

Table of Contents

	Chapter	Page #
Declaration		I
Abstract		II
Preface		IX
List of tables		XIII
List of figures		XIV
List of appendices		XV
1. Introduction		1-13
2. Review of Literature		14-39
2.1 Soil an Ecosystem		14
2.2 The Actinobacteria		15
2.3 Diversity and importance in various ecosystems		17
2.4 Bioactive metabolites		26
2.5 <i>Streptomyces</i> genera		28
2.6 Characterization		30
2.7 Tea Industry		31
2.8 Bioinformatic studies		33
2.9 Metabarcoding analysis		37
3. Materials and Methods		40-68
3.1 Survey on the health status of tea garden workers		40
3.2 Collection Sites		40
3.3 Morphological characterization		42
3.4 Light Microscopy		43
3.5 Electron microscopy		44
3.6 Biochemical characterization		44
3.7 Intrinsic antibiotic resistance (IAR) test		47
3.8 Antimicrobial studies		48
3.9 Molecular Characterization of isolated strains		48
3.10 Screening of plant growth-promoting activity		53
3.11 GC - MS analysis		54
3.12 Molecular docking studies		56
3.13 Whole Genome sequencing		56
3.14 Bioinformatic Analysis		57
3.15 Comparative Genomics		59
3.16 antiSMASH studies		61
3.17 Soil Metagenomics		61
3.18 16S amplicon sequencing		63

4. Results and Discussion	69-121
4.1 The Health Survey	69
4.2 Collection of soil samples	70
4.3 Physico-chemical analysis of soil samples	70
4.4 Isolation and characterization	70
4.5 Microscopy	75
4.6 Biochemical characterization	75
4.7 Intrinsic antibiotic resistance (IAR) test	79
4.8 Antimicrobial test of the selected isolates	80
4.9 Plant growth-promoting traits studies	82
4.10 Molecular characterization	84
4.11 16Sr DNA PCR amplification	87
4.12 Phylogeny studies with 16S	89
4.13 Whole-genome sequencing and assembly	90
4.14 Bioinformatic studies.	93
4.15 MLSA Phylogeny	99
4.16 Blast Matrix	104
4.17 Pan and Core genome analysis	104
4.18 GC -MS analysis	104
4.19 Molecular docking studies	106
4.20 antiSMASH analysis	107
4.21 Metabarcoding of soil samples from selected biotopes	108
Conclusion	122-124
Bibliography	125-143
Index	144
Appendix (A-E)	A
