|--|-------------|
| <b>CHAPTER I : Pesticides, their residues and the problem</b> . . . . .  | 1           |
| <b>CHAPTER II : Some approaches to generalisation and simplification of the steps for pesticide residue analysis in foods.</b> . . . . . | 23          |
| <b>A. Rapid method for extraction of a few commonly used pesticides</b> . . . . .  | 23          |
| <b>B. A study on the adsorbent column for clean up of pesticide residue extracts.</b> . . . . .  | 27          |
| <b>C. A critical study on the coating materials used in thin layer chromatography.</b> . . . . .   | 33          |
| <b>CHAPTER III : Study on the decay of pesticides</b> . . . . .  | 42          |
| <b>A. Decay of dimethoate in water</b> . . . . .   | 42          |
| <b>B. Dissipation of a few commonly used pesticides in certain food commodities.</b> . . . . .   | 47          |
| <b>C. Loss of pesticides in boiling water.</b> . . . . .   | 50          |
| <b>D. Persistence during storage and effect of processing on reduction of phosalome residues in dry fish.</b> . . . . .                  | 52          |
