ACKNOWLEDGEMENT	I—II
.....	
CONTANT	III—IV
.....	
CHAPTER I: Object and application of the Research Work	1—14
.....	
CHAPTER II: General Introduction	15—70
.....	
CHAPTER III: Experimental Section	71—78
.....	
CHAPTER IV: Viscous Synergy, Excess Molar volumes, Viscosity Deviations and Isentropic Compressibility of some Primary Monoalkanols in Aqueous N, N-dimethylformamide Mixtures.	79—99
.....	
CHAPTER V: Studies of Viscous Antagonism, Excess Molar Volumes, Viscosity Deviations and Isentropic Compressibility of Ternary Mixtures Containing N,N-dimethylformamide, Benzene and Some Ethers at 298.15 K.	100—121
.....	
CHAPTER VI: Study of Ion-Solvent Interactions of Some Tetraalkylammonium Halides in THF + CCL ₄ Mixture by Conductance Measurements.	122—139
.....	
CHAPTER VII: Partial Molal Volumes, Viscosity <i>B</i> -coefficients and Adiabatic Compressibilities of Some Amino Acids in Aqueous Resorcinol Solutions at 298.15 K	140—163
.....	
CHAPTER VIII: Conductivity Study of Some 1-1 Electrolytes in Aqueous Binary Mixtures of Tetrahydrofuran and 1,3-dioxolane at 298.15 K	164—180
.....	

	Page No.
CHAPTER IX: Apparent Molar Volume, Viscosity, <i>B</i> -coefficient and Adiabatic Compressibility of Some Mineral Sulphates in Aqueous Binary Mixtures of Formamide at T= (298.15, 308.15 and 318.15) K.	181—213
<hr style="border-top: 1px dashed black;"/>	
CHAPTER X: Studies on Ion-pair and Triple-ion Formation of Some Tetraalkylammonium Salts in Binary Solvent Mixtures of Tetrahydrofuran and Benzene at 298.15 K	214—235
<hr style="border-top: 1px dashed black;"/>	
CHAPTER XI: Studies on Apparent Molar Volume, Viscosity <i>B</i> -coefficient and Adiabatic Compressibility of Some Thiocyanate salts in Aqueous Binary Mixtures of 1,3-dioxolane at Different Temperatures.	236—257
<hr style="border-top: 1px dashed black;"/>	
CHAPTER XII: Viscosity, Density, and Speed of Sound for the Binary Mixtures of Formamide with 2-Methoxyethanol, Acetophenone, Acetonitrile, 1,2-dimethoxyethane, and Dimethylsulfoxide at Different Temperatures.	258—275
<hr style="border-top: 1px dashed black;"/>	
CHAPTER XIII: Concluding Remarks	276—278
