	Page
	action of pressure gradient.
2.4	Introduction. 40
2.5	Mathematical Formulation of the problem. 42
2.6	Solution of the problem. 44
2.7	Discussion. 51
	PART - THREE
	Unsteady laminar stratified flow over a porous bed under the action of body force.
2.8	Introduction 53
2.9	Mathematical Formulation of the problem and its solution 56
2.10	Discussion. 61
	PART - FOUR
	Stratified fluid of variable viscosity past a permeable circular tube.
2.11	Introduction 65
2.12	Mathematical Formulation of the problem 66
2.13	Solution of the problem 69
2.14	Discussion. 70
	References 73
CHAPTER - III	Boundary layer effects on stratified fluid flows. 75

PART ONE

Page

To study the boundary layer thickness
for the flow of viscous stratified
fluid past a porous bed.

- 3.1 Introduction. 76
- 3.2 Mathematical Formulation of the problem
and its solution. 78
- 3.3 Discussion. 85

PART - TWO

To study the boundary layer thickness
for MHD stratified fluid through a
porous medium.

- 3.4 Introduction. 88
- 3.5 Mathematical Formulation of the Problem
and its solution. 91
- 3.6 Discussion. 96
- References. 100

CHAPTER - IV

Motion of viscous fluid through a porous
pipe. 103

PART - ONE

Unsteady flow of viscous fluid through a
straight long porous circular tube due to
pressure gradient.

	Page
4.1	Introduction. 104
4.2	Formulation of the problem. 107
4.3	Solution of the problem. 109
4.4	Discussion. 110
	PART - TWO
	Unsteady flow of viscous fluid through a straight long porous circular pipe due to time varying pressure gradient with an initial arbitrary velocity distribution.
4.5	Introduction. 115
4.6	Formulation of the problem. 117
4.7	Solution of the problem. 119
4.8	Particular case and Discussion. 121
	References 126
CHAPTER - V	Study of viscous fluid under an inclined porous bed. 131
	PART - ONE
	Motion under gravity of a viscous stratified fluid of variable viscosity through a inclined porous channel.
5.1 (a)	Introduction. 132
5.1 (b)	Formulation of the problem. 134
5.1 (c)	Solution of the problem 139

		Page
	PART - TWO (Problem No. 1)	
	Motion under gravity of a viscous fluid through a pipe.	
5.1	Introduction.	145
5.2	Formulation of the problem and its solution.	146
5.3	Particular case and discussion.	150
	Problem No. 2	
	Motion under gravity of a viscous stratified fluid through a porous pipe.	
5.4	Introduction.	158
5.5	Formulation of the problem.	160
5.6	Solution and Discussion.	161
	References.	164
