

## *Acknowledgment*

I have great pleasure in expressing my deep sense of gratitude to my honourable supervisor Dr. B. Basu, Reader, Department of Chemistry, University of North Bengal, Darjeeling, India for his inspiring guidance, parental attitude, solicitude behaviour and constant encouragement through out the entire course of study. Without his profound help, sincere supervision and perspicacious directions the work might not have been completed. I am grateful to him for sparing his valuable time in solving my problems and allowing me to share the benefit of his research experience and academic acumen.

I wish to express my sincere thanks to Prof. B.C. Ranu, Prof. A. Dey, Prof. S. Ghosh, Prof. S. Lahiri, Indian Association for the Cultivation of Science, Kolkata; Dr. R. Mukherjee, Indian Institute of Chemical Biology, Kolkata; Dr. A.T. Khan, IIT, Guwahati and Prof. S. Chandrasekaran, IISc, Bangalore for their help in recording NMR spectra, and other spectral and element analyses.

Thanks are also due to all teachers, staff members and scholars of the Department of Chemistry, NBU, and Mr. M.M. Matin, University of Pune for their continuous help, cooperation, encouragement and suggestions.

I am grateful to the ICCR, India for award of the Fellowship, to the NBU authority for allowing me to complete my research studies; Bangladesh Govt. and Chittagong University authority to allow me study leave for the completion of the course.

I am also grateful to my wife, Zafreen for her inspiration and constant encouragement during the course of the research. With a sense of moral liability I would like to record the name of my sons, Mahdee and Muttaqee, sources of inspirations but became deprived of pleasing paternal love and affection during the period I was wholeheartedly engaged in research work.
