

## ACKNOWLEDGEMENTS

The present thesis embodies the results of research carried out by the author at the Department of Chemistry, University of North Bengal, Dist. Darjeeling.

The author takes this opportunity to record his grateful thanks to Dr. H.S.Khastgir, Professor of Chemistry, University of North Bengal, Dist. Darjeeling, for his valuable suggestions, guidance and untiring interest throughout the research programme.

The author is indebted to Dr. A.Duffield and Dr. L.J.Darham, Department of Chemistry, Stanford University, Stanford, California, for mass and NMR spectra respectively, to Dr. James. H.Shooley, Varian Associates, Palo alto, California, U.S.A. for 300 MHz NMR spectra and  $^{13}\text{C}$  NMR spectra, to Prof. T.R.Govindachari, to Prof. H.V.Dhatt, Department of Organic Chemistry, Indian Institute of Science, Bangalore, India and to Dr. Nityanand, Central Drug Research Institute, Lucknow, India, for kindly arranging some of the NMR and IR spectra recorded in the thesis.

The author's thanks are also due to Dr. S.C.Patraschi, Assistant Director, Indian Institute for Experimental Medicine and Dr. E.Ali for mass spectra and to Dr. S.K.Sengupta, Research and Development Section, East India Pharmaceutical Works Ltd, Calcutta for optical rotations and to Dr. U.R.Chatak for helpful discussion.

Sincere thanks are also accorded to Prof. F. Klyne and Dr. F. H. Scopes, Westfield College, London for the C.D. curves and to Dr. B. C. Das, Institute De Chimie Des Substances Naturelles, Gif-sur-Yvette, France, for mass spectra and to A. Bernhardt, West Germany for the microanalyses recorded in the thesis.

The author is grateful to Prof. G. Berti, Universita Di Pisa, Istituto Di Chimica Organica, Della Facolta Di Farmacia, Italy, for the gift of a sample of kern-9(11)-one, and to Prof. H. Ageta, Showa College of Pharmaceutical Sciences, Tokyo, Japan for IR-Comparison of Dryocrasol and its acetate, and to Prof. G. Curiezon Laboratoire-Associé au CNRS, Institut-de-Chimie, Strasbourg, France for an authentic specimen of Cyclonolitol acetate.

The author expresses his warmest thanks to Dr. T. K. Roy, Mr. S. L. Dutta, Scientific Officer and colleagues of the Department of Chemistry, University of North Bengal, Dist. Darjeeling, for their cooperation and helpful discussions during the progress of the research work.

The author is grateful to the Council of Scientific and Industrial Research, Rafi Marg, New Delhi for the award of a Research Fellowship and the authorities of University of North Bengal for extending laboratory facilities.

(iii)

Finally, the author expresses his deep feelings for the constant inspiration and encouragement he received from his beloved mother and sisters.

Department of Chemistry
