

FIGURE INDEX

Fig. No.	Fig. Title	Page
1.	Naturally EUS infected fish	5
2.	Naturally EUS infected <i>Cirrhinus mrigala</i>	20
3.	Naturally EUS infected <i>Catla catla</i>	20
4.	An EUS infected pond in Lataguri, Jalpaiguri	21
5.	Fishermen netting in the affected pond	21
6.	Intramuscular administration of bacterial suspension to fish, <i>Channa punctatus</i>	31
7.	<i>Aeromonas caviae</i> , M10 (X400)	44
8.	<i>Aeromonas hydrophila</i> , Ct5 (X1000)	44
9.	<i>Aeromonas hydrophila</i> , P1 (X400)	44
10.	Results for gas production in the medium containing glucose	45
11.	Results for indole production	45
12.	Results for esculin hydrolysis	45
13.	<i>C. punctatus</i> showing manifestation of ulcer after 24 hrs of intramuscular injection with the culture of <i>A. hydrophila</i> , M6	47
14.	<i>C. Punctatus</i> showing manifestation of ulcer after 48 hrs of intramuscular injection with <i>A. hydrophila</i> , Ct5	47
15.	<i>C. Punctatus</i> showing manifestation of ulcer after 96 hrs of intramuscular injection with <i>A. hydrophila</i> , P2	47
16.	Starch hydrolysis	48
17.	Casein hydrolysis	48

18.	Haemolysin production	48
19.	Lipid hydrolysis	48
20.	Percentage of death cell by cell free culture filtrates of bacteria isolated from EUS affected fish <i>C. mrigala</i>	50
21.	Percentage of death cell by cell free culture filtrates of bacteria isolated from EUS affected fish <i>C. catla</i>	51
22.	Percentage of death cell by cell free culture filtrates of bacteria isolated from EUS affected fish <i>C. striata</i>	52
23.	Percentage of death cell by cell free culture filtrates of bacteria isolated from EUS affected fish <i>Puntius</i> sp.	52
24.	Antimicrobial sensitivity test of <i>A. hydrophila</i> (M10) showing resistance to ampicillin (Am)), sensitivity to chloramphenicol (Cm), kanamycin (Km), streptomycin (Sm)	55
25.	Antimicrobial sensitivity test of <i>A. hydrophila</i> (P3) showing resistance to ampicillin (Am), sensitivity to gentamycin (Gm), tetracycline (T), streptomycin (Sm)	55
26.	Antimicrobial sensitivity test of <i>A. hydrophila</i> (Ct4) showing resistance to novobiocin (Nv), rifampicin (Ri), sensitivity to nalidixic acid (Na), tetracycline (T)	55
27.	Plasmid profiles in the bacteria isolated from EUS affected <i>C. mrigala</i> .	58
28.	Plasmid profiles in the bacteria isolated from EUS affected <i>C. catla</i> .	58
29.	Plasmid profiles in the bacteria isolated from EUS affected <i>C. striata</i> .	58
30.	Plasmid profiles in the bacteria isolated from EUS affected <i>Puntius</i> sp.	58
31.	Transfer of R-plasmid from different <i>Aeromonas</i> strains to <i>E coli</i> DH5 α	62
32-34	PCR amplification of toxin gene from the DNA of different <i>Aeromonas</i> isolates obtained from the ulcers of the EUS affected fish	63
