NOMENCLATURE	2
INTRODUCTION	7
CHAPTER – I	
STRESSES DUE TO HEAT EXPOSURE ON THE BOUNDING SURFACE :	
<i>Paper - 1 : Thermal stresses due to variable temperature distribution on the surface of a prestressed elastic solid.</i>	22
<i>Paper - 2 : Thermal stresses due to a given temperature distributed on one straight edge of a semi-infinite elastic strip, two parallel bounding edges being insulated.</i>	39
CHAPTER – II	
INERTIA EFFECTS DUE TO NON-STATIONARY TEMPERATURE DISTRIBUTION ON ELASTIC BODIES :	
<i>Paper - 1 : On inertia effects due to time-dependent temperature applied at free end of a thin elastic rod.</i>	54
<i>Paper - 2 : A note on inertia effects due to some time-dependent temperature applied on the boundary of a thin semi-infinite plate.</i>	62

CHAPTER – III

HEAT FLUX BOUNDARY VALUE PROBLEMS OF ANISOTROPIC BODIES :

- Paper - 1 : Thermoelastic heat flux boundary value problem of a thick plate.* 74
- Paper - 2 : Thermal stresses due to heat flux on the surface of a semi-infinite transversely isotropic solid.* 87

CHAPTER – IV

THERMO-ELASTIC CONTACT PROBLEM OF ANISOTROPIC BODIES :

- Paper - 1 : Thermal stresses due to sudden heating on the boundary of a circular hole embeded in aelotropic thin plate.* 102
- Paper - 2 : Thermal stresses due to contact of a hot ring with long aelotropic cylinder.* 114

CHAPTER – V

GENERATION OF THERMOELASTIC WAVES :

- Paper - 1: Two dimensional thermo-elastic waves due to disturbance produced by a periodic heat nucleus.* 130
- Paper - 2: Two dimensional thermo-elastic waves due to disturbance produced by an impulsive heat nucleus.* 142
