

Acknowledgement

At the outset, I like to express my most sincere gratitude to my respected supervisor, Dr. Mahendra Nath Roy, Reader, Department of Chemistry, University of North Bengal, Darjeeling, India for his constant guidance, valuable suggestions, inspirations and constructive criticism during my research period. Without his loving care, meticulous guidance and priceless supervision, it would have not been possible for me to bring this thesis to the present shape. I shall ever remain grateful to him.

I also express my deep sense of gratitude to the faculty members, Department of Chemistry, University of North Bengal for their invaluable assistance and continued inspiration during the course of my research period.

I am grateful to the University authority for providing laboratory facilities, especially University Scientific Instrumentation Centre, University of North Bengal for helping me in my research.

I keenly express my sincere thanks to my fellow research scholars of our laboratory for their generous co-operation in my research work. Verily, thanks are also due to my colleagues as well as members of the Managing Committee of Kumarganj High School (H. S.), Kumarganj, Dakshin Dinajpur for their cordial help and inspiration during my research period.

The inspiration and encouragement from my lovable family members deserve to be recorded here with the same intensity of gratitude. No word is enough to pay my sincere gratitude to my parents whose

inspirations went a long way to the completion of this thesis. In fine, I can't but acknowledge the unstinted co-operation of my beloved wife in this regard.

I am constantly aware of what a huge debt I owe to the sources of the information required for my research work; the numerous books, monographs, articles, etc. I put on record some measure of my gratitude to those whose references I have cited in this thesis.

I am also thankful to the University Grants Commission, New Delhi, for financial and instrumental support under the Departmental Special Assistance Programme (No. F540/27/DRS/2007, SAP-1) for my research work associated with this Ph. D. thesis.
