

CONTENTS

| | Page |
|--|-------------|
| CHAPTER - I | |
| Introduction and Review of Previous work. | |
| A. General survey on soil organic matter | 1-5 |
| B. Isolation and purification .. | 6-12 |
| C. Molecular weight .. | 12-16 |
| D. Potentiometric studies .. | 16-18 |
| E. Spectroscopic studies .. | 19-24 |
| F. Metal Complexing properties and stability constant of the complexes | 24-47 |
| CHAPTER - II | |
| Scope and Object of the present investigation .. | 48-51 |
| CHAPTER - III | |
| Samples : their preparation, spectroscopic and potentiometric studies | |
| A. Preparation and elemental analysis of the samples .. | 52-56 |
| B. Characterization of the soils and their clay fraction .. | 56-63 |
| C. Spectroscopic studies .. | 64-69 |
| D. Potentiometric studies .. | 69-82 |

CHAPTER - IV

Interaction of some bivalent metal cations with humic substances

| | | |
|---------------------------|----|-------|
| A. Introduction | .. | 83-84 |
| B. Experimental | .. | 84-85 |
| C. Results and discussion | .. | 86-99 |

CHAPTER - V

Stability Constants of metal-humic matter complexes.

| | | |
|---|----|---------|
| A. Introduction | .. | 100-101 |
| B. Experimental | .. | 102-105 |
| C. Successive Stability Constants of Cu(II) complexes | .. | 106-122 |
| D. Successive Stability Constants of Ca(II) complexes | .. | 123-139 |
| E. Successive Stability Constants of Pb(II) complexes | .. | 140-156 |
| F. Successive Stability Constants of Cd(II) complexes | .. | 157-181 |
| G. Results and discussion | .. | 182-191 |

CHAPTER - VI

| | | |
|------------------------|----|---------|
| Summary and Conclusion | .. | 192-202 |
| Bibliography | .. | 203-219 |
