

# Contents

## Chapter One

1. Introduction .....	1-105
1.1. The honey .....	1-17
1.2. Toxic and allergic honey .....	18
1.3. The honey-bees .....	19-36
1.4. Historical background of the study .....	20-58
1.4.1. In other countries .....	20-51
1.4.2. In India .....	52-58
1.5. India's position and scope for advancement of apiculture.....	59-66
1.6. The study area .....	67-103
1.6. A1 & B1. Topography.....	72-74, 81-82
1.6. A2 - A7, B2-B6. [Temperature, humidity, precipitation ( Rainfall and Snowfall) crops, and forests].....	73-80,83-88
1.6.1. Flora and Vegetation.....	92-97
1.6.2. Past floristic studies .....	97-98
1.6.3. Present status of honey collection in the study area.....	99-103
1.7. Objectives of the study .....	104-105

## Chapter Two

2. Materials and Methods .....	106-143
2.1. Collection identification of bees, their dissection, study of their foraging behaviour; collection identification of bee-forage-plants and their preservation.....	106-107
2.2. Flowering calendar of major and minor bee-forage-plants in the area of investigation .....	108-121
2.3. Collection of honey samples (including the inventories).	122-131
2.4. Reference slide preparation .....	132-133
2.5. Colour grading of honey samples .....	134
2.6. Pollen analyses of honey samples.....	135-138
2.7. Physico-chemical analyses of honey samples.....	139-140

2.8. Atomic Absorption Spectrometry for the determination of some heavy metals in honey samples .....	141-142
2.9. Collection of informations related to ethnic use of honey	143

### **Chapter Three**

3. Results .....	144-305
3.1. Study of foraging behaviour of worker bees.....	144-145
3.2. Morphological characterisation of major / interesting pollen grains recovered from honey samples.....	146-165
3.3. Microscopic analytical data on the distribution of Palynomorphs in different honey samples.....	166-216
3.3.1. Frequency classes of pollen types .....	217-234
3.3.2. Frequency distribution of pollen types in different honey (summer, autumn & winter) .....	235-236
3.3.3. Frequency of some pollen types in honey samples from entomophilous plants.....	237-247
3.3.4. Frequency of some pollen types in honey samples from amphiphilous / anemophilous plants.....	248-257
3.3.5. Pollen frequency of some multifloral honeys.....	258-268
3.3.6. Pollen frequency of some unifloral honeys .....	269-276
3.3.7. Nectar calendar of major and minor bee-forage plants in presently investigated area .....	277-280
3.4. Physico-chemical results on analysis of some honey samples .....	281-290
3.5. Heavy metal contents in honey samples from three different target zones of the study area .....	291-292
3.6. Ethnic use of honey .....	292-305

### **Chapter Four**

4. Discussion .....	306-321
---------------------	---------

### **Chapter Five**

5. Conclusion .....	322-324
---------------------	---------

### **Chapter Six**

6. Summary .....	325-328
References .....	329-358
Publication .....	359
