

Acknowledgements

This work was carried out at High Energy & Cosmic Ray Research Centre and Department of Physics, University of North Bengal. I am grateful to all the faculty members of the High Energy & Cosmic Ray Research Centre (HECRRC) and Department of Physics for their assistance and support.

I would like to express my warmest thanks to **Dr. Arunava Bhadra** for his guidance and support. I am lucky to have such an active and hard working supervisor. I really appreciate the effort he made for my thesis, making sure that things got done properly and on time. I would also like to thank Dr Samir Kumar Sarkar and Dr Shubrangshu Ghosh, with whom I collaborated with on several projects, for their help, support and encouragement. I acknowledge the support received from the Central Library, University of North Bengal.

I also would like to say thanks to my parents **Sri Utpal Kumar Sarkar & Srimati Shipra Sarkar**, my wife **Manishita** , my son **Aryabrata** for supporting me spiritually throughout writing this thesis and my life in general.

I also like to thank Nilkanth, Samridhi, Brojo and Swarnadeep with whom I spend wonderful time during my visit to IUCAA, Pune, for X-Ray Astronomy School as well as various conferences / Workshops.

Finally, I would like to extend my gratitude to Dr. Basudeb Basu, Ex-Head of USIC, Dr. Molay Kumar Das, Head of USIC and Mr. Gautam Sarkar, Technical Officer-II of USIC for always being there to listen to me. I am not sure that this thesis would have been finished without the support they showed.

Dedicated to my family, friends and well wishers.
