

TABLE OF THE CONTENTS

Topic	Page No.
ABSTRACT.....	i-ii
PREFACE.....	iii
ACKNOWLEDGMENT.....	iv
TABLE OF THE CONTENTS.....	v-vii
LIST OF TABLES.....	viii
LIST OF FIGURES.....	ix-x
LIST OF APPENDICES.....	xi
Chapter I: General Introduction.....	1-31
1.1. Ligands and Chelators.....	2
1.2. Schiff base Ligands	4
1.3. Application of Schiff base and their metal complexes.....	5
1.3.1. Application in Biology.....	6
1.3.2. Application in catalysis.....	10
1.3.3. Biomedical application	13
1.3.4. Application in Optoelectronics and energy materials.....	17
1.4. Synthetic and commercial ligand.....	19
1.5. Scope and objectives of the present study.....	20-21
References.....	22- 31
Chapter II: Bio-mimetic of Catecholase and Phosphatase Activity by a Tetra-iron(III) Cluster(1)	32-58
2.1. Introduction.....	32
2.2. Experimental Section.....	33
2.2.1. Preparation of the tetra-iron(II) cluster.....	33
2.2.1.1. Chemicals, Solvents and starting materials.....	33
2.2.1.2. Synthesis of the tetra-iron(III) cluster.....	33
2.2.2. Physical Measurements.....	34
2.2.3. X-ray diffraction study.....	34
2.2.4. Catecholase activity of Tetra-iron(III) cluster.....	34
2.2.5. Electrochemical measurements.....	35

2.2.6. Phosphatase activity of tetra-iron(III) cluster (1).....	35
2.3. Result and discussion	36
2.3.1. Synthesis and formulation of the tetra-iron(III) cluster (1).....	36
2.3.2. Infrared spectral analysis of iron(III) cluster.....	37
2.3.3. UV-VIS spectral analysis of iron(III) cluster.....	37
2.3.4. Description of crystal structure.....	38
2.3.5. Bond Valence Sum (BVS) calculation.....	43
2.3.6. Catalytic oxidation of DTBC with mechanistic implications.....	44
2.3.7. Electrochemical behaviour of Fe(III) complex in presence of DTBC.....	47
2.3.8. Phosphatase activity of tetra -iron (III) cluster(I) and its mechanistic Inferences.....	49
2.4. Conclusion.....	52
References.....	54-58
Chapter III: Transesterification Activity by a Zinc (II)-Schiff Base Complex (2)with	
Theoretical Interpretation	59- 95
3.1. Introduction.....	59
3.2. Experimental Section.....	60
3.2.1. Preparation of the Zinc (II)- Schiff base complex.....	60
3.2.2. Chemicals, solvents, and starting materials.....	60
3.2.3. Synthesis of the Schiff base and Zinc (II) Complex.....	60
3.2.4. Physical measurements	61
3.2.5. X-ray diffraction analysis.....	61
3.2.6. Hirshfeld surface analysis.....	61
3.2.7. Transesterification activity of Zn (II)-Schiff base complex (2).....	62
3.2.8. Computational details.....	62
3.3. Results and discussion.....	63
3.3.1. Synthesis and formulation of the Zn(II)-Schiff base complex (2).....	63
3.3.2. Analytical characterization.....	63
3.3.3. Description of crystal structure and optimized molecular structure.....	66
3.3.4. Hirshfeld surface analysis.....	71

3.3.5. Transesterification study of Zn (II) -Schiff base complex.....	73
3.4. Conclusion.....	91
References.....	92-95
Chapter IV: Synthesis, supramolecular architecture and fluorescence property of a mixed ligand 1D Pb (II) coordination polymer	96-107
4.1. Introduction.....	96
4.2. Experimental Section.....	97
4.2.1. Preparation of the complex	97
4.2.1.1. Chemicals, solvents and starting materials	97
4.2.1.2. General procedure for the synthesis of Pb (II) polymer (3)	97
4.2.2. Physical measurements.....	98
4.2.3. X-ray diffraction study.....	98
4.3. Results and discussion.....	98
4.3.1. Synthesis and formulation.....	98
4.3.2. Description of crystal structure and supramolecular interactions.....	99
4.3.3. Fluorescence properties of the Pb (II) polymer in solid state.....	104
4.4. Conclusions.....	105
References.....	106-107
Chapter V: Summary and future scope	108-109
APPENDIX.....	110
BIBLIOGRAPHY.....	111-140
INDEX.....	141-142
