

CONTENTS

KEYWORDS	7
NOMENCLATURE.	8
INTRODUCTION.	9
CHAPTER-I. SURFACE WAVES.	23
Paper-1. Note on the surface wave due to the prescribed elevation.	24
Paper-2. Generation of surface waves on a rotating sea by wind stress.	38
CHAPTER-II. LONG WAVES.	52
Paper-1. Long wave in a canal of variable depth.	53
Paper-2. Note on the motion of long waves set up by the finite body forces.	62
CHAPTER- III. WAVES DUE TO STRESS.	82
Paper-1. Waves due to normal stress applied on the free surface of a viscous in compressible fluid.	83
Paper-2. Waves due to tangential stress on the free surface of a viscous in compressible fluid.	93
CHAPTER-IV. WAVES ON HEAVY FLUID.	103
Paper-1. Generation of surface wave in a semi infinite viscous in compressible fluid due to ring load and disc load.	104
Paper-2. Generation of wave motion in a rotatory semi infinite viscous fluid due to certain impulsive velocity prescribed on the surface of the fluid.	117
CHAPTER-V. WAVES IN A RECTANGULAR DUCT.	126
Paper-1. Wave motion of liquid in a rectangular duct due to variable pressure.	127
Paper-2. Note on the two-dimensional wave motion set up by a certain prescribed pressure on the surface of the fluid.	135
CHAPTER-VI. WAVES ON THE POROUS MEDIA.	145
Paper-1. On the motion of fluid on Porous media with suction or injection.	146
BIBLIOGRAPHY.	156
