

CONTENTS

1. CHAPTER-I (THEORETICAL APPROACH) :	01-17
1. General	01
2. 1,3-Dipolar Cycloaddition (Mechanistic Approach)	07
2. CHAPTER-II (CHEMISTRY OF NITRONE) :	18-31
1. Introduction	18
2. Nomenclature	18
3. Geometrical Isomerism	18
4. Syntheses Of Nitrones	19
5. Reactions Of Nitrones	24
3. CHAPTER-III (EXPERIMENTAL) :	32-54
A. Preparation Of N-cyclohexyl hydroxylamine	33
B. Synthesis Of α -Amino-N-cyclohexyl Nitrone	33
C. Reaction Of The Nitrone With Triphenyl Phosphine.	34
D. Conversion Of The Nitrone To Dimer	35
E. Reactions Of The Nitrone With :	
1. Cyclohexene	36
2. Acenaphthalene	37
3. Ethyl Acrylate	38
4. <i>Cycloreversion Of 4-Substituted Adduct To</i> 5-Substituted Adduct Of Ethyl Acrylate	39
5. p-Benzoquinone	40
6. N-Phenyl Maleimide	41
7. Acrylonitrile	42
8. Hydrolysis Of Acrylonitrile Adduct	43
9. Trichloro Ethylene	44

10. 2-Chloro Acrylonitrile	45
11. Tetrachloro Ethylene	46
12. 3,4-Dihydro-2H-Pyran	47
13. Methyl Acrylate	48
14. 2,3-Dihydro Furan	49
15. N-Cyclohexyl Maleimide	50
16. Dimethyl Acetylene Dicarboxylate	51
17. Methyl Phenyl Propiolate	52
18. Benzyl Chloride	53
19. 2-Propyl Bromide	54
4. RESULTS AND DISCUSSION :	55-64
A. General Discussion	55
B. Interpretation Of Mass Spectra	59
C. Interpretation Of NMR Spectra	61
5. SCOPE AND OBJECTIVES :	65-67
6. REFERENCES :	68-74
