

ACKNOWLEDGEMENTS

I offer my sincerest gratitude to Dr. B. Dasgupta, formerly Principal, Darjeeling Government College, now Professor of Zoology, Presidency College, Calcutta, for giving me his invaluable guidance throughout the course of this investigation. My sincerest thanks are due to Dr. Pekka Nuorteva of the Zoological Museum, University of Helsinki, Helsinki, Finland, for providing me with literature and a model of the fly trap and for other help. My thanks are also due to Drs. H. Oldroyd and A. C. Peat of the British Museum of Natural History, London, to Dr. Rokuro Kano of the Department of Medical Zoology, Tokyo Medical and Dental University, Tokyo, Japan, to Dr. F. Zumpt of the Department of Entomology, Institute of Medical Research, Johannesburg, South Africa, and to Prof. B. B. Rohdendorf of the Paleontological Institute, Academy of Sciences, Moscow, for their help in the identification of flies and for various help.

I am also grateful to Dr. A. M. Goon, Professor of Statistics, Presidency College, Calcutta, for his help in the statistical analyses of the data.

I would also like to thank Dr. S. K. Sen Chaudhury, Veterinary Surgeon, State Veterinary Hospital, Siliguri, Darjeeling and Dr. B. N. Ghosh, Veterinary Officer of the Himalayan Zoological Park, Darjeeling, for help in the study

of cases of myiasis. I wish to record my sincerest thanks to my colleague Mr. Amal Biswas, for his help at different stages of the investigation and to Mr. Bijon Ghosh, Mr. D. K. Bhattacharya and Mr. Swapan Basu for preparing the maps of Siliguri City and adjoining areas. More than anyone else, it was Mrs. Maitree Roy, who has assisted me in numerous ways and has truly made the completion of this work possible.

I would also wish to record my sincerest appreciation to the University Grants Commission, New Delhi, for the financial assistance given to me for the purchase of books and journals and to the Meteorological Department, Government of India, for the necessary permission for the publication of data on temperature, rainfall and relative humidity of the meteorological station "Bagdogra", Darjeeling.

Finally I wish to express my sincerest thanks to Dr. D. K. Chaudhury, Professor and Head of Zoology Department, University of Burdwan, Burdwan, West Bengal, for very kindly going through the manuscript and suggesting various improvements.
