

LIST OF TABLES

<i>Table No.</i>	<i>Table</i>	<i>Page No</i>
Table 4.1.1	List of the herbal healers interviewed from the different villages of West Sikkim	78
Table 4.1.2	List of ethnomedicine used by the herbal practitioners of West Sikkim	79-87
Table 4.1.3	List of number of formulations used for the treatment of various ailments by the traditional healers of West Sikkim	88
Table 4.1.4	List of the herbal formulations selected for analysis	89
Table 4.2.1	Organoleptic study of herbal formulations	92
Table 4.2.3	Physicochemical analysis of the herbal formulations	105
Table 4.2.4.a	Fluorescence analysis of herbal formulation, HP (treatment of Heart palpitation)	106-109
Table 4.2.4.b	Fluorescence analysis of herbal formulation, AR (treatment of arthritis)	110-113
Table 4.2.4.c	Fluorescence analysis of herbal formulation, GS (treatment of gastritis)	114-117
Table 4.2.4.d	Fluorescence analysis of herbal formulation, AS (treatment of asthma)	118-121
Table 4.2.4.e	Fluorescence analysis of herbal formulation, BP (treatment of high blood pressure)	122-125
Table 4.2.4.f	Fluorescence analysis of herbal formulation, FP (treatment of food poisoning)	126-129
Table 4.2.4.g	Fluorescence analysis of herbal formulation, TS (treatment of tonsillitis)	130-133
Table 4.2.4.h	Fluorescence analysis of herbal formulation, FF (<i>Fraxinus floribunda</i> for the treatment of diabetes)	134-137
Table 4.2.4.i	Fluorescence analysis of herbal formulation, HS (<i>Hedyotis scandens</i> for the treatment of Indigestion and stomachache)	138-141
Table 4.2.4.j	Fluorescence analysis of herbal formulation, CB (<i>Clematis buchanania</i> for the treatment of sinusitis)	142-145
Table 4.2.4.k	Fluorescence analysis of herbal formulation, AA (<i>Achyranthes aspera</i> for the treatment of throat infection)	146-149
Table 4.3.2.a:	Total phenol content of studied eight herbal formulations in different solvent extracts (mg Gallic acid eq./g EW)	167
Table 4.3.2.b:	Total flavonoid content of studied eight herbal formulations in different solvent extracts (mg quercetin eq./g EW)	167

Table No.	Table	Page No
Table 4.3.2.c:	Total ortho-dihydric content of studied eight herbal formulations in different solvent extracts	168
Table 4.3.2.d:	Total alkaloid content of studied eight herbal formulations in different solvent extracts	168
Table 4.3.2.e:	Total tannin content of studied eight herbal formulations in different solvent extracts	169
Table 4.3.2.f:	Total steroid content of studied eight herbal formulations in different solvent extracts	169
Table 4.4:	Antimicrobial activity of ethanol and aqueous extracts of the herbal formulations against the some bacterial isolates with disc diffusion method	191-192
Table 4.7.1:	DPPH [·] scavenging activity of herbal formulations	205
Table 4.7.2:	ABTS [·] scavenging activity of herbal formulations	205
Table 4.7.3:	Superoxide [·] scavenging activity of herbal formulations	206
Table 4.7.4:	Nitric oxide [·] scavenging activity of herbal formulations	206
Table 4.7.5:	Metal chelating activity of herbal formulations	207
Table 4.7.6:	Free radical antioxidant power (FRAP) of the eight herbal formulations	207
Table 4.9.1	Pearson correlation matrix of phytochemical content, antioxidant and antidiabetic activity of solvent extracts of eight studied herbal formulations	210
Table 4.9.2	Principal components loadings of variables for the ten solvent extracts of eight herbal formulations	212
Table 4.11.1	Effect of aqueous extract of BOFF on anti – inflammatory activity on carrageenan induced rat oedema with time and percentage of inhibition	219
Table 4.11.3.a	Effect of different extracts on oral glucose tolerance test	225
Table 4.11.3.b	Effect of different extracts on fasting plasma glucose level in rats	225
Table 4.11.3.c	Effect of extracts on changes in body weight in rats	226
Table 4.11.3.d	Determination of biochemical parameters after treatment with different extracts	226
Table 4.12.2	List of phytochemicals present in Fraction-1 and their activities	245
