

Table of contents

List of tables	xii
List of figures	xiv

Chapter 1

Introduction	1
1.1. Introduction	1
1.2. Management practices in tea	7
1.2.1. Soil management	8
1.2.2. Water management (Irrigation & Drainage)	9
1.2.3. Human resource management	10
1.2.4. Pruning management	10
1.2.5. Shade management	11
1.2.6. Insect pest management	11
1.2.7. Disease management	12
1.3. Usage and benefits	13
1.3.1. Levels of usage of a technical artifact	14
1.3.2. Usage of expert systems	14
1.3.3. Benefits	16
1.4. Aim of the work	19
1.5. Summary of the work	20
References	21

Chapter 2

Tea Insect Pests and Diseases	23
2.1. Introduction	23
2.2. Major insect pests of tea	24
2.2.1. Mites	25
2.2.2. Sap sucking insects	28
2.2.3. Leaf eaters	30
2.2.4. Stem insects	32
2.2.5. Other pests	34
2.3. Diseases of tea	36

2.3.1. Nursery diseases	36	
2.3.2. Root diseases	38	
2.3.3. Stem diseases	40	
2.3.4. Leaf diseases	42	
2.4. Damage accounts due to insect pests and diseases		44
2.5. Approved chemicals in tea	47	
2.5.1. Toxicity of chemicals	50	
2.5.2. Decomposition of chemicals after application on foliage		52
2.5.3. Maximum Residue Limits (MRL) of some chemicals		52
2.6. Cultural practices in tea	53	
2.6.1. Soil rehabilitation	53	
2.6.2. Disnagging	53	
2.6.3. Weed control	54	
2.6.4. Shade management	54	
2.6.5. Other practices	54	
References	54	

Chapter 3

Artificial Intelligence, Expert Systems and the Domain

57

3.1. Introduction	57	
3.2. Expert systems technology	58	
3.2.1. Categories and application areas of expert systems		58
3.2.2. Expert systems in agriculture	64	
3.2.3. Typical features of an expert system	71	
3.2.4. Life cycle of an expert system	72	
3.2.5. Components of an expert system	74	
3.2.6. Classifications of expert systems	76	
3.2.6.1. Based on reasoning	76	
3.2.6.2. Based on other technical issues		78
3.3. Why it is an expert system domain	82	
3.4. What requirements the domain lays on an expert system		83
3.5. Discussions	85	
References	86	

Chapter 4

Knowledge Engineering

98

4.1.	Introduction	98	
4.2.	Levels of knowledge	99	
4.3.	Knowledge categories	99	
4.3.1.	Declarative knowledge	99	
4.3.2.	Procedural knowledge	99	
4.3.3.	Semantic knowledge	99	
4.3.4.	Episodic knowledge	100	
4.3.5.	Meta-knowledge	100	
4.4.	Knowledge acquisition	100	
4.4.1.	Sources of knowledge	100	
4.4.1.1.	Classical sources	100	
4.4.1.2.	Web-based sources	101	
4.5.	Methods of knowledge acquisition	101	
4.5.1.	Manual methods	101	
4.5.1.1.	Interviewing	101	
4.5.1.1.1.	Structured interview	101	
4.5.1.1.2.	Unstructured interview	102	
4.5.1.1.3.	Semi-structured interview	102	
4.5.1.2.	Tracking the reasoning process	102	
4.5.1.3.	Observations	102	
4.5.2.	Semi-automatic methods	103	
4.5.3.	Automatic methods	103	
4.6.	Problems in knowledge acquisition	103	
4.7.	Knowledge acquisition in the context of present work	104	
4.8.	Knowledge representation methods	105	
4.8.1.	Knowledge representation using logic	105	
4.8.2.	Knowledge representation using semantic networks	108	
4.8.3.	Knowledge representation using rules	109	
4.8.4.	Knowledge representation using frames	112	
4.8.5.	Knowledge representation using scripts	114	
4.8.6.	Object-attribute-value triplets as KR scheme	114	
4.8.7.	Object-Oriented approach	115	
4.8.7.1.	Classes	115	
4.8.7.2.	Instance objects	116	
4.8.7.3.	Attributes and methods / operations	116	
4.8.7.4.	Inheritance	116	
4.9.	AI, expert systems and O-O technology	118	

4.10. Analysing relative suitability	120	
4.11. Some ES and ES development tools using different KR-schemes		122
4.12. Object-oriented knowledge schemes for tea pests and diseases		124
4.13. Discussions	124	
References	125	

Chapter 5

Selection of an appropriate tool

128

5.1. Introduction	128	
5.2. Points to ponder	128	
5.2.1. No general purpose tool	129	
5.2.2. Single or multiple tools	129	
5.2.3. In search of a bird after constructing a case		130
5.2.4. Exaggerated claims from vendors / agents		130
5.2.5. Non-standard terminologies	131	
5.2.6. Miscellaneous issues : Price, training and documentation support		131
5.2.7. Language, shell or toolkit	131	
5.2.8. Left no stone unturned - Is it practically feasible ?		135
5.2.9. Potentially active research field		135
5.2.10. Any unique framework ?	135	
5.3. ES-building tools' capabilities	136	
5.4. Level5 Object	137	
5.4.1. What is Level5 Object ?	137	
5.4.2. What kinds of problems are best solved with Level5 Object ?		138
5.4.3. Capabilities of Level5 Object	139	
5.5. Requirements vs. capabilities	143	
5.6. Conclusions and discussion	145	
References	145	

Chapter 6

Managing uncertainty

147

6.1. Introduction	147
6.2. Sources and nature of inexact information	147
6.3. Methods for managing inexact information	151
6.3.1. Bayesian probability theory	151
6.3.2. Dempster / Shafer theory of evidence	152
6.3.3. Stanford certainty factor model	154
6.3.4. Fuzzy set theory	155
6.3.5. Non-monotonic reasoning	156
6.3.6. Case-based approach	156
6.4. Suitability analysis	157
6.4.1. Bayesian probability theory	157
6.4.2. Dempster / Shafer theory of evidence	157
6.4.3. Stanford certainty factor model	158
6.4.4. Fuzzy set theory	158
6.4.5. Non-monotonic reasoning	159
6.4.6. Case-based approach	159
6.5. Conclusions and discussions	160
References	160

Chapter 7

TEAPEST: A rule based object-oriented expert system for insect pest management in tea

163

7.1. Introduction	163
7.2. Major insect pests of tea	164
7.3. Problems of current practices	165
7.4. Knowledge engineering	166
7.5. Graphical User Interface	167
7.6. System design	168
7.7. Implementation	173
7.8. A case illustration	173
7.9. Performance evaluation	176
7.10. Conclusion	176
References	176

Chapter 8

TEADISEASE: A rule based object-oriented expert system for disease management in tea **180**

8.1.	Introduction	180
8.2.	Major diseases of tea	181
8.3.	Current practices and their lacunae	182
8.4.	Knowledge engineering	183
8.5.	System architecture	184
8.6.	Implementation	189
8.7.	A case illustration	189
8.8.	Performance evaluation	191
8.9.	Discussion and conclusion	191
	References	191

Chapter 9

Web-Based pest and disease management in tea **194**

9.1.	Introduction	194
9.2.	Benefits of using expert systems through the Internet	195
9.3.	Expert systems on the net	196
9.4.	The Web (WWW)	197
9.5.	Connecting ES to Web-Site	198
9.5.1.	Solution alternatives	198
9.5.2.	Technology requirement in transference	199
9.5.2.1.	Web connectivity	199
9.5.2.2.	Database connectivity	199
9.5.2.3.	Image processing and GUI	199
9.5.2.4.	Knowledge processing and inference	200
9.5.2.5.	Procedural	200
9.5.2.6.	Hardware and setup	200
9.6.	Tools and languages available	200
9.7.	Perl	201
9.8.	Perl , CGI and the Web	203
9.9.	Web based version of <i>TEAPEST</i> and <i>TEADISEASE</i>	203
9.9.1.	Insect pests of tea considered in <i>TEAPEST/WWW</i>	204
9.9.2.	Diseases considered for <i>TEADISEASE/WWW</i>	204
9.9.3.	Knowledge engineering	204
9.9.4.	Architecture of <i>TEAPEST/WWW</i>	205
9.9.5.	Architecture of <i>TEADISEASE/WWW</i>	207

9.10. Implementation	210
9.11. Performance evaluation	210
9.12. Summary and conclusions	211
References	211

Chapter 10

A model for Case-Based Learning **214**

10.1. Introduction	214
10.2. Methodology	215
10.2.1. Definitions	215
10.2.2. System Architecture	216
10.2.3. Reasoning aspects	217
10.3. Validating the model	218
10.3.1. Case study for Red spider attack diagnosis	221
10.3.2. Case study for Helopeltis attack diagnosis	225
10.3.3. Identified significant features with RFW	228
10.4. Discussions	230
References	231

Chapter 11

Design and implementation of a Case-Based Classifier Approach **233**

11.1. Introduction	233
11.2. Theoretical foundation	235
11.3. System architecture	238
11.4. Case illustration	240
11.5. Concluding remarks	249
References	249
