

ACKNOWLEDGMENTS

I take this opportunity to express my deep sense of gratitude to my supervisor, Dr. S. S. Chatterjee for his guidance, teaching, inspiration and affection. His continuous invaluable supervision in each and every phase of this work encouraged me in innumerable ways and it could be a futile effort on my part to acknowledge and express them all. I am grateful to him.

I express my deep respect to Dr. M. N. Maulik and Dr. A. K. Biswas, Assistant professors, Department of Civil Engineering, Jalpaiguri Government Engineering College, W. B., India, who provided me valuable suggestions in conducting the research work.

I acknowledge with pleasure, the assistance and help rendered, during conducting experiments and in the preparation of the thesis, by Sri Sujit Kr. Roy, Sri Bablu Sil, Sri Bhairab Roy, Sri Sunil Chakraborty and Srimati Swapna Roy.

I am grateful to my parents and my younger sister and brother who have been with me constantly and encouraging me always. This Thesis is dedicated to them as a token of my gratitude and love.
