

ACKNOWLEDGEMENTS

At the outset, I would like to thank my supervisor Professor Swapan K. Saha sincerely for giving me the opportunity to carry out my research work leading to PhD degree under his supervision, on a research topic in the field of surface science. I enjoyed the multiple fields addressed within this PhD work. I am indebted to him for his helpful guidance and interest throughout the tenure of my research, especially when precise practical problems arose. Furthermore, I am grateful for the real autonomy he gave me so that I could “explore” the topic by myself and enrich my own ideas.

I would like to thank the UGC, New Delhi for fellowship support and University of North Bengal for providing the laboratory and other facilities. I am thankful to all the faculty members and other staff members of the Department of Chemistry for their kind help and cooperation.

My thanks are also due to my group members, Soumik Bardhan, Amitabha Chakraborty, Mrinmay Jha, Bidyut Debnath and Subroto Chakraborty for the nice and academic environment we had together. I am grateful to Suranjan Shil for carrying out some DFT calculations for me.

I sincerely thank my friend Dr. Arjun Ghosh for his unconditional help and generosity during my visits to IIT-Kharagpur. I also thank him for the innumerable research papers (which were not available in my University) sent by him during the course of my Ph.D.

I am grateful to Phurba Sherpa, Lakpa Tamang, Bijoy Moktan, Purak Das, Achintesh Biswas, Uttam Ghosh and all well-wishers who have always extended their helping hands whenever needed. I also thank them for the happy moments we shared together.

Finally I express my sincere thanks to my parents and all the family members for their blessing and encouragement specially during the course of my Ph.D.
