

CONTENTS

CHAPTER - I	INTRODUCTION		
1.1.	Preliminaries	1
1.1.1.	Basic definitions	4
1.1.2.	Notations	7
1.2	Intersection graphs	8
1.3	Interval graphs	9
1.3.1.	Interval graphs and their applications	9
1.3.2.	Some characterizations of interval graphs	10
1.3.3.	Notions related to interval graphs	14
1.4.	Indifference graphs	18
1.5.	Relations and graphs	23
1.5.1.	Interval order	23
1.5.2.	Semiorder.	25
1.6.	Notions related to unit interval graphs	29
1.7.	Circular arc graphs	31
1.8.	Ferrers digraphs and Ferrers dimension	34
1.9.	Efficiency of Algorithm	37
1.10.	Intersection representations for digraphs.	39
1.10.1.	Interval catch digraphs	39
1.10.2.	Interval digraphs	41
1.10.3.	Circular arc digraphs	45
1.10.4.	Interval acyclic digraphs	47
1.11.	Overlap graphs and Containment graphs.	49
1.12.	Miscellaneous.	52

CHAPTER - II	INDIFFERENCE DIGRAPHS : A GENERALIZATION OF INDIFFERENCE GRAPHS AND SEMIORDER.	
2.1.	Introduction	54
2.2.	Properties of adjacency matrices	60
2.2.	Equivalence of digraph classes	66
2.4.	W. Consecutive arrangements	75
2.5.	Generalized semiorders and Indifference digraphs	79
CHAPTER - III	SOME RESULTS ON INTERVAL DIGRAPHS	
3.1.	Introduction	82
3.2.	Interval graphs and Interval digraphs	83
3.3.	Interval digraphs and Edge ordering	84
3.3.1.	Interval graphs and Edge ordering	88
3.4.	Interval digraphs and diasteroidal triple	89
CHAPTER - IV-	CONTAINMENT DIGRAPHS AND OVERLAP DIGRAPHS	
4.1.	Introduction	95
4.2.	Containment digraphs and Containment posets	99
4.3.	Circular arc containment digraphs	104
4.4.	Overlap digraphs	105
4.5.	Unit overlap digraphs	117
CHAPTER - V	DIRECTABLE ZEROS IN A BINARY MATRIX.	
5.1.	Introduction	119
5.2.	Robin - digraphs	125
5.3.	Base interval digraphs	137
5.4.	Unit base interval digraphs	140
CONCLUSION		142
BIBLIOGRAPHY		145
