	<u>Page no.</u>
PREFACE	
<u>INTRODUCTION</u>	1
Chapter I <u>PHYSICAL BACKGROUND</u>	5
A. GEOLOGY	5
B. SOIL	11
C. CLIMATE	13
REFERENCES	17
Chapter II <u>GEOMORPHOLOGY AND ITS IMPACT ON BASIN MANAGEMENT</u>	19
INTRODUCTION	19
A. MORPHOMETRIC ANALYSIS	20
a. The Study of Drainage Network & Composition	20
I. Order & Stream Number Relationship	22
II. Order & Stream Length Relationship	24
III. Order & Stream Slope Relationship	26
IV. Order & Basin Area Relationship	27
V. Order & Basin Relief Relationship	28
b. The Study of Landform Configuration	31
I. Average Slope	34
II. Relative Relief	40
III. Drainage Density	45
IV. Drainage Frequency	50
V. Hydrographic Network	56
VI. Dissection Index	63
VII. Roughness Index	67
VIII. Correlation Among Different Morphometric Attributes	72
B. THE MAJOR GEOMORPHIC UNITS	82
a. Southern Alluvial Fan Zone	83
b. The Dissected Foothill Topography	89
c. The Rugged Middle Hill Tract	89

	<u>Page no.</u>
C. DETERMINATION OF LAND POTENTIALITY OF THE GEOMORPHIC UNITS	90
CONCLUSIONS	91
REFERENCES	93
 Chapter III <u>NATURAL VEGETATION AND ITS DEPLETION</u>	 96
INTRODUCTION	96
A. FACTORS INFLUENCING NATURAL VEGETATION	97
B. CLASSIFICATION AND DISTRIBUTION OF NATURAL VEGETATION	97
C. THE ASSESSMENT OF FOREST DEPLETION	105
D. CAUSES OF DEFORESTATION	107
a. Human Interferences as the Cause of Forest Depletion	108
I. Tea Gardening as an Agent of Deforestation	108
II. Growth of Settlements as a Means of Deforestation	110
III. Casual Felling as a Menace Causing Deforestation	112
b. Calamities as the Cause of Forest Depletion	115
I. Forest Fire as the Cause of Forest Decay	115
II. Cyclonic Storm as a Cause of Forest Denudation	116
E. EFFECT OF FOREST DEPLETION	117
a. Impact of Deforestation on Rainfall	117
b. Deforestation & Water Yield	119
F. THE SUITABLE CORRECTIVE MEASURES AGAINST DEFORESTATION	122
a. Present Management Strategies	123
b. Future Management Strategies	124
CONCLUSIONS	124
REFERENCES	127

	<u>Page No.</u>
<b>Chapter IV <u>RAINFALL CHARACTERISTICS</u></b>	128
INTRODUCTION	128
A. RAINFALL ANALYSIS	128
a. Average Depth of Annual Rainfall	129
b. Variability of Rainfall	134
c. Rainfall Persistence	138
d. Trend of Rainfall	141
SUMMARY OF CONCLUSIONS	145
REFERENCES	147
<b>Chapter V <u>CHANNEL MORPHOLOGY AND HYDRAULICS</u></b>	148
INTRODUCTION	148
A. THE STUDY OF CHANNEL MORPHOLOGY	149
a. Channel History of the Rakti River System	149
b. The Study of the Long Profiles	150
c. The Study of the Changing Nature of the Lower Sections of the Long Profiles	152
d. The Comparative Study of the Channel Areas of the Lower Courses	154
B. THE STUDY OF HYDRAULICS	156
a. The Study of Mean Monthly Discharge	157
b. Estimation of the Mean Monthly Suspended Sediment Load & Its Relation with the Discharge	158
c. The Study of Mean Monthly Stage and Bed Elevation of Channel	159
d. The Mean Monthly Stage & Discharge Relationship	162
e. The Study of the Peak Flood Discharge, Corresponding Stage as well as Bed Height	163
f. The Peak Flood Run-off and the Sediment Load Relationship	168
g. The Study of Flood Frequency	170
h. The Study of Hydraulic Parameters	170

	<u>Page No.</u>
i. The Study of Changing Nature of Channel Bed	172
j. The Study of Bank Erosion	173
CONCLUSIONS	173
REFERENCES	176
 Chapter VI <u>ASSESSMENT OF SOIL EROSION</u>	 177
INTRODUCTION	177
A. METHODOLOGY	177
B. RAIN EROSIVITY (R FACTOR) OF THE BASIN	180
C. SOIL ERODIBILITY (K FACTOR) OF THE BASIN	187
D. TOPOGRAPHIC EROSIVITY (L.S FACTOR) OF THE BASIN	190
E. BIOLOGICAL EROSIVITY (C.P FACTOR) OF THE BASIN	191
F. THE POTENTIAL EROSION OF THE BASIN	193
G. THE ACTUAL OR PREDICTED SOIL EROSION OF THE BASIN	195
H. THE PROPOSED CONSERVATION PLAN FOR THE STUDY AREA	198
CONCLUSIONS	200
REFERENCES	203
 Chapter VII <u>LANDSLIDE AS AN AGENT OF BASIN DEGRADATION</u>	 206
INTRODUCTION	206
A. THE GENERAL FACTORS OF SLOPE FAILURE	207
B. MAJOR TYPES OF LANDSLIDE	210
C. DETERMINATION OF VARIOUS LANDSLIDE SUSCEPTIBLE ZONES	211
D. CASE STUDY OF A SELECTED SLIDE CUM SUBSIDENCE	214
a. The Tindharia Cricket Colony Slide Cum Subsidence	215
I. History of Subsidence	215
II. Present Study of Subsidence	216
III. Study of Potential Slide Zone	217
IV. Factors of Slope Instability	219
V. Remedial & Corrective Measures	223

	<u>Page no.</u>
E. REMEDIAL MEASURES FOR THE PREVENTION AND CONTROL OF LANDSLIDES AND LANDSLIDE SUSCEPTIBLE ZONES	225
CONCLUSIONS	231
REFERENCES	233
 Chapter VIII <u>LAND EVALUATION</u>	 235
INTRODUCTION	235
A. SOIL WATER POTENTIALITY FOR AGRICULTURE	236
a. Materials & Methods	236
I. Zoning of the Soil Moisture Potentialities at Wilting Point	237
II. Measurement of Field Capacity & Other Water Potentialities	239
III. The Estimation of Required Irrigation Water Volume	239
b. Evaluation of Different Water Potent Lands for Agriculture	241
B. THE LAND CAPABILITY CLASSIFICATION	243
a. Land Capability Classes & Sub-classes and Their Recommended Landuse	244
CONCLUSIONS	254
REFERENCES	256
 <u>ABSTRACT</u>	 258
 <u>APPENDICES</u>	 267
 <u>BIBLIOGRAPHY</u>	 293
