

## ACKNOWLEDGEMENTS

I wish to express my profound gratitude and reverence to Dr. B. K. Chatterjee, formerly Head of the Department, Darjeeling Government College, under the University of North Bengal, Darjeeling, and now Assistant Professor, Presidency College, Calcutta University, for his supervision, advice and keen interest during the period of my research work. I am grateful to Dr. B. D. Sharma, Mycologist, Government of West Bengal, for his keen interest and immense help during the period of my research work without which it would not been possible for me to complete the work.

I am greatly indebted to Dr. D. N. Pegler, Kew Botanic Garden, Kew, Surrey, England, for confirming the identification of the specimens made by me.

Appreciation and thanks to Sri M. K. Basak for neat and careful typing of the thesis and also to Mr. N. K. Mitra of Rice Research Station, Chinsurah, for his help in the preparation of Photographs.

Lastly, I convey my sincere thanks to all my colleagues for their active co-operation and understanding during this entire period of investigations.

  
(ASIT PAL)

The following investigation have been divided into two main parts which are as follows :

- I. Taxonomic study
  
- II. Cultivation practices of three common edible mushrooms and comparative account of economics
