

CONTENTS

1. Introduction	1
2. Review of Literature	6
2.1. Quality and proximate composition	6
2.2. Sensory quality	7
2.3. Textural property	8
2.3.1. Specific textural properties	8
2.3.2. Sensory texture profile	8
2.3.3. Objective texture profile	9
2.4. Instrumental assessment of food texture	9
2.4.1. Test conditions	10
2.4.1.1. Sample size and shape	11
2.4.1.2. Percent compression	11
2.4.1.3. Crosshead speed	12
2.4.1.4. Temperature	12
2.4.1.5. Number of bites	12
2.5. Sensory measurement of food texture	13
2.6. Relationship between instrumental and sensory assessment of food texture	13
2.6.1. Interrelationship between texture profile and chemical composition	14
2.6.2. Mathematical expression of relationships	14
2.7. Texture of dairy products	17
2.8. Methods of production of kachcha churpi and churpi	18
2.9. Different process parameters	19
2.10. Cooking	20
2.11. Drying characteristics of some foods	20

(ii)

2.12. Water activity	23
2.12.1. Sorption phenomenon	24
2.12.2. Equations for describing isotherms	26
2.12.3. Humectants	28
2.13. Smoking	28
2.14. Hurdle concept	29
2.15. Preservatives	30
2.15.1. Potassium sorbate	31
2.16. Packaging and storage of food products	31
3. Materials and Methods	32
3.1. Reagents used	32
3.2. Experimental	34
3.2.1. Survey on dudh churpi	34
3.2.2. Collection of market samples	34
3.2.3. Physico-chemical analyses of market samples of dudh churpi	35
3.2.3.1. Reflectance	35
3.2.3.2. Chemical analyses	35
3.2.3.2.1. Moisture	35
3.2.3.2.2. Total fat	36
3.2.3.2.3. Free fat	36
3.2.3.2.4. Free fatty acid	37
3.2.3.2.5. Total protein	38
3.2.3.2.6. Water-dispersible protein	39
3.2.3.2.7. Tyrosine value	39
3.2.3.2.8. Lactose and glucose-galactose	39
3.2.3.2.9. Total sugar	40
3.2.3.2.10. Lactic acid	41
3.2.3.2.11. pH	42

(iii)

3.2.3.2.12. Titratable acidity	42
3.2.3.2.13. Ash	43
3.2.3.2.14. 2-Thiobarbituric acid value	43
3.2.3.2.15. 5-Hydroxymethylfurfural (HMF)	44
3.2.3.2.16. Para-dimethylaminobenzaldehyde reactivity	45
3.2.3.2.17. Energy value	45
3.2.4. Sensory evaluation of dudh churpi	46
3.2.5. Instrumental evaluation of dudh churpi	46
3.2.6. Preparation of laboratory samples	47
3.2.6.1. Materials	47
3.2.6.1.1. Milk	47
3.2.6.1.2. Skimmilk powder	47
3.2.6.1.3. Coagulant	47
3.2.6.1.4. Sugar	48
3.2.6.2. Processing conditions	48
3.2.6.2.1. Standardization of milk	48
3.2.6.2.2. Preparation of prechurpi	49
3.2.6.2.2.1. Coagulation of milk	49
3.2.6.2.2.2. Straining	49
3.2.6.2.2.3. Cooking of coagulum	49
3.2.6.2.2.4. Pressing of coagulum	49
3.2.6.2.2.5. Drying of prechurpi	49
3.2.6.2.3. Cooking of prechurpi	50
3.2.6.2.4. Drying of dudh churpi	50
3.2.7. Optimization of process parameters	50
3.2.7.1. Optimization of cooking media	50

(iv)

3.2.7.1.1.	Fat level	50	
3.2.7.1.2.	Sugar concentration	51	
3.2.7.1.3.	Total solids content	51	
3.2.7.1.4.	Time of cooking prechurpi	51	
3.2.7.2.	Moisture level of prechurpi	52	
3.2.7.3.	Drying behaviour after cooking prechurpi	52	
3.2.8.	Packaging and storage	53	
3.2.9.	Sorption studies	54	
3.2.9.1.	Establishing moisture sorption isotherms	54	
3.2.9.2.	Mathematical analysis of the isotherm	55	
3.2.10.	Consumer acceptance of dudh churpi	58	
3.2.11.	Cost of production of dudh churpi	58	
3.2.12.	Statistical analysis	58	
4.	Results	60	
4.1.	Survey on traditional methods of preparation of dudh churpi	60	
4.2.	Analysis of market samples of dudh churpi	60	
4.2.1.	Chemical analysis	60	
4.2.2.	Sensory analysis	61	
4.2.3.	Instrumental analysis	62	
4.2.4.	Relationship between sensory attributes and intrinsic parameters	62	
4.2.5.	Relationship between chemical composition and Instron parameters	63	
4.2.6.	Relationship between sensory textural descriptors and Instron texture profile	65	
4.3.	Optimization of process parameters in the manufacture of dudh churpi	66	
4.3.1.	Milk used for cooking prechurpi	66	
4.3.1.1.	Fat level	67	

4.3.1.2. Sugar concentration	68
4.3.1.3. Total solids content	68
4.3.2. Duration of prechurpi cooking time	68
4.3.3. Moisture level of prechurpi	69
4.3.4. Drying behaviour of cooked prechurpi	70
4.4. Packaging and storage studies of dudh churpi	72
4.4.1. Changes in sensory attributes	72
4.4.1.1. Flavour	72
4.4.1.2. Body and texture	72
4.4.1.3. Colour and appearance	73
4.4.1.4. Total score	73
4.4.1.5. Statistical significance of sensory data	73
4.4.2. Physico-chemical changes	73
4.4.2.1. Moisture	73
4.4.2.2. Titratable acidity	74
4.4.2.3. Free fatty acid	74
4.4.2.4. Tyrosine value	74
4.4.2.5. 5-Hydroxymethylfurfural value	75
4.4.2.6. Reflectance	75
4.4.2.7. Regression equations	75
4.4.2.8. Predicted shelf-life of dudh churpi	76
4.5. Water sorption characteristics of dudh churpi	76
4.5.1. Sorption isotherms of dudh churpi	76
4.5.2. Equations describing isotherms of dudh churpi	77
4.5.3. Effect of temperature on isotherms of dudh churpi	77
4.5.4. Properties of bound water and surface area of the adsorbent	78
4.6. Consumer response to laboratory-made dudh churpi	79
4.7. Cost of production of dudh churpi	80

5. Discussion	81
5.1. Survey on traditional methods of preparation of dudh churpi	81
5.2. Analysis of market samples of dudh churpi	81
5.2.1. Chemical, sensory and instrumental analyses	81
5.2.2. Relationship between sensory attributes and intrinsic parameters	84
5.2.3. Relationship between chemical composition and Instron parameters	85
5.2.4. Relationship between sensory textural descriptors and Instron texture profile parameters	86
5.3. Optimization of process parameters in the manufacture of dudh churpi	88
5.3.1. Milk used for cooking prechurpi	88
5.3.1.1. Fat level	88
5.3.1.2. Sugar concentration	89
5.3.1.3. Total solids content	90
5.3.2. Time of cooking prechurpi	90
5.3.3. Moisture level	91
5.3.4. Drying behaviour of cooked prechurpi	91
5.4. Packaging and storage of dudh churpi	92
5.5. Water sorption characteristics of dudh churpi	94
5.5.1. Sorption isotherms of dudh churpi	94
5.5.2. Equations describing isotherms of dudh churpi	95
5.5.3. Effect of temperature on isotherms of dudh churpi	96
5.5.4. Properties of bound water and surface area of the adsorbent	96
5.6. Consumer response to laboratory-made dudh churpi	98
5.7. Cost of production of dudh churpi	98
6. Summary	100
7. Bibliography	103
