, but makes an angle with the terrestrial meridian. This angle is called the Magnetic Variation, or, more generally, Magnetic Declination, and differs in different parts of the world and even over limited tracts of country. Lines of equal magnetic declination run across the British Isles in directions approximately parallel to that of a line from Land's End to Edinburgh. Along a line joining Cambridge to Littlehampton, the declination (West) is, approximately, the same as at Abinger. At Dover it is now rather more than a degree less; from Newcastle to Plymouth it is nearly 1½° greater, and along a slightly curved line from Killarney to the island of Lewis the west declination is 5° greater than at Abinger. There are two points of convergence on the globe known as the Magnetic Poles. At these points a freely suspended magnetic needle would stand vertically. The evidence available shows little, if any, recent movement of the North Magnetic Pole, whose position inferred from the Admiralty Chart of equal declination of 1927 is lat. 71°, long. 96° W., which is almost the same as found by Ross in 1831. There is some suggestion of eastward movement of the South Magnetic Pole, whose position in 1927 was lat. 73° S., long. 158° E. A scientific exploration of polar regions is being made this year, which may supply information on this point. The magnetic declination at any

place changes gradually year by year. That the compass needle does not in general point true north and south, but that it is inclined a certain amount east or west, and that the amount varies with the locality, was recognised among western nations by the end of the 15th century, Columbus being credited with the discovery. The Dip or inclination to the horizon was first noticed by Hartmann, of Nuremberg, in 1544, and was measured by Norman, of London, in 1576. That there is a continual change in the magnetic declination was discovered by Gellibrand in 1634.

Magnetic Declination at London.

Year.	°	′	
1580	11	15	East.
1665	1	30	West.
1765	20	0	West.
1800	24	0	West.

In 1819 the westerly declination at Greenwich was about 24° 25′, which was probably its maximum. The needle has been since moving slowly eastward at that place, and in the year 1925 the declination (mean) was observed to be 13° 10·0′ west. The work of recording earth-magnetism was then transferred from the Royal Observatory, Greenwich, to Abinger near Dorking in Surrey. The values of the elements there found in successive years are given in the following table :—

Year.	Dec.	H.F.	V.F.	Dip.
	° ′			° ′
1925	13 22·7 W.	·1860	·42946	66 35·1
1927	12 58·4	·18575	·42932	66 36·2
1929	12 35·8	·18555	·42918	66 37·2
1930	12 24·6	·18542	·42924	66 38·2
1931	12 13·5	·18530	·42930	66 39·2
1932	12 2·5 W.	...	...	...

The values for 1931 are to be taken as provisional, and the declination given for 1932 is inferred only. V.F. signifies vertical force.

The mean differences, Abinger *minus* Greenwich, for Dec. H.F. and Dip. are found to be—

1925	+ 12·8′	+ ·00183	− 16·2′
1931	+ 13·7′	+ ·00170	− 16·0′

The daily movement in declination of the needle at Abinger is 2 or 3 per cent. less in amount than that at Greenwich.

The declination varies during the 24 hours, for the needle makes a small excursion in the morning from East to West, and returns, the range at Greenwich being about 12′ in summer and 7′ in winter. The needle occupies its mean position in the morning about 10*h*., and again about 18*h*., throughout the year. It reaches its most westerly position about 14*h*., and its most easterly position during the night or early morning at a time which varies during the year. The inclination or dip also varies in a similar manner to the declination. Since these changes of the magnetic elements are greater during the hours of daylight than in the night, are much greater in summer than in winter, and are evidently affected by changes in the solar activity—for the daily range is larger at times of Sun-spot maximum than at minimum—it is to be concluded that they are dependent on solar radiation.

MAGNETIC STORMS.

Besides these diurnal movements and their periodic variations, the magnets recording the three elements sometimes make sudden and violent oscillations which may continue for several hours. Such an occurrence is known as a Magnetic Storm, and is accompanied by spontaneous electric earth-currents, which may, if violent, interfere with telegraph working, and is often synchronous with a manifestation of the Aurora Borealis. A suspected recurrence of magnetic storms after an interval of 27 days that would support the theory that they are caused by radial emanations from the Sun, which strike the Earth—the hose-pipe theory—has been further investigated. It appears that this recurrence does not obtain in the case of the most intense storms, but that there is a tendency for a storm of minor degree to be followed by another of its kind after the period named, which is not easily explained. There is frequently, but not always, a large spot on the Sun contemporaneously with a large storm, leading to the hypothesis of active areas on the Sun that may or may not be marked by a spot.

EARTHQUAKES.

Earthquakes, or earth tremors, are believed to be due to some form of fracture caused by the breakage of the Earth's substance under a growing strain, when the strain has passed the *breaking point*. *This gives rise to waves* which are propagated through the solid substance to distant parts of the Earth, and vertically upwards to the surface, sometimes with disastrous effects. The point where the fracture occurs and the earthquake originates is called the seismic centre, or origin, or focus. That part of the Earth which is vertically above this centre is called the epicentre. *The waves transmitted* through the Earth may come to the surface hundreds, or even thousands, of miles from the epicentre, and the times of arrival are recorded. The first indications on the seismograph are made by longitudinal waves (P), which are followed after an interval by direct transverse waves (S) in approximately the same path, but which travel at a different rate. From the length of the interval of time between the arrival of the (P) and the (S) waves, the distance of the epicentre from the recording station may be inferred, and from three or more such distances it is possible to make an estimate of the position of the epicentre on the Earth's surface (*see* p. 33). There is no very certain method for determining the depth of the focus, but it seems that this may range from 50 to 450 km.

BRIGHTNESS OF THE NIGHT-SKY.

A research now in progress, not to be named as meteorological, though it deals with the surrounding of the earth, has for its first aim the determination of the amount of light in the background of the night-sky, apart from clouds or moonlight. The facts make it clear that this feeble illumination is not due to the collective light of telescopic stars, but suggest a permanent visible layer in the upper atmosphere. Observations organised by Lord Rayleigh are being made in various parts of the world of the intensity of the light separated to show the blue, green and red components (*see* p. 74). Observations made under this scheme at the Cape of Good Hope and other observatories show variations that may be periodic, and a correlation with sunspot activity is suspected.

Greenwich Mean Time.

APART from abstract and philosophical considerations, Time, in actual practice, is measured by the rotation of the Earth, and a solar day is the duration of a complete rotation of our sphere round its axis with respect to the Sun, which is rather longer than a rotation with respect to the stars because of the movement of the Earth round the Sun, which is not constant because of the ellipticity of the orbit. The length of the Solar day also varies because the axis about which the Earth rotates is not perpendicular to the plane of its orbit. Clocks are adjusted to an average or mean solar day which is of uniform length and is divided into 24 equal hours. This is the basis of Mean Solar Time. The length of the Mean Solar day is constant, but that of the apparent, or the interval from one transit of the Sun across the meridian to the next, varies for the reasons above given, and it happens that the longest apparent solar day is about December 22, and the shortest about September 16.

A unit and method of measurement having been established, it is necessary to choose a zero. The zero adopted is the instant when a fictitious body known as the Mean Sun, which is sometimes before, sometimes behind the real Sun, is on some chosen meridian. The time is called the Local Mean Time of any place through which that meridian passes. Usually some standard meridian, such as that of Greenwich, is chosen, and the time of that meridian is used throughout a whole country, and hence the expression Greenwich Mean Solar Time, or, more usually, Greenwich Mean Time, arises (*see* Zone Standard Time, p. 78).

Apparent Solar Time.

The time shown by a sundial is called Apparent Solar Time, and is affected by the two causes mentioned, which make the length of a solar day not uniform. It differs from Mean Solar Time by the Equation of Time which is given in the second column of page 2 for each month, with a precept for its use.

The Astronomical Day.

For purposes of Astronomy the day formerly began at noon, and the hours following noon were numbered successively from 0 to 23. A change was made in 1925, and the Astronomical Day now begins at midnight, the hours being numbered in this way as has been the practice in this Almanack since 1921. (*See* Note, p. 4.)

Rhythmic Time Signals.

For the purpose of comparing the time shown by a distant clock with that of the Greenwich standard, signals issuing primarily from Greenwich are broadcast from the Post Office Wireless Station at Rugby each day at 10*h.* and 18*h.* For accurate comparison a series of signals of the rhythmic, scientific, or Vernier type is sent. The zero signal is exactly synchronous with a beat of the standard clock, and those that follow are at intervals of 60/61 seconds. The comparison is made by noting the coincidence of a beat of the distant clock, beating seconds, with a signal. If a tick of the clock coincides with the zero signal, it is clear that the clocks differ by an integral number of seconds. If, however, coincidence does not come at the zero signal, but at the *nth* following, the difference of the clocks contains a fraction of a second involving $n/61$.

Sidereal Time.

A sidereal day is the duration of a complete rotation of the Earth round its axis with reference to the stars and begins at any place when the First Point of Aries is on that meridian. In observatory practice time is measured, and the standard clock is regulated, by this rotation of the Earth with respect to the stars, and Mean Solar Time is derived from Sidereal Time by computation. The error and rate of the sidereal clock are found by observing the instant it shows when certain stars, known as Clock Stars, cross the meridian, and comparison of this with the known time of transit (star's R.A.) will give the error of the Sidereal clock, and from this the error of the Mean Solar clock can be found by comparison and computation as below.

The rule for finding the Mean Time of transit of any object from its Right Ascension, or, what is the same thing, of converting Sidereal into Mean Time may be stated thus:—*From the given Right Ascension or Sidereal Time subtract the Sidereal Time at the preceding Noon, and further diminish the result at the rate of* 10 *secs. per hour, or by the* Table on p. 57. If the R.A. should be smaller than the S.T. at noon, 24*h.* must be added. The final result will be the mean time reckoned from noon, to which 12*h.* must be added to convert into G.C.T. as now used.

Ex.—At what time will Sirius cross the meridian on August 31?

	H.	M.	S.
R.A. of Sirius + 24*h.*	30	42	9
Sid. Time at Noon, Aug. 30 (subt.)	10	33	52
Interval of Sidereal T. from noon	20	8	17
Retardation from p. 57 (subt.).....		3	18
Interval of Mean Time from noon	20	4	59
G.M.T. (U.T.) of Southing.....	8	4	59

For stars that transit after noon it would have been necessary to use the Sidereal Time at Noon for August 31.

Mean Time may be converted into Sidereal Time by reversing this process, or otherwise by taking out the G.M.T. of the zero of the Sidereal clock *which precedes* the Time to be converted, making use of col. 9 on page 2 of the month; *e.g.*:—

	H.	M.	S.
G.M.T. (U.T.) Aug. 31	8	4	59
From col. 9, p. 31.....	1	23	56
Interval of Mean T. from 0*h.* Sid.	6	41	3
Acceleration from p. 57 (add)	0	1	6
Corresponding Sidereal Time	6	42	9

Summer Time.

In 1916 an Act dated May 17 ordained that during a defined period of that year the legal time for general purposes in Great Britain should be one hour in advance of Greenwich Mean Time. An Act of 1922 (July 20), specified that the period should begin at 2 o'clock G.M.T. in the morning of the day following the third Saturday in April, or if that day is Easter-Day, the day following the second Saturday, and should end at 2 o'clock G.M.T. in the morning of the day next following the third Saturday in September. The Act, renewed in 1924 and 1925, was made permanent (August 7, 1925) and modified by substituting the first Saturday in October for third Saturday in September. The Act applies to Great Britain, Northern Ireland, the Channel Islands, and the Isle of Man. A list of the periods in each year during which Summer Time has been used since its adoption will be found in this Almanack for 1926.

In the last few years Summer Time has been in use in France and Belgium during the same period as it is in England. It is reported that this arrangement will not be followed this year.

Zone Standard Time.

In the year 1880 it was enacted by statute that the word "time," when it occurred in any legal document relating to Great Britain, was to be interpreted, unless otherwise specifically stated, as the Mean Time of the Greenwich meridian.* Other nations similarly used the time of their own capital, but since the year 1883 the system of Standard Time by Zones has been gradually accepted, and now almost throughout the world a Standard Time which differs from that of Greenwich by an integral number of hours, either fast or slow, is used. In a few cases the difference includes a half hour.

The Standard Time adopted in various countries is given below. In the United States and Canada five standard times are used, these large territories being divided into zones approximately 7½° on either side of five central *meridians*. Brazil is divided into three zones in which the times 3, 4, and 5 hours slow on Greenwich are standard respectively. For the North coast of Siberia the hourly zones from 12 hours to 4 hours fast have been adopted.

11½	,,	S....Western Samoa (British).

In the Tonga or Friendly Islands the time 12h. 20m. fast on Greenwich is used: the longitude is about 11*h.* 40*m.* W., but the Date line (*see* below) passes to the East of them. The time of Aden 2*h.* 59*m.* 54*s.* fast on Greenwich is standard in Aden and British Somaliland. The time of Calcutta is 5*h.* 53*m.* 20·8*s.* fast: Holland, 0*h.* 19*m.* 32·1*s.* fast; British Guiana, 3*h.* 45*m.* slow.

The time 2 hours fast on Greenwich is called East-European, that 1 hour fast, Mid-European. The time 4 hours slow on Greenwich has been called Maritime, Inter-Colonial, or Atlantic Time. The names of the other zones of North America are as shown.

THE DATE OR CALENDAR LINE.

The line where the change of date occurs as adopted by the British Admiralty is a modification of the 180th meridian, and is drawn so as to include islands of any one group on the same side of the line, or for political reasons. The line is indicated by joining up the following eight points :—

(1)	Lat.	60° S., long. 180°.
(2)	,,	51½° S., long. 180°.
(3)	,,	45½° S., long. 172½° W.
(4)	,,	15½° S., long. 172½° W.
(5)	,,	5° S., long. 180°.
(6)	,,	48° N., long. 180°.
(7)	,,	52½° N., long. 170° E.
(8)	,,	65° N., long. 169° W.

Then through the centre of Bering Strait to a point lat. 70° N., long. 180°.

* Summer Time is the "legal" time during the period in which its use is ordained. (See pp. 14, 39 and 77.)

THE AGE OF THE EARTH.

IN the view of science, any date for the "Creation of the World," such as the year 4004 B.C., as adopted by Archbishop Ussher from scriptural chronology, is quite untenable. From the assumption that its heat is sustained solely by contraction of its bulk, Lord Kelvin deduced 20,000,000 years as the time that the Sun has existed, but this is too short to be accepted by geologists whose researches require a considerably longer time for the formation of terrestrial strata. The age of the Earth has been deduced astronomically from the eccentricity of Mercury's orbit, and from the tidal theory of the origin of the Moon. Geologically by various methods, and, since the discovery of radio-activity, from the ratio of the quantities of lead and of radio-active elements in rocks in the Earth's surface, which are held to result from the transmutation of uranium. All the evidence is more or less consistent with the conclusion that the Earth has existed as a planet for a period between 1,500 and 3,000 million years.

GEOLOGICAL PERIODS.

I. AZOIC ("Without Life"), containing no trace of life in any form. The duration of this period probably far exceeded that of all the remaining divisions together.

II. EOZOIC ("Dawn of Life"), characterized by the first appearance of animal life.

III. PALÆOZOIC ("Old Life") or PRIMARY, containing traces of extinct animal life:—

i. *Cambrian*, exemplified in Wales (Cambria), Cumberland, etc.—the earliest group which possesses a connected suite of fossils.

ii. *Ordovician*, exemplified in North Wales and named after the ancient British tribe (Ordovices) inhabiting the region.

iii. *Silurian*, named after the ancient British inhabitants (Silures) of S.E. Wales.

iv. *Devonian* or *Old Red Sandstone*, from the prevalence of the system as a marine formation in Devonshire.

v. *Carboniferous*, including *Coal Measures*, Millstone Grit and Mountain Limestone.

vi. *Permian*, from the Russian province of *Perm*, where these strata are widespread.

IV. MESOZOIC ("Middle Life") or SECONDARY, with intermediate forms of animal life:—

i. *Triassic*, from the *three* (tri-) divisions of the type formation in Germany.

ii. *Jurassic*, typically displayed in the *Jura Mountains*.

iii. *Cretaceous*, from the *chalky* nature of its representatives where first studied.

V. CAINOZOIC ("New Life") or TERTIARY, containing forms of existing life:—

i. *Eocene*, the *dawn* or beginning of *new* forms of life, *i.e.*, existing species.

ii. *Oligocene*, containing *a few* still existing species.

iii. *Miocene*, containing a *minority* of existing species—less than 50 per cent.

iv. *Pliocene*, the fossil remains show a *majority* of still existing species.

VI. QUATERNARY ("Fourth in Order") or POST-TERTIARY:—

i. *Pleistocene* or *Glacial*, the *greatest number* of the remains are those of still existing species. Period of last Great *Ice* Age.

ii. *Recent* or *Post-Glacial*.

Definite dates cannot be assigned to most periods, but G. de Geer has shown that scarcely 9,000 years ago the site of Stockholm was beneath the ice-sheet (VI. i.). Traces of *human* life are first found in V. iv. (*See also* below.)

THE ANTIQUITY OF MAN.

Pithecanthropos erectus (Erect Ape-man).—Remains of a skull and of a thigh bone were found in 1891 and 1892 by Professor Dubois, at Trinil, Java. These are held to be remains of a creature of Pleistocene times (*see* Geological Period, col. i.), about midway between the Orangutan and Man in development.

Sinanthropos pekinensis (Peking Man).—A skull found at Choukoutien, 40 miles S.W. of Peking, China (Dec. 2, 1929 (*is ascribed to* the same period as the Java type, but the brain development is greater than the Trinil skull and the brain case much thinner than that of the Piltdown skull.

Australopithecus Africanus (Erect Man-ape).—A skull was discovered in a limestone deposit at Taungs (Western Cape Colony), in 1925, by Professors Dart and Young of Witwatersrand University. In connexion with this discovery, Sir A. Keith, F.R.S., has declared that traces of *human* life may yet be discovered in *Miocene* times (*see* col. i., V., iii.).

Homo Heidelbergensis (The Heidelberg Man).—A lower jaw was discovered near Mauer, Heidelberg, in 1907. This is held to be that of a primitive man of the Pleistocene Period.

The Piltdown Skull (Eo anthropos, or Primitive Man).—Discovered in 1912 at Piltdown, Sussex, and ascribed to primitive man of early Paleolithic times.

Neanderthal Man.—Remains of a skull and parts of a skeleton found in 1859 in the Neanderthal Ravine, near Düsseldorf, Rhenish Prussia, and others found at *Spy*, Belgium, in 1884, are held to represent the oldest known dolichocephalic (long-headed) race in Europe, living about 50,000 years before the Christian Era. In 1925 a similar skull was found near *Tabgha*, Palestine.

Homo Primigenius.—Discoveries of interred human remains at Combe Capelle, Dordogne, France (1909), at Brüx and Brünn, Moravia, and at Galley Hill, Northfleet, Kent (1895) are held to be those of human beings of late Paleolithic times, from 35,000 to 15,000 B.C.

STAGES OF CIVILIZATION.

The terms employed by ethnologists refer to periods, not of time, but of culture, and are of local application only, there being no universal synchronous sequence in all parts of the world. Races of Europe, Asia and America had reached the Iron Age of development long before the 18th century, A.D., while races in Oceania were still in the Paleolithic (or at least Neolithic) stage at the time of Cook's voyages.

The Stone Age.—The ancestors of primitive man are held to have adopted the use of stones of a suitable size for defence, while primitive man made such instruments more effective by sharpening them to a rough point. The earliest period is known as *Eolithic* (or Dawn of the Stone Age), and this period may have extended to 600,000 years B.C. Weapons of a later period, known as *Paleolithic* (or Old Stone Age), show gradual developments, from the chipped, leaf-shape *forms*, known as *Chellean* (from Chelles, Seine et Marne, France), and employed, perhaps, from 400,000 to 100,000 B.C., to later and more effective flint points, arrow-heads and spear-heads, flat on one side, known as *Mousterian* (from Le Moustier, where many such implements and other remains were

found). The Mousterian period is held to have lasted until about 10,000 B.C., when *Neolithic* (or New Stone Age) weapons, polished and less crudely fashioned, were brought into use for a further period of about 5,000 years. In the Stone Age the burial of the dead was influenced by the primitive nature of the implements available for digging, the graves being only large enough to contain a body huddled together in a cramped position.

Cultivation of the Soil.—Cultivation is believed to have followed the interment of the dead about 10,000 B.C., and rendered possible the political (*polis* = city) organisation of mankind. There appears to have been a definite centre of Western Civilization at *Nippur* (and elsewhere in Iraq) no later than 6,000 B.C., and in *Egypt*, under the first of the Pharaohs (Menes), about 5,000 B.C. It is not yet known if a similar degree of Eastern civilization had been reached in China, or elsewhere, during (or before) that of Iraq and Egypt.

The Bronze Age.—Intercommunication of races introduced a knowledge of the malleable properties of copper, while the spread of commerce distributed tin from Saxony and Cornwall among the races of Europe and Asia. Implements and utensils of cast bronze superseded those of stone, wood, horn or bone. The designs and decorations suggest that this stage of culture was introduced into Europe from Asia, and it must therefore be dated for the East far earlier than for the West, over a period ranging from 5,000 to 2,000 B.C. The Bronze Age appears to have been marked by the cremation of human remains, in place of mere burial in a constricted position.

The Iron Age.—Implements of cast bronze were in turn superseded by those of hammered iron at varying dates—in China, Chaldaea, Assyria and Egypt about 4000 B.C.; in South-Eastern Europe about 2000 B.C., spreading over the rest of Europe from 1000 B.C. to 100 A.D., by which time the use of hammered iron was known throughout Scandinavia and in Ireland. It is possible that the Eastern civilization discarded the use of bronze and adopted that of iron even before the West had reached the Bronze Age, and while the remoter parts were still in the Palaeolithic Age. With the Iron Age was reintroduced interment of human remains, in place of Bronze Age cremation, but the bodies were laid at full length in the ground and not huddled up as in the Stone Age.

EPOCHS AND CALENDARS.

Abyssinian.—The Ethiopians have a chronological system which starts from the first day of the reign of the Roman Emperor Diocletian and proceeds in cycles of 532 years, the numeration beginning again on the completion of a cycle. The first year began on 29th August, 284 A.D. (See also "Coptic," *post.*)

Armenian.—The Armenians marked their secession from the Greek Church by adopting it as their epoch. This corresponds to 9th July, 552 A.D.

Babylonian.—In the eighth century B.C. the Babylonians began a chronology with the era of the accession of the founder of their Empire, Nabonassar, 26th February, 747 B.C.

Biblical.—The Christians of Western Europe made many calculations concerning the date of the Creation of the World, based upon the genealogical tables in the Old Testament. In the seventeenth century (1650) James Ussher, Archbishop of Armagh, published his *Annales Veteris Testamenti*, and *Ussher's Notation* was afterwards printed in marginal notes to the Authorised Version of the English Bible. Ussher's Notation placed the Creation of the World in 4004 B.C.

Christian.—In the chronological system known as the Christian, now in use, the years are distinguished by cardinal numbers before or after the Incarnation, the period being denoted by the letters B.C. (Before Christ) or, more rarely, A.C. (*Ante Christum*), and A.D. (*Annus Domini*), the conventional abbreviation A.D. signifying *Anno Domini*, "in the year of the Lord." The correlative dates of the epoch are the 4th year of the 194th Olympiad, the 753rd year from the Foundation of Rome, 3761 A.M. (Jewish Chronology), and the 4714th year of the Julian Period. This was introduced into Italy in the sixth century, and though first used in France in the seventh it was not universally established there until about the eighth century. It has been said that the system was introduced into England by St. Augustine (A.D. 596), but was probably not generally used until some centuries later. It was ordered to be used by the Bishops at the Council of Chelsea, A.D. 816. The actual date of the birth of Christ is uncertain. December 25, B.C. 4, and other dates have been assigned.

Coptic.—In the Coptic Calendar, which is used by part of the population of Egypt and Ethiopia, the year is made up of 12 months of 30 days each, followed, in general, by 5 complementary days. Every fourth year is an Intercalary or Leap-year, and in these years there are 6 complementary days. The Intercalary year of the Coptic Calendar immediately precedes the Leap-year of the Julian Calendar. The Era is that of Diocletian or the Martyrs, the origin of which is fixed at A.D. 284, August 29 (Julian date). A Coptic Calendar for the year 1648 and part of 1649 is appended :—

Year 1648.	A.D. 1931.
Tūt .....Sept.	12
Bābah .....Oct.	12
Hātur .....Nov.	11
Kīhak .....Dec.	11
	A.D. 1932.
Tubah .....Jan.	10
Amshīr.....Feb.	9
Barmahāt ...March	10
Barmūdah ...April	9
Bashuns .....May	9

Year 1648.	A.D. 1932.
Būnah .....June	8
Abīb .....July	8
Masrī .....August	7
Complementary days ...Sept.	6-10
Year 1649.	
Tūt .....Sept.	11
Bābah .....Oct.	11
Hātur .....Nov.	10
Kīhak .....Dec.	10

Hindu.—In addition to the Muhammadan reckoning there are four eras used in India. The principal astronomical system was the *Kaliyu-ga Era*, which appears to have been adopted in the fourth century A.D. It began on 18 February, 3102 B.C. The chronological system of Northern India, known as the *Vikrama Samvat Era*, prevalent in Western India, began on 23 February, 57 B.C. The year 1931 A.D. is, therefore, the year 1988 of the Vikrama Era. In Southern India, the *Saka Era*, with its epoch of 3 March, A.D 78, was probably founded by Kanishka (whose sway was widely extended), and is in general use. The year 1931 A.D. is 1853 of the Saka Era. In the Hills, the *Saptarshi Era* dates from the moment when the Saptarshi, or saints, were translated and became the stars of the Great Bear in 3076 B.C.

There are many obsolete eras in the history of the Indian Peninsula. The principal religious systems of chronology were those of the Bud-

dhists and the Jains. The *Buddhists* reckoned from the death of Buddha in 543 B.C. (the actual date being 487 B.C.); and the epoch of the *Jains* was the death of Vardhamana, the founder of their faith, in 527 B.C.

Jewish.—The Jews hold that the world was created at the time of the Autumnal Equinox in the year 3760 B.C. or year 954 of the Julian Period, and the epoch or starting point of Jewish Chronology corresponds to October 7 B.C. 3761. Thus the year 1932 A.D. is *Annus Mundi* 5692-93 in the Jewish Calendar :—

* The previous day is also observed as the New Moon.

Note.—Days of the Jewish Calendar begin at sunset on the previous days.

Muhammadan.—The Muhammadan Epoch is based on the Hegira or Flight of Muhammad from Mecca to Medina. The first day of the Era is not the actual day of the Flight but is 16th July, 622 A.D. This Calendar is purely lunar. The year consists of 12 months of 30 or 29 days alternately, the last being sometimes 30, and is therefore either 354 or 355 days in length. It follows that the Muhammadan year begins earlier year by year, according to Gregorian dates, by 10, 11 or 12 days. The year 1932 is 1350-51 of the Hegira. The dates of the beginnings of the months are shown below :—

Year of Hegira	A.D. 1932.	
1350.		
Ramadan	January	10
Shawall	February	9
Dulkaada	March	9
Dulheggia	April	8

Ramadan	December	29
	A.D. 1933.	
Shawall	January	28
Dulkaada	February	26
Dulheggia	March	28

Olympiads.—Greek chronology was reckoned in cycles of four years corresponding with the periodic Olympic Games held on the plain of Olympia, in Elis, once in four years; the intervening years being the first, second, &c., of the Olympiad, which received the name of the victor at the Games. The first recorded Olympiad is that of Choroebus, 776 B.C.

Persian.—The chronology of Persia, which is still followed by the Parsees of India, dates from the accession of Yazdegerd III. to the throne on 10th June, 632 A.D. The year 1931 is, therefore, 1300 of the Parsees. The New Year begins on 21st March.

Roman.—Roman historians adopted as an epoch the Foundation of Rome, which is believed to have happened in the year 753 B.C., and the ordinal number of the year in Roman reckoning are followed by the letters A.U.C. (*Anno Urbis Conditæ*). The Calendar as we know has developed from one established by Romulus, who is said to have used a year of 304 days devided into ten months beginning with March, to which Numa added January and February, making the year lunar. This became the Julian Calendar and later by a slight alteration the Gregorian *see* p. 82) now in general use. In the Roman (Julian) Calendar the days of the month were counted backwards from three fixed points, and an intervening day was said to be so many days *before* the next coming point the first *and* last being counted. These three points were (1) the Kalends, by which name the first of each month was known; (2) the Nones (*nine* days before the Ides) which fell on the seventh day of the month in March, May, July, and October, and on the fifth day in each of the other months; and (3) the Ides, which fell either on the 15th or 13th, and thus divided the month nearly equally. The Latin equivalent of Dec. 31, for example, was *Pridie Kalendas Januarias*, and the day before that *ante diem tertium Kalendas*.

CHRONOLOGICAL TERMS.

The *Day, Week and Month.*—Measurements of time are based on the times taken by the earth to rotate on its axis; by the moon to revolve round the earth; and by the earth to revolve round the sun. From these which are not commensurable, certain average or mean intervals have been adopted for ordinary use. Of these the first is the *Day*, which begins at midnight and is divided into 24 hours of 60 minutes, each of 60 seconds. The hours are counted from midnight up to 12 at noon, and again from noon up to 12 at midnight, except when the *Twenty-four Hour* reckoning is employed. The 24-hour reckoning ignores A.M. and P.M., and the hours are numbered 0 to 23 from midnight to midnight.

For the *Astronomical Day, see* p. 77.

The *Week* is a period of 7 days.

The *Month* in the ordinary calendar is approximately the twelfth part of a year, but the lengths of the different months vary.

The *Equinoctial or Tropical Year* is the time that the earth takes to revolve round the sun from equinox to equinox, which is 365·2422 mean days. The *Calendar Year* consists of 365 days, but a year the date of which is divisible by 4, without remainder, is called *Leap Year* and consists of 366 days. The last year of a century is not leap year unless its number is divisible by 400 (*e.g.* the years 1800 and 1900 had only 365 days).

Old and New Style.—In the Julian Calendar the centennial years were all leap years, and for this reason towards the close of the sixteenth century there was a difference of 10 days between the tropical and calendar years (*see above*). In 1582 Pope Gregory ordained that Oct. 5th should be called Oct. 15th, and that every fourth end-century year only should be a leap year (*see above*). This change was adopted by Italy, France, Spain, and Portugal in 1582; by Prussia, the German Roman Catholic States, Switzerland, Holland, and Flanders on Jan. 1, 1583, Poland 1586, Hungary 1587, the German and Netherland Protestant States and Denmark 1700, Sweden (gradually) by the omission of eleven leap days, 1700–1740, the British Dominions (which included the then North American Colonies) in 1752, by the omission of eleven days (Sept. 3 being reckoned as Sept. 14). This "Gregorian" Calendar was adopted by Japan in 1872, China in 1912, Bulgaria in 1915, Turkey and Soviet Russia in 1917, by Yugoslavia and Rumania in 1919, and by Greece in February, 1923. The Russian, Greek, Serbian and Rumanian Churches did not abandon the Julian Calendar until May, 1923, when the Gregorian, slightly modified, was adopted. The *difference* between the Old and New Styles was 11 days after 1700, 12 days after 1800, and has been 13 days since 1900.

New Year's Day.—In England in the seventh century, and as late as the thirteenth, the year was reckoned from Christmas Day, but in the twelfth century the Anglican Church began the year on the 25th March, and this practice was adopted generally in the fourteenth century. The Civil year in the British Dominions (exclusive of Scotland) began with "Lady Day" until 1751. But in and since 1752 the civil year has begun with Jan. 1. Dividends are, however, still paid by the Bank of England on the last day of Quarters according to a reckoning based on Old Style. The Income Tax year begins on April 6 in accordance with Act of Parliament (39 Geo. III. 1798). New Year's Day has been changed in *Scotland* from Mar. 25 to Jan. 1 in 1600. On the Continent, Jan. 1 was adopted as the first day of the year by Venice in 1522, Germany in 1544, Spain, Portugal and the Roman Catholic Netherlands in 1556, Prussia, Denmark and Sweden in 1559, France 1564, Lorraine 1579, Protestant Netherlands 1583, Russia 1725, Tuscany 1751.

Golden Number.—In the year 432 B.C. Meton, an Athenian astronomer, found that 235 Lunations are very nearly, though not exactly, equal in duration to 19 Solar Years, and hence, considering the mean motion only, after 19 years the Phases of the Moon recur on the same days of the month. This discovery was held to be of so great importance that the dates of Full Moon in a cycle of nineteen years were inscribed in *figures of gold* on public monuments in Athens. The Cycle of nineteen years is called the *Metonic Lunar Cycle*, and the number showing the position of a year in the Cycle is called the Golden Number of that Year.

Easter-Day is the first Sunday after the full moon which happens upon, or next after the 21st day of March; and if the full moon happens upon a Sunday, Easter-day is the Sunday after. This definition is contained in an Act of Parliament (24 Geo. II., cap. 23), and explanation is given in the preamble to the Act that the day of Full Moon depends on certain tables that have been prepared. These are the tables whose essential points are given in the early pages of the Book of Common Prayer. The Moon referred to is not the real moon of the heavens, but a hypothetical Moon on whose "Full" the date of Easter depends, and the lunations of this "Calendar" Moon consist of twenty-nine and thirty days alternately with certain necessary modifications to make the date of its Full agree as nearly as possible with that of the Moon of the heavens. The artificial Moon is accounted to be full on the fourteenth day, i.e., thirteen days after the New Moon, in order to be consistent with an early Jewish practice, but this point is immaterial. The Full Moon of the Calendar on which Easter depends is called the *Paschal Full Moon.*

By the above ordinance Easter falls on one of 35 days. A proposed reform that would limit it to one of 7 days has received Parliamentary support, but there is no prospect of its adoption.

Epact.—The age of the calendar Moon on Jan. 1 in each year, formerly used in determining the date of Easter.

Solar Cycle.—A period of twenty-eight years, in any corresponding year of which the days of the week recur on the same days of the month.

Julian Period.—Proposed by Joseph Scaliger in 1582. The period is 7980 Julian years, and its first year coincides with the year 4713 B.C. 7980 is the product of the number of years in the Solar Cycle, the Metonic Cycle and the cycle of the Roman Indiction (28 × 19 × 15). The Julian Day, as used in astronomy, begins at noon.

Roman Indiction.—A period of fifteen years, instituted for fiscal purposes about A.D. 300.

The Dominical Letter is one of the letters A–G which are used to denote the Sundays (Lord's Day) in successive years. If the first day of the year is a Sunday the letter is A; if the second, B; the third, C; and so on. Leap year requires two letters, the first for Jan. 1–Feb. 29, the second from March 1–Dec. 31.

THE *Superficial Area* of the Earth is estimated to be 196,550,000 square miles, of which 55,500,000 square miles are Land and 141,050,000 square miles Water. The *Diameter* of the Earth at the Equator is 7,926¼ English miles, and at the Poles 7,900 English miles. The Equatorial *Circumference* is 24,901·8 English miles, divided into 360 Degrees of Longitude, each of 69·17 English (or 60 Geographical) miles; these Degrees are measured from the Meridian of Greenwich, and numbered East and West of that point to meet in the Antipodes at the 180th Degree. Distance North and South of the Equator is marked by Parallels of Latitude, which proceed from zero (at the Equator) to 90° at the Poles.

AREA AND POPULATION.

Continent.	Area in Square Miles.	Estimated Population.
Europe	3,750,000	475,000,000
Asia	17,000,000	1,013,000,000
Africa	11,500,000	143,000,000
North America...	8,000,000	146,000,000
South America ...	6,800,000	64,000,000
Oceania	3,450,000	8,500,000
Polar Regions ...	5,000,000	...
	55,500,000	1,849,500,000

The British Dominions extend over the largest area (14,220,000 sq. miles); the Russian Union is second (9,250,000 sq. miles); France is third, with 4,336,000 sq. miles; the United States, with its Insular Jurisdiction, &c., covers 3,750,000 sq. miles; Brazil 3,220,000 sq. miles, and China 3,000,000 sq. miles.

THE CONTINENTS.

Europe forms about one-fourteenth of the land surface of the globe. Its length from the North Cape, 71° 12′ N., and Cape Matapan, in the south of Greece, 36° 23′ N., is about 2,400 miles, and its breadth from Cape St. Vincent to the Urals is about 3,300 miles. The political boundary between Europe and Asia extends some distance beyond the Urals, to include the mining regions; in the south-east it follows the valley of the Manych, north of the Caucasus.

Asia extends over nearly one-third of the land surface of the globe. The distance between its extreme longitudes, the west coast of Asia Minor (26° E.) and the East Cape (170° W.), is 6,000 miles. The extreme latitudes, Cape Chelyuskin (78° 30″ N.) and Cape Buru (90 miles north of the Equator), are 5,350 miles apart. Asia is bounded by the ocean on all sides except the west. The Isthmus of Suez connects it with Africa. The land boundary between Europe and Asia is formed on the west mainly by the Ural Mountains and the Ural River. In the south-west the valley of the Manych, which stretches from the Caspian Sea to the mouth of the Don, is now taken as the line between the two continents, although the Caucasus was formerly considered as belonging to Europe. The islands of the archipelago which lies in the south-east between the continents of Asia and Australia may be divided into two groups by a line passing east of Timor, Timor Laut, the Kei Islands and the Moluccas.

Africa is about three times the area of Europe. Its extreme longitudes are 17° W. at Cape Verde and 51° E. at Cape Guardafui. The extreme latitudes are Cape Blanco in 37° N. and Cape Agulhas in 35° S., at a distance of about 5,000 miles. It is surrounded by seas on all sides, except in the narrow isthmus through which is cut the Suez Canal, and may be considered as a great peninsula of the Eurasian continent.

North America, including Mexico, is a little less than twice the size of Europe. Its extreme longitudes extend from a little west of 170° W. to 52½° W. in the east of Newfoundland, and its extreme latitudes from about 80° N. lat. to 15° N. lat. in the south of Mexico. It is surrounded by seas on all sides except in the south, where it joins the Isthmian States of *Central America*, which have an area of about 200,000 square miles. The area of the *West Indies* is about 65,000 square miles, a little more than half that of the United Kingdom. They extend from about 27° N. latitude to 10° N. latitude.

South America is a little more than 1¾ times the size of Europe. The extreme longitudes are Cape Branco 35° W. and Punta Parina 81° W., and the extreme latitudes, Punta Gallinas, 12½° N. and Cape Horn 56° S. South America is surrounded by the ocean, except where it is joined to Central America by the narrow isthmus through which is cut the Panama Canal.

THE RACES OF MANKIND.†

The Races of Mankind are divisible according to Stock or, less scientifically, according to Colour. The Dominant Colour is Yellow—the numerical order being (1) Yellow, (2) White, (3) Black, (4) Brown, (5) Red. The main Divisions of the Races are as follows:—

Division.	Area.	Estimated Number.
Mongolian	Asia	680,000,000
Caucasian	Europe & Orient	725,000,000
Negro	Africa	210,000,000
Semitic	North Africa ...	100,000,000
Malayan	Oceania, &c. ...	104,500,000
Red Indian, &c.	America	30,000,000
		1,849,500,000

* The Earth is a *Sphere*, with a Northern and Southern *Hemisphere*; the Ocean surface is the *Hydrosphere*, and the gaseous envelope the *Atmosphere*, of which the lower layers are the *Troposphere* and the upper the *Stratosphere*. The science concerned with the study of the Earth's crust is *Geology*, with the measurement of its surface *Geodesy*; the study of its surface is *Geography*, and of its superficial features *Physiography*. The study of the hydrosphere is *Oceanography*, of the lakes *Limnology*, and of the mountains *Orography*, of the Races of Mankind *Ethnology*, of their location *Ethnography* of extinct organic life *Palæontology*, and of existing life *Biology*.

An airship with a constant speed of 100 miles an hour would take nearly 105 years to reach the Sun. The velocity of a given point of the Earth's surface at the Equator exceeds 1,000 miles an hour (24,901·8 miles in 24 hours); the Earth's velocity in its orbit round the Sun is about 66,600 miles an hour (584,000,000 miles in 365 days, 6 hours, 9 minutes).

† It has been estimated that the Earth can maintain a population of 6,000,000,000, a total which will be reached about A.D. 2100, at the present rate of increase.

OCEAN AREAS AND DEPTHS.

The greatest known Ocean Depth (in the Pacific, off Mindanao, 32,089 feet) is not much greater than the greatest land height (in the Himalayas); but the mean depth of the Ocean floor exceeds 12,000 feet, while the mean height of the surface of the land area of the Earth above sea level is only 2,300 feet. The following table gives the areas of the principal oceans and seas, with the greatest known depth of each :—

Oceans.

Name.	Area of Basin (sq. miles).	Greatest Depth (feet).
Pacific	63,986,000	Off Mindanao, 32,089
Atlantic	31,530,000	Porto Rico Trench, 31,366
Indian	28,350,000	Sunda Trench, 22,968
Arctic	5,541,600	North Polar, 13,200

TEMPERATURE AND RAINFALL RECORDS.

GENERAL: The *maximum temperature* on record of the air in shade is 134° Fahr., observed at Greenland Ranch, California, on July 10, 1913.

The *wettest station* in the world is generally allowed to be Cherra Poonjee in Assam, where the total fall for the year has exceeded 551½ inches. From June 12 to 16, 1876, 114·14 inches was collected, or an average daily fall of 22·83 inches. On one of these days, June 14, 40·80 inches fell in 24 hours.

BRITISH ISLANDS: The *maximum temperature* of the air recorded in the shade at 4 feet above the ground is 100° Fahr. This was observed at Wilton House, Salisbury, on July 15, 1881, and at Greenwich Observatory on Aug. 9, 1911.

The *lowest temperature* of the air recorded in the shade at 4 feet above the ground is —23° Fahr., or 55° below freezing point, at Blackadder, Berwickshire, on Dec. 4, 1879.

The *greatest rainfall* in a day was at Bruton, Somerset, when 9·56 inches fell in the 24 hours ended 9 a.m., June 29, 1917. This rainfall is equal to 965 tons of water per acre.

The *total rainfall* for a year at Stations in the British Islands during the 55 years 1870 to 1924 ranged from 246·92 inches at Llyn Llydaw (Copper Mill), Carnarvon, and 247·30 inches at the Stye, Cumberland in 1923, to 9·29 inches at Margate in 1921.

The *maximum wind-velocity* on record in the British Isles was recorded at Scilly on December 6, 1929, when a gust reached the rate of 111 miles per hour.

The League of Nations.

THE League of Nations came into being when the Treaty of Peace with Germany was ratified on January 10, 1920. Its Charter, containing 26 Articles, is known as the *Covenant*, which begins with the following words:—

"The High Contracting Parties, in order to promote international co-operation and to achieve international peace and security by the acceptance of obligations not to resort to war, by the prescription of open, just and honourable relations between nations, by the firm establishment of the understanding of international law as the actual rule of conduct among Governments, and by the maintenance of justice and a scrupulous respect for all treaty obligations in the dealings of organised peoples with one another, agree to this Covenant of the League of Nations."

The Covenant of the League contains fundamental clauses on the prevention and settlement of disputes. These clauses bind nations who are members of the League not to employ force for the settlement of a dispute until they have first submitted it to the League of Nations (or to arbitrators or to judges). The right to resort to war was hitherto retained in case the League, or the arbitrators, failed to reach an unanimous decision, but even so, only after a delay of three months after such failure.

The *Membership* of the League comprises at present 54 nations, or three-quarters of the whole World, the British Empire and the Dominions (including the Irish Free State, together with India) being each an independent member, with separate voting power and representation. The only two great countries which hold aloof are America and Russia; and they, particularly America, are co-operating with the League in a number of beneficent activities.

ORGANISATION OF THE LEAGUE.

The Assembly meets annually at Geneva about September 10, and consists of 3 representatives from every Member State, each State having one vote.

The Council meets three times a year. Great Britain, France, Italy, Germany and Japan are permanent members, and at present 9 other States are annually elected as temporary members. These are Poland, Yugoslavia, Peru, Spain, Venezuela, Persia, Guatemala, Norway and the Irish Free State.

The Secretariat is the permanent Civil Service of the League, at Geneva, and is composed of nationals of nearly all Member States.

Secretary-General, Hon. Sir Eric Drummond, K.C.M.G., C.B. (*British*).

Deputy Secretary-General, J. Avenol (*French*).

Under Secretaries-General, Marquis Paulucci di Calboli (*Italian*), M. Dufour Féronce (*German*), M. Y. Sugimura (*Japanese*).

Information Section, Pierre Comert (*French*), *Director*; Arthur Sweetzer (*American*), *Assistant Director*.

The Technical Organisations and Commissions, which act as expert advisers to the Council and Assembly, are continually handling questions concerning International Communication and Transit, Economics and Finance, Health, Mandates, and the Reduction of Armaments. No week passes without these bodies discussing international questions of wide interest, or without some conference being held at Geneva and achieving constructive work in international co-operation.

The Permanent Court of International Justice, consisting of fifteen Judges and four Deputy Judges, chosen for their high legal and moral authority, sits at the Hague and deals by means of opinions and judgments with all disputes referred to it regarding International Law, breaches of International obligations, and the interpretation of treaties. It has already dealt with 35 disputes, some of which might have led to an open breach between the States concerned. It has already won a great reputation both in the Foreign Offices and in the legal professions of the world. The annual session begins on June 15; but in future the Court is likely to sit all the year round.

The International Labour Office is closely connected with the League, but has a parallel organisation of its own at Geneva, which was also set up by the Peace Treaty. The Governing body represents twelve States, of which eight (including Great Britain, Canada and India) are chosen as being of chief industrial importance in the world. They are assisted by an international Secretariat, which collects and disseminates information and organises conferences. The conferences, to which Governments, Employers' and Workers' Organisations send delegates, pass Conventions or Recommendations which Governments ratify if they so desire. There have already been over 400 ratifications of Labour Conventions. The main object in view is to bring up the standard of labour in the less advanced States to the level of the standard in countries where greater progress has been made. The Director of the International Labour Office is Albert Thomas (*French*), the Deputy-Director H. B. Butler (*British*). There is a London office at 12 Victoria Street, S.W.1.

Cost.—The cost of the League, 1930–1, will be about £1,260,000, to which Great Britain contributes some £120,000.

WHAT THE LEAGUE HAS DONE.

The work of the League is many-sided, and is constantly growing. It includes the prevention of a number of wars, the creation of the Permanent Court at the Hague as an alternative for war, positive reconstruction as in the case of the financial restoration of Austria, Hungary, and Northern Greece, the outlining of an important new policy of "freer" trade, improvements in international traffic and health, progress in real control of the traffic in drugs and in women, and child welfare. After ten years' continuous study of the problem of the Reduction of Armaments the League has reduced it to three bedrock principles—Arbitration, Security and Disarmament. The purely technical study of Disarmament is now sufficiently advanced for the first general World Conference to be held, it is hoped, before the Twelfth Assembly meets in Sept. 1931.

LEAGUE OF NATIONS UNION.

LEAGUE OF NATIONS UNION, 15, Grosvenor Crescent, S.W. 1.*—*Joint Presidents*, Viscount Grey of Fallodon, K.G., and Viscount Cecil of Chelwood, K.C.; *Chairman of Executive Committee*, Prof. Gilbert Murray, LL.D.; *General Sec.*, J. C. Maxwell Garnett, C.B.E., Sc.D.

THE BELGIAN CONGO.

The Independent State of the Congo became a Belgian Colony by a law of Oct. 18, 1908.

The total area amounts to 909,654 sq. miles, with a native population estimated (1924) at 12,000,000. The total European population (Jan., 1926) was 15,236.

By the *Anglo-Belgian Agreement* of July, 1919, the districts of Ruanda and Urundi, portions of the former territory of German East Africa which adjoin the Belgian Congo on the E., were assigned by Great Britain to Belgium. *Ruanda* and *Urundi* formed the N.W. corner of German East Africa from 5° S. lat. to the S. borders of (British) Uganda and have an area of about 15,000 sq. miles, with an estimated population of 3,000,000.

EDWARD VII.	Eldest son of Victoria	1901	1910	68	9
	The House of Windsor.				
GEORGE V.	Surviving son of Edward VII.	1910	WHOM GOD PRESERVE		

The House of Windsor is in direct descent from (*inter alios*) Egbert, King of Wessex, Alfred the Great and William the Conqueror; also from the Emperor Charlemagne (*b.* 742, *d.* 814), Rodrigo the Cid (*b.* 1030, *d.* 1099), the Emperor Barbarossa (*b.* 1123, *d.* 1190) and St. Louis, King of France (*b.* 1215, *d.* 1270).

WELSH SOVEREIGNS AND PRINCES.

WALES was ruled by Sovereign Princes from the "earliest times" until the death of Llewellyn in 1282. The first English Prince of Wales was the son of Edward I., and was born in Carnarvon town on April 25, 1284. According to a discredited legend, he was presented to the Welsh chieftains as their Prince, in fulfilment of a promise that they should have a Prince who "could not speak a word of English" and should be native born. This son, who afterwards became Edward II., was created "Prince of Wales and Earl of Chester" at the famous Lincoln Parliament on February 7, 1301. The present Prince was installed in Carnarvon Castle on July 13, 1911.

INDEPENDENT PRINCES, A.D. 844 to 1292.	
Rhodri the Great	844–878
Anarawd, son of Rhodri	878–916

GEORGE III. was the eldest son of Frederick, Prince of Wales (eldest son of George II.), and of Princess Augusta (youngest daughter of Frederick II., Duke of Saxe-Gotha Altenburg). His Majesty was *born* at Norfolk House, St. James's Square, June 4, 1738; *succeeded* to the Throne Oct. 25, 1760; *married* Princess Charlotte (daughter of Charles, Duke of Mecklenberg-Strelitz); and was *crowned* with her on Sept. 22, 1761. The government was carried on, from Feb. 5, 1811, until the death of King George III., by his eldest son George, under the title of *Prince Regent*. King George III. *died* at Windsor, Jan. 29, 1820, his issue being:—

1. GEORGE IV. George Augustus Frederick, *Prince of Wales*, born Aug. 12, 1762, married Princess Caroline of Brunswick, succeeded to the Throne, Jan. 29, 1820, and died without surviving issue June 26, 1830.

2. Frederick, *Duke of York and Albany*, born Aug. 16, 1763, married Princess Frederica of Prussia, was for many years Commander-in-Chief of the Army, and died without issue Jan. 5, 1827.

3. WILLIAM IV. William, *Duke of Clarence*, born Aug. 21, 1765; was Lord High Admiral of England; married July 11, 1818, Adelaide, daughter of George, Duke of Saxe-Meiningen, by whom he had two daughters, who predeceased him; succeeded to the Throne, June 26, 1830, and died June 20, 1837.

4. Charlotte, *Princess Royal*, born Sept. 29, 1766, married Frederick, King of Württemberg, and died without issue.

5. Edward, *Duke of Kent*, born Nov. 2, 1767, married Princess Victoria (daughter of Francis, Duke of Saxe-Coburg, and widow of Charles, Prince of Leiningen), died Jan. 23, 1820. Their Royal Highnesses had issue a daughter, Princess Victoria, born May 24, 1819, who succeeded to the Throne as QUEEN VICTORIA, June 20, 1837.

6. Augusta, born Nov. 8, 1768, died unmarried Sept. 22, 1840.

7. Elizabeth, born May 22, 1770, married Frederick, Landgrave of Hesse, and died without issue Jan. 10, 1840.

8. KING OF HANOVER. Ernest, *Duke of Cumberland*, born June 5, 1771, married Frederica (daughter of Frederick V., Grand Duke of Mecklenberg-Strelitz), succeeded as King of Hanover June 20, 1837 (on death of William IV., owing to the exclusion of Queen Victoria by the provisions of the Salic Law), died Nov. 28, 1851.

9. Augustus, *Duke of Sussex*, born Jan 27, 1773, died without succession April 24, 1843.

10. Adolphus, *Duke of Cambridge*, born Feb. 24, 1774, married Princess Augusta (daughter of Frederick, Landgrave of Hesse), *see* below.

11. Mary, born April 25, 1776, married William Frederick, *Duke of Gloucester*, died without issue April 30, 1857.

12. Sophia, born Nov. 3, 1777, died unmarried May 27, 1848.

13. Octavius, born Feb. 23, 1779, died May 3, 1783.

14. Alfred, born Sept. 22, 1780, died Aug. 26, 1782.

15. Amelia, born Aug. 7, 1783, died unmarried Nov. 2, 1810.

DESCENDANTS OF H.R.H. ADOLPHUS, DUKE OF CAMBRIDGE, born Feb. 24, 1774, died July 8, 1850.

1. H.R.H. Prince George, *Duke of Cambridge*, born March 26, 1819, Field-Marshal, Commander-in-Chief of the British Army, 1856–1895, died without succession March 17, 1904.

2. H.R.H. Princess Augusta, born July 19, 1822, married the Grand Duke of Mecklenberg-Strelitz; died Dec. 1916.

3. H.R.H. Princess Marie Adelaide, born Nov. 27, 1833, married H.H. Francis, Duke of Teck, died Oct. 27, 1897, her issue being:—

(1) H.S.H. Princess Victoria Mary Augusta Louisa Olga Pauline Claudine Agnes (QUEEN MARY), Col.-in-Ch. 13th/18th Hrs., born at Kensington Palace, May 26, 1867, married July 6, 1893, H.R.H. Prince George of Wales, *Duke of York*, who succeeded to the Throne, May 6, 1910, as KING GEORGE V. (*see* "House of Windsor"), crowned with His Majesty at Westminster Abbey, June 22, 1911.

(2) Adolphus Charles Alexander Ladislaus Cambridge, *Marquess of Cambridge*, G.C.B., G.C.V.O., C.M.G., born Aug. 13, 1868, married 1894, Lady Margaret Grosvenor, daughter of the Duke of Westminster; died Oct. 24, 1927, leaving issue: (*a*) George Francis Hugh Cambridge, 2nd *Marquess of Cambridge*, K.C.V.O., born 1895, married (1923) Miss Dorothy Hastings; (*b*) Lady Victoria Constance Mary Cambridge, born 1897, married (1923) the Duke of Beaufort, G.C.V.O.; (*c*) Lady Helena Frances Augusta Cambridge, born 1899, married (1919) Lt.-Col. J. E. Gibbs, M.C.; (*d*) Lord Frederick Charles Edward Cambridge, 2nd Lieut. Coldstream Guards, born 1907.

(3) H.S.H. Prince Francis, born Jan. 7, 1870, died Oct. 22, 1910.

(4) Alexander Augustus Frederick George, *Earl of Athlone*, K.G., G.C.B., G.C.M.G., G.C.V.O., D.S.O., Col. 7th Hussars, Governor-General of the Union of South Africa, 1923-1930, born April 14, 1874, married H.R.H. Princess Alice of Albany (*see* "Queen Victoria's Family"), their issue being (*a*) Lady May Helen Emma Cambridge born 1906, married, 1931, Capt. Henry Abel Smith, R.H.Gds.; (*b*) Rupert Alexander George Augustus Cambridge, *Viscount Trematon*, born 1907, died April 15, 1928.

CHILDREN OF H.M. KING CHRISTIAN IX. OF DENMARK,

(6) The Prince John.

6. H.R.H. PRINCE JOHN, *born* July 12, 1905, *died* Jan. 18, 1919.

ORDER OF SUCCESSION TO THE THRONE.

The sons of the Sovereign are in the order of succession to the throne, and after the youngest son the daughters, in the order of their own seniority. Thus after the Prince of Wales and the Duke of York would come the Princess Elizabeth and the Princess Margaret, daughters of the Duke of York, the Duke of Gloucester and the Prince George; then Princess Mary and her children; then, as His Majesty has no brother, his sisters, with the children of the eldest in preference to the second sister; then the second daughter of the late Duke of Saxe-Coburg (his eldest daughter, Queen Marie of Rumania, having formally renounced on her marriage all possibility of claim to the British Throne). After traversing the Saxe-Coburg branch, we treat similarly those of Connaught and Albany. Having thus exhausted the families of all Queen Victoria's sons we turn to her daughters, beginning with the house of the late Empress Frederick; but as this line, with the ex-German Emperor at its head, is wholly out of practical bounds, it would be profitless to pursue the investigation any further.

ANNUITIES TO THE ROYAL FAMILY.

The annuities payable to Their Majesties and to the members of the Royal Family are known as the *Civil List*, which is granted by Parliament upon the recommendation of a Select Committee. The Civil List of King Edward VII. amounted to £470,000, in addition to which annuities to other members of the Royal Family accounted for an additional annual sum of £106,000. The Select Committee appointed on June 14, 1910, reported on July 7, and made recommendations, which were adopted by the House of Commons. These recommendations, as modified by subsequent events, are also subject to the voluntary deductions announced by H.M. the King.

Their Majesties' Privy Purse	£110,000	Duke of York	£25,000
Salaries of Household	125,800	Princess Louise (Duchess of Argyll)	6,000
Expenses of Household	193,000	Duke of Connaught	25,000
Works	20,000	Princess Beatrice	6,000
Royal Bounty	13,200	King Edward VII.'s Daughters	18,000
Unappropriated	8,000	His Majesty's Younger Children	26,000
	£470,000		£106,000

The King's Household.

Peeresses in Their Own Right.

PEERESSES IN OWN RIGHT.—Peerages are occasionally granted immediately to ladies of distinction or the widows of distinguished men; but frequently the instances falling under this heading are the result of regular inheritance in lines which are open to females in default of males. Thus it results that some of the Peeresses now upon the list have male heirs who will succeed them in the ensuing generation and take their seats by strict right in the House of Lords; while, on the other hand, several peerages now occupied by males will fall to the other sex, and thus for a time take leave of that House. A resolution to admit Peeresses in their Own Right to the House of Lords was defeated in that house in 1930. A Peeress in her own Right retains her title after marriage, and if her husband's rank is the superior she is designated by the two titles jointly, the inferior one last: her hereditary claim still holds good in spite of any marriage whether higher or lower. No rank held by a woman can confer any title or even precedence upon her husband; but the rank of a Peeress in her own right is inherited by her eldest son (or perhaps daughter), to whomsoever she may have been married.

DUCHESS IN HER OWN RIGHT.

Created.	*Title, Name, &c.*	*Eldest Son or Heir.*
1900	*Fife*, Alexandra, Duchess (*H.R.H. Princess Arthur of Connaught*), *b.* 1891, *s.* 1912, *m.*	Earl of Macduff, *b.* 1914

Courtesy Titles borne by Eldest Sons (*in actual use in* 1932).

Holders of Courtesy Titles are addressed in the manner shown for holders of substantive titles.

From this list it will be seen that the "Marquess of Blandford" *is the heir to the* Dukedom of Marlborough; *that the* "Earl of Altamont" *is the eldest son of the* Marquess of Sligo, *while* "Viscount Acheson" *is heir to the* Earldom of Gosford, *and* "Lord Aberdour" *to the* Earldom of Morton; * *the titles borne by second heirs are also given, e.g.* "Earl of Burlington," *eldest son of the* "Marquess of Hartington," *heir to the* Dukedom of Devonshire; "Viscount Bayham," *eldest son of the* "Earl of Brecknock," *heir to the* Camden Marquessate; *and* "Viscount Savernake," *eldest son of the* "Earl of Cardigan," *heir to the* Marquessate of Ailesbury.

NOTE.—In titles marked ° the "of" is *not* used.

∴ *In addition to the above Titles of Courtesy the eldest son of Scottish Viscounts and Barons is usually styled* "The Master of ——" *e.g.* "The Master of Falkland," *eldest son of* Viscount Falkland; "The Master of Carnegie," *eldest son of* Lord Carnegie and *grandson* of the Earl of Southesk.

Contractions used in pages 111–129.

Contractions.—*S.* or *I.* appended to the date of creation denotes a *Scottish* or *Irish* title: the further addition of a * implies that the Peer in question holds also an Imperial title, which is specified (after the name) by its more definite description as *Engl.*, *Brit.*, or *U.K.* When both titles are alike, as in the case of Argyll, this star is appended to the conjoined date below, and it then denotes that such date is that of the Imperial creation. A † appended to *S.* or *I.* implies that the Peer is an elected Representative to the House of Lords. For the mark ° see heading to Marquesses; *b.* signifies born; *s.*, succeeded; *m.*, married; *w.*, widower or widow; *M.*, minor.

His Majesty's Most Honourable Privy Council.

THE GRAND PRIORY IN THE BRITISH REALM OF THE VENERABLE ORDER OF THE HOSPITAL OF ST. JOHN OF JERUSALEM.

(Incorporated by Royal Charter.)

The Order had its origin in Jerusalem as an International lay confraternity for the relief of Christian pilgrims to the Holy Land, and was later sovereign in Rhodes and Malta, where its Knights kept galleys and galleons to attack the Barbary Corsairs and to prevent the spread of Turkish rule in the Mediterranean, from 1530 to 1798. The objects and purposes of the Order are, amongst other things, the maintenance of the St. John Ophthalmic Hospital at Jerusalem, and the St. John Ambulance Association and Brigade at Home and Overseas, and the London Light and Electrical Clinic for poor people. The Order is conferred for services in the cause of humanity throughout the Empire, and is open to both men and women. There are 5 classes: Bailiffs and Dames Grand Cross; Knights and Dames of Justice and of Grace; Commanders of both sexes; Officers of both sexes; Serving Brothers and Sisters. These distinctions are notified in the *London Gazette*, but do not confer any rank or title. The ribbon of the decorations of the Order is black (watered). *Headquarters:* St. John's Gate, Clerkenwell, E.C.1.

Sovereign Head	The King-Emperor.
Grand Prior	H.R.H. The Duke of Connaught, K.G.
Sub-Prior	Maj.-Gen. The Earl of Scarbrough, K.G., G.B.E., K.C.B., T.D. A.D.C.
Prelate	The Archbishop of Canterbury.
Bailiff of Eale	Sir John Hewett, G.C.S.I., K.B.E., C.I.E.

Executive Officers.

Chancellor—Lt.-Gen. Sir Aylmer Hunter-Weston, K.C.B., D.S.O., M.P.
Secretary-General—Maj.-Gen. Sir Percival S. Wilkinson, K.C.M.G., C.B.
Receiver-General—Col. Francis Pixley, V.D.
Director of the Ambulance Department—Maj.-Gen. Sir Percival S. Wilkinson, K.C.M.G., C.B.
Hospitaller—Col. Sir Courtauld Thomson, K.B.E., C.B.
Almoner—Capt. A. C. Seton-Christopher.
Librarian—Col. Edwin J. King, C.M.G., F.S.A.
Registrar—Lt.-Col. J. T. Woolrych Perowne, V.D., T.D.
Genealogist—Sir Gerald W. Wollaston, Kt.Bach., M.V.O.
Chief Commissioner, St. John Ambulance Brigade at Home. Maj.-Gen. Sir John Duncan, K.C.B., C.M.G., D.S.O.
Do., Overseas, Col. James L. Sleeman, C.M.G., C.B.E., M.V.O.

England, Great Britain, U. K., and 57 Ireland (marked I).

Baronets.

(Exclusive of such as are Peers.)

Scotland or Nova Scotia (88, marked S).

NOTE.—Clause II. of the Royal Warrant of February 8, 1910, ordains as follows :—"That no person whose name is not entered upon the Official Roll shall be received as a Baronet, or shall be addressed or mentioned by that title in any Civil, or Military Commission, Letters Patent or other official document." In the cases of titles printed in *italics* the holder of the Baronetcy has died but no person has proved his succession to the Baronetcy. Baronets are addressed as "Sir" (with Christian name) and in writing as "Sir Robert *A*—, Bt." Baronets' wives are addressed (formally) as "Your Ladyship" or "Lady *A*—," without any Christian name unless a daughter of a Duke, Marquess or Earl, in which case "The Lady Mary *A*—"; if daughter of a Viscount or Baron "The Hon. Lady *A*—."

Knights Commanders of the above Orders.
Knights Bachelor.
Judges of County Courts and Judges of the Mayor's and City of London Court
Serjeants at law.
Masters in Lunacy.
§C.B.; C.S.I.; C.M.G.; C.I.E.; C.V.O.; C.B.E.; D.S.O.; M.V.O.(4th); O.B.E.; I.S.O.
Eldest Sons of younger Sons of Peers.
Baronets' eldest Sons.
Eldest Sons of Knights in the same order as their Fathers.
M.V.O.(5th); M.B.E.
Younger Sons of the younger Sons of Peers.
Baronets' younger Sons.
Younger Sons of Knights in the same order as their Fathers.
Naval, Military, and other Esquires by Office.

Women take the same rank as their husbands or as their eldest brothers; but the daughter of a Peer marrying a Commoner retains her title as Lady or Honourable. Daughters of Peers rank next immediately after the wives of their elder brothers, and before their younger brothers' wives. Daughters of Peers marrying Peers of lower degree take the same order of precedency as that of their husbands; thus the daughter of a Duke marrying a Baron degrades to the rank of Baroness only, while her sisters married to commoners retain their rank and take precedence of the Baroness. Merely official rank on the husband's part does not give any similar precedence to the wife.*

For Dames Grand Cross and Dames Commanders of the British Empire, *see* p. 158.

LOCAL PRECEDENCY.—No written code of county or city order of precedence has been promulgated, but naturally in the county the Lord Lieutenant stands first, and secondly the Sheriff. In London and other Corporations, the Mayor stands first, after him the Aldermen, Sheriffs, Chief Officers, and Livery. At Oxford and Cambridge the High Sheriff takes precedence of the Vice-Chancellor.

* For fuller tables (and for *Scottish and Irish Precedency*) see Introduction to "WHITAKER'S PEERAGE, BARONETAGE, KNIGHTAGE AND COMPANIONAGE," a companion volume, price 25s. net.
§ A complete list, in *Alphabetical Order* (the only list so published), of all holders of these decorations will be found in "WHITAKER'S PEERAGE."

KNIGHTS OF THE MOST NOBLE ORDER OF THE GARTER (1349)—K.G.

Ribbon, Garter Blue. *Motto*, Honi soit qui mal y pense *(Evil be to him who evil thinks)*.

THE SOVEREIGN.

Lady of the Garter—H.M. THE QUEEN.

THE ORDER OF MERIT (1902)—O.M.

Ribbon, Blue and Crimson.

O.M.Civ.

This Order confers no precedence. It is designed as a special distinction for eminent men and women—without conferring a knighthood upon them. The Order is limited in numbers to 24, with the addition of foreign honorary members. Membership is of two kinds, Military and Civil, the badge of the former having crossed swords, and the latter oak leaves. Membership is designated by the suffix O.M., which is authorised to follow the first class of the Order of the Bath and to precede the letters designating membership of the inferior classes of the Bath and all classes of the remaining Orders of Knighthood.

O.M.Mil.

MILITARY.

Admiral of the Fleet Rt. Hon. Earl Jellicoe, G.C.B., G.C.V.O.

K.C.V.O.

THE KNIGHTS BACHELOR.

The Knights Bachelor do not constitute a Royal Order, but comprise the surviving representation of the ancient State Orders of Knighthood. The Register of Knights Bachelor, instituted by James I. in the 17th century, lapsed, and in 1908 a voluntary association under the title of "The Society of Knights" (now "The Imperial Society of Knights Bachelor" by Royal command) was formed with the primary objects of continuing the various registers dating from 1257 and obtaining the uniform registration of every created Knight. In 1926 a design for a badge to be worn by Knights Bachelor was approved and adopted, a miniature reproduction being shown at the head of this paragraph. An annual Knightage is published from information supplied by the authorities, and can be obtained on application. The Officers of the Society are:—*Principal*, ; *Vice-Principal*, Commander Sir Trevor Dawson, Bt., R.N.; *Hon. Registrar*, Sir Park Goff, M.P.; *Clerk*, Hubert Whelbourn; *Registry and Library*, 21 Old Buildings, Lincoln's Inn, W.C. 2.

ORDER OF THE COMPANIONS OF HONOUR (1917)—C.H.

Ribbon, Carmine, with Gold Edges.

This Order consists of one Class only and carries with it no title or precedence, but ranks after the 1st Class of the Order of the British Empire, *i.e.*, Kts. and Dames Grand Cross (Mil. and Civ. Div.). The number of awards is limited and is open to both sexes.

MEN.

THE DISTINGUISHED SERVICE ORDER (1886)—D.S.O.

Ribbon, Red, with Blue Edges.

Bestowed in recognition of especial services in action of commissioned officers in the Navy, Army and Royal Air Force. The members are Companions only and rank immediately before the 4th Class of the Royal Victorian Order. A Bar may be awarded for any additional act of service.

THE IMPERIAL SERVICE ORDER (1902, enlarged 1912)—I.S.O.

Ribbon, Crimson, with Blue Centre.

Restricted to members of the administrative or clerical (clerk) branches of the Civil Service, and consists of the SOVEREIGN, the Prince of Wales, and Companions (not exclusively male) to a number not exceeding 700, of whom 250 may belong to the Home Services, 200 to the Indian and 250 to the services of Dominions, Colonies and Protectorates.

OTHER PRINCIPAL DECORATIONS AND MEDALS (in order of Precedence).

A full list of of all Orders, Decorations and Medals and Orders regarding the wearing of them will be found in WHITAKER'S PEERAGE.

The New Zealand Cross.—1869.—N.Z.C.—For conspicuous bravery. Instituted March 10, 1869. There is only one surviving holder—Benjamin Biddle, of N.Z.

The Royal Red Cross—R.R.C.—For ladies, founded 1883, is a distinction conferred upon ladies of any rank or nation who may be brought to the Sovereign's notice for acts of mercy in attending to the sick or wounded in time of war.

The Distinguished Service Cross.—1914.—D.S.C.—In substitution for the Conspicuous Service Cross, 1901: is designed for bestowal on all officers of the R.N. below the rank of Lieutenant-Commander, and on Warrant Officers.

The Military Cross.—1915.—M.C.—Awarded to Captains, Lieutenants, and 1st class Warrant Officers in the Army and Indian and Colonial Forces.

The Distinguished Flying Cross.—1918.—D.F.C.—Designed for bestowal upon Officers and Warrant Officers in the Royal Air Force for acts of gallantry when flying in active operations against the enemy.

The Air Force Cross.—1918.—A.F.C.—Instituted as preceding, but for acts of courage or devotion to duty when flying, although not in active operations against the enemy.

The Indian Order of Merit.—Instituted in 1837, as a reward for personal bravery, to Indian officers and men.

The Kaisar-i-Hind Medal (1st Class, gold; and Class, silver).—Was founded in 1900, and is a reward for any person, of either sex, who shall have rendered useful service in or for India.

The Albert Medal.—A.M.—Dates from 1866, with extensions in 1867 and 1877, and is a recognition of acts of gallantry performed by any person whatever—"For Gallantry in Saving Life at Sea" or "on Land."

The Medal for Distinguished Conduct in the Field.—1914.—D.S.M.—Is designed for chief petty officers, petty officers, men, and boys of all branches of the R.N.; to non-commissioned officers and men of the R.M.A., and to all other persons holding corresponding positions in His Majesty's Service afloat, for distinguished conduct in war.

The Conspicuous Gallantry Medal. — C.G.M. — Is bestowed upon warrant officers and men of the R.N.

The Distinguished Conduct Medal.—D.C.M.—Awarded to warrant officers, non-commissioned officers, and men of the Army.

The Distinguished Flying Medal.—1918.—D.F.M.—and the **Air Force Medal**—A.F.M.—for warrant and non-commissioned officers and men for equivalent services as for D.F.C. and A.F.C.

The Edward Medal.—Established by King Edward VII. in 1907, is a recognition of heroic acts performed by miners and quarrymen, or of others who have endangered their lives in rescuing those so employed.

The King's Police Medal.—Instituted in 1909 as a reward "only for acts of exceptional courage and skill or conspicuous devotion to duty" to officers and men of any recognised Police Force or organised Fire Brigade in the United Kingdom, India, and His Majesty's Dominions beyond the Seas. The number of medals awarded in any one year shall not exceed 120.

The Medal of the Order of the British Empire, for Gallantry.—Awarded in recognition of acts of gallantry. All ranks are eligible for the Medal of the Military Division; there is also a Medal of the Civil Division.

N.B.—*All the above Medals are worn before War Medals.*

The Meritorious Service Medal. — M.S.M. — Since Sept., 1928, granted only to recipients of the Meritorious Service Annuity.

The Volunteer Officers' Decoration. — V.D.—Was an honour for rewarding the meritorious services of officers of the Force in question, who must have been in commission and have served twenty years.

The Territorial Decoration. — T.D. — Established in 1908; is restricted to commissioned officers of twenty years' good service in the Territorial Army. Similarly a **Territorial Long Service Medal** has been substituted for that formerly awarded to Volunteers.

The Royal Naval Reserve and Royal Naval Volunteer Reserve Decoration—R.D.—**and Medal.**—Instituted in 1910 to reward good and long service by officers and men of these Services.

The Imperial Service Medal.—May be granted only to Members of Civil Services in the U.K., India, the Dominions, Colonies and Protectorates, in other than the administrative and clerical grades.

The Medal of the Order of the British Empire, for Meritorious Service.—Is restricted in the Military Division to ranks below that of Warrant Officer, and in the Civil Division to persons not eligible for appointment to the five Classes of the Order.

The Badge of the Order of the League of Mercy.—Both sexes; was established in 1899 in connexion with the **League of Mercy**, an institution also founded in 1899 to promote the welfare of hospitals by obtaining small subscriptions for King Edward's Hospital Fund for London, &c.

Brig.-Gen. E. H. Finch-Hatton, C.M.G., D.S.O.
(1 vacancy.)

Dames Grand Cross and Dames Commanders of the Order of the British Empire.

NOTE.—Dames Grand Cross (G.B.E.) and Dames Commanders (D.B.E.) are addressed in a manner similar to that of Knights Grand Cross or Knights Commanders, *e.g.* "Miss Florence Smith," after receiving the honour of G. (or D.) B.E. would be addressed as "Dame Florence," and in writing, as "Dame Florence Smith, G. (or D.) B.E." Where such award is made to a lady already in enjoyment of a higher title the appropriate letters are appended to her name, *e.g.* "The Countess of ——, G.B.E." Dames Grand Cross of the British Empire rank after wives of Baronets and before wives of Knights Grand Cross. Dames Commanders rank after the wives of Knights Grand Cross and before the wives of Knights Commanders.

DAMES GRAND CROSS AND DAMES COMMANDERS.

Aberdeen and Temair, The Marchioness of, G.B.E.

THE VICTORIA CROSS. *V.C.*

Ribbon, Crimson for all Services.

FOR CONSPICUOUS BRAVERY. INSTITUTED *January 29th*, 1856.

The Victoria Cross was instituted in 1856, on the close of the Crimean War, and extended in 1911 and 1920. The decoration is worn before all others, on the left breast, and consists of a bronze Maltese Cross, 1½ inches in diameter, with the Royal Crown surmounted by a lion in the centre, and beneath there is the inscription "For Valour." A special annuity of £10 a year is granted to every recipient below Commissioned Rank, with an additional £5 a year for every bar, such bar being added for additional acts of bravery which would have entitled the recipient to the Victoria Cross if he or she had not already received it. In the event of an annuitant being unable to obtain a livelihood on leaving the Service, the amount of the annuity may be increased to £50. In 1911, the right to receive the Cross was extended to Indian soldiers, and in 1920 a Royal Warrant extended the right to Matrons, Sisters and Nurses, and the Staff of the Nursing Services and other services pertaining to Hospitals and Nursing, and to Civilians of either sex regularly or temporarily under the orders, direction or supervision of the Naval, Military or Air Forces of the Empire.

Secretary of State for the Colonies ..... The Rt. Hon. Sir Philip Cunliffe-Lister, G.B.E., M.C., M.P., *b.* 1884 (*C.*) £5,000
Secretary of State for Air ..... The Most Hon. the Marquess of Londonderry, K.G., M.V.O., *b.* 1878 (*C.*) £3,000
Secretary of State for Scotland ..... The Rt. Hon. Sir Archibald Sinclair, Bt., C.M.G., M.P., *b.* 1890, (*L.*) £2,500
Minister of Health ..... The Rt. Hon. Sir E. Hilton Young, G.B.E.., D.S.O., D.S.O., M.P., *b.* 1879 (*C.*) £3,000
President of the Board of Trade ..... The Rt. Hon. Walter Runciman, M.P., *b.* 1870 (*L.*) £2,000
Lord Privy Seal ..... The Rt. Hon. Viscount Snowden, LL.D., *b.* 1864 (*N. Lab.*) £2,000
First Lord of the Admiralty ..... The Rt. Hon. Sir Bolton Eyres-Monsell, M.P., *b.* 1871 (*C.*) £4,500
President of the Board of Education ..... The Rt. Hon. Sir Donald Maclean, K.B.E., M.P., *b.* 1864 (*L.*) £2,000
Minister of Agriculture and Fisheries ..... The Rt. Hon. Sir John Gilmour, Bt., D.S.O., M.P., *b.* 1876 (*C.*) £2,000
Minister of Labour ..... The Rt. Hon. Sir Henry Betterton, Bt., C.B.E., M.P., *b.* 1872 (*C.*) £2,000
First Commissioner of Works ..... The Rt. Hon. William Ormesby-Gore, M.P., *b.* 1888 (*C.*) £2,000

§ OTHER MINISTERS.

Minister of Transport, P. J. Pybus, C.B.E., M.P., *b.* 1880 (*L. Nat.*) £2,000
Chancellor of the Duchy of Lancaster, Rt. Hon. J. C. C. Davidson, C.H., C.B., M.P. *b.* 1889 (*C.*) £2,000
Minister of Pensions, Major Rt. Hon. G. C. Tryon, M.P. *b.* 1871 (*C.*) £2,000
Attorney-General, Rt. Hon. Sir William Jowitt, K.C., *b.* 1885 (*N. Lab.*) ..... (*and fees*; in 1929-30 £17,570) £2,000
Solicitor-General, Sir Thomas Inskip, K.C., M.P., *b.* 1876 (*C.*) ..... (*and fees*; in 1929-30 £6,772) £2,000
Postmaster-General, Rt. Hon. Sir Kingsley Wood, M.P., *b.* 1876 (*C.*) £2,500
Paymaster-General, Rt. Hon. Sir Tudor Walters, Bt., *b.* 1866 (*L.*) ..... *unpaid*
Civil Lord of the Admiralty, Capt. D. Euan Wallace, M.C., M.P., *b.* 1892 (*C.*) £1,000
Treasury:—Financial Secretary, Major W. E. Elliot, M.C., M.P., *b.* 1890 (*C.*) £2,000
Patronage Secretary, Capt. H. D. Margesson, M.C., M.P., *b.* 1890 (*C.*) £1,000
Junior Lords:—Sir Victor Warrender, Bt., M.C., M.P., *b.* 1899 (*C.*); G. H. Shakespeare, M.P., *b.* 1893 (*L. Nat.*); Capt. Austin U. M. Hudson, M.P., *b.* 1897 (*C.*), each £1,000; Lt.-Col. Sir A. Lambert Ward, Bt., D.S.O., M.P., *b.* 1876 (*C.*) *unpaid*; W. J. Womersley, M.P., *b.* 1878 (*C.*) ..... *unpaid*
Parliamentary Under Secretaries of State:—
Home, Major Hon. Oliver Stanley, M.P., *b.* 1896 (*C.*) £1,500
Foreign, Capt. R. A. Eden, M.C., M.P., *b.* 1897 (*C.*) £1,500
Dominions, Malcolm Macdonald, M.P., *b.* 1901 (*N. Lab.*) £1,500
Colonies, Sir Robert Hamilton, M.P., *b.* 1867 (*L.*) £1,500
India, Most Hon. Marquess of Lothian, C.H., *b.* 1882 (*L.*) £1,500
Air, Rt. Hon. Sir Philip Sassoon, Bt., G.B.E., C.M.G., M.P., *b.* 1888 (*C.*) £1,500
Parliamentary Secretaries:—
War, Rt. Hon. Earl Stanhope, D.S.O., M.C., *b.* 1880 (*C.*) £1,500
Do. (Financial), A. Duff-Cooper, D.S.O., M.P., *b.* 1890 (*C.*) £1,500
Admiralty, Lord Stanley, M.C., M.P., *b.* 1894 (*C.*) £1,500
Trade, Maj. L. Hore-Belisha, M.P. (*L.*) £1,500
Mines, Isaac Foot, M.P., *b.* 1880 (*L.*) £1,500
Overseas Trade (Joint Secretariat Foreign Office and Board of Trade, Maj. D. J. Colville, M.P. (*C.*) £2,000
Agriculture (and Deputy Minister of Fisheries), The Earl De La Warr, *b.* 1900 (*N. Lab.*) £1,200
Labour, R. S. Hudson, M.P. (*C.*) £1,200
Education, Herwald Ramsbotham, O.B.E., M.C., M.P. (*C.*) £1,200
Health, Ernest Brown, M.C., M.P. (*L. Nat.*) £1,500
Transport, G. M. Gillett, M.P., *b.* 1870 (*N. Lab.*) £1,500

CABINET MINISTERS' PENSIONS.—(First Class Pension, £2,000; Second Class Pension, £1,200. None paid since April 6, 1924.) Pensions were granted to the following Ministers, but have been resigned by them:—Rt. Hon. J. A. Pease, now Lord Gainford (£1,200 *per annum*); Rt. Hon. G. W. Balfour (£1,200 *per annum*).

§ All salaries subject to the deductions shown on page 196. * Resigned before the General Election.

THE KING'S SPEECH.—For the first time since his illness, the King opened the new Session on *Oct.* 28, and read his Speech in firm, clear tones in the presence of the Queen, the Prince of Wales and a brilliant gathering. He referred with sympathy to the continuance of heavy unemployment, and said that the Government would persist in its efforts to develop and extend home, Imperial and foreign trade and to help in measures that would lead to greater efficiency in industry. Proposals would be made for the promotion of increased settlement and employment on the land and of large-scale farming operations, for the acquisition and improvement of agricultural land in need of re-conditioning, and for the organisation of producers for marketing purposes. A Commission would be set up immediately to enquire into the whole question of unemployment insurance and the allegations of abuse of its provisions, further financial provision for the Unemployment Fund being meanwhile made. Legislation to secure for the community its share in the site value of land and a measure of electoral reform would be introduced, and measures would be submitted for raising the age of compulsory school attendance, amending the law relating to trade disputes and trade unions, and setting up a Consumers' Council. Other legislation promised in the Speech related to the extension of the law concerning town planning, the amendment of the Factory Acts and the establishment of a new statutory authority to deal with passenger traffic in London. In the Lords, the Address in reply was moved by Lord Sanderson, a blind peer, and seconded by Lord Marks, and was agreed to. In the Commons, after Mr. Charleton had moved and Mr. W. Taylor had seconded the Address, the Prime Minister informed Mr. Baldwin that the Royal Commission on Unemployment Insurance was necessary to keep recommendations for the reform of the system free from party taint, and declared that the removal of the Trade Disputes Act would increase the chances of industrial peace and end a piece of prejudiced legislation. The first amendment, moved by Mr. Jowett on *Oct.* 31, called for Socialist reorganisation of industry, agriculture, banking and the import and export trades and for the fairer distribution of the national income. It was rejected by 156 to 11. Mr. Neville Chamberlain, on *Nov.* 3, moved the official Opposition amendment, which expressed regret at the failure of the Government to propose any measures adequate to deal with the crisis in the industrial, agricultural and commercial situation or to check the continued growth of unemployment. Mr. MacDonald on the following day said that the rise in unemployment was inevitable, whatever Government had been in power. They were encouraging the re-organisation of one industry after another, and would not be held up indefinitely by the refusal of any industry to cut out dead wood. The amendment was defeated by 281 to 250, and the Address was agreed to.

THE TRADE DISPUTES ACT.—One of the most important measures submitted by the Government was the Trade Disputes and Trade Unions (Amendment) Bill, and its abandonment was due to Liberal criticism. Moving the second reading on *Jan.* 22, Sir William Jowitt said that the sort of strike which must be made illegal was the revolutionary or political strike, but the sympathetic industrial strike should not be illegal. No one should be charged with intimidation, and a corporate body should have control of its funds. The Bill also sought to prevent individual convictions before an authoritative pronouncement upon the legality of a strike, and declared that the minority of a trade union must follow the majority in questions concerning the use of funds. Outlining the Liberal policy, Mr. Norman Birkett said they considered that the Bill would make a repetition of the general strike perfectly legal. They held that contracting-in had justified itself, and they would insist on maintaining it. During the final stages of the debate on *Jan.* 28, Sir Stafford Cripps, the Solicitor-General, declared that under the law as it existed before the Act of 1927, the general strike of 1926 would have been legal, because one of its motives had been industrial, but that under the new Bill the general strike would have been illegal, because he was sure that the Courts would have found that the primary object was not industrial. The second reading was carried by 277 to 250, and the Bill was sent to a standing committee, where the treatment it received resulted in its abandonment by the Government. Sir William Jowitt explained early, on *Feb.* 12, that the Government intended to restore to the trade unions the full liberty of action which they possessed in 1926 so long as a sympathetic strike was industrial. Dr. Burgin on *Feb.* 24 moved an official Liberal amendment to introduce words to make illegal any strike or lock-out of which the effect was to expose the community, or any substantial part of the community, to danger to health or safety by interfering with the supplies or distribution of essential food, water, fuel, light, medical or sanitary services or other necessities of life. The amendment was described by supporters of the Government as a wrecking amendment, but it was carried by 37 to 31 on *Feb.* 26. When the committee met again on *March* 3, the Attorney-General announced that the Government would not proceed with the Bill as a consequence of this change, and said that its effect would be to put the unions in a more difficult position than they had been in at any time during the last fifty years.

THE BUDGET.—Still suffering from the effects of a rather serious illness, Mr. Snowden introduced his Budget on *April* 27, the main feature being a promise of duties on land values when the necessary valuation had been completed. The Chancellor estimated a total revenue of £766,000,000 and a total expenditure of £803,366,000, leaving a gap to be bridged of £37,366,000. He proposed to take powers to enable present holders of Savings Certificates due for repayment in 1932 or 1933 to extend their investment. Mr. Snowden emphasized that his task of covering the estimated deficit was exceptionally hard owing to the great depression in trade. He rejected the idea of a revenue tariff, which he described as a means of relieving the well-to-do at the expense of the poor, and as an indirect attack on, and reduction of wages. His problem was largely a temporary one, he declared. A revival of trade, when it came, would be followed by an expansion of revenue and a reduction on the expenditure side in respect of unemployment. In the midst of "this economic blizzard, more severe

than our generation has ever known," he felt justified in seeking relief by means of non-recurrent revenues and temporary expedients. There were two resources to which he could turn. He felt that the Exchange Account of £33,000,000 set up to purchase foreign exchange to finance payments of our obligations abroad could be reduced by £20,000,000, largely because of the establishment of the Bank of International Settlement. The other source was obtained by partially withdrawing a concession in regard to income tax. The yield would suffer from the fall in profits due to trade depression, and he decided not to propose any increase in the standard rate. He proposed instead that the practice of paying two equal instalments of tax under Schedules B, D, and E, should be altered, so that three quarters should be paid on *Jan.* 1, and the remaining quarter on *July* 1. The result would be that the Exchequer would get in an extra quarter of the year's tax within the present financial year, and the following year's yield would not be affected. These two sources, he considered, would reduce the estimated deficit by £30,000,000, and he proposed to obtain the remaining sum by adding twopence to the duty on oil, making it sixpence, instead of fourpence. The balance sheet for the current year would therefore be—revenue £803,500,000, expenditure £803,366,000, leaving a nominal margin of £134,000. "If we can effect substantial economies during the year," Mr. Snowden said, "and if there is some improvement in trade, I do not think next year's Budget need be unduly alarming, but failing this, next year a heavy increase of taxation will be inevitable." Then the Chancellor came to the highly controversial part of his speech. He intended, he said, to include in the Finance Bill provision for the taxation of land values, provision for the necessary and preliminary step of valuation, and provision for the imposition of a tax on land values upon the valuation thus obtained. The impost would not become operative during the current year, but he hoped that the valuation would be completed within two years from the passing of the Finance Bill. The tax would be at the rate of one penny in the pound on capital land value. The Chancellor declared that he was convinced that the proposals which would be submitted would be supported by the great majority of the House and the country. "The scandal of private appropriation of land values created by the enterprise and industry of the people and by the expenditure of public money has been tolerated far too long," he contended. The present system stood in the way of social and economic progress. It inflicted crushing burdens on industry and hindered municipal development. He prophecied that they would look back upon that Budget as a landmark on the road of social and economic progress, and as one further stage towards the emancipation of the people from the tyranny and the injustice of private land monopoly. Presenting the Opposition case on the following day, Mr. Neville Chamberlain said that the anticipation of the income tax would be a serious hardship on the victims. This was the last Free Trade Budget, he declared, and no sham optimist could disguise its revelation of the importance of an out-worn fiscal system. A new procedure was required for the land values proposals, and, on *April* 30, on the Chancellor's motion, the House agreed that notwithstanding the established practice provision might be made in the Finance Bill for giving effect to any resolution for imposing a tax on land values, although the tax was not to come into operation until a subsequent financial year. He explained that as soon as the Bill was passed the work of valuation could begin, and it was hoped it would be completed before the tax came into operation two years hence. Mr. Snowden, on *May* 4, moved that there should be charged for the financial year ending *March* 31, 1933, and for every subsequent financial year, a tax at the rate of one penny for each pound of the land value of every unit of land in Great Britain. He said that between 10,000,000 and 12,000,000 hereditaments would have to be valued by a vast staff who could not begin the work until October. Revenue could not be received until 1933, but meanwhile the threat of the tax would cheapen land at once. He put the cost of valuation at £1,500,000. Agricultural land would be exempt as long as it had a cultivation value. This meant that land used for allotments or market gardens would only be taxed on the difference between its value for cultivation and its value for other purposes. The basis of valuation was to assume that the land was bare of buildings and works, and that the surrounding land was as it actually was. Then the valuer would estimate how much a willing purchaser would give a willing seller for the land, and upon that figure the tax would be levied. Those who owned land valued at less than £120 a year would be exempt, almost all working-class houses being thus exempt. The resolution was carried by 289 to 230 on *May* 6, and the report stage was passed on the following day after the rejection of a Conservative amendment to make it clear that improvements in site value, due to the enterprise of the owner or his predecessors in title, should be excluded from the tax. The Finance Bill received its second reading on *May* 19, Mr. Neville Chamberlain's motion for rejection being defeated by 270 to 230, and the committee stage opened under a guillotine arrangement on *June* 8. The Opposition strongly contested the land tax, which the Solicitor-General estimated would require an extra staff of only 2,000. One amendment to deduct the cultivation value of urban land from the site value assessed to tax instead of deducting only in the case of agricultural land was carried on *June* 15; on a snap division, by 232 to 208, the Prime Minister afterwards declaring that it was a purely drafting matter. The future of the Bill —and of the Government—was imperilled for some time by a Liberal threat to withdraw their support unless the question of double taxation were dealt with. After negotiations, Mr. Snowden on *June* 25 moved an amendment to meet the objections. It provided that the land value of every land unit should be reduced either by a sum equal to four times the annual value for purposes of income tax or by a sum equal to seven-eighths of the land value of the unit. During the report stage, the Chancellor on *July* 2, moved an amendment to exempt from the tax land used as a playing field under some agreement which could not be determined for at least five years, or if it were probable that the land would continue to be so used for one year or more. This was carried, as was another Government amendment changing the first valuation date from *Aug.* 1, 1931, to

Jan. 1, 1932, and fixing the second valuation date at *Aug.* 1, 1936. The third reading was carried on *July* 3, after the defeat by 274 to 222 of an amendment for rejection. The House of Lords quickly passed the Bill, which received the Speaker's certificate that it was a money bill and could not therefore be amended by the Peers, and the Royal Assent was given on *July* 31, when Parliament adjourned.

ELECTORAL REFORM.—The introduction of the principle of the alternative vote and the abolition of university representation were the main features of the Electoral Reform Bill, which was read a second time in the House of Commons, by 295 to 230 on *Feb.* 3, after a two days' debate. The Home Secretary, explaining the proposals, said that the Government in bringing the Bill forward were fulfilling a moral duty and not signing a pact with the Liberals. The Bill, although it fell short of what the Labour Party would like, would effect a real, far-reaching improvement in our electoral system. The Labour Party regarded the abolition of the system of plural voting as essential, while the alternative vote had the advantages and convenience of the second ballot without the latter's inconvenience and trouble, and prevented the election of a candidate against the wishes of a constituency. The Bill proposed to divide the existing double-membered constituencies into two, each of which would return a single member, schemes for the division being prepared by commissioners and laid before Parliament. The business premises qualification, except in the City of London, and Universities constituencies would be abolished, voters in the City being prohibited from voting elsewhere. The Bill also provided that motor-cars and other vehicles could not be used at elections unless registered with the returning officer. Sir Samuel Hoare described the Bill as a Socialist bid for Liberal support for a majority until 1934. For the Committee stage a time table was adopted, and when it opened on *March* 4, the Government accepted an amendment delaying the operation of the alternative vote system until the dissolution of the present Parliament. The Government were defeated on *March* 16 by 246 to 242, on the clause abolishing University representation, which was deleted. The committee stage was completed on *May* 12, and the third reading was secured on *June* 2 by 278 to 228. In the Upper Chamber the second reading was agreed to by 50 to 14 on *June* 16, but the Peers made a number of important changes in committee. An amendment to limit the operation of the alternative vote to London boroughs, other than the City and boroughs elsewhere with a population exceeding 200,000, was carried by 80 to 29 on *July* 2, and on *July* 9 the Lords deleted the clauses dealing with the business premises qualification, plural voting, and the use of motor cars. These were restored by the Commons on *July* 16 when other amendments by the Upper Chamber were disagreed with, but no further progress was made with the Bill.

UNEMPLOYMENT INSURANCE. — Several Bills amending the unemployment insurance system were brought forward by the Government, pending the report of the Royal Commission to inquire into the question. The first Bill, which received the Royal Assent on *Dec.* 19, was necessitated by the fact that the debt of the Unemployment Insurance Fund was approaching the borrowing limit of £60,000,000, which, it was explained, would be reached by Christmas, and which was accordingly increased to £70,000,000. Mr. Lawson said that the deficiency in the Fund was due to the increase in unemployment. At the same time a Bill was passed to retain in insurance a number of persons who would otherwise have fallen out of insurance within the succeeding few months. Later another Bill was placed on the Statute Book, raising the borrowing limit of the fund to £90,000,000 and extending the transitional period by six months. Then on *June* 22, a money resolution was passed which sanctioned yet a further increase of the Fund to £115,000,000. Miss Bondfield, justifying the Government's policy, declared that to increase contributions and decrease benefits would mean greater exactions from industries already heavily depressed and a lowering of the standard of living of the unemployed. The Bill based on the resolution received a second reading on *June* 26 after the defeat by 240 to 180 of a motion for rejection, and the Royal Assent was given on *July* 8. Finally, a Bill dealing with some of the anomalies pointed out by the Royal Commission was passed by the time Parliament adjourned. It imposed a test on habitual part-time workers as to whether they intended to work a full week or not, and laid it down that benefit should not be a dowry to give a married woman independence but to relieve an unemployed married woman still habitually employed. The Bill also set up an advisory committee to submit draft regulations to the Minister of Labour with a view to removing anomalies. An amendment for the rejection of the Bill, moved by Mr. Maxton, was defeated by 231 to 19 during the second reading stage on *July* 8.

HELP FOR AGRICULTURE.—Among the measures passed before the adjournment were two designed to assist agriculture. The first was the Agricultural Land (*Utilisation*) Bill, which set up an Agricultural Land Corporation with power to acquire land by agreement with the owners for large scale farming experiments. Explaining the proposals when he moved the second reading on *Nov.* 13, Dr. Addison said that they were intended to increase employment and to develop a system which would make good dilapidation. Demonstration farms, which must be self-supporting, were to be established. Where it was shown that land had been seriously neglected, and continued to be neglected, there would be powers to take it over compulsorily. There would also be powers to facilitate the provision of allotments, where there was a specially large number of men unemployed. The second reading was carried on *Nov.* 18 by 297 to 216, and the Bill was sent to a standing committee. The third reading was agreed to by 282 to 226 on *Feb.* 10. When the Bill reached the Upper Chamber, it was dealt with severely. The Bill was given a second reading on *Feb.* 25 on the advice of Lord Hailsham. In committee, the clause providing for the establishment of a Land Corporation was deleted on *April* 22, and other clauses were struck out before the Bill was read a third time on *May* 21. The Commons disagreed with the amendments and restored the deleted clauses, but the Lords insisted on the omission of the clause dealing with large scale farming experiments, and the Bill was given the Royal Assent in this form on *July* 31. The second measure, the Agricultural

Marketing Bill, was outlined on *Feb.* 9 by Dr. Addison, who estimated that better marketing would add £100,000,000 a year to the £252,000,000 obtained by British producers. The National Mark Campaign had shown that a demand existed for properly graded British produce, and the Bill would give and consolidate a great new market by setting up an organisation for standardised produce. Its success would depend upon the loyal co-operation of producers. An element of compulsion was necessary, but exemptions would be allowed in some cases, such as where producers consumed their own goods or had a regular private clientele, provided that there was no under-selling. He hoped that they might capture the London egg market, remedy the disorganisation of the milk trade by providing for the use of milk surplus to local consumption, and promote alliances between kindred trades. The second reading was agreed to by 258 to 213. In committee, a Conservative amendment to prevent under-cutting from outside prescribed areas was carried. The Lords made but slight amendments and these were accepted, the Royal Assent being given on *July* 31.

SUNDAY ENTERTAINMENTS.—As a result of the ruling by the Courts that Sunday cinema performances were illegal under a century-old statute, the Government introduced a Bill to regulate Sunday performances, leaving members to vote as they wished. Mr. Clynes, moving the second reading on *April* 10, explained that the law of 1780, which governed Sunday performances, must either be amended or enforced. The Bill would give local authorities discretion as to which view should prevail in their areas, subject only to a guarantee that recreational facilities would produce revenue for charities and would not involve a seven-day week for any worker, and to proof being forthcoming of a substantial demand for such facilities in any area. Mr. Ian Macpherson moved the rejection of the Bill, which, he said, legalised illegality and commercialised Sunday. It would, he declared, benefit Hollywood at the expense of Stratford-on-Avon. Mr. Chamberlain pointed out that the Bill would only sanction, and not compel, a practice prevalent during the last twenty years, and Sir John Simon reminded members that in 1780 the House imposed on the people what it thought good for them to believe, while in 1931, Parliament gave people the right to believe what they thought good. Summing up the case against the Bill, Sir Thomas Inskip said that it might force 220,000 people to work on Sunday in London. The second reading was agreed to by 258 to 210, and the Bill was sent to a standing committee, but was subsequently abandoned, and a temporary measure was passed legalising, but not altering, the practice existing before the ruling of the Courts.

THE NATIONAL GOVERNMENT.

LABOUR RESIGNS.—A sudden crisis arose within a few weeks of the adjournment as a result of the state of the country's finances. The Cabinet met daily but failed to agree upon methods of balancing the nation's Budget, and the Labour Government resigned on *Aug.* 23. Two days later Mr. MacDonald formed the National Government, the Cabinet consisting of men representatives of Labour, Conservatives and Liberals. Parliament met specially on *Sept.* 8, when both Houses received a message from the King intimating that the condition of the national finances called for the imposition of additional taxation, and for economies in public expenditure. In the Lords, the Marquis of Reading, and in the Commons the Prime Minister, explained the situation. Mr. MacDonald said that by the third week in August temporary credits which had been arranged were practically exhausted. The position they had to face was something like a typhoon. He denied that bankers had ever interfered with political proposals, and said that if the country was to get a loan it had to balance the Budget and put its unemployment finance on a sound basis. Mr. Henderson, who had become Leader of the Opposition, said that he had agreed that the Budget must be balanced, but he could not accept the cuts in the unemployment benefit. The division on a formal motion was treated as a vote of confidence, and the Government secured a majority of 59.

THE BUDGET BALANCED.—By the emergency Budget, opened by Mr. Snowden on *Sept.* 10, the finances of the nation were balanced and a prospective deficit of £170,000,000 was cleared—"an achievement which no country in the world has ever attempted," in the words of the Chancellor. Nationally, he said, we had for some time been living beyond our means. The Unemployment Insurance Fund was costing the Exchequer about £100,000,000 this year, and the Government had decided that borrowing for that Fund and the Road Fund must cease. Based on the existing taxes and expenditure, he obtained an estimated deficit on the year's Budget of £74,700,000, but, looking ahead, he found the appalling figure of £170,000,000 deficit on next year's Budget. Mentioning that nine-tenths of the items under which economies were proposed were approved by the late Government, Mr. Snowden said that the Government had decided that the proposed Sinking Fund provision should be £32,500,000, which, with certain necessary adjustments, produced a saving of £13,500,000. He proposed to increase the standard rate of income tax for the current year by 6*d.*, making it 5*s.* in the pound, and to alleviate the burden of the increase on industry the allowance made in respect of wear and tear on plant and machinery would be increased by 10 per cent. A very large number of persons at present paying no income tax would be brought within the range of payers by reducing the personal allowance for a single person from £135 to £100, and for a married person from £225 to £150, while the allowances for children would be reduced from £60 to £50 for the first child, and from £50 to £40 for other children. The amount on which half the standard rate would be paid was reduced from £250 to £175, but the allowance in respect of earned income would be increased from one-sixth, with a maximum of £250, to one-fifth, with a maximum of £300. He expected a yield from the changes of £25,000,000 this year, and £51,500,000 next year. In addition he anticipated £4,000,000 this year and £6,000,000 next year from an increase of 10 per cent. on the amount of the surtax bill. The duties on all ordinary descriptions of beer would be increased by 31*s.* per standard barrel, on unmanufactured tobacco by 8*d.* a pound; and on petrol by 2*d.* a gallon. He proposed a new scale in the entertainments duty, representing a penny in every six-

pence charged for admission. From these four changes he hoped to receive £11,500,000 this year and £24,000,000 next year. Thus, said the Chancellor, against the estimated deficit of this year of £74,679,000 he would secure £76,200,000, a surplus of £1,500,000, and in regard to next year the changes would bring in £171,500,000 against the estimated deficit of £170,000,000. Finally, Mr. Snowden said that the Finance Bill would include clauses to facilitate the conversion of the 5 per cent. War Loan to a lower rate of interest. He had tried, he declared, to spread the burden as fairly and as evenly as human ingenuity could devise, and he believed that the country would accept the proposals and give the world an example of the indomitable British spirit in the face of difficulty. Mr. Graham criticised mainly the "cut" in unemployment benefit, and Mr. Runciman suggested that the importation of foreign luxuries should be prohibited. The Finance Bill was brought in on *Sept.* 17, and the second reading was obtained six days later by 297 to 238. When the third reading was agreed to on *Oct.* 2, Mr. Snowden claimed that it would place the country's finances on a sound basis. The Bill went through the House of Lords and received the Royal Assent on *Oct.* 5.

THE ECONOMY BILL.—The main saving to the Exchequer was secured by Orders in Council empowered by the National Economy Bill which was explained by the Prime Minister when moving the second reading on *Sept.* 11. The economies were in expenditure falling to be defrayed out of public moneys, and were in respect of education, national health insurance, unemployment insurance and roads. Mr. Macdonald said that the Orders could only be issued within one month after the passing of the Bill, so that the Government's power lapsed. Under their scheme £70,000,000 was to be found by economies and £80,000,000 by taxation. They were carrying on the policy actually begun by the late Government. After explaining the cuts in teachers' salaries, and police and services pay, the Prime Minister said that the reduction in unemployment insurance seemed to be the hardest of the economies. They had adopted the straightforward course of taking off a percentage based upon the decreases in the cost of living and increases in the value of money, and he contended that the state of the unemployed was 1½ per cent. better than two years earlier. The second reading was carried by 310 to 253 on *Sept.* 14, and after several amendments had been defeated in Committee the third reading was agreed to by 297 to 242 on *Sept.* 28. Two days later it had been passed by the Lords and received the Royal Assent.

GOLD STANDARD SUSPENDED.—Yet another sensation came on *Sept.* 21, when it was announced that on the previous day the Government had decided, after consultation with the Bank of England, to suspend the Gold Standard for the time being. On the same day a Bill for this purpose was passed through all its stages and received the Royal Assent. Mr. Snowden explained that it suspended the obligation of the Bank to sell gold until such time as that obligation was restored by Royal Proclamation, indemnified the Bank for refusing to sell gold that day, and gave the Treasury power during the next six months to make and vary any measures they wished for controlling the exchanges. Mr. Henderson said that there was no need for panic, but he did not dispute the necessity for emergency powers.

THE DISSOLUTION.—After the passage of a Bill to prevent the exploitation of foodstuffs, the Prime Minister announced on *Oct.* 6 that Parliament would be dissolved on the following day, and that polling day for the new House of Commons would be *Oct.* 27. In the King's Speech, read on the prorogation, His Majesty expressed himself confident that every citizen would co-operate in restoring prosperity to the nation.

§ OFFICERS OF THE HOUSE OF COMMONS.

Speaker (re-elected Nov. 3, 1931), Capt. The Rt. Hon. Edward A. FitzRoy, M.P. for Daventry £5,000
Secretary, Lt.-Col. Sir Ralph Verney, C.I.E., C.V.O. £700
Chairman of Committees, Sir D. H. Herbert, K.B.E., M.P. £2,500
Deputy Chairman, Capt. R. C. Bourne, M.P. £1,000
Temporary Chairmen (unpaid),

Clerk of the House of Commons, Sir Horace Christian Dawkins, K.C.B., M.B.E. £3,000
Clerk Asst., Gilbert F. Montriou Campion £1,800
Second do., F. W. Metcalfe £1,200
Principal Clerk Public Bill Office, and Clerk of the Fees, Bryan Fell ..... £1,000 to £1,200
Principal Clerk of Committees and Private Bills, R. P. Colomb ..... £1,000 to £1,200
Clerk of the Journals, F. C. Bramwell, £1,000 to £1,200
Senior Clerks, Sir J. S. Horsburgh-Porter, Bart.; C. R. Turner; W. K. Gibbons; O. C. Williams; G. W. B. Throckmorton; B. H. Coode: A. W. M. Bull; C. R. P. Diver; E. A. Fellowes; R. A. W. Dent each £650 to £900
Assist. Clerks, L. A. Abraham; N. L. Lockton; S. St. G. S. Kingdom; E. J. H. Edenborough; D. J. Gordon; B. St. G. Drennan; K. R. Mackenzie; S. C. Hawtrey; S. Gordon; T. G. B. Cocks; J. S. Crawford; H. R. M. Farmer each £150 to £600
Accountant, J. Luxford ..... £400 to £650
Assist. Accountant, C. L. Watson £200 to £350
Vote Office Principal Clerk, Maj. B. T. St. John £650
Serjeant-at-Arms, Adm. Sir Colin Keppel, G.C.V.O., K.C.I.E., C.B., D.S.O. £1,200
Deputy Serjeant, Walter H. Erskine, M.B.E. £800
Assistant do., Paymaster Capt. R. Butcher, C.M.G., C.V.O. £700
Chaplain to the Speaker, Rev. Canon Wm. H. Carnegie, M.A. £400
Counsel to the Speaker, Sir F. Liddell, K.C.B., K.C. £1,800
Examiner for Private Bills and Taxing Officer, Lt.-Col. Sir Ralph Verney, C.I.E., C.V.O. £800
Librarian, A. E. A. W. Smyth £1,000 to £1,200
Assistant do., Vivian Kitto ..... £400 to £600
Shorthand Writer, H. A. Stevens ..... *fees*
Official Reports (Editor), T. H. Parr £550 to £600

§ *For Salaries see note, p.* 196.

THE eighth Parliament of King George V., elected on October 27, 1931. 472 Conservative; 13 National Labour; 35 Liberal Nationalists; 33 Liberals; 3 National Independents. Total for National Government, 556. Labour 52; Independent Liberals 4; Independents 3. Total against National Government, 59.

THE GENERAL ELECTION OF 1931.

THE result of the General Election of 1931 is shown in tabular form below. The Electorate numbered approximately 30,000,000, and if the voters in uncontested constituencies (2,358,000) are deducted the number of electors who recorded their votes amounted to seven-ninths of the remainder. In 1832 the electors numbered about 1,000,000, increased to 2,500,000 in 1867, 5,000,000 in 1884, 21,000,000 in 1918 (when women of 30 were enfranchised), and to 28,850,000 in 1929 (women having the vote on the same terms as men).

Party and Leader.	Number of Candidates.			Votes Received.	Members Returned.		
	Men.	Women.	Total.		Unop.	Opposed.	Total.
Government:—							
Nat. Labour (MacDonald)	22	0	22	340,000	0	13	13
Conservative (Baldwin) ...	504	16	520	11,873,000	49	423	472
Liberal National (Simon)	39	1	40	870,000	7	28	35
Liberal (Samuel).....	82	4	86	1,332,000	5	28	33
Independent Nationalist..	3	0	3	90,000	0	3	3
Total for National Government.....	650	21	671	14,505,000	61	495	556
Opposition:—							
Labour (Henderson)	477	36	513	6,642,000	6	46	52
Liberal (Lloyd George).....	33	1	34	346,000	0	4	4
New Party (Mosley)	24	0	24	36,000	0	0	0
Communist	23	2	25	75,000	0	0	0
Independent	24	2	26	100,000	0	3	3
Total against National Government.....	581	41	622	7,199,000	6	53	59
Grand Total	1,231	62	1,293	21,704,000	67	548	615

Figures following name of constituency denote the number of electors (*M.* = Men, *W.* = Women); *C.* = Conservative; *Com.* = Communist; *Ind.* = Independent; *L.* = Liberal; *L. Nat.* = Liberal Nationalist; *Lab.* = Labour; *N.Lab.* = National Labour; *N.P.* = New Party; *Nat.* = Scottish, Welsh or Irish Nationalist. * Denotes a Member of the late Parliament for the *same*, and † for a *different*, Constituency.

England.

"**Right Honourable.**"—Members of His Majesty's Most Honourable Privy Council are entitled to be designated "The Right Honourable," but, in practice, this prefix is sometimes absorbed in other designations; for example, a Prince of the Blood admitted a Privy Counsellor remains "His Royal Highness"; a Duke remains "His Grace"; a Marquess is still styled "Most Honourable." In the case of Earls, Viscounts and Barons a question has lately been raised whether peers of these three degrees are entitled to be called "Right Honourable" if not Privy Counsellors. While not presuming to make a statement in settlement of the question, the Editor feels bound to direct attention to the recital of Modes of Address of Peers of these three degrees (on pages 113, 117 and 120 of present Edition). The *Style* appearing in these headings has been recited in this manner for more than sixty years in WHITAKER, and appears to be evidence of a long-standing custom; moreover, it is borne out in each instance, in *A Manual of Dignities*, by C. R. Dodd (Whittaker & Co., 1842), and in *The Book of the Court*, by W. J. Thoms, F.S.A., "Dedicated by Command to the Queen" (H. G. Bohn, 1844). Earlier evidence of the courtesy could no doubt be produced. Chief Magistrates entitled to the prefix are found on p. 533.

Government and Public Offices.

§NOTE AS TO SALARIES.

THE salaries shown in the 1932 WHITAKER, in the case of H.M. Judges and of Government Departments, are subject to abatement in accordance with the decisions of His Majesty's Government. These abatements, which are set out in Command Paper Number 3952, in various Treasury Circulars, and answers to Parliamentary questions, may be summarised as follows:

(a) *Ministerial salaries*—

£5,000 a year and over, 20%; £2,000 a year and over, but under £5,000, 15%; under £2,000 a year, 10%.

(The salaries of the Attorney-General and Solicitor-General have been reduced to £2,000 a year plus fees.)

(b) *Other salaries*—

£5,000 a year and over, an abatement of 20%; £2,000 a year and over, but less than £5,000, 10%, subject to the proviso that the remuneration of any officer in receipt of over £4,000 a year, but less than £5,000, shall be 10% less or such larger amount as will suffice to reduce his remuneration to £4,000.

Salaries of £1,800 a year and over, but less than £2,000; such abatement as will suffice to reduce remuneration to £1,800.

THE COST OF LIVING BONUS.

IN the year 1920, in order to counteract the increase in the *Cost of Living* the Government introduced a *Cost of Living Bonus Scheme*, under which salaried Civil Servants and wage-earning Government employees receive temporary additions to their salary or wages. The scheme was applied, irrespective of age or sex, as from March 1, 1920, the limit of the addition in any case being £750 per annum. In general, salaries under £1,800 a year, *except where described as inclusive, are supplemented by the grant of a* cost of living bonus on a sliding scale.

The Government Scheme was adopted generally by Public Authorities, certain modifications being made in particular instances.

The standard cost of living in March, 1920, was 130 per cent. in excess of that of July, 1914, and the scheme of increase agreed by the *Whitley Council* on the basis of that figure was as follows:—

Where the ordinary rate of remuneration does not exceed 30s. per week—130 per cent. increase.

Where the ordinary rate of remuneration exceeds 35s. a week, but does not exceed £200 per annum—130 per cent. on the first 35s. a week (£91 5s. per annum) and 60 per cent. on the excess over £91 5s.

Where the ordinary rate of remuneration exceeds £200 per annum—130 per cent. on the first £91 5s., 60 per cent. on the next £108 15s., and 45 per cent. on the amount in excess of £200 up to £500.

The standard rate rises or falls 1 *twenty-sixth* in response to every *five points* rise or fall in the Index figure average of prices over a six months period.

In addition to the reduction caused by the automatic decline of the cost of living figure the following decreases have been introduced:—

10 per cent. on salaries from £500 to £700; 15 per cent. on salaries from £700 to £800; 20 per cent. on salaries from £800 to £900; and so on until 60 per cent. is reached in the case of salaries of £1,600 a year.

From September, 1931, bonus is related to an average cost of living figures of 50 per cent. over the 1914 level.

The following are examples of the bonus at present payable (*i.e.* the standard rate, *decreased* by sixteen twenty-sixths):—

Annual Salary.	Bonus Sept., 1931.	Weekly Wages.	Bonus Sept., 1931.
£	£ s.	s. d.	s. d.
90	45 0	14 0	7 0
150	59 4	15 0	7 6
200	70 14	17 0	8 6
250	79 8	18 0	9 0
300	88 0	20 0	10 0
400	105 7	30 0	15 0
500	122 13	40 0	18 8
600	126 0	50 0	20 11
700	133 13	60 0	23 3
800	139 13	70 0	25 7
900	143 18	80 0	27 8
1,000	146 9	90 0	29 5
1,250	50 0	100 0	31 2

Further examples, showing the bonus expressed as percentage of salary, are appended:—

Salary.	Bonus.	Bonus expressed as Percentage of Salary.
£	£ s.	%
90	45 0	50
150	59 4	39·5
250	79 8	31·8
500	122 13	24·5
1,000	146 9	14·6
1,500	133 2	8·9
1,750	50 0	2·9

Payment of bonus is subject to the proviso that no bonus is payable so as to bring total remuneration, inclusive of bonus, above £1,800.

§MINISTRY OF AGRICULTURE AND FISHERIES,

Whitehall Place, S.W. 1: 43 Parliament Street, S.W. 1; 7, Old Bailey, E.C. 4; 8 Buckingham Gate, S.W. 1.

THE MINISTRY OF AGRICULTURE AND FISHERIES was constituted pursuant to the Ministry of Agriculture and Fisheries Act, 1919 (9 and 10 Geo. V. Ch. 91) which amended the Board of Agriculture and Fisheries Acts, 1889 to 1909. The Board of Agriculture for Great Britain was established in 1889. By the Board of Agriculture and Fisheries Act of 1903, the duties of the Fisheries Department of the Board of Trade were transferred to the Board of Agriculture, the designation of which was at the same time altered. The expression "agriculture" is defined to include "horticulture."

The administration of the *Ordnance Survey* and of *Kew Gardens* is under the control of the Ministry.

Estimates, 1931, £2,444,322.

Minister of Agriculture and Fisheries, Lt.-Col. the Rt. Hon. Sir John Gilmour, Bt., D.S.O., M.P. £2,000
Private Secs., D. E Vandepeer; A. W. Keeble.

§COMMISSIONERS OF CROWN LANDS,

55 Whitehall, S.W. 1.

THE CROWN LANDS.—The Land Revenues of the Crown in the United Kingdom have been collected on the public account since 1760, when George III. surrendered them in return for a fixed annual payment or *Civil List*. At the time of the surrender the gross revenues amounted to about £89,000 and the net return to about £11,000.

In the year ended March 31, 1931, the total Receipts by the Commissioners were £1,828,309, of which amount £128,141 was from the Mines. The Expenditure (including Property Tax allowed) was £496,991. The sum of £1,220,000 was paid to the Exchequer in 1930-31 as *Surplus Revenue*, being a net sum from which no deductions have to be made for administration.

Commissioner (ex-officio), The Minister of Agriculture and Fisheries ..... *unpaid*
Permanent Commissioner, A. S. Gaye, C.B., O.B.E., F.L.A.S. £1,500

Chairman, The Rt. Hon. J. H. Thomas, M.P.
Secretary, S. G. Tallents, C.B., C.M.G., C.B.E.

THE DUCHY OF CORNWALL,

Buckingham Gate, S.W. 1.

Cornwall was created a Duchy by Edward III. for the support of his eldest son (afterwards created Prince of Wales), and the eldest son of the Sovereign has since that time been born Duke of Cornwall.

The Revenue of the Duchy of Cornwall in the year ended December 31, 1926, was £246,125, and was derived principally from Rents and Profits of Courts, £165,817. The Payments include £48,967, Outlay for the benefit of the Estate; £39,304, Deductions under various Acts; £14,963, Allowances, Donations, and Charities; and £19,745, Expenses of Management. The sum of £66,713 was paid on account of His Royal Highness the Prince of Wales.

Prince of Wales's Council.

The Lord Clinton (*Lord Warden of the Stannaries and Keeper of Privy Seal*); Edward Robert Peacock (*Receiver-General*); The Earl Fortescue, K.C.B.; The Earl of Radnor; Adm. Sir Lionel Halsey, G.C.M.G., C.C.V.O., K.C.I.E., C.B.; Hon. Geoffrey Lawrence, D.S.O., K.C. (*Attorney-General*); Sir Godfrey Thomas, Bt., K.C.V.O., C.I.E.; Maj. Hilgrove McCormick, M.C. (*Sec. and Keeper of Records*).

Officers of the Duchy of Cornwall.

Auditor, Sir Laurence E. Halsey, K.B.E.
Solicitor, R. E. Tucker.
Chief Clerk and Surveyor, H. W. Kirk.
Deputy Receiver, G. A. Conyard.
Sheriff (1931-32), Lt.-Col. E. H. W. Bolitho, D.S.O.

THE DUCHY OF LANCASTER,

Temporary Office, 4 Norfolk St., Strand, W.C. 2.

The County of Lancaster was erected into a Duchy or County Palatine Duchy by Edward III for his son John of Gaunt in 1377, but in 1399 it became merged in the Crown through the accession of John of Gaunt's son as Henry IV.

The Revenue of the Duchy of Lancaster was £29,000 in 1847 and amounted to £128,000 in the year ended December 31, 1930. The contributory items are Rents and Profits of Courts, £68,765; Royalties and Dues, £31,246. Expenditure: £13,902, Outlay for the benefit

* Seconded for service in Australia.
† Seconded for service in Canada.

§ *For Salaries see note, p.* 196.

of the Estate; £24,714, deducted under various Acts of Parliament; £5,211, Allowances, Donations, and Charities; £2,000, Salary of the Chancellor of the Duchy; and £10,090 Expenses of Management. The sum of £62,000 was paid (for His Majesty's use) to the Keeper of His Majesty's Privy Purse.

Chancellor, The Marquess of Lothian, C.H. £2,000
Private Sec., Norman R. C. Warwick, O.B.E.
Vice-Chancellor, Sir Courthope Wilson, K.C.
Attorney-Gen., Sir Joseph Herbert Cunliffe, K.C.
Receiver-Gen., Lt.-Col. Rt. Hon. Sir F. Ponsonby, G.C.B., G.C.V.O..
Auditor, F. W. Pixley.
Clerk of Council and Keeper of Records, Louis F. Fergusson.
Solicitor, Eliot A. C. Druce.
Surveyor-Gen. and Deputy Receiver-Gen., T. Vaughan Prickard, M.V.O.
Chief Clerk, Norman R. C. Warwick, O.B.E.
Registrar, Preston District, J. M. Worthington.
Do. Manchester District, Harold Roberts.
Do. Liverpool Dist., R. W. Lowden.
Constable of Lancaster Castle, J. Travis Travis-Clegg.

THE COUNTY PALATINE OF DURHAM.

It is uncertain when "Palatine" privileges were first exercised in the County of Durham, as no formal creation of the Palatinate by charter or deed appears to have ever been made. From the founding of the See of Lindisfarne, out of which the bishopric and palatinate of Durham arose, the Bishops received large grants of lands, with extensive immunities; and Guthred, king of Northumbria, and Alfred the Great appear to have confirmed the grant to the See of the whole of the land between the rivers Tyne and Wear. There is no evidence of the exercise of *palatine* privileges by the Bishops prior to the Norman Conquest, but it is probable that these were acquired in the reign of the Conqueror, and they were exercised by the Prelates until resumed by the Crown in 1836. Palatine counties are understood to have been erected for the defence of neighbouring kingdoms against the Welsh and Scots, and were in reality self-contained kingdoms in alliance with their creator. The ancient customs of the County Palatine of Durham are in some measure retained, the administrative authority being exercised on behalf of the Crown.

Chancellor, Sir Arthur Colefax, K.B.E., K.C.
Attorney-General, Herbert F. Manisty, K.C.
Solicitor-General, E. A. Mitchell-Innes, C.B.E., K.C.
Registrar of Chancery Court, A. O. Smith.
Steward & Clerk of Halmotes, Sir Stanford E. Downing.
Deputy do., A. de Bock Porter, LL.B.
Registrar, G. M. Sladden.
Mining Surveyor, Sir A. N. Lindsay Wood, Bt.
Receivers, Smiths, Gore & Co.

§BOARD OF EDUCATION,

Whitehall, London, S.W. 1.

The Government Department of Education was, until the establishment of a separate office, a Committee of the Privy Council appointed in 1839 to supervise the distribution of certain grants which had been made by Parliament since 1834. The Act of 1899 established the Board of Education, with a President and Parliamentary Secretary, and created a Consultative Committee. The cost of administration was estimated at £534,148 in the Financial Year 1931, with £325,650 for Inspection and Examination.

THE BOARD.

The Right Hon. Sir Donald Maclean, K.B.E., M.P., *President* (£2,000 inclusive); The Lord President of the Council; the Principal Secretaries of State; the First Lord of the Treasury; and the Chancellor of the Exchequer.

CENTRAL ELECTRICITY BOARD.

(Established under the Electricity (Supply) Act, 1926.)

Office, Trafalgar Bldgs., 1 Charing Cross, S.W.1.

The Board are charged with the duty of supplying electricity to authorised undertakers in Great Britain. Their main functions are to construct main transmission lines (commonly known as "The Grid") to concentrate generation at standard frequency in the most efficient stations ("Selected Stations"), to supply electricity in bulk for distribution. With that object in view, nine schemes have been adopted by the Board, and are now being carried into effect. They embrace the whole of Great Britain, except the north of Scotland. The borrowing powers of the Board are £50,000,000, and issues of stock have been made, viz.: £3,000,000 (4%) in May, 1929, £7,000,000 (5%) in January, 1930, £6,000,000 (4½%) in Nov., 1930, and £3,000,000 (5%) in Oct. and Nov., 1931. The Board have published Reports and Statements of Accounts covering the period to December 31, 1930.

Chairman, Sir Andrew R. Duncan, M.A., LL.B., LL.D.
Other Members, The Lord Barnby, C.M.G., C.B.E., M.V.O.; Sir James Devonshire, K.B.E., M.I.E.E.; Frank Hodges, J.P.; W. Walker, M.I.E.E.; Sir Duncan Watson, M.I.E.E.; W. K. Whigham; Sir R. L. Wedgewood, C.B., C.M.G.
Secretary and Solicitor, Richard H. Fox.
General Manager and Chief Engineer, Sir Archibald Page, M.Inst.C.E., M.I.E.E.
Chief Accountant, D. W. Coates, C.B.E.

EMIGRANTS' INFORMATION OFFICE

(*see* Oversea Settlement Department, p. 201.)

§ EXCHEQUER AND AUDIT DEPARTMENT,

Victoria Embankment, E.C. 4.

This is the Department of the Comptroller and Auditor General, an office created by the Act 29 & 30 Vict. c. 39 (1866) to replace, with extended powers, the separate offices of Comptroller General of the Receipt and Issue of the Exchequer and of the Commissioners for Auditing the Public Accounts. This officer is appointed by Letters Patent under the Great Seal, and is irremovable except upon an address from the Two Houses of Parliament. In his capacity of Comptroller General of the Receipt and Issue of the Exchequer he authorises all issues from the Exchequer after satisfying himself that Parliament has given authority for them. He examines the Exchequer accounts and makes an annual report on them to Parliament. In his capacity of Auditor General of Public Accounts he is charged with the duty of examining on behalf of the House of Commons the accounts of expenditure out of monies provided by Parliament, the accounts of the receipt of revenue, and generally all other public accounts, including the accounts of Government stores and of trading services conducted by Government Departments. The results of his examination of those accounts are reported to the House of Commons.

The net expenses of the Department were estimated to amount to £148,650 in 1929–1930.

Comptroller and Auditor General, Gilbert Charles Upcott, C.B. £3,000
Private Secretary, W. C. G. Cribbett.
Secretary, F. N. Dixon, C.B. £1,200

Allen, M.C.; P. Aherne; F. W. Fry; J. O. Tearo; W. A. Brock; J. N. Coker, M.C.; L. Epton; A. Mathieson; J. E. Briggs; S. J. Secker; A. Guilford; J. E. Gwyther; J. G. Macnamara; L. F. Armstrong, M.M.; F. J. Marriott; A. W. Douglas ..... £550 to £700
There are also 145 *Auditors* ..... £250 to £500

§ EXPORT CREDITS GUARANTEE DEPARTMENT,

9 St. Clement's Lane, E.C. 4. (Royal 8771.)
BRANCH OFFICES: *Manchester* — Ship Canal House, King Street. (City 9302.) *Bradford*— 69 Market Street. (8912.)

The Overseas Trade Acts, 1920-1930, empower the Board of Trade to give guarantees in connection with the export of British goods. These powers are vested in the Export Credits Guarantee Department acting on the recommendation of a statutory Advisory Committee set up for the purpose. The Minister in charge of the Department is the Secretary of the Department of Overseas Trade, who in April, 1929, appointed an Executive Committee to control the daily conduct of the business.

Statutory Advisory Committee.

Chairman, *Col. Hon. Sidney Peel, C.B., D.S.O.
Deputy Chairman, *Sir John Caulcutt.

FRIENDLY SOCIETIES REGISTRY,
17 North Audley Street, W. 1.

A Barrister was appointed in 1828 to certify the Rules of Savings Banks, and in 1829 to certify those of Friendly Societies. In 1846 he was constituted Registrar of Friendly Societies. By the Friendly Societies Act, 1875, the Central Office of the Registry of Friendly Societies was created, consisting of Chief Registrar and the Assistant Registrars for England. It exercises numerous and important functions under the Friendly Societies Acts, the Industrial and Provident Societies Acts, the Building Societies Acts, the Trade Union Acts, the Workmen's Compensation Acts, the Scientific Societies Act, the Trustee Savings Banks and Post Office Savings Banks Acts, the Loan Societies Act, the Shop Clubs Act, the Superannuation and other Trust Funds (Validation) Act, and a great number of local and personal Acts. Under the Industrial Assurance Act, 1923, the Chief Registrar is charged with various powers and duties in relation to Industrial Assurance Companies and Collecting Societies, and in that capacity is styled the Industrial Assurance Commissioner.

Medical Adviser, Sir James Smith-Whitaker, M.R.C.S.

Secretary (*acting*), Kenneth Curtis.

GENERAL REGISTER OFFICE

(ENGLAND AND WALES),

Somerset House, W.C. 2.

The Registration of Births, Marriages, and Deaths is believed to have been inaugurated by Thomas Cromwell in 1522, but the Statutes concerning registration are of a comparatively modern date, and were consolidated by 37 & 38 Vict. c. 88. The first Registrar-General was appointed in 1836. The work of the Registrar was enormously increased by the Act of 1874, which made registration compulsory in England and Wales, and also by the Births and Deaths Registration Act, 1926, the Legitimacy Act, 1926, and the Adoption of Children Act, 1926. The Registrar-General is responsible for the taking of the Census and the preparation of the Census Returns. He also undertakes the verification of claims by applicants for Old Age, Widows, &c., and War Pensions. The expenses of the Office including the cost of the Census for 1931-32 were estimated at £355,448. The estimate of receipts from fees for the same period is £26,500.

Quarterly Statistics.—In the Registrar-General's report for the June quarter of 1931, the estimated birth rate is given as 16·5 per 1,000 population, which is the lowest birth rate recorded in any second quarter of a year since the establishment of civil registration. The estimated death rate was 11·5 per 1,000, this being 0·3 per 1,000 above the rate recorded during the second quarter of last year. The natural increase of population for the June quarter, 1931, by excess of births over deaths was 49,174, as against 56,255, 50,723 and 58,859 in the second quarters of 1928, 1929 and 1930 respectively. The number of persons married in the March quarter of 1931 was 93,208, a decrease of 4,286 compared with the number in the corresponding quarter of 1930. The number corresponds to an annual rate of 9·5 per 1,000 of the preliminary 1931 Census population.

Registrar-General, S. P. Vivian, C.B.....£1,200 to £1,500 (*See* Ministry of Health)

§HOME OFFICE, Whitehall, S.W. 1.

The Secretaryship of State for Home Affairs was created in 1782, the duties having previously been assigned to the "Southern" Secretaryship, which embraced the affairs of Great Britain, Ireland, and the Colonies, and also Southern Europe. By the appointment of the "Home" and "Foreign" Secretaries the duties were divided in accordance with the names of the Offices, the former retaining Irish and Colonial business, and until 1794 War business also. In 1801 the Colonial business was also removed. The Home Secretary is the medium by which the Sovereign acquaints his people of his pleasure, and a channel of communication with the Sovereign, and his main functions are the maintenance of the King's peace, the enforcement of rules made for the internal well-being of the community, and the exercise of the prerogative of mercy.
Principal Secretary of State for Home Affairs, Rt. Hon. Sir Herbert Samuel, G.C.B., G.B.E., M.P. £5,000

POLITICAL HONOURS SCRUTINY COMMITTEE.

The Royal Commission on Honours, 1922, recommended that a Committee should be appointed to consider, before they are submitted to the King the names and particulars of persons recommended for appointment to any dignity or honour on account of political services, and after such inquiry as they think fit to report to the Prime Minister whether, so far as they believe, such persons in the whole circumstances are fit and proper persons to be recommended.
Secretary, James Rae (Treasury, S.W. 1).

IMPERIAL ECONOMIC COMMITTEE,
2 Queen Anne's Gate Buildings, S.W. 1.

This Committee was established in 1925, following on proposals of the Imperial Economic Conference, 1923, for the purpose of considering the possibility of improving the methods of preparing for market and marketing within the United Kingdom, the products of the Overseas parts of the Empire, with a view to increasing the consumption of such products in the United Kingdom in preference to imports from foreign countries, and to promote the interests both of producers and consumers. The Imperial Conference of 1930 further widened the reference to the Committee in the following terms of reference :—

(1) To investigate the marketing of Empire foodstuffs in the United Kingdom.
(2) To undertake inquiries into the production for export and the marketing in various parts of the world of raw materials of the Empire.
(3) To prepare, at the instance of the Governments of the Commonwealth, surveys of any branch of Empire trade and marketing.
(4) To carry out certain investigations adopted by the Imperial Conference, 1930.
(5) To facilitate conferences among those engaged in particular industries in various parts of the Empire.
(6) To examine and report on any economic question which the Governments of the Empire may agree to refer to the Committee.

The Committee has published eighteen reports : The first a general report, and reports on meat, fruit, dairy produce, fish, poultry and eggs, honey, functions and work of the Committee, tobacco, timber, agricultural machinery, pigs and pig products, the trade of the British Empire, rubber manufactured goods, hides and skins, progress report (1930), tea and coffee.
Chairman, Sir Sydney J. Chapman, K.C.B., C.B.E.
Secretary, Sir David Chadwick, C.S.I., C.I.E.

IMPERIAL SHIPPING COMMITTEE,
Great George Street, S.W. 1.

Set up in 1920 : (i.) To enquire into complaints from persons and bodies interested with regard to ocean freights, facilities and conditions in the inter-Imperial trade or questions of a similar nature referred to them by any of the nominating authorities, and to report their conclusions to the Governments concerned. (ii.) To survey the facilities for maritime transport on such routes as appear to them to be necessary for trade within the Empire, and to make recommendations to the proper authority for the co-ordination and improvement of such facilities with regard to the type, size and speed of ships, depth of water in docks and channels, construction of harbour works and similar matters ; and in so doing to take into account facilities for air transport on the routes in question. Like the Imperial Economic Committee, it derives authority from and reports to all the Governments represented at the Imperial Conference.
Chairman, Rt. Hon. Sir Halford Mackinder.
Secretary, R. M. Nowell.

§INDIA OFFICE, Whitehall, S.W. 1.

Prior to 1858 Indian affairs were conducted by the East India Company, under the supervision of a Government Board of Control, whose President was responsible for Indian affairs in Parliament. On the transfer of India to the Crown in 1858 a Secretary of State, assisted by a Council, was entrusted with the administrative duties formerly discharged by the Company and Board.

INDUSTRIAL ASSURANCE COMMISSIONERS

(*see* Friendly Societies Registry).

§BOARD OF INLAND REVENUE,

Somerset House, W.C. 2.

The appointment of Commissioners of Stamps dates from 1694 and of Commissioners of Taxes from 1729. By 4 and 5 Will. IV. c. 60, a consolidated Board of Stamps and Taxes was established, and by 12 and 13 Vict. c. 1 this Board was amalgamated with the Commissioners of Excise to form the Board of Inland Revenue. By 8 Edw. VII., c. 16 the administration of Excise was transferred to the Board of Customs. The present sources of "Inland Revenue" consist of Death Duties, Stamps and Taxes. Salaries and Expenses of the Board for 1931 are estimated at £6,723,080.

The Board.

Chairman, P. J. Grigg £3,000
Private Secretary, E. M. T. Firth.

§ H.M. LAND REGISTRY,
Lincoln's Inn Fields, W.C. 2; and 18 Portugal Street, W.C. 2.

H.M. Land Registry was established in pursuance of a recommendation of a Royal Commission by the Land Registry Act 1862. The aim of the Act was to render dealings with land more simple and economical by establishing a State register of landowners who voluntarily submitted the titles to their land for examination and approval by the Registrar on behalf of the State. The Registry was reformed by the Land Transfer Act 1875, which, while making many changes in the system, continued its voluntary basis. In 1897 the Land Transfer Act introduced the principle of compulsory registration, and four Orders in Council under that Act between 1898 and 1902 made the system compulsory on sale in the administrative county of London. By a further Order made in 1925 Registration was made compulsory on sale in Eastbourne, and under an order made in 1928 in Hastings. The Land Registration Act 1925 consolidated the previous Acts, and made such changes in the system as the experience of a generation had shown to be necessary. The keynote of the system is that the machinery for the purchase and sale of land is assimilated to that for Stocks and Shares. Absolute titles granted by the Land Registry are guaranteed by the State. Simple forms, analogous to those used on transfers of Stocks and Shares, are provided. The cost of buying, selling or mortgaging registered land is much less than the cost in the case of unregistered land. It is open to any County Council or Council of a County Borough to apply to the Privy Council for an order making registration of title compulsory in its area. The Land Registry is administered under the Lord Chancellor by the Chief Land Registrar, who also controls the Middlesex Deeds Registry and the Land Charges Department under the Land Charges Act 1925.

Office Hours:—Registration, 11 to 3; Searching and other business, 10 to 4. Saturdays closed at 1.

Registration of Title.
Chief Land Registrar, Sir John Stewart Stewart-Wallace, C.B. £1,750

Telephone: Victoria 5027.
Secretary: Air Vice-Marshal Sir David Munro, K.C.B., M.B.

MERSEY DOCKS AND HARBOUR BOARD,

Liverpool.

Nominee Members (appointed by the Minister of Transport), Robert S. Johnson, O.B.E.; Harold King; Charles McVey; Sir Max Muspratt, Bt.
Elective Members (elected by Dock Electors), Richard D. Holt (*Chairman*); J. G. B. Beazley, M.C., T.D.; Charles Booth; Sir Thomas A. L. Brocklebank, Bt.; E. G. Brownbill; Lt.-Col. Albert Buckley, D.S.O.; William M. Clarke; Ernest Cook; William S. Crichton; John W. Dart; Henry F. Fernie; Robert P. Fraser; Edmund Gardner; Walter Harding; A. C. F. Henderson; Robert L. Holt; Charles Livingston; Edward B. Orme; Hugh R. Rathbone, LL.D.; Thomas Rome; Hugh L. Roxburgh; J. A. Shone; John H. Tilman; H. Sutton Timmis.
General Manager and Secretary, L. A. P. Warner, C.B.E.

THE METEOROLOGICAL OFFICE.

The control is vested in a Director and Committee appointed by the Air Council. The *Gassiot Committee* of the Royal Society is an Advisory Committee for geophysical subjects. The work of the Office includes:—The collection and discussion of meteorological observations from oceans and land areas all over the world; the maintenance of a number of stations for daily telegraphic reports upon which gale warnings and forecasts are based; the maintenance of observatories for the study of weather, with which are associated other geophysical subjects; and the maintenance of stations in various parts of the country for the supply of meteorological information and other requirements of aircraft. The responsibility for the work of the *British Rainfall Organisation* was transferred to the Meteorological Office in July, 1919.

Chairman of Meteorological Committee, The Under Secretary of State for Air.
Director of Meteorological Office, G. C. Simpson, C.B., D.Sc., F.R.S. ..... £1,200 to £1,500
Assistant Directors, R. G. K. Lempfert, C.B.E., M.A., F.Inst.P.; Lt.-Col. E. Gold, D.S.O., F.R.S.; F. J. W. Whipple, M.A., Sc.D. F.Inst.P.

§ *For Salaries see note, p.* 196.

Superintendents, E. G. Bilham, B.Sc. (*British Climatology and British Rainfall Organization*); Capt. L. A. Brooke Smith, R.D., R.N.R. (*retd.*) (*Marine*); C. E. P. Brooks, D.Sc. (*General Climatology*); D. Brunt, M.A. (*Army*); R. Corless, O.B.E., M.A. (*Forecast*); J. S. Dines, M.A. (*Instruments*); Capt. F. Entwistle, R.Sc. (*Aviation*); Com. L. G. Garbett, R.N. (*retd.*) (*Navy*); Maj. A. H. R. Goldie, M.A. (*Scotland*).

Chief Clerk, H. L. B. Tarrant, M.B.E.

Superintendents of Observatories.

Central (*Kew*), F. J. W. Whipple, M.A.

Magnetic (*Eskdalemuir*), Maj. A. H. R. Goldie, M.A.

Western (*Valencia, Co. Kerry*), M. T. Spence, B.Sc.

METROPOLITAN WATER BOARD,

173 Rosebery Avenue, E.C. 1.

The Board serves an area of 573 sq. miles. The charges are levied on net annual value at such rate, not exceeding 8½ per cent., as the Board may fix. The net water rental for 1930-31 was £5,078,000 (approx.). The Capital Debt on March 31, 1931, amounted to £54,789,434, the interest paid being £1,810,146. The estimated population supplied was 7,675,459, the number of services being 1,268,198. The annual supply was 101,471,174,000 gallons (representing 453,000,000 tons), a daily average of 278 million gallons. One of the sources of supply is the *New River Company's undertaking*, inaugurated in the reign of James I. (1609) by Sir Hugh Myddelton, to bring water from Amwell and Chadwell, Herts. to London.

Chairman of the Metropolitan Water Board, Sir W. Prescott, C.B.E., D.L. ..... (*unp.*)

Vice-Chairman, R. W. James, J.P., A.M.Inst.C.E. (*unp.*)

Clerk of the Board and Parliamentary Officer, G. F. Stringer, Barrister-at-Law £2,000

Chief Engineer, Henry E. Stilgoe, M.Inst.C.E. £3,500

Accountant & Registrar of Debentures, G. M. Jennings, F.I.M.T.A. £2,000

Director of Water Examination, Sir Alexander Houston, K.B.E., C.V.O., D.Sc., F.R.S. £2,250

Solicitor, H. A. D. Collins £1,250

Surveyor, Harold Oxley, F.S.I. £1,300

§THE ROYAL MINT, Tower Hill, E. 1.

Admission by order only, application for which should be made to the Deputy Master of the Mint, about 4 weeks in advance of intended visit. Hours of admission, 10 to 3 Mon. to Fri.

The Royal Mint, as now constituted, may be said to date from 1817, and the buildings from 1810, the latter being completed in that year at the cost of over £250,000. The first known Master (or Warden) of the Mint dates from Henry I., and the last Warden was Lord Maryborough (1814-23), the last Master being Professor Thomas Graham, who died in 1869. In 1870 the Coinage Act abolished the ancient post of Master of the Mint as such, and combined it with that of the Chancellor of the Exchequer. The estimated administrative expenses amount to £2,725,000 for 1931-1932. Appropriations in aid, £2,525,000, leaving a net cost of £200,000.

Master and Worker, The Chancellor of the Exchequer.

Deputy Master and Comptroller, and Engraver of H.M. Seals, Col. Sir Robert A. Johnson, K.B.E. £1,500

Chief Clerk, W. Perry, M.B.E. ..... £550 to £700

Superintendent, Operative Department, H. W. L. Evans, O.B.E. ..... £900 to £1,000

Deputy do., H. D. McCay ..... £700 to £800

Chief Assayer, S. W. Smith, D.Sc. ..... £700 to £900

Curator and Librarian, C. F. Barrett ... £400 to £500

Branches of the Royal Mint.

Melbourne, Victoria.

Deputy Master, W. M. Robins, B.A. £1,100

Perth, Western Australia.

Deputy Master, H. A. Corbet £1,100

Ottawa, Canada

Deputy Master, J. H. Campbell, I.S.O. £1,000 to £1,200

Engineer, H. E. Ewart ..... £600 to £700

Pretoria, South Africa.

Deputy Master, R. G. J. Pearson £1,200

Superintendent, J. T. Becklake ..... £820 to £940

THE BRITISH MUSEUM.

Bloomsbury, W.C. 1.

Open free daily 10 a.m. to 6 p.m.; Sundays 2 p.m. to 6 p.m. *Lecture-tours* on weekdays at 12 noon and 3 p.m. *Reading-room* open daily to readers, from 9 a.m. to 6 p.m. throughout the year, except Good Friday and Christmas Day, and Sundays. Closed for *cleaning first six* weekdays in May. Tickets of admission to the reading-room, for purposes of research and reference which cannot be carried on elsewhere, are granted on written application beforehand to the Director. The applicant must state abode, business or profession and full particulars of purpose, and must send a recommendation from a person of recognised position.

The British Museum may be said to date from 1753, when Parliament *granted the sum of £20,000 to purchase* the collection of books &c., of Sir Hans Sloane, the building (Montagu House) being opened in 1759. The present buildings were erected between 1823 and 1914, and the original collection has increased to its present dimensions by gifts and purchases, and by the operation of the Copyright Acts. Fine collections of ancient sculpture, &c. Exhibition of specimens of early printed books, bindings, manuscripts, autograph letters, and prints and drawings; of Egyptian, Assyrian, Greek, Roman, Etruscan, Cyprian, British and mediæval and other antiquities; coins, gold ornaments, gems, china, glass, ethnographical objects; monuments of Indian religions, &c. The administrative expenses of the British Museum were estimated at £297,263 (including Natural History Museum) in 1930-31, and were met by a vote under "Education, Science, and Art," Class IV. of the Civil Estimates.

Standing Committee.

The Three Principal Trustees, The Archbishop of Canterbury; The Lord High Chancellor; The Speaker of the House of Commons—*ex-officio*; *Appointed by the Sovereign*, The Earl of Harewood, K.G., D.S.O., LL.D.; *Other Trustees*, H.R.H. the Prince of Wales, K.G., K.T.; Earl of Crawford and Balcarres, K.T.; Earl of Ilchester, O.B.E.; Viscount Grey of Fallodon, K.G.; Lord Rothschild, F.R.S.; Lord Chalmers, G.C.B., LL.D.; Lord Hanworth, K.B.E.; Rt. Hon. H. A. L. Fisher, LL.D.; Lt.-Col. Sir D. Prain, C.M.G., C.I.E., F.R.S.; Sir Henry A. Miers, D.Sc., LL.D., F.R.S.; Sir Frederick G. Hopkins, P.R.S.; Prof. G. M. Trevelyan, O.M., C.B.E., F.B.A., D.C.L.; Sir C. R. Peers, C.B.E., P.S.A.; Prof. G. A. Murray, D.Litt.; M. R. James, O.M., Litt.D.; F. Cavendish Bentinck; J. Stanley Gardiner, F.R.S.

Officers.

§ THE LONDON MUSEUM.

Lancaster House, St. James's, S.W. 1.

Admission on Tuesdays, 1s.; Wednesdays and Thursdays, 6d.; other days free; closed for cleaning on Friday till 2 p.m. Hours:—April 1 till Oct. 31, 10 a.m. till 6 p.m. (Sundays 2 to 6 p.m.); Nov. 1 to March 31, 10 a.m. to 4 p.m. (Sundays 2 to 4 p.m.).

The London Museum was instituted, on the lines of the Carnavalet at Paris, for the conservation of antiquities and other objects associated with the history of London. The Collection was originally housed in Kensington Palace, and was reopened in 1914 at Lancaster House.

Keeper, Secretary and Accounting Officer, Dr. R. E. Mortimer Wheeler, M.C., M.A., F.S.A. £900

Asst. Keeper and Librarian, Hon. Maurice Brett, M.V.O. £330

§ THE BRITISH MUSEUM (NATURAL HISTORY).

Cromwell Road, S.W. 7.

Open free on week-days (except Good Friday and Christmas Day) 10 to 6, and on Sundays from 2.30 to 6.

An Official Guide-lecturer conducts visitors round some portion of the collections at 12 noon and at 3 p.m. daily (except Sundays) free of charge, and his services are available at other times for special parties (also free of charge) by arrangement with the Director. Students are admitted daily for the special study of the collections, and to make drawings and take photographs of specimens, under special regulations to be obtained from the Director. The Museum issues a large variety of publications, comprising scientific monographs and catalogues, the "Natural History Magazine" (quarterly), popular guide-books and manuals, instructions for collectors, economic pamphlets, and picture post-cards, both monochrome and in colour.

The Natural History Collections in the British Museum were removed to South Kensington and rearranged there in 1881–85, the new museum being opened to the public in 1881. The collections comprise all branches of natural history. A morphological series in the central hall; a collection of domesticated animals; a series of insects illustrating economic zoology; galleries of mammals, including whales; birds and their nests; fishes; reptiles; insects; shells; corals; sponges, &c.; galleries of fossils of all kinds; a botanical gallery; and an extensive gallery of minerals, rocks, and meteorites, with series of specimens forming introductions to their study. The administrative expenses were estimated at £103,771 in 1931–32.

Director, C. Tate Regan, M.A., D.SC., F.R.S. £1,200 to £1,500

Secretary, G. F. Herbert Smith, M.A., D.SC. £900

Accountant, T. Wooddisse ..... £500 to £600

Clerks, Higher Grade, A. C. Wray; C. A. Wray (*Index Museum*); R. J. Drumm ..... £300 to £400

Assistant Keeper (Library), A. C. Townsend, M.A. £250 to £440

Keeper of Zoology, W. T. Calman, D.SC., F.R.S. ... £1,000

Deputy Keepers, M. A. C. Hinton; G. C. Robson, M.A. £900

Assistant Keepers (First Class), W. P. Pycraft; J. G. Dollman, B.A.; P. R. Lowe, O.B.E., M.B.; N. B. Kinnear; H. A. Baylis, D.SC.; A. K. Totton, M.C.; J. R. Norman; C. C. A. Monro, M.A.; H. W. Parker, B.A. ..... £475 to £800

Assistants Keepers (Second Class), M. Burton, M.SC., £250 to £440; Miss A. B. Hastings, PH.D.; Miss S. Finnegan, PH.D.; Miss I. Gordon, D.SC., PH.D. £230 to £390

Clerk, Higher Grade, G. A. Smith ..... £300 to £400

Keeper of Entomology, Maj. E. E. Austen, D.S.O. £1,000

Deputy Keepers, G. J. Arrow; N. D. Riley £900

Assistant Keepers (First Class), K. G. Blair, B.SC.; F. W. Edwards, SC.D.; F. Laing, B.SC.; W. H. T. Tams; W. E. China, B.A.; H. Scott, SC.D. £475 to £800

Assistant Keepers (Second Class), R. B. Benson, M.A.; A. W. McKenny Hughes, £250 to £440; Miss D. Aubertin, M.SC. ..... £230 to £390

Keeper of Geology, W. D. Lang, SC.D., F.R.S. £1,000

Deputy Keeper, W. N. Edwards, B.A. £900

Assistant Keepers (First Class) T. H. Withers; L. R. Cox, B.A. ..... £475 to £800

Assistant Keepers (Second Class), E. I. White, PH.D.; A. T. Hopwood, M.SC.; W. E. Swinton, B.SC.; H. D. Thomas, PH.D; L. Bairstow, B.A. ..... £250 to £440

Technical Assistant (Higher Grade), F. O. Barlow £300 to £400

Deputy Keeper, A. J. Wilmott, B.A. £900

Assistant Keepers (Second Class), A. W. Exell, M.A.; G. Tandy, B.A.; J. E. Dandy, M.A.; G. Taylor, B.SC.; A. H. G. Alston, B.A. ..... £250 to £440

Clerk, Higher Grade, J. Ladbrook ..... £300 to £400

§ THE SCIENCE MUSEUM.

South Kensington, S.W. 7.

Open daily, except Good Friday and Christmas Day, 10 to 6; Sunday, 2.30 to 6. Admission

§ *For Salaries see note, p.* 196.

free. *Science Museum Library*, Imperial Institute Road, S.W.7. Attached to the Science Museum: The National Library especially devoted to pure and applied Science. 217,000 volumes, 10,700 periodicals, a set of British patent specifications. Subject-matter index to articles in periodicals, 1,800,000 cards.—Open on weekdays, 10 to 5.50. Admission free. Books lent to Government Departments, Universities and approved Research Institutions.

The Science Museum was instituted in 1853 under the Science and Art Department as a part of the South Kensington Museum, and opened in 1857; to it was added in 1883 the Collections of the Patent Museum. In 1909 the administration of the Science Collections was separated from that of the Art Collections, which were transferred to the Victoria and Albert Museum. The Collections in the Science Museum illustrate the application of science to industry and the development of scientific and industrial instruments, apparatus and machinery.

The divisions are: *(a)* Industrial Engineering; *(b)* Mechanical Engineering, Land Transport and Construction; *(c)* Water Transport and Air Transport; *(d)* Science and Scientific Instruments.

Director and Secretary, Col. Sir Henry G. Lyons, D.SC., F.R.S. £1,200
Staff Clerk, S. T. Kelly ..... £400 to £500

Industrial Machinery Division.

Deputy Keeper, A. J. Spencer, M.I.MECH.E. £900
Assistant Keeper (First Class), F. St. A. Hartley, A.C.G.I. (*Secretary to Advisory Council*) £400 to £600
Assistant Keepers (Second Class), T. C. Crawhall, M.SC.; W. T. O'Dea, B.SC. ..... £250 to £400

Engineering Division.

Keeper, E. A. Forward, A.R.C.I., M.I.MECH.E. £900
Assistant Keepers (First Class), G. F. Westcott, B.A.; F. G. Skinner, B.SC. ..... £400 to £600
Assistant Keeper (Second Class), A. Stowers, B.SC., A.M.I.STR.C.E. ..... £250 to £400

Water and Air Transport Division.

Keeper, G. L. Overton, A.R.C.S. £1,000
Assistant Keeper (First Class), M. J. B. Davy, A.F.R.AE.S. ..... £400 to £600
Assistant Keepers (Second Class), G. S. Laird Clowes, M.A. ..... £250 to £400

Science Division I.

(Astronomy, Optical Instruments, Mathematics, Chemistry, &c.).

Deputy Keeper, D. Baxandall, A.R.C.S. £900
Assistant Keeper (First Class), A. Barclay, A.R.C.S., A.I.C. ..... £400 to £600
Assistant Keeper (Second Class), W.E. Pretty, B.SC. ..... £250 to £400

Science Division II.

(Physics and Geographists).

Deputy Keeper, H. Shaw, D.SC. ..... £600 to £700
Assistant Keepers (Second Class), W. G. Plummer, PH.D.; F. A. B. Ward, PH.D. ..... £250 to £400

Library.

Keeper, S. C. Bradford, D.SC. £1,000
Assistant Keeper (First Class), E. Lancaster-Jones, B.A. ..... £400 to £600
Assistant Keepers (Second Class), H. T. Pledge, B.A.; H. P. Spratt, B.SC. ..... £250 to £400

§THE VICTORIA AND ALBERT MUSEUM.

South Kensington, S.W. 7.

Open on weekdays from 10 a.m. to 6 p.m. except Good Friday and Christmas Day. Admission free. Persons desiring the use of the Library must apply for a ticket. The Indian Section, containing collections illustrating the arts and industries of the Indian Empire, is situated in the Imperial Institute Road; open free every day, same hours as above. On Sundays the Indian Section and all other Departments of the Museum, with the exception of the Library and the Circulation Department, are open from 2.30 p.m. till 6 p.m. Casts of various objects in the Museum, and also from Sculptures in the British Museum, can be obtained to order on application to the Department for the Supply of Casts.

The history of the Museum may be said to begin in 1852, when the Museum of Ornamental Art was founded at Marlborough House. The collection consisted of certain objects which had been purchased at the 1851 Exhibition, "on account of the excellence of their art and workmanship," at a cost of £5,300, together with other specimens purchased for the use of the various Schools of Design since 1837, and dispersed among them. Additions have since been made by purchase, gift, and bequest. The Museum contains nine departments, viz.:—Architecture and Sculpture; Ceramics; Engraving, Illustration and Design; Metal-work; Paintings; Woodwork; Textiles; Library (books on art) and Book Production; and the Department of Circulation. The older parts of the building were erected between 1850 and 1864; the new buildings were completed in 1909. The administrative expenses were estimated at £130,944 in 1931-32, and were met by a vote under Education, Science, and Art. The branch museum at Bethnal Green (administrative expenses 1931-32, £6,026) was opened in 1872. The buildings were removed from South Kensington, and re-erected on land purchased for the purpose locally.

Director and Secretary, E. R. D. Maclagan, C.B.E., F.S.A ..... £1,200 to £1,500

SECRETARIAT.

Museum Superintendent, A. V. Fullerton £500 to £600
Staff Clerk, C. E. Fish ..... £400 to £500

DEPARTMENT OF ARCHITECTURE AND SCULPTURE.

Assistant Keeper (First Class), A. K. Sabin £475 to £800

§ *For Salaries see note, p.* 196.

§IMPERIAL WAR MUSEUM.

Imperial Institute Road, S. Kensington, S.W. 7.
Open free daily (except Good Friday and Christmas Day), 10 a.m. to 6 p.m.; Sundays 2.30 p.m. to 6 p.m.

The formation of a collection connected with the War, was approved by the War Cabinet on March 5, 1917. The Imperial War Museum Act received the Royal Assent on July 2, 1920, and a Board of Trustees was appointed. The Museum was opened by H.M. the King on June 9, 1920, at the Crystal Palace. The tenancy of the Crystal Palace having expired on March 31, 1924, the Museum was removed to the galleries known as the Western Galleries in the Imperial Institute Road. The aeronautical collection was transferred to the Science Museum on loan. *The Museum* was re-opened to the public on Nov. 11, 1924. The collection includes Naval and Military trophies and relics, ordnance, small arms and ammunition, ship and other models, works of art, photographs (comprising over 250,000 subjects, prints of which may be purchased) and a reference library containing 60,000 books and pamphlets available for study to the public. The reference sections are not open on Saturday afternoon or Sunday. All the attendants are men who served during the Great War.

Curator and Sec., Charles John Moulkes, O.B.E., F.S.A.

§NATIONAL GALLERY,

Trafalgar Square, W.C. 2.

Open 10–4, 5 or 6, according to season. Paying days (6*d.*), Thursday and Friday. Open free other days; Sunday, from 2 to 4, 5 or 6. Closed on Good Friday, Christmas Eve, and Christmas Day.

The National Gallery is the result of a Parliamentary grant of £60,000 in 1824 for the purchase and Exhibition of the Angerstein collection of pictures, the present building being opened in 1838 and enlarged in 1865, 1876, 1887, 1911, 1928 and 1930. The cost of administration of the National Galleries (Trafalgar Square and Millbank) in 1931–32 was estimated at £32,680.

Director, A. M. Daniel £1,100
Keeper and Secretary, C. H. Collins Baker £900
Assistants, H. I. Kay; E. K. Waterhouse £250 to £600
Higher Clerical Officer, F. G. Thompkins £300 to £400

§NATIONAL GALLERY, MILLBANK.

(The Tate Gallery), Millbank, S.W. 1.

Students' days, Tuesday and Wednesday, 6*d.*; other days free. For hours and Sundays *see* National Gallery.

The National Gallery, Millbank, better known as "The Tate Gallery," was opened in 1897 on the site of Millbank Gaol, the cost of erection (£80,000) being borne by Sir Henry Tate, who also contributed the nucleus of the present collection. The "Turner Wing," built at the expense of the late Sir Joseph Duveen, Senr., was opened to the public in 1910. The Gallery now includes a gallery for Modern Foreign Art and a gallery for Sargent's works, opened in 1926, the gift of Sir Joseph Duveen.

Director, James B. Manson £1,000
Asst. Keeper, H. S. Ede ..... £250 to £600
Assistant, D. C. Fincham ..... £250 to £600

§NATIONAL PORTRAIT GALLERY.

St. Martin's Place, Charing Cross, W.C. 2.

Open free on Monday, Tuesday, Wednesday and Saturday from 10 to 4, 5, or 6, according to season; free on Sunday, 2.30 to 5.30 (2 to 4 in winter); Thursday and Friday (Students' days) admission 6*d.* from 10 to 4 or 5.

The first grant to the institution was made in 1856; the collections being successively housed in Great George Street, Westminster, in South Kensington, and in Bethnal Green. The present building was opened in 1896, £80,000 being contributed to its cost by Mr. W. H. Alexander; an extension is now being erected at the expense of Sir Joseph Duveen, Bt. The amount for salaries and expenses, including a grant of £1,242 for purchase of portraits, was estimated at £9,098 in 1930–31.

Director, Keeper, and Secretary, H. M. Hake £900
Assistant to Director, C. K. Adams .... £250 to £600
Assistant and Lecturer, J. Steegmann ... £250 to £600

§WALLACE COLLECTION,

Hertford House, Manchester Square, W. 1.

Keeper, Dr. Walter E. Collinge, F.S.A.

§ NATIONAL DEBT OFFICE,
19 Old Jewry, E.C. 2.

The National Debt Commissioners were appointed under 26 Geo. III., c. 31 (1786), by which a permanent Sinking Fund was to be established, and a sum of £250,000 issued quarterly to be applied towards the reduction of the National Debt, being commonly spoken of as "Mr. Pitt's Sinking Fund." In 1829 this was superseded by appropriating the surplus income of the year as the Sinking Fund, and this was commonly known as "The Old Sinking Fund." In 1875 "The New Sinking Fund" was set up by Sir Stafford Northcote, and in 1923 another "New" Sinking Fund was set up by Mr. Baldwin. These, with other funds detailed on p. 564, now mainly operate in reducing the Debt. The Commissioners are at the present time the Speaker, the Chancellor of the Exchequer, the Master of the Rolls, the Lord Chief Justice, the Accountant-General of the Supreme Court, and the Governor and Deputy-Governor of the Bank of England. The net administrative expenses of the Board were estimated at £3,599 in 1931–32.

Comptroller-General, Maurice Francis Headlam, C.B., C.M.G. £1,500
Private Secretary, R. W. Illing £100
Assist. Comptroller, H. Weatherill, C.B.E., F.I.A. £800 to £1,000
Actuary, H. Weatherill, C.B.E., F.I.A. £250
Chief Clerk, E. S. Jones, O.B.E., I.S.O., F.I.A. £100
Principal Clerks, E. S. Jones, O.B.E., I.S.O., F.I.A.; E. W. Kitson, A.I.A.; C. B. Hobbins ... £550 to £700
Assistant do., G Rackham, B.A.; H. R. Powell; A. Mackenzie; G. T. Milne, A.I.A.; O. J. Phillips, F.I.A.; C. P. Southern; *B. B. Fels (acting)*..... £400 to £500
Brokers, Messrs. Mullens, Marshall, Steer, Lawford & Co. £2,500

§ NATIONAL INSURANCE AUDIT DEPT.
Head Office, 17 North Audley Street, W. 1.

By the National Health Insurance Acts, 1924-1926, it is provided that the accounts of Approved Societies and Branches, and Insurance Committees shall be submitted to audit by auditors appointed by the Treasury. This Department was created by the Treasury Minute of August 6, 1912.

Chief Auditor & Secretary, W. A. Middleton, O.B.E. £1,200
Chief Inspector of Audit, W. G. Twort, I.S.O. £900
Establishment and Accounts Officer, R. McCormack £500 to £600
Inspectors of Audit, (5); *Senior Auditors*, (13), *Auditors*, (24); *Senior Assistant Auditors*, (27).

§ H.M. NAUTICAL ALMANAC OFFICE,
Royal Naval College, Greenwich, S.E. 10.

The "Nautical Almanac" was first published for 1767, by the Board of Longitude. The office is now under the control of H.M. Board of Admiralty.

Superintendent, L. J. Comrie, Ph.D., F.R.A.S. £500 to £700

§ OBSERVATORIES.
Royal Observatory, Greenwich.

The Royal Observatory was founded by Charles II. in 1675, the building, designed by Moore and Wren, being opened in 1676. The administrative expenses of the Observatory are estimated at about £2,000 annually.

Astronomer Royal, Sir F.W. Dyson, K.B.E., LL.D., F.R.S. £1,000 to £1,200
Chief Assistants, J. Jackson, M.A., D.SC., F.R.A.S.; W. M. H. Greaves, M.A., F.R.A.S. ..... £500 to £700
Assistants, C. Davidson, F.R.S.; W. Bowyer, F.R.A.S.; H. Furner, F.R.A.S.; W. M. Witchell, B.SC., F.R.A.S. (*Magnetic and Meteorological*) ..... £200 to £600
Junior do. (*Higher Grade*), P. J. Melotte, F.R.A.S.; W. Stevens, F.R.A.S.; R. T. Cullen, F.R.A.S.; H. W. Acton, F.R.A.S. ..... £300 to £400
Clerical Assistant, D. J. R. Edney, F.R.A.S. £300 to £400

Royal Observatory.
Blackford Hill, Edinburgh.—£1,657.
Astronomer Royal for Scotland, R. A. Sampson, D.SC., F.R.S. £400
First Asst. Astronomer, J. Storey, F.R.A.S. £350 to £450
Asst. Astronomers, R. W. Wrigley, M.A.; E. A. Baker, B.SC. ..... £200 to £350

Royal Observatory, Cape of Good Hope.
Astronomer, Harold Spencer Jones, M.A., SC.D., F.R.S. £967 to £1,067
Chief Assist., Herbert Horrocks, M.A., F.R.A.S. £667 to £867
Assistants, R. W. Cheesman; A. J. Wilkin; J. W. Jackson ..... £325 to £725

§ DEPARTMENT OF OVERSEAS TRADE.
(Under the joint control of the Foreign Office and the Board of Trade).

35 Old Queen Street, S.W. 1. (Victoria 9040.)
City Branch Office, 73 Basinghall Street, E.C. 2. (Metropolitan 4713.)

For H.M. Trade Commissioners, *see* p. 99.
For Commercial Diplomatic Officers, *see* pp. 785 to 877 (Complete Edition).

This Department was formed during the autumn of 1917 as a joint Department under the Foreign Office and

Board of Trade, and is represented in Parliament by a Parliamentary Secretary, who occupies the position both of Additional Parliamentary Under-Secretary of State for Foreign Affairs and of Additional Parliamentary Secretary for the Board of Trade. The Department is concerned mainly with the promotion and development of Overseas Trade, and comprises the former Department of Commercial Intelligence of the Board of Trade and a part of the Foreign Trade Department of the Foreign Office. It has, in addition, taken over certain functions formerly performed by the Foreign Office in connexion with Commercial Intelligence and with the Commercial Diplomatic and Consular Services. The cost of administration was estimated at £424,507 in 1931-32.

Secretary, Maj. D. J. Colville, M.P. £2,000
Private Secretaries, E. L. Mercier; Miss A. H. M. Kilroy.

Comptroller-General, Sir R. T. F. Crowe, K.C.M.G. .. £1,800
Private Secretary, R. H. Owen.

Deputy Comptroller-General, E. R. Eddison, C.B., C.M.G. ..... £1,200 to £1,500

Directors, J. Picton Bagge, C.M.G. (*Foreign Divn.*); J. A. P. Edgcumbe, C.M.G., C.B.E. (*Empire and General Divn.*); G. I. H. Lloyd (*Trades & Economic Divn.*); E. C. Donaldson Rawlins, C.B.E. (*Exhibitions & Fairs Divn.*) ..... £1,000 to £1,200

Assistant Directors, P. C. Rice, O.B.E., I.S.O. (*Chief Finance and Chief Establishment Officer*); R. E. R. C. Erinsley-Richards, O.B.E.; M. W. Donald, O.B.E.; H. W. Wiswould; Hon. C. C. Farrer, O.B.E.; G. F. Braddock, O.B.E.; E. H. Bliss; A. R. Fraser, M.B.E.; C. E. G. House, M.B.E.; A. Mullins, C.B.E.; A. G. Cruter, M.B.E. (*acting*); C. M. Jones (*acting*); C. Taylor, O.B.E. ..... £700 to £900

Senior Intelligence Officers, A. C. Cruttenden (*Head of City Branch Office*); L. N. Barker; J. S. Andrews; G. W. Betts; W. C. Scott; *L. A. de L. Meredith*, O.B.E. (*Travel Assoc., Great Britain and Ireland*); J. J. Holloway; A. B. Marchant; S. A. Deacon; W. H. Evans; H. E. Gibbs; *J. A. Stirling*, O.B.E. (*Exports Credit Guarantee Depart.*); E. S. A. Baynes; C. H. Davies, M.B.E., M.C.; J. W. Golsby; G. H. Meadmore; R. C. E. Milne; C. F. Monier-Williams; C. M. Pickthall (*acting*); T. L. Relton, M.B.E. (*acting*) ..... £550 to £700

Senior Executive Officers, J. N. Goad; A. A. Longden, D.S.O., O.B.E.; J. H. Jones (*Finance Officer and Accountant*); J. L. Butler (*acting*); S. J. Graham (*acting*) ..... £550 to £700

Intelligence Officers, D. F. Blyther; E. P. J. Briggs; F. Biggs; W. J. Paddon; S. Robson; W. G. Bruzaud; J. F. P. Fielding; R. G. Mercer; G. C. Hatton; F. W. Rogers; A. I. Schué; H. A. Treganowan; A. C. Stewart; C. H. Reeve; T. C. Walton (£400 to £600 personal); (*the foregoing hold the personal title of First Class Intelligence Officer*); E. Warren; D. F. Crawford; J. A. Dormann; E. Adams; G. H. Kelly; W. Hall; F. J. Darbyshire; C. S. Toseland; A. L. Willis; H. C. Grange; W. M. Hill; D. H. Lyal; J. C. Pittman; O. Clark; A. G. C. Deuber; E. L. F. Clough-Taylor; T. R. Ritchie; J. Mandefield; J. McE. Martin; *H. A. Jones*, M.C. (*Committee of Imperial Defence*); C. F. F. Fagan; A. C. Pomroy; W. Harris; F. J. Gick; E. W. Webster-Jones; R. E. J. Moore, M.B.E.; H. B. Webber; E. L. Mercier; G. H. Jeans; Miss M. L. Edwards; R. H. Owen; E. J. Gaines; W. R. Over; J. Balcon; J. B. Dixon (*acting*); E. J. Holford-Strevens (*acting*); Miss M. W. Ehrenfest (*acting*); R. C. Stewart; J. Shearer £250 to £500 (*Men*); £220 to £400 (*Women*)

Intelligence Officers (Cadet), M. M. du Merton; A. R. Bruce ..... £150 to £300

Higher Executive Officers, G. F. Rivers; J. Ridler (*Deputy Finance Officer*); Miss F. M. Wood, M.B.E.

IMPERIAL INSTITUTE, South Kensington, S.W. 7.

The Imperial Institute was erected as a memorial of the Jubilee of Queen Victoria (1837-1887). The principal departments of the Institute are:—(1) Permanent Empire Exhibition. The Exhibition Galleries are open to the public free from 10 a.m. to 5 p.m. (Sundays 2.30 p.m. to 6 p.m.). After a complete reorganisation of the exhibits and their disposition in the various Courts, the collections illustrate the products and also the scenery and life of the different countries of the British Empire. There is a Central Stand for distribution of literature and for dealing with enquiries. Lecture demonstrations are given to parties from the schools and to members of the public at stated times. A Cinema has been installed in which films are shown daily free, depicting the life, sports and industries of the countries of the British Empire. (2) Plant and Animal Products Department. This department deals with all investigations and enquiries relating to Foodstuffs, Oil-seeds, Essential Oils, Rubber, Fibres, Tobacco, Timbers, Gums and Resins, and such-like products. An Advisory Council has been appointed, and technical advisory committees, including representatives of the trades or industries concerned, co-operate in the work on Rubber, Timber, Silk, Vegetable Fibres, Animal Fibres, Tanning Materials, Hides and Skins, Essential Oils and Resins, and Oils and Oil-seeds. (3) Mineral Resources Department. This department is responsible for dealing with all enquiries and investigations of a mineral nature. An Advisory Council on Minerals has been appointed and there are 15 advisory technical committees, each dealing with a special group of minerals and metals.

BOARD OF GOVERNORS.

President, The Parliamentary Secretary, Department of Overseas Trade.

Vice-President, Sir E. T. F. Crowe, K.C.M.G. (*Comptroller-General, Department of Overseas Trade*).

Secretary, Captain F. B. H. Drummond, M.C.

The Board of Governors is assisted by a Managing Committee and a Laboratory Committee, as well as by the Advisory Councils and Technical Committees.

PRINCIPAL OFFICERS.

Director, Lt.-Gen. Sir W. T. Furse, K.C.B., D.S.O.

Secretary, Captain F. H. B. Drummond, M.C.

Plant and Animal Products Department, H. Brown, O.B.E., (*Principal*); E. Goulding, D.SC. (*Vice-Principal*); S. E. Chandler, D.SC. (*Chief Assistant*); J. R. Furlong, PH.D. (*Superintendent Laboratories*).

Mineral Resources Department, T. Crook, A.R.S.C., F.G.S. (*Principal*); S. J. Johnstone, B.SC., F.I.C. (*Vice-Principal*); W. O. R. Wynn, F.I.C. (*Superintendent Laboratories*).

Exhibition Galleries, H. Spooner (*Curator*).

§PATENT OFFICE

(and Industrial Property Department, Board of Trade), 25 Southampton Buildings, W.C. 2.

The prerogative of the Crown to grant monopolies was limited by 21 James I. c. 3 to the grant of Letters Patent for New Inventions, and the control of such grants was transferred to the Board of Trade by 46 & 47 Vict. c. 57. The duties of the Department, which deals mainly with the granting of patents, the registration of designs and trade marks, and with questions relating to literary and artistic copyright, are performed by a Comptroller-General with a staff of officials. ‖For the year 1930 the expenditure was £441,930, and the revenue from fees, &c., was £596,475.

Comptroller-General, Sir William S. Jarratt ... £1,500

Private Secretary, H. W. Clarke.

Clerk of the Register of Textile Designs (Manchester Branch), H. J. E. Easton, M.B.E. .....£300 to £450

§PAYMASTER GENERAL'S OFFICE.

Whitehall, S.W. 1.

The Paymaster General's Office was formed by the consolidation in 1835 of various separate pay departments then existing, some of which dated back at least to the Restoration of 1660. Other offices were incorporated in 1848. Its function is that of paying agent for the different Government Departments, other than the Revenue Departments. The majority of its payments are made through banks (to whose accounts the necessary transfers are made at the Bank of England), but cash payments are also made, and the payment of pensions is an important feature of its work. The Establishment expenses were estimated at £88,000 in 1931-32.

Paymaster General (see p. 169).....*unp.*

Assistant Paymaster General, Roland Wilkins, C.B. £1,500

Private Sec., E. G. Harwood.

PORT OF LONDON AUTHORITY.

Head Office, London, E.C. 3.

The Port of London Authority, established under the Port of London Act, 1908 (8 Edw. VII., ch. 68), on the 31st March, 1909, for the purpose of administering, preserving, and improving the Port of London, consists of 29 members—10 appointed and 18 elected, with a Chairman appointed by the Authority.

The following undertakings were transferred to the Port Authority as from the 31st March, 1909:—Thames Conservancy (all rights, powers, and duties of the Conservators of the Thames in respect of the river below Teddington); London and India Docks Company; Surrey Commercial Dock Company; Millwall Dock Company; and Watermen's Company, except certain property and funds. The working of the Port for the year ended March 31, 1931, showed a deficit of £39,731, leaving a balance of £480,901 carried forward.

Chairman, Rt. Hon. Lord Ritchie of Dundee.
Vice-Chairman, C. F. Leach.

APPOINTED MEMBERS.

By the Admiralty, Adm. Sir F. C. Learmouth, K.B.E., C.B.; (*Ministry of Transport*) J. D. Gilbert, D.L., J.P.; J. T. Scoulding, J.P.; (*Corporation of London*) Sir Francis Agar, Adm. Sir W. E. Goodenough, G.C.B., M.V.O.; (*L.C.C.*) Sir Alfred Baker, J.P., W. Devenay, J.P., H. J. Greenwood, D.L., J.P., Vice-Adm. A. G. Hotham, K.C., C.M.G.; (*Trinity House*) Captain Owen Jones, C.B.E., R.D.

ELECTED MEMBERS.

Seventeen members are elected by payers of dues, wharfingers and owners of river craft, and one by wharfingers.

F. C. Allen; F. W. Bellamy; Capt. Sir I. H. Benn, Bt., C.B., D.S.O., T.D.; L. H. Bolton; Sir A. C. Corywright, Bt., J.P.; A. C. Davis, J.P.; C. S. S. Guthrie; C. W. Hodge; D. Jones, J.P.; C. F. Leach; E. Aubrey Lloyd; W. J. McAlister; A. Maclean; Sir C. C. McLeod, Bt.; O. H. Smith; Sir M. C. Turner; Rt. Hon. Thomas Wiles, P.C.; W. L. Wrightson.

Officers.

General Manager, Sir David J. Owen.
Solicitor and Secretary, J. D. Ritchie, M.C.

§POST OFFICE.

Chief Office, St. Martin's-le-Grand, E.C. 1.

A House of Commons report in 1844 states: "It is uncertain at what precise period the Crown undertook to be the regular carrier of letters for its subjects." The first "Master of the Posts" was appointed in 1516, but the duty was not then undertaken as a remunerative department of the Government. The Post Office is now one of the three great revenue-collecting departments, and while efficiently discharging its multifarious duties, shows a large annual profit. It also receives large sums for duties and taxes on behalf of the Inland Revenue Department, for certain licences for the Customs and Excise Department and the County Councils, and for National Insurance on behalf of the National Health Insurance Commissioners and the Board of Trade. The Post Office also pays Widows', Orphans' and Old Age Pensions, and Naval, Military and Air Force Pensions and Allowances. The Penny Post was inaugurated in 1840, the Book Post in 1855, the Post Office Savings Bank in 1861, the Post Office Telegraphs in 1870, the Money Order Office in 1792, Postal Orders in 1881, the Parcel Post in 1883, and the Telephone Service in 1892. The expenses of the Post Office (Salaries, Wages, etc., only) were estimated at £38,508,825 in 1930-31.

Postmaster-General, Rt. Hon. Sir Kingsley Wood, M.P.
£2,500

Private Secretary, B. Napier
Assistant Postmaster-General, H. Graham White, M.P.

Assist. Controller (*Postal*), R. Bryden ...£480 to £540
Assist. Controller (*Telegraph*), J. G. E. Hogg £480 to £540

§PRIVY COUNCIL OFFICE, Whitehall, S.W. 1.

The Privy Council is of very ancient origin. A Council, the number of which was about twelve, was instituted by Alfred, 895, and it discharged the functions of State now confined to members of the Cabinet. In the Middle Ages the Chief Advisers of the King who were permanently about him formed the Privy Council. Having become unwieldy, it was reconstituted in 1679. At present it consists of certain eminent persons whose names are given on pp. 134-5. Members of the Cabinet must be Privy Counsellors, and they principally form the acting Privy Council. *The Council is summoned* as such to act "with others" upon the demise of the Crown, and many matters are referred by the Sovereign to Committees of the Council, some of which are standing Committees, and others constituted to deal with particular cases, *e.g.*, the Judicial Committee, the Board of Trade, *q.v.* The Lord President of the Council is the Fifth Great Officer of State, and as such is always a prominent member of the Cabinet.

§ *For Salaries see note, p.* 196.

Lord President of the Council, Rt. Hon. Stanley Baldwin, M.P. £2,000
Private Sec., D. J. Wardley, M.C.

Secretary, C. T. Flower, F.S.A.....£600 to £900
Assistant Keepers (1st Class), J. V. Lyle; M. S. Giuseppi, I.S.O., F.S.A.; H. E. Headlam; J. B. W. Chapman; S. C. Ratcliff, I.S.O.; M.C.B. Dawes, F.S.A.; C. H. Jenkinson, F.S.A.; J. J. O'Reilly; R. L. Atkinson, M.C.; C. S. B. Buckland .....£600 to £900
Assistant Keepers (2nd Class), A. C. Wood, M.C.; D. L. Evans; K. H. Ledward; P. V. Davies; J. R. Crompton; J. H. Collingridge; H. C. Johnson; F. H. Slingsby, M.C.; H. N. Blakiston; Eve S. G. Potter; D. B. Wardle; C. E. S. Drew; L. C. Hector £200 to £500

Land Revenue Records and Enrolments.

Keeper of the Records, A. E. Stamp, C.B., F.S.A.

CITY OF LONDON RECORDS OFFICE,

Guildhall, E.C. 2.

Contains charters of William the Conqueror, Henry II, and later Kings and Queens to 1837; ancient custumals; Horn, Dunthorne, Liber Custumarum, Ordinacionum, Memorandorum and Albus; Liber de Antiquis Legibus, and collections of Statutes; continuous series of judicial and administrative rolls and books from 1252 to present day; records of the Old Bailey and Guildhall Sessions from 1603, and financial records from the 16th century together with numerous subsidiary series and miscellanea of historical interest. Regarded as the most complete collection of ancient municipal archives in existence. Readers' Room open Mon. to Fri. 10 a.m. to 4.45 p.m. (with certain exceptions).

Keeper of the City Records, The Town Clerk.
Deputy Keeper, A. H. Thomas, M.A., F.S.A.
Assistant Clerk, P. E. Jones, LL.B.

§PUBLIC TRUSTEE OFFICE,

Kingsway, W.C. 2.
(*See also* p. 269).

Public Trustee, Sir Oswald R. A. Simpkin, K.C.B., C.B.E. £2,500
Assistant Public Trustees, J. H. Jacob, O.B.E.; R. S. Shuckburgh.....£1,000 to £1,200
Acceptance Officer, E. A. Lowndes.....£500 to £900
Assistant Acceptance Officer, F. A. Coe....£350 to £500
Officer in Charge of Legality of Investments, R. R. Whitty.....£500 to £900
Trust Officers, R. P. Baulkwill; T. F. Bowman; T. Castle; C. J. S. Cooke; G. Cooper-Willis; A. S. Ellison; A. R. Gale; A. E. Glover; R. B. Guy; R. Higson; F.W. Hirst; W. M. Limb; A. G. Mears; A. G. Norris; S. A. Poynder; G. M. Rowland; C. J. Stenning; T. L. Sulivan; R. M. Thrupp; H. M. Wallace .....£500 to £800 and £500 to £900
Chief Clerk, J. S. Wilkes .....£550 to £700
Signing Officer, J. H. E. Higgins.....£500 to £700
Statistical Officer, G. R. Firth .....£400 to £500
Superintendent of Women Staff, Miss F. D. Garner, O.B.E. .....£350 to £500
Lady Visitor, Miss S. G. Clark .....£250 to £350
Chief Accountant, A. F. Day, O.B.E.....£850 to £1,000
Assistant Chief Accountant, W. M. Ponking £750
Accountants, A. H. Craig; A. G. Feak; K. Hadfield; T. B. Henry; S. H. Maunder; S. A. Tansley £500 to £700
Cashier, A. H. Cobbett .....£450 to £650
Income Tax Officer, C. L. Thompson .....£500 to £700
Investment Managers, W. Fuller Smith; F. H. Blore £850 to £1,000
Assistant Investment Managers, H. A. Barnett; G. H. Porter; F. G. Turner .....£500 to £700
Securities Officer, F. W. Norledge .....£500 to £700
Chief Property Adviser, H. H. Hadden, O.B.E., F.S.I. £700 to £1,000
Assistant Property Advisers, C. Bowes, F.S.I.; P. G. Crawley, F.A.I. .....£400 to £700

MANCHESTER OFFICE, Arkwright House, Parsonage Gardens, Manchester.

Deputy Public Trustee, T. M. Young £1,200 to £1,500
Principal Clerk, P. Archer, M.B.E. .....£700 to £900
Trust Officers, G. T. Coates; G. P. Seed; A. G. Taylor; A. A. Webster.....£400 to £700
Chief Accountant, F. E. Chapman .....£500 to £700
Accountant, W. R. Howrie.....£400 to £600
Chief Clerk, Property Section, E. A. Ashby £400 to £650
Chief Clerk, Securities do., H. Gregson ...£500 to £700
Staff Officer, R. Watson .....£350 to £550

§PUBLIC WORKS LOAN BOARD,

Old Jewry, E.C. 2.

The Public Works Loan Board was created in 1817 for the purpose of advancing money to Municipal Authorities for Public Works. During the financial year 1930-31 the Commissioners advanced loans amounting to £21,433,606. Of the total advanced out of the Local Loans Fund the sum of £9,853,485 was for purposes of the Housing Acts.

The average rate of interest was:—

£ s. d.			
4 17 11	per cent.	in	1930-31
5 1 0	,,	,,	1929-30
5 0 2	,,	,,	1928-29
5 0 0	,,	,,	1927-28

4 15 8	,,	,,	1924-25
4 15 8	,,	,,	1923-24

Chairman, The Rt. Hon. Lord Runsdon .....*unp.*
Deputy-Chairman, Laurence Currie .....*unp.*
Secretary, H. G. H. Barnes £1,500
Assist. Secretary (Legal), D. F. Buckley £800 to £1,000
Assist. do. and Chief Clerk, T. B. Ellis, I.S.O. £600 to £800

QUEEN ANNE'S BOUNTY,

3 Dean's Yard, S.W. 1.

Incorporated in 1704, when Queen Anne, with the consent of Parliament, transferred to the Governors the annual income of the "first fruits" and "tenths" derived from the sees, dignities, and benefices, with a view to the augmentation of insufficiently endowed livings. By the *First Fruits and Tenths Measure*, 1926, these payments have been extinguished with a few exceptions. The surplus income from capital held by the Governors is distributed in grants towards the relief of dilapidation assessments on benefices not exceeding £300 in net annual value; the total amount so available for the year ended Dec. 31, 1930, was £20,476 They are the Central Authority under the *Ecclesiastical Dilapidations Measure*, 1923, and important duties have been laid upon them in connection with ecclesiastical tithe rentcharge under the *Tithe Act*, 1925. The Governors act as trustees for endowments and many descriptions of Church funds. They are also empowered to lend money upon mortgage of benefices for improvements to parsonage houses and farm buildings, and for dilapidations.

Secretary and Treasurer, F. G. Hughes.
Assistant Secretary, W. G. Hannah.
Head of Dilapidations Division, D. F. Smeaton.
Head of Tithe Division, W. Russell.
Deputy do., C. S. Amsden.
Solicitor, E. J. Hare.
Asst. Solicitors, N. H. Oldham; L. R. C. Cornford.
Architect, Martin Skinner.
Asst. Architect, A. P. Lay.
Chief Accountant, H. R. Ford.
Asst. Accountant, M. L. Warren.
Accountant (Tithes Accounts), C. G. Harris.
Assist. Accountant (Tithes Accounts), D. F. Herring.
Asst. Heads of Divisions, E. Jump; W. J. P. Smith; W. Holford; S. D. Knight; G. C. Baird; J. H. Hurdman; W. J. Gimson.
Higher Executive Officers, F. E. Willott; R. E. Darby; F. W. Eatherley; S. B. Wood; A. Fraser; J. R. Brumfit; C. Needell; S. C. Grimes.

RAILWAY ASSESSMENT AUTHORITY AND ANGLO-SCOTTISH RAILWAYS ASSESSMENT AUTHORITY.

44, Queen Anne's Gate, London, S.W. 1.

The *Railways (Valuation for Rating) Act*, 1930, applies (for rating purposes) the principle of valuation *in cumulo* to the undertakings of the four amalgamated railway companies, so far as they are situate in England and Wales, and the Metropolitan Railway Company, and the Act may be applied (by Scheme) to the undertakings of any other Railway Company. The valuation of railway hereditaments for local rates in England and Wales will in future be determined by the Railway Assessment Authority set up under the Act, and not by the local Rating Authorities and Assessment Committees. The Act also provides for the setting up of an Anglo-Scottish Railways Assessment Authority (termed the "Joint Authority") whose function is to apportion between England and Scotland the greater part of the receipts of the two amalgamated railway companies (*viz.* L.M.S. and L.N.E.) whose undertakings extend into the two countries.

Chairman of the Railway Assessment Authority and of the Joint Authority, Joshua Scholefield, K.C.

Clerk of the Railway Assessment Authority and of the Joint Authority, A. E. Joll.

§DEPARTMENT OF SCIENTIFIC AND INDUSTRIAL RESEARCH,

16 Old Queen Street, Westminster, S.W. 1.

The Committee of the Privy Council for Scientific and Industrial Research was appointed by Order in Council dated July 28, 1915, amended by an Order in Council dated February 6, 1928, to direct, subject to such conditions as the Treasury may from time to time prescribe, the application of any sums of money provided by Parliament for the organisation and development of Scientific and Industrial Research. The Committee consists of the holders for the time being of certain Ministerial offices. The Order in Council also appointed an Advisory Council to whom all proposals for researches stand referred. By Charter dated November 23, 1926, amended by a supplemental Charter dated April 27, 1928, the members of the Committee of the Privy Council were created a Body Corporate under the name of "The Imperial Trust for the Encouragement of Scientific and Industrial Research" to hold and dispose of money and other property for the purposes of the Committee. On December 15, 1916, a separate Department, having its own Parliamentary Vote, was created for the service of the Committee.

The aggregate net estimate for the Department in 1931–32 amounts to £456,004, a decrease of £11,854 on the same estimate for 1930–31. The gross estimate amounts to £652,233. Headquarters administration, £28,482; Grants for Research, £34,875; Research Work and Research Establishments (except Geological Survey and Museum), £523,476; Geological Survey of Great Britain and Museum of Practical Geology, £65,400.

President of the Committee of the Privy Council, The Lord President of the Council.

Advisory Council, Lord Rutherford of Nelson, O.M., D.SC., LL.D., F.R.S. (*Chairman*); Sir Arthur Balfour, Bt., K.B.E.; Sir William H. Bragg, K.B.E., D.SC., F.R.S.; E. J. Butler, C.I.E., D.SC., M.B., F.R.S.; A. C. G. Egerton, F.R.S.; Sir J. Alfred Ewing, K.C.B., LL.D., D.SC., SC.D., F.R.S., M.INST.C.E.; Kenneth Lee, LL.D.; Lord Rayleigh, SC.D., F.R.S.; Sir David Milne-Watson, LL.D., D.L.; N. V. Sidgwick, O.B.E., SC.D., F.R.S. *Secretary to the Council*, Sir Frank E. Smith, K.C.B., C.B.E., D.SC., LL.D., SEC.R.S.

Headquarters Staff.

Secretary, Sir Frank E. Smith, K.C.B., C.B.E., D.SC., LL.D., SEC.R.S. £2,200
Private Secretary, G. R. D. Hogg.
Assistant Secs., Ll. S. Lloyd, C.B., £1,300; A. L. Hetherington ..... £1,000 to £1,200
Principals, A. F. Barnes; L. C. Bromley; O. F. Brown; W. A. M. Murray; R. O'F. Oakley; P. J. Wheeldon, O.B.E. (*Establishment Officer*) £700 to £900
Assistant Principals, I. G. Evans; G. R. D. Hogg £200 to £500
Records Officer, C. A. Spencer ..... £500 to £600
Asst. Records Officer, H. J. Dowden..... £250 to £350
Staff Officers, C. D. James; W. F. Law, £400 to £500; Miss M. Robb ..... £300 to £400
Higher Grade Clerks, L. W. Crawford; W. A. Macdonald; F. W. Smith; J. Williamson, £300 to £400

Building Research.

Chairman of Board, Sir G. W. Humphreys, K.B.E., M.INST.C.E.

Building Research Station.
Bucknalls, Garston, near Watford.

Director of Research, R. E. Stradling, M.C., PH.D., D.SC., A.M.INST.C.E. £1,200
Superintendent of Laboratories, B. H. Wilsdon £800 to £1,000
Principal Assistants, P. W. Barnett; A. Zaiman £650 to £750
Senior Assistants, B. Bakewell; A. F. Dufton; £500 to £600; W. H. Glanville, D.SC. (*acting*).
Assistants, F. L. Brady; A. D. Cowper; N. Davey; R. Fitzmaurice; F. M. Lea; R. J. Schaffer, F. L. Shipman, £350 to £450; J. F. Baker; H. E. Beckett; D. G. R. Bonnell; L. F. Cooling; H. M. Llewellyn; C. M. Watkins, PH.D. .....£250 to £350
Principal Technical Assistant, F. J. McConnell £305 to £350
Accountant, Miss E. A. Leighton .....£300 to £400

Chemical Research.

Chairman of Board, Sir Richard Threlfall, G.B.E., F.R.S.

Chemical Research Laboratory.
Teddington, Middlesex.

Director of Research, Prof. G. T. Morgan, O.B.E., D.SC., F.R.S. £1,200
Principal Assistant, G. D. Bengough, D.SC. £650 to £750
Senior Assistants, R. Taylor; D. D. Pratt, PH.D. £500 to £600

§ *For Salaries see note, p.* 196.

Assistants, J. G. Mitchell, PH.D.; W. H. J. Vernon, £350 to £450; F. H. Burstall; E. A. Coulson, PH.D.; G. R. Davies, PH.D.; H. Ingleson; A. R. Lee, N. J. L. Megson; A. E. J. Pettet, £250 to £350; Miss J. Stewart ..... £215 to £275
Principal Technical Asst., H. Tongue.....£305 to £350
Higher Grade Clerk, F. H. Bell.... .....£300 to £400

Food Investigation.

Chairman of Board, Sir Joseph G. Broodbank, J.P.
Director of Food Investigation, Sir William B. Hardy, D.SC., LL.D., F.R.S.
Assistant Director, E. Barnard. D.S.O. ...£700 to £900

Low Temperature Research Station.
Downing Street, Cambridge.

Superintendent, Sir William B. Hardy, D.SC., LL.D., F.R.S. *(inclusive)* £1,350
Principal Assistant, F. Kidd, D.SC.....£650 to £750
Senior Assistants, T. Moran, PH.D.; J. J. Piqué; A. J. Smith, PH.D.; C. West, D.SC. .....£500 to £600
Assistants, J. Barker, PH.D.; E. H. Callow, PH.D.; T. N. Morris; E. C. Smith, PH.D., £350 to £450; J. Brooks, PH.D.; J. M. Bryan; R. G. Tomkins; R. B. Haines .....£250 to £350

Torry Research Station.
Aberdeen.

Superintendent, A. Lumley.....£600 to £800
Assistant, G. A. Reay, PH.D. .....£250 to £350

Ditton Laboratory.
East Malling, near Maidstone, Kent.
Assistant, J. K. Hardy.....£350 to £450

Forest Products Research.

Chairman of Board, Principal Sir James C. Irvine, C.B.E., D.SC., LL.D., F.R.S.

Forest Products Research Laboratory.
Princes Risborough, Bucks.

Director of Research, R. S. Pearson, C.I.E., F.L.S. £1,000 to £1,200
Assistant Director, F. M. Oliphant.....£650 to £750
Administration Officer, A. R. H. Cox ...£500 to £600
Timber Mechanics Officer, C. J. Chaplin *(inclusive)* £900 to £990
Timber Utilization Officer, Major J. R. Cosgrove, D.S.O., M.C. .....*(inclusive)* £1,000 to £1,100
Principal Assistant, S. T. C. Stillwell ...£650 to £750
Assistants, W. W. Barkas; W. G. Campbell; K. St. G. Cartwright; R. C. Fisher, PH.D.; P. Harris, £350 to £450; Miss M. H. O'Dwyer, £275 to £350; F. H. Armstrong; R. G. Bateson; J. Bryan; W. P. K. Findlay; J. Latham; B. J. Rendle; E. D. van Rest, £250 to £350; Miss C. B. Pettifor .....£215 to £275
Temporary Assistants, A. N. David; H. E. Kinns; W. H. Lovegrove.
Higher Grade Clerk, L. Forbes.....£300 to £400

Fuel Research.

Chairman of Board, Sir Richard Threlfall, G.B.E., F.R.S.
Director of Research, £1,200 to £1,500
Assistant Director and Superintendent of Survey, F. S. Sinnatt, M.B.E., D.SC. £1,000
Assistant to the Director, Maj. E. O. Henrici £700 to £900
Intelligence Officer, Sir Frederic L. Nathan, K.B.E. *(part time)*
Registrar of Survey, Miss N. Renouf .....£250 to £350
Assistants, A.C. Maries; O. A. Saunders £250 to £350

Fuel Research Station.
Blackwall Lane, East Greenwich, S.E. 10.
Chief Engineer, Eng.-Capt. J. Fraser Shaw, R.N. £1,100
Chief Chemist, J. G. King, PH.D.....£650 to £750
Senior Assistants, A. T. Barber; A. Blackie, £500 to £600; T. F. Hurley; D. McDougal; A. B. Manning *(acting)*.
Assistants, W. E. Bakes; M. A. Matthews, D.SC., PH.D.; £350 to £450; H. Bardgett; R. Cook; D. T. Davies, PH.D.; L. Horton; H. E. Newall; J. Rogers; A. H. Taylor; R. A. A. Taylor; W. J. Walker; E. T. Wilkins; F. A. Williams, £250 to £350; Miss F. M. E. Shepherd .....£215 to £275
Principal Technical Assistant, C. W. Ockelford £305 to £350
Staff Officer, C. B. Fitzgerald .....£400 to £500

Physical and Chemical Survey of National Coal Resources.
Senior Assistants, L. Slater, PH.D. *(South Yorks area)*; W. J. Skilling *(Scotland)*, £500 to £600; *Assistants*, A. Dawe *(Notts and Derby)*; J. H. Jones *(Durham and Northumberland)*, £350 to £450; H. Berry *(Durham and Northumberland)*; J. R. Campbell *(Scotland)*; T. Evans; D. Hicks *(South Wales)*; J. O'N. Millott *(North Staffs)*; F. Scarf *(Warwickshire, Cannock Chase and South Staffordshire)*; A. M. Wandless *(South Yorks.)* .....£250 to £350

Radio Research.

Chairman of Board, Lt.-Col. A. G. Lee, O.B.E., M.C.

Radio Research Station.
Slough, Bucks.

Principal Assistant, R. A. Watson Watt £650 to £750
Assistants, R. H. Barfield; L. H. B. Bell; J. F. Herd; J. Hollingworth, £350 to £450; S. R. Chapman, £250 to £350; Miss M. Taylor, PH.D. ...£215 to £275

Water Pollution Research.

Chairman of Board, Sir R. Robertson, K.B.E., D.SC., LL.D., F.R.S.
Director of Research, H. T. Calvert, M.B.E., PH.D., F.I.C. *(part time)*.
Assistant Director, A. Parker, D.SC. .....£800 to £900

Geological Survey of Great Britain and Museum of Practical Geology.

Head Offices: Jermyn Street, London, S.W. 1, and Southpark, 19, Grange Terrace, Edinburgh (Branch Offices at Manchester, Newcastle-on-Tyne, and York.

The Geological Survey and Museum was commenced in 1832; it was under the Science and Art Department from 1853 till 1900, when that Department became merged in the Board of Education. On Nov. 1, 1919, the administrative control of the Survey and Museum was transferred to the Committee of the Privy Council for Scientific and Industrial Research. The normal work of the Survey includes the preparation of geological maps and memoirs dealing with the general survey of the country and with various economic aspects of that survey. The Museum of Practical Geology conserves and exhibits rocks, minerals and fossils which afford evidence for the published records of the survey or illustrate that survey. It is also a function of the Museum to exhibit economic minerals from all parts of the world, and especially Great Britain.

Chairman of Geological Survey Board, Dr. T. F. Sibly, D.SC.
Director of Survey and Museum, Sir John S. Flett, K.B.E., D.SC., LL.D., F.R.S. .....£1,200 to £1,500
Assistants to Director, B. Smith, SC.D. *(England)*; M. Macgregor *(Scotland)* .....£800 to £900
District Geologists, C. E. N. Bromehead; R. G. Carruthers; H. Dewey; C. H. Dinham; T. Eastwood; F. L. Kitchin, SC.D., PH.D. F.R.S. *(Palæontologist)*; J. E. Richey, M.C.; H. H. Thomas, SC.D., F.R.S. *(Petrographer)*; G. V. Wilson; W. B. Wright, SC.D. £650 to £750
Senior Geologists, G. A. Burnett; C. P. Chatwin; H. G. Dines; E. E. L. Dixon; D. Haldane; J. Phemister, D.SC.; R. W. Pocock; J. Pringle; T. Robertson, PH.D.; R. L. Sherlock, D.SC.; T. H. Whitehead; D. A. Wray, PH.D.....£450 to £650
Geologists, J. K. Allan; W. Anderson; S. Buchan; R. Crookall, PH.D.; F. H. Edmunds; W. N. Edwards; V. A. Eyles; A. Fowler; T. N. George, PH.D.; S. E. Hollingworth; R. C. B. Jones, M.C.; W. Q. Kennedy; J. Knox; W. Lloyd; A. G. MacGregor, M.C.; G. H. Mitchell, PH.D.; W. C. C. Rose; G. Ross; J. B. Simpson; J. V. Stephens; C. J. Stubblefield, PH.D.; L. H. Tonks; F. M. Trotter, D.SC.; F. B. A. Welch £250 to £450
Higher Grade Clerk, P. A. Frisby .....£300 to £400
Superintendents of Maps, A. E. N. Haynes; G. G. Torkington .....£200 to £350

Museum of Practical Geology,
Jermyn Street, London, S.W. 1.
Curator and Librarian, W. F. P. McLintock, D.SC. £650 to £750
Asst. Curator, A. F. Hallimond.....£450 to £650
Assist. Librarian, E. G. W. Elliott .....£500 to £600

The National Physical Laboratory,
Teddington, Middlesex.

The National Physical Laboratory was founded in the year 1901 as a public Institution for standardising and verifying instruments, for testing materials, and for the determination of physical constants. The Laboratory comprises eight main sections :—(1) *Physics*; (2) *Electricity*; (3) *Metrology*; (4) *Engineering*; (5) *Aerodynamics*, (6) *Metallurgy and Metallurgical Chemistry*; (7) *The William Froude Laboratory*; (8) *Secretarial.*

Chairman of the General Board and Executive Committee, The President of the Royal Society.

Vice-Chairman of General Board and Executive Committee, Sir Richard Glazebrook, K.C.B., F.R.S.

Director, Sir Joseph Petavel, K.B.E., D.SC., F.R.S. (*and free residence*) £1,500

Secretary, F. J. Selby, C.B.E. ..... £800 to £1,000

Assistant to the Secretary, J.W.Christelow £350 to £450

Accountant, G. E. Bailey £725

Higher Grade Clerks, P. H. Durham; W. J. Gower; A. May; H. Shepherd ..... £300 to £400

Physics Department.

Superintendent, G. W.C.Kaye, O.B.E., D.SC. £800 to £1,000

Principal Assistants, E. Griffiths, D.SC., F.R.S.; W. F. Higgins; T. Smith ..... £650 to £750

Senior Assistants, J. S. Anderson, D.SC.; A. H. Davis, D.SC.; J. Guild; F. H. Schofield; G. Shearer, D.SC. £500 to £600

Assistants, J. H. Awbery; I. Backhurst; J. A. Hall, £350 to £450; G. H. Aston; G. E. Bell; W. Binks; E. J. Evans; N. Fleming; A. E. Knowler; D. S. Perfect; R. W. Powell; J. Thewlis; W. A. Wood £250 to £350

Principal Observers, G. Badderly; A. C. Cooper; A. G. Williams, M.B.E. ..... £305 to £350

Electricity Department.

Superintendent. E. H. Rayner, SC.D. ... £800 to £1,000

Principal Assistants, D. W. Dye, D.SC., F.R.S.; J. W. T. Walsh, D.SC. ..... £650 to £750

Senior Assistants, H. Buckley; L. Hartshorn, D.SC.; R. L. Smith-Rose, PH.D., D.SC.; R. S. J. Spilsbury £500 to £600

Assistants, H. C. Booth; F. M. Colebrook; T. I. Jones; H. A. Thomas; C. E. Webb, £350 to £450; A. H. M. Arnold; G. W. Bowdler; L. J. Collier; R. Davis; C. J. W. Grieveson; P. J. Higgs; T. H. Harrison; J. S. McPetrie; J. S. Preston; E. Rushton; W. G. Standring; W. S. Stiles; J. E. P. L. Vigoureux £250 to £350

Principal Observers, W. Barnett; W. H. H. Brookes; W. H. Eastland ..... £305 to £350

Metrology Department.

Superintendent, J. E. Sears, C.B.E. £1,200

Principal Assistant, S. W.Attwell, M.B.E. £650 to £750

Senior Assistants, F. A. Gould; F. H. Rolt, M.B.E.; V. Stott; G. A. Tomlinson ..... £500 to £600

Assistants, H. P. Bloxam; J. S. Clark; W. H. Johnson; W. G. Ridge, £350 to £450; H. Barrell; P. H. Bigg; D. Clayton; J. C. Evans, PH.D. £250 to £350

Principal Observer, H. A. Dear ..... £305 to £350

Higher Grade Clerk, E. C. Cook ..... £300 to £400

Engineering Department.

Superintendent, H. J. Gough, M.B.E., D.SC., PH.D. £800 to £1,000

Principal Assistants, R. G. C. Batson; C. Jakeman £650 to £750

Senior Assistants, A. Bailey; R. W. Fenning, M.B.E.; G. A. Hankins; J. H. Hyde ..... £500 to £600

Assistants, J. Bradley; H. E. Smith; H. J. Tapsell, £350 to £450; F. Aughtie; W. F. Cope; H. L. Cox £250 to £350

Aerodynamics Department.

Superintendent, E. F. Relf ..... £800 to £1,000

Principal Assistants, A. Fage; J. L. Nayler £650 to £750

ROYAL COMMISSION FOR THE EXHIBITION OF 1851.

Offices, 1 Lowther Gardens, Exhibition Rd., S.W.7.

(Incorporated by Supplemental Charter as a permanent Commission after winding up the affairs of the Great Exhibition, in 1851. It has for its object the promotion of scientific and artistic education by means of funds derived from its Kensington Estate, purchased with the surplus left over from the Great Exhibition.)

President of the Royal Commission, H.R.H. the Prince of Wales, K.G.

Chairman, Board of Management, The Lord Macmillan, LL.D.

Chairman, Science Scholarships Committee, Sir Richard Glazebrook, K.C.B., F.R.S.

Secretary to Commissioners, Evelyn Shaw, C.V.O.

§THE NATIONAL SAVINGS COMMITTEE,
Sanctuary Buildings, Westminster, S.W. 1.

The National Savings Movement is directed in England and Wales by the National Savings Committee. H.R.H. the Prince of Wales is Patron of the Movement, and in Scotland by the Scottish Savings Committee. The members of the National Savings Committee are appointed by the Lords Commissioners of His Majesty's Treasury, and include twelve representatives elected annually by the voluntary workers in the National Savings Movement and also representatives of such State Departments and other institutions as have a special interest in the promotion of popular thrift. In its origins, the National Savings Committee goes back to the National War Savings Committee set up in 1915 to help in the financing of the Great War.

An important part of the organisation of the National Savings Movement is the *Savings Association*—a voluntarily conducted savings club for the purchase of National Savings Certificates by instalments. At the end of August, 1931, there were 31,010 of these Associations at work. Savings Associations in the various areas of the country are usually attached to the *Local Savings Committees* of the areas, these Committees being the links between Savings Associations and the National Savings Committee.

The total number of Savings Certificates sold from their first issue in February, 1916, to August 31, 1931, was 1,048,574,774, their cash value being £824,469,560. The amount, including accrued interest, remaining to the credit of investors in Savings Certificates on that date was approximately £499,000,000. On April 1, 1922, the price of the Savings Certificate was raised from 15*s.* 6*d.* to 16*s.*, the maturity value remaining 20*s.* On October 1, 1925, the maturity value was reduced to 24*s.*

President, Sir Robert M. Kindersley, G.B.E.

Chairman, Maj.-Gen. Rt. Hon. J. E. B. Seely, C.B., C.M.G., D.S.O., T.D.

THAMES CONSERVANCY,

2 Norfolk Street, Strand, W.C. 2.

The Conservation of the River Thames was granted to the Lord Mayor of London in 1487, and delegated to 12 Conservators in 1857, the powers being reconstituted in 1894. The Port of London Act, 1908, took over as from March 31, 1909, all rights, powers, and duties of the Conservators in respect of the river below Teddington.
Chairman, Rt. Hon. Lord Desborough, K.C., G.C.V.O.
Vice-Chairman, Charles G. Field, J.P.
Secretary, F. W. Geary.

§BOARD OF TRADE,

Great George Street, S.W. 1.

Headquarters, Great George Street, S.W. 1; *Bankruptcy Dept.*, 20, Great Smith Street, S.W. 1; *General Register and Record Office of Shipping and Seamen*, Tower Hill, E.C. 3; *Standards Dept.*, 6 & 7, Old Palace Yard, S.W. 1.

(See also *Dept. of Overseas Trade*, and *Patent Office*.)

A Council for Trade and Plantations was instituted by King Charles II. in 1660. This paid Council was abolished in 1782, and in 1786 a Committee of the Council on Trade (which, unlike the other Council Committees, had a President of its own) was appointed. The President of the Board of Trade, as at present constituted, controls the Department principally responsible for matters relating to trade and industry. The Board is concerned with international, commercial, and industrial policy and administers certain statutes including those relating to merchant shipping and seamen, bankruptcy, joint stock companies, gas, key industries, merchandise marks, cinematograph films, weights and measures, patents, designs, trade marks and copy-

° Acting.

§ For Salaries see note, p. 198

right, and mines and quarries. It administers the Coastguard, and also exercises control over the principal lighthouse authorities of the country, and over the construction of works on *tidal lands*. It collects and publishes statistics of the trade and industry, shipping and navigation of this country, its Dominions and Protectorates, and foreign countries, as well as particulars of customs tariffs, regulations, &c., and publishes a weekly journal of commercial information. The *Food Council* is attached to this department. The Department arranges the provision of all sea transport required for the conveyance of personnel and stores by the fighting services and other Government Departments. In addition it undertakes duties arising out of the War, the most important now remaining being those of the Clearing Office for Enemy Debts. Jointly with the Foreign Office it controls the Overseas Trade Department.

President, Rt. Hon. Walter Runciman, M.P.....£4,000

Secretary, S. J. Page, M.C., LL.B.....£700 to £900
Asst. to Sec., L. C. Jackson .....£400 to £500

§TREASURY, Whitehall, S.W. 1.

The Lord High Treasurer of England is the Third Great Officer of State, the office having been "in commission" (with certain intervals) since 1612. The Commissioners of the Treasury of the United Kingdom consist of the First Lord, who is usually Prime Minister, the Chancellor of the Exchequer, and some Junior Lords, with certain Secretaries and a staff of officials. The duties of the First Lord are mainly political, as also are those of the Parliamentary Secretary and the Junior Lords; the duties of the Chancellor of the Exchequer are mainly financial, in that he performs the ancient duties of the Under-Treasurer and, after agreement with the heads of the great spending departments, arranges for the great collecting departments to provide sufficient moneys to meet the needs of the year. The papers are laid before Parliament in the form of a Budget, which the Chancellor opens and expounds to the House these plans being accepted, modified, or rejected by the House.

§ *For Salaries see note, p.* 196.

PRIME MINISTER AND FIRST LORD OF THE TREASURY—
The Rt. Hon. James Ramsay MacDonald, M.P. £5,000

The following are "Assistant Whips" (*unpaid*)—Captain Sir George Bowyer, M.C., M.P.; Maj. G. F. Davies, M.P.; Lord Erskine, M.P.; Com. A. R. J. Southby, R.N., M.P.; J. Blindell, M.P.; Major M. McKenzie Wood, O.B.E., M.P.; Harcourt Johnstone, M.P.

TRINITY HOUSE, Tower Hill, E.C. 3.

Trinity House, the first General Lighthouse and Pilotage Authority in the Kingdom, was a body of importance when Henry VIII. granted the Institution its first charter in 1514, *inter alia* "for the relief, increase and augmentation of the Shipping of this Realm of England." Since that period the duty of erecting and maintaining lighthouses and other marks and signs of the sea has by Royal Charter and Acts of Parliament been entrusted to the Corporation of Trinity House, and until 1874 Masters of the Navy were examined by the Elder Brethren of the Corporation. In the present day, the principal duty of the Corporation of Trinity House, as a Public Department, is the administration of the Lighthouse, &c., Service of England and Wales with certain statutory jurisdiction in regard to lighthouses and other seamarks in Scotland, Ireland the Channel Islands and Gibraltar, whilst the Corporation are also the chief Pilotage Authority in the United Kingdom, and in their capacity as a private corporation or guild they administer certain Charitable Trusts specifically dedicated to the relief of aged and distressed master mariners and their widows. The Acting Elder Brethren of the Corporation also sit with the Judges of the Admiralty Division of the High Court of Justice to act as Nautical Assessors in Marine Causes tried in that Court. The Lighthouse Service of the Trinity House is maintained out of the General Lighthouse Fund, this fund being provided by means of special dues called Light Dues levied on shipping using the ports of the United Kingdom. The accounts are submitted annually to Parliament.

§ Law and Justice.

APPELLATE TRIBUNALS.

THE JUDICIAL COMMITTEE OF THE PRIVY COUNCIL.

Office, Downing Street, Whitehall, S.W. 1.

THE Supreme Judicial Authority of the Empire is the Judicial Committee of the Privy Council, before which appeals may be brought (in the form of a petition to the Crown) from Consular Courts and Courts of Vice-Admiralty, and from the Courts of India and every British Dominion. The Judicial Committee of the Privy Council consists of the Lord Chancellor, Lord President, ex-Lords President, the Lords of Appeal in Ordinary (*see* col. 2), and such other members of the Privy Council as shall from time to time hold or have held "high Judicial Office" within the meaning of the Appellate Jurisdiction Acts, 1876 and 1887. Among the last are included Viscount Hailsham, Lord Buckmaster, Lord Darling, Lord Warrington of Clyffe and Lord Salvesen. Sir John Wallis is a member by virtue of section 30 of the Judicial Committee Act, 1833; Sir George Rivers Lowndes and Sir Dinshah F. Mulla (Appellate Jurisdiction Act, 1929); and the following judges from the Dominions beyond the Seas (various Acts, 1895–1928):—Sir Charles Fitzpatrick (*Canada*); Sir James Rose Innes (*S. Africa*); Mr. Justice Lyman Poore Duff (*Canada — Supreme Court*); Sir Adrian Knox (*Australia*); Sir Isaac Alfred Isaacs (*Australia*); Chief Justice Francis Alexander Anglin (*Canada—Supreme Court*); Chief Justice Sir William Mulock (*Ontario*); Sir Lancelot Sanderson (*Bengal*), and Chief Justice Jacob de Villiers (*South Africa—Supreme Court*).

Registrar of the Privy Council (and Registrar of Ecclesiastical Causes); Sir Charles Neish, K.B.E., C.B., Barrister-at-Law £1,500

Chief Clerk (Judicial), W. Reeve Wallace, C.B.E. £800

Second Clerk, D. G. Lys £450

THE HOUSE OF LORDS.

THE Supreme Judicial Authority for Great Britain and Northern Ireland is the House of Lords, which is the ultimate Court of Appeal from all the Courts in Great Britain and Northern Ireland. It is constituted as under:—

The Lord High Chancellor Presides.

In Scotland the principal local court is the Sheriff Court. The Judge Ordinary is the Sheriff-Substitute, and the Sheriff is an Appeal Judge. The jurisdiction of the Sheriff Court is both civil and criminal. In civil questions the jurisdiction is unlimited in regard to the money value of the cause. On the criminal side the Court has cognizance of all serious crime with the exception of murder and three other charges, but the power of punishment is limited to fine and imprisonment; it does not extend to penal servitude.

The Sheriff Clerk is the Clerk of the Sheriff Court, and his duties correspond nearly to those of a Registrar in the English Courts.

Prosecutions are conducted by Crown officials at the public expense; the Lord Advocate and his deputes prosecute in the High Court; the Procurators-Fiscal in the Sheriff Court.

The *Convener* of the Sheriffs is Sheriff Alexander L. M'Clure, Aberdeen.

The Address of the *Secretary of the Sheriffs-Substitute Assoc.* is County Buildings, Ayr.

§ *For Salaries see note, p.* 196.

ADOPTION OF CHILDREN.

England and Wales the adoption of children is regulated by the Adoption of Children Act, 1926. An Order of Court is necessary to legalize the adoption, and the Act provides a number of safeguards. Adoption puts the child adopted practically on the same footing as a child born to the adopter in lawful wedlock, in all matters of custody, education and maintenance; but does not alter the child's rights in property of his real parents (*e.g.*, on intestacy) nor give the child rights in respect of the adopter's property. The Act provides for a register of adopted children. Applications are made to the High Court (Chancery), County Court, or Magisterial Bench. Orders will not usually be made for a man to be *sole* adopter of a girl, and applicant must be twenty-five years of age, or older.

Scotland.—The Adoption of Children (Scotland) Act, 1930, makes similar regulations for Scotland as from Oct. 1, 1930, and directs the Registrar-General for Scotland to establish and maintain an Adopted Children Register. Applications are made to the Court of Session, or the Sheriff Court within whose jurisdiction either the applicant or the child resides at the date of application.

BIRTHS (REGISTRATION).

(For Certificates, see p. 257.)

WHEN a birth takes place, personal information of it must be given to the local Registrar of Births and Deaths, and the register signed in his presence, by one of the following persons:—1. The father or mother of the child. If they fail, 2. The occupier of the house in which the birth happened; 3. A person present at the birth; or, 4. The person having charge of the child. The duty of attending to the registration therefore rests firstly on the parents. The registration must be made within 42 days of the birth. Failure to do this without reasonable cause, involves liability to a penalty of forty shillings. If at the end of 42 days the birth is not registered, the Registrar may require any one of the above-mentioned persons to attend to register at a stated time and place. Failure to comply involves a penalty of forty shillings. The registration of a birth will be free when it takes place within 42 days (in *Scotland* 21 days), unless the Registrar is requested to attend at a residence or at the house where the child was born, when he may claim a fee of one shilling. After three months a birth cannot be registered except in the presence of the Superintendent Registrar, and on payment of fees, amounting to five shillings, to him and the Registrar. After twelve months no birth can be registered without the Registrar-General's consent, and on payment of further fees, amounting to ten shillings. In *Scotland*, after the lapse of three months, it can only be registered on the authority of the County Sheriff. The regulation that no birth in *England* and *Wales* could be registered after seven years was revoked in 1922, but late registration cannot be allowed unless satisfactory evidence is supplied to the Registrar-General. The only legal proof of age and place of birth is afforded by the civil registers, which the law now requires to be made as above described. In districts under the Notification of Births Act, 1907 (as extended by an Act of 1915), notice of every birth must be given by the father, or person in attendance on the mother, to the district medical officer of health by post within 36 hours of the birth. *This is in addition to the registration already mentioned.*

A "Stillbirth" must be registered, accompanied by either a certificate of doctor or midwife, or a declaration that no doctor or midwife was present at the birth, and that the child was not born alive.

The re-registration of the birth of a person under the *Legitimacy Act*, 1926, is provided for in that Act (see p. 261).

Birth at Sea: The master of a British ship must record any birth on board and send particulars to the Registrar General of Shipping.

Birth Abroad: Consular Officers are authorised to register births of British subjects occurring in their districts.

BRITISH NATIONALITY.

The law as to British Nationality is mainly to be found in the British Nationality and Status of Aliens Act, 1914, as amended by certain Acts passed in 1918 and 1922. It is important to notice that the Act of 1914—which defines a *natural-born British Subject*—*does not affect* the status of any person born *before* Jan. 1, 1915.

The following are deemed to be British Subjects, namely:

1. Any person born within His Majesty's dominions and allegiance.

2. Any person born out of His Majesty's Dominions, *before Jan.* 1, 1915, whose *father's father* was born within His Majesty's Dominions, provided that the grandfather was, at the time of the father's birth, a British subject.

3.* Any person to whom a Certificate of *Naturalization has been granted*, or *who has* acquired British nationality by reason of annexation of territory, or by special Act of Parliament.

4. The wives (whatever their nationality of origin) of British subjects, save in certain cases where the man changes his nationality after marriage.

5. The children of naturalized British subjects born out of His Majesty's Dominions, provided that they comply with one of the following conditions:—

(*a*) in the case of a child born *before* January 1st, 1915,
  (i) if a Certificate of Naturalization has been granted to his father or his mother (being a widow) before January 1, 1915, and he has become resident with such father or mother (being a widow) in the United Kingdom before that date while under age, or
  (ii) if a Certificate of Naturalization is granted to his father or his mother (being a widow) after January 1, 1915, and his name is included therein.

(*b*) in the case of a child born *after* January 1, 1915,
  (i) if before his birth a Certificate of Naturalization had been granted to his father or his mother, or
  (ii) if a Certificate of Naturalization is granted to his father or his mother (being a widow) after January 1, 1915, and his name is included therein.

6. Any person born out of His Majesty's dominions whose father was at the date of the

birth a British subject, and who fulfils any of the following conditions—*e.g.*, if either

(i) his father was born within His Majesty's allegiance; or
(ii) his father had a certificate of Naturalization; or
(iii) his father had become a British subject by reason of any annexation of territory; or
(iv) his father was, at the date of the birth, in the service of the Crown; or
(v) his birth was registered at the British Consulate within one year or, in special cases, two years or, in the case of a person born on or after January 1, 1915 who would have been a British Subject if born before that date, within 12 months after August 1, 1922.

A child of a British Subject is deemed to have been born within the allegiance if born anywhere where by treaty, &c., His Majesty exercises jurisdiction over British subjects.

A person whose British nationality depends upon his registration at a Consulate ceases to be a British Subject unless he asserts his nationality by declaration within a year after attaining 21, and abandons any other nationality he may have acquired.

7. A person born on a British ship.

LOSS OF BRITISH NATIONALITY.—A British subject loses his British nationality:—

(*a*) if by any voluntary or formal act he becomes naturalized in a foreign country;
(*b*) if, in certain cases, he makes a declaration of alienage. These cases are:—
(i) where a person is a British subject by reason of birth in His Majesty's Dominions and allegiance or on board a British ship *and* is also by birth or becomes during minority a subject of any foreign State,
(ii) where a person is a British subject, but was born out of His Majesty's Dominions, and
(iii) where a Convention has been made between this country and any foreign State, to the effect that any subject of that state who has been naturalized as a British subject may divest himself of that Status;
(*c*) if during his minority his father loses British nationality in circumstances which involve the acquisition by the child of a new nationality;
(*d*) in the case of a woman, if she marries an alien;

(N.B. A woman who was originally a British subject and loses British nationality by marriage with an alien does not regain British nationality on the death of husband or the dissolution of her marriage. If in such a case she desires to resume British nationality she must apply for a Certificate of Naturalization.)

(*e*) in the case of a person to whom a Certificate of Naturalization has been granted if the Secretary of State revokes the Certificate;
(*f*) if the territory of which he is an inhabitant is severed from the Crown; *cf.*, *e.g.*, the cases of the inhabitants of Hanover and Heligoland.

ACQUISITION OF BRITISH NATIONALITY.—An alien may acquire British nationality:—

(*a*) by special Act of Parliament;
(*b*) by the conquest, annexation, or cession of the territory of which he is an inhabitant;
(*c*) in the case of a woman, by marriage with a British subject, and
(*d*) by naturalization.

Naturalization.—All Certificates of Naturalization granted in the United Kingdom between May 13, 1870, and December 31, 1914, were granted in accordance with the provisions of the Naturalization Act, 1870. And this Act did not secure that a Certificate granted in any part of the Empire should be valid throughout the Empire.

Under the British Nationality and Status of Aliens Act, 1914, every person to whom a Certificate of Naturalization is granted in accordance with its provisions after January 1, 1915, is a British subject, not only in that part of the British Empire where the Certificate is granted, but also in the United Kingdom and in any Dominion which has adopted the Act, and in any other British Possession.

Persons naturalized prior to January 1, 1915, may, after that date, apply for a fresh Certificate of Naturalization under the new conditions.

In order to be eligible for the grant of such a Certificate in the United Kingdom, an alien must:—

(*a*) during the eight years preceding his application have resided for not less than five years in His Majesty's Dominions (of which not less than one year *immediately preceding* the application must have been spent in the United Kingdom) or have been for not less than five years in the service of the Crown;
(*b*) be of good character and have an adequate knowledge of the English language; and
(*c*) intend to reside in His Majesty's Dominions or to enter or continue in the service of the Crown.

Instructions for the guidance of persons desiring to apply for a Certificate of Naturalization are supplied with the form of application for a certificate which may be obtained (price 6*d.*) from H.M. Stationery Office.

The fee payable to the Home Office in respect of the grant of a Certificate of Naturalization is fixed by the Government of the day, and is at present £10, of which £1 is payable on submission of the application and the remainder on the grant of the Certificate. The £1 payable on submission of the application *is not returnable*, whether or not a Certificate is granted.

N.B.—In the case of a woman who was a British subject previously to her marriage to an alien, and whose husband has died or whose marriage has been dissolved, the above requirements, both as to residence and as to fee, are relaxed.

STATUS OF ALIENS.—Property may be held by an alien in the same manner as by a natural-born British subject, but the title to such property does not confer any right on an alien to hold real property out of the United Kingdom, or qualify him for any franchise.

Aliens are not entitled to be tried by a jury *de medietate linguæ*, but are triable in the same manner as if they were natural-born subjects.

ADMISSION, SUPERVISION AND DEPORTATION OF ALIENS.—Under the Aliens Order, 1920, any alien coming from outside the United Kingdom must obtain the leave of an Immigration Officer to land in the United Kingdom, and such leave

is refused in many cases, *e.g.*, where the alien is without means, or (if he is seeking employment) is unable to produce a Permit issued by the Minister of Labour. Provision is also made (Article 6 of the Order) for the registration of resident aliens and (Article 12) for the deportation of aliens by order of the Secretary of State, which can be made on various grounds. The Aliens Order, 1920, was made under the Aliens Restriction Act, 1914, as amended and extended by the Aliens Restriction (Amendment) Act, 1919.

BUSINESS NAMES REGISTRATION.

REGISTRATION OF BUSINESS NAMES ACT, 1916.

This Act received the Royal Assent on 22 Dec., 1916, and its provisions were explained on pp. 414–415 of the 1921 "WHITAKER." The *Office* of the Registrar of Business Names is at Somerset House, W.C. 2.

CERTIFICATES

OF BIRTHS, MARRIAGES, OR DEATHS.

England and Wales.—Certificates of Births, Deaths, or Marriages can be obtained at the General Register Office, Somerset House, on payment of fees amounting to 3*s.* 7*d.*, viz., 1*s.* for search, 2*s.* 6*d.* for the certificate, and 1*d.* for the stamp affixed thereto. (When application is made by *post* the charges are 5*s.* 1*d.*) They can also be obtained from the registration officer having the legal custody of the register book containing the entry of which a certificate is required. Certificates of marriages in churches of the Church of England can also be obtained from the incumbent of the church in which the marriage took place.

Certificates at reduced rates can be obtained for the purposes of certain Acts of Parliament: Friendly Societies Act, 1896, Birth or Death, 1*s.*; Factory and Workshop Act, 1901, and for purposes of Elementary Education, Birth, 6*d.*; Savings Banks Act, 1887, Birth, Death, or Marriage, 1*s.*; National Insurance Acts, 1911 and 1913, Birth, 6*d.*, Marriage, 1*s.*; Industrial Assurance Companies Act, 1896, and Trade Unions Amendment Act, 1876, death of child under 10 years of age, 1*s.*, but only from the local Registrar.

English Registers—Birth registration exists at Somerset House from 1837. An index to 2,000,000 earlier entries can be consulted at the *Society of Genealogists* at 5 Bloomsbury Square, London, W.C. 1.

Scottish Registers of Births, Marriages, and Deaths.—Parish registers were instituted for these in 1551, but until the Registration of Births, &c. (Scotland), Act, 1854, they were not properly kept in many cases. Extracts may, however, be obtained from them on payment of 2*s.* 1*d.* for each entry, but to be valid evidence it must be shown that the registers from which the entries are taken were regularly kept. Lists of the old parish registers may be consulted in the offices of the Registrar-General, H.M. General Register House, Edinburgh, or of local Registrars. These old registers are in the charge of the Registrar-General, and since 1854 local registers have been transmitted to him at stated periods. Registers up to the end of 1919 are now in his possession. There is a general index to the registers which may be searched on payment of 2*s.* A search of the index of a particular parish is 1*s.* A fee of 2*s.* 6*d.* is payable for a search of all the Scottish registers, and 1*s.* is payable for a search of a particular parish. An extract of an entry may be obtained on payment of 2*s.* 1*d.* The office of the Registrar-General is open on weekdays between 10 a.m. and 4 p.m.

COPYRIGHT.

The law of copyright is contained in the Copyright Act, 1911, under which copyright subsists automatically, without registration, in every original literary, dramatic, musical and artistic work. The provisions of the Act were explained on pp. 415–416 of the 1921 "WHITAKER."

Registration at Stationers' Hall under the Copyright Act of 1842 terminated on Dec. 31, 1923, and in the following year the Stationers' Company established a *new* Register in which Books and Fine Arts can be registered. A copy has to be filed at Stationers' Hall and certified copies of the entries are issued, the fees being 5*s.* for a Book, and 2*s.* 6*d.* for Fine Art; certified copies 5*s.* in either case. (Office open on Wednesdays *only*, 11 a.m. to 12 noon, and 2 to 4 p.m.) Such entries are of value in proving the existence of a work on a given date in the case of infringement.

DAYS OF GRACE.

Bills of Exchange or Promissory Notes, payable at any time after date, have *three days of grace* allowed; thus, a bill dated 1 Jan. at two months' date is not due until March 4. If a bill or note is payable by instalments to be paid "punctually," this does not exclude the days of grace (*Schaverien* v. *Morris*, 37 T.L.R. 366). Bills drawn *at sight*, or *on demand*, must be paid on presentation without days of grace. In the United Kingdom, bills falling due on Sunday are payable the previous Saturday, and in England and Wales and in Ireland bills falling due on Good Friday or Christmas Day are similarly payable on the previous day. Bills falling due on Bank Holidays are payable the day after.

DEATHS.

(For Certificates, *see previous col.*)

In England and Wales.—When a death takes place, personal information of it must be given to the local Registrar of Births and Deaths, and the register signed in his presence, by one of the following persons:—1. A relative of the deceased present at the death, or in attendance during the last illness. If they fail, 2. Some other relative of the deceased. In default of any relatives, 3. A person present at the death; or, the occupier of the house in which the death happened. If all the above-named fail, 4. An inmate of the house, or, the person causing the body to be buried. Relatives present or in attendance are first required to attend to the registration. The registration must be made within five days of the death, or within the same time written notice of the death sent to the Registrar, accompanied by a certificate of the cause of death, signed by a registered medical practitioner, if any such attended the deceased during his last illness. If notice is sent, information must nevertheless be given and the register signed within fourteen days from the death. It is important that every death should be registered and a certificate obtained before the funeral and delivered to the clergyman or other person who performs the funeral or religious service. If at the end of fourteen days the *death is not registered*, the Registrar may require any one of the 'above-mentioned persons to attend to register at a

stated time and place. Failure to comply involves a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above-mentioned periods, unless the Registrar is requested to attend at a residence, when a fee of one shilling is payable. After twelve months no death can be registered without the Registrar-General's consent and on payment of fees amounting to ten shillings.

A body must not be disposed of until (1) either the Registrar has given a certificate to the effect that he has registered the death, or (2) until the Coroner has made a disposal order. (*Births and Deaths Registration Act*, 1926, ss. 1, 2).

A person disposing of a body must within ninety-six hours deliver to the Registrar a notification as to the date, place, and means of the disposal of the body (*ib.* s. 3).

"Still-born" child. (*See* under Births (Registration), p. 255).

Death at Sea.—The master of a British ship must record any death on board and send particulars to the Registrar-General of Shipping.

Death Abroad.—Consular Officers are authorised to register deaths of British subjects occurring in their districts.

In Scotland, the rules of registration are similar, but (1) the death must be registered within 8 days; (2) the medical man concerned must give a certificate of death to the Registrar in terms of the Registration of Births, &c. (Scotland) Act, 1854, within 7 days; (3) the informant of a death receives from the Registrar a certificate that the death has been registered. This is given to the undertaker, who delivers it to the keeper of the cemetery. Failure to comply is under penalty in all cases.

CORONERS' INQUESTS.—Coroners' inquests are held in cases of violent and unnatural deaths, such as the case of a person slain or drowned, or dying suddenly, and of any person dying in prison. Coroners do not obtrude into the houses of persons for the purpose of holding inquests, but are sent for by the peace officers, to whom it is the duty of those in whose houses violent or unnatural deaths occur to make immediate communication, whilst the body remains in the same situation as when the death occurred. Inquests are not to be held on Sunday. With a view to avoiding duplication of proceedings it is now provided that if some person has been charged before examining Justices with murder, manslaughter or infanticide, the Coroner shall adjourn his inquest until after conclusion of the criminal proceedings (Act of 1926, s. 20). On application by the Attorney-General the High Court may order a new inquest if the interests of justice so require. A jury is only essential in the five cases specified in the Coroners (Amendment) Act, 1926, but *may* be summoned in any other case if the Coroner thinks fit. The jury is to be composed of not more than 11 nor less than 7 "good and lawful men" (sex disqualification now removed). If the minority is not more than two the Coroner *may* accept the verdict of the majority of the jury. The jury is usually summoned from the householders residing in the neighbourhood in which the death took place. Any person summoned as a *witness* is bound to attend. The fine for defaulting *jurymen* or *witness* is any sum not exceeding £5. (*See*, generally, the *Coroners Act*, 1887, and the *Coroners (Amendment) Act*, 1926.)

In *Scotland* there is no Coroner. In ordinary cases of sudden death a private inquiry is held by the Procurator Fiscal (a Crown official who is the Public Prosecutor in criminal cases in every County, *see* p. 253). The result of such inquiry is reported to the Lord Advocate. In the case of a death occurring in the course of an industrial employment, and in every case in which the Lord Advocate may so order, a public inquiry is held before the Sheriff and a jury.

BURIALS.

The duty of burial is incumbent on the deceased person's Executors (if any appointed); it is also a recognized obligation of the husband of a woman, and the parent of a child, also of a householder where the body lies. Funeral expenses of a reasonable amount will be repayable out of deceased's estate in priority to any other claims. Directions as to place and mode of burial are frequently contained in the deceased's will, or in some memorandum placed with private papers, or may have been communicated verbally to a relative. Consequently steps should be immediately taken to ascertain the deceased's wishes from the above sources. If *Cremation* is desired it is advisable for deceased to leave instructions in writing to that effect. Cremation may not take place if deceased has prohibited that form of burial. Under the Cremation Act, 1902, regulations have been made by the Home Secretary dealing fully with the cremation of a body, disposal of ashes, etc., and containing numerous essential safeguards. A person may legally leave directions for the anatomical examination of his body. As to place of burial—unless closed by order in Council—the parish churchyard is the normal burying place for parishioners, or any person dying in the Parish, but this will only nowadays apply in villages and the smaller towns. In the more populous districts cemeteries have long been established either by the local council, or a private company, and burials will take place there in accordance with the Cemetery Regulations. For an exclusive right to a burial space in the churchyard a faculty is required from the Ecclesiastical Court. Poor persons may be buried at the public expense by a County Council or County Borough Council; and as to place of burial, &c., *see* Poor Law Act, 1930, ss. 75 to 78. A person being found drowned on the sea shore is to be buried by the Overseers of the Parish. As to the necessity for registration of a death before burial *see* Notes under *Deaths*, p. 257.

DIVORCE.

Preliminary.—Matrimonial suits may be conveniently divided into three classes, viz. (1) those in which a declaration against marriage is sought; (2) those in which the marriage is sought to be upheld; and (3) those in which, the marriage being admitted, partial or complete divorce is sought.

(1) *Nullity of Marriage.*—Marriage is void *ab initio* if the parties were in the prohibited degrees of affinity, if it was bigamous, if there was no consent, if one of the parties was insane, or if one of the parties was under the age of consent, *i.e.* 16—Age of Marriage Act, 1929. Inability to consummate a marriage may also be a ground for avoiding it. In such a case a decree of nullity may be obtained.

(2) *Restitution of Conjugal Rights.*—This is a form of relief generally sought by a spouse who

has been deserted. Disobedience to a decree of restitution of conjugal rights, although two years have not elapsed, at once constitutes desertion; and such desertion, if coupled with the husband's adultery, whether committed before or after the decree of restitution, is a ground for granting to the wife a decree of dissolution of marriage.

(3) *Judicial Separation and Divorce.*—The third class of suit includes the suit for judicial separation (which does not dissolve a marriage), and the suit for divorce proper (which, if successful, dissolves the marriage contract altogether and leaves the parties at liberty to marry again). Either spouse may petition for judicial separation on the ground of adultery, or cruelty, or of desertion without cause for two years or upwards. In such a petition a husband may claim damages from the co-respondent. A decree of judicial separation is often made the ground of a petition for divorce. A petitioner who has committed adultery which has not been condoned cannot obtain a judicial separation or a decree of restitution of conjugal rights unless there has been condonation. The fact that a petitioner has been guilty of cruelty or desertion does not, however, debar him from a decree of judicial separation on the ground of adultery unless his conduct has conduced to the adultery.

Divorce.—Where partial or complete divorce is sought, relief can only be obtained upon proof of certain offences which fall under two heads, namely (1) those which are offences under ecclesiastical law, *e.g.*, cruelty, adultery, and unnatural offences; (2) those which are offences by statute, *e.g.*, incestuous adultery, bigamy with adultery, rape, and desertion.

If a husband seeks divorce, it is sufficient for him to prove the wife's adultery, in which case he may obtain damages from the adulterer. In the case of a wife it was formerly not sufficient that she prove mere adultery; but now, by an Act which came into force on July 18, 1923, she may petition for divorce on the ground that, since the marriage and the passing of the Act, her husband has been guilty of adultery. A wife can also obtain divorce if the husband has been guilty of bigamy with adultery, or rape or certain other criminal offences, or of adultery coupled with such cruelty as without adultery would have entitled her to a divorce *a mensa et thoro*, or of adultery coupled with desertion. "Cruelty" is conduct of such a character as to have caused damage to life, limb, or health (bodily or mental), or as to give rise to a reasonable apprehension of such danger. It is cruelty wilfully and recklessly to communicate a venereal disease; and a course of conduct calculated to break the spirit of the sufferer (generally the wife), continued until health breaks down or is likely to break down under the strain, is also a ground for relief.

If a wife gives birth to a child of which her husband could not possibly be the father, that is sufficient proof of adultery.

It is desertion in the legal sense if one party to a marriage, without the consent or against the will of the other, wilfully without cause or reasonable excuse makes the other live apart for two years or more. It is, however, a question of intention. *Powell* v. *Powell* (1922) para. 278. Formerly the only remedy for desertion was a suit for the restitution of conjugal rights: but now desertion without cause may enable the deserted spouse to obtain a degree of judicial separation, and if coupled with adultery, a divorce.

When the decree will be refused.—A decree must be refused, even if the suit is undefended, if the allegations in the petition for divorce are not proved. There is no such thing in the Divorce Court as judgment by default. Other absolute bars to relief are (i) connivance at the adultery of the respondent; (ii) collusion, as where the initiation of the suit is procured by agreement or bargain (but this does not prevent a fresh suit being brought free from collusion); (iii) condonation, *i.e.* complete forgiveness which restores the *status quo*. Forgiveness, without restoration of the wife to her former position, cannot amount to condonation. (*Crocker* v. *Crocker* (1921), P. 25.) There are also certain discretionary bars, as, *e.g.* where the petitioner has been guilty of unreasonable delay, or has been guilty of such wilful neglect or misconduct as has conduced to the adultery.

Intervention by King's Proctor.—At any time during the progress of a suit for dissolution or nullity of marriage, and before the decree *nisi* is made absolute, the King's Proctor may intervene to show cause against making a decree absolute.

Decree Absolute.—Every decree of dissolution or nullity is in the first instance a decree *nisi*, and is not made absolute until the expiration of six calendar months. The marriage subsists until the decree is made absolute. After that date either spouse may marry again; but a man may not marry the sister of his divorced wife whilst the divorced wife is alive. A divorced wife may call herself by her late husband's name. Persons who have been divorced may re-marry.

Children.—When a suit has been commenced, the children should not be removed from the person in whose custody they are at the time. Until a suit for judicial separation, nullity, or dissolution of marriage has been dismissed, the Court may make orders for the custody, maintenance, and education of children. Either spouse may make applications for access to the children.

Alimony.—A wife may in any cause file a petition for alimony (*i.e.*, means of support) pending suit, provided evidence of the marriage is adduced. The right to alimony continues until there is a decision against the wife in the court of first instance. The amount may be agreed between the parties, otherwise one-fifth of the joint incomes is generally allowed. An order for *permanent* alimony may be obtained by a wife who has obtained a final decree of judicial separation.

Protection Orders.—A deserted wife may apply to a court of petty sessions or to the Divorce Division for an order to protect any money which has come to her after such desertion against her husband and his creditors. Disobedience to the order renders a party retaining the property liable to restore it and to pay twice the value thereof.

Costs.—Where a suit is about to be set down for hearing, the wife, if she has not sufficient separate estate, may obtain payment from her husband of a sum sufficient to cover her costs to date; and where a decree has been obtained against her for judicial separation on the ground of adultery, she may defend herself at his expense should he afterwards bring a suit for

dissolution of marriage. If a suit be decided against a wife who has separate estate, she may be condemned in costs. A co-respondent may be ordered to pay the whole or any part of the costs of the proceedings.

SEPARATION BY AGREEMENT.

Husband and wife may agree, with or without consideration, to separate and live apart, but the agreement, to be valid, must be followed by an immediate separation. Although usually made by deed, a mere oral agreement is binding. If made, however, with a view to facilitating divorce proceedings it is void. A wife is not bound by a separation agreement if she was forced to make it by threats of violence. A clause which binds the husband to give up the custody of the children will be enforced, unless the Court is of opinion that it is not for their benefit. The agreement usually contains mutual covenants not to sue for the restitution of conjugal rights—a covenant by the husband not to molest the wife, and a covenant by the wife or her trustee to indemnify the husband against debts contracted by her during the separation. The remedy for a breach of the agreement is specific performance.

SUMMARY JURISDICTION.

When a husband has been guilty of assault or has deserted his wife, or has been guilty of persistent cruelty, or of wilful neglect to maintain her or her infant children, or where he is an habitual drunkard, the wife may obtain relief from a Court of Summary Jurisdiction. By an Act which came into force on Sept. 30, 1925, the following grounds for an application were added to those already existing (*a*) cruelty to her children, (*b*) that her husband insists on having marital relations while suffering from a venereal disease, (*c*) that he has compelled her to submit herself to prostitution. A husband may apply on the ground that the wife has been cruel to his children. Relief may also be obtained by a husband whose wife is an habitual drunkard. The Court may declare that the applicant is no longer bound to cohabit with the other spouse. Where a wife is the applicant, the legal custody of children under sixteen may be given to her, and the husband may be ordered to pay a weekly sum not exceeding £2. Where the husband applies, the custody of all the children of the marriage may be given to him, and the wife may be committed to an inebriates home. If the wife has been guilty of adultery, no order will be made on her application unless there was condonation; and if, having obtained an order, she commits adultery, the order may be discharged, but not if the court is of opinion that the husband conduced to the adultery by failing to make payment of the separation allowances. An order may be altered, varied or discharged at any time on cause being shown. All applications for relief must be made within six months of the ground of complaint.

DOMESTIC SERVANTS.

"Domestic Servant" signifies, in law, a person employed in and about a residence, *e.g.*, cook, butler, gardener, &c.; but does not include, *e.g.*, a governess or tutor. By general custom, one calendar month's notice, given at any time on either side, is required to terminate the contract of domestic service, but the Courts have recognized a custom for termination at the end of the first month if notice is given at the end of the first fortnight.

Dismissal without notice is justified in the event of wilful disobedience to a reasonable order, gross misconduct, dishonesty, incompetence, or permanent incapacity. A "character," however unfavourable, is a privileged statement, so long as given without malicious intent.

The Workmen's Compensation Acts impose serious liabilities upon an employer in the event of death or disablement of a servant from an accident in the course of employment, and prudent employers will protect themselves by a Policy, which can be obtained through the leading Insurance Companies for a small annual premium.

THE FRANCHISE.

The Representation of the People (Equal Franchise) Act, 1928, considerably amended both the qualifications for the franchise and the mode of registration of electors, and assimilated the franchises for men and women both for Parliamentary and Local Government elections.

PARLIAMENTARY.

The qualifications for the franchise are now the same for men and women. A person is entitled to be registered as a Parliamentary elector who is 21 years of age, and not subject to any legal incapacity; and

(*a*) Has the requisite residence qualification; or (*b*) has the requisite business premises qualification; or (*c*) is the husband or wife of a person having a business premises qualification.

Residence is the actual inhabitancy of premises, *i.e.*, where a person's home is and where he sleeps. The residence must have been during the whole of the qualifying period, *i.e.*, three months, in the constituency or in another constituency in the same Parliamentary borough or Parliamentary county. If not, it is essential that the residence should have been successive from a Parliamentary borough or Parliamentary county contiguous to that borough or county. The Administrative County of London is treated as a Parliamentary borough.

Business premises means land or other premises of at least £10 yearly value. The business premises must be occupied for the purpose of the business, profession, or trade of the person to be registered.

Universities.—A person of full age, and not subject to any legal incapacity, who has received a degree, is entitled to be registered as a Parliamentary elector for a University constituency; also a woman who has passed the final examination and fulfilled the conditions required of women by a University which did not at the time the examination was passed admit women to degrees.

LOCAL GOVERNMENT.

The qualifications for the Local Government franchise are now the same for men and women. A person is entitled to be registered as a Local Government elector who is 21 years of age, and not subject to any legal incapacity; and (*a*) is on the last day of the qualifying period occupying as *owner or tenant* land or premises in the electoral area; and (*b*) has during the whole of the qualifying period occupied as *owner or tenant* any land or premises in that area; if that area is not an administrative County or a County borough, then in any administrative

County or County borough in which the area is situate; or (*c*) is the husband or wife of a person who is entitled to be registered in respect of premises in which the person entitled, and the husband or wife reside. There is also a *service qualification* for the Local Government franchise. A person (man or woman) who inhabits any dwelling-house by virtue of any office, service or employment is deemed to occupy the dwelling house as *tenant* and so obtains the Local Government franchise provided the dwelling house is not inhabited by the employer.

REGISTRATION.

Each parliamentary borough and Parliamentary county is an electoral registration area, and for each registration area there is a Registration Officer. Normally, the Town Clerk is the Registration Officer for the Parliamentary Borough and the Clerk to the County Council for the Parliamentary County. It is the duty of the Registration Officer to compile the register of all persons entitled to vote as parliamentary electors or local government electors in his area. It is also his duty to comply with any directions given by the Secretary of State as to the arrangements to be made by the Registration Officer in carrying out the registration.

The electoral lists when prepared are published by the Registration Officer. A copy can always be inspected at his office, and generally at the chief post offices and other convenient places in the area, including Church Porches, Public Libraries, and Local Council Offices. The lists should be examined to see if the entries have been correctly made. If not, claims and objections may be made as by notice directed.

The Index letters showing the nature of the qualifications of an elector are:—

FOR MEN.

R = Residence qualification.
B = Business premises qualification.
O = Occupation qualification.
D = Qualification through wife's occupation.
NM = Naval or military voter.

FOR WOMEN.

Rw = Residence qualification.
Bw = Business premises qualification.
Ow = Occupation qualification.
Dw = Qualification through husband's occupation.

RIGHT TO VOTE.

Every person registered as a parliamentary elector is entitled to vote at an election of a member to serve in Parliament. But at a *General Election* a person shall not vote for more than one constituency for which he or she is registered by virtue of a residence qualification, or for more than one constituency for which he or she is registered by virtue of other qualifications of any kind; which means that a person (man or woman) may, if qualified, lawfully vote twice at a General Election, but one vote must be in respect of a residence qualification, and each vote must be recorded in a different constituency.

ILLEGITIMACY AND LEGITIMATION.

ENGLAND AND WALES.

A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Guardians of the Poor where the child becomes chargeable to the Union or Parish; and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum not exceeding 20*s.* a week. The mother has the custody of her bastard children. No person is required as father of an illegitimate child to give information concerning the birth of such child, and the registrar is forbidden to enter in the register the name of any person as father of the child unless at the joint request of the mother and father. Such person is in that case required to sign the register, together with the mother. An unmarried domestic servant found to be *enceinte* may be peremptorily dismissed without notice; but any attempt to examine without her consent a servant supposed to be *enceinte* renders the employer liable to an action.

LEGITIMATION.—By the *Legitimacy Act*, 1926, which came into force on Jan. 1, 1927, where the parents of an illegitimate person marry or have married whether before or after that date, the marriage, if the father is at the date thereof domiciled in England or Wales, renders that person, if living, legitimate as from Jan. 1, 1927, or from the date of the marriage, which ever last happens. This does not legitimate a person whose father or mother was married to a third person at the time when the illegitimate person was born.

How to Secure Legitimacy.—A person claiming that he, his parent, or any remoter ancestor has become legitimated, may petition the High Court under the *Legitimacy Declaration Act*, 1858, or the County Court for the necessary declaration.

Rights of Legitimated Persons to take Interest in Property.—A legitimated person may take property under an intestacy occurring after the date of legitimation, or under any disposition (e.g. a will) coming into operation after such date, as if he had been legitimate.

Rights and Duties of Legitimated Person.—He must maintain all persons whom he would be bound to maintain had he been born legitimate, and he is entitled to the benefit of any Act of Parliament which confers rights on legitimate persons to recover damages or compensation. The Act specially provides that nothing therein contained is to render any person capable of succeeding to or transmitting a right to any dignity or title.

Persons Legitimated by Extraneous Law.—Broadly speaking, the Act provides that persons properly legitimated abroad shall be recognized as legitimated in England and Wales.

SCOTLAND.

Illegitimate Children (Scotland) Act, 1930.—The mother of an illegitimate child may obtain a decree of affiliation and aliment against the father. The process may be raised either in the Court of Session or the Sheriff Court, but usually is in the Sheriff Court. Where in any action of affiliation and aliment the Court finds that the defender is the father of the child, the Court shall in awarding any sum in name of inlying expenses, or in name of aliment, have regard to the means of the pursuer and the defender, and the whole circumstances of the case. The court may, upon application by the mother or by the father of any illegitimate child, or in any action for aliment for an illegitimate child, make such order as it may think fit regarding the custody

of such child and the right of access thereto of either parent, having regard to the welfare of the child and to the conduct of the parents and to the wishes as well of the mother as of the father and may on the application of either parent recall or vary such order. The obligation of the mother and of the father of an illegitimate child to provide aliment for such child shall (without prejudice to any obligation attaching at common law) endure until the child attains the age of sixteen years.

By Scots Law an illegitimate child is legitimated by the subsequent marriage of its parents provided there was no impediment to the marriage of the parents at the time of the conception of the child. Such legitimation is recognised by International Law so far as the laws of particular countries allow it. It is valid in England except that such a child cannot succeed to real estate in England on intestacy. After the marriage of the parents such a child may be registered as legitimate by warrant of the Sheriff.

JURY SERVICE.

Preliminary.—The juries with which the public are most concerned are the grand juries; juries summoned to try causes in the High Court, at assizes and county courts; and those summoned to try criminal cases at assizes, the Old Bailey, and courts of Quarter Sessions, and coroners' juries.

Qualifications.—All natural-born subjects of the King and aliens domiciled for ten years or more, being men or women between 21 and 65, are liable to serve as jurors.

The sex disqualification was removed in 1919, and women are now liable to serve, but a judge may order that the jury shall be composed of men only or of women only, or may, on an application made by a woman, grant her exemption in respect of any case by reason of the nature of the evidence to be given or of the issues to be tried.

The qualification of a juror is a *property* one—that is to say, he or she must be a person who owns property or pays rates. A householder or shopkeeper in the City of London who owns personal estate worth £100; a resident in a county or borough owning £10 a year in real estate or rent charge, or £20 in leaseholds; or a householder in a county or borough occupying property whose net annual value is assessed at not less than £30 a year in Middlesex and the County of London, or £20 in other counties, and occupiers of houses with not less than fifteen windows, are all compellable to serve as jurors unless exempted or disqualified.

Exemptions and Disqualifications.—Aliens (subject as above), felons, lunatics, imbeciles, deaf or blind persons are disqualified from serving on juries, while the following classes of persons (amongst others) are exempt—peers, members and officers of both Houses of Parliament, clergymen and priests, ministers of any congregation of Protestant dissenters and Jews, whose meeting place is duly registered, judges, barristers, solicitors (if practising), officers of the supreme court, magistrates, clerks of the peace, sheriffs' officers and servants of such officers, justices of the peace, members of local bodies, governors of prisons and gaolers, superintendents, &c., of lunatic asylums, doctors and pharmaceutical chemists (if actually practising), dentists, officers and men in Navy, Army, Air and Territorial Forces, licensed pilots, postal, custom and inland revenue servants.

Special exemption.—A judge, and, by virtue of S. 3 of the Juries Act, 1922, the sheriff, may for good reason excuse attendance on any particular jury.

Jury Lists.—Lists of juries are now prepared in accordance with the Juries Act, 1922, the names of persons apparently qualified as Jurors being so marked on the Electors Lists (exhibited at Town Halls, Public Libraries, in church porches, &c.). Persons who deem themselves to be entitled to be exempted should communicate with the registration officer, for all whose names appear on the Jury List as finally settled are liable to serve.

Grand Juries.—The function of the grand jury is to make presentments on oath to judicial bodies or personages, mainly of accusation against persons against whom criminal proceedings are pending. The jurors have to say in effect whether there is a *primâ facie* case against the accused, against whom an indictment has been prepared, and if they are satisfied of this they find "a true bill"; if not, they "ignore the bill" and the accused is discharged.

Juries in Criminal and Civil cases.—An accused person against whom a true bill has been found is tried by a "jury sworn." A "panel" of jurors are summoned to attend the court on a particular day, and it is from amongst them that the jury who are to try the prisoners are selected at random (an interesting note on the selection of jurors will be found in *Halsbury's Laws of England*, Vol. 18, p. 246). In a criminal case the prisoner has a right of challenge which *is of two kinds—a challenge to the array—i.e.*, the whole number of jurors summoned (which is so rare that it need not be further considered) and a challenge to the poll, *i.e.*, to individual jurors, which may be peremptory or for cause. Peremptory challenge, or challenge without cause, exists only as of right in treason and felony, and the prisoner can only challenge a limited number without reason. In the exercise of this right prisoners frequently object to the women on the jury. "Challenge for cause" sometimes takes place on the ground that the proposed juror is a peer or is alleged to have committed some crime which makes him infamous.

Except upon trials for murder, treason, and treason felony juries after being sworn may separate, *e.g.*, for lunch and at night. The verdict must be given in open court in the presence of all the jurors, and in cases of treason and felony in the presence of the defendant. It must be unanimous, except that in civil cases the parties may agree to take a majority verdict.

Special Juries.—Special Jurors are selected from persons having larger property qualifications, *e.g.*, the occupier of dwelling house in a large town rated at not less than £100. Trial is generally by Common Jury, but in any cause or matter at Assizes or in the High Court an order for a Special Jury may be obtained in certain cases.

Payment of Jurors.—A Special Juror is entitled to a fee of one guinea for each case in which he is sworn to act, whereas a Common Jury is only entitled to 1*s.* on each cause tried in the High Court or a County Court; and on Circuit, 8*d.* In Criminal Cases the jury is entitled to and, in fact, receives nothing. At Inquests, held before Coroners, the jurors are

entitled to such fee as the local authority may permit the coroner to pay.

A juror is not accountable for, nor will any action lie against him, in respect of anything said or done by him in discharge of his office. If he fail to appear in the High Court or at assizes when duly summoned he may have to pay a fine of £10, while non-appearance at a county court may involve a fine of £5.

Coroners' Juries.—(*See* Deaths — Coroner's Inquests, page 258.)

LEGAL AID FOR THE POOR.

Civil Cases.

A system now exists for giving legal aid to poor persons in civil proceedings—including divorce—administered by the Law Society, Chancery Lane, W.C. 2, and through various Provincial Law Societies. Under this system committees are now established throughout England and Wales. Anyone desiring this form of aid may apply to the nearest "Poor Persons Committee" for a Poor Persons Certificate, and if this is granted a Solicitor and Counsel will be allotted to act without remuneration. The Certificate can be given if the poor person is not worth £50 (excluding wearing apparel and trade tools) and the usual income does not exceed £2 a week. In special circumstances above figures may be £100, and £4 a week. The Committee may require the poor person to deposit a sum not exceeding £5 (in the first instance) to cover out-of-pocket expenses of the conducting solicitor.

Divorce proceedings under the Poor Persons system may be commenced at the Divorce Registry in London or in one of the numerous District Registries in the Provinces now authorised for the purpose, and the trial or hearing may be in London or at the Assizes at one of the many towns at which Divorce business may now be taken under the Rules of the Supreme Court.

Criminal Cases.

The Poor Prisoners Defence Act, 1930, provides for free legal aid in criminal proceedings in specified cases. On trial for an *Indictable offence* the person charged may have free legal aid, with Solicitor and Counsel, if Justices or Judge of trial court grant a *Defence Certificate*. If the person's means are insufficient, such Certificate *may* be granted in cases where desirable, and *must* be given for a murder charge. In Courts of Summary Jurisdiction, assuming insufficient means, a Defence Certificate may be granted to a person if considered desirable to do so owing to gravity of charge or exceptional circumstances.

Scotland.—In every town there are Solicitors for the Poor, and in the Court of Session there are Counsel for the Poor, all of whom act gratuitously. Any class of litigation may be undertaken for poor persons, but the operation of the "Poor's Roll" is chiefly important in matrimonial and bastardy cases. Legal services are rendered free of charge, and no Court dues are payable. In cases of divorce application must be made to the Court of Session. In cases of separation simply, application may be made to the Sheriff Court. The means that preclude a person from the benefit of the Poor's Roll are not fixed, and each application depends on its own circumstances. The Poor's Roll was established in 1424.

MARRIAGES.

BY BANNS OR LICENCE.

BANNS OF MARRIAGE.—The Marriage Act, 26 Geo. II. c. 33, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony, after the Second Lesson. Where the parties reside in different parishes, the banns must be published in both, the minister giving his certificate of the same to be handed to the minister of the parish where the marriage takes place. Under the Marriage Measure 1930, banns may be published and marriage solemnized in the parish church *which is the usual place of worship* of the persons to be married or either of them although neither of such persons dwells in such parish; but this publication of banns is *in addition* to any other publication required by law. The law provides specially for the case where one of the parties resides in Scotland, the publication being then in the parish church. In like manner in Scotland the publication takes place in the parish church, in whatever church the parties are married. It may be noted that, by Scottish law only, omission to publish the banns does not invalidate the marriage, because it would still stand as an irregular marriage carried out by consent before witnesses (see sub-tit., "Marriages in Scotland," *post*). The names by which the parties are known are sufficient for publication of banns, so that a variance from the strict baptismal name is not important. But where wrong names are designedly given, *for the purpose of concealment or* otherwise, the case is different, and the marriage may be null and void (*Midgeley* v. *Wood*, 4 Sw. & Tr. 267). Where a wrong and fraudulent name is given by one party only, and the other party is innocent, the validity of the marriage is not affected.

The Bishop may license a Chapel of Ease for the celebration of marriages; but where a district has been assigned to a chapel, and it becomes a vicarage, or "ecclesiastical parish," the option ceases, and the banns must be proclaimed and marriage celebrated therein, and not in the "mother church" or that of the civil parish.

If three months be permitted to elapse from the last time of publication, the banns become useless, and the parties must either obtain a licence, or submit to the republication of banns. The minister ought to satisfy himself that the parties are of full age, or that the consent of parents is obtained, and it is usually on the score of insufficiency of age that banns are "forbidden." By the Act 6 & 7 Will. IV. c. 85, a marriage may be performed in church on the superintendent registrar's certificate without banns, provided that the incumbent's consent is obtained. One of the parties must be resident within the *Ecclesiastical* parish of the church in which the marriage is to take place.

MARRIAGE LICENCES are of two kinds—(1) the Common or Ordinary Licence granted by the Archbishops and Bishops, through their Surrogates, for marriage in any church or chapel duly licensed for marriages; (2) the Special Licence granted by the Archbishop of Canterbury for marriage at any time or in any place on good reason being shown (see p. 264). The Act of 1823 is severe on the clergy, making it a felony for any clergyman to marry the parties in the absence of banns or licence; and every Registrar or other person who knowingly unduly solemnizes

a marriage is also guilty of felony. By a subsequent alteration in the law, the hours for marriage were extended, and they are now from 8 a.m. to 3 p.m.

GENERAL NOTES.—The minister should be careful that there are two or more witnesses present, and that two witnesses attest the entries in the register books, which are kept in duplicate.

All civil jurisdiction over marriage was taken away from the Ecclesiastical Courts by the Divorce Act of 1857. An incumbent may, under Section 56 of this Act, refuse to marry a divorced person whose marriage has been dissolved for his or her adultery, but must allow another clergyman of the diocese to perform the service.

A MARRIAGE CERTIFICATE is nothing more than a copy of the entry in the church register; and the customary fee is 2*s.* 6*d.*, and a stamp duty of 1*d.* Searches in the register-books may be made on payment of small fees, viz., 1*s.* for a single year, and 6*d.* additional for every other year. There are small fees, regulated by custom, on the certificate given of banns in one parish for marriage in another. MARRIAGE FEES are not uniform, and if excessive there is power with the Diocesan Chancellor to moderate them. With those who are in a position to afford it, it is usual to pay a guinea to the clergyman, and 5*s.* to the clerk; and the usual fees are paid although a stranger-clergyman be invited to perform the service.

INFANTS cannot be lawfully married without the consent of certain persons. The law on the subject is to be found in the Guardianship of Infants' Act which came into force on Sept. 30, 1925. Where both parents are living both must consent; where one is dead, the survivor; or if there is a guardian appointed by the deceased, the guardian and the survivor. The *Age of Marriage Act*, 1929, prohibits any marriage where either party is under 16 years of age.

MARRIAGE LICENCES FOR ESTABLISHED CHURCH.

MARRIAGE LICENCES can be obtained in London by application at the *Faculty Office* (23 Knightrider St., Doctors' Commons, E.C.4), at the *Vicar-General's Office* (1 The Sanctuary, Westminster, S.W.1), and at the *Bishop of London's Diocesan Registry* (1 Dean's Court, Doctors' Commons, E.C.4), by *one of the parties* about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the *Bishop's Diocesan Registry only enable* the parties to be married in the diocese in which they are issued; those procured at the Faculty Office are available for London and all England and Wales; those procured at the Vicar-General's office (hours in both offices 10 to 4; Saturdays 10 to 1) are available for London and all England, except the Province of York. No instructions, either verbal or in writing, can be received, except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to thirty shillings, in addition to the cost of stamp, 10*s.* 0*d.* *No previous notice is required and the licence is available as soon as it is issued.* The cost of licences through a clerical surrogate in the country varies, according to the diocese, from £1 15*s.* to £3 12*s.* 6*d.* By the 4th George IV. c. 76, it is enacted, in order to avoid fraud and *collusion* in obtaining licences for marriage, that before any such licence be granted one of the parties shall make a declaration, on oath, that there is no legal impediment to the intended marriage; and also that one of *such parties hath had* his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the boundary of the parish church, or the district parish in the church of which the marriage is to be solemnized.

It may be added that in the country there may generally be found a parochial clergyman who is also a surrogate, before whom the above-mentioned affidavit may be taken, and whose office it is to deliver the licence personally to the applicant. (In some parts of the country it is necessary for the surrogate to procure the licence from the Bishop's registry.)

SPECIAL MARRIAGE LICENCES (FOR ESTABLISHED CHURCH).

SPECIAL LICENCES are granted by the Archbishop of Canterbury, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, &c.; but the reasons assigned must meet with his Grace's approval. Application must be made to The Faculty Office, 23 Knightrider Street, Doctors' Commons, E.C. 4 (*tel.*, 6834 Central). Fees for licence stamp, &c., £25.

BEFORE A REGISTRAR AND IN NON-CONFORMIST BUILDINGS.

Marriages can take place in a District Register Office or in a Nonconformist building registered for marriages, (1) by Certificate, (2) by Licence. Notice of such marriages must be given personally to the Superintendent Registrar, a Registrar of Births and Deaths, a Registrar of Marriages, or the deputy of such officer. A marriage at a register office takes place in the presence of the Registrar of Marriages and the Superintendent Registrar; a marriage at a registered building takes place in the presence of the Registrar of Marriages, unless it is had under the provisions of the Marriage Act, 1898, respecting which see below. In each case the presence of at least two witnesses is necessary.

NOTICE OF MARRIAGE BY CERTIFICATE.

If both parties reside in the same registration district, they must both have resided there for seven days before the notice can be given. It may then be given by either party.

If the parties reside in different registration districts, notice must be given by each to a registration officer in the district in which he or she resides, and the preliminary residential qualification of seven days must be fulfilled by each before the notice can be given.

NOTICE OF MARRIAGE BY LICENCE.

One notice only is necessary, whether the parties live in the same or in different registration districts, and either party may give the notice.

If both live in the same district, one of them must have lived there for fifteen days before the notice can be given.

If they live in different districts, and both have fulfilled the necessary residential qualification, notice may be given in either district. If one only has fulfilled the qualification, the notice must be given in the district in which the residence has been fulfilled, and the other party must be resident in England or Wales when the notice is given.

The notice contains particulars as to names, ages, residence, length of residence, and the building in which the marriage is to take place. It also contains a declaration that there is no legal impediment to the marriage, and, in the case of minors, that the consent of the person whose consent to the marriage is required by law, has been duly given. A person making a false declaration renders himself or herself liable to prosecution for perjury.

ISSUE OF CERTIFICATE (WITHOUT LICENCE).

After the lapse of twenty-one clear days from the date of the entry of the notice in the notice-book, the Superintendent Registrar may, provided no impediment is shown, issue his certificate for the marriage, which can then take place at any time within three calendar months from the date of the entry of the notice.

ISSUE OF CERTIFICATE AND LICENCE.

After the lapse of one week-day (not Christmas Day or Good Friday) from the date of entry of the notice, the Superintendent Registrar may, provided no impediment is shown, issue his certificate and licence for the marriage, which can then take place on any day within three calendar months from the date of entry of the notice.

DOCUMENTS TO BE PRODUCED AT THE MARRIAGE.

(1) *Marriage by Certificate*:—
  a. If both parties live in the same district:—The certificate of the Superintendent Registrar of that district.
  b. If they live in different districts:—A certificate from the Superintendent Registrar of *each* district.

(2) *Marriage by Licence*:—The certificate and licence of the Superintendent Registrar of the district in which the notice is given.

PLACE OF MARRIAGE.

The marriage must generally take place at a building within the district of residence of one of the parties, but if the usual place of worship of either is outside the district of his or her residence, it may take place in such usual place of worship, provided that it is not more than two miles distant from the boundary of the district in which the notice is given; and if there is not within the district of residence of either party a registered building within which marriages are solemnized according to the rites and ceremonies of the religious denomination to which the parties belong, it may take place in a registered building of the required denomination in the nearest district.

A marriage which has been duly celebrated in a register office in Ireland may be proved by the certificate of such marriage (*Guillet* v. *Guillet*, 27 T.L.R. 416).

MARRIAGE CEREMONY.

The marriage must be solemnized between the hours of 8 a.m. and 3 p.m., with open doors. Each of the parties must declare as follows:—"I do solemnly declare that I know not of any lawful impediment why I, *A. B.*, may not be joined in matrimony to *C. D.*"; and each of the parties must say to the other, "I call upon these persons here present to witness that I, *A. B.*, do take thee, *C. D.*, to be my lawful wedded wife [*or* husband]." A wedding-ring may be, and is generally, used at a marriage at a register office.

MARRIAGE ACT, 1898.

The presence of a Registrar of Marriages is not necessary at marriages at Nonconformist registered buildings which have adopted the provisions of this Act. The Act (which does not apply to Scotland or Ireland, or to marriages according to the usages of the Jews or of the Society of Friends) provides for the appointment of an "authorised person" (a person, usually the minister or an official of the building certified by the trustees or governing body as having been duly authorised for the purpose) who must be present at and must register the marriage. If the presence of a Registrar is required at a marriage at a building at which the provisions of the Act have been adopted, the fact must be stated when notice of the marriage is given, and the consent of the minister or trustees to the Registrar's attendance must be obtained

The parties must at some time during the ceremony make the following declarations:—

"I do solemnly declare that I know not of any lawful impediment why I, *A. B.*, may not be joined in matrimony to *C. D.*"

Also each of the parties must say to the other:—

"I call upon these persons here present to witness that I, *A. B.*, do take thee, *C. D.*, to be my lawful wedded wife [*or* husband]";

or, in lieu thereof:—

"I, *A. B.*, do take thee, *C. D.*, to be my wedded wife [*or* husband]."

NAVAL MARRIAGES ACT, 1908.

This Act provides that any officer, seaman, or marine borne on the books of one of His Majesty's ships who wishes to marry may, if the marriage is to take place at a register office or a Nonconformist registered building, give notice to his commanding officer, who, after the lapse of twenty-one clear days, can issue a certificate for the marriage. The other party must give notice in the usual way to a registration officer in the district in which she resides.

If the marriage is to take place at a church of the Church of England, the chaplain or commanding officer must publish the banns on board the ship on three successive Sundays: he can then issue a certificate of publication of banns. The banns must also be published in the church in which the marriage is to take place.

No marriage by licence can take place under this Act.

MARRIAGE FEES.

	s.	*d.*
For entering notice of a marriage by certificate in the marriage notice-book	1	0
For entering notice of a marriage by licence in the marriage notice-book	1	0
For a certificate for marriage without licence	1	0
For a certificate for marriage by licence	1	0
For a licence for marriage	30	0
Stamp duty on a licence for marriage	10	0
For a marriage by certificate in the presence of a Registrar	5	0
For a marriage by licence in the presence of a Registrar	10	0

Exclusive of the fee for a certificate of the marriage ("marriage lines"), the total fees for a marriage by certificate, when the parties live in the same district, amount to 7*s.*; if they live in different districts, to 9*s.*

For a marriage by licence the total fees are £2 12*s.* 0*d.*

MISCELLANEOUS INFORMATION RESPECTING MARRIAGES.

Parties should be married in the name in which they are generally known.

A marriage may take place at a registered building before a Registrar without religious ceremony if the consent of the trustees is obtained.

If parties who have been married at a register office desire to go through a religious ceremony at a church, they may do so on production to the incumbent of a certificate of the register office marriage, but this ceremony is not recorded as a marriage in the register books.

A divorced person desiring to marry again in a register office or registered building must give notice to the Superintendent Registrar, to whom a copy of the divorce decree must be produced.

In Wales, and in places where the Welsh tongue is used, the declaration and contracting words may be said in Welsh, as provided by Section 23 of the Marriages and Registration Act, 1837.

If both parties are Jews, they must give notice to a registration officer in the usual way, and may marry according to their usages in a synagogue or private dwelling-house at any hour; the marriage must be registered by the secretary of the synagogue of which the man is a member.

If both parties are members of the Society of Friends (Quakers), or if, not being in membership, they have been authorised by the Society of Friends to solemnize their marriage in accordance with its usages, they must give notice to a registration officer, and may be married in a Friends' meeting-house; the marriage must be registered by the registering officer of the Society appointed to act for the district in which the meeting-house is situated. The presence of a Registrar of Marriages is not necessary at such marriages of Jews or members of the Society of Friends.

Relaxations have been made by *Marriage (Prohibited Degrees of Relationship)* Acts, 1907 to 1931, which successively permitted the following marriages, *i.e.*,

With a	deceased wife's sister.	Act—1907.
,,	deceased brother's widow.	Act—1921.
,,	deceased wife's brother's daughter.	Act—1931.
,,	deceased wife's sister's daughter.	do.
,,	father's deceased brother's widow.	do.
,,	mother's deceased brother's widow.	do.
,,	deceased wife's father's sister.	do.
,,	deceased wife's mother's sister.	do.
,,	brother's deceased son's widow.	do.
,,	sister's deceased son's widow.	do.

No clergyman can be compelled to solemnize any of the foregoing marriages, but he may allow his church to be used for the purpose by another minister.

During the lifetime of a person *upon whose decease* a marriage is now authorized (but which would otherwise be prohibited owing to affinity), it is not lawful for a man to contract such a marriage.

MARRIAGE IN ENGLAND OR WALES WHEN ONE PARTY LIVES IN SCOTLAND OR IRELAND.

Notice for a marriage by a Superintendent Registrar's certificate in a register office or registered building may be given in the usual way by the party resident in England. As regards Scotland, the party there, after a residence of fifteen days, should apply to the session clerk to publish banns; as regards Ireland, the party there, after a residence of seven days, must give notice to the District Registrar of Marriages. Notice cannot be given for such marriages to take place by the licence of the Superintendent Registrar.

Marriage of such parties may take place in a church of the Church of England after the publication of banns, or by Ecclesiastical licence.

MARRIAGES OF BRITISH SUBJECTS ABROAD.

British subjects may contract a valid marriage in a foreign country provided they conform to the provisions of the Foreign Marriages Act, 1892. One of the parties to the marriage only need be a British subject.

Where a marriage according to the local law of a foreign country is valid by English law, then, before the marriage is solemnized in that country under the Act, the marriage officer as defined by the Act must be satisfied—

(*a*) That both parties are British subjects; or,

(*b*) If only one of the parties is a British subject, that the other is not a subject or citizen of the country; or,

(*c*) If only one of the parties is a British subject and the other a subject or citizen of the country, that sufficient facilities do not exist for the solemnization of the marriage in the foreign country in accordance with the law of that country; or,

(*d*) If the man is a British subject and the woman a subject or citizen of the country, that no objection will be taken by the authorities of the country to the solemnization of the marriage under the Act.

In the case of any marriage under the Act, where the woman is a British subject and the man a foreigner, the marriage officer must be satisfied—

(*a*) That the marriage will be recognized by the law of the country to which the foreigner belongs; or,

(*b*) That some other marriage ceremony in addition to that under this Act has taken place, or is about to take place, between the parties, and that such other ceremony is recognized by the law of the country to which the foreigner belongs; or,

(*c*) That the leave of the Secretary of State has been obtained.

The marriage must be solemnized by or before a marriage officer as defined by the Act.

It is necessary for one of the parties to the intending marriage to sign a notice stating the name, surname, profession, condition, and residence of each of the parties, and whether each of the parties is or is not a minor, and to give the notice to the marriage officer within whose district both of the parties have had their residence not less than one week then next preceding, and the notice must state that they have so resided.

If the parties reside in different districts, such notice must be given to the marriage officer of the district before whom the intended marriage is to be solemnized, by the party who has resided for a period of not less than one week within the district of such marriage officer.

If one of the parties resides (*a*) in the United Kingdom, or (*b*) in a Colony or India (*a*) notice must be given in like manner as if the parties

resident were about to be married in that part of the United Kingdom in which he or she resides, and in England or Ireland must be given to the superintendent registrar or registrars, and in Scotland must be given by proclamation of banns, and (*b*) such notice must be given by the party dwelling in such Colony or in India as may be provided by any law of that Colony or of the Governor-General of India in Council, or in like manner as if the party were about to be married in that place.

If the non-resident party has dwelt in the district of a marriage officer in a foreign country notice must be given by that party in like manner as if the marriage were to be solemnized by or before such marriage officer, or if the place in a foreign country at which the non-resident party has dwelt is not within the district of a marriage officer the notice may be given to any person authorised by the Secretary of State to receive such notices. Where neither party has resided for a period of not less than one week within the district of the marriage officer before whom the intended marriage is to be solemnized, and (*a*) the marriage cannot conveniently be solemnized at the place where either of the parties has had his or her usual place of abode, or (*b*) the permission of the Secretary of State has been obtained, notice must be given by each of the parties in the place where he or she has had his or her usual place of abode for a period of not less than one week immediately preceding the giving of such notice in the prescribed manner, and a certificate of the giving of such notice obtained.

If the Secretary of State is satisfied that for some good reason the party has not been able to give the required notice and that the marriage is not clandestine and that adequate notice has been given, he may permit the marriage to be solemnized.

Before the marriage is solemnized each of the parties must make on oath

(*a*) That he or she believes that there is no impediment;

(*b*) that both the parties have had their usual place of residence in the district of the consular marriage officer for three weeks immediately preceding, or if they have not both resided there during three weeks then that one of them has so resided, and stating the place where the party who has not so resided has within three months immediately preceding had for three consecutive weeks his or her usual place of abode, and the notice that has been given in that place, or, if neither party has resided there, stating the place or places where each party has within three months immediately preceding had for three weeks his or her usual place of abode, and the notices that have been given in those places.

After the expiration of 14 days after the notice of an intended marriage has been entered, then if no lawful impediment to the marriage is shown, and the marriage has not been forbidden in manner provided by the Act, the marriage may be solemnized. A consular officer holding a warrant for a district can only solemnize a marriage at his own official house. Parties residing within a consular district who may wish to be married under the Act must go to the consular officer provided with a warrant for that district; two or more witnesses are required to be present.

The following fees for marriages under the Foreign Marriage Act are payable to His Majesty's Government:—

	£	s.	d.
For receiving notice of an intended marriage	0	10	0
For receiving notice of a caveat	1	0	0
For every marriage solemnized by or in the presence of a Marriage Officer and registered by him	0	10	0
For certificate by a Marriage Officer of notice having been given and posted up, in case of one of the parties residing outside the consular district in which the marriage is to take place	0	5	0
For attendance by consular officer at a marriage solemnized in accordance with the local law and for registration of the same	1	0	0

Marriages may be solemnized 8 a.m. to 3 p.m.

No religious ceremony is required, but any form according to the creed of the contracting parties may be used. The presence of the duly authorised Marriage Officer is, however, necessary to render the marriage valid. If the ceremonial be that of the Church of England, it can only be performed by a clergyman of that Church.

Marriages solemnized under the Foreign Marriage Acts are legal by English law when both parties are British subjects, and also when only one of them is a British subject, but such marriages are not necessarily valid out of His Majesty's dominions. In cases where one of the parties is a subject of the country where the marriage is proposed to take place, or of a third country, the party in question must previously comply with the requirements of the marriage law of the country to which he or she belongs, so far as it may be possible to do so, in order to render such marriage also valid by the law of that country.

An Englishwoman married to a foreigner follows the nationality of her husband.

In Germany and Switzerland marriages by any foreign consular officer are, in the absence of any treaty stipulations, strictly prohibited.

A marriage which would not be valid in England would be equally invalid if solemnized in an embassy, legation, or consulate abroad. For instance, marriages within the prohibited degrees of consanguinity or affinity would not be valid.

A marriage between Christians in India may be proved in England by an India Office certificate (*Braid* v. *Braid*, 1909, 25 T.L.R. 646).

Marriages may also be solemnized under the "Foreign Marriages Act, 1892," before the commanding officer of any of His Majesty's ships on a foreign station provided he be of such rank and of such vessel as is for the time being authorised for that purpose by Admiralty instructions.

MARRIAGES ABROAD WITH FOREIGNERS ACCORDING TO FOREIGN LAW.

ACT OF 1906.—Under the *Marriage with Foreigners Act*, 1906, any British subject desiring to be married in a foreign country to a foreigner according to the law of the country may, after giving notice of the marriage, obtain a certificate from the registrar that there is no legal impediment to the marriage. In order to obtain the certificate, the rules set out in the schedule to the Act must be complied with. Any persons may enter an objection to a certificate, the validity of which will be decided by the Registrar-General.

A marriage by repute which is valid by the law of the domicile in a foreign country will be recognised as valid by the English courts (*re Green Noyes* v. *Pitkin*, 1909, 25 T.L.R. 222).

MARRIAGES IN SCOTLAND.

According to the law of Scotland marriage is a contract which is completed by the mutual consent of parties. No formalities are required and no consent of parents or guardians is necessary. It can be contracted by a male over 14 years of age and a female over 12. Marriages may be "regular" or "irregular."

A regular marriage is one which is celebrated by a Minister of religion after due notice by the publication of banns or publication by the Registrar. Any Minister of any denomination (including a person officiating at a Quaker wedding) who performs the ceremony is reckoned to be a minister of religion. It must be performed before two witnesses and one of the parties must have resided in Scotland for at least 15 days before the ceremony. Public proclamation is made by (*a*) banns or (*b*) notice by the Registrar. Banns must be proclaimed in the parish church of both parties. It is ordered that the proclamation of banns should be made three times, but by immemorial practice proclamation on one Sunday is sufficient. The Clerk of the Kirk Session of the Parish takes in notices of banns and issues certificates of proclamation. The fee for proclamation may not exceed 2*s.* 6*d.* A certificate of proclamation of banns is only valid for three months.

Under the Marriage Notices (Scotland) Act, 1878, a notice posted up in a conspicuous or accessible place on the board or outer wall of the Registrar's office is equivalent to the proclamation of banns. Exhibition is made for seven consecutive days. Objection may be made within other seven days. If no objections are lodged the Registrar issues a certificate: fee, 2*s.* 6*d.* Such certificate of publication is only valid for three months. Under the Naval Marriages Act, 1908, banns may be published on board one of His Majesty's ships where an officer, seaman or Marine on the ship's books wishes to contract a marriage in Scotland. A declaration under the Marriage Notices (Scotland) Act already referred to may also be filled up and the officer commanding the ship may grant a certificate.

Irregular Marriages are survivals of modes of marriage which were general throughout Europe in mediæval times, Scotland having disregarded the decrees of the Council of Trent invalidating irregular marriages; Scotland following the ancient Canon law. These marriages may be contracted in three ways: (1) by exchange of consent before two witnesses (called in legal language *per verba de præsenti*); (2) by promise of marriage followed by intercourse on the faith of the promise (called marriage by promise, *subsequente copula*); the promise, however, can only be proved by the writing or the oath of the party when action is brought; (3) by constant living together as husband and wife (called marriage by *habit and repute*), *i.e.*, the general repute of the neighbourhood supported by consistent conduct. Marriage by the first mode is only valid if one of the parties has been resident in Scotland for 21 days before the contract is entered into. (This is the result of legislation and not part of the common law of Scotland.) "Gretna Green" marriages were abolished in 1856 by the Act 19 and 20 Victoria, Chap. 96. Marriages thus contracted may be registered if the parties appear before the Sheriff with their witnesses and petition for registration within three months. On the Sheriff granting warrant the Registrar registers the marriage for a fee of 5*s.* 11*d.* The other two forms of marriage before they are held to be valid must be declared by a decree in the Court of Session.

Marriage with a foreigner may be solemnized regularly if one of the parties has a residential qualification and provided that one party has resided in Scotland for 21 days and the minister agrees to dispense with the proclamation of banns in the case of the foreigner. Marriage of a Scottish person with a foreigner, or marriage of two foreigners, may be contracted irregularly if one or other of the parties has resided in Scotland for 21 days.

MOTOR LAW.

The modern Charter of Motor Law is the Road Traffic Act 1930 and Regulations made thereunder by the Minister of Transport. This Act not only consolidated the law by repealing some thirty earlier Acts, but made numerous amendments and new provisions to keep abreast with the rapid development and modern universal use of motor vehicles.

Some of the new features are: Compulsory Insurance against Third-party risks; abolition of speed limit for ordinary private car; publication of a "Highway Code"; physical fitness for driving licence. The following provisions of the law have been selected for special reference in these notes.

Driving Licence.—As to fee, &c., *see* p. 549. No person to drive without a licence, nor employ a person to drive who is not licensed. To be produced to police constable on demand; but no conviction if licence produced at a police station within five days. On application for licence declaration must be made as to any physical disability, &c., certain disabilities will involve refusal of licence.

Speed Limits.—The Act prescribes Speed Limits for various Classes of Motor Vehicles, but for ordinary passenger motor cars (adapted to carry not more than seven, excluding driver) there is now no speed limit. But heavy penalties may be incurred for driving recklessly or at a speed or in manner dangerous to the public having regard to all the circumstances, nature and condition of road, amount of traffic at the time, &c.

Pillion Riding.—Only one person (pillionaire) on a motor-cycle in addition to driver, and then only on proper seat securely fixed behind the driver.

Third Party Insurance.—No person may use, or permit to be used, a motor vehicle unless covered by a Policy of Insurance in respect of third-party risk. There is to be a "Certificate" of such insurance, and this certificate of insurance must be produced by a driver to a constable on demand. Under the Regulations of Transport Ministry an applicant for a car licence under the Finance Acts must with his application produce to the Licensing Authority his Certificate of Insurance.

Highway Code.—The Minister of Transport has compiled a Highway Code as authorised by the Act. It is issued with driving licence, and copies may be obtained from H.M. Stationery Office or booksellers, price 1*d.* The code is

intended as a guide to persons using the road, and may be revised from time to time. Failure to observe any provision of the code is not an offence of itself, but it may be relied on as tending to establish or negative the liability of a party in any proceedings—whether civil or criminal.

Accidents.—In the case of an accident causing damage to any person, vehicle or animal, the driver of the motor vehicle must stop, and on request of any person having reasonable grounds for so requiring, give his name and address and identification of his vehicle. If this is not done on the spot then the accident must be reported at a police station or to a constable as soon as possible, and in any case within 24 hours.

NOTE.—From January 1, 1932, every motor vehicle, but not motor-cycle, must be fitted with a reflecting mirror.

PASSPORTS.

Applications for Foreign Office Passports must be made in the form printed on the back of the Regulations (to be had on application), and enclosed in a cover addressed to "The Passport Office, 1 Queen Anne's Gate Buildings, Dartmouth Street, Westminster, S.W. 1," or to "The Branch Passport Office, 36 Dale Street, Liverpool." The charge for a Passport is *7s. 6d.* Passports are issued in London between the hours of 10 and 4 (Saturdays, 10 to 1), and in Liverpool, 9.30 to 4 (Saturdays, 9.30 to 1). The Passport Offices are *closed* on Sundays and Public Holidays (except in London between the hours of 10 a.m. and noon for cases of *special emergency only*). Passports may be obtained through the post if a Postal Order for *7s. 6d.*, which should be crossed, *made payable to the Passport Office*, is forwarded with the application. Cheques, treasury notes or postage stamps should not be sent in payment. Application should, if possible, reach the Passport Office not less than four days before that on which the Passport is required.

Foreign Office Passports are granted (1) to natural-born British subjects; (2) to the wives and widows of such persons; and (3) to persons naturalised in the United Kingdom, in the British Dominions or Colonies, or in India.

The wife of an alien is deemed to be an alien.

Passports are granted (1) in the case of natural-born British subjects and persons naturalised in the United Kingdom, upon the production of a Declaration by the applicant in the form printed at the back of the Regulations, verified by a Declaration made by a member or official of any *Banking Firm* established in the United Kingdom, or by any *Mayor, Magistrate, Provost, Justice of the Peace, Minister of Religion, Barrister-at-law, Physician, Surgeon, Solicitor, Notary Public or Chartered Accountant*, resident in the United Kingdom and being himself a British subject. The applicant's Certificate of Birth and other evidence may also be required. Applicants serving in His Majesty's Forces may have their declarations verified by their Commanding Officers; (2) in the case of children under the age of 16 years requiring a separate Passport, upon production of a Declaration made by the child's parent or guardian in a Form (B), to be obtained upon application to the Passport Office; (3) in the case of persons naturalised in any of the British self-governing Dominions, upon production of a letter of recommendation from the High Commissioner or Agent-General in London of the State concerned. Persons naturalised or ordinarily resident in any of the Crown Colonies must obtain a letter of recommendation from the Colonial Office.

If the applicant for a Passport be a British subject by naturalisation, the Certificate of Naturalisation must be forwarded to the Passport Office with the Declaration or letter of recommendation. British subjects by naturalisation will be described as such in their Passports, which will be issued subject to the necessary qualifications.

British Passports are only available for travel to the countries named thereon, but may be endorsed for additional countries. The possession of a Passport so endorsed does not, however, exempt the holder from compliance with any *Immigration Regulations* in force in British or foreign countries, or from the necessity of obtaining a *visa* where required.

Passports endorsed as valid for the British Empire are also available for travelling to territory under British protection or mandate, not, however, including Palestine or Iraq, for which countries special endorsements must be obtained.

Foreign Office Passports are available for five years from the date of issue, unless otherwise stated. On the expiration of their period of validity they may be renewed for further consecutive periods of one to five years. In no circumstances are they available beyond ten years from the date of issue. Thereafter, or if at any time the Passport contains no further space for visas, application must be made for the issue of a new Passport.

A Passport cannot be issued or renewed by the Foreign Office on behalf of a person already abroad; such person should apply, in a foreign country, to the nearest British Mission or Consulate, or, within the British Empire, to the nearest Passport issuing authority.

Persons resident in the Irish Free State should make application for their Passports to the Passport Department, Ministry of External Affairs, Dublin.

CERTIFICATION OF PHOTOGRAPHS.

Note.—It is essential that one of the two photographs of the applicant (and wife, if to be included on the Passport) should be certified on the back as shown on the Application Form.

Safe Custody of Passports.

Passports, when not in use, should be kept in a secure place. At the expiration of the period of validity a Passport should be returned to the Foreign Office.

PAWNBROKERS' REGULATIONS.

For the TICKET on goods pledged for 10*s.* or less ..... ½*d.*
On goods pledged for more than 10*s.* ..... 1*d.*

Note.—In addition to the above charge, an additional charge of ½*d.* for each 5*s.* or part of 5*s.* lent is authorized (*Pawnbrokers' Act, 1922*).

On pledges exceeding 40*s.*, for every half-crown or part of half a crown per month ½*d.*
For INTEREST on pledges not exceeding 40*s.*, for every 2*s.* or part of 2*s.*, per month..... ½*d.*
And after the first month any time not exceeding 14 days to be charged as half a month.

FORFEITURE.—Pledges for 10*s.* and under must be redeemed within twelve calendar months and seven days from the date of pledging. After that they become the property of the pawnbroker.

Pledges above 10*s.*, if not redeemed within twelve calendar months and seven days from the

day of pledging, may be sold by auction by the pawnbroker, but may be redeemed at any time before the day of sale.

Within three years after sale the pawner may inspect the account of the sale in the pawnbroker's books on payment of one penny, and receive any surplus produced by the sale. Should there be a deficit, the pawner, or the person producing the ticket, is liable to pay the deficiency. Any deficit on sale of one pledge may be set off by the pawnbroker against surplus on another.

If any pledge is destroyed or damaged by fire, the pawnbroker will be bound to pay the value of the pledge after deducting the amount of the loan and profit—*i.e.*, the loan and profit and 25 per cent. on the amount of the loan.

If any ticket is lost, mislaid, or stolen, the pawner should at once apply to the pawnbroker for a form of declaration to be made before a magistrate, or the pawnbroker will be bound to deliver the pledge to any person who produces the ticket to him and claims to redeem the same.

When the loan is 5*s.* or under, the charge on form of declaration is one halfpenny; when the loan is above 5*s.*, one penny.

SPECIAL CONTRACTS.—A pawnbroker may make a special contract with a pawner in respect of a pledge on which the pawnbroker makes a loan of above 40*s.*, provided that—

(1.) The pawnbroker at the time of the pawning shall deliver to the pawner a special contract pawn-ticket, signed by the pawnbroker.

(2.) The duplicate of the special contract pawn-ticket shall be signed by the pawner.

The pawnbroker may also charge:—For ticket, profit per calendar month, for storage of the pledge, and payment to inspect account of sale, such sums and rates as may be agreed upon at the time of making the contract.

After the first calendar month any time not exceeding fourteen days will be charged as half a month, and any time exceeding fourteen days and not more than one month as one month.

The charge for storage of the pledge will be per calendar month, or any part of a month, in addition to the charges above mentioned.

Pledges may be pawned under special contract for a period of not less than three months.

In all other respects pledges under special contract are subjected to the same rules as to sale by auction, inspection of account of sale, payment of surplus produced by sale, and loss of ticket, as in the case of ordinary pledges for more than 10*s.*

POOR LAW.

The Poor Law in England and Wales is now administered through *Public Assistance Committees*, constituted for Counties and County Boroughs, which take the place of the old Boards of Guardians. The law is consolidated in the Poor Law Act, 1930.

RECEIPTS.

RECEIPTS should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, &c., received.

VACCINATION.

In England and Wales vaccination is compulsory within six months from birth, the obligation to comply with the law being imposed on the parent or other person having custody of the child. The local Public Vaccinator (a doctor appointed by the local authority) will vaccinate free of charge. Penalties are incurred for non-compliance with the law.

Exemption may be obtained if a parent, within four months from the birth, makes a declaration that he conscientiously believes that vaccination would be prejudicial to the health of the child.

WARD OF COURT.

By appropriate legal process an Infant may be made what is termed a Ward of Court in the Chancery Division of the High Court. In this way judicial control of the Infant may be secured, the court assuming and exercising wide powers in respect both of the person and property of Wards of Court. Legal advice will obviously be necessary as to the circumstances in which an order might be made in any particular case.

WILLS.

REASONS FOR MAKING A WILL.—Every man having a wife and family should make his will. However small his estate, it is an imperative duty in most cases, and is safer in every case, to protect the interest of the survivors by a will, and by the appointment of one or more trustworthy persons to carry his wishes into effect. When persons die intestate, having foolishly put off making a will until it is too late, their negligence may deprive those for whom they were most anxious to provide. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being "settled" as it is called—*e.g.*, the income being paid to his widow and the capital being ultimately divided among his children, for this requires the skill of a practised lawyer. Assuming a lawyer is not employed, a person having resolved to make a will must not regard it as a light matter, to be got rid of in a few minutes, but one demanding the most serious attention. It is only after a person is dead, and cannot explain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that admits of another meaning than the one intended. It is better to be prolix than to leave the smallest room for doubt or uncertainty, although the same name or word be often repeated. Sounding phrases are entirely out of place. Avoid the use of "legal terms," such as "heirs" and "issue,' when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed, that is, *signed by the testator in presence of two witnesses*, an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration *of any kind whatever* must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is better to make a new will, revoking the old one, or to add a codicil to the first, which must be duly executed and attested in the same manner as the original will. *A will should be written in ink and very legibly on a single sheet of paper.* Although, of course, forms of wills must vary to suit different cases, the following directions may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others:—

TESTATOR OR TESTATRIX.—The person who

makes the will is the testator, or if the will-maker be a woman, the testatrix.

ESTATE.—By this word is to be understood property of all kinds, both real and personal. Real property includes tithes and advowsons, as well as freehold land and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stocks and shares in companies, and the like.

RESIDUARY LEGATEES.—It is well in all cases to leave to some person or persons "the residue of my estate and effects," although it may be thought that the whole of the property has been disposed of in legacies already mentioned in the will. *It should be remembered that a will operates on property acquired after it has been made.*

TO BEGIN A WILL.—A form in which a will may be commenced is:—"This is the last will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks."

TO END A WILL.—After disposing of the property, the will may be ended as follows:—"And I hereby appoint the said —— sole (or joint) executor(s) of this my Will, and I revoke all former wills and codicils. Dated this —— day of ——, 19—."

EXECUTION OF A WILL AND WITNESSES.—The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately sign their names in his and in each other's presence. A person who has been left a legacy or share of residue in the will, or whose wife or husband has been left a legacy, should not be an attesting witness. Their attestation would be good, but they would forfeit the legacy. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

Opposite to or beneath the testator's signature should be written the attestation clause. The following form of attestation will be found sufficient:—

Signed by the testator [or testatrix, as the case may be], in the presence of us, both present at the same time who in his [or her] presence and in the presence of each other have hereunto set our names as witnesses.	THOMAS SMITH [Signature of Testator.]

William Jones, of Vine Cottage, Silver Street, Reading, Tailor. Henry Morgan, of North Street, Reading, Esq.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same." If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," &c. Any omission in the observance of these details causes delay and expense, and sometimes great difficulty is experienced in procuring an affidavit by one of the attesting witnesses before the will can be admitted to Probate. The stringency of the law as to signature and witnessing of a will is only relaxed in favour of soldiers, sailors and airmen in certain circumstances.

CODICIL.—When any change is required to be made in the disposition of property as stated in the will the change should be embodied in a codicil. A codicil should begin:—"This is a codicil to the will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks, the said will bearing date," &c. A codicil must be dated at the end, and signed and witnessed with exactly the same formalities as the will.

EXECUTORS.—It is usual to appoint two executors, although one is sufficient. The name and address of each executor should be given in full, as follows:—"I appoint John Jones, of number twenty-one, London Street, Ipswich, and Edward Matthews, of number seventeen, Market Street, Lincoln, executors of this my will." An executor may be a legatee. Thus a child or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not necessary; but it is desirable, here as elsewhere, to avoid ambiguity or vagueness.

APPOINTMENT OF TRUSTEES.—The form of appointment of executors will also serve when the estate is left in care of trustees, except that the persons should be designated "executors and trustees." The Public Trustee may be appointed executor or trustee of a will. *See* PUBLIC TRUSTEE, *post.*

TRUSTS OF THE WILL.—When the estate is wholly for the children, the will may read, after the appointment of the executors and trustees:—"I give and devise all my estate and effects, real and personal, of which I may die possessed or entitled to, unto the said John Jones and Edward Matthews, upon trust in equal shares for all or any my children or child living at my death who being sons or a son attain the age of 21 years or being daughters or a daughter attain that age or marry. And for all or any the children or child living at my death, who being male attain the age of 21 years or being female attain that age or marry, of any child of mine who dies in my lifetime leaving children or a child living at my death, such last-mentioned children or child to take the share or shares which their parent would have taken if living at my death, and so that no grandchild of mine shall take whose parent is living and capable of taking." Where the widow is to have a life-interest use the following words: "upon trust for my wife during her life [or during her widowhood], and after her death [or second marriage, which first happens] upon trust in equal shares for all or any my children or child" &c. as before. The words in square brackets will only be used where the widow is to lose her interest if she marries again.

TESTAMENTARY CAPACITY.—A minor cannot make a will. A married woman (married since January 1, 1883) may dispose by will of any real or personal property as her separate property as

if she were a *feme sole* (Married Women's Property Act, 1882, s. 1 (1)). As to the powers of a woman married before that date it is advisable to consult a solicitor.

REVOCATION.—A will is revoked by a subsequent will (but only so far as such subsequent will operates as a virtual revocation, as by making other provisions inconsistent with the previous will; for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing, or otherwise destroying the same. It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of a will, unless, in the case of a will made on or after Jan. 1, 1926, it is expressed to have been made in contemplation of marriage (Law of Property Act, 1925, s. 177); or that after marriage the old will should be reacknowledged, or a new one made.

LAPSED LEGACIES.—If a legatee die in the lifetime of the testator, the legacy or share of residue lapses and falls into the residue, excepting only in cases where the legatee is a child or "other issue" of the testator and leaves issue living at the testator's death, and the will does not provide for the class of children or issue being ascertained at some period other than the death of the testator. For instance, if a share of residue is left to "all my children living at my wife's death," the share of a child who died in the wife's lifetime would lapse even though the child should leave issue.

TO ONE PERSON ABSOLUTELY.—When it is the intention to leave all the property to one person, as for instance a wife or child, the will may read:—"I devise and bequeath all my estate and effects, real and personal, which I may die possessed of or entitled to, unto my wife Mary Smith, absolutely."

TO CHILDREN UNDER AGE.—When estates are left wholly or in part to children under the age of 21 years, trustees should be appointed to hold the property in trust for those to whom it will ultimately belong. The trustees will have power to apply the annual income for their maintenance. A wife may be appointed a trustee, or may be sole trustee. It is also usual to appoint the executors or some near relative, guardians of children under age. By the Guardianship of Infants Act, 1896, the mother of a child, if she survives the father, becomes the guardian of such child, either alone, if no guardian is appointed, or jointly with any guardian appointed by the father.

ALL PROPERTY TO BE INVESTED.—Executors and trustees may be empowered to sell and dispose of an estate, and after the payment of all just debts and expenses to invest the remainder. For this purpose the section headed "Trust Investments" should be consulted.

DUTIES OF EXECUTORS.—After the death of the testator, the duties of the executor are briefly as follows:—The first duty of the executors, or of one of them, is to see that the funeral takes place in a suitable and becoming way; then to make lists of the debts and the assets or property. For purposes of duty it is necessary to estimate the value of the real and personal property left, or get it valued. (For scale of duty see Index, "Estate Duty.") Under the Finance Act, 1894, duties are charged on *all* property in which the testator had a life interest, even though the property may not have been under his personal control. The executor must take the will to the Principal Probate Registry, Somerset House, or to the local District Probate Registry, or to a solicitor, and prove the will. Collect all the property of the deceased and pay all his just debts, and before distributing the estate, if it be a large one, it is necessary in order to relieve the executors from personal liability to advertise in certain London and local newspapers for all claims against the estate to be sent in before a specified date. Pay the legacy or succession duty. Dispose of the residue of the property as directed in the will. All the testator's real estate becomes vested in the executors, who hold the same as trustees for the persons beneficially entitled under the will or otherwise, and such persons can only acquire a title to the estate through the executors, after payment of all charges and liabilities to which the same is subject. Executors are not obliged to act, neither is it necessary that all the executors should act: one alone is competent to prove a will and carry out its provisions. In small estates, probate and letters of administration may be obtained through an Inland Revenue Office.

ADMINISTRATORS.—If an executor has not been appointed in the will, or if the executor be dead, or does not wish to act, the residuary legatee nearest of kin to the deceased, or a legatee under the will, is entitled to act and administer the will, and is called administrator.

WHERE TO FIND A PROVED WILL.

To find a will proved before Jan. 1, 1858, the date on which the Court of Probate Act, 1857 (20 & 21 Vict. c. 77), came into operation, it is best to search first—if the testator was a man of substance—the index to the wills proved in the Prerogative Court of Canterbury, which is kept at Somerset House. Failing this, the will is probably to be found in the registry of the district in which it was proved. The wills proved prior to 1858 were all distributed among the district registries when these institutions came into existence. This is the only broad rule which can be laid down to guide a searcher. To find a will proved since 1858 is a far simpler task. It must have been proved either at the Principal Registry at Somerset House, or a District Registry. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and a copy of any will read on payment of a search fee of one shilling. In the latter case, the original will, proved in the District Registry, is there kept, and may be seen or a *copy* obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probate and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about October of the following year. The reader may not copy any part of the will except the names and addresses of the executors and the date and private number of the will. If he desires a copy, he can order one to be made, for which he will pay according to the length of the will, at the rate of sixpence a folio (ninety words) for an ordinary copy, and ninepence a folio for a certified copy, which can be produced and read

in any court of law. The 29 District Probate Registries established by the Act of 1857 are at:—Bangor, Birmingham, Blandford, Bodmin, Bristol, Carlisle, Carmarthen, Chester, Durham, Exeter, Gloucester, Ipswich, Lancaster, Leicester, Lewes, Lincoln, Liverpool, Llandaff, Manchester, Newcastle-upon-Tyne, Norwich, Nottingham, Oxford, Peterborough, Shrewsbury, Taunton, Wakefield, Winchester, York.

SAFE CUSTODY OF WILLS.

There is a depository for the safe custody of the Wills of *living persons* at Somerset House. A will may be deposited personally, or through the Registrar of a District Registry, who will transmit the will to London in a registered letter. The fee is 15*s.*, with an additional 5*s.* if forwarded by a District Probate Registrar. A will once deposited will not be given up to anybody, but must remain in the registry until the testator dies. Any will appointing the Public Trustee as Executor may be deposited with him for safe custody. (*See* PUBLIC TRUSTEE, *post.*)

PROBATE OF WILLS.

OBTAINING PROBATE OR ADMINISTRATION WITHOUT THE AID OF A SOLICITOR.

The entrance to the office for personal applications is in the south-east corner of the Quadrangle of Somerset House, Strand, Room 44. The applicant should bring the registrar's certificate of the death of the deceased, or an official certificate of burial, and the will, if there be one, and full details of the property and debts of the deceased.

If there be no will or no executor be appointed, or the executor will not act, two sureties must be obtained to enter into a bond for the faithful administration of the estate, unless the whole personal estate does not exceed £50, when one surety only will be required. They need not attend upon the first visit.

In no case can any correspondence be entered into; nor can an interview be given to any agent. The business of the department can be transacted only with the applicant in person.

Application may be made at a District Probate Registry instead of at Somerset House.

Where the whole real and personal estate, without the deduction of debts or funeral expenses, does not exceed £500, application may be made at one of the Inland Revenue Offices in the suburbs and many principal towns throughout the country.

Where the deceased has left no will, and the whole personal estate does not exceed £100, the widows, or children, if residing at more than three miles from any Probate Registry, may apply to the Registrar of the County Court.

Scotland.—"Confirmation" is the Scottish equivalent of Probate. That is obtained in the Sheriff Court of the County in which the deceased was domiciled at the date of his death or where he had no fixed domicile or died abroad, in the commissariat of Edinburgh. Executors are either "nominate" or "dative." An Executor nominate is one nominated by the deceased in his will. An Executor dative is one appointed by the Court (1) in the case of intestacy or (2) where the deceased had failed to name an executor in his will. In the former case the deceased's next-of-kin are all entitled to be declared executors dative. An inventory of the deceased's estate and a schedule of debts, together with an affidavit, must be given up. If the deceased had personal property in England or Ireland it is shown in the inventory, and then the confirmation is produced in the principal Court of Probate in England or Ireland. It is then sealed in such Courts and has the effect of probate or letters of administration in England or Ireland. In estates under £500 confirmation is obtained at reduced fees.

SCOTS LAW OF WILLS.

The only formalities required by the Law of Scotland as regards due execution of a will are for purposes of authentication. A will must be in writing (except that a person may leave a legacy verbally if the amount of that legacy does not exceed 100 Scots (£8 6*s.* 8*d.* sterling). A will may be either (1) *holograph, i.e.*, written by the testator himself, in which case no witnesses are necessary; (2) *tested*, which means that it is signed in presence of two witnesses. It is not necessary that these witnesses should sign in presence of one another, or even that they should see the testator signing so long as the testator acknowledges his signature to the witnesses. If the testator cannot write, his will may be authenticated by a notary and two witnesses. A parish minister may act as a notary for the purpose of subscribing a will in his own parish. Wills are registered for execution purposes in the Books of the County in which the deceased died domiciled, and in the Books of Council and Session, H.M. General Register House, Edinburgh, for preservation. The original deed may be inspected in the General Register House on payment of a small fee. A certified official copy may be obtained from either register on payment of stamp duties and writing fees.

TRUST FUNDS AND INVESTMENTS.

By the *Trustee Act*, 1925 (which came into force on Jan. 1, 1926), a trustee may invest trust funds in (*a*) any parliamentary stocks or Government securities of the United Kingdom; (*b*) on real or heritable securities of the United Kingdom; (*c*) in stock of the Bank of England or Ireland; (*d*) in India 7, 5½, 4½, 3½, 3 and 2½ per cent. stock or other stock issued by the Secretary of State for India charged on Indian revenue; (*e*) in securities the interest of which is guaranteed by Parliament; (*f*) in Consolidated Stock of the Metropolitan Board of Works, or of the London County Council, or Debenture Stock of the Receiver of Police, or Metropolitan Water Stock; (*g*) in Debenture, Guaranteed or Preference Stock of any railway in the United Kingdom incorporated by special Act, and having paid a dividend of not less than 3 per cent. on its Ordinary Stock for 10 years; (*h*) in United Kingdom Railway Stock when the railway is leased in perpetuity to any railway such as that mentioned in (*g*) *supra*; (*i*) in Debenture Stock in Indian Railways; (*j*) in "B" annuities of the Eastern Bengal East Indian, the Scinde, Punjaub and Delhi, Great Indian Peninsula and Madras Railways, and in Deferred Annuities in the register of holders of Class D Annuities comprised in the register Class C of the East Indian Railway Company; (*k*) in the stock of any Indian railway upon which a fixed or minimum dividend is guaranteed by the Indian Govern-

ment, or upon the capital of which the interest is so guaranteed; (*l*) in the Debenture or Preference Stock of any Water Company supplying water for profit, and incorporated by special Act or Royal Charter, which has paid a dividend of not less than 5 per cent. on Ordinary Stock for 10 years; (*m*) in the nominal or Inscribed Stock of any Municipal Borough in the United Kingdom having a population of more than 50,000, or of any County Council; (*n*) in the Nominal or Inscribed Stock of any commissions supplying water by statute, and having power to levy rates over an area embracing not fewer than 50,000 persons, provided the rates for 10 years have not exceeded 80 per cent. of the amount authorised to be levied; (*o*) in Stocks authorised under the Colonial Stock Act, 1900; (*p*) in local bonds issued under the Housing (Additional Powers) Act, 1919; (*q*) in any Stock or Securities issued in respect of any Government loan in Northern Ireland; (*r*) in Stocks, &c., authorised for the investment of cash under the control of the Court. All such investments may be varied. As regards railway investments, the L. & N.E. Ry., the S.Ry., the L.M. & S. Ry., and the G.W. Ry., are to be treated as if they were a company which had in each of the ten years before amalgamation paid a dividend of not less than 3 per cent. on its Ordinary Stock. All the Stocks above mentioned may be purchased, although they are redeemable, and the price exceeds the redemption value; but as to those mentioned in paragraphs (*g*), (*i*), (*k*), (*l*), (*m*), (*o*), (*p*) and (*q*), *supra*, if any of them is liable to be redeemed at par or at some other fixed rate, a trustee may not purchase (*a*) at a price exceeding 15 per cent. above par or such other fixed rate; nor (*b*) if the stock is liable to be so redeemed as aforesaid within 15 years of the date of purchase at a price exceeding its redemption value. §§ 3 to 11 of the same Act contain various important provisions as to the rights of trustees in the matter of investing trust monies.

As to the investments permitted by *The Rules of the Supreme Court*, 1888, *see* "WHITAKER" for 1927, p. 254, where *The Trusts Amendment Act*, 1884 (*Scotland only*), *The Colonial Stock Act*, 1900, and *The Housing (Additional Powers) Act*, 1919, are also noted.

THE PUBLIC TRUSTEE.

This is a Government Office (opened in 1908) by means of which the State acts as Executor and as Trustee under a Will, or as Trustee under a Settlement, whether new or old, and in other capacities of a like nature. The public demand for the services of the Public Trustee is well maintained. The value of the trusts accepted up to March 31, 1931, was £313,878,729.

The facts of any trust, new or old, in which it is desired that the Public Trustee should act may be brought to his notice by letter or by personal interview. Upon his assenting to act, his appointment is effected in the same simple way as in that of a private trustee, or he can be appointed by an Order of the Court. He can act solely or jointly with others.

In the case of a Will about to be made, all that the testator need say is, "I appoint the Public Trustee executor and trustee of this my Will"; or the appointment may be a joint one with friends or relations. In the case of a Will already made, the appointment of the Public Trustee can be effected by means of a codicil. Executors who have obtained probate can transfer their duties to him under an Order of the Court. He can also act as Administrator with, or without, the Will annexed.

The Public Trustee being a permanent trustee, the expense of fresh appointments is saved. His integrity is guaranteed by the State, while the public demand for his services should ensure a valuable experience and skill in the execution of his office; and a wide knowledge in the work of investment.

As regards investments, the Public Trustee, like a private trustee, is bound by such powers of investment as may be given him in the Will or trust instrument under which he acts or under the general law. *See Trust Funds ante.* The statutory rules require that strict secrecy shall be observed in respect of all matters dealt with in the Department. Accounts of every trust, in simple form, are furnished to the beneficiaries as required.

The Public Trustee Act provides that the fees to be charged shall be arranged from time to time so as to defray the expenses of the Department and no more. A profit is not intended.

An interview with the Public Trustee or with any of his senior officers can be arranged at any time.

A pamphlet giving full particulars and details of the fees can be obtained free of cost upon application to the Office of the Public Trustee, Kingsway, W.C. 2 (*tel.*, Holborn 4,300), or at any Post Office.

There is a branch office in Arkwright House, Parsonage Gardens, Manchester.

WIRELESS RECEIVING LICENCES.

HEAVY penalties are prescribed by the *Wireless Telegraphy Act*, 1904, on conviction of the offence of establishing a wireless station, or installing or working wireless apparatus without the Postmaster General's licence. Licences for receiving broadcasting programmes and messages sent for general reception can be obtained at any post office on payment of the fee of 10*s*.

STATISTICS OF PASSENGERS PER DAY AT LONDON TERMINI (1930).

Station.	Number.	Station.	Number.	Station.	Number.
Liverpool Street	230,000	King's Cross	60,000	Fenchurch Street	50,000
London Bridge	135,000	Euston	60,000	Holborn and St. Pauls	44,000
Waterloo	121,000	Charing Cross	59,000	St. Pancras	30,000
Broad Street	120,000	Cannon Street	57,000	Waterloo and City	28,000
Victoria	96,000	Paddington	55,000	Marylebone	10,500

The succession to the property of a person dying Intestate on or after January 1, 1926, is regulated by The Administration of Estates Act, 1925, which repealed the old law and established one new Code applicable both to Real Estate (land, &c.) and Personal Estate (leaseholds, chattels, investments, &c.). The Act abolished the rule of Primogeniture (inheritance by eldest son), the rights of dower (widow's third) and of curtesy (husband's life interest), and all special customs (*e.g.* gavelkind and Borough English). As to Personal Estate: Parents were placed on an equal footing; a mother regained her ancient preference over an intestate child's brothers and sisters; relatives of the whole blood obtained priority over those of the half blood; and relatives more remote than first cousins were excluded from the distribution. "The widow's £500" under the Intestates Estates Act, 1890, was increased to £1,000, whether there be issue or no issue, and given also to a husband; whilst the widow or husband now also takes all the "personal chattels."

TABLE OF EXAMPLES.

Important.—NOTE.—By Section 46 of the Administration of Estates Act, 1925, a surviving husband or wife takes absolutely (i) the "personal chattels"; and (ii) £1,000 free of death duties and expenses. The "residue" is then distributed as indicated in the Table.

"Personal chattels" are:—Articles of household use or ornament, &c. (not used for business purposes).

In each instance it is supposed there are no nearer relations than those named.

If the Intestate leaves:	*The Estate is distributed as follows:—*
1. Widow (or husband), and children	One half to widow (or husband) for life, and then to children equally. Other half to children equally at once.
2. Widow (or husband), and father and mother	Widow (or husband) for life, and then to father and mother equally.
3. Widow (or husband), and either father or mother, not both	Widow (or husband) for life, and then to father or mother absolutely.
4. Widow (or husband), and brothers or sisters of whole blood	Widow (or husband) for life, and then to brothers and sisters equally.
5. Widow (or husband), and brothers or sisters of half blood	Widow (or husband) for life, and then to brothers and sisters equally.
6. Widow (or husband), and nephews or nieces	Widow (or husband) for life, and then to nephews and nieces *per stirpes*. (See Note I.)
7. Widow (or husband), and grandparents	Widow (or husband) for life, and then to grandparents equally.
8. Widow (or husband), and uncles or aunts	Widow (or husband) for life, and then to uncles and aunts equally.
9. Widow (or husband) but none of above relations or descendants	All to widow (or husband).
10. Children, and grandchildren (issue of deceased child)	Amongst children in equal shares, the grandchildren taking equally their deceased parent's share.
11. Father and mother	Father and mother equally.
12. Father or mother, not both	Father or mother.
13. Brothers or sisters of whole blood, and of half blood	Brothers and sisters of whole blood equally.
14. Brothers or sisters, and nephews or nieces (children of deceased brother or sister)	Amongst brothers and sisters in equal shares, the children of deceased brother or sister taking equally their deceased parent's share.
15. Brothers or sisters, and grandparent	Brothers and sisters equally.
16. Grandparents, paternal or maternal	Grandparents equally.
17. Grandparent, and uncles or aunts	Grandparent.
18. Uncles or aunts of whole blood, and of half blood	Uncles and aunts of whole blood equally.
19. Uncles or aunts, and deceased uncle's or aunt's children	Amongst uncles and aunts in equal shares, the children of deceased uncle or aunt taking equally their deceased parent's share.
20. Uncles or aunts, and nephews or nieces	Nephews and nieces *per stirpes*.
21. Cousins, *i.e.* deceased uncle's or aunt's children or grandchildren	Cousins *per stirpes*.
22. Any other relation than those named in preceding examples (*e.g. Great* grandparents) and no widow or husband	The Crown.

NOTES.—The life interest of a husband or wife may be redeemed by payment of a lump sum.

In ascertaining the persons entitled to take, regard must be had to the operation of "the statutory trusts," *i.e.* The relative must have attained or attain the age of 21 or have married or marry under that age.

Taking *per stirpes* is taking by descent or representation. Thus, in Example 6 nephews and nieces take amongst them the share which their deceased parent would have taken if he or she had survived the Intestate.

Since January 1, 1927, in certain circumstances the mother of an illegitimate child, and an illegitimate child, may succeed to real or personal property on the intestacy of the other. (Legitimacy Act, 1926, s. 9.)

Intestates' Estates, Scotland.

I.—MOVABLES.

In each instance it is supposed there are no nearer relations than those named.

By the Intestate Husband's Estate (Scotland) Act, 1911, the widow of a man dying intestate and without issue is entitled to the whole estate both heritable and movable if under £500 in value; if over that amount she takes £500 out of the heritable and movable estate rateably before any division is made, and after that the share in the remainder to which she was entitled before the passing of the Act.

If the Intestate die, leaving	*His representatives take in the proportions following:—*
Widow only	Half to widow, half to next of kin, or if none, then to the Crown.
Husband only	Half to husband, half to wife's next of kin.
Widow or husband, and child or children by one or more marriages	One-third to widow or husband; one-third to children surviving deceased *equally*; one-third to surviving children *per capita** and issue of predeceasing children *per stirpes.**
Widow and father	Half to widow, half to father.
Widow and mother, no father	Half to widow, one-half to mother.
Widow, brothers or sisters	Half to widow, half equally amongst brothers and sisters whether of the whole or half blood consanguinean. If a deceased brother or sister has left issue, such issue take amongst them their deceased parent's share.
Widow, mother, nephews or nieces	Half to widow, one-half to mother.
Father and mother	Whole to father
Father, mother, brothers and sisters	Half to father; half to brothers and sisters equally.
Father and mother and their grandchildren	Half to father; half to grandchildren equally *per stirpes.**
Father, brothers and sisters	One-half to father, one-half equally amongst brothers and sisters.
Mother, brothers and sisters	Mother one-half, brothers and sisters one-half equally.
Mother, but no other kin	Whole to mother.
Child, children or grandchildren by deceased children	Amongst children in equal shares, the grandchildren by deceased children taking amongst them their deceased parent's share.
Brothers or sisters and nephews or nieces	Amongst brothers or sisters in equal shares, the children of deceased brothers or sisters taking amongst them their deceased parent's share.
Brother or sister and grandfather	All to brother or sister.
Brother or sister and uncles or aunts	All to brother or sister.
Grandfather, no nearer relation	All to grandfather.
Father's father and mother's mother	All to father's father.
Grandmother, uncles and aunts	All to uncle and aunts, if paternal.
Great-grandfather, uncles and aunts	All to uncles and aunts, if paternal; if not, then to paternal great-grandfather.
Uncles and aunts	All equally.
Uncle and deceased uncle's child	All to uncle.
Uncle by mother's side, and deceased uncle or aunt's child	Child of deceased paternal uncle or aunt takes to exclusion of maternal uncle.
Aunts, nephew and niece	Nephew and niece.
Cousins	Equally *per capita.**
Nephew by brother, and nephew by half-sister	All to nephew by brother.

NOTE A.—Illegitimate children do not succeed to their father or mother as heirs in intestacy.

NOTE B.—In Scotland, a lease on intestacy and in the absence of any destination descends to the heir-at-law.

NOTE C.—When a person dies intestate leaving heritable estate as well as movables, the heir to the heritage, if he is also one of the next-of-kin, is not entitled to any of the movables if he takes the heritage. He may, however, "collate" the heritage, *i.e.*, share it with the other next-of-kin and thus get an equal share of the mixed estate.

* *Per capita* means by the head; *per stirpes* means inheriting through a parent deceased. Movables taken *per capita* divide into as many shares as there are children. Where representatives of a deceased parent take *per stirpes* they take equally amongst them the share that would have fallen to the deceased had he or she survived.

II.—HERITAGE.

Table of Succession to heritable property in Scotland on intestacy and in the absence of any destination in the property writs, other than "to heirs and successors."

In each instance it is supposed there are no nearer relations than those named.

If Intestate die leaving	*Heritage would descend to :—*
(1) Wife only ; no blood relations.	One-third to wife for life ; rest to Crown as *ultimus haeres*.
(2) Wife and child or children, and children of a deceased child...	One-third to wife for life. Fee to eldest son or his heir male. If no son then to daughters equally. The eldest son of a deceased daughter taking his mother's place.
(3) Wife and father	One-third to wife for life, rest to father.
(4) Wife and mother	One-third to wife for life. Fee to nearest heir male.
(5) Wife, brother, or sister, and children of a deceased brother or sister	One-third to wife for life. Fee to immediate younger brother and his heir male ; if none, then to immediate elder brother.
(6) Wife, mother, nephews and nieces	One-third to wife for life ; rest to nephew (eldest) or nieces equally if brother left no son. See No. 2.
(7) Wife, mother, brother, sisters and nieces (children of deceased brothers and sisters)...	One-third to wife for life ; rest to younger brother and his heirs. If the only heirs are nieces they will take equally. If no younger brother then to immediate elder brother and his heirs in the same way. If sisters but no brothers the sisters take equally, and if the sisters have predeceased leaving only daughters they succeed equally.
(8) No wife or child or issue of a deceased child	To brother as in (5) whom failing to lineal ancestor paternal and his heirs.
(9) Children by one or more wives and the issue of deceased children	All to eldest son or his issue. If no male issue then to female issue as in (2).
(10) Husband and child or children	Liferent of whole to husband. Fee to eldest son.
(11) Mother, but no wife, child or issue of a child, father, brother, sister, nephew or niece or more distant descendants of father	Nearest paternal collateral (uncle or his heirs). If none, then to grandfather and his heirs.
(12) Mother and brothers and sisters	All to younger brother whom failing to immediate elder brother.
(13) Mother and sisters	All to sisters equally.
(14) Father and brothers and sisters	Fee as in (5).
(15) Child and grandchild by deceased child	(*See* No. 2.) "Rest to eldest son or his issue," under head, "Wife and child," &c.
(16) Brother and grandfather	All to brother.
(17) Brother's grandson, and brother or sister's daughter	All to great-nephew, if grandson of brother (conforming to Nos. 2 and 7). All to brother's daughter, if child of eldest brother.
(18) Brother and two aunts	Brother, all.
(19) Brother and wife	One-third to wife for life ; rest to brother.
(20) Grandfather (no nearer).....	All to grandfather.
(21) Father's father and mother's mother	All to father's father.
(22) Grandmother and uncle, or aunt on father's side (no nearer)	All to uncle or aunt.
(23) Uncle and deceased uncle's child	If deceased uncle was younger brother, then to child. If both brothers older than intestate, then to the younger of them or his heir male.
(24) Uncle by mother's side, and deceased uncle's or aunt's child	Child of deceased uncle on father's side, or (if none) child of deceased aunt on father's side.
(25) Two aunts, nephew and niece, children of deceased brother	Nephew.
(26) Uncle or aunt's children, and brother's grandchildren through a son	Brother's grandson, or if granddaughters between, then equally (conforming to Nos. 2 and 7).
(27) Nephew by brother, and nephew by half-sister.	Nephew by brother.
(28) Nephew by deceased brother, and nephews and nieces by deceased sister	All to eldest nephew, son of deceased brother.

NOTE.—In Scotland succession to heritage on intestacy NEVER ascends to the mother and her relations. Even the mother's own estate, after vesting in her son or daughter, never ascends to the maternal line again.

SOLICITORS' CHARGES.

These are now usually regulated in conveyancing and non-contentious business by the Solicitors' Remuneration Act, 1881, and the Scale thereunder, but the Act allows an option to a solicitor of declining to adopt it. It chiefly relates to sales, purchases and mortgages, and is based upon the value of the property or amount of the money involved. Besides this, it is legal for a client to make a bargain beforehand for a fixed sum. The amount coming to the solicitor, whether under Scale or agreement, is intended to cover the services of himself and his clerks, while it is, of course, exclusive of actual outlay for stamps, &c. On purchase or mortgage money exceeding £300 and not exceeding £1,000, the Scale charge for each party's solicitor is 1½ per cent.; this does not apply to sales by auction. Where a negotiation fee is chargeable, in addition, by the vendor's, purchaser's, or mortgagee's (not mortgagor's) solicitor, the Scale charge on sums exceeding £300 and not exceeding £3,000 is 1 per cent. It should be noted that if the solicitor *negotiates* the purchase or mortgage, he is entitled to an additional fee of substantial amount under the Scale referred to. *Charges are now subject to an increase of 33⅓ per cent.*

Scotland.—Solicitors' fees for Conveyancing and General business are regulated by a joint table approved by the different societies of Law Agents (Solicitors). Fees for litigation are regulated by the Court of Session. The tables of fees are published in The "Parliament House Book" and in "The Scottish Law Directory." When a solicitor sues for payment of a professional account it is remitted to the Auditor of the Court for taxation of his charges.

MEDICAL FEES.

The following are the charges usually made by *General Practitioners*:—

General Practitioners.	Rental (of Patient's House). £10 to £25.	£25 to £50.	£50 to £100
Ordinary Visit	5s. to 7s. 6d.	5s. to 10s. 6d.	7s. 6d. to 15s.
Night Visit	Double an ordinary visit.		
Mileage beyond two miles from Home	2s. 6d.	3s.	4s.
Detention per ½ hour	5s. to 7s. 6d.	5s. to 10s. 6d.	7s. 6d. to 15s.
Letters of Advice	Same charge as for an ordinary visit.		
Attendce. on servants	5s.	5s.	5s. to 7s. 6d.
Midwifery	1½ Gs.	1½ to 4½ Gs.	4½ to 7½ Gs.
Administrng. Chlfrm.	15s.	1½ Gs.	3 Gs.
Consultants.			
Advice or Visit alone	3 Gs.	3 Gs.	3 Gs.
Advice or Visit with another Practitioner	1½ Gs.	1½ to 3 Gs.	1½ to 3 Gs.
Mileage beyond two miles from Home	15s.	15s.	15s.

Special visits—*i.e.*, of which due notice has not been given before the practitioner starts on his daily round, are charged at the rate of a visit and a half. Patients calling upon the doctor are charged at the same rate as if visited by him.

When the ordinary medical attendant is called upon to meet another in consultation, he is entitled to charge double his ordinary fee. When he himself is called in in consultation he is entitled to the minimum fee.

When more members of one family are ill at the same time, half a fee is charged for each beyond the first.

In midwifery cases the fee generally covers all charges for visits, &c., if all goes well; but if the illness be protracted, or if any special operation has to be performed, there is an extra charge.

If attendance on servants is paid for by employer, or if *he* send for the doctor, the charge is the same as to himself.

Certificates of health are to be charged for same as visits, except where special investigation is needed, as in certificates for lunacy, insurance offices, &c., when the charge may be from half a guinea to two guineas.

Vaccination is usually charged for according to the number of visits required.

Medical bills are commonly rendered once or twice a year.

STOCKBROKERS' CHARGES.

The Rules and Regulations drawn up by the London Stock Exchange "Committee for General Purposes" are very voluminous and technical. The customary scale of brokerage is 5s. per £100 on British (with some exceptions) or Foreign Government or American dollar stocks, and 10s. per £100 on British Railway registered stocks. On shares not exceeding 15s. the brokerage is 1½d. per share; not exceeding 30s., 3d. per share; not exceeding 40s., 4½d.; not exceeding 60s., 6d. per share, and so on. There are *minimum* charges of 10s. on less than £100 and £1 on over £100.

ACCOUNTANTS' CHARGES.

The following scale of fees is generally applicable, but for special work fees are usually a matter of negotiation:—

Company Audits.—Fee fixed by Shareholders in General Meeting.

Preparing Balance Sheets, Investigating Accounts, &c.—Principals' time, per day of seven hours, 5 to 10 Gs. Managing Clerks (if Chartered or Incorporated Accountants), 3 to 5 Gs.; (not Chartered or Incorporated Accountants), 1½ to 2½ Gs.; other Clerks, 1 G. and upwards. If at a distance from the office or outside the United Kingdom, hotel and travelling expenses will be charged.

Receivers, Liquidators and Trustees in Bankruptcy.—Usually by percentage on realisation of assets and dividends paid.

Voluntary Liquidators.—Usually fixed by the Company in General Meeting.

ARCHITECTS.

Fees on New Works.—For taking the Client's instructions, preparing sketch design, making approximate estimate of cost by cubic measurement, or otherwise, preparing drawings and specifications for the purpose of estimates, obtaining tenders, advising on tenders and in preparation of contract, selecting and instructing of consultants, furnishing to the Contractor one copy of the drawings and specification and such other details as are necessary for the proper carrying out of the works, general supervision as above defined, issuing certificates for payment, and passing and certifying accounts, a percentage on the total cost of all executed works as follows:—

(*a*) If the contract or order exceeds £2,000 the percentage is to be 6 per cent.

(*b*) If the contract or order does not exceed £2,000 the percentage is to be 10 per cent. in the case of works costing £100 graduated to 6 per cent. in the case of works costing £2,000 as the special character of such works may render appropriate.

Alterations and Additions.—A percentage not exceeding twice the amount due for new works of the same cost.

Fittings, Decorations, &c.—In works in which designs for fittings, appointments, decorations, or complex detail or construction are main features, special fees may be charged according to the circumstances, and also for designs for furniture.

Omitted Works.—In addition to the percentage on the total cost of executed works, the Architect is to be paid in respect of all works included in the tender or order, but not executed, two-thirds of the charge which would have been due upon them had they been carried out.

Partial Service.—If the project or part of it be abandoned, or if the services of the Architect cease or are dispensed with before a contract is entered into or order given, the charges in respect of the works abandoned or for which the Architect was employed (as the case may be) are as follows :—

(*a*) For making approximate estimate of cost by cubic measurement, or otherwise, one-fourth of the percentage on the estimated cost of such works.

(*b*) For making approximate estimate of cost by cubic measurement, or otherwise, and preparing drawings and particulars sufficient to enable quantities to be prepared or a tender obtained, two-thirds of the percentage on the estimated cost of such works.

Instalments.—On a contract being entered into or order given for the works the Architect shall be entitled to an instalment of two-thirds of the charge calculated on the total amount of the contract or order, and no part of such payment shall be reclaimable from the Architect in the event of the subsequent abandonment of the works. The remainder of the Architect's remuneration shall be payable by instalments from time to time as the work proceeds.

Work Executed with Old Materials, &c.—In all cases where work is executed wholly or in part with old materials, or where material, labour or carriage is provided by the Client, the percentage shall be calculated as if the works had been executed throughout by a Contractor, and with new material.

Services Not Included in Percentage.—The foregoing percentages do not cover the following services, for which, and for any other services not covered by any payment herein provided for, additional charges may be made in accordance with the amount of work involved :—

Advising as to the selection and suitability of site. Negotiations relating to the site or building. Surveying the site or building and taking levels, and making surveys, measurements, and plans of existing buildings.

The preparation of further sketch designs necessitated by a material alteration in, or addition to, the Client's instructions, or altering the working drawings and specification in consequence thereof prior to the commencement of the works. Altering drawings, or preparing new drawings, and other services involved in consequence of variations or additions desired by the Client after the commencement of the works. Making extra drawings for the Client's or Contractors' use, and making drawings for and negotiations with ground landlords, adjoining owners, public authorities, or others, and making applications for licences and consents.

Making arrangements in respect of party walls and rights of light and other easements, reservations or restrictions. Services in connection with litigation or arbitration. Services consequent upon or resulting from the death or bankruptcy of Contractors or the failure or neglect of Contractors from any cause whatever to carry out the works in accordance with the contract or order or consequent upon the fraud or negligence of the Clerk of Works. Services in connection with fire, flood, or tempest during the execution of the works, and services in connection with the planning of grounds or gardens.

Housing Schemes and Laying Out Estates.—The fees are those approved by the Ministry of Health, the Board of Agriculture and Fisheries, and the Scottish Board of Health.

Approval of Lessee's Plans.—For approving plans submitted by a lessee and for inspecting the work during its progress so far as may be necessary to ensure the conditions being fulfilled, and certifying for lease when required, the charge is as follows :—

For each £100 or part of £100 of the total cost up to £500, 2½ per cent. (minimum fee, £3 3*s*.).

For each £100 or part of £100 from £500 to £5,000, 1¼ per cent.

For each £100 or part of £100 above £5,000 1 guinea per cent.

Litigation and Arbitration.—For qualifying to give evidence, settling proofs, conferences with Solicitors and Counsel, attendances in Court or before Arbitrators or other tribunals, and for other services in connection with litigation and arbitration the charges are based upon the time occupied and the professional standing of the Architect.

Land Surveying and Levelling.—For surveying and making a plan of a town, village, street or road, estate or grounds, or any part thereof, for taking levels, setting out streets or roads, and for other services in connection with land not otherwise specifically provided for, the charges are by time in accordance with Clause 21.

Sanitary Surveys.—For inspecting, reporting and advising on the sanitary condition of premises, the charge is by time in accordance with Clause 21, the minimum fee being £3 3*s*., in addition to the cost of assistance and appliances.

Expenses.—The above-mentioned fees are, in all cases, exclusive of the cost of copies of documents, lithography, travelling and hotel expenses, and all other disbursements, which are to be charged in addition.

QUANTITY SURVEYORS.

I.—ARCHITECTURAL WORK.

Note.—In cases where any of the materials used in construction are supplied by the building owner the percentage charge is based upon the estimated or actual value thereof.

Lump Sum Contracts.

(*a*) Taking out and preparing Bills of Quantities :—2½ per cent. upon the estimated cost of the work up to £5,000; 2 per cent. above £5,000.
