

TABLE OF CONTENTS

Abstract	i-ii
Preface	iii
List of Tables	ix-x
List of Schemes	xi-xiv
List of Figures	xv-xvii
List of Appendices	xviii
Appendix A: List of Publications	xix
Appendix B: Oral Presentation & Poster Presentation	xx
Abbreviation	xxi

Chapter I

A review on heterogeneous catalysis, metal nanocomposites and catalytic applications	1-22
I.1. Catalysis	2
I.1.1. Homogeneous catalysis	2
I.1.2. Heterogeneous Catalysis	2
I.1.3. Nanocatalysis	2
I.2. Heterogeneous supports, Metal Nanocomposites and Catalytic Applications	3
I.2.1. Ordered Mesoporous silica	3
I.2.2. Zeolites	6
I.2.3. Metal Oxides	6
I.2.4. Layerd double hydroxide	10
I.2.5. Magnetic materials	10
I.2.6. Charcoal	11
I.2.7. Carbon nanotubes	13
I.2.8. Graphene oxides	13
I.2.9. Organic polymers and related molecules	17
I.3. References	22

Chapter II

Synthesis of organic disulfides from thiocyanates promoted by poly-ionic resins hydroxide	23-36
II.1. Introduction	24

II.2.	Present Work: Background and Objective	25
II.3.	Present work: Result and Discussion	26
II.4.	Conclusion	32
II.5.	Experimental section	32
II.5.1.	General information	32
II.5.2.	General procedure for the preparation of disulfide	33
II.5.3.	Physical properties and spectral data of compounds	33
II.6.	References	36

Chapter III

	Copper oxide nanoparticles embedded on macroporous poly-ionic resins (CuO@ARF): Applications to on-water C–S cross-coupling and synthesis of heterocyclic scaffold phenothiazine	37-53
III.I.	Introduction	38
III.2.	Present Work: Background and Objective	39
III.3.	Present work: Result and Discussion	41
III.3.1.	Preparation of the heterogeneous CuO (CuO@ARF)	41
III.3.2.	Characterization of CuO@ARF	41
III.3.3.	Catalytic activity of CuO@ARF	42
III.3.4.	Hot filtration test	46
III.3.5.	Recycling experiments	46
III.3.6.	Further application	47
III.4.	Conclusion	47
III.5.	Experimental section	48
III.5.1.	General information	48
III.5.2.	Preparation of CuO@ARF	49
III.5.3.	General procedure for C–S cross-coupling reaction	49
III.5.4.	Preparation of phenothiazine from selective iodo-product using Pd-BINAP catalyst	50
III.5.5.	Preparation of phenothiazine from selective iodo-product using CuO@ARF catalyst	50
III.5.6.	Physical properties and spectral data of compounds	50
III.6.	References	53

Chapter IV

	Pd/Cu bimetallic nanoparticles embedded in macroporous ion-exchange resins: An excellent heterogeneous catalyst for the Sonogashira reaction	54-70
IV.1.	Introduction	55
IV.2.	Present Work: Background and Objective	56
IV.3.	Present work: Result and Discussion	58
IV.3.1.	Preparation of Heterogeneous Pd/Cu composite	58
IV.3.2.	Characterizations of Pd/Cu-ARF	59
IV.3.3.	Catalytic Activity of Pd/Cu-ARF(II)	63
IV.3.4.	Heterogeneity test	65
IV.3.5.	Test for Recyclability	66
IV.4.	Conclusion	66
IV.5.	Experimental section	66
IV.5.1.	General information	66
IV.5.2.	Preparation of Pd/Cu-ARF(I) & Pd/Cu-ARF(II)	67
IV.5.3.	Sonogashira cross-coupling reaction using Pd/Cu-ARF(II)	67
IV.5.4.	Suzuki-Miyaura cross-coupling using Pd/Cu-ARF(II)	68
IV.5.5.	Physical properties and spectral data of compounds	68
IV.6.	References	70

Chapter V

	Pd/Cu bimetallic nanoparticles embedded in macroporous ion-exchange resins: Further application to Suzuki-Miyaura and Mizoroki-Heck reactions	71-83
V.1.	Introduction	72
V.2.	Present Work: Background and Objective	72
V.3.	Present work: Result and Discussion	73
V.3.1.	Pd/Cu-ARF(II) catalyzed Suzuki-Miyaura reaction	73
V.3.2.	Pd/Cu-ARF(II) catalyzed Mizoroki-Heck reaction	74
V.3.3.	Comparative study	76
V.3.4.	Recycling experiments	76
V.3.5.	Characterization of recovered catalyst	77
V.4.	Conclusion	77

V.5.	Experimental section	78
V.5.1.	General information	78
V.5.2.	Preparation of Pd/Cu-ARF(II)	78
V.5.3.	Preparation of Pd-ARF	78
V.5.4.	General procedure Suzuki-Miyaura cross-coupling using Pd/Cu-ARF(II)	78
V.5.5.	General procedure Mizoroki-Heck cross-coupling using Pd/Cu-ARF(II)	79
V.5.6.	Preparation of 3-Methylindole	79
V.5.7.	Physical properties and spectral data of compounds	80
V.6.	References	83

Chapter VI

	Graphene oxide as “carbocatalyst” for one-pot sequential dehydration-hydrothiolation of secondary aryl alcohols and chemoselective thioacetalization of aldehydes	84-111
VI.1.	Introduction	85
VI.2.	Present Work: Background and Objective	85
VI.3.	Present work: Result and Discussion	89
VI.3.1.	Graphene oxide preparation and characterization	89
VI.3.2.	Sequential dehydration-hydrothiolation reaction	89
VI.3.3.	Thioacetalization of Aldehydes	94
VI.4.	Conclusion	101
VI.5.	Experimental section	101
VI.5.1.	General information	101
VI.5.2.	Preparation of Graphene Oxide	101
VI.5.3.	General procedure for one-pot sequential dehydration-hydrothiolation reaction	102
VI.5.4.	Physical properties and spectral data of compounds	102
VI.5.5.	General procedure for the preparation of dithioacetal	106
VI.5.6.	Physical properties and spectral data of dithioacetals	106
VI.6.	References	111

Chapter VII

	Ni(0) supported with reduced graphene oxide (RGO): Efficient	112-126
--	---	---------

	heterogeneous catalyst for Kumada–Corriu cross–coupling reaction	
VII.1.	Introduction	113
VII.2.	Present Work: Background and Objective	114
VII.3.	Present work: Result and Discussion	116
	VII.3.1. Ni/RGO catalyst in Kumada–Corriu cross–coupling reaction	116
	VII.3.2. Recovery and reusability of the catalyst	119
	VII.3.3. Characterization of recovered catalyst	121
VII.4.	Conclusion	122
VII.5.	Experimental section	123
	VII.5.1. General information	123
	VII.5.2. Synthesis of Ni/RGO composite materials	123
	VII.5.3. Representative procedure for Kumada–Corriu reaction using Ni/RGO-40	124
	VII.5.4. Physical properties and spectral data of compounds	124
VII.6.	References	126
	Chapter VIII	
	Ni(0) supported with reduced graphene oxide (RGO): Efficient heterogeneous catalyst for C–S cross–coupling reaction	127-140
VIII.1.	Introduction	128
VIII.2.	Present Work: Background and Objective	128
VIII.3.	Present work: Result and Discussion	131
	VIII.3.1. Ni/RGO catalyst in C–S cross–coupling reaction	131
	VIII.3.2. Recovery and reusability of the catalyst	135
	VIII.3.3. Characterization of recovered catalyst	135
VIII.4.	Conclusion	136
VIII.5.	Experimental section	137
	VIII.5.1. General information	137
	VIII.5.2. General procedure for C–S cross–coupling using Ni/RGO-40	137
	VIII.5.3. Physical properties and spectral data of compounds	137
VIII.6.	References	140
	Bibliography	141-159
	Index	160-163
