## CHAPTER - I

### THE CONCEPT OF ORBITAL HYBRIDISATION AND ISOVALENT HYBRIDISATION.

IA. Introduction	..	1
IB. Salient features of the concept of Hybridisation	..	1-3
IC. Isovalent Hybridisation	..	4-6
ID. Construction of Hybrid Orbitals		6-7
IE. Assumption Involved in the concept of hybridisation	..	7-9
References	..	10-11

## CHAPTER - II

### ISOVALENT HYBRIDISATION - A CRITICAL ASSESSMENT AT BENT'S RULE.

IIA. Introduction	..	12
IIB. Walsh's principle	..	12-14
IIC. Bent's Rule	..	14-20
IID. A Critical examination of the foundation of Bent's rule	..	20-35
IIE. Cases where Bent's Rule fail		36-40
IIF. Inadequacies of Bent's Rule	..	40-52
IIG. Modifications of Bent's Rule		52-59
References	..	60-61

CHAPTER - IIIA QUALITATIVE APPROACH TO ORBITAL  
HYBRIDISATION - THEORY.

IIIA. Introduction	..	62-64
IIIB. Definition of Optimum Hybrids		64-65
IIIC. Theory	..	65-68
IIID. An approximate method	..	68-74
IIIE. Evaluation of terms of the type $f_{\lambda}$ and its derivatives	..	74-84
IIIF. Example:	..	84-86
References	..	87-89

CHAPTER - IVA QUANTITATIVE APPROACH TO ORBITAL HYBRIDISATION -  
PARAMETERS AND METHOD.

IVA. Introduction	..	90
IVB. Evaluation of Parameters	..	90-110
IVC. Numerical Computations: An Example		111-130
IVD. Application of the theory	..	130-146
IVE. Concluding Remarks	..	146-150
References	..	151-153

CHAPTER - V**ISOVALENT HYBRIDISATION: A QUALITATIVE RULE**

VA.	Introduction	..	154
VB.	A Simplified approach	..	154-163
VC.	Test for the validity of approximations used in the simplified equation		163-168
VD.	A qualitative principle concerning Isovalent hybridisation	..	170
VE.	Concluding Remarks	..	170-171
	References	..	172-173
