<b>1. INTRODUCTION</b>	<b>1-15</b>
1.1. Ramsar Convention	1
1.2. Definition of Wetlands	2
1.3. Distribution and Classification of Wetlands	4
1.3.1. Global scenario	4
1.3.2. Indian sub-continental scenario	5
1.3.3. Wetlands of West Bengal	8
1.3.4. Wetland of Maldah	11
1.4. Importance of Wetlands	13
1.4.1. Importance of Aquatic Macrophytes on Wetland	14
1.5. Wetlands in Danger	
<b>2. STUDY AREA</b>	<b>16-35</b>
2.1. Location	16
2.2. Topography	16
2.3. Land Distribution	17
2.4. Climate	17
2.4.1. Temperature	18
2.4.2. Rainfall	19
2.4.3. Relative Humidity	21
2.5. Drainage system	22
2.5.1. Origin of Wetlands	22
2.5.2. Types of Wetlands	23
2.5.2. A. Riverine Wetlands	23
2.5.2. B. Lacustrine Wetlands	23
2.5.2. C. Palustrine Wetlands	23
2.6. Wetlands under study	24
2.6.1. <i>Tal</i> Region	25
2.6.2. <i>Diara</i> Region	29
2.6.3. <i>Barind</i> Region	30
2.7. Vegetation	31
2.7.1. Forests	32
2.7.2. Mango orchards	33
2.7.3. Grasslands	33
2.7.4. Muralic Vegetation	33
2.7.5. Aquatic Vegetation	34
2.8. Fauna	35
<b>3. Materials and Methods</b>	<b>36-44</b>
3.1. Floristics	36

3.1.1. Mode of Sampling	36
3.1.2. Record of Field Data	36
3.1.3. Dry of specimens	36
3.1.4. Poisoning of Specimens	37
3.1.5. Mounting and Labeling	37
3.1.6. Identification	37
3.1.7. Storing the Herbarium sheets	37
3.2. Phytosociology	37
3.2.1. Sampling	37
3.2.2. Preservation of Specimens	38
3.2.3. Data Processing	38
3.2.4. Biological Diversity Indices	39
3.2.4.1. Species Diversity Indices	39
3.2.4.1. A. Shannon-Weiner Index	39
3.2.4.1. B. Simpson's Index	39
3.2.4.2. Species Richness Indices	40
3.2.4.2. A. Menhinick Index	40
3.2.4.2. B. Margalef Index	40
3.3. Phenology	40
3.4. Reproductive potential	41
3.4.1. Data analysis of Reproductive potential	41
3.4.1.1. Seed Shape and Size Index	42
3.4.1.2. Germination Percentage	42
3.4.1.3. Nonviable Percentage	42
3.4.1.4. Reproductive Capacity and Seed Output	42
3.5. Economic Botany	42
3.5.1. Major Economical uses	43
3.5.2. Ethnobotany	43
3.5.2.1. Edible plants	43
3.5.2.2. Fodder plants	43
3.5.2.3. Medicinal plants	43
3.5.2.4. Plants for building materials	43
3.5.2.5. Manure plants	44
3.5.2.6. Ornamental and utensils	44
3.5.2.7. Broom, religious and fuel plants	44
3.5.2.8. Miscellaneous	44
3.6. Degradation of Wetland	44
<b>4. FLORISTICS</b>	<b>45-200</b>
4.1. Introduction	45
4.2. Classification	46
4.3. Result and Discussion	51
4.4. Enumeration	51
4.5. Exotic Plants	199
4.5.1. Neo-tropical	199
4.5.2. North-temperate	199
4.5.3. North African, Afro-Asian and Arabian	199

4.5.4. Tropical and South African	199
4.5.5. Austo-Asian	199
4.6. Endemic Plants	199
4.7. RET Plants	200
4.8. Interesting Plants	200
<b>5. PHYTOSOCIOLOGY</b>	<b>201-382</b>
5.1. Result and Discussion	202
5.1.1. Tal Region	202
5.1.2. Diara Region	303
5.1.3. Barind Region	350
5.1.4. Annual Phytosociological scenario of District Wetlands	373
5.1.4.1. Diversity Indices	380
5.1.4.2. Similarity Index	381
<b>6. PHENOLOGY</b>	<b>383-397</b>
6.1. The Present works	384
6.2. Result and Discussion	385
6.2.1. Life forms	385
6.2.2. Habit groups	386
6.2.3. Phenology of Wetland plants	386
6.2.3.1. Seedling appearance	386
6.2.3.2. Vegetative growth	393
6.2.3.3. Flowering	393
6.2.3.4. Pollination	393
6.2.3.5. Fruit	394
6.2.3.6. Seed Dispersal	394
6.2.3.7. Death or Withdrawal	395
<b>7. REPRODUCTIVE POTENTIAL</b>	<b>398-423</b>
7.1. Result and Discussion	398
7.1.1. Species wise Study	404
<b>8. ECONOMICAL BOTANY</b>	<b>424-448</b>
8.1 Result and Discussion	425
8.1.1. Enumeration	425
8.1.1.1. Useful plants	425
8.1.1.2. Poisonous plants	439
8.2. Ethnobotany	440
8.2.1. Edible plants	441
8.2.2. Fodder plants	442
8.2.3. Medicinal plants	442
8.2.4. Building and Fencing materials	444
8.2.5. Broom, Utensil, Religious and Ornamentals	445
8.2.6. Fuel plants	447
8.2.7. Green manure	447
8.2.8. Miscellaneous	447

<b>9. DEGRADATION OF WETLAND</b>	<b>449-454</b>
9.1. Result and Discussion	449
9.1.1. Wetland Degradation	449
9.1.1.1. Anthropogenic Pressure	450
9.1.1.2. Natural Pressure	454
<b>10. SUSTAINABLE UTILIZATION AND MANAGEMENT OF BIORESOURCES</b>	<b>455-461</b>
10.1. Sustainable Utilization	455
10.1.1. Agriculture	456
10.1.2. Irrigation	456
10.1.3. Fisheries	456
10.1.4. Ground water recharged and Flood control	457
10.1.5. Rural economy	457
10.1.6. Jute retting	458
10.1.7. Green manure	458
10.2. Conservation or Management strategies	458
10.2.1. Increasing the depth of Wetlands	458
10.2.2. Periodical weed removal	458
10.2.3. Public awareness	459
10.2.4. Creation of bird sanctuary	459
10.2.5. Control over fishing	459
10.2.6. Control of excessive agricultural activity	460
10.2.7. Control of monoculture	460
10.2.8. Control bird poaching	460
10.2.9. Stop releasing urban and industrial influx or sewages	461
10.2.10. Research and Monitoring	461
<b>11. CONCLUSION</b>	<b>462-463</b>
<b>12. REFERENCE</b>	<b>464-473</b>
